PROCEEDINGS AND DEBATES OF THE 97th CONGRESS, FIRST SESSION

SENATE—*Friday, March 27, 1981*

(Legislative day of Monday, February 16, 1981)

The Senate met at 9:30 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, LL.D., offered the following prayer:

Let us pray.

Almighty God, Sovereign Lord of all, Thy word declares . . . there is no authority except from God, and those that exist have been instituted by God.—Romans 3: 1 (R.S.V.).

Grant that Thy servants remember that they are here by divine appointment and accountable to Thee in their work.

Give them Thy wisdom as they wrestle with complex issues—clarity in debate—courage of conviction as they vote. Keep them from compromise which sacrifices principle. Lead them to justice and compassionate decisions. May Thy grace guide their deliberations and Thy blessing crown their efforts

In the name of Him who is the light of the world. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. Under the previous order, the majority leader is recognized.

Mr. BAKER. Mr. President, is there an order to proceed to the consideration of Senate Concurrent Resolution 9 in the course of today's deliberations?

The PRESIDENT pro tempore. That is automatic.

Mr. BAKER. I thank the Chair. At what time?

The PRESIDENT pro tempore. Not later than 10 o'clock.

Mr. BAKER. I thank the Chair once more.

Mr. President, it is my understanding that certain of our colleagues are in meetings this morning and those meetings are not likely to conclude until at or just before 10 o'clock. It is my intention, then, to yield first to the distinguished Senator from Alaska (Mr. STEVENS) from the time allocated to me under the standing order, and then to yield to the distinguished assistant minority leader, the Senator from California (Mr. CRANSTON), a portion of my time under the standing order as may remain.

ORDER FOR RECOGNITION OF THE MINORITY LEADER TODAY AND FOR A PERIOD FOR TRANSACTION OF ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that at the conclusion of my standing order time, there be an order for the distinguished minority leader to reserve his time until a later point in this day, and that we may proceed to routine morning business not to extend beyond the hour of 10 o'clock, in which Senators may speak without prejudice to the rights of the distinguished minority leader under the standing order.

The PRESIDING OFFICER (Mr. D'AMATO). Without objection, it is so ordered.

Mr. BAKER. I yield to the distinguished minority leader.

EVANGELINE ATWOOD, AN OUTSTANDING ALASKAN

Mr. STEVENS. Mr. President, this evening in Anchorage, Alaskans will honor Evangeline Atwood, this year's recipient of the annual Alaskan of the Year Award.

My wife, Catherine, and I had intended to be in Anchorage to join with those honoring Mrs. Atwood, but the schedule in the Senate on the budget resolution has prevented us from returning to Anchorage. Evangeline is one of my State's most outstanding civic and cultural leaders, a noted author, and Alaska historian.

She was in the forefront of those Alaskans who worked so diligently to see the territory of Alaska become a State. In those days, Alaska still suffered from the Seward's Folly mentality dating from the 1870's. Most people living outside Alaska thought we all lived in igloos and were a bunch of rowdy backwoodsmen searching for the "mother lode." Through the efforts of dedicated Alaskans like Evangeline Atwood, that image has changed.

She was a prime mover of the Alaska Statehood Commission—an organization of Alaskans who contributed their time and resources toward the statehood battle. In 1950, she edited a significant publication which aroused interest in Alaska's cause, entitled "83 years of Neglect: Alaska's Struggle for Self Government." This publication detailed how the Federal Government had avoided its responsibility to the territory of Alaska.

During our long statehood battle, whenever visiting foreign or national dignitaries came to town, Evangeline and her husband graciously opened their home to the visitors. Her knowledge of national politics, as well as territorial politics, helped convince many of the visiting U.S. Senators and Congressmen that Alaska was indeed ready for statehood.

During the State's constitutional convention, Evangeline Atwood was very active working with the delegates—urging them to draft a progressive, flexible document that would survive many years without change, just as our National Constitution has. As one of the delegates told me, Evangeline kept admonishing them not to be shortsighted but look to the future, because today had already passed.

The daughter of Presbyterian missionaries, Evangeline was born in Sitka, Alaska and has lived in Yakutat, Juneau, and Anchorage. She earned a BA degree in sociology from the University of Washington and a graduate degree in social science administration from the University of Chicago. After working as a social caseworker in the lower 48, she returned to Alaska, where she worked as a newspaper reporter.

This background prepared her for the number of historical books on Alaska she has since authored. She once said she began writing historical books because she heard the stories Alaskans were telling about past events and recognized, as those stories were retold, they got farther away from the truth.

Setting out to document facts and events objectively, Evangeline produced a number of excellent works, including a history of the city of Anchorage, a "Who's Who in Alaskan Politics," the story of the colonization of the Matanuska Valley, Alaska's rich farming area, and a definitive biography of Judge James Wickersham, who served for 12 years as the territory of Alaska's delegate to Congress.

Evangeline served on Alaska's Technical Review Board for Historic Preservation and the Alaska Historical Commission, and was the inspiration for the Cook Inlet Historical Society. At the

initial meeting of that group, Evangeline got about 175 people to turn out. Members started collecting Alaskan artifacts, which were intially displayed on the balcony of the Anchorage Library. As the collection grew, the members obtained a couple of showcases and moved the display to the basement of the City Hall Annex. Eventually, that collection became the inspiration of the Anchorage Fine Arts and Historical Museum. In recognition of her contributions in documenting Alaskana, she was named "Historian of the Year" in 1975 by the Alaska Press Club's Hall of Fame. In 1967, Evangeline received an honorary doctorate from the University of Alaska, Fairbanks.

Perhaps the most significant contribution Evangeline has made to our community and our State is her continuous role as a catalyst and prime mover for change and progress. She was the founder of the League of Women Voters in Anchorage and the Alaska World Affairs Council. She has served as president and State director of the Alaska Federation of Woman's Clubs and president of the Anchorage Woman's Club. Evangeline organized the local Parent-Teacher Association and participated in the formation of the Anchorage Opera Association and the Anchorage Community Theater.

When I think of Evangeline Atwood, I cannot help but recall the beautiful log home that the Atwoods had along Cook Inlet prior to the 1964 earthquake. That house was one of the many losses we suffered as a result of that earthquake, when it was destroyed.

Following that, the Atwoods built the Marilaine, which is probably the most impressive home in Alaska. In both of these homes, we have been privileged to be guests at meetings and in discussion groups and social events where, literally, the future of Alaska has been shaped. An evening at the Atwoods always involves discussions with people interested in and concerned about bettering Alaska's future.

Mr. President, Evangeline Atwood and her husband, Bob Atwood, have lived in Anchorage since 1935. They are the parents of two daughters, Marilyn and Elaine. Bob is the editor and publisher of the State's largest newspaper, the Anchorage Times. In 1967, Bob was the first person to receive the Alaskan of the Year Award in recognition of the outstanding contribution that he has made to the growth of our State. Over the years, the award has gone to distinguished Alaskan government and business leaders, artists, publishers, and aviators who have been recognized for their accomplishments.

This year Alaskans are again honoring another great Alaskan, Evangeline Atwood, who, throughout her life, has cared for and acted on behalf of her State and its people.

ERRONEOUS NEWS REPORTING OF SENATOR ROBERT C. BYRD'S VOTE

Mr. ROBERT C. BYRD. Mr. President, for the record, I am told that NBC last evening, in its reporting the news, stated that I, ROBERT C. BYRD of West Virginia, voted with the Republicans in opposing the restoration of certain cuts to veterans' health care services.

The record shows that I did not vote with the Republicans, and I wish that NBC would retract that statement and correct it. I do not want that misinformation going out to the State of West Virginia.

The record will show that I did not vote against restoration of cuts, and I believe that NBC, in its fairness, will make that correction.

ROUTINE MORNING BUSINESS

Mr. STEVENS. Mr. President, I yield back the remainder of the leader's time, and I ask that the Senate now go into a period of routine morning business, pursuant to the previous order.

The PRESIDING OFFICER. Under the previous order, the Senate will now proceed to consider routine morning business, not to extend beyond 10 a.m.

Mr. STEVENS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. CRANSTON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. MURKOWSKI). Without objection, it is so ordered.

Mr. CRANSTON. Mr. President, I ask unanimous consent that I may proceed for 2 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

EL SALVADOR POLICY

Mr. CRANSTON. Mr. President, a number of people, I among them, were disturbed by press reports a couple of days ago that indicated the remarks made by Acting Assistant Secretary John A. Bushnell, of the State Department, could indicate a view that anyone opposing our supplying weapons to El Salvador is somehow allied with the Communists and part of a Communist conspiracy.

That would be a dangerous and unpleasant slur, if that was an administration position, on many people whose motives are totally patriotic but who have differences of opinion over what we are presently doing in El Salvador.

Therefore, I wrote to Secretary of State Alexander M. Haig, Jr., asking for clarification of this matter, and pointing out the dangers of any such policy that would be interpreted by many—and if it was the policy it would be the fair interpretation—of going back to the days of McCarthyism.

I received a very satisfactory explanation from the State Department making plain that that was not the intent of Mr. Bushnell, that it was not the intent of the State Department.

The letter closes by saying:

I would hope that these clarifications eliminate any interpretation of "international McCarthyism." Neither Mr. Bushnell nor anyone else in the Department would impugn the motives of those who in good faith oppose our policies.

Mr. President. I ask unanimous consent that my correspondence with the State Department and their reply be printed in the RECORD.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

MARCH 25, 1981.

DEAR AL: A number of people—I among them—were greatly perturbed by the inferences that could be drawn from remarks reportedly made by Acting-Assistant Secretary John A. Bushnell before the House Subcommittee on Inter-American Affairs Monday. He is quoted as having said that protests against U.S. policy in El Salvador were the work of a "well-orchestrated effort" by a "worldwide communist network".

As you know, I basically support our El Salvador policy, at least to this point. And I do not doubt that communists, in the Soviet Union, Cuba, and elsewhere, are trying openly and covertly to provoke criticism of the U.S.

But to suggest—as Mr. Bushnell was widely interpreted as suggesting—that anyone opposing our supplying weapons to El Salvador is somehow allied with the communists is an unfair slur on the motives and the reputations of many people who have an honest difference of opinion with us.

More dangerous yet, fears have been expressed to me that Mr. Bushnell's remarks could be interpreted as signaling the rise of a new form of international McCarthyism under which all criticism of U.S. policy is to be branded as communist-inspired. And that this hunt for communists overseas might spill over into another witch hunt for domestic communists, such as we sadly experienced in the Red-baiting days of the late Senator Joseph McCarthy.

Earlier today, a member of my staff phoned Mr. Bushnell seeking clarification of his remarks. His response was helpful to my understanding of what he meant.

But I believe this matter is of such overriding importance, Al, involving as it does a widespread perception of the intentions of your Department if not the Administration as a whole, that only a full public statement can help allay the understandable concerns that exist.

I plan to make this letter public, after it has been delivered to you.

While asking you to clarify your Department's policy in view of Mr. Bushnell's statement, I want to clarify my own position on the Administration's El Salvador policy. My present support for that policy is based upon the assumption that we are doing our utmost to encourage land reforms and other reforms in El Salvador, and, while I accept the present level of military advisors now there or scheduled to go there, I would oppose sending any additional military personnel to that country.

Thank you for your attention to this matter, and my continued wishes for your success in a very demanding—and vital—post.

Cordially,

ALAN CRANSTON.

DEPARTMENT OF STATE,
Washington, D.C., March 26, 1981.

Hon. ALAN CRANSTON,
U.S. Senate.

DEAR SENATOR CRANSTON: Secretary Haig is very pleased that you are supporting the Administration's policy on El Salvador. The Government in El Salvador continues to press ahead with its major program of socio-economic reforms, especially the land reform. The limiting factors are the availability of technical resources and shortage of funding. We are helping with these problems, but there are also limits on what we can do. The Government expects to distribute between 15,000 and 30,000 titles this year. More than a thousand have already been provided to former tenant farmers.

We currently have no plans to increase the number of U.S. military trainers and technical personnel in El Salvador. We must, of course, retain flexibility should there be a change in the situation.

We regret that some confusion seems to have arisen in the press treatment of an exchange between Congressman Gejdenson and Acting Assistant Secretary Bushnell. We do not yet have the official transcript but the exchange was along the following lines.

The Congressman asked if Mr. Bushnell believed the demonstrations in Latin America against our embassies indicated problems inherent in our Salvadoran policies.

Mr. Bushnell replied that he did not see such demonstrations as a sign of problems. He said many of these demonstrations are organized and promoted by a worldwide communist network which has given a very high priority to opposing U.S. policies concerning El Salvador. If anything, it was encouraging that the size of the crowds the far left has been able to organize in most Latin countries has been quite small.

There was a follow-up question on how we knew the communists were doing this orchestration. Mr. Bushnell replied that he could not go into that issue in depth in open session. He called attention to the emphasis given Salvadoran matters in the communist press and by radio broadcasts from Cuba and the Soviet Union to Latin America.

Mr. Bushnell went on to point out that these radio broadcasts claim that the U.S. has up to a thousand troops in El Salvador and they claim these forces are engaged in combat against Salvadorans. Mr. Bushnell said some people probably joined demonstrations in Latin America because of opposition not to what we are really doing in El Salvador, but to what the communist radio claims we are doing.

Because of partial quotation in some press reports, there may be an impression that Mr. Bushnell was dealing with the reasons for demonstration or even other forms of opposition within the United States. It should be quite clear that he was referring only to Latin America and that he was talking only about demonstrations. Also, I would add that no one should take his remarks to mean that every individual participating in every demonstration was either a communist or misinformed. This exchange dealt in generalities with the situation in Latin America.

The Department's press spokesman has clarified this issue in response to press questions. I would hope that these clarifications eliminate any interpretation of "international McCarthyism." Neither Mr. Bushnell nor anyone else in the Department would impugn the motives of those who in good faith oppose our policies.

Thanks for your letter.

Yours sincerely,

RICHARD FAIRBANKS,
Assistant Secretary
for Congressional Relations.

Mr. CRANSTON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADJUSTMENT OF PRICE SUPPORT ON MILK

Mr. BAKER. Mr. President, I ask unanimous consent, notwithstanding the provisions of the order previously entered, that it now be in order to ask the Chair to lay before the Senate a message from the House.

Without objection, the Presiding Officer laid before the Senate the following message from the House of Representatives:

Resolved, That the bill from the Senate (S. 509) entitled "An Act to amend section 201 of the Agricultural Act of 1949, as amended, to delete the requirement that the support price of milk be adjusted semiannually", do pass with the following amendment:

Strike out all after the enacting clause, and insert: "That section 201 of the Agricultural Act of 1949, as amended (7 U.S.C. 1446), is further amended by deleting subsection (d).".

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ZORINSKY. Mr. President, the Senate is being asked to approve the clean milk support bill as passed by the House and so strenuously desired by the majority leadership in the Senate.

While I voted in support of S. 509 to withhold the April 1 semiannual adjustment of dairy support levels, I had hoped that my amendment to deal with the embargo would have been approved and included in the final legislation.

In place of my amendment, the Senate accepted a toothless sense of the Senate resolution, but even this resolution has been dropped from the final dairy support bill. I described the resolution as being a sham and voted present rather than lend any credence to it.

While I am disappointed at the rejection of my amendment, I am more convinced than ever that it represents a sound approach to deal with the embargo. It gives the President a variety of options, and it does not tie his hands. My amendment does encourage the President to make a decision and let our producers know what he plans to do.

Because of my strong convictions on this matter, I introduced my amendment as a bill, S. 802, on March 25. Senator HELMS has offered to support and work for this legislation, and I am hoping that he and others will help move this legislation forward.

Mr. BAKER. Mr. President, I move that the Senate concur in the House amendment.

The PRESIDING OFFICER. The question is on agreeing to the motion.

The motion was agreed to.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

BUDGET RESOLUTION OF RECONCILIATION AND INSTRUCTION

The PRESIDING OFFICER. Under the previous order, the Senate will now resume consideration of Senate Concurrent Resolution 9, which the clerk will state by title.

The assistant legislative clerk read as follows:

A concurrent resolution (S. Con. Res. 9) revising the congressional budget for the United States Government for the fiscal years 1981, 1982, and 1983.

The PRESIDING OFFICER. Who yields time?

Mr. DOMENICI addressed the Chair.

Mr. BAKER. Mr. President, will the Senator yield to me for a brief moment for a unanimous-consent request?

Mr. DOMENICI. I am happy to yield.

Mr. BAKER. Mr. President, a number of Senators on both sides of the aisle, are necessarily absent from the Chamber, and will be until 11:30, in order to attend the funeral services of a distinguished American. I ask unanimous consent that any votes that may be ordered this morning prior to 11:30 occur beginning at 11:30 a.m. today.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. I thank the Senator for yielding.

Mr. ROBERT C. BYRD. Mr. President, I thank the distinguished majority leader for making that request to protect our colleagues on this side of the aisle.

Mr. DOMENICI. Mr. President, I would like to just take a moment to talk with the distinguished minority floor manager. We have been operating, as he knows, under a voluntary arrangement where we take one amendment on his side and one on our side. There have been three on the Democrat side. So, obviously, it is our turn.

We need just a couple of moments. Our amendment will be offered by Senator HELMS. I do not know how much time he will want to take. If that is satisfactory, we will proceed with him.

Mr. HOLLINGS. Certainly, that is perfectly agreeable.

UP AMENDMENT NO. 22

Mr. HELMS. Mr. President, I have an amendment at the desk that I call up and ask to have stated.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from North Carolina (Mr. HELMS) proposes an unprinted amendment numbered 22.

Mr. HELMS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 4, lines 7 through 10 insert the following: Strike: "$3,462,000,000 in budget authority and $3,400,000,000 in outlays for fiscal year 1982; and $4,210,000,000 in budget authority and $4,161,000,000 in outlays for fiscal year 1983." and insert in lieu thereof: "$3,243,000,000 in budget authority and $3,200,000,000 in outlays for fiscal year 1982; and $4,011,000,000 in budget authority and $3,961,000,000 in outlays for fiscal year 1983."

On page 8, line 8 through 11, insert the following: Strike: "$150,000,000 in budget authority and $101,000,000 in outlays for fiscal year 1982 and $196,000,000 in budget authority and $167,000,000 in outlays for fiscal year 1983." and insert in lieu thereof: "$1,050,000,000 in budget authority and

$301,000,000 in outlays for fiscal year 1982 and $600,000,000 in budget authority and $367,000,000 in outlays for fiscal year 1983."

Mr. HELMS. Mr. President, this amendment is a very simple amendment, even though it involves rather hefty arithmetic. It does the following: It cuts $900 million in budget authority and $200 million in outlays in fiscal year 1982 from programs under the jurisdiction of the Committee on Foreign Relations. That is to say, foreign aid.

Also, for fiscal year 1982, it adds $200 million in budget authority and $200 million in outlays for programs under the Agriculture Committee jurisdiction.

Mr. President, as the distinguished occupant of the chair knows, I am chairman of the Committee on Agriculture and I am a member of the Committee on Foreign Relations.

At this point, Mr. President, I ask unanimous consent that the distinguished Senator from Kansas (Mr. DOLE) be listed as a principal cosponsor of the pending amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. Mr. President, this amendment will permit restoration of $200 million for school lunches or other nutritional purposes or programs. In addition, I believe that $100 million of funds now identified for Public Law 480, foreign food assistance, can be shifted by the Committee on Agriculture to domestic nutrition programs. This will permit funding of nutrition programs at a level $300 million higher than proposed by the President.

Mr. President, I think this is a reasonable change and I think it is desirable. I believe it will help assure many of those who feel that the President may have cut nutrition programs a little too deeply. I do not happen fully to share that apprehension, but I do want to relieve the apprehensions, as much as possible, of those who are concerned.

Further, the amendment would increase reconciliation totals for the Foreign Relations Committee by $404 million in budget authority and $200 million in outlays in fiscal year 1983. In addition, as I said earlier, the Committee on Agriculture, Nutrition, and Forestry, will consider reductions in Public Law 480 concessional food sales.

Mr. President, the Foreign Relations Committee totals that are being reduced include an inflation allowance of 12 percent. This amendment would remove any allowance for inflation in foreign aid programs.

Because many foreign aid programs spend very slowly in the first years, in order to save $200 million in outlays, almost $1 billion in budget authority must be cut. Some, but not all, of this reduction may have to come from security assistance programs.

Mr. President, the distinguished Senator from Kansas is on his way to the floor. Pending his arrival, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DOMENICI. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOMENICI. Mr. President, I ask the chairman of the Committee on Agriculture, under the rules amendments and the Budget Act, I assume that this quorum call is coming out of the time of the proponent of the amendment. Is that correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. DOMENICI. Mr. President, I thank the Chair.

I suggest the absence of a quorum.

Mr. HELMS. Will the Senator withhold that?

Mr. DOMENICI. Of course.

Mr. HELMS. Mr. President, I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. Who yields time?

Mr. HELMS. Mr. President, I suggest the absence of a quorum, with the time charged equally to both sides.

The PRESIDING OFFICER. Is there objection?

Mr. ROBERT C. BYRD. Mr. President, I have to object to that.

Mr. HELMS. That is fine. We shall just sit tight, then. The time obviously will be divided equally without a quorum call.

The PRESIDING OFFICER. If nobody yields time, the time is charged equally to both sides on the amendment.

Mr. ROBERT C. BYRD. Mr. President, what did the Chair just say?

The PRESIDING OFFICER. If neither side yields time, time is charged equally against both sides on the amendment.

Mr. ROBERT C. BYRD. Mr. President, what is wrong with the mover of the amendment yielding time from his amendment?

The PRESIDING OFFICER. Either side may yield time on the amendment. If neither side yields time, the time is charged equally.

Mr. ROBERT C. BYRD. This side did not ask for a quorum.

The PRESIDING OFFICER. There is no quorum. Time will be charged equally to both sides.

Who yields time?

If neither side yields time, time runs equally against each side on the amendment.

Mr. HOLLINGS addressed the Chair.

The PRESIDING OFFICER. The Senator from South Carolina is recognized.

Mr. HOLLINGS. The distinguished Senator from Michigan wants to talk in opposition, on our time.

The PRESIDING OFFICER. The Senator from Michigan.

Mr. RIEGLE. I thank the Senator from South Carolina for yielding.

I want to direct my comments to the Senator from North Carolina, who was just on the floor and who has offered the amendment. I think he may have stepped into the cloakroom. I want to make sure he has an opportunity to hear what I am about to say, because it is directed at his amendment.

Mr. DOLE. We will try to retrieve him. Is the Senator for the amendment?

Mr. RIEGLE. I want to ask a question or two about the amendment. I am not sure I understand it.

I must say that I am surprised to see that the first chairman—the very first chairman—to come to the floor of the Senate during this budget debate to ask for more spending room for his committee is the Senator from North Carolina. The reason I am surprised is that I have heard a number of speeches by him over a long period of time about the need to cut Federal spending. So it is an ironic note that the first chairman—the very first Republican chairman on the floor—to reduce the cuts for his committee is the chairman from North Carolina.

He is here. I am delighted to see him on the floor.

Those of us who serve on the Budget Committee know that we cannot earmark line items within these individual budgets. We are approving overall spending totals by committee.

So, while the chairman may come in today and offer a particular justification for increasing the size of his committee's budget, there is absolutely no way that he or anybody else can guarantee how that money will be spent.

As a matter of fact, the money can be spent on tobacco sudsidies; it can be spent on anything at all under the jurisdiction of that commmittee.

Mr. HELMS. Mr. President, will the Senator yield?

Mr. RIEGLE. I will be happy to yield in just a moment.

Mr. HELMS. The Senator is talking about tobacco sudsidies.

Mr. RIEGLE. I know the Senator does not feel that there are tobacco subsidies, and we have a disagreement on that.

My point is this: We do not earmark money by specific programs by action we take either in the Budget Committee or on the Senate floor.

So if the Senator from North Carolina is successful and if he gets some extra money to spend in his committee there is absolutely no way for us to know today how that money will be spent. I hope it would be spent on school lunches, but there is no guarantee that that is what it will be spent on. The Senator from North Carolina, like all the rest of us, has one vote.

But it is significant, I think, and ironic that the Senator whom I have heard speak about reducing Federal budgets as much as anyone around here should come on the floor today asking to increase his budget and take the money from some other committee. We are all going to vote to reduce the budget, we are all going to vote that way; we voted that way unanimously in the Budget Committee.

I wish I knew for a fact that adoption of this amendment would go to help provide school lunches or to support other activities of that committee that are urgent and important to people in need across the entire country. But there is

no way we can have that assurance today.

We can hear from the Senator as to how he would propose to spend that money, but he knows better than anyone else in this Chamber that once he enlarges that pot of money in his committee it can be spent any way that committee decides to spend it, because there is very wide flexibility.

He asked me to yield for a question and I am happy to do it.

Mr. HELMS. I do not believe I will ask the Senator to yield for a question. I will take the floor in my own right because I do not want him interrupting me.

If the Senator wishes me to yield, I make this observation: I never heard a finer political statement in my life, and I congratulate him.

Mr. RIEGLE. Coming from the Senator, that is high praise.

Mr. HELMS. I appreciate that.

Mr. RIEGLE. I wish to make it clear that we have worked here together for a long time and I think we have enjoyed a good personal relationship. I think we do now and I trust we will after this debate. We can have our differences of opinion as we do and that does not have to affect personal relationships.

But I am struck by it. As I have gone through this budget process in the Budget Committee we have seen cut after cut after cut that impacts very heavily on my region of the country, impacts on my State of Michigan. As a matter of fact, I do not think there is a single State of the 50 States that is asked to take a larger measure of sacrifice with respect to the cumulative effect of the cuts than my own State of Michigan. We are starting out today with an unemployment rate in my State of 14.2 percent and that unemployment is partly caused by the huge financial drain that Federal tax and spending policies have inflicted on States in my region, the Northeast.

There is no guarantee that the extra money that the Senator has asked for in his committee will make its way into a program that will spread benefits evenly across the 50 States.

I read with great interest the news reports of remarks the Senator made the other day, in a meeting with the tobacco farmers down in his State. He was telling them that there is no tobacco subsidy. There are others of us who have a different view of that.

I just hope that if the Senate should vote to provide more money for that committee, that the committee will apply the funds to programs that are going to benefit all the people of the country. Only time will tell if that is the case. This is an interesting moment and one that should not pass unnoticed.

I yield the floor.

Mr. HELMS addressed the Chair.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. HELMS. Mr. President, I am intrigued that my friend from Michigan professes to see what he described as an irony, inasmuch as what I am proposing is merely to take some money out of foreign aid and designate it for transitional purposes in connection with the school lunch program.

I am surprised that the Senator from Michigan apparently is opposed to that. I wonder what the reaction of his school children and their parents back in Michigan is going to be.

Mr. RIEGLE. Mr. President, will the Senator yield?

Mr. HELMS. I did not interrupt the Senator and I know he will forebear. I want to address his comments in just a minute.

Mr. ROBERT C. BYRD. Mr. President, let us have order in the galleries also. I beg the Senator's pardon. He is entitled to attention and the rules, of course, prohibit any demonstrations with support or approval from the galleries and it is the Chair's responsibility to maintain that order.

The PRESIDING OFFICER. The Senator will suspend.

The Senator is correct and the galleries will not make any demonstration. They are guests of the Senate.

The Senator from North Carolina.

Mr. HELMS. I thank the Senator from West Virginia and I thank the Chair.

Mr. President, I recall my former colleague, the distinguished Senator from North Carolina, Mr. Sam J. Ervin, Jr., once having said he had never voted for a dime for foreign aid. He said that he might vote for foreign aid some year down the line but he could not imagine when that time would ever arrive.

But that is apropos only to explaining my surprise at comments made by the distinguished Senator from Michigan. Surely, he knows what the amendment is all about. It does not increase Federal spending. It merely adjusts our priorities a bit. It is taking some money which otherwise would go to foreign countries and applying a small part of it for school lunches for American schoolchildren, I fail to see what is so ironic about that. It makes sense to me.

I am just surprised that my friend from Michigan implies that there may be some intellectual dishonesty here. I do not believe that he could have any reason for surmising that the Senator from North Carolina would not do what he says he will do. I do not think that he doubts for 1 minute what the Agriculture Committee will do, the legislative history of this amendment being what it is. I am surprised at his comments, but I want him to know I feel no ill will toward him.

Mr. BOREN. Mr. President, will the Senator yield?

Mr. HELMS. Yes, but I will have to yield on the time of the other side.

The PRESIDING OFFICER. Who yields time?

Mr. KENNEDY addressed the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. KENNEDY. Mr. President, I ask for recognition.

The PRESIDING OFFICER. Who yields time to the Senator?

Mr. HOLLINGS. He has his own on the amendment, certainly.

The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. KENNEDY. Mr. President, when we listen to the good Senator from North Carolina argue that his amendment will restore some $200 million for the school lunch program, it is important that we recognize that it was his administration which recommended a $1.6 billion reduction in the school lunch program. Fourteen and a half million children will not get school lunches under the administration program.

So before we start this debate and all pledge support for school lunch programs for children, whether in Michigan, Massachusetts, North Carolina, or in any other part of the country, let us point out from the beginning that the administration initiated the $1.6 billion cut in school lunch and nutrition programs. On this side of the aisle, we have proposed to restore $800 million for these programs: $400 million for the school lunch programs and $400 million for child nutrition programs.

The Senator from North Carolina wants to talk about his support for school lunches and for feeding children. Let us not be mistaken about what his amendment really does. It takes away the crust of bread from starving children in Africa or in Southeast Asia under the pretense that we will teach the dictators and the totalitarian regimes over there a lesson and feed the good American kids back here at home. That is hogwash. This is absolutely hogwash. And the Senator from North Carolina understands it, and we understand it here, and the American people are going to understand it certainly before this debate is over with.

The Senate should be prepared to vote up or down on school lunches, to vote "yea" or "nay." If the American people want to label Senators who vote for those programs as "big spenders" let us be prepared to take that particular challenge, that particular risk, and that particular responsibility.

But let us not delude the American people into thinking that because you support the Helms amendment you are cutting out foreign aid to wicked nations and feeding hungry people here. Let us stand up and be counted on that issue. Let the Senator from North Carolina permit the Senator from Tennessee, who is prepared to offer this amendment right now, to call the roll.

But before we vote, I believe it is important to state my belief that the Senator from North Carolina does not have the right and legitimacy to say that he is restoring the food lunch program for hungry Americans. The fact of the matter is the administration has substantially reduced the benefits of this program for any family whose income exceeds the $11,000, and has eliminated

all benefits for families who make more than $16,000. About 14.5 million children will be affected. Under the Reagan administration proposal we are going to have two lines of children in school lunchrooms. One line will be the poor kids and the other will be the kids of working people.

With the doubling of the cost of the school lunch program because of the administration cuts, there may not be any cafeterias at all. So these kids may start off brown bagging it, which is not as healthy, as any nutritionist in this country understands.

This whole school lunch program began back in 1946 after World War II. The Selective Service found that many individuals who were drafted into the Armed Forces suffered from malnutrition. For the first time we in the United States realized that there were millions of young Americans who were hungry and malnourished. People did not understand it. These school lunch programs were initially adopted for national security interests.

The Field Foundation found, in its initial study on food and nutrition in this country, that many children were suffering severe adverse health implications because of poor nutrition. Then after we initiated nutrition programs for young children, the Field Foundation produced a second study which found a 40-percent reduction of infant mortality in many of the inner cities and rural communities of this country, and a significant difference in the whole quality of health and quality of life for millions of children in this country.

The programs that produced these amazing results were the school lunch program, the child nutrition program, and the food stamp program for children.

All that we are talking about today is 40 cents per meal for children in the schools of this country. This administration has cut that money out and the Helms amendment is not putting it back in.

I say to the Senator from North Carolina that we will give him an opportunity later in this budget debate to vote on some real amendments from this side of the aisle which will put more money back into these important programs.

Mr. BAKER addressed the Chair.

The PRESIDING OFFICER (Mr. GRASSLEY). The Chair recognizes the majority leader.

Mr. BAKER. Mr. President, will the distinguished manager of the amendment yield 2 minutes to me?

Mr. DOLE. Mr. President, I have been authorized to yield 2 minutes to the Senator from Tennessee.

Mr. BAKER. Mr. President, more than any of the debate I have heard so far, the statement by the distinguished Senator from Massachusetts displays the difference between the minority's point of view on the state of this Nation's economy and the majority's point of view.

I believe the poor of this country would be cruelly used by any effort to try to restore to this budget full funding for programs that have failed. I believe that the proposal by the Senator from North Carolina——

Mr. KENNEDY. Will the Senator yield?

Mr. BAKER (continuing). Provides for what should be provided by a human and compassionate country, that is food for those who cannot feed themselves, and at the same time, it does not provide public funds, in this time of economic distress, to those who should not have them—to the children of the rich and the middle-income families of this country.

Mr. KENNEDY. Will the Senator yield?

Mr. BAKER. The argument of the Senator from Massachusetts shows the very essence of the difference in our points of view. The amendment that the Senator from Massachusetts refers to would really give us a chance to add to the measure before us. I am sure everyone will note it will do just that: It will add, but it will not take away anything.

Mr. President, the responsibility of this side, of the majority in the Senate, in my view, is to make sure that when we add to programs, we take away someplace else, because be have to get our economy under control.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Chair recognizes the Senator from Kansas.

Mr. KENNEDY. Mr. President, will the Senator yield a few minutes? Will the Senator yield 3 minutes?

Mr. HOLLINGS. Yes.

Mr. HELMS. Mr. President, the Senator from Kansas has the floor.

Mr. KENNEDY addressed the Chair.

The PRESIDING OFFICER. Will the Senators suspend for a minute?

The Chair recognizes the Senator from Kansas.

Mr. DOLE. Mr. President, I ask the Senator from North Carolina if he would yield to me.

Mr. HELMS. I yield to the Senator from Kansas.

Mr. KENNEDY. Mr. President, the Senator from Tennessee has referred to the Senator from Massachusetts.

Mr. DOLE. Mr. President, I am going to refer to the Senator from Massachusetts, also.

Mr. KENNEDY. Mr. President, I should be entitled to respond to the Senator's charge to the Senator from Massachusetts.

Mr. DOLE. Mr. President, regular order.

Mr. HELMS. Mr. President, who has the floor?

The PRESIDING OFFICER. Does the Senator from North Carolina yield?

Mr. HELMS. I yield to the Senator from Kansas.

The PRESIDING OFFICER. The Chair recognizes the Senator from Kansas.

Mr. METZENBAUM. Mr. President, I object. Under the rules of the Senate, no one Senator may yield the floor to other Senators.

Mr. HELMS. Mr. President, I yielded time.

Mr. METZENBAUM. The Senator was asked to yield. The Chair ruled that the Senator yielded to the Senator from Kansas and the rule of the Senate does not permit one Senator to yield to another.

The PRESIDING OFFICER. Under a time limitation, that is precisely the way the floor is allocated.

The Senator from North Carolina yielded to the Senator from Kansas, which he has a right to do.

Mr. HELMS. I thank the Chair.

Mr. DOLE. Mr. President, this is pretty exciting this early in the morning. I am glad I happen to be in town. [Laughter.]

I would say that I think I have some credibility insofar as nutrition programs are concerned. Maybe it is the fact that it is not that anyone disagrees with what we are doing, but it is who offers the amendment.

I want to say—not in defense of Senator HELMS; he does not need any defense—that I think this indicates our concern, that the child nutrition programs have been cut too deeply. Nutrition is one area in which we think there should be an adjustment. I commend the distinguished chairman of the Agriculture Committee for initiating this effort.

As a cosponsor of this amendment, and as chairman of the Nutrition Subcommittee, I hope that I can assure the Senator from Massachusetts and the Senator from Michigan—if, in fact, they want assurance, which I doubt—that this money will go for nutrition.

Now, I would just say, in a general way, that we are hearing the same, tired liberal voices who have gotten us into this spending mess in the first place, telling us we ought to do this and we ought to do that. We have listened to that tune for the past 20 years, and we are in the position we are today because of it.

I do not question their motives. I just question their philosophy and whether this is the way we need to go at this time in America.

I have been accused of being very liberal in the food stamp area. Some have suggested that this is because they eat things we raise in Kansas. I have never really understood that argument, because not very many people in Kansas support the food stamp program.

But I do suggest that we have made gains in the food stamp program, and have made reforms in the food stamp program. We have made gains in the school lunch program and in the WIC program, and this has always been on a bipartisan basis. I hope we are not sowing the seeds of destruction in that bipartisan support here today.

I believe the Senator from North Carolina. I believe in the amendment. I have cosponsored the amendment. It is approximately what many on the other side have agreed or suggested we ought to put back into nutrition: $300 million.

Now, if you do not want to take it out of foreign aid, if you want to give it overseas instead of to the people in this country, then you vote against the amendment. But if you want to help the children in your schools in Michigan and Massachusetts and Kansas, then you vote for the amendment.

I believe there is enough in foreign aid. We are not going to do violence to the foreign aid program or the Public Law 480 program. I suggest that we are not going to do any harm by making some cuts in some of these programs.

I hope the Senator from Kansas has had some influence on the administration at the outset in trying to temper the cuts in the food stamp program. We were successful in that. As chairman of the Nutrition Subcommittee, working with Senator LEAHY and Senator HELMS and others on that subcommittee and on the full committee, I believe that we can work out a program that will be acceptable. However, at the same time, we recognize that, as the distinguished majority leader said, we are in a time of economic crisis, and we need to make some changes.

Mr. President, the proposed changes in the child nutrition program will concentrate immediate resources where they are most needed; 10.3 million children from poor families will continue to receive fully subsidized school lunches and 3 million will also benefit from a fully subsidized breakfast in school. An additional 1.8 million will continue to receive reduced-price lunches and/or breakfasts. I do not see anything wrong with that. That is the way it should be. This is what we are making certain of. This is why we need the other $300 million in the so-called transition package to make certain we can carry out that pledge.

So I rise in support of the amendment proposed by my colleague from North Carolina, along with the Senator from Kansas, to restore $300 million—not the $200 million referred to by the Senator from Massachusetts—in child nutrition programs.

As many in the Senate are aware, I think I have demonstrated over the years my concern for child nutrition programs, in particular, the school lunch program. I hope that we can adopt this amendment.

I, frankly, have said that we have cut too deeply in the nutrition programs. They were forced, as the Senator from Massachusetts correctly stated, to absorb a cut of $1.6 billion, and that is a cut of about 40 percent. This seems to me to be a bit inequitable, in that most programs are being cut back anywhere from 10 percent to 25 percent. Now we are restoring $300 million. I think we are going in the right direction.

Since its beginning in 1964, the national school lunch program has demonstrated its effectiveness and gathered universal support from communities across the country. Here in Congress, it has always had strong bipartisan support, because it is a program that stands on its own merits and has not been subject to the fraud and abuse image that plagues certain other Federal nutrition programs.

Mr. President, although I am generally supportive of the President's economic package, I do have some reservations concerning the magnitude of cuts in the child nutrition programs. I think the least we can do is put a little money back into this very worthwhile area, and there may be some other area in the wide spectrum of possibilities that we may be able to take money out of to compensate for this minimal restoration.

IMPACT OF CUTS ON PARTICIPATION

Mr. President, the reason I deviate from the President's proposals on this particular point is that I sincerely believe that good nutrition for our children is one of the best investments this country can make in its future well-being. We are all becoming increasingly aware of the inextricable link between nutrition and good health. Undermining the viability of the school lunch program would make it impossible for schools to run these programs like a business.

Eliminating the subsidy to paying students will have drastic consequences in school districts back home. Middle-income students are not necessarily wealthy, and families with more than one child will find it difficult to pay a dollar or more per child for a lunch. Multiply this by 5 and then by the number of weeks in the school year, and the drain on a middle-income family is substantial. At certain income levels, the tax cut will not even balance out this added expenditure.

Middle-income families will send their children off to school with a bag lunch or else they will end up going to a fast food place to buy their lunches. This will result in a significant percentage of paying students dropping out of the program, and schools will finally decide that it is no longer cost-effective to run the Federal program. Schools in Kansas, for example, will be forced to conduct a program for the sake of about 30 percent or less free and reduced price category students, and they will simply make a determination not to comply with all the Federal redtape in order to preserve a program for a minority of low-income students. What will then happen is that these students will no longer have the opportunity to participate in the school lunch program because this program will no longer be offered in many schools. I think this is a matter of grave concern.

SEGREGATION OF LUNCHROOM

There are currently 27 million children receiving a school lunch each day in some 94,000 schools across the country. Of these 27 million children, about 37 percent fall into the free category, and about 8 percent receive reduced price lunches. "Paying" students comprise about 55 percent of total participation and now pay about 60 to 75 cents per lunch.

If the reduction in Federal subsidies is passed on to the student, the cost of the school lunch for paying students will almost double, and for reduced price students this will nearly triple. Currently students in this category pay an average of 20 cents per lunch. Participation is likely to drop about 30 percent in many schools and this percentage could reach as high as 50 percent in some schools, causing entire schools to drop out of the school lunch program.

What we are left with is a situation that looks like this: If schools drop out of the program, the poor will no longer be able to receive free or reduced price lunches, because the school lunch program as we know it will have disappeared. If schools stay in the program, the middle-class student will find other alternatives to eating in the lunchroom and will abandon the premises, thereby segregating the poor students from the rest. As we all know, this is not the way the school lunch program was designed.

IMPORTANCE OF FEEDING CHILDREN

Just about everybody recognizes the need for good nutritional input in children to help them develop sound minds and bodies. There is no question but that children who suffer from hunger demonstrate poor performance in the classroom. If we deny children of poor families a chance to learn under optimum circumstances, we are taking away from them the foundation that will enable them to get ahead for the rest of their lives.

Mr. President, I cannot emphasize enough the importance of good nutritional input in children of all ages and all income levels. Since the early part of the sixties, we have been firmly committed to eliminating hunger and malnutrition in our population and I think that extensive cuts in the area of child nutrition would cause us to step backward on the path to progress that we have taken.

Mr. President, I am also concerned about the overall economy—about a fiscal crisis, or near crisis, in this country. I believe many of the parents and many of those who administer the food service program in this country, as well as the food stamp program, and even those who are recipients of the food stamp program understand—and I hope the majority understand—that our first responsibility is trying to restore the economy in this country.

Do we want 17-percent interest rates? Do we want double-digit inflation? Do we want high unemployment? Do we want more regulation?

One reason the food stamp program is so costly and one reason the school lunch program is so costly is because of inflation.

How are we going to end it if we do not

cut spending? How will we reduce spending if we do not look at every program? There are spending reductions in some 300 programs in the Reagan economic package.

I would say to my friends on the other side of the aisle with whom I hope to work over the next few weeks that we should fashion constructive changes in the nutrition programs, whether school lunch, food stamps, or WIC. The WIC money was restored to a great extent by the Budget Committee, which was a motion I supported. Let us work together in a bipartisan effort and try to address the real problems of nutrition.

There is plenty of time for politics. We all understand that. Let us not play politics with American schoolchildren. We tried it yesterday with the veterans and it failed. It will not work with the schoolchildren. Most parents understand the need to address the economy of this country.

The bottom line is if you want to restore $300 million without doing violence to the numbers worked out in the Budget Committee, you have an opportunity.

I again congratulate my colleague from North Carolina for initiating this amendment.

I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. HOLLINGS. Mr. President, how much time remains on the amendment?

The PRESIDING OFFICER. A total of 13 minutes.

Mr. HOLLINGS. I want to yield 3 or 4 minutes to the Senator from Massachusetts.

The PRESIDING OFFICER. The Chair recognizes the Senator from Massachusetts.

Mr. KENNEDY. Mr. President, let me respond to the Senator from Tennessee, who challenged my earlier point. The administration claims that the school lunch program which it fashioned would take care of the really needy, but not take care of middle-income families or wealthy kids. I think it is important to point out for the record that the administration's program terminates school lunches for families with $11,000 income—that is the cutoff point. If you earn more than $11,000, you start losing any kind of benefits for your children in the public school system. All benefits are terminated when you have an income of more than $16,000.

Those are the ones that will be excluded from this program. Those are the sons and daughters of the "rich."

Mr. President, I hope that we will have the opportunity today to vote for the $300 million increase. If the parliamentary situation permits us to divide the amendment and just vote on the increase, I intend to do so.

I want to make a final point here, Mr. President. I think it is a sad day indeed when we pit the poorest starving people in Africa, Asia, India, and Southeast Asia—where there are about a billion on the verge of starvation—and when we pit the 15,600,000 children under 5 who die every year from hunger, disease, and malnutrition against American children. And to justify this travesty, we use the pious answer that we are going to protect the budget.

If that is what the cost of fighting inflation is, it is unacceptable. It is unacceptable. It is unacceptable for this Nation and this Congress, if that is the only area we can find to tighten the belt.

We should make no mistake about what this amendment does.

This amendment takes the small amount of resources that we are providing today to the hungriest children in the world and says, in a self-righteous way, that we are going to restore at least some part to hungry children here in this country. We are pitting needy children in one part of the world against the needy children here and doing it under the sanctimonious banner that this tradeoff is what the budget process is all about.

That approach, I think, is a travesty in terms of what this country is about and what this Nation's priorities are about.

If the Senator from Tennessee thinks this is a tired old liberal program, let me just say that this happens to be a young Democrat who is proud to have been associated with it, just as the Senator from Kansas and the Senator from Illinois, both Republicans, have been associated with it. This program has been a bipartisan effort over the years.

Sure there have been some abuses, and sure there has been some need for perfecting it. But let us see whether the Members of this body want to vote yea or nay on that particular program, and also, if necessary, vote on the question of whether we are prepared to take back the funding for feeding hungry children throughout the world.

At an appropriate time, which, as I understand, is at the time the time expires on the amendment, I will ask for a division.

Mr. President, I ask for a division.

The PRESIDING OFFICER. The amendment is subject to division and is divided.

Mr. KENNEDY. Mr. President, I ask for the yeas and nays on each.

The PRESIDING OFFICER. The yeas and nays have already been ordered and, therefore, will attach to both divisions.

Mr. HOLLINGS. I yield the few minutes remaining to the Senator from Ohio.

The PRESIDING OFFICER. The Chair recognizes the Senator from Ohio.

Mr. METZENBAUM. Mr. President, how much time remains?

The PRESIDING OFFICER. The Senator from South Carolina has 2 minutes and 40 seconds.

Mr. METZENBAUM. Mr. President, I think when the Senator from Tennessee indicated that this was the difference between the majority and the minority, he was hitting the nail on the head. The majority party has determined in its mind that somehow you can solve the economic problems of this Nation by taking it out on the backs of the poor and middle-class Americans. This is exactly that kind of program.

What has occurred? We are going to cut back on food stamp programs, we are going to cut back on lunch programs, we are going to cut back on nutrition programs, and then we are going to solve the whole problem picking up $900 million out of the foreign aid. That just does not make sense, and it indicates the continued illogical thinking of the members of the majority party.

How come the members of the majority party do not look at commodity straddles where they can pick up $1.3 billion? How come the members of the majority party do not look at industrial revenue bonds that are used to build tennis clubs, racketball clubs, McDonald hamburger restaurant places, and so many others? How come they do not look to the fact that the treatment of timber as a capital gain item is totally distinguishable from the manner in which farmers are treated generally, treated as a capital gain, costing the Treasury $650 million? How come they do not look at island possessions that cost about $400 million, and the fact that they are tax exempt?

But, no, the majority party is not willing to look at any programs that might affect those of the affluent in this Nation. They only want to do it, as far as they are concerned, on foreign aid programs that have to do with poor children and hungry mouths throughout the world and try to do something by putting back some money for the poor kids of this country.

I say that these two votes are very significant. This spells out for the people of America the difference between a nation that is committed to its people and a nation that rolls over and is totally indifferent to the human concerns which are involved in this program.

I have said it before and I repeat it again, this vote today indicates whether the majority party is indeed cruel and whether they are inhumane, whether or not the majority party is prepared to take it out on little kids, out of their mouths, but, instead, take it out of the mouths of children who are overseas. What kind of concern, what kind of a crass attitude, is that? I think this is a very clear indication of what the majority party stands for and I hope it will indicate what the minority party stands for as well.

The PRESIDING OFFICER. All time of the Senator from South Carolina has expired. Who yields time?

Mr. DOLE. Mr. President, I yield myself 2 minutes.

The PRESIDING OFFICER. The Chair recognizes the Senator from Kansas.

Mr. DOLE. Mr. President, we are talking about taking about $300 million from programs that, as I understand it, next year are in excess of $11 billion. We will not do violence to Public Law 480 or to foreign aid. I do not know of anything in this amendment that says we are going to take food out of the mouths of those who need it in Africa or some other coun-

try. People get up and make these statements and the press writes them down like they are facts. I have not seen evidence of that. I think we ought to be doing more in some of those countries, and I am certain the Senator from Ohio agrees. We have not done it in either administration. But the fact remains that we are now going to vote very quickly on the amendment itself.

I would just pledge to my colleagues—and I am not certain I can make a statement for the Senator from North Carolina but I can make it for myself—that, as chairman of the Nutrition Subcommittee which has jurisdiction over the school lunch, food stamp, and WIC programs, I will see that this money will be used to help in those areas. I will be working with the distinguished Senator from Vermont and others on the subcommittee and the full committee.

I am just simply saying that I think we have some credibility. If there was some intent by this amendment to play games, to take money away from children, I would not be a party to it. But the bottom line is that if you want to take $300 million out of $11 billion in programs (some of which are good, and considering that we still have to face economic realities), then this is an opportunity.

Mr. LONG. Will the Senator yield?

Mr. DOLE. I yield to the Senator from Louisiana.

Mr. LONG. Since reference has been made to the famine in East Africa, which is a real problem, and keeping in mind that in those areas where reference was made, we are not talking about a balanced diet but we are talking about trying to sustain life, itself, can the Senator assure us that insofar as he has influence in this matter, this amendment would not work out to deny food, calories, something to sustain life, for the children in those areas? I think that is the concern of some Senators.

Mr. DOLE. That is correct. We will be coming in with a supplemental in some of those areas. We do have jurisdiction in the Agriculture Committee over the Public Law 480 program.

Mr. President, how much time remains?

The PRESIDING OFFICER. Four minutes, 37 seconds.

Mr. LEAHY. Will the Senator yield?

Mr. DOLE. Does the Senator have a question?

Mr. LEAHY. It is more of a statement on what the Senator from Kansas said.

Mr. DOLE. I will yield on that basis.

Mr. LEAHY. I want to emphasize how necessary it is to restore some money in these feeding programs, Mr. President. This is really a drop in the bucket. I would just leave each Senator with one thought, and I will be speaking more on this as we go along: With the cuts that are being made in the school lunch program, it almost guarantees that in any rural area in this country school lunch will be a thing of the past if these cuts are not restored. The baseline will be so low that in any rural area they will be gone. I hope each Senator who has a rural constituency will realize that.

Mr. DOLE. I agree that this is a real concern. This is the very reason we are moving $300 million more into the area of nutrition. It is the same reason that I think some on the other side would have offered the amendment. The Senator has put his finger on a major concern and one which we should address in the Nutrition Subcommittee.

I might add that we did not have an opportunity to say that one of the leaders of this effort during the past decade has been the distinguished Senator from South Carolina (Mr. HOLLINGS), and I congratulate him for his efforts in the area of nutrition programs.

Mr. HUDDLESTON. Will the Senator yield?

Mr. DOMENICI. Will the Senator yield?

Mr. DOLE. Mr. President, I yield the remainder of my time to the Senator from New Mexico.

Mr. DOMENICI. May we have order, Mr. President?

The PRESIDING OFFICER. The Senate will be in order.

Mr. DOMENICI. Mr. President, I yield to the distinguished Senator from Kentucky.

Mr. HUDDLESTON. Mr. President, I am deeply concerned with the recommendation of the Budget Committee in relation to feeding programs for children. In my view, the savings recommendations go too far. They would jeopardize the viability of the national school lunch program, an integral link in meeting the nutritional requirements of our children.

The budget resolution before us recommends large savings in many areas of the budget, and I support most of these recommendations. I also believe that we can attain significant savings in nutrition programs without endangering the health and well-being of needy children. However, I cannot support proposals which, in the long run, will lead to no savings at all.

If we shortchange our children now by reducing the assistance that is vital to their proper growth and development, the dollar and human costs we will incur for years to come will dwarf the momentary budget savings.

I am heartened by the Budget Committee's decision to restore full funding for the WIC program. In this program, as in the child nutrition programs, the President's proposal would have seriously undermined the effectiveness of a very successful program. I believe that the same good judgment exercised by the Budget Committee in relation to WIC should be exercised by the Senate in relation to other programs that feed children.

In my own State of Kentucky, it is estimated that the Budget Committee's child nutrition recommendations would cut Federal assistance by $25.5 million or 41 percent. They would likely result in the average price of school lunches rising to over $1, thus pricing many children out of the program. With 55 percent of all Kentucky participants falling in the paid category, it is entirely possible that some schools will have to drop out of the national school lunch program because of declining participation. This could mean the end of subsidized lunches altogether for many poor children throughout the State.

In Campbell County, Ky., it is estimated that 90 percent of all paying students would drop out of the school lunch program rather than pay $1.20 or $1.25 for a lunch.

Unless we intend to put an end to the national school lunch program as we know it, we cannot let the Budget Committee recommendations stand. And, it is not as if we are letting child nutrition programs completely off the hook.

Just last year, we enacted several hundred million dollars in child nutrition savings. Now, we are moving again to cut back these programs before we have had a chance to examine the effect of what we did last year. Even if this amendment passes, the budget resolution would still contemplate $1 billion or more in child nutrition savings. This constitutes about 25 percent of the total Federal dollars in these programs, which would be a significantly deeper cut than the President has proposed for most other areas of the budget.

In summary, Mr. President, we must act today to put more money in the budget to feed children. The Budget Committee recommendations are so severe that we would have no choice but to hurt needy children. The final decisions as to how deep the reductions should be and where they should occur are properly left to the Agriculture Committee. Support for division one of this amendment means that we favor making our job less difficult. While this amendment does not go as far as I would like, it is a step in the right direction.

Mr. DOMENICI. Mr. President, how much time remains?

The PRESIDING OFFICER. Two minutes, 38 seconds.

Mr. DOMENICI. Mr. President, I hope everyone knows that the most recent foreign assistance budget for fiscal year 1980 was $8.6 billion. Included in that is food for those very poor that Senator KENNEDY has addressed. We obviously cannot solve that problem everywhere.

But it is not a pittance. There was $8.6 billion in budget authority last year. The President's request for 1982 is $10 billion, not a pittance, either. It is an increase of over $1 billion.

We do not know whether the Senate or the House is going to go along with the President's request.

The second point: We do not handle the detailed programs, but all of those that sent concerns to the Budget Committee about the school lunch program—not the WIC program, which was put back in, which the ranking minority Senator is so concerned with and understands. That is back. The principal con-

cern with the cut was not that we were going to deny food to poor people. It was that when we cut at $11 billion and then partially subsidize it up to $15 billion, what would happen is that, maybe, those parents with $14,000 income, with two children, or 11.9 percent would give them a brown bag instead of letting them buy. So we were concerned that there be transition money for those districts that had trouble because of too low a population to maintain a cafeteria.

That is why we asked someone to find a way, without doing any violence to the budget, to add some money for this transition, so that the Secretary of Agriculture could go out into America. If he found and if Congress authorized him to in the new legislation, he could carry those that had a marketplace problem because of the diminution in users—not because children of a $15,600 income family—two children is what we used—are going to starve, but because the additional subsidy they have to pay might cause them not to use the program.

So these principal food agencies that were concerned said, "We need some transition time to see who is right, or whether the cafeteria is going to be in trouble or not."

That is the issue, Mr. President, not whether the children are going to go hungry: Will the cafeterias be able to remain in business during this transition?

The PRESIDING OFFICER. The time on the amendment has expired. Who yields time?

Mr. RIEGLE. A parliamentary inquiry, Mr. President.

Mr. DOMENICI. I yield to the Senator from South Carolina.

Mr. HOLLINGS. Mr. President, there are currently 27 million childern receiving a school lunch each day in some 94,000 schools. These 27 million students fall into three categories:

First, free lunch students have incomes below 125 percent of poverty and make up 37 percent of the 27 million students. They pay nothing for their lunches.

Second, reduced-price lunch students with incomes between 125 percent and 195 percent of poverty comprise 8 percent of the 27 million students. They pay no more than 20 cents per lunch.

Third, "paying" students have incomes above 195 percent of poverty and make up 55 percent of the 27 million students. They pay about 60 cents to 75 cents per lunch.

The Reagan administration has proposed and the Budget Committee has endorsed cuts in school lunch and other child nutrition programs of $1.6 billion in fiscal year 1982. The administration has proposed to eliminate Federal subsidies for nonpoor students and lower the subsidy for reduced-price students.

If the full cost of the cut is passed on to the child, this will result in almost doubling of the cost of a lunch for paying students and the possible tripling of the price paid for reduced-price lunches. This would result in:

Fewer paying children participating in the school lunch program. School administrators estimate that about 6 million paying students will drop out as a result of price increases.

When paying student participation drops many school lunch programs will become uneconomical. This happens because much of the cost of meal preparation is fixed and schools require a high volume of meals to spread their overhead costs.

When a school lunch program becomes uneconomical, a school can respond in one of two ways:

First, drop out of the school lunch program. This would deny access to free and reduced-price meals to needy children. The CBO roughly estimates between 5 percent and 10 percent of the schools will drop out, though school lunch administrators estimate that in some States the percentage may be as high as 40 to 50 percent.

Second, stay in the school lunch program but offer alternative meals to attract more paying students. This would result in the de facto segregation of the school lunchroom—dividing the poor from the nonpoor. We must not offer a poor child a lunch at the price of his own self-respect.

RELATIONSHIP TO PRESIDENT REAGAN'S TAX CUT

Mr. President, for persons who are receiving reduced-price lunches, this increase will effectively cancel the benefit of the administration's proposed tax cut. In 1982, a family of four with two children and earning $12,000 a year would benefit by about $96 from the tax cut, yet they would end up paying about $167 more for their children's school lunches. President Reagan's economic plan is going to leave this family $71 worse off.

Mr. RIEGLE. A parliamentary inquiry, Mr. President.

The PRESIDING OFFICER. Who yields time? Senator DOMENICI.

Mr. RIEGLE. A parliamentary inquiry, Mr. President.

The PRESIDING OFFICER. Who yields time?

Will the Senator from South Carolina yield time?

Mr. HOLLINGS. Yes, I will.

Mr. RIEGLE. I thank the Senator for yielding for a parliamentary inquiry. I want to understand where we are before this vote starts.

Am I correct in understanding that the amendment has been divided and there will be two votes, not one vote? Is that correct?

The PRESIDING OFFICER. The Senator from Michigan is correct.

Mr. RIEGLE. Am I further correct in understanding that, in the school lunch program, the Senator from North Carolina is proposing to add $200 million and not $300 million?

The PRESIDING OFFICER. The Chair cannot interpret amendments.

Mr. RIEGLE. The Chair can certainly tell me what the dollar amount is. Is the dollar amount increased by $200 million?

The PRESIDING OFFICER. The Chair cannot interpret amendments, I say to the Senator from Michigan.

Mr. LEAHY. Will the Senator from South Carolina yield me 30 seconds on the point that the Senator from Michigan raised?

Mr. HOLLINGS. I am delighted to yield 30 seconds, because it is a difference in budget authority and obligation.

Mr. LEAHY. Mr. President, I say to my colleagues that it appears to me that what we are doing is transferring $200 million—not $300 million, but $200 million from foreign assistance and potentially $100 million from Public Law 480 within the agricultural function, which is an entirely different issue. I mentioned that so that my colleagues will understand that passage of this may only be guaranteeing $200 million into the school lunch program, not $300 million.

The PRESIDING OFFICER. The Senator from Vermont will suspend. The hour of 11:30 having arrived——

Mr. RIEGLE. A parliamentary inquiry, Mr. President. I ask if the Senator from South Carolina will yield on that same question.

What is the division, Mr. President?

The PRESIDING OFFICER. It will take unanimous consent to postpone the vote.

Mr. HOLLINGS. I ask unanimous consent that the Chair be granted permission to tell us what the division is.

The PRESIDING OFFICER. The question is on division 1, the Agriculture, Nutrition, and Forestry Committee. The yeas and nays have been ordered.

Mr. RIEGLE. Mr. President, I ask unanimous consent that the vote be delayed 1 minute until we pin this matter down.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

Mr. RIEGLE. I thank my colleagues.

It is my understanding that the school lunch program is being cut by $1,568,000,000, and what is being proposed here is to add back $200 million, which means that the reduction that we shall be voting on in the school lunch program here is over $1.3 billion. That is what we are talking about.

Mr. DOMENICI addressed the Chair.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. METZENBAUM. Mr. President, a point of order. The time has expired.

Mr. DOMENICI. Mr. President, the time has not expired. The unanimous-consent request that the majority leader made this morning was that no votes occur prior to 11:30.

The PRESIDING OFFICER. The Chair advises that was not the request. The vote was scheduled at 11:30.

Mr. DOMENICI. Mr. President, I had committed to Senator MATHIAS, who could not be here any sooner. I had intended to yield time off the resolution, but I cannot. I ask unanimous consent that I——

Mr. BAKER. Mr. President.

The PRESIDING OFFICER. The Chair recognizes the majority leader.

Mr. BAKER. If the Chair will permit me, I did that as an accommodation to Senators this morning.

I ask unanimous consent that the

order be changed to permit the Senator from New Mexico to proceed on his time on the resolution for not more than 5 minutes.

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object.

The PRESIDING OFFICER. The Chair recognizes the Senator from West Virginia.

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object, could the distinguished majority leader also provide in his request for some equal time over here?

Mr. BAKER. Yes, Mr. President; I ask for 10 minutes, equally divided.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOMENICI. Mr. President, I yield 3 minutes to the Senator from Maryland.

Mr. MATHIAS. Mr. President, I rise to oppose this amendment. I feel that it is a blow at national security. We have already made very serious reductions in the programs under the jurisdiction of the Committee on Foreign Relations. I ask unanimous consent that a table showing these reductions be printed in the RECORD at this time.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

MAJOR INTERNATIONAL AFFAIRS PROGRAMS UNDER SENATE FOREIGN RELATIONS COMMITTEE JURISDICTION COMPARISONS OF FISCAL YEAR 1981 LEVELS AND CARTER AND REAGAN FISCAL YEAR 1982 BUDGETS—BUDGET AUTHORITY

[In millions of dollars]

Activity	1981	Proposed Carter 1982	Proposed Reagan 1982	Changes fiscal year 1981 to Reagan 1982	Changes Carter 1982 to Reagan 1982
Bilateral development assistance AID	1,702	2,392	1,907	+205	−486

FMS program levels [1]	3,116		[1] 4,051		

[1] Does not include probable additional request for a Pakistan program.

Mr. MATHIAS. Mr. President, Secretary Haig recently testified that "As your experience in these areas"——

Mr. DOMENICI. If the Senator will yield, Mr. President, may we have order, please?

The PRESIDING OFFICER. The Senator from New Mexico is correct. The Senate is not in order. I suggest that those Senators who want to converse do so outside of the Senate Chamber.

The Chair now recognizes the Senator from Maryland.

Mr. MATHIAS. Mr. President, Secretary Haig recently said:

As your experience in these areas has undoubtedly demonstrated, the conduct of foreign policy and the exercise of influence requires many tools. It is the role or purpose of one of these tools, security and development assistance, that is the subject of discussion today.

This is enormously important to the security of the United States of America. It is not clear, and I wish the sponsor of the amendment would tell us exactly where this money will come from. We have already made significant cuts in foreign aid and security and development assistance. I say that it challenges the national security.

Mr. KENNEDY. Mr. President, may we have order? The Senator is entitled to be heard.

The PRESIDING OFFICER. Will the Senator from Maryland suspend? The Senator from Massachusetts is correct. The Senate is not in order. Those Senators desiring to converse should do so outside the Chamber.

The Senator from Maryland may proceed.

Mr. MATHIAS. Mr. President, it challenges national security in several respects. In the first place, we are interdependent today in the world. We depend on many of the developing parts of the world for the minerals that we need to keep our industries, to keep our armed services going. The Senator from Mississippi knows about titanium and cobalt and manganese, chromium, materials that are not available in sufficient supply from territories within our own control. The program that we would cut by these amendments challenges our ability to continue to have secure and stable supplies of those vital substances.

Second, the Senator from Wisconsin is well aware of the position of American banks, having lent large sums of money to the developing world. We recently held hearings in which it was testified by experts on this subject that the developing world may—may, just may—be able to keep afloat on these large sums that are owed to U.S. banks.

But the condition under which they may be able to continue to stay afloat is that the normal sources of credit that have been developed, largely under the leadership of the United States, will be maintained; the various international financial institutions will be sustained. We have commitments.

I yield to the Senator from Rhode Island.

Mr. PELL. I thank my colleague very much.

Mr. President, what we have here is an amendment that bears also on the important subject of our hungry kids at home. They need help. I am all for school lunch programs. There will be other opportunities to vote on it.

This amendment sends the wrong signal around the world as to what our priorities are and what we are doing. I think that to vote on this important amendment on such short notice would be incorrect.

Speaking from the minority side of the Foreign Relations Committee, I strongly oppose this amendment, and I support Senator MATHIAS.

The PRESIDING OFFICER. The Senator from Maryland.

Mr. MATHIAS. I thank the Senator from Rhode Island. I agree absolutely with his position.

I believe that if the Senate approves this amendment, it does so at the expense of taking a blow at national security, at our access to the military supplies we need to maintain our Armed Forces, at the risk of weakening the national banking system as well as the global economic system. I hope we will not do it, and I certainly hope we will not do it unless the author of the amendment is prepared to tell us exactly from where these funds would come.

The PRESIDING OFFICER. Who yields time?

The Senator from South Carolina.

Mr. HOLLINGS. Mr. President, I am prepared to yield back our time.

Mr. DOMENICI. I have a request for 1 minute by Senator HELMS.

The PRESIDING OFFICER. The Senator from New Mexico has only 15 seconds remaining. It will take unanimous consent for more than 15 seconds.

Mr. DOMENICI. I ask unanimous consent that he be permitted to speak for 1 minute.

Mr. HOLLINGS. I yield him one of mine.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from North Carolina.

Mr. HELMS. I thank the Senator from New Mexico.

Mr. President, Churchill once said:

There is nothing more satisfying than to be shot at and to be missed.

The Senator from Massachusetts has shot at me, the Senator from Michigan and various others have shot at this amendment, but they have missed.

Let us look at the facts. A $900 million cut in budget authority may be a little difficult, but when the Senate considers the first budget resolution, it will be considering what? A $10 billion request for foreign aid. Surely $900 million, 9 percent, can be saved from the $10 billion foreign aid request.

After all, in fiscal 1980, the Senate

provided $8.6 billion in budget authority, and that included some extra money for the Camp David agreement. Is not $9 billion adequate for foreign aid in fiscal 1982? That is an increase of $5 billion since 1980 for the purposes of foreign aid. If we cannot cut that we cannot cut anything.

The PRESIDING OFFICER. All time has expired.

Mr. RIEGLE and Mr. HOLLINGS addressed the Chair.

The PRESIDING OFFICER. The Chair recognizes the Senator from South Carolina.

Mr. HOLLINGS. Do I have 2 minutes?

The PRESIDING OFFICER. The Senator from South Carolina yielded back his time.

Mr. HOLLINGS. No, I reserved that in order to give him a minute.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HOLLINGS. I yield 2 minutes to the Senator from Michigan.

Mr. RIEGLE. I thank the Senator for yielding.

Mr. President, the Senator from North Carolina states that he has been shot at and that he has been missed. I feel that he has been shooting at the schoolchildren of America and that he has not missed.

If we lock in this figure, and he knows it, we will be reducing the money available for school lunches in this country by over $1.3 billion. That is the hard fact.

Yes, he is talking about adding back $200 million in the amendment that is at the desk. The amendment offers only $200 million. He sees another way to get another $100 million. That is not in his amendment, as he knows.

Why do we not add back half that amount? Why do we not add back the full amount? If this school lunch program is justified, and I think it is, why do we not keep it whole? The Senator is taking it down by over $1.3 billion. That is what this vote is all about. Yes, we will probably vote to add back $200 million. But let us not try to fool people.

You are going to be taking literally tens of thousands of children in this country off the school lunch program. You cannot avoid that impact if you cut the program by $1.3 billion.

Mr. DOLE. Mr. President, will the Senator yield?

Mr. RIEGLE. I have great regard for the Senator, and of course I yield.

Mr. DOLE. You have great regard for all of us. [Laughter.]

I suggest that it is $300 million that we propose to restore to child nutrition, and I hope this gives some reassurance to the Senator from Michigan when he votes on the amendment.

Mr. RIEGLE. That helps us somewhat. But that still leaves us $1.2 billion short in terms of adequate funding.

Mr. DOLE. But we are better off now than when we walked in here this morning.

Mr. RIEGLE. I appreciate your saying that on the record, because the public has the right to know that.

Mr. DOMENICI. That is not correct. If you want to give the facts, that is not the correct statement. If your purpose here is to give the facts, that is wrong.

Mr. RIEGLE. In this case, I prefer to believe what I have just been told by the Senator from Kansas.

The PRESIDING OFFICER. All time has expired.

The question is on agreeing to division 1. On this question the yeas and nays have been ordered——

Mr. HOLLINGS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll to ascertain the presence of a quorum.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. The Senate will be in order.

Will the majority leader repeat his statement?

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MATHIAS. I object.

The PRESIDING OFFICER. Objection is heard.

The clerk will continue to call the roll.

The legislative clerk continued the call of the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. NICKLES). Without objection, it is so ordered.

Mr. BAKER. Mr. President, might I inquire what is the pending business before the Senate?

The PRESIDING OFFICER. The question is on agreeing to division 1.

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The question is on agreeing to division 1 of the amendment of the Senator from North Carolina.

On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Mississippi (Mr. COCHRAN) and the Senator from New Hampshire (Mr. RUDMAN) are necessarily absent.

I further announce that, if present and voting, the Senator from New Hampshire (Mr. RUDMAN) would vote "yea."

Mr. CRANSTON. I announce that the Senator from Nevada (Mr. CANNON) is necessarily absent.

I further announce that the Senator from Hawaii (Mr. INOUYE) is absent on official business.

I further announce that, if present and voting, the Senator from Nevada (Mr. CANNON) would vote "yea."

The result was announced—yeas 87, nays 9, as follows:

[Rollcall Vote No. 45 Leg.]

YEAS—87

Abdnor	Ford	Metzenbaum
Andrews	Garn	Mitchell
Armstrong	Glenn	Moynihan
Baker	Goldwater	Murkowski
Baucus	Gorton	Nunn
Bentsen	Grassley	Packwood
Biden	Hart	Pell
Boren	Hatch	Pressler
Boschwitz	Hatfield	Pryor
Bradley	Hawkins	Quayle
Bumpers	Heflin	Randolph
Burdick	Heinz	Riegle

Domenici	Long	Wallop
Durenberger	Mathias	Warner
Eagleton	Matsunaga	Weicker
East	Mattingly	Williams
Exon	Melcher	Zorinsky

NAYS—9

Byrd, Harry F., Jr.	Lugar	Proxmire
Hayakawa	McClure	Symms
Humphrey	Nickles	
	Percy	

NOT VOTING—4

Cannon	Inouye	Rudman
Cochran		

So division 1 of Mr. HELMS' amendment (UP No. 22) was agreed to.

The PRESIDING OFFICER (Mr. KASTEN). The question is on agreeing to division 2. The yeas and nays have already been ordered and the clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which division 1 was agreed to.

Mr. CRANSTON. Mr. President, I move to lay that motion on the table.

The PRESIDING OFFICER. The rollcall has already begun.

The legislative clerk resumed and concluded the call of the roll.

Mr. STEVENS. I announce that the Senator from Mississippi (Mr. COCHRAN) and the Senator from Texas (Mr. TOWER) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Nevada (Mr. CANNON) is necessarily absent.

I further announce that the Senator from Hawaii (Mr. INOUYE) is absent on official business.

I further announce that, if present and voting, the Senator from Nevada (Mr. CANNON) would vote "yea."

The PRESIDING OFFICER. Are there any other Senators in the Chamber who wish to vote?

The result was announced—yeas 70, nays 26, as follows:

[Rollcall Vote No. 46 Leg.]

YEAS—70

Abdnor	Ford	Murkowski
Andrews	Garn	Nickles
Armstrong	Goldwater	Nunn
Baker	Grassley	Packwood
Baucus	Hatch	Pressler
Bentsen	Hatfield	Proxmire
Boren	Hawkins	Pryor
Boschwitz	Heflin	Quayle
Burdick	Heinz	Randolph
Byrd, Harry F., Jr.	Helms	Riegle
Byrd, Robert C.	Hollings	Roth
Chiles	Huddleston	Rudman
Cohen	Humphrey	Sasser
D'Amato	Jackson	Schmitt
DeConcini	Jepsen	Simpson
Denton	Johnston	Stafford
Dixon	Kassebaum	Stennis
Dole	Kasten	Stevens
Domenici	Laxalt	Symms
Durenberger	Long	Thurmond
Eagleton	Mattingly	Wallop
East	McClure	Warner
Exon	Melcher	Zorinsky
	Mitchell	

NAYS—26

Biden	Hart	Moynihan
Bradley	Hayakawa	Pell
Bumpers	Kennedy	Percy
Chafee	Leahy	Sarbanes
Cranston	Levin	Specter
Danforth	Lugar	Tsongas
Dodd	Mathias	Weicker
Glenn	Matsunaga	Williams
Gorton	Metzenbaum	

NOT VOTING—4

Cannon	Inouye	Tower
Cochran		

So division 2 of Mr. HELMS' amendment (UP No. 22) was agreed to.

Mr. HELMS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. HOLLINGS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 23

(Purpose: To increase savings in programs under the jurisdiction of the Committee on Foreign Relations; to increase appropriations for programs under the jurisdiction of the Committee on Veterans' Affairs)

Mr. HOLLINGS. Mr. President, the distinguished Senator from Oklahoma has an amendment.

Mr. BOREN. Mr. President, I have an amendment at the desk. I ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Oklahoma (Mr. BOREN), for himself and Mr. ZORINSKY, Mr. DECONCINI, Mr. RANDOLPH, Mr. EXON, Mr. HEFLIN, Mr. ROBERT C. BYRD, Mr. CRANSTON, and Mr. PRYOR, proposes an unprinted amendment numbered 23:

On Page 8, line 9, strike out $301,000,000 and insert in lieu thereof $405,0000,000; On Page 11, line 13, strike $375,000,000 and insert in lieu thereof $271,000,000.

The PRESIDING OFFICER. The Senator from Oklahoma is recognized.

Before he begins, the Senate will be in order. Will the Senators in the aisles please clear the aisles?

Mr. BOREN. Mr. President, this amendment is very similar to the amendment just offered by the Senator from North Carolina, which was adopted. This amendment deals with two functions as set forth in the budget resolution.

First, it amends the outlay section of the funds available to the Committee on Foreign Relations, the foreign aid section, in essence, by increasing the cut in foreign aid by $104 million. This would be cumulative with the cut just adopted under the amendment of the Senator from North Carolina. So it would mean that in outlays, we would have trimmed outlays by $304 million in total—if my amendment is adopted as well as the amendment of the Senator from North Carolina which was just adopted by the Senate.

It does not change the budget authority figures, as was amended in the last amendment. The prior amendment reduced the budget authority by $800 million. I am simply reducing the 1982 outlays by an additional $104 million, which is still well within the previous amendment.

Mr. President, I propose that we take the $104 million of additional cuts in outlays for 1982 and use that $104 million to restore that amount to the function delegated to the Senate Committee on Veterans' Affairs. It would be my intent that those funds be used to maintain the current level of services in the veterans' hospitals.

Mr. President, I shall not go back into all of the statistics which were discussed yesterday. I share the concern of those who authored those amendments yesterday. Just as the average distribution level of our veterans has become such that we shall have increasing numbers come to the veterans' hospitals for help and treatment, we are talking about reducing the quality availability of those services. We are talking about putting additional burdens on professional staffs and even cutting back those staffs.

Mr. President, during the last recess, I took the opportunity to visit one of the veterans' hospitals in my home State. It was not only filled to capacity, but also, there were scores of people standing in line at the admittance desk. The staff there had more than they possibly could take care of, no matter how hard they worked. I found them to be extremely dedicated, doing the best job they possibly could with limited resources.

I talked with veteran after veteran who had need for additional treatment. They have had to wait for hours, many times, and have had treatment put off for days when they needed it.

I seriously do not feel that we should make a cut of the magnitude we have made in the President's budget. I understand, at the same time, the need to be fiscally responsible.

Yesterday, I voted for both amendments offered to increase and restore some of the funding back to the functions for veterans' medical care, because at that time I had an intent to offer this amendment to provide cuts elsewhere to make up the difference.

I do believe we have serious economic problems in this country. I applaud the President's effort to cut total spending, to try to reduce the deficit. It is the only way we ever are going to get inflation under control. It is the only way we ever are going to bring down interest rates. So I take the responsibility very seriously.

That is why I have offered an amendment which is balanced. Not only does it provide an add-back to a vital service, the services needed our veterans, the men and women who have served their country in time of need—those who carry wounds today because of the contribution they made to our country—but also, I have been responsible in this amendment by showing where the funds can be picked up.

This country certainly can ill-afford to continue to send more and more money overseas when we are not taking care of our people here at home. How can we go to the veterans of this country, who have fought for it, who have suffered for it, who have received injuries for it, and tell them, "No, we don't have enough money to take care of you here at home, but we do have enough money to send overseas, enough money to send even to regimes in the past that have been very questionable in nature and certainly have been in question as to whether or not they have been true friends of the United States of America"?

If we could just have half of the money back that has been poured down the rathole of waste in foreign aid, paid out to countries that have not proved to be our friends, and just use half of it that has been paid out in the last many years to take care of the pressing needs of our citizens here at home—our senior citizens; our schoolchildren, as we tried to take care of in the last amendment; our veterans, and others—or if we could have half back to apply to reduce the deficit, we would be going a long way toward solving some of the economic and social problems facing this country today.

I point out to my friends on the other side of the aisle—and I hope many of them will join me in supporting this amendment, just as I supported both divisions of the amendment by my friend from North Carolina a moment ago—that the cumulative cuts, if you add together the amendment by Senator HELMS which was just agreed to and this amendment, it will still total a cut of only $304 million in outlays for foreign aid, out of some $12 billion in the program.

I also indicate that that is still far less than the cuts suggested within the administration by Mr. Stockman, according to the press. We all recall that he attempted to cut the foreign aid function even more. Apparently, he was overruled by Mr. Haig and the innercouncils of the Government.

Still, the cumulative cut we are talking about making if both these amendments are agreed to would still be far less than the cut Mr. Stockman said could be made without seriously impairing foreign aid function.

It is my hope that we can meet our responsibility and our commitment to the veterans. I believe we can make this change in foreign aid without unduly harming that program in any way.

Mr. CRANSTON. Mr. President, will the Senator yield?

Mr. BOREN. I yield to the Senator from West Virginia, and then I will yield to other Senators.

Mr. RANDOLPH. Mr. President, the knowledgeable Senator from Oklahoma

is well reasoned in the presentation of this amendment. I am grateful that he has permitted me to join him as a cosponsor of this effort.

The members of the Veterans' Affairs Committee of the Senate, on which I have the responsibility to serve as a member, have tried very seriously, I believe, to keep so-called partisan politics from surfacing in the committee.

We recognized long ago in the Senate that it was not sufficient to have a Subcommittee on Veterans' Affairs in this body. It was necessary for us to give a proper status to this large segment of the population of our country. So a full committee was created in this body.

During the time that committee has functioned, we have had repeated testimony by Members of this body who have gone into their States and have seen similar conditions that the Senator from Oklahoma has spoken of this afternoon.

We have come to realize, even now, that the veterans of World War II—we must not recall something that would seem to say that people are getting old, because I never want to admit that—but those veterans of World War II are not youngsters any more in the sense of being that they are the most active people in our society. The average age of the World War II vet is 60. So, as the Senator from Oklahoma has said, many of these veterans are calling upon the services of the Veterans' Administration for medical care.

It was my responsibility, on February 13, to visit the VA Medical Center at Martinsburg, W. Va. I could echo and re-echo what the Senator from Oklahoma has said today about his conversations. They are waiting, they are eager, and they are there because they have earned a right to be there.

It is absolutely wrong for us, as Members of the U.S. Senate, for those on Capitol Hill in either body, to think for a moment that it is more important to send aid to countries overseas rather than help our veterans. If you study the record, much of our aid goes to those that are not only unstable countries but also which may be unfriendly countries to the United States of America.

I do not want to wave the flag—that is not my purpose; but I voted in 1978—I voted against foreign aid in the amount of almost $16 billion.

I believe that the priorities in this country are with our own people. I am not oblivious to the fact that we live in a constantly shrinking world, but we must be realistic. We must remember that. That is what the Senator from Oklahoma, who presents this amendment, has done. I commend him, and I hope that his amendment will receive the support of this body.

Mr. BOREN. I thank the Senator from West Virginia very much for his comments. It is an honor to have him as a cosponor on this amendment. He has worked long and hard in the field of veterans' affairs and has done as much as anyone else in this body. I am honored to have him join me in this amendment, as I am honored to be the second generation of my family who has had the pleasure of serving with him in the U.S. Congress.

I yield to the Senator from Texas.

Mr. BENTSEN. Mr. President, I congratulate the Senator from Oklahoma for a very carefully crafted and constructed amendment that would achieve the objectives of which we are talking; that is, of trying to do all we can to see that we cut back on the overall spending of our Government and at the same time deciding whether we cut back on veterans' medical care or foreign assistance. It is wrong for us to say to the veterans of this country that we are going back on our commitments and deny them adequate medical care.

The Senator from West Virginia mentioned World War II veterans. But there are also veterans of Korea and Vietnam who will be in need of medical care. To say to them that at this time that we would deny our responsibility to them would be outrageous.

I am very pleased to join the Senator and associate myself with his amendment. I would like to cosponsor it.

I certainly agree with him that we should support the amount of cuts in the aggregate that the President is calling for and do all we can to balance the budget as early as we can. However, that does not mean that we should transfer our responsibility and the price paid by those who have served our country. If we try that kind of action, it will hurt us in our reenlistments, in our volunteers, and it certainly will affect the overall strength of our country.

Mr. BOREN. I thank the Senator from Texas. I will be proud to have him as a cosponsor of the amendment.

Mr. President, I ask unanimous consent that the name of the Senator from Texas (Mr. BENTSEN) be added as a cosponsor of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BOREN. I also agree with the comment just made by the Senator from Texas. I hope very much that we can keep to the total spending cut figure the President set for us and perhaps even do better and reduce the deficit further. All of us in Congress have the responsibility to join him in trying to write the best possible budget. I believe that 535 people with the kinds of responsibility we have should be able to make some constructive suggestions.

The suggestion that we cut the foreign aid function in order to take care of the pressing needs of our veterans is the kind of constructive exercise in responsibility we need. It is the kind of constructive exercise that still keeps us within the President's total budget cut figures as well.

I yield to the distinguished Senator from California, the assistant minority leader.

Mr. CRANSTON. Mr. President, I thank my friend and colleague very much.

I shall ask about one aspect of the amendment offered by the distinguished Senator. The administration's foreign aid proposal includes a $250 million unallocated contingency fund to promote economic and political stability in unspecified countries. It also provides for $100 million to be used for emergency military assistance projects in unspecified countries. This would be a new and I think unprecedented blank check of a sort that has been resisted by several previous Congresses in the light of requests from several previous administrations.

I question the wisdom of giving just a total blank check to the President to determine where we will become involved with military aid and so forth without Congress having a voice in that. It is my assumption that the $104 million that the Senator is proposing be added to the budget for aiding veterans in their medical care could be offset by money in accordance with the Senator's amendment taken from that $350 million fund.

Of course, the basic decision would be made by the Foreign Relations Committee, the Appropriations Committee, the full Senate, and the full Congress. But I ask this question: Am I correct in my assumption that this $1.4 million could come as I think it should come from that $350 million fund, thereby reducing it by $1.4 million?

Mr. BOREN. The Senator from California is certainly correct. That fund is under the jurisdiction of the Committee on Foreign Relations and that committee certainly would have it within its purview to decide to make those cuts out of an area. As the Senator has said, we cannot write by the nature of the parliamentary process the rules and procedures under which we are operating. We cannot in this budget resolution specify what funds under the Committee on Foreign Relations would be cut. But there are a broad range of programs. Military aid to nonmilitary aid, multilateral, bilateral and the discretionary fund referred to by the Senator from California, which totals all the various funds put together more than $350 million which could be expended at the absolute discretion of the President and which could take the form of military aid and which could be done if this proposal passes as it has been requested without coming back to Congress for additional authorizations.

I understand and I have had several Senators talk to me who said they intended to vote for my amendment, who said that when the specifics of the foreign aid proposal come to the floor that they intend to try to make cuts in that specific area to take care of this amendment. There may be others who support me in all candor who may feel the cuts should come elsewhere. I think the Senator from California would certainly be justified in saying that that is an area which could bear the cuts and I am sure that he will very ably bring that matter to the attention of the Senate when we do bring the specific bill out.

I say that it has been said here that we could, for example, be taking good away from victims of natural disasters in other countries and so on. I think that every Member of this body has enough confidence in the Foreign Relations Committee, and I certainly do, that when they decide what kind of foreign aid to cut, where to make those cuts, whether

to make it, which area to make it in. I certainly have confidence that they are not going to cut back those programs first which are of most vital necessity to keep people from starving who have been the victims of natural disasters, for example. I am certain that the committee will want to look at the functions suggested by the Senator from California and probably others. But that is certainly one function it could come from.

Mr. CRANSTON. I thank the Senator.

I am glad that he concurs with my assumption that the money could come from that contingency fund.

Mr. BOREN. I certainly do.

Mr. CRANSTON. As a member of the Foreign Relations Committee I will endeavor to the best of my ability to make sure that it does come from that source.

I might also seek to reduce the funds still further. On that basis I will support the amendment. It is very, very important to get that $1.4 million to insure that we do not have a disastrous decline in medical care for veterans for all the reasons that I outlined yesterday when I offered an amendment to restore the $1.4 million. I am glad the Senator is making another effort to do that.

I ask unanimous consent that my name be listed as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. RIEGLE. Mr. President, will the Senator yield?

Mr. BOREN. Let me ask the Chair how much time remains to this side?

The PRESIDING OFFICER. There are 10 minutes and 40 seconds remaining.

Mr. BOREN. I yield 2 minutes.

Mr. RIEGLE. I also commend the Senator from Oklahoma for the initiative.

We tried yesterday on two occasions to restore the funds in this function so that we could adequately meet the needs of veterans in the United States. We came close, but we fell short in both instances.

I think the Senator is making an important third initiative. I hope that we can entice some votes from the other side this time. I wish we had the votes to put back all the funds for veterans.

I think that going as far as the Senator is proposing would be enormously helpful. All the veterans organizations in the country feel it. By linking this with reductions elsewhere in the budget, no one can make the argument that this would constitute an overall increase in spending. That is another constructive step.

This does not do everything I would like to see. But I support the Senator with it, and I commend him for the initiative.

Mr. BOREN. I appreciate the comments of the Senator from Michigan.

I say this amendment is offered in a bipartisan spirit. There were arguments raised yesterday against the amount of money that I voted to restore, that the Senator from Michigan voted to restore, because of our concern about the veterans programs. There was opposition even in the lesser figure offered by the Senator from California.

I am offering this amendment with offsetting cuts which would fully take care of the add-on amendments, merely showing that we put the first priority on taking care of those in need at home before we feel we can send money overseas. I offer that in the hope, and it is so close to the amendment just supported strongly on the other side of the aisle, I offer it with the sincere hope it will enable us to get some action and help for the veterans and it will perhaps enable us to do it on a bipartisan basis.

Mrs. KASSEBAUM. Mr. President, I certainly agree with the Senator from Oklahoma in support of adequate and more than adequate health care for our veterans. I think we would all want to make sure that we do not have a deterioration in the best health care that we can possibly provide. But as a member of the Budget Committee I am somewhat concerned with his proposal because it seems to me in a way that really we are trying to do this with mirrors. I do not see how we can just make a change in the outlays without it reflecting in the budget authority even though there is an accumulating effect that you mentioned in savings from the previous vote.

Mr. BOREN. Mr. President, will the Senator yield?

Mrs. KASSEBAUM. I am happy to yield.

Mr. BOREN. I point out that the prior amendment by Senator HELMS cut the budget authority by $900 million and cut outlays by over $200 million. So by this amendment if it is passed we are still very much within the cut of the budget authority which was already enacted by the Senate just a minute ago. We would be cutting budget authority $900 million and outlays by a cumulative total of $304 million.

Mrs. KASSEBAUM. Mr. President, I realize that. But I wish to say to the Senator from Oklahoma the reality of the way that our budget works we have to have some cushion there as the money goes out and that is about the cushion that is needed there. Without a compensating figure in the budget authority I just do not think realistically we can make it work.

Mr. BOREN. I appreciate the comments of the Senator from Kansas. I hope she will investigate a little further and decide that $600 million roughly is enough cushion between authority and outlays and decide to support it.

I say, also, that again I am not even going nearly as far as the Budget Director, Mr. Stockman, wanted to go. He advocated that we cut this function by $3.24 billion over a 3-year period. The cuts which are now in the budget after he apparently lost that battle are $1.7 billion less, and so we are just talking about $300 million difference here.

You take both the Helms amendment and this amendment and I would say that as responsible a person as the Budget Director felt that this could be done, and I would hope we would do it.

I just think it is extremely hard to justify sending the money overseas. I think just as we needed to take care of the school lunch program a minute ago, we have to set priorities, and I just happen to think that the school lunch function, meeting that hot lunch function for the children is more important than the foreign aid function.

I happen to think that taking care of our veterans in the veterans hospitals is more important as well. I hope that the Senator from Kansas will search her conscience and decide to be in agreement with me and will not allow partisan differences to stand in the way of that as we have never allowed them to stand in the way before.

Mrs. KASSEBAUM. Mr. President, I wish to say that I certainly agree with the Senator from Oklahoma in what he is attempting to do. But I also think following on the Senator from California questioning of where this is going to reflect in our foreign aid is a very important question. I have been advised by staff that the only way that this could be done, if the outlays figures would be insignificant cuts for moneys that have already been agreed to in principle to both Egypt and Israel. I think that we are dealing now with cuts in programs where there might already be some agreements that have had a commitment and we might be in efforts to get back into assisting other programs doing damage to commitments we have already made.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I yield myself time.

The PRESIDING OFFICER. The Senator from West Virginia is recognized.

Mr. ROBERT C. BYRD. Mr. President, I wish to direct a question, or possibly more than one, to the distinguished Senator from Oklahoma (Mr. BOREN). First of all, I would like to join in the amendment.

Mr. BOREN. Mr. President, I would be very honored to have the Senator as a cosponsor.

Mr. President, I ask unanimous consent that the minority leader be added as a cosponsor of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, the Senator's amendment would reduce $104 million, is that correct?

Mr. BOREN. Mr. President, it would reduce the Foreign Relations Committee's function by $104 million and add $104 million to the veterans' health function. So the total amount would have no negative effect on the budget.

Mr. ROBERT C. BYRD. Mr. President, I heard the distinguished minority whip refer to the $350 million in the discretionary fund.

Mr. BOREN. Yes; the Senator is correct. There is, within the foreign aid bill, a fund which totals at least $350 million. In fact, it would be somewhat higher, roughly $350 million, in discretionary funds which can be spent by the President for any kind of aid program that he sees fit at his direction, without coming back to the Congress.

Mr. ROBERT C. BYRD. Would this be either military or economic?

Mr. BOREN. It would be either; it could be any kind of aid whatsoever.

Mr. ROBERT C. BYRD. Is this a new fund to be established and that has not been authorized?

Mr. BOREN. As far as I know, this is a new fund that has not been in existence in the past; certainly not of this magnitude.

Mr. ROBERT C. BYRD. Mr. President, Senator CRANSTON referred to it as a discretionary fund. Does this mean the President has total discretion without coming back to the Congress to determine how these moneys should be spent?

Mr. BOREN. Mr. President, the President would have to notify the Speaker of the House and the chairman of the Committee on Foreign Relations of the Senate of his plans to use these funds. But it would not take positive legislative action by the Congress. He could go ahead and utilize the fund at his discretion after making notification.

Mr. ROBERT C. BYRD. So he has a free rein on the fund? All he is required to do is notify the Speaker and certain other Members of both Houses that he intends to spend so much money for such-and-such a purpose. Is that correct?

Mr. BOREN. The minority leader is correct.

Mr. ROBERT C. BYRD. So the Congress would be giving to the President, by virtue of this discretionary fund, carte blanche, to use as he sees fits, $350 million, just so long as he notifies certain Members of the Congress that he intends to spend so much for such-and-such an item. Is that correct?

Mr. BOREN. The Senator is correct. He would have the authority to use these funds as he saw fit and merely have to make a notification.

Mr. ROBERT C. BYRD. So the Congress, by establishing this $350 million discretionary fund, is giving up its prerogative of deciding how much should be spent for what in connection with military aid or economic aid?

Mr. BOREN. He certainly may.

Mr. ROBERT C. BYRD. Well, I do not think much of that.

Let me say that when I heard the distinguished minority whip ask if the $104 million cut could come out of that discretionary fund, I immediately perked up my ears. It interested me that the distinguished author of the amendment replied in the affirmative, that it could come out of that fund.

Mr. BOREN. It is very possible that it could. Of course, as has already been said, procedurally the Committee on Foreign Relations, and later the Senate itself, would take up that specific legislation to make the final decision. But that is certainly one of the areas under the purview of the Committee on Foreign Relations where the cut could be made.

Mr. ROBERT C. BYRD. Of course, the Senator cannot, under the strict Budget Reform Act, lay it out, in this particular measure that is being discussed at this time, specifically that it can come out?

Mr. BOREN. The Senator is correct.

Mr. ROBERT C. BYRD. But, presumably, in carrying out the purposes of the legislation, both the Foreign Relations Committees of the Senate and the House, and the State Department would be largely persuaded, I would assume, by the legislative history that is made by way of committee reports, by way of Senate debate, and so on. Is that correct?

Mr. BOREN. I certainly think that could have an impact.

Mr. ROBERT C. BYRD. Well, that is why I rushed to the floor. When I heard that the $104 million could come out of that proposed discretionary fund, I wanted to be on board. I wanted to be on board with the distinguished Senator from Oklahoma. I want to support that cut and I want, for the purpose of legislative history, to state that it is at least one Senator's viewpoint that it should come out of that proposed discretionary fund, because I think that the House and Senate ought to have a voice in saying where the taxpayers' money should be spent with respect to military and economic aid.

I do not think we should be setting up a discretionary fund for this President or any other President until I hear more about it and can understand better the pros and cons and the argument in that case. I certainly want to withhold my support of such a discretionary fund at this point, at least.

But, as for now, if the amendment carries, I hope that the legislative history would reveal that there is at least this Senator's support for taking it from the proposed discretionary fund. I support the amendment on that basis.

I also want to commend the Senator for what he is doing to add to programs that will assist veterans of this country and that would be directed toward the veterans' health services, which item will be receiving a sharper cut otherwise. I support him on both points.

I want to be sure now, since it is my understanding that this can come out of the discretionary fund, and I have an opportunity to establish at least 1/100th of the portion of the legislative history on this matter, I want to be sure that he has added my name to the amendment on that basis.

Mr. BOREN. The Senator's name has been added on that basis. I think the basis in which he is supporting the amendment has been made clear. It certainly could come out of that fund and that is one of the funds under the jurisdiction of the committee which they could consider and which, I assume, the minority leader will certainly be suggesting when that matter comes up.

Mr. ROBERT C. BYRD. Mr. President, I am pleased again to note that it can come out of that fund. As far as I am concerned, I hope it will come out of that fund.

For that reason, I want to add my name, plus the fact I want to help the veterans.

Mr. BOREN. I am happy to have the Senator from West Virginia, my distinguished leader, as a cosponsor.

At this time, I wish to yield 2 minutes to my colleague from Alabama.

The PRESIDING OFFICER. The Senator from Alabama.

Mr. HEFLIN. Mr. President, I rise in support of the Boren amendment which, as I understand it, would take $104 million from foreign aid and transfer this $104 million to Veterans' Health Services Programs. I only wish it called for more money to come from foreign aid and to be put in our veterans' programs.

I had a group of VFW members from Alabama, American Legion members from Alabama, and DAV members from Alabama come up and explain this cut and what it would do to those veterans who served this country in its time of need.

It is going to have some rather drastic effects. When you cut the personnel in the veterans' hospital, it means you cut the services.

It was explained to me—and I only remember ball park figures—that it could mean as many as 20,000 beds in the veterans' hospitals being given up as a result of the administration's proposed cuts; meaning that those veterans who are in beds may have to give them up.

Mr. President, it does not take much imagination to picture how these drastic cuts might be implemented in our veterans' hospitals and how the foreign aid money might be wasted. You can have a scenario like this: Take the double amputee out of a veterans' hospital bed. Take that bed and convert it to the foreign aid program and then, in turn, send it to Central America. In effect, then, you give that bed to a Nicaraguan Sandinista to enjoy his siesta while he contemplates writing the Marxist manifesto for El Salvador.

So I think there are some consequences here that we ought to be thinking about. I think we have a commitment to our veterans, and I think we ought to live up to it. Foreign aid is a good source to draw it from. I appreciate the Senator from Oklahoma yielding me the time to make my position clear.

Mrs. KASSEBAUM. Mr. President, I yield to the Senator from Minnesota.

The PRESIDING OFFICER. The Senator from Minnesota is recognized.

Mr. BOSCHWITZ. Mr. President, I will oppose the amendment by my friend from Oklahoma. I urge my colleagues to keep in mind that we have just passed an amendment that put the clamps on this discretionary fund that the minority leader spoke about just a moment ago.

As I look at the foreign aid budget which I have before me, and look at the spend-out, I do not know exactly where this discretionary fund is supposed to be. Perhaps the Senator from Oklahoma can show us. It either has to come from the ESF program, the economic support program, or the MAP program, which is a contingency fund which the President has in the event there are conflagrations that arise in one part of the world or another. It is a popular thing to cut foreign aid. It is an easy touch to cut foreign aid.

All of us would like to do our bit for the veterans. As a matter of fact, we are doing it to the tune of $24 billion in this budget. And yet now we hear that cutting less than one-half of 1 percent of the whole budget for the veterans is allegedly going to cause the programs to go down the tube and the veterans will not be properly administered to or treated.

Where in this foreign aid budget is the discretionary fund the Senator referred to?

Mr. BOREN. I will reply to the Senator from Minnesota. Again I want to say that this amendment does not specify where the cut will be made. There are those who support the amendment who want the cut to come out of that particular function. It does not specify. It says only the Committee on Foreign Relations.

In section 614 of the Foreign Assistance Act, this fund is authorized under subsection a, 1, 2, and 3. A further description is given under subsection 5, subparagraph c.

The cut can be made anywhere in the function of those programs before the Foreign Relations Committee. I would just hope that some of these concerns that were expressed a minute ago, when a number on that side of the aisle supported the amendment of the Senator from North Carolina, as I did, will realize this is well below the magnitude of the cuts suggested by Mr. Stockman himself, the Budget Director of this administration.

Mr. BOSCHWITZ. I understand there are no funds appropriated for section 614. I think that to simply say, "Take it out somewhere" is not the right way. The Senator is suggesting cuts of 3 percent of the outlays of foreign affairs for the coming year. This would be on top of an amendment we just passed that will take out approximately 6 percent.

As the Senator knows, we are going to be presented with a series of amendments now that are going to hack away at foreign affairs. It is politically popular to do so.

I am very much in favor of the various programs, whether they be for the veterans or others, but I suggest to the Senator that a cut of $400 million out of a total veterans' budget of $24 billion is not inappropriate. Certainly there must be some discretionary funds in that also. I suggest we retain those cuts rather than to replace them with cuts in the foreign assistance budget, which is $3.5 billion. The foreign assistance budget necessarily gives the President some discretionary funds. I wish the world were not in such disarray so that we could adequately predict for the year ahead and say, "Mr. President, you are not going to need these kinds of funds."

Being a member of the Foreign Relations Committee and listening to witnesses parade up with various needs, all of which are strongly felt, and also recognizing the impact of the cuts that we have already made, the squeezing we have already done, unfortunately I just do not agree that we can cut more.

I say to the Senator from Oklahoma to look within the budget of the Veterans' Administration to see if the $400 million in cuts cannot be offset by other savings. The Veterans' Administration budget is seven times the size of the foreign assistance budget and certainly there is some leeway there. Indeed, to give the President $350 million to meet the problems of the world, problems that no one can possibly now predict, is not too much. And probably $200 million of those $350 million have already been removed as a result of the Helms amendment just passed.

Mr. President, I am going to oppose this amendment.

We voted a couple of times yesterday on the veterans' appropriations and in both instances I voted against those amendments. Not because I do not have feelings or care for the veterans, but we have to have some kind of balance in our budget between the various programs. I will oppose the amendment.

Mr. BOREN. Mr. President, how much time remains?

The PRESIDING OFFICER. The Senator from Oklahoma is recognized. There are 6 minutes and 30 seconds remaining.

Mr. ROBERT C. BYRD. Will the Senator yield for a question?

Mr. BOREN. I yield.

Mr. ROBERT C. BYRD. I just want to be sure that I heard the Senator correctly. Are there no strings attached to this proposed $350 million slush fund that would be created here?

Mr. BOREN. The Senator is correct, except for notification. There are no restrictions.

Mr. ROBERT C. BYRD. So no strings are attached other than notification by the President, this President or any President?

Mr. BOREN. The Senator is correct.

Mr. ROBERT C. BYRD. Just that certain Members of the Congress would be notified after the fact.

Mr. BOREN. The Senator is correct.

Mr. ROBERT C. BYRD. Would the Congress have any opportunity at all, or any means by which it would have a voice?

Mr. BOREN. My understanding is none if the request made by the White House is carried out.

Mr. ROBERT C. BYRD. Mr. President, I want to say again I hope this amendment carries because I would like to see at least $104 million taken out of a slush fund which has no strings attached for the President's use to spend on either military or economic aid.

May I be sure that the Senator did add my name?

Mr. BOREN. The Senator's name has been added.

Mr. ROBERT C. BYRD. I thank the Senator.

Mr. BOREN. Let me answer the Senator from Minnesota who said a minute ago that we were going to continue to whittle away the foreign affairs function. I have never stood on this floor and said we should never have military foreign aid. I have never said we should not take care of an emergency situation. I have never said we should not help people who are victims of natural disasters around the world, or not maintain our commitments in the Camp David accord.

All I have said is that we should set priorities within the budget. We have only so many dollars available. I am not suggesting that we spend a dollar more than the President has set. But we have to set priorities. The veterans' function has already been cut, several hundred million dollars. I was in the VA hospital in Oklahoma City myself and I saw the long line of veterans waiting to be helped. I know the beds were filled. I know how understaffed the hospital is already.

The question is this: Would I vote to cut foreign aid to give us any kind of function of Government, any kind of boondoggle of Government? No. Would I vote to cut an unlimited amount under the budget? No.

A minute ago we voted to cut $212 million out of a $12 billion function to give to the schoolchildren for hot lunches in this country. Am I for that? Yes. Mark it down. This Senator thinks the hot lunch for children should have a higher priority than $200 million of foreign aid in a $12 billion budget.

I agree with the distinguished Presiding Officer, the Senator from Kansas, who voted the same way.

The second question is would I increase the cut in the foreign aid budget to $300 million, a total cut of $300 million out of $12 billion, when Mr. Stockman himself wanted to cut far more than that out of it in order that we take care of the schoolchildren with hot lunches and try to put back the professional staff in the hospitals? My answer is yes. Those are my priorities. I have confidence that if I were able to talk one on one with the people of my State I do not think there are 10 people out of 3 million in the State of Oklahoma who would tell me, "Cut the veterans' hospitals more so we can send another $100 million overseas." I do not believe it.

The PRESIDING OFFICER. The Senator from Illinois.

First, who yields time?

Mr. ARMSTRONG. I yield to the Senator from Illinois.

Mr. PERCY. Madam President, I thank the Senator.

To the distinguished Senator from Oklahoma, I would like to make this point: The $350 million he is talking about is budget authority. What we are actually talking about is outlays, and there is a vast difference. The current estimate for the contingency funds is that the fiscal 1982 outlay impact is about $50 million. We have already cut four times that amount in the previous amendment. How can we cut four times the amount and then add another amendment that would take the contingency funds out again. The reductions that are contemplated just do not exist.

Where could it possibly come from? Let us take a look at the foreign aid program. The Senate now has determined a way that it can get its pay increases. We have finally found the formula: Anything you want to do, just take it out of foreign aid. All we are doing is cutting the heart out of a President's program. All we are doing is saying we are going to increase military assistance, but we are not going to support that with diplomacy; it is just military, it is not political power. It is not persuason, it is not any of those things that diplomacy does to bring about the peace of the world. Just take everything out of foreign aid.

Madam President, why not increase

the Senators' salaries and take it out of foreign aid? It ought to be a popular measure all the way around. Senators have finally figured out a way to do it.

That is what we have just done in the food stamp program, a program I have long supported, but I support the integrity of the budget process and I support the President's program. What we are really doing is undercutting the President's authority. We are taking away his leeway and cutting into programs that no Senator, really, if faced up or down on those programs, would vote against.

The Senate just cut $900 million in budget authority and $200 million in outlays. Now we are considering this proposal to cut another $100 million in outlays. Although this looks like a relatively small reduction out of a program of $10 billion, little of this total is discretionary. Let us take a look at where the cuts would have to come.

First, aid to the Middle East. I think most of us support the program of aid to the Middle East. It is the only way to find a basis for peace in the Middle East, and peace in the Middle East is central to our own security in that vital area. If the peace is interrupted, it would cut the lifeline to our own national security in the way of oil supplies as well as our own economic stability.

Another place to consider a reduction is aid to multilateral banks, but the President has already cut as far as possible without violating international agreements. The first year outlays for the banks in fiscal 1982 is less than $100 million. Will the Senate vote up or down on whether or not we shall cut for multilateral banks to the point where the U.S. Government is reneging on agreements that we have already solemnly entered into? The Foreign Relations Committee certainly has not done that and would not do that. I do not think the Senate would when it thinks through the consequences.

Can we cut into State Department operations? These programs cannot be cut significantly without firing personnel who are critical to the protection of American interests abroad. We went through those budgets this morning.

Madam President, may we have order in the Senate?

The PRESIDING OFFICER. The Senate will be in order.

Mr. PERCY. We went through a markup this morning. Under Secretary of State Kennedy was there. We are asking him to protect our interests abroad. We are asking him to support our personnel overseas. Look at the number of diplomats that have been murdered in the last decade alone—10.

We cannot say, "protect our Americans abroad, do not let them be kidnaped as hostages, but we are going to take all the money away from you to accomplish this task."

Where are we going to get the money to do it? Already the State Department's administration budget has come forward. That budget is cutting personnel, and they have 26 more slots they have promised to cut, and the Department does not know where they are going to come from. But they have undertaken to cut the positions. This morning they could not identify where they are going to come from.

The budget is tight. Are we going to spend all this money for defense all over the world and not have support personnel? Of course not. We cannot cut the State Department operations down.

There are a few major areas left. Are we going to cut bilateral aid, primarily administered by the Agency for International Development? The AID functional development program totals about $1.4 billion, but will result in only about $123 million in outlays in fiscal year 1982. Thus, to save the proposed $100 million in outlays, we would have to virtually eliminate all new AID programs. President Reagan needs these programs as an essential complement to our defense policies.

Are we, for instance, in El Salvador, just going to pour military aid in? Economic aid to El Salvador is a vital aspect of U.S. policy in that region. What are they going to do now, only have military aid down there?

Finally, let us look at possible reductions for refugee aid. We could cut these programs, which total about one-half billion dollars. However, cuts here will compound human misery and reduce a major source of the moral legitimacy which the United States gains in the eyes of the world, especially when contrasted with the Communist countries.

We do not create these humanitarian emergencies. If emergencies exist and people become refugees, the United States, along with all other developed nations on Earth, is going to have to help alleviate their misery. How would we look in the eyes of the world if we have a crisis on our hands, an emergency, and do not have the funds? The President of the United States is just simply saying, the United States does not have the funds?

Finally, let us look at other possible security assistance reductions. This aid goes largely to our NATO allies, such as Turkey, or to other countries facing or recovering from serious turmoil. The administration's request for $350 million for contingencies may be too high and can be used to partly offset the earlier cuts Nonetheless, this is an area where President Reagan needs and wants some discretionary flexibility to respond to new crises.

Madam President, we have given some flexibility to every President. Let us not deprive this President early in his career by having the discretion removed from him.

In short, the cuts already made have substantially reduced the President's ability to implement a strong foreign policy to complement our major spending increases for defense. These proposed cuts will, in my judgment, substantially undermine the value of the increased defense programs which many of us strongly support.

Finally, let me make it clear that I support the domestic nutrition and veterns benefit programs. But I also believe that we must stay within the totals contained in this budget resolution.

Mr. BOSCHWITZ. Will the Senator yield?

Mr. PERCY. I am happy to yield.

Mr. BOSCHWITZ. Madam President, I do not want to allow the term "slush fund" to remain unanswered. I concur with the distinguished chairman of the Committee on Foreign Relations. He spoke very feelingly about obligations abroad and at home. But the term "slush fund" is lying out there without having been properly rebutted.

We well know that this Congress does not just appropriate money without having some strings attached. We also know that when we give money in foreign aid or even when we give it by way of a "slush fund," as it has been called, we must comply with the provisions of the Foreign Aid Act. It comes under all of the provisions that we normally put on such moneys as are spent abroad. So it is not a slush fund, it is a fund that the President can use for emergencies that have historically come up, unfortunately, too often around the world. It is a fund that gives him the flexibility to act. It is a fund that is properly in the hands of the Executive, particularly, in my judgment, this Executive. It is not a slush fund.

I yield to the distinguished Senator from Colorado.

Mr. BOREN. Madam President, will the Senator from Colorado allow me just a brief moment before he begins his remarks?

Mr. ARMSTRONG. Madam President, I am under the impression that the Senator from Oklahoma controls time on his side.

The PRESIDING OFFICER. The Senator is correct. The Senator from Oklahoma is recognized.

Mr. BOREN. Madam President, in order to make the amendment completely comply with the last amendment, I have modified my amendment. I ask that the modification be stated.

The PRESIDING OFFICER. The amendment is so modified. The clerk will read the modification.

The legislative clerk read as follows:

On page 8, line 9, strike out "$301,000,000" and insert in lieu thereof "$405,000,000".

On page 11, line 13, strike out "$375,000,000" and insert in lieu thereof "$271,000,000".

On page 2, line 17, strike out "$52,144,000,000" and insert "$52,825,000,000".

On page 2, line 19, strike out "$59,023,000,000" and insert "$59,228,000,000".

Mr. BOREN. Madam President, the modification in no way changes the thrust of the amendment. It just changes it to be fully compatible with the amendment just offered by the Senator from North Carolina and agreed to. It is still removing $304 million from the foreign relations functions and transferring $104 million to the Committee on Veterans' Affairs.

I ask for the yeas and nays on my amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. BOREN. I thank the Senator from Colorado.

Mr. DOMENICI. Madam President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. DOMENICI. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOMENICI. Madam President, is there any time remaining on the amendment?

The PRESIDING OFFICER. Yes—7 minutes and 31 seconds for the Senator from New Mexico.

Mr. DOMENICI. And the Senator from Oklahoma has used all his time?

The PRESIDING OFFICER. He has 1 minute and 11 seconds.

Mr. DOMENICI. Does the Senator desire to use his remaining minute?

Mr. BOREN. Only if there is further debate on that side. Otherwise, I will be happy to yield it back and vote at this time.

Mr. DOMENICI. I yield myself 2 minutes.

I say to the Senator that I have handled the amendments to this budget activity a little differently, in that I have let Senators vote up and down. We have not had any tabling motions to speak of, and I very much desire to continue that.

However, in this case, I say to the Senator that it seems to me that we already have basically voted with reference to the veteran's issue.

We voted on two different numbers in terms of add-backs. On the foreign assistance, while we have not addressed it in exactly the form that the Senator from Oklahoma has, we basically have had the debate on taking from foreign assistance to put in another program. That basically passed.

I want the Senator from Oklahoma to have his last minute, but I want him to know that I think this is almost the right kind of thing for the Senate to table. As I indicated, I am not going to do that this afternoon and Monday as we move on this measure, because I believe we should vote up and down. We have gone through most of this issue.

I do not care to debate this matter. I am just telling the Senator my reasoning, and I do not want anyone to think I am going to do it every time. We have voted, and it is the kind of thing that should be tabled, in my opinion.

Does the Senator from Oklahoma have anything to say about that?

Mr. BOREN. I say to the Senator that I hope he will not move to table the amendment. When he discussed it, there was an anguished look on his face, which perhaps reflected a troubled conscience. [Laughter.]

I believe we should vote up and down on this. I do not think it is the same issue. I voted with the Senator from North Carolina (Mr. HELMS) today. I told him ahead of time that I supported the kind of proposal he made to cut foreign aid $200 million and simply put the priority on the schoolchildren for hot lunches. That is responsible. It is not adding to the deficit. It is saying that it is more important to send money overseas or more important to take care of the pressing needs at home.

This is different from yesterday. This is not an add-on without a compensating cut. In fact, in voting yesterday, I intended all along to offer to pay for it by cutting the foreign aid function. This is different, and we should not let partisanship intervene. I do not believe that the fact that this amendment was offered on this side of the aisle should cause my friend to feel that he should have to move to table it.

I point out to him that there have been times when there have been 1, 2, 3, 5, 10 Members on this side of the aisle who never have been afraid to vote with those on the other side of the aisle if they thought it was right.

I ask the distinguished Senator from New Mexico, the chairman, to search his conscience and think of what the people of New Mexico would want him to do.

Mr. DOMENICI. Why did I bring it up? Why did I not do it? [Laughter.]

Mr. BOREN. It was a struggle within your conscience. This is the greatest deliberative body in the world, and I hope the chairman will continue to deliberate and wrestle with his conscience.

Mr. DOMENICI. The Senator's time has expired, but I will give him another minute if he wishes.

Let me assure the Senator that my countenance is not caused by this decision. I am thinking of other things.

If the Senator thinks it would be an affront, I do not want to set the precedent that I am going to move to table anything, as floor manager. We will vote up and down.

It appears to me that this question has been voted on more than once. The Senate knows precisely the issues. We already have made some tough decisions. We already have made a very tough decision on foreign assistance and have done that because we were genuinely concerned about the transition that might be difficult in terms of a major change in the school lunch program.

With that, I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Oklahoma, as modified. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from North Dakota (Mr. ANDREWS), the Senator from Mississippi (Mr. COCHRAN), the Senator from California (Mr. HAYAKAWA), the Senator from Pennsylvania (Mr. SPECTER), and the Senator from Texas (Mr. TOWER) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Nevada (Mr. CANNON) and the Senator from Arizona (Mr. DECONCINI) are necessarily absent.

I further announce that the Senator from Hawaii (Mr. INOUYE) is absent on official business.

I further announce that, if present and voting, the Senator from Arizona (Mr. DECONCINI) and the Senator from Nevada (Mr. CANNON) would each vote "yea."

The PRESIDING OFFICER (Mr. RUDMAN). Are there any other Senators in the Chamber who wish to vote?

The result was announced—yeas 44, nays 48, as follows:

[Rollcall Vote No. 47 Leg.]

YEAS—44

Baucus	Ford	Melcher
Bentsen	Glenn	Metzenbaum
Biden	Hart	Mitchell
Boren	Heflin	Nunn
Bradley	Helms	Pell
Bumpers	Hollings	Proxmire
Burdick	Huddleston	Pryor
Byrd, Harry F., Jr.	Humphrey	Randolph
	Jackson	Riegle
Byrd, Robert C.	Johnston	Sarbanes
Chiles	Kennedy	Sasser
Cranston	Leahy	Stennis
Dixon	Levin	Tsongas
Eagleton	Long	Williams
Exon	Matsunaga	Zorinsky

NAYS—48

Abdnor	Gorton	Nickles
Armstrong	Grassley	Packwood
Baker	Hatch	Percy
Boschwitz	Hatfield	Pressler
Chafee	Hawkins	Quayle
Cohen	Heinz	Roth
D'Amato	Jepsen	Rudman
Danforth	Kassebaum	Schmitt
Denton	Kasten	Simpson
Dodd	Laxalt	Stafford
Dole	Lugar	Stevens
Domenici	Mathias	Symms
Durenberger	Mattingly	Thurmond
East	McClure	Wallop
Garn	Moynihan	Warner
Goldwater	Murkowski	Weicker

NOT VOTING—8

Andrews	DeConcini	Specter
Cannon	Hayakawa	Tower
Cochran	Inouye	

So Mr. BOREN's amendment (UP No. 23), as amended, was rejected.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. DOLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senate will be in order. The Senate will please be in order.

Mr. BAKER. Mr. President, will the Senator yield to me for just a moment?

Mr. DOMENICI. I yield to the majority leader.

Mr. BAKER. Mr. President, could we have order in the Senate?

The PRESIDING OFFICER. The Senate will be in order.

The majority leader is recognized.

ORDER OF PROCEDURE

Mr. BAKER. I thank the Chair.

Mr. President, it is now 2 o'clock in the afternoon. I hope that we can proceed to consider as many of the remaining amendments to this resolution as possible. It would be my hope, as well, that the Senate will stand in recess this afternoon not later than about 6 o'clock and then go over until Monday.

But, in order to do that, we need to move the matters that must be disposed of still on this resolution as promptly as possible.

I realize we have only been on this not quite 2 days, but I wonder if I could inquire of the distinguished minority leader, the minority manager, and the manager of the bill if they could give us some outlook on the number of amendments remaining and how long it might be reasonably expected to take before we reach some estimate for the time for final passage.

Mr. ROBERT C. BYRD. Mr. President, I am not in a position to state how many amendments remain because I do not

know. There are several amendments, possibly, remaining. I think it may depend on how things go as to what amendments may yet be called up and how many.

So, at the moment, I am unable to respond to the distinguished majority leader by way of giving him a definitive answer.

Mr. BAKER. Mr. President, I thank the minority leader. I hope that later in the day we might be able to take another try in establishing an outlook for the first part of next week, because it is important, I think, as we would all agree, to get some idea of when we can finish this. That will have some bearing, of course, on how late we stay tonight and what time we come in Monday and whether we can finish then or go over to Tuesday.

But I might say that if we do make good progress this afternoon, if we continue to make good progress this afternoon, I would not expect to be in on tomorrow. I would say, as well, that if we have to—I notice the distinguished minority leader chuckling to himself, as well he might, because I have learned from the master in making that statement. But I would say, as well, if we do not finish, if it does not appear likely that we can finish on Monday, that I would expect to ask the Senate to remain in late on Monday, because time will begin to become a very substantial problem.

So I hope later in the day I might engage the minority leader in another colloquy and get another estimate on the outlook. But, for the time being, it does not appear that the Senate will be in on Saturday.

Mr. PERCY. Mr. President, will the distinguished majority leader yield?

Mr. BAKER. Mr. President, the Senator from New Mexico has the floor. I will be happy to ask him to yield.

Mr. DOMENICI. I yield to the Senator from Illinois.

Mr. PERCY. Mr. President, if we are able to work out a unanimous-consent agreement to go to the immediate consideration of the resolution that we discussed with the majority and minority leaders, the Senator from Illinois would like to advise that we would like to have a rollcall vote on that resolution, subject to the approval of taking it up today.

Mr. BAKER. Mr. President, on my part, if the Senator will yield to me further, I would be happy to set a time certain for a rollcall vote. Indeed, I will support that resolution.

I understand that the minority leader, who was on the floor just a moment ago, may not yet be in a position yet to say what time he would choose. But let me assure the distinguished chairman of the Foreign Relations Committee that as soon as we can arrive at a mutually convenient time, I would be happy to ask unanimous consent to temporarily lay aside this measure and proceed momentarily to the consideration of that resolution.

Mr. PERCY. Mr. President, I thank the majority and minority leader.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield?

Mr. BAKER. Yes.

Mr. ROBERT C. BYRD. Mr. President, would it be agreeable on my side if the Senate were to vote at, say 3 p.m. today on the resolution regarding Poland?

Mr. MOYNIHAN. Mr. President, will there be an opportunity to comment on the resolution?

Mr. ROBERT C. BYRD. Yes. A certain amount of time could be set aside.

Mr. MOYNIHAN. I would like 5 minutes.

Mr. ROBERT C. BYRD. Could we then have 30 minutes, equally divided, with Mr. MOYNIHAN assured of 5 minutes?

Mr. BAKER. Mr. President, in view of the remarks by the majority leader, I ask unanimous consent that, at 2:30, the Senate temporarily lay aside the measure before it, Senate Concurrent Resolution 9, and proceed immediately to the consideration of a resolution at the desk in respect to Poland; that there be 30 minutes of debate, equally divided, with the assurance that the distinguished Senator from New York will have 5 of those 30 minutes under his control and that the control otherwise will be in the usual form; and that a vote will occur on that resolution—Mr. President, I have just been advised that I have another inquiry in this respect. I withdraw the request for the time being.

Mr. ROBERT C. BYRD. Mr. President, could I get an indication, before I yield the floor, as to who will be calling up the next amendment and what it will contain?

Mr. BAKER. Mr. President, let me yield to the distinguished chairman of the committee to answer the question as to who will be offering the amendment on our side.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. DOMENICI. Mr. President, it is Senator DOLE'S amendment. I want somebody to give a brief explanation of it.

The Senator from Kansas, Senator DOLE, will offer an amendment that has to do with periodic interim payments. It has been discussed with the manager on the minority side.

In spite of its being acceptable, I think we will probably need some time on it, perhaps a half an hour or 45 minutes.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

UNANIMOUS-CONSENT AGREEMENT

Mr. BAKER. Mr. President, I would like now to renew the unanimous-consent request with respect to the resolution on Poland which I had partially stated just previously.

Mr. President, I ask unanimous consent that, at 2:30, the Senate temporarily lay aside Senate Concurrent Resolution 9 and proceed to the consideration of a resolution at the desk to be offered by the distinguished Senator from Illinois (Mr. PERCY); that there be 30 minutes of debate on that resolution, to be equally divided and controlled in the usual form; that 5 minutes of this 15 minutes assigned to the minority be under the control of the distinguished Senator from New York (Mr. MOYNIHAN); that 5 minutes be assigned to the distinguished Senator from Virginia (Mr. HARRY F. BYRD, JR.); and that the vote thereon occur not later than 3 p.m. today.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOMENICI. Mr. President, it is my understanding that the distinguished Senator from Kansas, Senator DOLE, is ready with an amendment.

The PRESIDING OFFICER. The Senator from Kansas.

BUDGET RESOLUTION OF RECONCILIATION AND INSTRUCTIONS

The Senate continued with the consideration of the concurrent resolution.

UP AMENDMENT NO. 24

(Purpose: To revise budget goals to reflect a transfer of Medicare payments from fiscal year 1982 to fiscal year 1981)

Mr. DOLE. Mr. President, I send an unprinted amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Kansas (Mr. DOLE) proposes an unprinted amendment numbered 24.

Mr. DOLE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 7, lines 13 through 16, strike out "to reduce budget authority by $212,000,000 and outlays by $810,000,000 in fiscal year 1981; to reduce budget authority by $4,354,000,000 and outlays by $8,832,000,000 in fiscal year 1982" and insert in lieu thereof "to reduce budget authority by $212,000,000 and outlays by $295,000,000 in fiscal year 1981; to reduce budget authority by $4,354,000,000 and outlays by $9,354,000,000 in fiscal year 1982".

On page 2, beginning with line 14, strike out all through the semicolon on line 18 and insert in lieu thereof the following: "to reduce budget authority by $14,667,000,000, and outlays by $2,353,000,000, in fiscal year 1981; to reduce budget authority by $2,144,000,000, and outlays by $36,945,000,000, in fiscal year 1982;".

Mr. DOLE. Mr. President, I will say very briefly that the amendment I have just offered would increase spending in fiscal year 1981 by $515 million and decrease spending in fiscal year 1982 by $522 million.

I do not think there is any quarrel with the amendment. I have discussed it with Senator LONG, the ranking Democrat on the Finance Committee, and with the managers of the bill.

Mr. President, may we have order?

The PRESIDING OFFICER. The Senate will be in order.

Mr. DOLE. Mr. President, medicare currently offers hospitals two payment procedures. First, there is a procedure under which payments are made to the hospital on the basis of bills which state what covered services have been furnished during the billing period. On the average, there is a 6-week lag between the rendition of a service and the receipt by the hospital of the payment. Only about 10 to 14 days of this lag is attributable to time taken by the medicare intermediary in processing the bill.

Under the alternative procedure, hospitals receive periodic interim payments which are not directly tied to the receipt of bills. On the average, this procedure produces only a 3-week lag between rendition of the service and receipt of payment. Approximately 2,100 hospitals currently use this method of payment.

Last year during the consideration of the budget, a budgetary device was used with respect to this payment methodology, which resulted in a bookkeeping savings in fiscal year 1981. The provision which was agreed to at that time was simply a one-time delay in the medicare periodic interim payment until the next fiscal year.

Under this provision, the hospitals involved would eventually receive their reimbursement, but the cost would be shifted from one budget year to another.

Obviously, this shift does not result in any real savings. What is real is the fact that a number of hospitals would have to borrow funds to cover their cash-flow requirements.

Eventually, the medicare program would recognize as a cost its share of the interest costs on this borrowing, resulting in an actual increase in medicare expenses as a result of this delay.

The amendment that I am offering today would increase spending in fiscal year 1981 by $515 million and decrease spending in 1982 by $522 million. These changes will accommodate the intention of the Senator from Kansas to include in the Finance Committee reconciliation proposals a provision which would repeal the one-time delay in the periodic interim payment.

I might add that this change was requested by the President.

I know of no opposition to the amendment.

I do not see either manager on the floor. I suggest the absence of a quorum.

Mr. GRASSLEY. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. GRASSLEY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GRASSLEY. Mr. President, I yield to the Senator from South Carolina.

Mr. HOLLINGS. Mr. President, I thank the distinguished Senator from Iowa.

We are perfectly willing to accept the amendment of the Senator from Kansas. We have reviewed it and think it is in order and a good one. We are prepared to accept the amendment. Does the Senator want a vote on it?

Mr. DOLE. No. I might say that the amendment would avoid a 3-week interruption in cash flow to hospitals and the cost that would result when hospitals borrow to compensate for the temporary medicare reimbursement dry spell. CBO estimates that medicare's liability for the interest expense that would result from such borrowings would be about $7 million.

I do not know of any objection to the amendment. I appreciate the statement of the Senator.

Mr. HOLLINGS. I yield back the remainder of our time.

Mr. DOLE. I yield back the remainder of my time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment of the Senator from Kansas.

The amendment (UP No. 24) was agreed to.

Mr. GRASSLEY. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. HOLLINGS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HOLLINGS. Mr. President, on the time for the resolution on our side, I yield 2 or 3 minutes to the distinguished Senator from Texas.

THE SPECIAL TRADE REPRESENTATIVE

Mr. BENTSEN. Mr. President, I know many Members of the Senate had great hopes that the recent visit of the Japanese Foreign Minister might move us closer to a solution of some of the problems troubling United States-Japanese relations, particularly the important question of auto imports.

The visit, unfortunately, produced few answers but did create an important new question: Who is in charge of trade policy in the Reagan administration?

That question is important, Mr. President, not just for now, but for the future. There is always a tendency to focus on the problem of the moment, which today happens to be auto imports from Japan. But there will be other, equally important and urgent trade issues to be addressed in the years to come, and it is absolutely essential that we have a clear and effective policymaking process to deal with them. It is equally important that other nations understand these procedures and know they cannot be circumvented by a quick call to the State Department.

In the wake of Foreign Minister Ito's visit, I wish to take a few moments to address some of the problems that arise when we play hot potato with an important trade issue.

Confronted with the issue of auto imports, administration task forces have met, tempers have flared, the Cabinet has debated, the President has been briefed, Commerce, Transportation, and STR have done battle with Treasury, OMB, and the CEA. The Japanese have come and the Japanese have gone, probably a little confused, but almost certainly relieved at our inability to come to grips with the issue. The only missing element in this scenario is decision.

The all-too-apparent lack of progress on the problem is bad enough, Mr. President, but, in my opinion, that failure is compounded by the fact that the Secretary of State has suddenly, unexpectedly, and inexplicably emerged as our primary negotiator on the most important trade matter pending between the United States and Japan.

Clearly, the crisis has come to rest in the wrong hands, confusing both the Japanese negotiators and those of us who have worked for years to provide some certainty and effectiveness to the formulation of trade policy.

I think trade policy is far too important to be treated as a consolation prize in the crisis management sweepstakes.

As any member of the Senate Finance Committee, Republican or Democrat, can attest, we have labored long and hard to endow the office of the U.S. Trade Representative with the rank, the prestige, and the punch to play the lead role in hammering out trade policy. We went out of our way to insure that the USTR had cabinet rank and the title of Ambassador. The whole purpose of the exercise was make certain that the voice of America's economic and trade interests was heard loud and clear at the highest policymaking levels. We tried, and thought we had succeeded, in drawing a clear distinction between trade policy and the traditional concerns of foreign policy. We sought to make the office of the USTR proof of the fact that the United States can no longer afford the Marshall Plan mentality or unilateral generosity in our dealings with other nations.

It was only a few weeks ago, Mr. President, that members of the Finance Committee turned out en masse to wish Ambassador Brock well and offer our support to him in the effort to guide American trade policy. If memory serves me correctly, the distinguished committee chairman even invited the Ambassador to keep us informed if other agencies trespassed on his turf.

Yet, today, as the administration grapples with its first real test of trade, that turf has been trampled. The issue has been shunted over to the Secretary of State, who has actually negotiated the matter with the Japanese Foreign Minister whose own mandate is less than crystal clear. I was pleased to see that all parties professed their abiding attachment to the principles of free trade.

Mr. President, the fact that USTR has been preempted in trade policy is bad enough; perhaps it is something we should look into during our subcommittee hearings next week. But the fact that the auto import question has been turned over to the tender mercies of the State Department, where it will presumably be

handled gently and diplomatically, is truly incredible.

The trade policy of this country has been distorted by shopworn foreign policy considerations for too long. We have negotiated to win temporary friends or good will, not to demand equal access to vital world markets. We have negotiated fishing agreements in which we have given away twice as many fish as we had—all in the interests of good will. We have used our markets as the carrot in negotiations, but we have consistently been reluctant to use a stick. If we came out on the short end of an economic negotiation, that was all right as long as some overriding foreign policy interest was served.

Mr. President, this country has been running a balance-of-trade deficit on the order of $30 billion a year for the past 3 years. We can no longer afford to make trade policy secondary to foreign policy; we cannot afford to have diplomats negotiating with tough, pragmatic traders. When we go into a negotiation on trade, the economic interests of America must be paramount.

Mr. President, I can recall in the past when we had commercial attachés in our embassies abroad and they were at the lowest end of the pecking order. If you wanted to advance in the Foreign Service, you sure did not take that job, because we did not have the kind of emphasis on trade that we ought to have. When American businessmen went abroad and stopped by the Embassy, they were treated as some kind of a bother. We have just not had a dedication to building exports for our country.

That is why we established a USTR with the authority—indeed the mandate—to go out and negotiate tough, hard-nosed agreements that meet the standard of our economic interests.

The last thing we need is to have the USTR subsumed by the State Department. That is a formula for trade disaster; it is contrary to everything we have been trying to do for years in the Finance Committee.

I want to emphasize, Mr. President, that I have high regard and respect for both Secretary Haig and Ambassador Brock. I wish both of them well. But I also believe they have separate jobs to do, and I would like to see some firm indication that USTR will continue to play the primary role in trade policy.

It may well be that Ambassador Brock has received some assurances in this regard, and if that is the case I welcome them. But the fact remains that, for at least a brief period last week, the Secretary of State was conducting trade negotiations with the Japanese Foreign Minister.

The Finance Committee has gone out of its way to establish that the authority to conduct trade negotiations is vested with USTR, and it is not at all clear to me how Secretary Haig's new prominence in this issue can be reconciled with the role that should rightfully be filled by Ambassador Brock.

These questions are important, Mr. President, and they will remain important until they are answered fully.

The need for clarity and consistency is as apparent in the area of trade as in other, more traditional aspects of foreign policy. To the extent USTR is cut out of the process, that clarity and consistency is lacking now and for the future.

Mr. President, I emphasize again that I have the highest respect for both of these gentlemen, but they ought both to stay in their respective fields.

Mr. DOLE. Will the Senator from Texas yield?

Mr. BENTSEN. I am delighted to yield to the distinguished chairman of the Committee on Finance.

Mr. DOLE. Mr. President, I fully agree with what the Senator has said. I think he made it very clear that the Finance Committee has tried in the past and will in the future try to protect this turf very carefully—not because it is the domain of the Finance Committee but because of our intense interest in trade.

The PRESIDING OFFICER. The Chair now indicates that we have reached the time of 2:30 set for another matter.

Mr. DOLE. May I ask unanimous consent for another minute?

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, I commend the Senator from Texas for making his statement at this time. It is a critical time. We shall be having Ambassador Brock before the committee. We have had outstanding STR's in the past with Ambassador Askew, Ambassador Strauss, Ambassador Dent, Ambassador Walker, and others. We want that to continue in this administration under the leadership of Ambassador Bill Brock, who is highly qualified. He has the confidence of the Congress. He has the confidence of the Senate Committee on Finance, and we want to work with him in the interest of trade that is in the best interest of this country.

I thank the Senator.

Mr. BENTSEN. Mr. President, I thank the distinguished chairman of the Committee on Finance for his reassurance on that point, and am delighted that we shall have Ambassador Brock back before the committee.

THE SITUATION IN POLAND

The PRESIDING OFFICER. Under the previous order, the Senate will now proceed to the consideration of a resolution to be introduced by the distinguished chairman of the Foreign Relations Committee, the Senator from Illinois.

The Senator from Illinois is recognized.

Mr. PERCY. Mr. President, the sense of the Senate resolution on Poland which I submit now is particularly timely.

The PRESIDING OFFICER. The resolution will be stated by title.

The assistant legislative clerk read as follows:

A resolution (S. Res. 103) relating to the situation in Poland.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

Mr. PERCY. Mr. President, the sense of the Senate resolution on Poland that I will introduce now is particularly timely.

Through these long months since last August, we have all watched Poland struggle to develop a mutually responsive relationship between the Polish people and their Government. We have been impressed by the restraint shown by both workers and Government, as both sides have negotiated compromises to a series of economic and political issues.

A week ago, that pattern was broken by an incident of police brutality in breaking up a workers' meeting. Workers and authorities are now negotiating for a satisfactory resolution to the tensions inflamed by this incident. At this juncture, a satisfactory outcome is far from assured. There is reason to be concerned that Polish authorities may be considering the use of force in dealing with continuing differences with the workers. East Germany has officially announced the extension of Warsaw Pact maneuvers in the area of the last several days.

It is thus appropriate that we in the Senate go on record at this crossroads in reaffirmation of Poland's right and ability to settle its problems, both peacefully, without authorized internal force, and on its own, without outside interference. The United States could not be indifferent to either development.

Either development would, in the first instance, destroy American incentives to work with other nations to ease Poland's severe economic difficulties. Beyond that, either development would have grave consequences for the entirety of East-West relations.

Mr. President, I shall offer the following resolution relating to the situation in Poland. I offer it on behalf of myself and Senators BAKER, GOLDWATER, HELMS, LEVIN, DIXON, ZORINSKY, DODD, TOWER, GLENN, HOLLINGS, MOYNIHAN, DURENBERGER, MURKOWSKI, PELL, KENNEDY, STENNIS, NUNN, DENTON, BOSCHWITZ, DOMENICI, and METZENBAUM.

It will be kept at the desk so that others who may wish to cosponsor this resolution may do so.

The resolution reads as follows:

S. RES. 103

Whereas the Polish people are showing responsibility in their attempt to evolve a mutually more responsive relationship between workers and government;

Whereas the Polish people have respected their national institutions and Poland's international relationships and commitments;

Be it resolved, that it is the sense of the U.S. Senate that:

(1) Poland's problems can and should be solved by the Polish people themselves;

(2) any outside intervention in Poland would be in violation of existing international law and solemn commitments, including the United Nations Charter and the Helsinki Final Act;

(3) officially sanctioned internal use of force in Poland would violate the spirit of cooperative negotiation of differences that has prevailed;

(4) the United States could not be in-

different to either development, which could have grave consequences for the entirety of East-West relations;

(b) the United States Senate supports the President in efforts to work with other nations to ease Poland's economic difficulties, providing that repression or foreign intervention do not occur.

Mr. President, many times, through miscalculation, it is possible for a nation to take an action without fully appreciating the consequences of such action. In this case, there is no reason that the consequences that would flow from any outside use of force in Poland should not be well-known.

I had the privilege last November of discussing this issue directly with President Brezhnev, with Foreign Minister Gromyko, with Defense Minister Ustinov, and with every member of the Joint Chiefs of Staff in the Kremlin. The discussion was an impassionate, straightforward statement of the consequences that I felt would follow if there was such use of force.

In the case of Poland, the United States is taking a position, I believe, that is held widely throughout the world. Certainly, if Afghanistan, on the borders of the Soviet Union, could bring a UN resolution of 111 votes to 22 calling for the withdrawal of Soviet troops, which is an overwhelming world response of the world, I believe there would be even stronger feelings about the use of force in Poland.

One Western leader has said that it would change the face of the globe. Certainly, in this regard, the Soviet Union has been fully advised by the Secretary of State, in direct communication with Moscow, and then by the statement made yesterday by the President, after a meeting of the National Security Council.

Nothing we are saying or doing is provocative. We simply are stating the facts of life. If we are to move toward a more stable and sensible world, the use of force in a highly emotional situation such as this could only be looked upon as an act that would not be in the interests of world peace and would be contrary to the professions made for a peaceful world by President Brezhnev at the 26th Congress.

Therefore, I feel that this sense of the Senate expression is a calm, reasoned, carefully worded document that states exactly how we feel and how we stand, and I trust that it will have the unanimous approval and support of my colleagues in the U.S. Senate.

I am happy to yield to the distinguished Senator from Virginia.

Mr. HARRY F BYRD, JR. I thank the Senator from Illinois.

Mr. President, I commend the distinguished chairman of the Committee on Foreign Relations, the Senator from Illinois (Mr. PERCY). for this resolution. I believe it is one that the Senate should consider. It is a fine resolution. I just have a question I should like to put to the distinguished author of the resolution, the chairman of the committee.

Mr. PERCY. I will be happy to respond.

Mr. HARRY F. BYRD, JR. It is in regard to section 5:

The United States Senate supports the President in efforts to work with other nations to ease Poland's economic difficulties.

It goes on to say,

Providing that repression or foreign intervention do not occur.

My question is this: I assume that this does not in any way commit the U.S. Senate to an economic aid program or something of a similar nature. There are many ways the United States could help Poland economically—work with her on trade matters and many different ways—but I assume it does not commit the Senate to a new foreign assistance program in regard to Poland.

Mr. PERCY. No; there is no commitment of any kind. It is just a recognition of the fact that the private sector—private banks in the United States as well as Public Law 480 funds, Commodity Credit Corporation—have extended credits to Poland. Of six nations in the Western World that have extended such credits, credits extended by the United States are in lesser amounts than any of the other five. But it now appears obvious that, whereas servicing the debts was possible last year, it may well not be possible as they become due and payable this year.

Therefore, the question would be this: What do the banks do? What do we do? What do other nations do about that?

The resolution language you refer to is just simply a recognition that the bankers and the governments are conferring about what can be done—probably rescheduling payment dates and terms so that the loans are not in default. Their activities undoubtedly would cease if there were a use of force.

This does not commit us in any way. We could confer, and finally decide not to extend the time but to press for payment. The judgment of the Senator from Illinois is that it would be the better part of prudence to work with them on realistic repayment terms as long as conditions in Poland are tolerable. But if the use of force intervened, the effort and desire of nations and private banks to work with a government, to find a way to resolve these problems, would be undercut.

Mr. HARRY F. BYRD, JR. The Senator from Virginia agrees thoroughly with the able Senator from Illinois.

I felt confident that the resolution did not mean that the Senate was going on record as saying that, at some future time, we might take over the indebtedness to the banks or pay off the indebtedness to the banks. That is not the intent of the resolution.

Mr. PERCY. No such indication.

All it says is that the ongoing negotiations probably would be interrupted if there were a use of force. But there is no commitment as to what the outcome of those negotiations eventually would be.

Mr. HARRY F. BYRD, JR. I thank the distinguished Senator from Illinois, and I commend him on the resolution.

Mr. PERCY. I thank the Senator.

The PRESIDING OFFICER. Who yields time?

Mr. PERCY. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. PELL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PELL. I thank the Chair.

Mr. President, I rise in support of the pending resolution of the chairman of the Committee on Foreign Relations, the senior Senator from Illinois.

I think it is a good resolution. It is sensible, it is rational, and I hope it will be noted and observed by the Soviets and by thinking people everywhere.

To my mind, the Polish people have the situation really in their own grasp. They recognize, I believe, that there are three conditions, any one of which would induce Soviet intervention.

The first is withdrawal from the Warsaw Pact. The second is the elimination from power of the Communist Party. The third is a complete breakdown of law and order.

In Hungary you found an attempted withdrawal from the Warsaw Pact; in Czechoslovakia you found the party being taken over. The consequences of both are history. To date, none of these three conditions has occurred in Poland. But the danger is clear. My hope and prayer is that the Polish people will guide events so as to avoid Soviet intervention.

We must note the role of the Catholic Church, which has inspired the reform movement but which is also urging the Polish people to exercise restraint. Church leaders, who are demonstrating an admirable combination of idealism and pragmatism, know what the fate of their communicants would be under any of the three conditions I stated.

This resolution underscores the position of the United States, shows that we will not sit idly by, shows that the cost to the Soviet Union of intervention would be substantial. I hope this resolution will be passed. I yield the floor.

The PRESIDING OFFICER. Who yields time?

Mr. PERCY. The Senator from Illinois yields 3 minutes or such time as the Senator from Maryland desires.

Mr. MATHIAS. Mr. President, I thank the Senator from Illinois. I want to commend him for having introduced this resolution, and for introducing it in the form in which he has.

I think it is an act of leadership; I would particularly note the positive tone of the resolution. It is not a threatening resolution. It is positive in word and intent.

It points to the value, of a peaceful resolution of the problems with which Poland is confronted at this time. This is an extremely important element, in the way in which we approach the potentially grim fate that could possibly lie ahead for Poland.

The world has been concerned for many months with events in Poland and, unhappily, in the past few days there has been a note of even greater

concern reflected in the media of the entire world. So it is appropriate and timely that the Senate express itself, and I think the Senator from Illinois has captured the proper spirit in his resolution.

The alternative hardly needs to be spelled out because history is so tragically clear about what could happen to the Polish people.

It is now almost two centuries since Catherine the Great, the Empress of Russia, put a puppet king on the throne of Poland. That action was followed by several partitions, and finally by the complete suppression of the Polish state.

The alternative, of course, is the one which the Senator from Illinois has embodied in his resolution. By avoiding any kind of political threat, by resolving the economic, social, and political difficulties that are confronting the Polish people today, there can be a positive resolution to the problems of Poland. It seems to me that that is the approach we should be taking at this time. It is an approach I completely support.

The PRESIDING OFFICER. Who yields time?

Mr. PERCY. Mr. President, I wish to thank my distinguished colleague for his thoughtful comments. He is a valued member of the Senate Committee on Foreign Relations. He gave up a post on the Appropriations Committee to serve on the Committee on Foreign Relations. He serves as our distinguished chairman on the Subcommittee on International Economic Affairs, and I think he is rendering a great service to the United States as well as to the people of Maryland. It is his kind of support for resolutions of this kind that affect the peace of the world. That is why we are happy to have him as a member of that committee.

The PRESIDING OFFICER. The Senator from New York.

Mr. MOYNIHAN. Mr. President, I rise to express my appreciation, and I think of those of us on this side of the aisle, for the initiative of the distinguished chairman of the Committee on Foreign Relations in bringing this matter forward.

I was initially concerned that an early draft of the resolution did not appear to take as firm a view in this matter as the President did in his statement yesterday.

But the resolution which the distinguished chairman has introduced does use almost identical language to that of the President's with respect to the deep concern we would have with any untoward developments there, and the grave effect that this would have on the whole course of East-West relations. Therefore, I have asked unanimous consent that I be added as one of the cosponsors of the resolution.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PERCY. Mr. President, will the Senator yield for a unanimous-consent request? The distinguished ranking member of the Committee on Foreign Relations, Senator PELL, has asked also to be named as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MOYNIHAN. Then I would add only the gentlest critique, Mr. President, to say that the opening language of the resolution which says:

> Whereas, the Polish people are showing commendable restraint and responsibility in their attempt to evolve a mutually more responsive relationship between workers and government.

I would simply like to say that, in the view of the Senator from New York, it is not for us to tell the Polish workers to be restrained. Their cause is just. It is the Soviet Union that should be restrained, and their cause is unjust.

Unfortunately, the Polish people do not have their fate in their own hands. But faced with a totalitarian government imposed by Soviet bayonets and surrounded by Soviet forces, the constraints on their behavior are clear, but they are imposed upon them. They are not internal, they are not free choices, and it is not for us to commend them for restraint any more than it is to congratulate them for being surrounded by Soviet arms.

I only wished to make that small point. I would have wished the resolution mentioned the Solidarity Organization. In the history of totalitarianism there has never been such an event and I wonder if it were not—Mr. President, I am again informed that the resolution which I was reading had been amended, and the words "commendable restraint" are not there. I think it was commendable excision, and it shows that the chairman, as you would expect, is very close in his sense of what this Chamber thinks and feels, and that is why we admire him so and appreciate his initiatives in this case.

I would only once again say, Mr. President, in conclusion that the emergence of a nonviolent, effective, disciplined labor movement in Poland is the most extraordinary event in the history of totalitarianism, and it is one which this body will watch with the closest attention and the highest of hopes and the deepest of anxieties.

I thank the Chair. Once again may I thank the chairman who has shown his sense of what this Chamber would feel in such matters and anticipated our every more, our every excision.

Mr. PERCY. Mr. President, I thank my distinguished colleague. The same thought occurred to the author of the resolution. It could be interpreted several ways, so it seems best to leave those words out.

I thank my distinguished colleague, and I appreciate very much indeed his cosponsorship.

As a former Ambassador to the United Nations in dealing with a tremendous number of issues, he knows that a miscalculation, the possibility of miscalculation. must be removed. We are not strident. We are simply trying to be in the position of laying it on the line.

I have always felt in dealing with the Soviet Union that they appreciate it when we are straightforward, when they know where we stand, when we do not equivocate. It is easier for them in a sense to be able to take account, in all of the actions they take, a full assessment of what the consequences would be.

I do not think that situation existed before Afghanistan. There was a good deal of uncertainty as to what the world's reaction would have been, and after the fact of the invasion certainly the world's reaction was very strong indeed.

Mr. MOYNIHAN. Mr. President, will the chairman allow me to simply observe that every major disaster in Europe this century has come about because the aggressive authoritarian or totalitarian government may have miscalculated the response of the democracies. The chairman is not more correct, and we are indebted to him.

Mr. PERCY. In this case there can be no possibility of miscalculation.

I am glad to yield to my distinguished friend from Ohio, who has cosponored this resolution.

Mr. GLENN. Mr. President, I thank the Senator very much for yielding to me at this time.

Mr. President, I support this resolution and its timely adoption by the Senate. The increased level of friction between the Polish workers and the Polish Government in recent days at the same time that increased numbers of Soviet/Warsaw Pact troops are in Poland conducting extended exercises raises anew the specter of outside intervention in Poland's internal affairs aimed at putting down the workers movement and undoing the political and economic gains they have united to seek so far. One does not need to explain or reiterate the seriousness with which the United States would view such a development. Of equal concern would be a decision by Polish authorities to abandon attempts to peacefully negotiate their differences with the workers and resort to the use of their own security forces to impose their will.

I would like to add one comment on the question of debt rescheduling.

The United States and other Western governments have indicated a willingness to seek an accommodation with Poland on the issue. And I was very pleased to hear that the administration intends to consult with the Soviet Union on this question. I am most interested in assuring that the Soviets are equally involved in this effort to avoid any possibility that the Poles would continue to repay the Soviet at original rates while deferring payments on debts to the West.

The PRESIDING OFFICER. I would like to remind the Senator from Ohio that the Senate was supposed to vote on this resolution at 3 o'clock. It is now 3 o'clock.

Mr. GLENN. Mr. President, if I could have 1 additional minute.

We do not want to find ourselves and our allies in the position of helping out a Communist nation and find they are using our help to pay off the Soviets. So I hope that is a caveat for any additional help we are giving in this regard.

Mr. PERCY. Mr. President. it is the understanding of the Senator from Illinois that the majority leader would like to speak for a minute or two on this resolution. I, therefore, suggest the absence of a quorum.

The PRESIDING OFFICER. Without objection, the clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. PERCY. Mr. President, I ask unanimous consent that the order for the quorum call be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PERCY. Mr. President, I ask for the yeas and nays on the resolution.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. PERCY. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll to ascertain the presence of a quorum.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. JEPSEN). Without objection, it is so ordered.

● Mr. METZENBAUM. Mr. President, I am pleased to join the distinguished majority leader and the chairman of the Committee on Foreign Relations in introducing this expression of support for the brave people of Poland.

The word "gallant" has often been used to describe the Poles. And today, they are once again showing the world what it means to stand tall, brave, and resolute in the face of overwhelming force.

The working people of Poland are not making extravagant demands upon the Communist state.

They have demanded the basic human right of working people everywhere to organize themselves and to elect their own spokesmen to negotiate their grievances and aspirations.

Working people in our own country fought hard to win that right. In some places, even in this country, the fight goes on today.

But in the so-called workers states in the Soviet sphere, the idea of a free union is heresy. How, after all, can there be a free union when the state defines itself as the representative of the working people?

Those claims of the state, whether in Poland, the Soviet Union or the other countries of Eastern Europe, are a travesty. They serve only to perpetuate the power and prerogatives of a narrow, deeply entrenched and truly reactionary party elite.

It is the Poles who have exposed this fraudulent system for what it is.

And it is the Poles whose proud defiance tempts the Soviets to do by force what they cannot accomplish by persuasion or example.

Mr. President, the Polish people do not threaten the mighty Soviet Union.

Nobody in Poland has tried to eliminate the Communist government. The Poles know the realities of military power in their part of the world.

Nobody has suggested that Poland withdraw from the Warsaw Pact or aline itself with the West. Again, the Poles know they do not have that choice today.

Nobody in Poland has suggested that free unions or the free expression of religious faith and national identity be extended to other Communist countries. It is the Soviets and their henchmen in countries like East Germany and Czechoslovakia who fear that the contagion of freedom will spread.

Mr. President, the Soviets in recent months have loudly protested their peaceful intentions.

They have asked for a summit conference, spoken of new initiatives in arms control and East-West trade.

In Poland, we will have a test of their sincerity. And we will see whether the Soviets can live with the inevitable reassertion of nationhood by the Poles and by the other ancient peoples of Eastern Europe.

Mr. President, the message of this resolution is simple.

To the people of Poland, it says, "We admire you, we support you, and we stand with you in your brave struggle to secure your fundamental human rights."

To the Government of Poland, it says that we are prepared to lend a sympathetic ear to proposals to ease Poland's economic difficulties.

And to the Soviet Union, it says that if you want better relations with this country, if you want trade, if you want grain, if you want arms talks, and if you want to avoid a harsh, tough, long-range confrontation with this Nation that will cost you dearly—then keep your hands off Poland.

Let us hope, Mr. President, that the Soviets get this message.

And let us do everything we can to help the people of Poland find Polish solutions to their own problems.●

PEACE AND JUSTICE IN POLAND

● Mr. KENNEDY. Mr. President, I commend the chairman (Mr. PERCY) and wish to cosponsor this resolution on Poland.

The Polish people have undertaken an important course in opening up their society and increasing the freedoms of workers, peasants, and students.

In recent days the dangers of confrontation have increased in Poland. I share the concern expressed here today about efforts of local authorities to repress the historic movement toward trade union and other freedoms.

It is very important for the people and Government of Poland to resolve their own problems without any outside interference. I welcome and support their efforts to this end, as I do the essential mediating role played by the church.

The United States, our allies, and friends must make clear our support for Polish solutions to Polish problems, our strong opposition to military intervention, and our readiness to help Poland resolve the acute economic problems that it faces.

So I support this resolution, Mr. President, and I hope this body will pass it by a decisive vote so as to send a clear signal to the world as to where America stands on this issue.●

● Mr. HAYAKAWA. Mr. President, I would like to join with my colleague, the distinguished Senator from Illinois, in asking for immediate consideration of the resolution on Poland.

Since the strike at the Lenin shipyard in Gdansk last summer, most Americans have been watching the unfolding drama in Poland with bated breath. We are all aware of the courage demonstrated by the Polish people in their pursuit for a voice in domestic economic decisions. And we are aware, too, of the imminent threat to the people and Government of the country posed by the Soviet and Eastern European military presence in the area.

The events of the last 8 months are especially poignant for the 10 million Polish Americans who have emigrated or whose ancestors have emigrated to the United States for political or economic reasons. A military invasion of Poland by the Warsaw Pact forces most certainly will invoke outrage—the magnitude of which has never been heard in Moscow—from all of us but especially the Polish community in the United States.

Mr. President, I am also concerned that Polish authorities may be tempted to use force and repressive measures rather than negotiation to solve the differences between the authorities and the labor unions. The leaders of the Solidarity Movement and the Polish people as well as the Government authorities are to be commended for the restraint they have exhibited the past few months. It is my fervent hope that this spirit of cooperation will continue.

Thank you, Mr. President.●

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Mississippi (Mr. COCHRAN) is necessarily absent.

Mr. CRANSTON. I announce that the Senator from Nevada (Mr. CANNON) and the Senator from Arizona (Mr. DECONCINI) are necessarily absent.

I further announce that the Senator from Hawaii (Mr. INOUYE) is absent on official business.

I further announce that, if present and voting, the Senator from Nevada (Mr. CANNON) and the Senator from Arizona (Mr. DECONCINI) would each vote "yea."

The PRESIDING OFFICER. Are there any other Senators in the Chamber who wish to vote?

The result was announced—yeas 96, nays 0, as follows:

[Rollcall Vote No. 48 Leg.]

YEAS—96

Abdnor	Dixon	Hollings

So the resolution (S. Res. 103) was agreed to.

The preamble was agreed to.

The resolution (S. Res. 103), with its preamble, was agreed to, as follows:

S. RES. 103

Whereas the Polish people are showing responsibility in their attempt to evolve a mutually more responsive relationship between workers and government; and

Whereas the Polish people have respected their national institutions and Poland's international relationships and commitments: Now, therefore, be it

Resolved, That it is the sense of the U.S. Senate that:

(1) Poland's problems can and should be solved by the Polish people themselves;

(2) Any outside intervention in Poland would be in violation of existing international law and solemn commitments, including the United Nations Charter and the Helsinki Final Act;

(3) Officially sanctioned internal use of force in Poland would violate the spirit of cooperative negotiation of differences that has prevailed;

(4) The United States could not be indifferent to either development, and could have grave consequences for the entirety of East-West relations; and

(5) The United States Senate supports the President in efforts to work with other nations to ease Poland's economic difficulties, providing that repression or foreign intervention do not occur.

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. GRASSLEY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

BUDGET RESOLUTION OF RECONCILIATION AND INSTRUCTIONS

The PRESIDING OFFICER. The Senate will resume consideration of the pending measure.

The Senate continued with consideration of the resolution.

The PRESIDING OFFICER. The Senator from Iowa may proceed.

Since we are back on the resolution, the Chair advises the Senator that it is necessary for Senators to yield time. Who yields time to the Senator from Iowa?

Mr. DOMENICI. Mr. President, I yield as much time as the Senator needs off the resolution.

Mr. GRASSLEY. Mr. President, it would be shortsighted not to consider the effect of budget cuts on the Internal Revenue Service. The IRS is one of the few "profitable" agencies within our vast bureaucracy. Five years ago in 1976, it spent 56 cents to collect $100 of revenue; in 1980 it spent 44 cents to collect the same $100 of revenue. Last year the IRS received 547 million informational documents from the American public. The Service collected $519.4 billion in gross receipts—an increase of over 12.8 percent from 1979.

The overall Reagan budget cut proposals for administrative personnel include a $23 million budget reduction for the IRS this year, moving up to a $84 million reduction in 1982 culminating in a $414 million cut by 1986. Even without these major personnel cuts, the IRS is able to examine fewer and fewer returns. Last year 1.9 million returns were examined in district offices, a decrease of 89,000 from the previous year. Last year revenue agents examined 9 percent fewer returns at taxpayer residences or places of business than in 1979.

With the growing concern on the part of the administration and the Congress about the billions of dollars of lost revenue from unreported income and delinquent accounts, I would submit that any personnel cuts should be carefully considered to be sure any bureaucratic fat is carefully pared. A meat-axe solution to the problem of adequate tax enforcement funding would be very inappropriate if we are truly serious about making revenues meet expenditures. As a member of both the Finance and Budget Committees, this is a problem which greatly concerns me.

Every Member of this body has made painful choices about budget cuts affecting his or her State. To permit revenues to diminish because we have overlooked the possible impact of budget cuts on revenue collection would be a tragic mistake. Such an act would be robbing Peter to pay Paul.

The success of our system of revenue collection rests on voluntary compliance. The payment of taxes is each citizen's responsibility. It is their contribution to the function of our Government. While it is my firm conviction that taxes are too high and that they are a great burden to middle-income taxpayers, such grievances should be addressed at the ballot box and not by open revolt.

According to the Internal Revenue Service and the Department of Justice, grand jury proceedings are underway to indict a group of "ringleaders" who are counseling individuals to claim an inaccurate number of exemptions or establish themselves as a "minister" or a "religion" to claim a better tax status as a charitable organization. Even after some of these individuals are convicted, they persist in counseling a larger number of law-abiding citizens that this sort of tax avoidance is permissible and will go unredressed by the IRS. Obviously, this trend is making serious inroads into the basis of our revenue collection system—voluntary compliance.

Although the IRS has uniform procedures for detecting and examining illegal tax protester documents and activities, case statistics show that the number of illegal protests is increasing. Tax avoiders use a variety of mechanisms to avoid the payment of tax: Family trusts, formation of "churches," filing blank returns, and claiming excessive allowances or exemptions on W–4 forms. To attack the problem of W–4 abuse—claiming an excessive number of exemptions or allowances—new employment tax regulations were promulgated in March 1980 to require an employer to report certain W–4 forms to the IRS. The IRS is pursuing those individuals who file questionable W–4 forms if they fail to file income tax returns for that taxable year.

In the face of continuing abuse, new temporary employment regulations were issued on March 19, 1981. To screen the W–4's and cross-check them with annual income tax returns will take 865 staff-years in fiscal year 1982 according to the IRS. This figure assumes no widespread increase in the tax protest movement—an assumption which is now open to question.

Another major aim of the Reagan economic plan is to collect all debts owed to the U.S. Treasury. In keeping with this goal, 75 percent of the IRS's collection program for fiscal year 1982 will be devoted to collecting delinquent accounts. Despite this increased effort by the IRS, the inventory of delinquent accounts is projected to grow. The IRS estimates that by the end of fiscal year 1982, 2.1 million accounts will still be unpaid. How much money will the Treasury lose on these delinquent accounts? **$6.3 billion.**

New filing requirements under the windfall profit bill will sap more time, resources, and money in administrative and processing costs from the Internal Revenue Service.

I have been one of the severest critics of the IRS for promulgating regulations in contravention of congressional intent and pursuing numerous policy goals outside of their responsibilities as revenue collection agents. Nevertheless, I urge the authorizing and appropriating committees in both Houses to look closely at personnel and budgetary cutbacks for this agency. Our system of voluntary compliance is being seriously undermined by a growing public perception that the IRS audits or examines a shrinking number of taxpayers and that pockets of taxpayers in open revolt will not be disciplined.

As the demands on the Service to catch a growing number of tax revolters and nonfilers, to collect a backlog of delinquent accounts and to process an increasing number of informational documents are growing, their personnel and budgetary allocations are shrinking. Without an effective program of revenue collection, the Reagan economic package will flounder.

Burdensome taxes invite this sort of tax avoidance behavior. When the Reagan tax package is enacted and tax rates are reduced, the incentive to defy the law should decrease.

Without oppressively high rates of taxation, many risky and elaborate tax shelters that are channeling millions of dollars into unproductive economic activity will lose their appeal. This will simplify the administration of the tax law for the IRS and equalize everyone's tax burden.

Until the time this package can be enacted, no individuals should enjoy a great economic benefit by virtue of their lawless acts.

The Reagan program for economic reform requires a stable revenue base for planning purposes, this can only be achieved by a reliable and efficient revenue collection agency. I urge all of the authorizing and appropriating committees to look closely at any cutbacks in the Internal Revenue Service's budget and not compromise these important goals of the new administration by hasty or ill-conceived acts.

I yield back the remainder of my time and suggest the absence of a quorum.

The PRESIDING OFFICER. On whose time does the Senator suggest the absence of a quorum?

Mr. DOMENICI. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

UNANIMOUS-CONSENT AGREEMENT

Mr. BAKER. Mr. President, I ask unanimous consent that the distinguished junior Senator from Tennessee be recognized to lay down the next amendment; that there be a time limitation on the amendment of 10 minutes to be equally divided; and following on after the disposition of that amendment of the Senator from Tennessee, that the Senate turn to the consideration of an amendment by the Senator from Michigan (Mr. RIEGLE) dealing with social security benefits; and that 1 hour of debate be reserved on the Riegle amendment on Monday, beginning at 10 o'clock, and ending at 11 o'clock, and that a vote on the Riegle amendment occur at 11 o'clock Monday next.

Mr. ROBERT C. BYRD. Reserving the right to object, will the majority leader change his request to provide that debate, that final debate, on the Riegle amendment end at 11 o'clock and that any votes ordered prior to 1:30 occur beginning at 1:30?

Mr. BAKER. Yes, I will.

Mr. President, I amend the request so that any votes ordered on the Riegle amendment occur—Mr. President, I withdraw that portion of the request dealing with the time to vote on the Riegle amendment. I will have a request in that respect shortly, and I assure the minority leader that it will not be before 1:30.

I renew my request in respect of the other aspect of the agreement.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I thank the majority leader.

UP AMENDMENT NO. 25

Mr. SASSER. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Tennessee (Mr. SASSER), for himself and others, proposes an unprinted amendment numbered 25.

Mr. SASSER. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 2, beginning with "$52,825,000,000" in line 17 strike out through "$47,694,000,000" in line 20 and insert in lieu thereof the following "$52,644,000,000, and outlays by $36,745,000,000 in fiscal year 1982; and to reduce budget authority by $58,977,000,000 and outlays by $47,444,000,000.".

On page 4, beginning with "$3,243,000,000" in line 7, strike out through "$3,961,000,000" in line 10 and insert in lieu thereof the following: "$3,062,000,000 in budget authority and $3,000,000,000 in outlays for fiscal year 1982; and $3,760,000,000 in budget authority and $3,711,000,000 in fiscal outlays for fiscal year 1984.".

Mr. SASSER. Mr. President, I rise today to offer an amendment to Senate Concurrent Resolution 9 which would restore an additional $200 million to the school lunch program in 1982 and an additional $250 million to the school lunch program in 1983.

This is a modest amendment to add back moneys to the school lunch program since Senate Concurrent Resolution 9—as passed by the Senate Budget Committee—assumes reductions of nearly $3.2 billion in the school lunch program in 1982 and 1983.

I offer this amendment since I believe it travels a middle road between reducing the budget as the President requested, but offering some relief to the school lunch program on which some 27 million children now depend.

We have had a wide variety of estimates of how the President's cuts will affect the school lunch program.

The Congressional Budget Office suggests that about 5 percent of the Nation's schools may leave the school lunch program. The American School Food Service Association, on the other hand, had indicated in a letter to me that the overall proposed cuts may cause the price of a school lunch to double and in some cases to triple.

Consequently, as many as 35,000 schools may cease participation in the program, forcing as many as 10 million school children from the school lunch program—more than a third of the children now in the program. And among these 10 million schoolchildren will be 3 to 4 million needy children who now receive free or reduced price lunches.

Mr. President, the Tennessee School Food Service Association did an analysis of what the impact of these increased school lunch prices would be. The question asked in 29 counties of 71,737 respondents was this: What would you do if school lunches went up to $1.25 for a full-priced lunch or 60 cents to 70 cents for reduced price lunches?

Of those 71,000 who were polled, over 48,000 or 68 percent said they would go the route of bringing a bag lunch to school; 8,928 or 12 percent said they would go ahead and pay the additional price; 8 percent said they would apply for reduced lunches; 12 percent of 8,442 said they would take another approach, some saying there would be no lunches at all.

So what we have, Mr. President, is a situation in which, if the school lunch program is cut as drastically as it was cut in this budget resolution, I feel we are going to see in many school districts the extinction of the hot lunch program and the absence of hot lunches in many of the rural schools altogether.

In that regard, Mr. President, I have received numerous telegrams and letters from food service administrators throughout my State that these school lunch cuts would have a devastating effect on the operation of their school lunch programs.

Now, I fully understand that we have to make significant budget cuts this year, and in 1982 and 1983. That is why the Senate Budget Committee, in its recommendations for 1982 and 1983, cut the overall budget by a considerably greater amount—some $4.8 billion more than contemplated by the President.

But even on our Budget Committee, there was considerable sentiment for lowering the amount of cutbacks for the school lunch program. It was only by a vote of 10 to 9 that my amendment to restore some $400 million to the school lunch program failed in the committee.

So, Mr. President, there is no unanimity in this body that we should make these deep cuts in the school lunch program. The cuts will still be substantial even with the passage of my amendment.

But let us not cut to the bone on the school lunch program or we will find school lunch programs going out of existence all over the country, and all children—poor, middle, and upper income—may be without a hot school lunch program, and this is a development that we cannot afford today.

Now, Mr. President, what this amendment does is relatively simple. It moderates the cuts in the school lunch program. It in no way undercuts the ability of the Senate Agricultural Committee to modify the school lunch program to take out unessential elements in the school lunch program. It simply permits the Senate to go on record in its instruction to the Agricultural Committee by saying "keep the funding cuts for the school lunch program within reason."

Let us be mindful of the fact that if the school lunch program is cut too deeply, then we may be needlessly and wantonly destroying the overall school lunch program—something that I do not believe that any one in this Chamber wishes to do.

It is in that spirit that I offer this amendment which I also offered in the Senate Budget Committee.

Mr. President, I am pleased to say that Senators EAGLETON, EXON, FORD, LEAHY, MITCHELL, RIEGLE, LONG, MOYNIHAN, LEVIN, and BRADLEY have joined in as cosponsors.

Mr. President. I ask to yield 30 seconds to the Senator from New Jersey.

SCHOOL LUNCH FUNDING

Mr. BRADLEY. Mr. President, every parent with a school-aged child today is familiar with the school lunch program and with the ever-present dilemma for

children and their parents created by having a choice: To pack a brown-bag lunch or to eat the hot school lunch on the day in question. This is not a choice most of us had as children; we were brown baggers. And for some today, those low-income families, it is still not a choice—the school lunch provided free or at a reduced price to children from lower income families means good nutritious meals which the home would be financially hard pressed to replicate.

At present, the Federal Government provides subsidies in commodities and cash to school districts that offer free meals to the lowest income students and reduced-price meals to those with family incomes below 185 percent of the poverty line—$15,630 for a family of four. Schools also receive a general subsidy, consisting of commodities and cash, based on the total number of children participating in the meal program, including those from middle- and upper-income families.

The administration proposes to reduce the child nutrition budget by $1.6 billion, a 44-percent cut from these feeding programs. Of particular concern in the school lunch area are two Reagan administration proposals, whose savings are incorporated into the bill that is before us today. The administration would:

Eliminate all Federal subsidies for families of four with incomes above $15,630, thereby doubling the price of lunch for 14.5 million children.

Limit the subsidy to students from families of four with incomes between $11,640 and $15,630, again doubling the price of these subsidized lunches to 1.9 million children.

The administration makes a reasonable argument in favor of these cuts, pointing out that in these times of high taxes and tight Federal budgets the Federal Government should not be subsidizing children from families with moderate and upper incomes.

However, there is a serious flaw in what otherwise appears to be a modest proposal. That is that with the elimination of the general school lunch subsidies, and the consequent doubling of the lunch price to approximately 60 percent of the participants, the exodus of kids from the school lunch program is likely to be severe. The result of the shrinking numbers of kids will be an increase in the per meal cost. what with overhead costs such as facilities and personnel. And a spiral of increasing price and declining numbers of lunches will eventually put some schools out of the business of participating in the school lunch program altogether. for good sound economic reasons. This will certainly happen in my State and I know school officials in many other States have expressed serious concern about the future viability of the program.

At this point I return to the matter of choice and the fact that many of the lowest income families do not have the income to provide their children with the same high-nutrition lunches as are now available through the school lunch program. Yet if the school lunch program closes down, the poor children in attendance who have been receiving free lunches will receive nothing. Those children benefiting from the reduced-price lunches will be similarly out of luck.

The question, then, that I would ask is whether the Reagan administration's proposals may not be a false economy. The appearance of short-term savings at significant long-term costs, both in educational performance, which has been closely linked with good child nutrition, and in long-term health consequences for these kids.

I believe that a more prudent course is possible, a course which will not lead to such large savings in the next year or two, but which will yield a more modest level of savings and yet still keep the school lunch program intact in our communities across the country.

The amendment which has been offered to restore part of the child nutrition funding aims at just such a course of action. We must assure the continued participation of sufficient numbers of children in this valuable nutrition program and we must be sensitive to the economic impact of price increases on children from families now paying for their lunches. Prices will increase, but gradual change, not abrupt dislocation, is the best policy. The amendment which has been offered by Senator SASSER to restore part of the child nutrition funding aims at just such a prudent course of action. I urge the Senate's support of this program.

Mr. SASSER. How much time do I have remaining, Mr. President?

The PRESIDING OFFICER. The Senator has 33 seconds remaining.

Mr. ROBERT C. BYRD. Mr. President, I yield 3 minutes on the resolution to the Senator from Massachusetts.

Mr. KENNEDY. Mr. President, I think earlier today we made the case for the importance of the school lunch program.

As a cosponsor of this amendment I want to indicate to our colleagues that it is extremely modest. Even if this amendment is adopted, there will still be approximately 11 million children who will not receive school lunches, and experts predict that there will still be thousands, perhaps tens of thousands, of cafeterias forced to close down.

The Senator from Tennessee (Mr. SASSER) has offset spending in other areas to restore these funds for the school lunch program. I want to support the remarks and approach of the Senator from Tennessee. I believe his amendment has given hope to millions of schoolchildren and their parents that we are prepared to meet the nutrition needs of young Americans in our society.

Mr. SASSER. Does the Senator from Maryland wish to speak?

Mr. SARBANES. Mr. President, will the Senator yield for a unanimous-consent request?

Mr. SASSER. I yield.

Mr. SARBANES. Mr. President, I rise in support of this amendment to restore funds to the school lunch program for child nutrition.

The nutrition programs have suffered some of the most severe cuts in the President's budget proposal. The administration has recommended a $1.8 billion cut next year in school lunches and child nutrition, and the special supplemental feeding program for women, infants, and children (WIC). I am strongly opposed to cuts in programs that work to curtail malnutrition in our country, help our citizens escape hunger and prevent serious and costly health problems. Adequate nutrition is a wise investment and essential to the health of our future generations and our Nation.

In the late 1960's, the Field Foundation visited several poor counties in our Nation and discovered, to our amazement, starvation and malnutrition similar to that in underdeveloped countries. When the Foundation returned 10 years later it found less malnutrition and credited the Federal food assistance programs for the improvement.

The objectives of the food assistance programs are to prevent malnutrition and hunger, health problems caused by inadequate nutrition and poverty. The WIC program, in which the President has proposed a 30-percent cut, was authorized by Congress in 1972 to reduce infant mortality and increase the birth weight of infants in order to prevent long-term illnesses such as mental retardation and poor vision. WIC's cost effectiveness and success has been documented by many authorities. An analysis by the U.S. Department of Agriculture shows that infant mortality is reduced when the program is instituted in an area.

A study by Harvard University's School of Public Health concluded that every dollar spent on the program for pregnant mothers saved $3 in hospital costs for their babies. A cut in this program is shortsighted as the eventual costs and suffering will be much greater. I was pleased to learn that the Senate Budget Committee in its deliberations last week on the President's proposed cuts, recommended restoring funds for WIC.

The $1.6 billion cut in the child nutrition program hits the school lunch program the hardest and puts the continuation of the entire program at risk. The administration has recommended that the Federal share per meal be reduced and eliminated for those students now paying reduced and full price for their lunches respectively. A family of four, making $12,000, with two children in school who are receiving reduced price lunches this year will be faced with $165 in additional costs for school lunches next year. This same family will realize $96 in additional tax return under the President's tax proposal.

The State of Maryland has made the school lunch program available in all public schools. If the administration's cuts are approved, Maryland will lose $26 million over the next school year in child nutrition programs. However, Maryland will not only lose financially, but the continued operation of any school lunch program will be in jeopardy. Once lunch prices double and parents decline to provide extra money to purchase lunch at school, there is a very good chance that lunch services will shut down and not be available to any student. Once this happens teaching and learning will become more difficult with the loss of alert, nutritionally sound and healthy students.

Mr. SASSER. Mr. President, I yield back the remainder of my time.

Mr. QUAYLE. Mr. President, I yield to the distinguished Senator from Kansas such time as he may need.

Mr. DOLE. Mr. President, I will just take a minute. The Senator from North Carolina is not here. We made this argument this morning. We have added, in effect, the $300 million back to the school lunch program.

It just seems to me that the parents are also concerned about inflation, high interest rates, unemployment, overregulation, the economy in general, and high taxes.

I hope that this amendment can be defeated. It seems to me, as chairman of the Nutrition Subcommittee, that we can work this out in our committee and in conference with the House.

With the addition of the $300 million restored this morning by the amendment of the Senator from North Carolina, Senator HELMS, no family of $15,000 or less will be affected in the school lunch program. That, in itself, is rather significant.

Mr. President, I yield back the remainder of my time.

Mr. QUAYLE. Mr. President, I yield myself 30 seconds.

Mr. President, the Senator from Tennessee talked about this just being a modest put back in the school lunch program. As the Senator from Kansas said, we have debated this. I would just like to point out that this is a modest reduction from a program that began at $650 million and now is over $3 billion in the last 10 years. In fiscal year 1981 outlays, it will be $3.2 billion, and in fiscal year 1982 outlays, it will be $2.6 billion.

The Helms amendment restored the $300 million add-on this morning. I think we are at the proper mark.

Mr. President, I yield back the remainder of my time.

Mr. SASSER. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER (Mr. LUGAR). Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. LEAHY. Mr. President, I ask unanimous consent to be listed as a cosponsor of the Sasser amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LEAHY. Mr. President, we are debating numbers today, but there are children behind these numbers, children who deserve a chance to be whatever they can, to develop and grow to be contributing citizens in this great country of ours.

The child nutrition programs in this country are like a health assurance policy. They assure us that the schoolchildren in America are getting a balanced lunch at school, that they will be able to learn and play without hunger pangs. The school breakfast program gets children off to a good start every day, and the child care food programs provide essential nutrition for development.

Helping our children grow healthy and strong is in the ultimate national interest—the future of America rests with our children. How can we reduce the nutritional protection that these programs provide?

The President has proposed a massive cut in our child nutrition programs—almost 40 percent. This cut is larger than other programs, and it does not make sense to me. Learning good eating habits early in life, practicing good nutrition, will turn our children into healthy adults. And frankly, this is cost effective. We will save far more in future health-care costs than any limited savings resulting from this nutrition cut. It just does not make sense.

The school lunch program has been a staple of our education system since 1946. It has provided good meals for our school-age children and a stable market for our farmers. The cuts proposed by President Reagan may put this program in jeopardy.

Now, as has been pointed out recently, the school lunch operation runs much like a business—a certain amount of cash flow is necessary to cover the fixed costs of meal preparation and overhead. The effect of the Reagan cuts will be to severely reduce the cash flow to school districts running the lunch programs, thus forcing the schools to either raise prices dramatically for paid students, offer alternative meals to attract more paying students, or drop out of the school lunch program altogether. Given the budget crunch that our schools are already facing, I see little alternative to closing the lunch program down.

If the Reagan cuts are adopted, we will lose students in the program, we will lose schools, and finally, it will be the poorest students who will suffer when their school's lunch program must close down. That is a tragedy that I am sure President Reagan would not want to see, and that the Senate must not allow.

When schools are forced to close their school lunch programs, American farmers will also lose. The school lunch program is an important part of the dairy price support program. In 1979, school lunches used 99 percent of the cheese, 80 percent of the butter, and about 13 percent of the nonfat dry milk distributed by the commodity credit program. The Government purchase and distribution of agricultural commodities is essential to maintaining stable commodity prices. These Reagan slashes will threaten a well established agricultural economic program.

While we may all have our doubts about other budget items that we will be debating today, I cannot imagine anyone not responding to the impact that these massive Reagan cuts will have on child nutrition.

Mr. President, we are talking about a change, not only in the school lunch program, but in the responsibility that we have for our children. All Americans want the best for their youngsters, and as a Nation, we share this goal.

I support this amendment to restore $200 million for our school lunch and other child nutrition programs. Frankly, I believe that, in light of the President's overall cut of $1.6 billion in child nutrition, this $200 million does not go far enough in providing sufficient funds to insure that our schools can continue to serve school lunches.

These nutrition programs are too important to be discarded in a budget cutting frenzy. Our Nation's children are too important. I urge my colleagues to support this effort to keep the school lunch program alive. If this proposal fails, each Senator should remember this day, this issue, when we hear about the first school that must close its lunchroom doors. We have a choice to make today, to respond to President Reagan's concern for the truly needy, the poor children who could be denied a nutritious meal if this amendment fails.

Mr. LEVIN. Mr. President, I ask unanimous consent that I be listed as a cosponsor of the Sasser amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LEVIN. Mr. President, I rise in support of the amendment offered by Senator SASSER to restore $200 million in funding for the national school lunch program. The long commitment of Congress to providing nutrition services to the Nation's schoolchildren in order to eliminate hunger and malnutrition has paid off. We have greatly reduced the number of children whose mental and physical development is stunted by an improper diet.

The administration's proposed cuts in the school lunch program will have a harmful effect upon the progress we have made in this area. First, the elimination of subsidies for all paying children may result in a schism between those children who receive assistance and those who do not.

Two lines will form in the school cafeterias—one for the pay child and one for children who receive assistance. Those who receive subsidies will be stigmatized.

Second, reductions in funding could result in such drastic price increases that many schools will be forced to stop serving meals altogether. Again, the Michigan School Food Service Association has indicated to me that—

> The price increase is expected to drastically reduce participation of paying students. Therefore, it will no longer be economically feasible for most schools in Michigan to operate a school breakfast or lunch program that serves only needy children. As a result, many districts will eliminate all feeding programs.

Mr. President, while I am hesitant to endorse cuts in any area of the school lunch program because I feel so strongly that nutrition dollars are wisely spent, but there is evidence that substantial savings can be made in these programs by reducing special milk in schools which serve lunch, cutting back nutrition education funding until more adequate resources are available, reviewing existing regulatory requirements, and reducing equipment assistance funds, without jeopardizing the heart of the school lunch program. The Sasser amendment would restore $300 million to keep the program going but it would still require the Agriculture Committee to use its best judgment as to where cuts can be made without resulting in a reversal of our

original commitment to protecting the health and well-being of the Nation's schoolchildren.

Mr. BAKER. Mr. President, there will be no further votes on amendments after this vote.

Mr. President, if I could be recognized for 30 more seconds.

Mr. President, I ask unanimous consent that on Monday any votes that are ordered prior to the hour of 2 o'clock be stacked and begin at 2 p.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I thank the majority leader.

SEVERAL SENATORS. Vote!

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Tennessee (Mr. SASSER). All time has been yielded back. The yeas and nays have been ordered and the clerk will call the roll.

Mr. STEVENS. I announce that the Senator from South Dakota (Mr. ABDNOR), the Senator from Mississippi (Mr. COCHRAN), the Senator from California (Mr. HAYAKAWA), and the Senator from South Dakota (Mr. PRESSLER) are necessarily absent.

Mr. ROBERT C. BYRD. I announce that the Senator from Nevada (Mr. CANNON), the Senator from California (Mr. CRANSTON), the Senator from South Carolina (Mr. HOLLINGS), the Senator from Kentucky (Mr. HUDDLESTON), the Senator from Nebraska (Mr. ZORINSKY), and the Senator from Arizona (Mr. DECONCINI) are necessarily absent.

I further announce that the Senator from Hawaii (Mr. INOUYE) is absent on official business.

I further announce that, if present and voting, the Senator from California (Mr. CRANSTON), the Senator from Arizona (Mr. DECONCINI), and the Senator from Nevada (Mr. CANNON) would each vote "yea."

The PRESIDING OFFICER. Are there any other Senators in the Chamber who wish to vote?

The result was announced—yeas 35, nays 54, as follows:

[Rollcall Vote No. 49 Leg.]

NOT VOTING—11

Abdnor	DeConcini	Inouye
Cannon	Hayakawa	Pressler
Cochran	Hollings	Zorinsky
Cranston	Huddleston	

So Mr. SASSER's amendment (UP No. 25) was rejected.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. DOLE. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. RIEGLE addressed the Chair.

The PRESIDING OFFICER. The Senator from Michigan is recognized.

The Senator from Michigan has the floor.

Mr. RIEGLE. I thank the Chair.

Mr. President, are there any other of my colleagues on the floor who have a unanimous-consent request? If not I want to start on this amendment, if I may.

The PRESIDING OFFICER. The Senator may proceed.

Mr. RIEGLE. Mr. President, I shall send the amendment to the desk momentarily. I want to make one check on my numbers here, but I will begin to discuss the amendment, if that is appropriate.

The PRESIDING OFFICER. Who yields time to the Senator?

Mr. ROBERT C. BYRD. Mr. President, I yield time on behalf of Mr. HOLLINGS from the resolution.

Mr. RIEGLE. Mr. President, let me begin by discussing the effect of this amendment.

This amendment would restore the minimum benefit for current social security recipients. It would not extend that same benefit out into the future to new people who would be coming on social security. This item goes directly to the heart of the integrity of the social security system and the social security safety net.

Mr. KENNEDY. Mr. President, could we have order? The Senator is entitled to be heard. This is an important amendment.

The PRESIDING OFFICER. The Senate will be in order.

Mr. RIEGLE. Mr. President, in the course of the 1980 Presidential campaign there was a good deal of discussion about social security and whether each candidate would protect the integrity of the system and of the benefits that were available to the people covered by social security. All of the candidates running, on both the Republican and the Democratic side, clearly stated their intention to maintain the integrity of that benefit system. In fact, President Reagan was quoted many times, and I repeat the quote here. It has been cited in article after article, to this effect:

> No one dependent upon social security today is going to have the rug pulled out from under him.

That is the quote, Mr. President.

Mr. President, despite the assertions of candidate Reagan, and recent promises of President Reagan that no one dependent upon social security is going to have the rug pulled out from under him, the Reagan administration has sent up the proposal that is before the Senate at this time. And that proposal does pull the rug out from under them. It dismantles part of the safety net that has been talked about so much. It is going to do harm to millions of older people in this country.

It is important to recognize a deeper threat here. It is this, if the Reagan administration succeeds in dismantling this part of the social security system, this part of the social security safety net, then what part is next? Who is next?

Can anyone on social security be safe from further cuts and further dismantling if we allow this class of older citizens to lose their benefits at this time?

What we are talking about is the minimum benefit, the very minimum benefit that a person on social security can receive. I want to cite for my colleagues the ages of the people who would be affected by this cut.

There are 13,678 persons who would be affected who are over the age of 95—over the age of 95.

Between the ages of 90 and 94, across this country, there are 66,396 people who are placed in jeopardy by this cut.

In the age group from 85 to 89, there are 16,552 people.

Ages 80 to 84, there are 284,534 persons.

Of people 75 to 79, there are 410,376.

From ages 70 to 74, there are 508,226.

I could go on down the list, Mr. President, but imagine that. Imagine an administration coming in here, after campaigning with speeches saying that they will protect people on social security, coming in here just weeks after the inauguration to dismantle part of the social security system, to strip away the minimum benefits. And to take funds from people in these age ranges, including almost 14,000 who are over 95 years old in this country. I do not know how to describe a policy like that.

I do not know what the administration expects these folks to do. They are certainly not able to go out and find a job. They may not have other family members they can rely on. The hard medical data show that most people in these age categories tend to have medical problems of one kind or another. Medicine today is expensive. Health services are expensive. Yet, some Senators will vote to come along and strip away the minimum benefit under social security.

Mr. LONG. Will the Senator yield at that point?

Mr. RIEGLE. Yes, I yield to the Senator.

Mr. LONG. Mr. President, is it not true that this amendment takes from these dear old people the commitment that has been made in the printed statutory law of this land since the inception of the program?

Mr. RIEGLE. Yes.

Mr. LONG. If the Government is going to take the view that people cannot rely on the commitments made in the law itself simply because a future Congress might feel that this might be an appropriate area in which to economize, then what does that do to all the others who rely on those commitments. Would not they have cause to fear that, at some point, the Government is going to turn its back on them and simply say that they also will not get what they were

supposed to get—that they also will not get what the law now says they are going to receive?

How can other social security recipients live their day-to-day life with anything other than enormous fear for every new day, when the Government has reneged on its promises to 3 million of their neighbors?

Mr. RIEGLE. I think the Senator is exactly right, Mr. President.

Mr. LONG. Now, it would be a different matter if the Government had taken the commitment lightly—if it had said, "We are going to give you this minimum benefit as long as we can afford it, but if we run into a situation where the Government is in the red and we need to balance the budget, then you don't get it." But that is not the case. Is there anything in the history of the social security law that its commitments would be contingent upon the Government having a balanced budget.

Mr. RIEGLE. I know of none. I know of no case where we have walked away from a group of people who rely on this social security income. We have never done this before. This breaks new ground. I do not think anyone on social security can count on anything in the future if this part of the program is stripped away.

Mr. LONG. These people were told when they paid their tax that they could depend on getting their benefits, were they not?

Mr. RIEGLE. That is right.

Mr. LONG. So they paid a consideration, if we compare it to a contract. The working people said, "Here is what we put up," and the Government said, "When you are old and you cannot work any longer here is what you can take down."

If the Government does not recognize its commitment, what are these old people 85 years old going to do. To cite the extreme case, what are these old souls 90 years old who never did own much to begin with, going to do at this point in life? What about those who are in a nursing home? What are they going to do to make up the income that the Government is reducing?

May I ask the Senator, does this square with the commitment that we are not going to adjust the cost-of-living adjustment? Here is one group of recipients and without reference to their need at all the proposal is that we will just cut their check by an average of something like $50. Does that square with the philosophy that was expressed by no less a person than the President of the United States that we must not tamper with this cost-of-living adjustment for all recipients even if it is to make it more realistic and more correctly adjusted to those people's needs? We must not do that as far as the other recipients are concerned but we can make a big reduction in this little group here. I say little—it is not all that small—it is 3 million people, almost the population of Louisiana.

Mr. RIEGLE. That is right.

Mr. LONG. So one says for these 3 million dear old souls the commitment is different. They did not put up as much taxes as we think they should have put up in years gone by; therefore, they had the best of it in that respect. And so we will cut by $50 the magnificent sum of $122 a month they are getting to live on. How does this square with the philosophy and the argument that we should not consider an adjustment in the cost-of-living provisions?

Mr. RIEGLE. I think the Senator is right. That is a contradiction right on its face. What the administration has done is target the weakest ones. They have taken the ones who have the hardest time getting organized and the hardest time fighting back, and they have decided those are the ones they will take the benefit from. If the American people find out about this, and I realize that it is 20 minutes to 5 on a Friday afternoon, I do not know if we can get the facts out across this country or not over the weekend, but I will tell the Senator this: I think if most people in the country find out what is being done here, to back away from this commitment to these elderly people, they are going to be outraged. They are going to be outraged about it.

Mr. LONG. Mr. President, may I ask the Senator a further question? If some of us would like to help the President, help him show the American people that he wants to aid these aged people and maintain the soundness of the social security system—if we would like to help protect the President's credibility, would we not do him a favor to get him out of this trap by simply saying that a mistake must have been made? Surely, there must have been a mistake somewhere. Let us simply correct it. By doing so, would we not be doing the President a great favor? May I say to the Senator that I have known what it is to be involved in handling welfare legislation, where unfortunately some poor souls get their check cut.

They cannot understand it, even though the reduction results from the complexity of the relationship of the welfare law to the social security law, or something like that.

But would we not be doing the President a great favor in this situation to protect him by taking this part of this proposal out?

Mr. RIEGLE. I think the Senator is exactly right. I do not know whether it is the zealots down at OMB who targeted these poor old people or who it was. I know the Senator is exactly right. If we want to help the President keep his word and keep the pledge he made time and time again all across this country we have to restore this item. If we do not do it the Senator is right, President Reagan will be violating the public pledge that he made.

Mr. LONG. How does this proposal square with the dictum that Mr. Stockman himself has told some of us on these committees, "We are not going to touch this social security net"? How does that square with the administration proposal that we must cut these dear old people by $50? Yes, I am told that some of them may be getting a second pension. I am also told that there are a lot of them who do not have any other pension to turn to.

Mr RIEGLE. That is exactly right. The contradiction, as the Senator points out, is obvious right on its face that the administration is not being honest with people. In fact, if the committee bill stands as it is and we just rip away that part of the safety net from these 3 million people across the country, then that means that the pledge was worthless that was made by the President.

Believe me, not a single person on social security will miss the message in this. If the President's pledge was not something they could depend with regard to the minimum benefits, who can depend on anything? Who is next? Who gets cut off social security next week or next month? There is no way of knowing. But once we start down this road, once we start tossing people off to the side, which is what is being proposed here, I do not think any one on social security is safe from that kind of an approach, and that is the issue.

Mr. LONG. I would like to ask the Senator about the argument that these old people are getting a windfall—that they did not put very much in and, therefore, should not take very much out? If we are going to go by that standard, can the Senator tell me how many of those 30 million that have not been cut up to this point will be affected? Would not many more of those 30 million be cut if they are only entitled to take back out what they put in?

Mr. RIEGLE. A lot of people are going to be hurt severely. That is the problem. The Senator indicated here and, I indicated earlier, the ages of the people involved—I mean if we are going to go pick on someone, if the administration is going to go pick on someone, why pick on someone who is 95 or someone who is 89 years old? This is going to offend the American people when they find out about it, if they find out about it. The problem is that they still have the President's pledge out there saying, "We are not going to hurt anybody on social security," and yet we have a bill right here on the floor that, unless we amend it, is going to hurt 3 million people on social security. That is the bottom line.

Several Senators addressed the Chair.

Mr. KENNEDY. Mr. President, will the Senator yield?

Mr. RIEGLE. I know the Senator from Massachusetts asked me to yield. So let me yield first to him.

Mr. KENNEDY. Mr. President, just briefly, am I correct in my understanding that there are approximately 3 million recipients of social security who would be involved in this program and that a million of these individuals are individuals with a total income of $3,100?

Mr. RIEGLE. That is what the data indicates.

Mr. KENNEDY. So for 3 million individuals, a million of whom make $3,100 there will be some reduction of their income.

As the Senator from Louisiana pointed out, this is the first time in the history of social security that individuals have been purged from the social security rolls. These individuals are dependent upon neighborhood health centers, which are going to be significantly reduced; are dependent on food stamp programs, which are going to be significantly re-

duced; are beneficiaries of a fuel assistance program, which is going to be significantly reduced; rely on the title XX services program of the Social Security Act, which is going as block grants to the States, and which is going to be significantly reduced. So, the Senator's amendment which I have cosponsored will restore benefits to 3 million of the neediest individuals in our society, the elderly who have complied with the law—in most instances elderly means women in our society—and who are going to see some reduction in their total income at the same time when there are significant cuts in the other supportive programs.

This amendment is particularly compelling when considered against the background of the reduction of these other support programs. We are not only talking about dollars and cents reduction in their income but we are talking about significant reductions in the kind of services which have been effective lifelines to these individuals whether it has been nutrition, health services, legal services or fuel assistance programs.

I wonder whether the Senator from Michigan would agree that the cumulative effect of all these cuts is troublesome, and that the burden in the battle against inflation is really targeted to a very substantial degree against some of our neediest, most elderly individuals, and people who have served this country well?

Mr. RIEGLE. The Senator is exactly right. When you start adding these things up, you have to wonder how much these folks who have been targeted can stand. Many are just barely getting by now, holding body and soul together. Then they are being hit not just from one direction, as the Senator points out, with a reduction of the minimum benefit, but being hit in all these other areas at the same time. I do not understand the motivation behind the administration's proposal.

That was certainly not what candidate Reagan talked about in the course of the campaign. I think if people had understood that this is what they had in mind, you would have seen outrage across this country a long, long time ago.

I think it is obvious that they are testing the waters. If they can come in and pick off this group, who are old and, in many cases, infirm and unable to come here and fight for themselves, who on social security is going to be safe in the future? The answer is no one is going to be safe, no one is going to be safe on social security if they get away with this.

Mr. KENNEDY. Mr. President, will the Senator agree with me that these budget-cutting measures place the burden upon the backs of many of our most elderly citizens, the neediest and the poorest of individuals? This certainly fails to meet the test of fairness in our battle against inflation which has been outlined by the Senator from Michigan, the Senator from Louisiana, and the President? The Senator from Michigan is attempting to restore benefits to those senior citizens who have paid into social security.

Would he not agree with me that unless we do so we are not meeting the President's test which he has established, which is the test of fairness, certainly at least from the minimum social security recipients' point of view?

Mr. RIEGLE. I think the Senator is right, if we were to allow this to stand. What they propose is wrong on its face. It is unfair. We can support a sharing of the burden across our society, and I think everybody is prepared to take a fair share. But how can we support a proposal to single out this group and to target these people? In light of the President's pledges, this proposal not only violates solemn pledges but also puts everybody on social security on notice that they may be next. They may very well be next.

If we start down this road, we will see social security dismantled piece by piece. Apparently, the administration has decided to start out with the ones least able to protect themselves. It really is an outrageous approach.

Mr. SARBANES. Mr. President, will the Senator yield?

Mr. RIEGLE. Yes, I yield to the Senator from Maryland.

Mr. SARBANES. As I understand it, over a million of the people receiving the social security minimum benefit have total incomes of less than $3,100 a year, is that correct?

Mr. RIEGLE. That is my understanding, yes.

Mr. SARBANES. That is $60 a week. I find it incredible that the administration would put forward a program which would have the effect of lowering retirees' income by eliminating this important social security benefit.

It is my understanding that a contention will be made that recipients of the social security minimum benefit can pick up welfare payments of some sort to try to compensate for part of that loss. But the fact remains that people with a total income, over 1 million Americans, of $60 a week will suffer a cut in their income.

Mr. RIEGLE. Well, the Senator is exactly right. The whole purpose of social security was to give people a way to participate in advance so they would not have to go on welfare some day.

Mr. SARBANES. That is absolutely correct. That was the next point I wished to go on to make, and that is the consequence of the elimination of the minimum benefit under the social security program. One consequence will be a drop in the income of people who absolutely cannot afford a drop in income.

The second consequence is it will cause some people who, in effect, have been able to make it on the basis of social security to become welfare recipients.

Mr. RIEGLE. That is exactly correct.

Mr. SARBANES. I thought one of our objectives on a whole range of programs has been to move people off of welfare, not to move people onto welfare, which will be one of the consequences of this cut.

Mr. RIEGLE. The Senator is exactly right. When I try to imagine, say, a person who is 95 years old and may be housebound, I do not even know how they are going to get down to the welfare office because their social security benefit is taken away.

Mr. SARBANES. The other point which the Senator made, which I think is extremely important, is that no one should be fooled or lulled into a sense of false security. If this elimination of a benefit provided under the social security laws is allowed to stand it then constitutes a precedent with respect to taking people off of the social security rolls.

As the Senator has said, it breaks new ground. The millions and millions of Americans, well in excess of 30 million Americans, who are now on the regular social security programs—and this is one of the regular social security programs—have no reason to suppose that the promises and commitments made to them with respect to the obligation that would be made in their retirement years will continue to be fulfilled.

Does the Senator anticipate the possibility that this is but the first onslaught with respect to the benefits paid under the social security program to millions of retired Americans?

Mr. RIEGLE. I think that is exactly the risk. If the administration breaks its promise and gets away with it, I do not think anybody on social security can feel secure in the future. As you say, this is a brand new threat. We have never had to contend with this before. Once the principle is violated, once we start removing people from social security, where does it stop? These people entered the system on the understanding that there would be this kind of protection. I think the Senator is exactly right, about the jeopardy that this poses to every single person who is on social security.

Mr. SARBANES. Or anticipates being on social security.

Mr. RIEGLE. That is exactly right.

Mr. SARBANES. What is at stake here is for the first time the Nation is failing to honor the obligations it has assumed under the social security system.

Mr. RIEGLE. Well, that is exactly right. I think that is why the President, when he was running as a candidate, went to such great pains to assure people that this very thing would not happen. But, here we are only weeks into this administration and it has already happened. The promise has been broken, the steamroller is coming right through the Senate Chamber, and now we are going to start by taking this minimum benefit away from the people whom I have enumerated here.

If the administration gets away with this, if they break their promise and establish this precedent, I think you will see one assault after another on the social security system over the next 4 years. I think that is what we see coming.

Mr. SARBANES. I thank the Senator.

Mr. MATSUNAGA. Mr. President, will the Senator from Michigan yield?

Mr. RIEGLE. Yes, I yield to my colleague.

Mr. MATSUNAGA. I wish to commend the Senator from Michigan for introducing an amendment which definitely ought to be agreed to by the Senate.

I wish to join the Senator from Mich-

igan in trying to help the President keep his campaign pledge that under his budget cut proposals the needy will not suffer. To emphasize that support I ask unanimous consent that I be included as a cosponsor of the Senator's amendment.

Mr. RIEGLE. I thank the Senator, and I am delighted to include him.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. RIEGLE. I have my own statement. I have accommodated some comments by other Members, and I think I will at this time go ahead and make my own statement.

I will be submitting this amendment on behalf of myself, Senator CHILES, Senator LONG, Senator BENTSEN, Senator ROBERT C. BYRD, Senator METZENBAUM, Senator KENNEDY, Senator MITCHELL, Senator MOYNIHAN, Senator WILLIAMS, and now Senator MATSUNAGA, and my colleague, Senator LEVIN.

I am sure before we finally vote on this on Monday we will have others. I hope some from the Republican side. I hope there will be some Senators on that side of the aisle who will decide they want to help the President keep the solemn promise that he made.

The amendment we are proposing would see to it that there would not be a cut in benefits for the current social security recipients who are now receiving the minimum benefit.

Minimum social security benefits are payments based on the minimum primary insurance amount of $122 per month. This is the minimum social security benefit payable to a worker upon retirement at age 65 or upon disability. It is the lowest possible amount on which other monthly benefits, such as wives' and children's benefits, are based. And since 1979, the entry level minimum benefit has been frozen at $122 per month.

The resolution before us would eliminate the minimum social security benefit not only for future retirees, but also for those who are currently receiving it. I do not believe it is fair or wise to cut back on people who are on the program right now—and I hope this is a matter upon which Senators on both sides of the aisle will agree after the debate is concluded. I hope all Senators can agree on this regardless of how they may feel about eliminating the minimum benefit for future retirees.

So I want to stress again that the amendment we are offering here is limited only to those who are currently collecting the minimum benefit.

I might just say parenthetically that my own sympathies would be in retaining this benefit for future people who would come under social security, but we are not attempting to do that here. We are only attempting to maintain the benefits for those who are presently receiving them.

This amendment restores funds only for those already receiving minimum benefits. There are 3 million current minimum benefit recipients.

Those who advocate the elimination of the minimum benefit argue that it will not hurt those in need. But the fact of the matter is that eliminating the minimum benefits will work a very real hardship on a substantial number of our very old and very poor people.

I cited before the statistics on the age of persons who will be affected by this cut.

Mr. President, I ask unanimous consent that those numbers be printed at this point in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

Age distribution of aged minimum benefit beneficiaries

Age:	*Number of beneficiaries*
62–64	230,956
65–69	533,118
70–74	508,226
75–79	410,376
80–84	284,534
85–89	167,552
90–94	66,396
95 and over	13,678

Source: Department of Health and Human Services.

Mr. RIEGLE. Mr. President, when the GAO did a recent study on the minimum benefit, it was unable to determine the income status of fully 26 percent of those who are currently receiving the minimum benefit. Many are widows who entered the work force late in their life, after the death of their spouse. Many are poor senior citizens between the ages of 62 and 65 who are not yet old enough to be eligible for supplemental security income and who will be faced with a sudden and unexpected drop in their already inadequate retirement income if the minimum benefit is precipitously eliminated.

We simply do not know enough about who these people are—but it is clearly irresponsible to blindly assume that they can get along financially if the minimum benefit is suddenly ripped away. These people worked and retired under a given set of rules, and they ought to be able to count on not having their benefits reduced now after the fact.

If benefits—after retirement—can be cut like this, I think all social security beneficiaries will have to live in fear that they will be next and that they will have their benefits also attacked at some future date—maybe in weeks; maybe in months; who knows when?

It also should be emphasized that by going back and recalculating the benefits for 3 million current recipients is nothing short of an administrative nightmare. Since the wage history of these beneficiaries go back many years, some as far back as the 1930's, they are not all on the social security computers. This means that the files and recalculations would all have to be worked by hand. Secretary Schweiker recently testified that it would take between 8,000 and 10,000 person years of work to do this computation. That would entail something like $250 million of salaries and expenses alone.

So even if this were to be done, it would be very expensive and it would take a massive bureaucracy just to tackle the job.

But even worse than the cost, dumping this kind of task on the Social Security Administration would create chaos and could very well delay the processing of checks for all social security beneficiaries. I do not think we should do this kind of disservice to our senior citizens at the very moment when we are trying to straighten out the workings of Government itself.

As I have said before, and as I voted in the Budget Committee, I am sympathetic with the need to make substantial reductions in Federal spending. My amendment does not affect the proposed elimination of the minimum benefits for future retirees—although I do not think we ought to be discontinuing it—it deals only with the issue of those who are now receiving the benefit and, in many cases, have come to depend upon it and I think would be in very serious straits if it suddenly were pulled away.

(Mr. GORTON assumed the chair.)

UP AMENDMENT NO. 26

(Subsequently numbered amendment No. 22)

(Purpose: to restore funds for social security minimum benefits)

Mr. RIEGLE. Mr. President, I now send the amendment to the desk and ask that the amendment be reported.

The PRESIDING OFFICER. The clerk will report the amendment.

The assistant legislative clerk read as follows:

The Senator from Michigan (Mr. RIEGLE), for himself, Mr. CHILES, Mr. LONG, Mr. BENTSEN, Mr. ROBERT C. BYRD, Mr. METZENBAUM, Mr. KENNEDY, Mr. MITCHELL, Mr. MOYNIHAN, Mr. WILLIAMS, Mr. TSONGAS, Mr. MATSUNAGA, and Mr. LEVIN, proposes an unprinted amendment numbered 26.

Mr. RIEGLE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 2, beginning with "$52,144,000,000" in line 17, strike out through "$47,694,000,000" in line 20 and insert in lieu thereof the following: "$53,625,000,000 and outlays by $36,945,000,000 in fiscal year 1982; to reduce budget authority by $60,128,000,000 and outlays by $47,694,000,000 in fiscal year 1983.".

On page 7, beginning with "$9,354,000,000" in line 16, strike out through "$10,870,000,000" in line 18 and insert in lieu thereof the following: "$8,554,000,000 in fiscal year 1982; and to reduce budget authority by $4,494,000,000 and outlays by $9,970,000,000.".

On page 8, beginning with "$4,776,000,000" in line 25, strike out through "$6,388,000,000" on page 9, in line 3 and insert in lieu thereof the following: "$5,576,000,000 in budget authority and $5,490,000,000 in outlays for fiscal year 1982; $7,260,000,000 in budget authority and $7,288,000,000".

Mr. RIEGLE. Mr. President, this amendment would do two things: It would restore the minimum benefit for those persons presently receiving it under social security, and that is a figure of $800 million a year in outlays in fiscal year 1982 and $900 million a year in outlays in 1983.

The second thing it would do is to provide an offsetting reduction. What we

are proposing to spend to keep these people protected under social security we intend to pay for with other savings and economies in the Government. The Governmental Affairs Committee of the Senate would be instructed to report legislation that would require savings of this amount, of $800 million in fiscal year 1982 and $900 million in fiscal year 1983 by a much tighter control of Government travel; by reducing or eliminating filmmaking within the Government; by cutting back on the services and the expenses of consultants; by reducing supplies; and by otherwise scaling back and reducing the cost of other services. These cuts would be applied across all civilian agencies within the Government.

So we are proposing here, by this amendment, two steps: First, to maintain the minimum benefit for those now on social security; and to provide the money by making other economies in the Government that we think make more sense. So that the force of our amendment would not be to raise the cost of this budget by 1 cent.

Mr. SASSER. Mr. President, I want to take this opportunity to announce my strong support for the present amendment to restore funding for the social security minimum benefit for current recipients.

The $122 minimum monthly benefit is important to those retired workers whose lifetime earnings were very low. It is a benefit that is higher than the amount resulting from the regular benefit formula, in recognition of the fact that low-average earnings causes lower benefit levels.

What President Reagan is proposing, however, is that we eliminate the minimum benefit completely, grant supplemental security income payments to those eligible, and recalculate benefits for the 3 million Americans now receiving the minimum benefit.

The Secretary of Health and Human Services, our former colleague Dick Schweiker, estimates that between 8,000 and 10,000 man-years of work would be required to complete the administrative task of recalculating benefits for current recipients. I personally find it surprising that an administration so bent on reducing the cost of the Federal Government to the people would even make such a proposal.

As of January 1, 1980, 50,484 Tennesseans were receiving less than $133 per month—making it seventh in the ranking of States with high percentages of residents relying on low social security benefits. Fourteen percent of all Tennessee beneficiaries now receive a minimum benefit, Mr. President, and I for one believe that persons retired since the 1950's and 1960's should not have their benefits suddenly reduced.

Therefore, I reiterate my support for the Riegle-Long-Chiles amendment. It makes administrative sense. It is fair in its approach. And most importantly, it continues to pay minimum benefits to those who have earned them.

Mr. RIEGLE. Mr. President, I ask unanimous consent that Senator TSONGAS be added as a cosponsor to the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. RIEGLE. Mr. President, with Senator TSONGAS having been added as a cosponsor, I would like to reserve the remainder of my time. I will leave the floor shortly. I ask that the Senator from Louisiana control the remainder of my time today in my behalf.

Mr. DOLE addressed the Chair.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. DOLE. Mr. President, I think it is probably better that we conclude the debate on Monday—even though we have not had any on this side—because there are not many people here. Some of those who understand the issue have already spoken.

Mr. President, I wish to indicate to those who were outraged at 11 o'clock and who are still outraged at 10 after 5, and apparently will be outraged at any time we save any money in this body, that we are not going to be denying benefits to those who have earned their social security. The President made that very clear.

In fact, I believe there was a bipartisan effort afoot to change the cost-of-living adjustment, which would have affected 35 or 36 million social security beneficiaries, and the President himself shot that down.

I think it is a gross misrepresentation of the facts to spread rumors on the Senate floor late in the afternoon on Friday that you ought to be in fear if you receive social security benefits, and that you cannot trust this administration. This has nothing to do with the issue before us.

I hope that those who are so eager to discredit the Reagan administration will just give him a little time. He is trying to straighten out a mess that many of them have created over the years with their votes. Much of the Federal spending, many of the regulations, high interest rates and inflation are what we are trying to correct in this administration.

We hope we can do it on a bipartisan basis, and I think we can.

With reference to the minimum benefit, it is controversial, and a very delicate matter. I would be pleased to address the issue at greater length on Monday morning. It is unfortunate that the Senator from Michigan (Mr. RIEGLE) was not at the hearing we had earlier this week, where Mr. Ahart of the General Accounting Office testified. Although the study they did just addressed prospective elimination of minimum benefits, his findings about the income characteristics and work characteristics of minimum beneficiaries, in my view, would support elimination of the entire benefit.

Without going into detail at this time, these are some of the things they found in their study. I am quoting the General Accounting Office, not David Stockman, not the Republican National Committee, not Alexander Haig, or anyone else:

> We found that the minimum benefit provision, which was intended to help the poor, has in recent years mainly benefited retired government workers with pension, and homemakers supported by their spouses' incomes. Ironically, most needy people receive no additional income from the minimum provision because they are already covered by the Supplemental Security Income program, which requires a dollar for dollar offset for other income received.

The Advisory Council on Social Security labeled the minimum benefit a "windfall." The GAO study goes on to say:

> The minimum benefit by its very nature provides an unearned bonus or windfall to people who have had very low lifetime earnings covered by social security. For example, if the worker's benefit as computed by the formula is only $40, he or she would receive the higher minimum benefit of $122.

I do not suggest that this is a lot of money.

But, if these elderly people are poor, they are also eligible for SSI. I heard the Senator from Massachusetts talk about a 95-year-old lady. If that lady is not covered by SSI, she should be.

I would hope on Monday we could focus on the issue and not just cover the waterfront, suggesting to anybody who might be within hearing distance that somehow the President is about to wreck the social security program.

As I said before, it is a very delicate issue. The Senator from Louisiana expressed that view when we were making our recommendations to the Senate Budget Committee. We may want to modify the administration's suggestion in the committee. But I would hope we might continue debate on Monday morning. Therefore, I reserve the remainder of my time.

The PRESIDING OFFICER. The Senator from Louisiana.

Mr. LONG. Mr. President, I want to say something about this subject.

When the Senate meets on Monday, I will have something further to say, but at this point I would like to discuss one other subject which has been discussed previously.

In view of the fact that this is not on the resolution, I ask unanimous consent that I might have 8 minutes to discuss the relationship of the State Department and trade without it counting against the time on the amendment or on the bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

STATE DEPARTMENT TAKEOVER IN TRADE

Mr. LONG. Mr. President, I am pleased to see that the Senator from Kansas (Mr. DOLE) is on the floor, because I believe he is aware of what I am getting ready to discuss, and I think it is of concern to the chairman of the Finance Committee, just as it is of concern to all Senators who have thought about this matter.

Mr. President, in the last few days, we have heard a good deal about a controversy within the administration on the role of the Secretary of State, but one aspect of this controversy has for the most part received almost no attention. Yet it is the only subject in the controversy where the Congress has explicitly and repeatedly said that the Secretary

of State does not have authority: It is trade negotiations.

Under the Trade Act of 1974, the Office of the U.S. Trade Representative was created in the Executive Office of the President. The U.S. Trade Representative is nominated by the President and confirmed by the Senate. He has the rank of Ambassador Extraordinary and Plenipotentiary.

Moreover, the Finance Committee insisted this should be a Cabinet level job because we did not want the importance of this position to be misunderstood.

This person has statutory authority to negotiate trade agreements on behalf of the United States. This is what the Finance Committee report on the Trade Act said about the condition at that time:

> U.S. trade policy has not been noted for its coherence or consistency. Throughout most of the postwar era, U.S. trade policy has been the orphan of U.S. foreign policy. Too often the Executive has granted trade concessions to accomplish political objectives.

His lead role in trade negotiation was also confirmed in Reorganization Plan No. 3 of 1979.

May I say, Mr. President, the Senate last discussed this matter and the Senate last decided, and the House has concurred, that it is not the privilege of the Secretary of State, speaking for his Department and exercising his powers, to grant trade concessions to other countries. We created the Office of Special Trade Representative because we did not want this to be used as a tool to seek votes in United Nations debates. We did not want the fate of an industry to be decided on a concession that might be made, perhaps, to gain a vote or two when negotiating a treaty on the Law of the Sea, or something of that sort.

Knowing that nations had used their political leverage to obtain concessions which were very adverse to American industries, we were determined that the trade area should be judged on its own merits and that it should be independent of other policy considerations, well knowing that many in the Department of State would be urging that trade concessions demanded by other nations were a small price to pay for world peace or a small price to pay for stability in some area of the world.

Now, in 1974, Mr. President, the Congress changed that situation. We took the State Department out of the lead and put the unbiased Trade Representative in the lead in trade. And, because of the status of the Trade Representative, we were able to attract first-rate individuals to that job, who were in a position to negotiate for us.

What troubles me, Mr. President, is a report that on Monday and Tuesday of this week the present Secretary, Mr. Haig, had rather lengthy meetings with the Foreign Minister of Japan on the subject of trade in automobiles. The automobile question is a trade issue, Mr. President, and if we let it get mixed up in foreign policy, I think the situation in that industry is probably going to be made even worse than it already is. In any event, at the same time, the Secretary testified over on the House side, according to quotations in the newspapers, that the U.S. Trade Representative's role in trade negotiation was to tell the Secretary of State what the domestic industries thought about trade policy.

Mr. President, I helped to write that law and I believe the Senator from Kansas also helped to write that law. We had in mind that the Secretary of State was to tell the Trade Representative what the Secretary of State thought, along with all the other Cabinet officers, but that the Trade Representative was to be the one who was to consider all the views of the other departments, bring them together, take all that into account, and reflect the views of this country.

Yesterday, Mr. President, the New York Times reported—

> The White House has not yet decided who will represent this country in auto talks with the Japanese.

When these reports appeared, the staff of the Finance Committee—both majority and minority, Mr. President, this is a bipartisan policy I am discussing—attempted to find out what the administration's intention was with respect to who led this country's trade negotiations. The staff did not get a completely satisfactory response from the State Department, Mr. President, but eventually, they were advised by the Trade Representative's office that the President had assured Ambassador Bill Brock—who is now the Trade Representative and who was once a Member of the Senate and of the Finance Committee, Mr. President, someone in whom I believe the committee reposes great confidence—the President assured Ambassador Brock that the U.S. Trade Representative would represent the United States in all trade discussions of any kind with other nations. That is the way it should be, Mr. President, but I think that at this point the matter is still a little vague: Secretary Haig's statements are still on the record, and the President's reported conversation with Ambassador Brock is still off the record.

Aside from the clear policy expressed in the law there are two reasons for Members to be concerned about this little-noticed episode. First, it weakens our hand in trade negotiations because it confuses foreign nations greatly. I imagine the Government of Japan, not to speak of other governments, is now confused as to whether the person who speaks for the President on trade issues is the U.S. Trade Representative. For many years now, that issue has been clear to them. This confusion will make negotiations needlessly difficult for some time into the future unless the location of authority is clarified.

Second, it weakens the Trade Representative's ability to do a job that we desperately need done well if this country is to get competitive internationally. There is still much unfinished work to be done in trade. When Ambassador Robert Strauss presented us with the results of the multilateral trade negotiations in 1979—5 years of what has been called the most complicated trade negotiations in history—he said much of those agreements were not worth the paper they were written on if they were not enforced by vigorous diplomatic action by the United States. We have renewal of the multifiber arrangement coming up this year. And we have this automobiles matter. And there are many others, all of them relating to the health of our domestic industries, a subject we are all concerned about as we begin to examine the President's economic recovery plan. If our bureaucrats are fighting over turf when they should be working for us, we will just never get this important work done.

So, I hope the President and the others involved in the administration will examine this situation and clarify that the U.S. Trade Representative is what the law says he is: The sole representative of the United States on trade.

Mr. President, in closing on this subject, may I say that we will never be able to obtain persons of the stature and of the competence of Robert Strauss or William Brock, one a great representative of his Government as a Democrat, the other a Republican—to represent this Nation in its very important trade negotiations if those men are to be spokesmen for the Secretary of State. Men of that caliber, who, the Congress has insisted, must be sought for this job, will not be available if they are to be merely an ambassador speaking through a Secretary of State. If they are to do the job as the Congress intended, and as other Presidents have appointed those men to do, we should have some of the top people in this country.

One previous Special Trade Representative was Mr. Dent, who left the job as Secretary of Commerce to take the job as Special Trade Representative. Men of that caliber will not be available for this job if they are not to be respected as speaking for this Nation in trade and if the State Department is to be permitted, for its international political objectives, to control and to speak for this Nation in the negotiations on trade.

It is for that reason that the Committee on Finance and others in Congress fought very hard to see that the Trade Representative would be a Cabinet-level position and that we would provide it with whatever support it took to see to it that we would obtain some of the most qualified people in America to hold that job and speak for this Nation in trade. I hope that will be understood in due course.

Mr. DOLE. Will the Senator yield?

Mr. LONG. Yes.

Mr. DOLE. Earlier today, the Senator from Texas (Mr. BENTSEN) made a statement pretty much indicating his concern. The Senator from Kansas said at that time that there is a long history that has developed in the Senate Committee on Finance of cooperation with the Special Trade Representative. We have had outstanding men, as the Senator has indicated, like Bob Strauss, Governor Askew from Florida, Mr. Dent, Bill Walker, and now William Brock. I think it is an area we should guard very closely in our committee.

Mr. President, I suggested to Senator

BENTSEN that it should not be necessary, but maybe it is, to send another signal to the administration of our confidence in the Special Trade Representative. Perhaps very soon, Bill Brock will come before our committee and give us a report on how things are progressing. I have been reading with some amazement that it seems that everybody is involved with trade negotiations. So far, anybody in Washington who wants to negotiate on auto imports, apparently, can get into the act.

I hope, based on recent experience and the experience we have had over the years, which is bipartisan, that we want Bill Brock to succeed, we want President Reagan to succeed. We want everyone to succeed. But it seems to me, as it certainly does to the Senator from Louisiana, that this is an area that the Senate Finance Committee should watch very carefully, very closely. We should certainly continue the bipartisan support we have had under the Senator's leadership.

Mr. LONG. Mr. President, this is not the first time that we in Congress have become aware of this problem. At the time that we fought to make this position a Cabinet-level job, the State Department resisted that and there were many in the administration of President Ford. I believe it was at that time, who resisted that. We prevailed. The reason we did was that we wanted to make it clear that the view expressed by Mr. Kissinger as the Secretary of State was not going to be the view of this country.

Mr. President, I respect him as a very effective, powerful Secretary of State, but Mr. Kissinger's view was that all of this was foreign policy. When a Secretary of State has the power to treat it that way, a thing like peace in the Near East, negotiations in the Near East, can become so very important that a Secretary of State is led to think that perhaps if he can make a trade concession—which could be the death of an American industry—that is a price worth paying to achieve peace in the Near East.

It might be that he would give away an American industry and achieve peace in the Near East. But, Mr. President, what is more likely to happen is that he gives away the American industry and does not achieve peace in the Near East, and we find it is not a wise decision.

Mr. President, I was at the Law of the Sea Conference many years ago—not the latest negotiations—and the people in the fisheries industry took me out to dinner one of those evenings. They said, "This Conference must fail. There is no way this Conference can succeed."

I said, "Why?"

They said, "Because in negotiating this Law of the Sea Treaty, our representatives have given away so much of our fish that they have now given away more than 100 percent of the fish; it looks to us as though now, they have given away 200 percent of our fish trying to get an agreement on the limit of the territorial sea."

They said, "When the other countries find out that we have given away more than 100 percent of our fish, this Conference will fail. It will just go up in smoke and nothing will be achieved."

Mr. President, I am not sure that it was for that purpose, but the Conference did fail. There is no doubt that at that particular Conference, the U.S. Government was placing the potential of the United States ability to show the flag above the fate of the American fishing industry.

It is on that type of thing, Mr. President, that we should not let happen in the future. It is the kind of thing that led Congress, the Senate in particular, to insist that the Special Trade Representative would speak for this Nation on trade.

EXPANDED OWNERSHIP—ITS IMPORTANCE TO THE FREE ENTERPRISE SYSTEM

Mr. LONG. Mr. President, the following are remarks which I made on March 16, 1981, to the Government Affairs Committee of the ESOP Association of America:

There is much concern these days about our free enterprise system and about what we can do to make it work better. Today I would like to talk about expanded ownership and about its importance to the survival of this system.

In terms of stock ownership, about one percent of our people own about 50 percent of it. About 6 percent own 80 percent, but the shocking part of it is that about 80 percent of our people don't own any investment at all in productive wealth. That is something that concerns those of us who believe in a strong capitalist system.

Capitalism really needs a broader constituency. It needs more people who regard themselves as capitalists if this system is going to survive and going to grow and to spread around the world—particularly when you look at the alternatives with which we are contending.

All this revitalization and reindustrialization that we are talking about is great and we expect to support it. But the question is, how is that going to react on the ordinary person—the average working man and his family; are they going to feel that this is theirs? A poll indicates that the overwhelming majority of workers do not feel that an increase in productivity does *them* any good. They feel that that is something for the other guy—for the guy who owns the plant.

When you have a company that is broadly owned and where the employees have a substantial share in the stock, as most people here advocate, it is different. They look upon this as being their company, and they have an interest to protect, and they have a motivation that just doesn't exist otherwise. So, if we are going to make a great majority of Americans feel that they are being benefitted by these tax advantages and by these efforts to make big investments in plant and equipment, then we are going to have to find a way to see to it that the rank and file have a chance to own some of it and participate. That's what employee stock ownership plans are all about.

A recent study has indicated that, as far as most Americans are concerned, not only do they own no interest in productive wealth, the greatest asset that they own is the fact that they will someday be empowered to draw either a Social Security payment or a welfare payment from the Government—a transfer payment. Well that is a poor showing for a great country, is it not? It started out offering broad economic opportunity to all of our people.

I am sure that you have seen some of these figures showing a close connection between employee ownership and productivity and profitability, so I will only quote one of them at this point. A 1979 study of 72 companies which had employee stock ownership plans indicated that the sales per employee increased an average of 25 percent in the three years since they established an ESOP. Their total sales rose 72 percent; the total jobs in the company jumped by 37 percent; profits increased by 157 percent; and even Uncle Sam made something out of it because the taxes that they paid the Government increased by an average of 150 percent. That just shows who all benefits when you have a greater interest among the workers in the companies in which they participate.

Now one of the greatest challenges of the 1980s is going to be how we can tap the abilities and skills of an increasingly well-educated work force. How are we going to enlist their enthusiasm and their commitment? Should they be offered a chance to own or simply a chance to work for those who own? Or, worse yet, a chance to work at a make-work job for Government.

This ownership issue is a question of alternatives. We can follow a road that will lead us eventually toward nationalization of many of our basic industries, which I don't think anyone here wants to advocate at this point. Or we could take a second course—one that would lead to more concentrated ownership. I don't think anybody here would say that in a system where about 15 percent of our people own 85 percent of all the net worth, and where the bottom 50 percent owns less than 5 percent of it—I don't think that many of us here would be advocates of a further concentration of wealth in this country. It is a threat to the system itself. And yet non-action to spread ownership is actually a vote for further concentration.

As much as I admire some of the things Mr. Reagan has been speaking out for, if we pass his program without putting something in there to help spread employee stock ownership or something of that sort, we are voting for a further concentration of the already over-concentrated wealth of the Nation. Now, over time, this force of over-concentration, if the Nation is to survive as a capitalist country, would mean that the Government would have to take even more steps at the national level to redistribute income because of the concentration of productive capital.

Taxing some in order to give to others is one way to achieve a more equitable distribution of income, but for this purpose that's a hindsight, remedial approach. And, of course, Government can never return as much as it takes from people because it has the costs of collecting and distributing.

The third course—expanded ownership is the logical choice. It suggests a positive, private property approach to encourage a broader distribution of productive capital in the country and a fuller payout of the earnings that are produced by capital.

This is a bipartisan effort. I am happy to say that statements by President Reagan strongly support this idea of expanded ownership and employee stock ownership. And even the Republican platform, on which the President ran, said that the Republican Party would "help millions of Americans to share in the ownership of the wealth of their Nation."

Now I know that the Secretary of the Treasury and the Undersecretary and the President, and all the rest of them will say, "Look, that's a good idea, a fine idea, we think it's great—you have got the right idea, Senator, and fellows and ladies, it's a great idea; we are all for it, but not on this bill, we'll get another bill later on." Don't you believe it. There is not going to be any other bill any time soon. If we pass a bill for a 30

percent tax cut, or anything like that, if we pass some $50 billion tax cut in this Congress, next time we try to pass some bill that will do something for somebody, if it involves a lot of money, they'll say, "I'm sorry, but the Treasury can't afford it. It would be too big a burden; we've done all we can do." As that song from Oklahoma went, "Everything's up to date in Kansas City, they've gone about as far as they can go."

They'll say, well, "we've gone about as far as we can go; we've done all this now and I'm sorry but we have run out of soap, and there's no more to be had. If anything, we'd like to raise taxes to help get back some of the benefits we gave away already." So it would be too late, and if we are going to do something, it ought to be as part of the bill we have here.

Let me say this about this bill. There is a lot of merit to it, and parts of it that help buy new equipment—big tax advantages which to a large extent is like a payment out of the Treasury to help business to buy new equipment. Fine, that's great and I'm all for that. But while you are doing all this, and that's all great for the workers, and that's great for some of us in this room who were very fortunate—who either inherited something or had very good luck with their investments and that kind of thing, but how about the rank and file?

If you believe in the kind of Government that I believe in, and the kind of system that most of us here believe in, we should not miss this opportunity to put them in on it. And it's not going to be adequate just to say that they'll get their percentage tax cut along with the rest of it. If we proceed on that trend, they are not going to be able to save anything to buy this corporate stock, and the share of America they will own further on down the road will be even less than it is now.

So if we want to encourage interest by the average worker, reduce absenteeism, reduce theft, reduce the losses from poor workmanship, and improve labor-management relations, then we want to see to it that this bill passes. It includes amendments that would guarantee that this new wealth that we are going to create will be spread more evenly among the people of this country than is planned at this moment.

So we would give capitalism a broader constituency and we would help the average family to achieve a capital estate. Those are two big objectives that we want to achieve.

Let me say that there are even more significant things that need to be done. We are trying to prevent socialism and communism from taking over Latin America, from taking over Asia, from taking over Africa. We need a working model of what we would advocate for others throughout this world, and we ought to have it right here to show them what we are doing, not just that some people can get rich because the rank and file are going to say, "That wouldn't be me, we have those people in our country and that doesn't do me any good; they just keep getting richer and we keep getting poorer and we have nothing to show for it." We need to have a working model to show people all over the world how the bountiful, increasing prosperity we have in America spreads out and reaches all the people in all walks of life. And we have the opportunity to do it with this program.

We are going to agree in the Senate Finance Committee, if I am any judge at all, to at least the key provisions, the most significant provisions, of the bill that I am going to introduce to help spread employee stock ownership to a great number of areas where it doesn't exist, or exists but slightly now, and to make it far more meaningful and to help overcome some of the technical difficulties with the program. We'll agree to most of that, and I think we will agree to the part that will be the most expensive which would extend it to those companies that are labor-intensive like J. C. Penney, Sears, and people like that that are labor-intensive rather than capital-intensive.

Extending this tax credit for the employees based on payroll, rather than based on the amount of equipment they buy, that will bring a lot of additional people into it. I'm confident that the Committee will vote for that. I think we'll have good luck in reporting it to the United States Senate, if you will help.

But I need your help. I need the help of everybody here. I need you to talk to your House Members, and talk to your Senate Members. I will give you a copy of this speech if you want it, and I'll give you any kind of information you want, all the help I can give. I'm calling on you to do your part.

If you will just call on these people. One thing that you can do, go in and buttonhole somebody, or talk to your Senator, that helps tremendously. But, in addition to that, if you will talk to the people you associate with; for example, if you have a store or a factory or a plant in somebody's State, call upon that store manager if he believes in this, and most of them do if you are an ESOP company, call on them—not only to write the fellow, to telephone, but if they can't come to Washington, ask for an appointment so when he comes to his home district they're there to wait for him. Meet him at the airplane if they can, or ask where can I meet you. Get in touch with these people, visit with them; say, "Look, don't you think this is important, we think this is very very important." And when they do that, it is going to pick up additional support for us.

I don't have any doubt that we will have a lot of support off of the Republican side of the aisle, a lot of support off the Democratic side of the aisle; I couldn't help but note that Bob Byrd, the Democratic Leader, talking about what the hopes were for the Democrats in the future, made reference to employee stock ownership. That's great. I saw that Senator Hart of Colorado made a statement making reference to that any saying that the Democrats ought to get more active and do something.

We want the Republicans to be involved in this too. They're big believers in free enterprise; they're big believers in private ownership, and they have supported this kind of thing. We don't want this to be just a partisan thing. We want them to go along with us and that's your job, to help them to get interested. I'll do my part, but I can't do it all by myself. I just welcome all the help I can get. What we can achieve along this line, I'm ready to share the credit for with anybody. Let's just get all the help we can and make this thing go.

I know that with your help and with what you can do, and what some of us up here concerned about this can do, we can get momentum behind this movement and we can make this shape the future of America and shape it to the benefit and the good of the people. And, in doing it, we will help the United States to sell what we are advocating all over the whole world, and that is something we are going to have to do if we are going to be able to peaceably win the hearts and minds of people.

Thank you very much.

APPOINTMENT BY THE PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The Chair, on behalf of the President pro tempore, pursuant to Public Law 94–118, appoints the Senator from Delaware (Mr. ROTH) to the Japan-United States Friendship Commission.

ORDER FOR RECESS UNTIL MONDAY, MARCH 30, 1981, AT 9:45 A.M.

Mr. BAKER. Mr. President, I ask unanimous consent that when the Senate completes its business today, it stand in recess until the hour of 9:45 a.m. on Monday next.

The PRESIDING OFFICER. Without objection, it is so ordered.

MURDERED MISSIONARIES IN EL SALVADOR

Mr. KENNEDY. Mr. President, on December 2, 1980, four American Catholic women missionaries were murdered in El Salvador. Their deaths have yet to be adequately investigated, and prosecution of those responsible has yet to be initiated. But this shameful situation has not prevented the apperance of two statements by high officials of the Reagan administration which have added to the distress of the families and religious orders of the murdered church workers.

One is attributed to U.N. Ambassador Jeane Kirkpatrick in the Tampa Tribune of December 25, 1980. Ms. Kirkpatrick is quoted as stating that the churchwomen were political activists. The second, by Secretary of State Alexander Haig, was reported by United Press International on March 18, 1981, and attributes to him remarks before the House Foreign Affairs Committee suggesting that the women may have run a roadolock at the time of their deaths.

Because these statements appear on their face inaccurate, my distinguished colleague Senator PAUL TSONGAS and I have written Secretary Haig to request an explanation of these statements.

Mr. President, I ask that the full text of our letter to Secretary Haig be entered at this point in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, D.C., March 23, 1981.

Hon. ALEXANDER HAIG,
Secretary of State,
Washington, D.C.

DEAR MR. SECRETARY: During a meeting last week with members and representatives of the families of Ita Ford, Maura Clarke, Dorothy Kazel, and Jean Donovan, American Catholic missionaries slain in El Salvador on December 2, 1980, they raised the subject of two statements made by Administration officials which are matters of considerable concern to them. The first is in regard to alleged political activities of the missionaries, and the second their actions on the night on which they were murdered.

With respect to the first, in an interview with Ambassador-designate Jeane Kirkpatrick published in the Tampa Tribune on December 25, 1980, Ambassador-designate Kirkpatrick is quoted as follows: "The nuns were not just nuns. The nuns were also political activists. We ought to be a little more clear about this than we usually are. They were political activists on behalf of the Frente and somebody who is using violence to oppose the Frente killed the nuns."

With respect to the second, United Press International reported, on March 18, 1981, remarks made by yourself before the House Foreign Affairs Committee suggesting that the women may have been shot as their vehicle was running a roadblock, or being perceived to be running a roadblock. We understand that you have explained that your reference to an exchange of gunfire was unintentional.

We request an explanation of these statements, which on their face appear inaccurate and suggestive of activities on the part of these churchwomen which their families and the religious orders to which they belong do not accept.

Sincerely,

PAUL E. TSONGAS,
EDWARD M. KENNEDY

Mr. KENNEDY. Mr. President, earlier this month I had the privilege of addressing the annual meeting of the American Jewish Congress on the domestic and foreign policy priorities facing our Nation.

At this meeting, the congress adopted an eloquent and compelling "Call to Conscience" that rejected "both the practice of selfishness and the politics of despair" and urged a "fellowship of commitment and action" for a "world based on justice and the rule of law."

I commend this statement to my colleagues. It affirms that "government must continue to be an active force for enhancing social justice and human dignity." It stresses that "it is imperative to reassert our commitment to pluralism" in American society. And it supports a strong foreign and defense policy, which includes an effective advocacy of international human rights and an unswerving "commitment to the survival and prosperity of the State of Israel."

Mr. President, I request that the text of the Call to Conscience of the American Jewish Congress be inserted at this point in the RECORD, along with the text of my remarks to the AJC annual meeting last March 8 in New York City.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

AMERICAN JEWISH CONGRESS STATEMENT: A CALL TO CONSCIENCE

"Not Charity, But Justice!"

That is how Rabbi Stephen S. Wise, our founder, defined the core of our commitment.

Throughout our 62 years, American Jewish Congress has worked to enlarge that concept in American life.

We are proud of our history of involvement in the struggle against bigotry and discrimination; for civil liberties and civil rights; for opportunity for the disadvantaged and the deprived. We have defended democratic values against totalitarian threats from left and right.

It is said that we live today in a new era, a time of transition. And indeed, Americans are engaged in a profound rethinking of many long-held policies and the very purpose of government.

We welcome such reflection and debate. A willingness to discard outworn notions and to seek fresh solutions is a source of our national strength.

But it is precisely in a time of questioning that those enduring values for which we stand must be clearly restated and reaffirmed.

DOMESTIC ISSUES

We affirm that government must continue to be an active force for enhancing social justice and human dignity.

There are legitimate questions about excesses in government—of spending and size; of waste, inefficiency and fraud. We therefore welcome the new Administration's commitment to oversight and fiscal responsibility; to discarding what has proven unnecessary and unworkable.

But we reject the idea that government is at the root of all of our ills. We believe that the great social legislation of the last half century—from Social Security to the Voting Rights Act—has made America more just, more humane and more free.

The American Jewish Congress is committed to preserving these gains.

We do not object to the notion that the public sector recede in our economy and that the private sector assume a larger role in solving social problems. Indeed, we welcome some of the Administration's more innovative proposals, such as the creation of free enterprise zones.

However, legitimate efforts to reduce government's growth and to alter the balance between Washington and the States should not be used as a smokescreen to abdicate government's duty to advance the public welfare and defend the public good.

We will hold the Administration to its own proclaimed standard that the truly needy will not be injured and that their essential "safety net" of services and protection will be preserved. We will insist that equity govern this process, and that sacrifices be fairly shared.

We will join with that larger community of conscience—of religious, civil rights, labor, and public interest groups—to press the fight for social justice in America and defend the most vulnerable in our society.

MORAL VIGILANTISM

Out of our own experience, it is imperative to reassert our commitment to pluralism. This deep and unique American notion is threatened now by the activist politics of highly organized, well-financed, single-issue constituencies offering absolute and simplistic solutions to the dilemmas of our time.

We are dismayed to see complex national issues on which honest citizens may disagree transformed into litmus tests of religious purity.

Strident voices—some amplified by vast private television networks and multi-million dollar merchandising—claim God's blessing for their vision and promise a political crusade to remake American society according to their particular moral code. We are fearful of those moral vigilantes whose political agenda consists of a dangerous imposition of government control, in the name of religion, over the classroom, free speech and women's right of choice.

This kind of politics tears at the delicate fabric of accommodation and compromise that holds a pluralist society intact. It debases our public life.

FOREIGN POLICY

In foreign affairs, as in our domestic life, simplistic solutions will not work. Our defenses must be strong enough to defend ourselves and our allies and to act as a deterrent to aggression by tyrants of any political stripe. But increased military strength, alone, is not sufficient to meet the challenges we face.

Over-population, depletion of resources, starvation and nuclear proliferation—the modern Four Horsemen of the Apocalypse—remain America's enemies and the enemies of all who hope to build a more stable, freer world. These problems will not yield to a foreign policy based solely on resisting Soviet expansion. Squalor, abject poverty, exploitation and tyranny are breeding grounds for subversion by forces hostile both to democracy and to the United States.

We are encouraged by the invigorating reassertion of U.S. interests in the U.N. already indicated by the new U.S. Mission to the United Nations. We are gratified by the Administration's announced intention to act decisively against terrorism, both domestic and international. We reject the suggestion, however, that somehow the campaign against terrorism must be at the expense of the campaign for human rights. Advocacy of international human rights must remain a principal objective in the management of our foreign policy.

A demonstrable concern for international human rights—which opposes repression by left-wing governments no less than right-wing governments—will enhance our standing abroad and advance our national interest.

Finally, we reaffirm our commitment to the survival and prosperity of the State of Israel. Any calculation of American foreign policy must recognize that, for the United States, Israel remains a steadfast friend and partner, a bulwark against totalitarian expansion and a strategic asset vital to the survival of the West.

We welcome the Administration's declared support for the Camp David process as the only viable way to peace in the Middle East. In our view, consistency requires that the Administration oppose and reject efforts to undermine that process by the so-called European initiative and by demands by the Arab world for additional offensive weapons that can only encourage the launching of the promised jihad against Israel.

There are those who see our causes and values as in retreat. We do not. We reject both the politics of selfishness and the politics of despair. We reaffirm our faith in our principles and in the abiding decency and compassion of our fellow Americans.

To those who would claim that our hopes for a world based on justice and the rule of law are an impossible dream, we would reply that our survival as a Jewish people is a miracle, too, wrought through the collective energies and the hope, faith and will of Jews down the centuries.

Our hopes for a world of justice and peace can and will be realized. We rededicate ourselves to the fulfillment of that dream. We call on all those who share this dream to join us in a fellowship of commitment and action to make the dream a reality.

ADDRESS OF SENATOR EDWARD M. KENNEDY

It is an honor for me to be here in New York to meet once again with the leadership of the American Jewish Congress.

During the cold winter of last year's campaign, you warmed my heart with the Stephen S. Wise award. I shall never forget so many of you who stood with me, because we had common hopes and commitments for our country. I was thinking of you, and of people like you, when I recalled the poet's words at the convention and said: "What golden friends I had."

We are meeting today in the free synagogue of the founder of the American Jewish Congress, Rabbi Stephen Wise. Today, Rabbi Klein and Rabbi Brickner carry on his noble tradition of speaking with passion and conviction to the great issues of the day. As Rabbi Klein has said of Stephen Wise, "Like . . . a great organ, his mighty voice was raised with prophetic fervor in denunciation of injustice, in defense of peace, in support of Zion."

The American Jewish Congress lives in the spirit of Stephen Wise. Today you are calling upon the nation to uphold the enduring values of liberty and justice, for which this nation has always stood—and for which it must always stand—at home and around the world. I am proud to join you in that call to the conscience of America.

We meet today at a time of deepening doubts over the direction of our country in foreign and domestic policy.

In recent days, we have witnessed decisions by the Administration that call into question the fundamental principles that define our destiny as a free people—principles that have taken years, and sometimes generations, to build. Those principles must not be set aside at the whim of passing political majorities. And certainly they must never be swept aside by those who dare to call themselves the Moral Majority.

We must reaffirm our basic beliefs, as you

have done at this conference, wherever the issue is drawn.

Abroad, we cannot be silent about four ominous decisions of the Reagan Administration—decisions that shadow all our other efforts, and that threaten to undo the painful progress we have made toward building international peace—and rebuilding respect for America among nations of the world.

I believe Ronald Reagan is wrong on El Salvador, wrong on nuclear arms control, wrong on human rights, and wrong on arms sales to Saudi Arabia that will jeopardize the security of Israel.

I oppose the Administration's decision last Friday to sell advanced military equipment, with obvious offensive capability, to a government that has sworn to destroy the state of Israel. An arms race never has, and never will, bring peace to Israel and to the Middle East.

We know that Saudi Arabia is now spending nearly $400 million a year to finance the terrorists of the PLO. We know that Saudi Arabia fiercely opposes the Camp David peace process. We know that Saudi Arabia has sought to prevent a strategic petroleum reserve that can guard America against future oil embargoes.

As I have said many times in the past, America must never barter the freedom and the future of Israel for a barrel of oil.

Israel has been and will be our strongest friend and our surest ally in the Middle East. Israel is not only a strategically vital source of stability in that region. Israel is a beacon of democracy and social justice, shining out over a sea of fear and terror and hatred.

Because we are determined that all the things which Israel represents shall not be put at risk, Senator Biden, Senator Cranston and I will work in Congress for our Senate resolution to halt this new arms sale to Saudi Arabia. I opposed the last arms sale. I oppose this arms sale. And I will oppose any arms sale in the Middle East that endangers the security of Israel.

Second, I disagree with the decision of the Administration to embark on an unconditional military adventure in El Salvador. That adventure is clearly unnecessary—and it is profoundly unwise.

We all oppose the shipment of arms into El Salvador from countries that are the actual or potential adversaries of our own. But we must not let their transgressions tempt us into an escalating commitment that could trap us in a wider war.

We have heard the President say that he has been in office for six weeks, and he has not yet fired a single shot. But we can be sure of one thing: Shots will be fired by American soldiers in El Salvador, and American soldiers will die in El Salvador, if we continue on our present course. That course is not inevitable—and it must not be accepted as inevitable by the American people.

I believe we should halt all American military aid to El Salvador, unless and until three conditions are met. There must be a complete investigation of the brutal murders in recent weeks of three American nuns, a Churchman and two American labor representatives in El Salvador. There must be progress toward a negotiated solution. And there must be effective guarantees against any military coup. American aid must not be misused to maintain the power of a military dictatorship in El Salvador.

We must condemn the violence and the terror from whatever quarter they may come. But we must never give our support to a regime that stands by, while American missionaries are beaten and killed.

Third, I oppose the Administration's foolish and dangerous neglect of arms control. Peace will not come from weakness. But the only finish line of an endless nuclear arms race will be humanity's final war.

Let us pledge together to build our defenses so that we may keep America strong. But let us pledge as well to seek with equal resolve an arms agreement that can advance both our national security and international peace.

Fourth, I reject as fundamentally wrong the Administration's decision to downgrade human rights. We remember the bright promise of John Kennedy's Inaugural Address. He spoke of an America "proud of our ancient heritage and unwilling to witness or permit the slow undoing of human rights to which this nation has always been committed."

In our best days, we have held that standard high. The defining element in the character of America is our unyielding commitment to "the inalienable rights of life, liberty, and the pursuit of happiness."

So we must speak for that cause now, when a new Administration takes power and yields on the commitment to human rights.

Few of us will ever feel the impact in human terms of this flight from the defense of human rights. We will not see the faces pressed against the barred windows of political prisons in Korea or Czechoslovakia, Chile or Guatemala. Most of us will never know the names of the innocents rounded up by dictators no longer restrained by American concern. None of us will hear the gagged pleas for justice of prisoners under torture, who are now told by their keepers that America does not care.

If we abandon them, then we shall abandon part of the soul of our own country.

We must stand with them—from Latin America to Eastern Europe, wherever they hope for our help.

We must stand with the Jewish dissidents in the Soviet Union, so that they shall not learn a new fear in the night.

The American Jewish Congress understands that for every faith, every race, and every people, this is an indivisible issue. When a campesino is murdered in Bolivia, Jews in Argentina are imperiled.

It is not a sign of weakness to proclaim the cause of human rights. Twenty years ago, a President of the United States stood up for human rights, and then stood up against the Soviet Union during the Cuban Missile crisis. Today the President of the United States can stand up for America without sacrificing the ideals for which America must always stand.

America has meant so much to the world because to be American has meant so much to so many here at home. That is why your grandparents and their parents came here from the shtetls of Poland and the Ukraine—and why mine came to Boston from the barren fields and the famine of New Ross and County Wexford. This country was shaped, in large measure, in the reflection of their vision and the realization of their hopes.

The Jewish people have made a unique contribution to our history and this heritage. It was the Jews who first proclaimed liberty as the indispensible condition of humanity. It was the Jews who first recognized the inherent equality and the infinite potential of every human being. And it was the Jews who first set down as an ethical imperative the responsibility of government, and of the rest of us, for the poor, the widow, the orphan, those who hunger and those who are homeless.

We have come far toward that vision of fairness and compassion. Now, in the midst of a turn to the right, we must not take up the fashion of the moment. We must not lose sight of the progress that has been made, or of the work still to be done.

We have made mistakes. But government has also made an indispensable difference. In the outcry and disillusion of the day, let us remember that it was government which set minimum wages and maximum hours, which insured the security of the elderly and the rights of labor, which opposed discrimination and protected the health and safety of consumers. And it is, in fact, government which helped to make our economy prosperous in the past—and which worked to keep the free enterprise system truly free.

We have much to be proud of. And we can also afford to be realistic about the places where government has fallen short. Many of our programs have succeeded; some have not. In other cases, the problem is not that progressive ideas have failed, but that they were never really tried.

In his first report to the nation, President Reagan gave us what he called "Attention Getters", which suggested that Americans were worse-off today than twenty years ago. Surely none of us can believe that. No black person who now has civil rights, no family that has escaped from poverty, no worker who experienced the prosperity of the 1960's, who bought a home and sent his children to college, can possibly believe that.

Let us say to those who criticize so much of what government has done: if there is a dark passage in domestic policy in these two decades, it is not a fatal failure of liberalism, but the damage done by Richard Nixon.

There is a failure today for which we are paying dearly. While the forces of reaction have been marshalling the resources to reeducate the American people, we have been complacent about our own cause. Too often we have neglected to make our own case.

Our opponents have been repeating for years that government itself is the root of all social evils. In 1964, when Ronald Reagan first voiced that view, he spoke for a narrow minority. In the 1980 election, repeating the same time-worn slogans, he commanded a majority of the vote.

Now we must respond. The primary necessity of our situation is also the first obligation of any political party—and that obligation is to stand for something. We cannot defeat the new right by joining in their chorus. Instead, we must speak the truth as we see it.

Government spending is not in fact the whole, or even the major, cause of inflation—and you and I and every respectable economist knows it. Government regulation is not in fact the sole, or even the major, cause of our declining productivity—and you and I and every respectable business man or woman knows it.

We are told, and it is surely correct, that we cannot solve our problems simply by throwing money at them. But that is only a half-truth that is misused to excuse indifference and neglect. So we must insist on the whole truth. We must also say that this nation cannot solve its problems by throwing tax cuts and budget cuts at them.

Certainly, we must trim waste and needless spending from our budget. But that is not all Ronald Reagan is proposing to do. Certainly, we should eliminate unnecessary regulation, and not ask of business a standard which is impossible to meet. But that is not what Ronald Reagan is proposing.

What he is proposing is to eliminate the school loans that send hundreds of thousands of our sons and daughters to college; the school lunches that feed hundreds of thousands of young children every day; the health care programs that have increased the length and raised the quality of our lives.

What the President is suggesting is that we cut back on the safety regulations which have saved thousands of workers from death and serious injury, that we abandon the goal of preserving the environment, and leave instead to our children a land which they cannot call America the Beautiful.

There is nothing surprising about the Reagan proposals—coming from Ronald Reagan. They are, after all, things he has

been talking about for a generation. What is surprising is the support that they have in Congress—and, at least for the moment, across the country.

We will never change the views of Ronald Reagan—but we can change the minds of the American people.

Those of us who call ourselves progressives must adapt our enduring values to changing realities. That is not a novel idea, but an old tradition that reaches from the new freedom of Woodrow Wilson to the New Deal of Franklin Roosevelt to the New Frontier of John Kennedy. In their spirit, we must offer new hope in the 1980's.

It is a challenge we have already taken up. The Reagan Administration did not invent deregulation. In the Senate, I have worked with my colleagues for years to end excessive interference with free competition—and we have already won that issue in the airline and trucking industry.

The Reagan Administration did not invent cost-cutting. In the Senate, I have worked with my colleagues to stop the giveaways for those who already have far more than they need. And as we cut the budget now, let us begin by cutting out the $4.6 billion a year in federal subsidies for the major oil and gas companies.

The Reagan Administration did not invent tax reform. In the Senate, I have worked with my colleagues to provide relief for middle income families and targeted incentives for business investment and productivity. And in the months of debate still to come, we cannot settle for an Administration tax cut that takes the name of tax reform in vain—that would give a tax cut worth twenty times more to the very wealthy than to the average American.

We have a cause to advance. We have a record to be proud of—and despite its shortcomings, I am convinced that it will soon compare very favorably with the record of those who lead us into reaction and retreat.

And I am also convinced that we will continue to be the source of the new initiatives that will matter—the work of reindustrialization, the development of alternative energy, the revival of our cities, and the achievement of full equality for the minority who are not white and the majority who are women.

Always before us must be the ideals our forebears brought with them—the ideals that have made this country both good and great. In a time that tempts many to scramble for their own advantage, we must heed the words of Rabbi Wise, who warned against the danger of pursuing "Justice for ourselves alone, forgetting that justice will be for all or none. The supreme declaration of the Hebrew Bible was and remains, 'Justice, Justice shalt thou pursue,' whether it be easy or hard, whether it be justice for white or black, Jew or Christian."

Next month the Jewish people will celebrate Passover, and you will tell your children again of the freedom from bondage and the flight from Egypt.

Four times in the sacred story of that journey, the pledge of liberty is made to the people of Israel. Four times on Passover, a cup of wine is lifted to commemorate that pledge.

But the Passover ceremony marks far more, for it was during the exodus that Moses received the Torah, and an ark was built to enshrine the word of God. God's gift to the Jewish people was a belief, an ideal you have given to others across the centuries and the ages.

That belief and that ideal are at issue now. The time we are in is not easy. But we have known hard hours before. And I believe from the heart of my convictions that a Passover will come when the cup shall be lifted over a world of freedom—freedom from war, from fear, from want and oppression—freedom for the people of America, and the people of Israel, and of every place on Earth.

It will not come this year, but the hope lives on and some year it shall come true.

To that dream, this year and all the years of our lives, we will raise our cups in faith and in prayer.

U.S. RELATIONS WITH ARGENTINA

Mr. KENNEDY. Mr. President, the recent visit to this country of President-designate Gen. Roberto Viola of Argentina raises serious questions about our relations with the military dictatorship there. In 1977 I joined with Senators ALAN CRANSTON, Hubert Humphrey, and others in offering legislation which ended our military aid to Argentina. In 1981, there remain 15,000 persons "disappeared" after having been abducted by security forces. Nine hundred political prisoners are held without charge, and another 900 political prisoners still remain behind bars. Indeed, immediately before General Viola's visit here, human rights leaders and activists were detained and harassed in Buenos Aires. Two workers were arbitrarily detained, held incommunicado and tortured only days before the Argentine general's arrival.

Responding to General Viola's visit, Senator CRANSTON and I have written to Secretary of State Haig expressing our concern over the human rights situation in Argentina, and calling upon him to raise the question of political prisoners and the thousands of persons "disappeared" in Argentina with President Viola. As our letter states:

Argentine respect for freedom and human rights will make an essential contribution to increased stability and security in our Hemisphere.

Only when there is a restoration of respect for human rights should we contemplate a restoration of a military relationship with the Argentine Government.

Mr. President, I ask that the full text of the letter from Senator CRANSTON and myself to Secretary of State Haig regarding human rights in Argentina be inserted at this point in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, D.C., March 19, 1981.

Hon. ALEXANDER M. HAIG, Jr.,
Secretary of State,
Washington, D.C.

DEAR AL: Following your meetings this week with President Viola, we are writing to request that you intervene on behalf of political prisoners and those men, women and children who have "disappeared" in Argentina. Former Secretary of State Vance delivered an earlier list to the Government of Argentina, making clear that there could be no military relations until some accounting was made and prisoners released.

As you know, Senator Hubert Humphrey joined us and other Senators in introducing legislation in 1977 to end all military aid and support to Argentina because of the extremely serious violations of human rights in that country. Since the military coup in 1976, up to 15,000 individuals have been seized by security forces and then "disappeared". Periodically these disappearances continue: just this past week, two more were abducted by Buenos Aires provincial police, held incommunicado, and tortured before being released.

Amnesty International, the Inter-American Commission on Human Rights, the U.N. Human Rights Commission and other international human rights groups have documented extensive use of torture and violations of fundamental human rights; and even today, there are several thousand political prisoners who have been denied due process as well as the right of option to depart their country guaranteed by the Argentine Constitution. We are enclosing a list of particularly pressing humanitarian cases.

We believe there will be significant Congressional and public opposition to U.S. military aid to Argentina until its military junta accounts for the "disappeared", releases political prisoners, and respects the rights of its citizens. You may be aware that each Thursday, mothers of the "disappeared" hold a vigil in Buenos Aires; last week they were arrested by security police. We have met with some of them in the past and found their cases compelling reason for our country to continue to urge disclosure of the facts about their children and their grandchildren. We are making available to your Department all of the cases raised by these mothers with us, some of which are included in the enclosed list.

We hope that you will raise these concerns directly with President Viola and express your own support for these aims, as well as for the return to civilian rule and free elections in that country. To do so will be in the best traditions of our nation, and Argentine respect for freedom and human rights will make an essential contribution to increased stability and security in our hemisphere.

With our thanks, and best personal wishes,

Sincerely,

ALAN CRANSTON.
EDWARD M. KENNEDY.

POLITICAL PRISONERS—ARGENTINA, MARCH 1981

Jorge Albert Taiana—OAS/IACHR case 2353: Detained by Federal Police in Buenos Aires April 5, 1976.

Gustavo Westerkamp—OAS/IACHR case 2127: Arrested October 21, 1975, held without charges or trial.

Raul Hector Cano—OAS/IACHR case 3482: Detained at the disposition of the Executive since May 27, 1976.

Norberto Ignacio Liwsky—OAS/IACHR case 3905: Held at the disposition of the Executive since April 25, 1978.

Monica Maria Candelaria Migone—OAS/IACHR case 2209: Abducted from her parents' home May 14, 1976.

Debora Esther Benshoam: Since kidnap in August, 1977, no charges have been brought against her.

Pablo Klimovsky: Abducted April 20, 1975. Now held at the disposition of the Executive.

Alberto Maximo Schprejer: Abducted January 30, 1976, held without hearing at the disposition of the Executive.

Horacio Rene Matoso: Arrested October 8, 1976, held without charge or trial.

Duilio Blas Aponte: Arrested November 18, 1974. Charged and acquited, now held at the disposition of the Executive. Right of option to emigrate rescinded.

Maria do las Esperanzas Beltramino de Loto: Arrested with her husband September 25, 1976—he is a "disappeared" person, she has been held at the disposition of the Executive, her right of option to emigrate having been rescinded.

Rodolfo Juan Begnardi: Arrested November 9, 1975, held without trial at the disposition of the Executive.

W. H. ANDERSON WRITES ABOUT THE PRESIDENT'S PROGRAMS

Mr. HELMS. Mr. President, those of us who have spent a few years here on the front lines in Washington are not surprised to see various stories appearing in the papers that increasingly por-

tray the President as a villain right out of Dickens for his efforts to put the brakes on Federal spending.

Screams are going up all over the land from individuals and groups who see the day of reckoning approaching. But loud as these protests may be, I think that the voters who gave President Reagan a landslide victory last November are still with him. President Reagan, for all the criticism and skepticism that he is confronting from the pundits and the talk show hosts, is probably the first President I have encountered who had an all encompassing concept of the public or common good. We must understand that to stop inflation is for the public good. To defend the country adequately is for the public good. To reduce the role and scope of government is for the public good.

That is why the public has not lost, and must not lose, faith in the President's programs. As witness to this, Mr. President, I have a letter recently received from Mr. W. H. Anderson, president of Anderson Chevrolet-Oldsmobile of Waynesville, N.C. I think Mr. Anderson has some sound advice for those who may doubt the wisdom of following through on the President's recommendations, and accordingly I ask unanimous consent that the text of this letter be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

ANDERSON CHEVROLET-OLDSMOBILE,
Waynesville, N.C., March 18, 1981.

Senator JESSE HELMS,
Senate Office Building,
Washington, D.C.

DEAR SENATOR HELMS: We implore you with all of the sincerity that we can muster, do not give in to the many special interest groups now saturating our Capitol with their loud and much "ballyhooed" counter offensive to President Reagan's efforts to put common sense back into our government. The coalition of labor unions, the liberals, both in and out of Congress, and the multitudes of "free riders" throughout our country are doing everything within their power to sidetrack the President's spending cut proposals, so that they can later have a good excuse to resist his tax cut package, too. Please, let us all push for passage of his entire package and urge each and everyone of your counterparts to do so as well.

Having been born in the mountains of Western North Carolina about as poor as one can get, as well as completing my education during the days of FDR's administration, the first of the great give-away administrations, I can honestly state that I have owned my own business for over a quarter of a century not because of, but rather in spite of our free spending and wasteful federal bureaucracy So let the liberals, both Democrats and Republicans, tell *me* about how terrible it is to be poor, underprivileged and suppressed because of no handouts and give-away programs from the great humanitarian federal government. My memory is still quite vivid of the years of deprivation, which is more than the majority of those who would tax me and give away every last dollar that I own, can say for themselves.

I would remind all of you in government today that we are generally what we want to be, "every man unto himself." All that I was ever taught by my parents and all that I ever wanted was simply an opportunity to work for myself and my family, free of any obligation to any government because of a hand-out. Every Congress within my adult memory has contributed to a society with little or no initiative and who is looking for "something for nothing" from each and every level of government. We are long overdue for getting our governmental house in order!

However, the most disgraceful acts that have come out of Washington during my lifetime are not those that either aid the poor or contribute to their status quo, but it's those acts which permit our middle income and the wealthy as well to participate in federal subsidies and grants simply for the asking. There are far too many for us to enumerate here but we are confident that you know most of them only too well. These above all deserve every American citizen's immediate action to put them into our disgraceful past.

In closing let me reiterate, for the sake of all Americans, do not be swayed by the self-interest groups but use your influence on every individual you can to get behind the President's total economic package immediately. Congress can act speedily, it has proved that in past years. So, please give us prompt and positive action on the entire program for putting business sense into the federal government. We are depending on you and within you lies our only hope.

May we have your thoughts along the above subject at your early convenience.

Very truly yours,

W. H. ANDERSON,
President.

INTERNATIONAL EXCHANGES AND NATIONAL SECURITY

Mr. SARBANES. Mr. President, last Friday, the distinguished ranking member of the Foreign Relations Committee, Senator PELL, spoke eloquently and persuasively on the value of educational and cultural exchanges in promoting the national interests of the United States. In remarks delivered before the National Council for International Visitors, Senator PELL paid tribute to the remarkable accomplishments of its members, the hundreds of thousands of private citizens who generously contribute their time, energies, and good will to provide hospitality to officially sponsored visitors to our Nation.

These private efforts have been extraordinarily effective in winning friendship and respect for America in the international community. In a time of concern for fiscal restraint on the one hand and our Nation's vigorous participation in international affairs on the other, Senator PELL argues persuasively that both goals would be well served by expanding support for educational and cultural exchange.

I ask unanimous consent that Senator PELL's thoughtful statement be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

INTERNATIONAL EXCHANGES AND NATIONAL SECURITY

(Remarks by Senator CLAIBORNE PELL)

President Brooks, Chairman Henrie, ladies and gentlemen: I am honored and pleased to be with you here today, not only because I find myself among good friends, but also because I welcome the opportunity to congratulate you on your important—and I believe inadequately appreciated—contribution to American interests, and indeed to American security. In offering these congratulations, I have in mind both your own efforts and those of the hundreds of thousands of volunteers you represent. Together you constitute a unique force for international understanding.

The United States first entered the international exchange business in a serious way some 35 years ago, at the end of World War II. One impetus came from a young Arkansas senator who, in the aftermath of this century's second global cataclysm, envisioned a world in which constructive cooperation might replace armed conflict among peoples. In drafting his legislative proposal to use war debts and surpluses as a source of funds for international educational exchanges, Bill Fulbright reasoned that if a larger number of the world's people knew and understood people from nations other than their own, "they might," he said, "develop a capacity for empathy, a distaste for killing other men, and in inclination for peace." though seemingly naive, this simple but profound suggestion was eventually to be responsible for what an Oxford don has called "the largest, most significant movement of scholars across the face of the earth since the fall of Constantinople in 1453." Indeed, since 1946, the Fulbright program has enabled some 45,000 Americans to teach and study in other nations, and some 80,000 scholars and leaders from over 100 countries to teach and study in the United States.

A second postwar impetus to American-sponsored educational travel came from a desire to "re-educate" the new leaders then emerging in nations which we had vanquished militarily but which we wished to help rebuild into peaceful and stable prosperity. As an occupying power in both Germany and Japan, the American government undertook to bring to the United States thousands of those citizens who were, or appeared likely to become, principal actors in shaping the new destiny of the defeated powers. The purpose was to expose these men and women to the workings of American democracy, to encourage an appreciation of our system, and perhaps also to stimulate on a personal level some measure of fondness and friendship that might weave naturally into the fabric of our future relations with those nations. Eventually, as time passed, and as its initial stages proved fruitful, the program was broadened to include selected foreign visitors from countries around the world and became the International Visitors program of which the National Council now functions as an intergral part.

Both programs—the Fulbright exchanges and the International Visitors program—thus had a common origin: the American hope that, in a world inclined toward its own destruction, human initiative might intervene among nations to replace ignorance with knowledge and national chauvinism with mutual respect. An American idealist and pragmatist, Thomas Jefferson, had dreamed that, through a broad sharing of ideas and values, the world's scientific and professional communities might some day "form a great fraternity spreading over the whole earth." The Fulbright and International Visitors programs have given practical shape to the pursuit of Jefferson's dream.

Over the postwar period, two trends have affected U.S. sponsorship of academic and visitation programs for foreign citizens; one trend I view neutrally, the other with considerable dismay. The first has been some diversification of sponsorship. Today, the International Communication Agency—ICA—administers the Fulbright and International Visitors programs. In addition, however, AID now offers a well-funded program of graduate schooling as part of its international economic development effort, while the Defense Department provides training on an expansive scale to military personnel from allied and friendly countries.

Meanwhile, numerous government agencies, ranging from the Federal Home Loan Bank Board to the Tennessee Valley Authority, have begun sponsoring foreign visitors—as many of you well know, since these agencies, like the ICA, rely on the voluntary services of member organizations of the National Council. I consider this partial diversification neutral in effect because, although it has clouded and confused the picture somewhat, it has not altered the central role of the Fulbright and International Visitors programs run by ICA. That importance is demonstrated by a single striking fact: today, in governments around the world, some 33 heads of State and some 378 cabinet ministers are alumni of the Fulbright and International Visitors programs.

Unfortunately, the second trend affecting these activities is not neutral: it is the failure in recent years of these programs to keep pace with the need they serve. This failure is not attributable to those of you who implement these programs in the field. Nor is it a failure of Washington bureaucrats, who are now such a fashionable object of scorn. It is instead a failure of vision on the part of recent Presidents and of Congress, who together have not allocated funding to the combined Fulbright/International Visitors program at a level warranted by its contribution to the national interest.

Not coincidentally, the deterioration in funding began some 15 years ago, in concert with the deterioration in judgment which took us into Vietnam. The reductions have been sizable. In 1966, some 9000 persons participated in Fulbright exchanges; this year the program will have only 5500 participants—about 3000 foreigners coming here and about 2500 Americans studying and teaching abroad. Meanwhile, a comparable drop has reduced the International Visitors program, which in the mid-1960's brought to America well above 2000 foreigners annually. This year that ICA program will drop below 1600.

Why has this occurred? The answer is false frugality. Although the current Administration may claim otherwise, Mr. Stockman and his colleagues are not the first to wield the budget-cutter's axe in Washington. And for years, the easiest targets have been those programs—such as Fulbright and International Visitors—which promise only long-term benefits and which have no direct constituency that might be affected by a budget reduction. Potential foreign participants, not yet even selected, hardly comprise such a constituency.

And as for American supporters of these programs, their collective voice has proven relatively weak amidst the facile clamor for a few million dollars in politically convenient cost savings. For several consecutive years, in budget deliberations of the Senate Foreign Relations Committee, I have proposed to reverse the cumulative process of reduction and instead to augment these programs by as much as ten-fold. Regretfully, however, I must confess to little success, at least thus far.

Given this track record and the fact that fiscal retrenchment has now become a national theme, some observers may well find quixotic my intention to continue in the effort to increase these programs. But I shall do so nonetheless. For another theme of our time is the reassertion of American power in the world arena. And while I recognize the crucial role of military strength, it is my conviction that, as we seek to expand American influence, no government activity in any field can be more effective—in terms of the balance of costs against benefits—than the combined Fulbright and International Visitors programs. To focus on military spending alone, as if that were our sole instrument for enhancing American security, is not only a foolish and dangerous distortion. It is also—to put the matter in language this Administration understands—an act of sheer fiscal irresponsibility.

Let us look for a moment at the numbers. In pursuit of enhanced national security, the Reagan Administration has asked that Congress approve, for the next two years, increases in U.S. defense spending of some $53 billion—over and above the military budget planned by the Carter Administration. Meanwhile, it has continued the Fulbright exchanges and International visitors program at previously planned levels of $46 million and $17 million respectively. Simple arithmetic here offers a remarkable truth: that setting aside only 4 percent of the extra defense spending proposed by President Reagan would release funds sufficient to increase the combined Fulbright/International Visitors program by the factor of ten I have suggested. Moreover, on a permanent and continuing basis, such an increase from $65 million to $650 million could be funded by reducing Mr. Reagan's projected annual defense expenditures by only one-fifth of 1 percent.

What we are discussing here is the question of trade-offs among activities all intended to promote American interests. One tangible example makes the issue more valid. At present, the Defense Department is procuring hundreds of F-15, F-16, and F-18 fighter aircraft, a process Mr. Reagan proposes be accelerated. Yet, because each of these aircraft costs as much as the annual International Visitors program at its present level, to accelerate procurement by only one additional fighter per year represents a missed opportunity to double our programming in International Visitors.

Confronted with the challenge to prove by reference to cost-effectiveness that we should make such a trade-off, I must answer that I cannot. For we simply cannot precisely measure what benefits actually accrue to the United States and the world from existing exchanges and visits, or from additional ones. But neither, I am quick to point out, can we calibrate with any greater precision our incremental gain from expanding funds to add a certain weapon to our military arsenal. In terms of our national security, what is the cost-effectiveness of an additional F-15, or a permanently unused missile in a silo, or an extra tank?

Ultimately, the value—and the cost-effectiveness—of weapons and exchanges must be determined not by statistics but by judgment. But as we debate such a judgment, I believe that those favoring an increase in exchanges can bring powerful arguments to bear. For if our quest is for national security, and our arena is the world, we quickly discern four broad and important audiences where large, but relatively inexpensive increases in Fulbright and International Visitors activities would almost surely pay-off.

Commenting just briefly on each, I can begin with our adversaries themselves, the nations of the Warsaw Pact. Can anyone really believe that a doctrinaire Communist who visits the United States returns home as dedicated to his faith? As a former Foreign Service officer who served in Eastern Europe, I have never seen one. Whatever his commitment to Communist rule, any East European or Soviet visitor to the West is bound to be stimulated into some questioning of the status quo in his homeland. While we cannot of course trace direct causation in such matters, it is well worth pointing out that a number of past participants in Fulbright and International Visitors exchanges are now among those energizing the reform movement sweeping through the society of Poland.

A second audience, vast in size, lies in those nations we sometimes call neutral or non-aligned. It is a sad irony indeed that while we talk so much about competing for influence in the Third World, we do so little about it. Meanwhile, the Soviet Union, whose leaders do recognize the geopolitical value of educational exchange, have undertaken a vast program—overall, the Kremlin now budgets some $2 billion a year for overseas cultural and information programs, much of it for education.

And let us not be misled by the appearance that we are competing effectively. To be sure, we have multitudes of foreign students in the United States. But the problem is one of selection. Taking only Africa, which now has 27,000 students here, closer analysis reveals that almost all are studying at their own expense, most of them Nigerians funded by that one country's oil wealth. In fact only 1,800 African students are here on U.S. Government funding. Meanwhile, the Kremlin is hosting, as guests of the Soviet Union, some 24,000 students—carefully selected from all over Africa—who are now learning Russian, and Russian ideas.

Regrettably, this pattern is true elsewhere. On a recent visit to Latin America, I found our U.S. ambassadors there deeply disturbed by our government's failure to capitalize on relatively inexpensive opportunities for educational and cultural exchange. We must recognize once and for all that we cannot favorably influence people simply by shipping them arms. We must come to know them—and they us—and there is no better way than through educational exchange, and also through the warm hospitality so generously and graciously offered by member groups of the National Council.

Regarding the Third World, I offer one final example. Egypt's President Sadat has said that it was years ago, while on an International Visitors trip to the United States, that he came to realize he could "deal with Americans." This alone could justify the entire program.

Still a third important audience for our exchange effort lies in those nations with which we are allied—and sometimes take for granted. Western Europe and Japan are today passing into the hands of what has been called the "successor generation," comprised of men and women for whom the Second World War and its aftermath are not even a living memory. Surely we can take comfort that in both areas democratic values are now deeply ingrained. But we cannot be complacent about the permanency of the ties that bind us. Those bonds were, after all, carefully nurtured by programs such as we are discussing today, and diligent and focused activity must continue if we are to preserve the loyalties we enjoy.

Recently I was visited by our returning U.S. ambassador to Italy, who reported his grave concern about the inadequate resources we devote to competing for influence amidst an Italian population, now one-third Communist, which has little exposure to American literature and ideas but faces steady efforts at what he described as "cultural colonization" by Marxist thought. Yet—under budget pressure—our annual allocation for International Visitors from Italy has dropped from 200 to 30. We can station in Europe all of the nuclear weapons we might wish, but they will avail us little if our mutual allegiance flags.

A fourth and final—and fertile—audience for exchange activities is ourselves. Early in the Seventeenth Century, a time of exploration and expanding horizons, the British philosopher Francis Bacon wrote that "If a man be gracious and courteous to strangers, it shows he is a citizen of the world, and that his heart is no island cut off from other lands, but a continent that joins to them." Today we individually—and our nation as a whole—are citizens of the world, and our support for the Fulbright and International Visitors programs is a direct reflection of

how seriously and wisely we view the obligations and benefits of that citizenship. These programs are not a matter of charity. They are a matter of enlightened participation in an international community from which we could not isolate ourselves even if we wished.

Viewed philosophically, the Fulbright and International Visitors programs serve eminently well the need of mankind for travel and knowledge. But they also meet—and pass with merit—today's important criterion of cost-effectiveness. They enhance our ability to trade with other nations—in ideas as well as goods—and they enhance our wisdom of the world and our stature in it. Indeed, no programs in the entire federal budget can claim a higher return on the dollar in terms of extending American influence and winning American friends.

Mr. Reagan has summoned the nation to overcome the self-doubt and paralysis he believes are the legacy of our disastrous experience in Vietnam. He invokes nostalgia for a time when America held clear sway over all possible adversaries. I am not unsympathetic with this feeling. But, unhappily, no amount of sentiment or military spending can recapture the past, for the world has moved on. There is, however, one aspect of the pre-Vietnam past we could recapture—and here I admit my own nostalgia. It is for a time when the American government could muster the vision and wisdom necessary to provide adequate support for activities—such as the Fulbright exchanges and the International Vistors program—which gain force and effect from simple American self-confidence—which I have and which I believe you share—that if foreign citizens could come to know our land and people better, they would find here something to like if not to love. That is what I call the true projection of American power. And it is this message I ask you to join me in bringing to an American taxpayer who deserves efficient spending in the pursuit of American national security.

TOP BRITISH POLICYMAKERS SUPPORT REPEAL OF CLARK AMENDMENT

Mr. HELMS. Mr. President, I have just been informed that the top foreign affairs policymakers of Britain's Conservative Party have formally supported the repeal of the Clark amendment on Angola. The action was taken by the Foreign Affairs Committee of the Conservative Party on March 23 in a resolution proposed by the chairman of the committee, Mr. Geoffrey Rippon. Mr. Rippon was joined by three other officers of the committee, and by four Privy Councillors, Mr. Hugh Fraser, Mr. Maurice MacMillan, Mr. John Eden, and Mr. Julian Amery.

The motion is now on the calendar of the House of Commons. It deplores the continued presence of Cuban forces in Angola, and welcomes the decision of the U.S. administration to seek the repeal of the Clark amendment.

Mr. President, as my colleagues are aware, the Senator from North Carolina has long sought the repeal of the Clark amendment. The presence of the Clark amendment on the statutes prejudices our policy toward a Marxist regime, supported by Cuban troops, which is faced by a substantial civil war. I think that it is important that our statutes take a neutral stand, instead of singling out a specific policy for a specific country, thereby discouraging freedom fighters working for the liberation of their country from communism.

Mr. President, I congratulate the forceful stand taken by Mr. Rippon and his colleagues. I think that their action shows that we will secure widespread support from our allies for the repeal of the Clark amendment when the facts of the situation are carefully explained.

DEATH CAMPS OF PARAGUAY

Mr. PROXMIRE. Mr. President, recently there was an article in the Washington Post which reported that the Paraguayan Government had implemented their own version of a "final solution." It stated that the Toba-Maskoy Indians of Paraguay, who have always lived a peaceful existence in the jungles of South America, are being systematically exterminated.

What have the Toba-Maskoy Indians done to deserve this fate? Quite simply, they have become an obstacle to economic development in Paraguay. There have been reported genocidal practices perpetuated against the Indians in Paraguay because the Government perceives them as opponents of progress.

One example of these practices reported in the Washington Post, involves the hunting of the Indians by Government officials in the jungle. If the Indians are caught they are either sold or brought to Government reservations. The ones that remain on the reservations experience a sense of helplessness and loss of culture identity.

Literally and figuratively these reservations can be described as cesspools, calculated to cause disease and death. It is reported that perhaps as many as half of the Indians who are kept on these reservations will die within 6 to 8 months, if not sooner.

This horrible situation gives yet another reason to ratify the Genocide Convention as soon as possible. With ratification the United States would have a stronger voice in opposing the Paraguayan Government's horrifying version of a "final solution" and help prevent the extermination of the Toba-Maskoy Indians.

Let us ratify the Genocide Convention now.

EXECUTIVE SESSION

Mr. STEVENS. Mr. President, I ask unanimous consent that the Senate go into executive session to consider the nominations on the Executive Calendar.

There being no objection, the Senate proceeded to the consideration of executive business.

The PRESIDING OFFICER (Mr. CHAFEE). The nominations will be stated.

DEPARTMENT OF THE TREASURY

The legislative clerk read the nomination of Norman B. Ture, of Virginia, to be Under Secretary of the Treasury.

Mr. DOLE. Mr. President, the Senator from Kansas urges the confirmation of Norman B. Ture to be Under Secretary of the Treasury.

FAVORABLE COMMITTEE ACTION

On March 20, the Committee on Finance held hearings on Mr. Ture and found him to be eminently qualified by reason of his experience and character to perform the functions of Under Secretary of the Treasury.

Our committee, on March 25, voted unanimously to recommend Senate confirmation of Mr. Ture's nomination.

MR. TURE'S BACKGROUND

Mr. Ture brings to the position of Under Secretary a lifelong interest in tax analysis and a record of many contributions to the professional literature in that field. He has served in Government previously, on the Treasury's tax analysis staff, he has been a professor of economics, and most recently has been president of his own successful consulting firm. Mr. Ture thus combines intellectual preeminence with proven abilities and knowledge in Government and business. All these qualities will assure excellence in the important position he has been nominated to fill.

NEW DUTIES

As Under Secretary Mr. Ture will be responsible both for broad economic analysis and affairs relating to the structure of our tax system. He will be intimately involved in the substantial alterations that we may expect to be proposed for the Tax Code, and his background in Government as well as business thus prepare him especially well for this important position.

REPORT ON INVESTIGATIONS

The Committee on Finance has conducted its own review and has reviewed the results of the investigation by the FBI and the report of the Office of Government Ethics. We are confident there are no potential ethical problems of conflicts of interest.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

The legislative clerk read the nomination of Beryl Wayne Sprinkel, of Illinois, to be Under Secretary of the Treasury for Monetary Affairs.

Mr. DOLE. Mr. President, the Senator from Kansas urges the confirmation of Beryl Wayne Sprinkel to be Under Secretary of the Treasury for Monetary Affairs.

FAVORABLE COMMITTEE ACTION

On March 20, the Committee on Finance held hearings on Mr. Sprinkel and found him to be eminently qualified by reason of his experience and character to perform the functions of Under Secretary of the Treasury for Monetary Affairs.

Our committee, on March 25, voted unanimously to recommend Senate confirmation of Mr. Sprinkel's nomination.

MR. SPRINKEL'S BACKGROUND

Although Mr. Sprinkel's professional career began in college economics teaching, he became associated with the Harris Trust & Savings Bank in Chicago, Ill., in 1952 and was executive vice presi-

dent and economist prior to his nomination to be Under Secretary for Monetary Affairs. In the last 16 years, his duties have included dealing with international monetary issues, and he has traveled abroad extensively in that time, becoming well acquainted with foreign central banks and treasuries.

NEW RESPONSIBILITIES

As Under Secretary for Monetary Affairs, Dr. Sprinkel will be charged with overall management of the Treasury's debt issues, with the Treasury's relations to other governments and central banks, and with the Treasury's relations with our own Federal Reserve System. His long acquaintance with our banking and monetary system, as well as his extensive contacts abroad, make Dr. Sprinkel ideally suited for his new position.

ROUTINE INVESTIGATIONS COMPLETED

The Committee on Finance has received and reviewed the results of investigations by the FBI and the Office of Government Ethics. The committee has also conducted its own review, and is confident there are no potential ethical problems or conflicts of interest.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the nominations were confirmed.

Mr. ROBERT C. BYRD. I move to lay that motion to lay on the table.

The motion to lay on the table was agreed to.

Mr. STEVENS. Mr. President, I ask unanimous consent that the President be immediately notified of the confirmation of these nominations.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, I ask unanimous consent that all remaining nominations on the Executive Calendar be considered en bloc and be confirmed en bloc and that the President be immediately notified of such action.

Mr. ROBERT C. BYRD. Mr. President, will the distinguished Senator yield?

The PRESIDING OFFICER. Is there objection?

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object, and I shall not object, will the distinguished Senator add to his requests that the motion to reconsider en bloc be laid on the table.

Mr. STEVENS. I thank the Senator, and I add that to my request.

The PRESIDING OFFICER. Without objection, it is so ordered.

(Nominations considered and confirmed en bloc are as follows:)

IN THE AIR FORCE

Lt. Gen. Evan W. Rosencrans, U.S. Air Force (age 54), for appointment to the grade indicated on the retired list pursuant to the provisions of title 10, United States Code, section 8962, to be lieutenant general.

IN THE ARMY

The following-named officer to be placed on the retired list in grade indicated under the provisions of title 10, United States Code, section 3962: Lt. Gen. Charles Robert Myers, [redacted] age 56), Army of the United States (major general, U.S. Army), to be lieutenant general.

The following-named officer under the provisions of title 10, United States Code, section 3066, to be assigned to a position of importance and responsibility designated by the President under subsection (a) of section 3066, in grade as follows: Maj. Gen. William Ivan Rolya, [redacted] Army of the United States, to be lieutenant general.

IN THE NAVY

The following-named officer of the U.S. Navy for permanent promotion to the grade of rear admiral, pursuant to title 10, United States Code, sections 5780 and 5791: Raymond N. Winkel to be rear admiral.

IN THE MARINE CORPS

The following-named brigadier general of the Marine Corps Reserve for temporary appointment to the grade indicated under the provisions of title 10, United States Code, section 5902: John B. Hirt to be major general.

The following officers of the Marine Corps Reserve for appointment to the grade of brigadier general under the provisions of title 10, United States Code, section 5902: Constantine Sangalis, to be brigadier general. William H. Gossell, to be brigadier general.

UNITED NATIONS

Charles M. Lichenstein, of the District of Columbia, to be the Alternate Representative of the United States of America for Special Political Affairs in the United Nations, with the rank of Ambassador.

IN THE COAST GUARD

The following officers of the U.S. Coast Guard for promotion to the grade indicated: Capt. Robert S. Lucas, U.S. Coast Guard, to be rear admiral.

Capt. Kenneth G. Wiman, U.S. Coast Guard, to be rear admiral.

Capt. Edwin H. Daniels, U.S. Coast Guard, to be rear admiral.

Capt. Clyde T. Lusk, Jr., U.S. Coast Guard, to be rear admiral.

Vice Adm. James S. Gracey, U.S. Coast Guard, to be the commander, U.S. Coast Guard Atlantic area with the grade of vice admiral while so serving.

Rear Adm. James P. Stewart, U.S. Coast Guard, to be the commander, U.S. Coast Guard Pacific area with the grade of vice admiral while so serving.

DEPARTMENT OF DEFENSE

Fred Charles Ikle, of Maryland, to be Under Secretary of Defense for Policy, vice Robert W. Komer, resigned.

William H. Taft IV, of Virginia, to be General Counsel of the Department of Defense, vice Togo D. West, Jr., resigned.

NOMINATIONS PLACED ON THE SECRETARY'S DESK IN THE AIR FORCE, ARMY, NAVY, MARINE CORPS, AND COAST GUARD

Air Force nominations beginning Tommie G. Church, to be captain, and ending David F Woolwine, to be lieutenant colonel, which nominations were received by the Senate on February 23, 1981, and which appeared in the CONGRESSIONAL RECORD on February 24, 1981.

Air Force nominations beginning John W. Baxter, to be lieutenant colonel, and ending Douglas B. Neumann, to be lieutenant colonel, which nominations were received by the Senate on March 6, 1981, and which appeared in the CONGRESSIONAL RECORD of March 17, 1981.

Army nominations beginning Phillip G. Abbott, to be colonel, and ending John F. Clary, to be lieutenant colonel, which nominations were received by the Senate March 2, 1981, and which appeared in the CONGRESSIONAL RECORD of March 3, 1981.

Army nominations beginning Howard R. Bixby, to be major, Regular Army and lieutenant colonel, Army of the United States, and ending Michael S. Tucker, to be second lieutenant, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of March 17, 1981.

Army nominations beginning Steven B Acenbrak, to be second lieutenant, and ending Catherine M. Zipoli, to be second lieutenant, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of March 17, 1981.

Navy nominations beginning Thomas E. Digan, to be ensign, and ending Steven G. Detsch, to be commander, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of February 24, 1981.

Navy nominations beginning Philip J. Aarons, to be lieutenant, and ending Deborah A. Zanot, to be lieutenant, which nominations were received by the Senate March 2, 1981, and which appeared in the CONGRESSIONAL RECORD of March 3, 1981.

Navy nominations beginning Keith T. Adams, to be lieutenant, and ending Jennifer L. Mustain, to be lieutenant, which nominations were received by the Senate March 2, 1981, and which appeared in the CONGRESSIONAL RECORD of March 3, 1981.

Navy nominations beginning James E. Halwachs, to be lieutenant commander, and ending Larry D. Aasheim, to be ensign, which nominations were received by the Senate March 6, 1981, and which appeared in the CONGRESSIONAL RECORD of March 17, 1981.

Navy nominations beginning Rudolph Abel, Jr., to be captain, and ending Jane E. Sharp, to be commander, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of March 17, 1981.

Marine Corps nomination of Bonnie H. Bass, to be major, which nomination was received by the Senate March 2, 1981, and which appeared in the CONGRESSIONAL RECORD of March 3, 1981.

Coast Guard nominations beginning Welton H. Jones, Jr., to be captain, and ending Marcus J. Wallace, Jr., to be captain, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of January 5, 1981.

Coast Guard nominations beginning John L. Glen, to be lieutenant commander, and ending Michael P. Farrell, to be ensign, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of January 5, 1981.

Coast Guard nominations beginning Michael B. Kerr, to be lieutenant, and ending Timothy C. Hess, to be lieutenant, which nominations were received by the Senate January 15, 1981, and which appeared in the CONGRESSIONAL RECORD of January 19, 1981.

Coast Guard nominations beginning Michael G. Barrier, to be lieutenant commander, and ending Edward R. Williams, to be commander, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of February 24, 1981.

Coast Guard nominations beginning Robert R. Albright II, to be ensign, and ending James R. Yacobi, Jr., to be lieutenant (junior grade), which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of February 24, 1981.

Coast Guard nominations beginning Wallace F. Kelly, to be commander, and ending Michael T. Bohlman, to be commander, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of March 5, 1981.

Coast Guard nominations beginning Carsten L. Henningsen III, to be lieutenant (junior grade), and ending Lewis S. Blankenship, to be lieutenant (junior grade), which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of March 17, 1981.

MESSAGE FROM THE PRESIDENT

A message from the President of the United States was communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGE REFERRED

As in executive session, the Presiding Officer laid before the Senate a message from the President of the United States submitting a nomination, which was referred to the Committee on Governmental Affairs.

(The nomination received today is printed at the end of the Senate proceedings.)

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC–751. A communication from the Secretary of the Navy, transmitting pursuant to law, notice of the intention of the Department of the Navy to transfer the obsolete destroyer EX-KIDD (ex-DD-661) to the State of Louisiana, Louisiana Naval War Memorial Commission, Baton Rouge, Louisiana; to the Committee on Armed Services.

EC–752. A communication from the Acting Director of the Federal Emergency Management Agency, transmitting a draft of proposed legislation to authorize appropriations for civil defense programs for fiscal years 1982 and 1983, and for other purposes; to the Committee on Armed Services.

EC–753. A communication from the Assistant Secretary of Defense (Comptroller), transmitting, pursuant to law, a secret report on the Department of Defense Operation and Maintenance (O&M) Appropriations; to the Committee on Armed Services.

EC–754. A communication from the Acting Comptroller General of the United States, transmitting, pursuant to law, a report entitled "DOD Should Give Better Guidance and Training to Contractors Who Classify National Security Information"; to the Committee on Armed Services.

EC–755. A communication from the President and Chairman of the Export-Import Bank of the United States, transmitting, pursuant to law, a report on loan guarantee and insurance transactions supported by Eximbank during February 1981; to the Committee on Banking, Housing, and Urban Affairs.

EC–756. A communication from the Secretary of Agriculture, transmitting a draft of proposed legislation to amend the Housing Act to make discretionary the power of the Secretary of Agriculture to provide interest credit subsidy to low and moderate income borrowers, and for other purposes; to the Committee on Banking, Housing, and Urban Affairs.

EC–757. A communication from the Acting Comptroller General of the United States, transmitting a report and opinion on the financial statements of the National Consumer Cooperative Bank for the fiscal year ending September 30, 1981; to the Committee on Banking, Housing, and Urban Affairs.

EC–758. A communication from the Secretary of the Interior, transmitting a draft of proposed legislation to amend section 7 of the Earthquake Hazards Reduction Act of 1977 (42 U.S.C. 7706) to extend authorizations for appropriations, and for other purposes; to the Committee on Commerce, Science, and Transportation.

EC–759. A communication from the Acting Director of the Federal Emergency Management Agency, transmitting a draft of proposed legislation to authorize appropriations for the Federal Fire Prevention and Control Act of 1974, and for other purposes; to the Committee on Commerce, Science, and Transportation.

EC–760. A communication from the Vice President for Government Affairs of the National Railroad Passenger Corporation, transmitting, pursuant to law, a comprehensive plan for the improvement of all intercity rail passenger service provided in the Amtrak basic plan; to the Committee on Commerce, Science, and Transportation.

EC–761. A communication from the Acting Administrator, Energy Information Administration, Department of Energy, transmitting, pursuant to law, a report on sales of refined petroleum products and sales of retail gasoline for December 1980; to the Committee on Energy and Natural Resources.

EC–762. A communication from the Acting Comptroller General of the United States, transmitting, pursuant to law, a report entitled "The Energy Conservation Program For Schools and Hospitals Can Be More Effective"; to the Committee on Energy and Natural Resources.

EC–763. A communication from the Acting Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Natural Gas Plan Needed To Provide Greater Protection For High-Priority And Critical Uses"; to the Committee on Energy and Natural Resources.

EC–764. A communication from the Acting Assistant Secretary of the Army (Civil Works), transmitting a draft of proposed legislation to require the recovery of certain expenditures of the U.S. Army Corps of Engineers for operation, maintenance, and construction of deep draft channels and ocean and Great Lakes ports of the United States and to authorize such construction in specified circumstances; to the Committee on Environment and Public Works.

EC–765. A communication from the Acting Assistant Secretary of the Army (Civil Works), transmitting a draft of proposed legislation to provide for the recovery of capital and operation and maintenance costs assignable to commercial waterway transportation for certain United States Army Corps of Engineers inland waterway projects; to the Committee on Environment and Public Works.

EC–766. A communication from the Secretary of the Interior, transmitting, pursuant to law, the fifth annual report on the Tule elk herds in California; to the Committee on Environment and Public Works.

EC–767. A communication from the Acting Administrator of the United States Environmental Protection Agency, transmitting, pursuant to law, the fourth annual report on the administration of the Toxic Substances Act covering fiscal year 1980; to the Committee on Environment and Public Works.

EC–768. A communication from the Executive Director of the Board for International Broadcasting, transmitting a draft of proposed legislation to amend the Board for International Broadcasting Act of 1973, to authorize a supplemental appropriation for fiscal year 1981, and to authorize appropriations for fiscal years 1982 and 1983; to the Committee on Foreign Relations.

EC–769. A communication from the Acting Director of the Peace Corps, transmitting a draft of proposed legislation to authorize appropriations for the Peace Corps, and for other purposes; to the Committee on Foreign Relations.

EC–770. A communication from the Chairman of the Foreign Claims Settlement Commission, transmitting, pursuant to law, the annual report of the Commission regarding its compliance with the Government in the Sunshine Act for calendar year 1980; to the Committee on Governmental Affairs.

EC–771. A communication from the Secretary of the Postal Rate Commission, transmitting, pursuant to law, the annual report of the Commission on implementation of the Privacy Act for calendar year 1980; to the Committee on Governmental Affairs.

EC–772. A communication from the Acting Inspector General of the Department of Health and Human Services, transmitting, pursuant to law, the quarterly report on the activities of the Office of Inspector General, Department of Health and Human Services for October 1 to December 31, 1980; to the Committee on Governmental Affairs.

EC–773. A communication from the Acting Assistant Secretary of Health and Human Services (Planning and Evaluation), transmitting, pursuant to law, a report on a proposed new system of records for the Department for implementing the Privacy Act; to the Committee on Governmental Affairs.

EC–774. A communication from the Director of the United States Office of Personnel Management, transmitting a draft of proposed legislation to amend title 5, United States Code, to strengthen the principle of comparability as the basis for setting Federal pay and benefits, and for other purposes; to the Committee on Governmental Affairs.

EC–775. A communication from the FOIA Officer, Office of the Commissioner, International Boundary and Water Commission, United States and Mexico, transmitting, pursuant to law, the report of the Commission for 1980 under the Freedom of Information Act; to the Committee on the Judiciary.

EC–776. A communication from the Acting Administrator of the Small Business Administration, transmitting, pursuant to law, Volume I of the 1980 Annual Report of the Administration; to the Committee on Small Business.

EC–777. A communication from the Acting Administrator, Small Business Administration, transmitting a draft of proposed legislation to consolidate SBA's present six distinct business loan programs into one; to the Committee on Small Business.

EC–778. A communication from the Acting Administrator of the Veterans' Administration, transmitting, pursuant to law, a report on the utilization of educational entitlements by certain veterans; to the Committee on Veterans' Affairs.

EC–779. A communication from the Acting Administrator of the Veterans' Administration, transmitting a draft of proposed legislation to limit payment of authorized special pay to Veterans' Administration physicians and dentists; to the Committee on Veterans' Affairs.

EC–780. A communication from the Acting Administrator of the Veterans' Administration, transmitting a draft of proposed legislation to revise eligibility requirements for reimbursement of travel expenses for Veterans' Administration health care; to the Committee on Veterans' Affairs.

PETITIONS AND MEMORIALS

The following petitions and memorials were laid before the Senate and were referred or ordered to lie on the table as indicated:

POM–47. A petition from a citizen of Mount Holly, New Jersey favoring congressional cooperation with the efforts of the Reagan administration to strengthen America's military power; to the Committee on Armed Services.

POM–48. A petition from a citizen of Oliver Springs, Tennessee favoring congressional cooperation with the efforts of the Reagan administration to strengthen Amer-

ica's military power; to the Committee on Armed Services.

POM-49. A petition from a citizen of San Marino, California favoring congressional cooperation with the efforts of the Reagan administration to strengthen America's military power; to the Committee on Armed Services.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. NUNN (for himself and Mr. HUDDLESTON):

S. 819. A bill to amend the Internal Revenue Code of 1954 to stimulate investment by increasing the interest and dividend exclusion; to the Committee on Finance.

By Mr. JOHNSTON:

S. 820. A bill to amend title 5 of the United States Code to provide that Federal employees may make an irrevocable assignment of interests in certain life insurance policies; to the Committee on Governmental Affairs.

By Mr. PACKWOOD (for himself, Mr. GOLDWATER, Mr. SCHMITT, and Mr. PRESSLER):

S. 821. To provide for authorization of appropriations for the Federal Communications Commission; to the Committee on Commerce, Science, and Transportation.

By Mr. WILLIAMS:

S. 822. A bill to amend title 18 of the United States Code to make it a Federal crime to vandalize a house of worship or any other religious property; to the Committee on the Judiciary.

By Mr. THURMOND (for himself, Mr. KENNEDY, Mr. HARRY F. BYRD, JR., Mr. HOLLINGS, Mr. WARNER, Mr. HELMS, Mr. HEFLIN, Mr. DENTON and Mr. EAST):

S. 823. A bill to provide for the payment of losses incurred as a result of the ban on the use of the chemical Tris in apparel, in fabric, yarn, or fiber, and for other purposes; to the Committee on the Judiciary.

By Mr. JOHNSTON:

S. 824. A bill to authorize the President to establish a program to reduce and order the demand for motor fuel during a severe energy supply interruption; to the Committee on Finance.

By Mr. JEPSEN:

S. 825. A bill to amend the Internal Revenue Code of 1954 to allow the investment tax credit to certain individuals who purchase used section 38 property used for farming purposes from a related party; to the Committee on Finance.

By Mr. STEVENS:

S. 826. A bill to delineate the relationship of the Office of Special Counsel to the Merit Systems Protection Board; to the Committee on Governmental Affairs.

By Mr. THURMOND (for himself, Mr. HATCH, Mr. DECONCINI, Mr. SIMPSON, Mr. HEFLIN, Mr. LAXALT, Mr. BAKER, Mr. BOREN, Mr. DENTON, Mr. HARRY F. BYRD, JR., Mr. DOLE, Mr. COCHRAN, Mr. EAST, Mr. LUGAR, Mr. ARMSTRONG, Mr. GARN, Mr. GRASSLEY, Mr. NICKLES, Mr. MURKOWSKI, Mr. HUMPHREY, Mr. HELMS, Mr. GOLDWATER, Mr. MCCLURE, Mr. PRYOR, Mr. JEPSEN, Mr. KASTEN, Mr. PRESSLER, Mr. ZORINSKY, Mrs. HAWKINS, Mr. MATTINGLY, Mr. WARNER, Mr. EXON, Mr. WALLOP, Mr. QUAYLE, Mr. ABDNOR, Mr. RUDMAN, Mr. SYMMS, Mr. HAYAKAWA, Mr. SCHMITT, Mr. BOSCHWITZ, Mr. DOMENICI, Mr. D'AMATO, Mr. DURENBERGER and Mr. PROXMIRE):

S.J. Res. 58. Joint resolution proposing an amendment to the Constitution altering Federal fiscal decisionmaking procedures; to the Committee on the Judiciary.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. NUNN (for himself and Mr. HUDDLESTON):

S. 819. A bill to amend the Internal Revenue Code of 1954 to stimulate investment by increasing the interest and dividend exclusion; to the Committee on Finance.

LEGISLATION TO INCREASE THE INTEREST AND DIVIDEND EXCLUSION

Mr. NUNN. Mr. President, the Congress is now carefully reviewing President Reagan's sweeping budget and tax cut package. I agree with the President that reducing excessive Federal spending and revising outdated Federal tax policies must be our highest priority in the months ahead if we are to successfully combat runaway inflation, high interest rates, and overburdensome Federal regulations.

I applaud the President on the direction he has set and the goals which he is attempting to achieve. His proposal to reduce Federal spending by nearly $49 billion in 1982 represents a significant and necessary effort to shift resources from the public sector to the private sector. I support the overall level of budget cuts the President has recommended.

In some areas Congress will no doubt differ with the administration on specific cuts.

In such cases, I believe it is incumbent upon Congress to suggest alternative cuts so that the overall amount of spending reductions the President is seeking is not diminished. We must substantially reduce the growth of Federal spending and the budget deficit. Otherwise, we have no real chance of bringing inflation and high interest rates under control.

I share the President's view that tax rates must be reduced to stimulate the economy, particularly savings and investment. The United States now has among the highest percentage of obsolete plant, the lowest percentage of capital investment, and the lowest growth in productivity and savings of any major industrial nation. Our failure to attack these basic structural economic problems has led to the creation of a self-perpetuating, vicious cycle wherein productivity declines, inflation increases, real income falls, corporate profits erode, investment in productive resources falters, and productivity declines even further.

Mr. President, with the exception of a slight increase last year, the level of savings in the United States has declined every year since 1975. That trend has become a problem of critical national concern. The effects of today's anemic savings rate are clear and obvious—soaring inflation, high interest rates, lagging investment, poor productivity performance, and sluggish economic growth. Increasing savings is the necessary first step to accumulating the capital essential for new home construction and for investment in new plant and equipment which will lead to increased productivity, lower inflation, and sustained real growth.

While Americans have been saving only 4 to 5 percent of their income, other major industralized nations have done much better and our competitive position in the world has declined. The Canadian savings rate is greater than 10 percent. The West Germans save 13 to 15 percent of their income and the Japanese save more than 20 percent of their income. Government incentives to encourage savings in these nations far exceed those in the United States. Canada excludes from taxation the first $2,000 of interest and dividends on a joint return. In West Germany, the first $300 of interest on regular savings is excluded from taxation and there are additional benefits for long-term savings. And in Japan, interest earned on the first $32,000 of savings is exempt from taxation.

The benefits of these savings incentives are clear as our competitors are succeeding where we are failing. The average plant in the United States is 16 to 17 years old, while the equivalent in West Germany is 12 and in Japan less than 10. Investment in the United States hovers at about 10 percent of gross national product compared with 15 percent in Germany and 20 percent in Japan. And as a direct result, U.S. productivity is slipping while that of our competitors is increasing.

The list of victims of America's poor savings record continues to grow. The housing industry, the savings and loan industry, small businesses and farmers are suffering nationwide from runaway inflation and high interest rates. Many small businessmen, automobile dealers, farmers and construction companies are fighting for their very survival.

The lack of savings is having a devastating whipsaw effect on the housing and savings and loan industries. Our Nation's savings and loans are being squeezed by low savings, high interest rates, and mortgages yielding less than current interest being paid by the savings and loan. As a result, funds available for mortgages declined $28 billion from 1978 to 1980—from $99 billion to $71 billion. That in turn is creating a desperate situation in the construction industry.

Mortgage interest rates have risen from the 12-percent level last summer up to 16 percent today, choking off housing construction, killing home sales, forcing tens of thousands of young families out of the housing market, and leaving 750,000 construction workers unemployed.

The situation is just as bad for the automobile industry and small business owners. The automobile industry lost billions of dollars last year and some 1,600 dealers closed their doors with soaring interest rates being a principal cause. Untold numbers of other small business owners and farmers are still reeling from the high interest rates.

Channeling money into productive savings is a key ingredient to lowering interest rates, increasing productivity, lowering inflation and strengthening the economy.

Unless the current climate of "buy now, save later" is turned around, inadequate savings will deprive our economy of the capital necessary for the needed increase in productivity critical to restoring the domestic and international competitiveness of U.S. industries.

The President has recognized the necessity to increase savings and he has proposed a tax cut bill to address the problem. The President's plan would reduce all marginal tax rates by 30 percent over a 36-month period in the hope that this will stimulate new savings flow. While all of us agree that individual taxes are too high and should be reduced, this approach provides no direct incentive for the average middle-income American to save and invest in the resources essential to economic recovery. In my view this approach does not go far enough toward insuring a significant increase in savings, particularly among middle-income taxpayers below the 50-percent marginal tax rate. Do we have a reasonable assurance based on history and commonsense that a middle-income American making $15,000 or $20,000 or $25,000 will take his $200 to $300 tax cut and open a new savings account or invest in securities? I think not, with the current lack of savings incentives.

I agree that we need individual tax reductions over the next few years. We must go beyond what the President has proposed however and lay a foundation for maximizing the benefits of these individual tax cuts—a foundation built upon increased incentives and opportunities for middle-income Americans to save. Rather than a shotgun approach which gambles on hitting the target of increased savings, I suggest a "rifle approach" to encourage increased savings with targeted tax incentives. We must assure that the money injected into the economy through a tax cut shows up as increased savings and investment rather than increased consumption. For if taxpayers consume rather than save, interest rates will once again increase and inflation, already deeply embedded at a 10-percent core rate, will soar once again. As Harvard economist, Martin Feldstein, has said—

> Over a long-term, the real problem is savings and how to stimulate a high rate of savings. Although the administration's emphasis on reducing marginal tax rates is to be applauded, it is unfortunate that a significant portion of the overall tax reduction wasn't devoted specifically to stimulating private saving.

I am introducing today the Savings Incentive Act which addresses that problem by reducing the tax rate on interest and dividends. My bill will assist the Nation in achieving the goals the President has set forth.

Under this bill, the temporary $200 to $400 combined interest and dividend exclusion is made permanent. Further, the bill gives the taxpayer the option of taking that exclusion or excluding 10 percent of dividends and interest from taxation in 1982, whichever is greater. The percentage exclusion would increase to 20 percent in 1983, and 30 percent in 1984. This increasing percentage would thus give savers an incentive to increase their level of savings over a period of years.

Therefore, the net effect of the bill is to gradually reduce the maximum marginal tax rate on interest and dividends from 70 percent to 49 percent. In 1982, the maximum tax on interest and dividends would be reduced by 63 percent in 1983 to 56 percent and in 1984 to 49 percent. Thus by 1984 there would be parity between the tax treatment of earned income and the tax treatment of interest and dividends. Even more importantly my bill will provide a real incentive for middle-income taxpayers to save and invest. Such a targeted incentive is the missing element in the Reagan proposal. Across-the-board reductions in tax rates will encourage savings and investments most significantly for high-income taxpayers. Additional inducements to save, like my bill, are needed, however for middle-income families.

Several other proposals have been introduced in the Senate to target tax cuts to increased savings. Each deserves careful review and I have joined in cosponsoring two of them. First, I have joined Senator CHAFEE and others in introducing S. 243, the Savings and Retirement Income Incentive Act of 1981. This proposal:

> Make permanent the $200 to $400 interest and dividend exclusion.
>
> Allows a $500 to $1,000 interest and dividend tax exclusion for senior citizens (65 years of age and over).
>
> Makes all persons with earned income eligible to establish an Individual Retirement Account (including government and military employees, and workers who are also participants in qualified pension plans.
>
> Increase the maximum tax deductible IRA contribution to $2,000 a year.
>
> Permits a tax deduction up to $2 000 a year to individuals who make voluntary contributions (in excess of any mandatory contributions) to a pension plan in lieu of an IRA.
>
> Allows additional nondeductible contributions up to $2,000 a year; however, interest earned on this amount would be tax-deferred.
>
> Allows account holder the privilege of making 5 withdrawals without penalty up to a total amount of $10,000 if the funds are used for the purchase of a first home or for higher education expenses.

Second, I have joined Senator PENTSEN in introducing S. 701, the Home Mortgage Incentive Act of 1981, which would allow a taxpayer to exclude from gross income any interest on a savings deposit which is used by a financial institution for residential mortgage lending purposes. This legislation if enacted would provide a major boost to the crippled savings and loan industry in our country who provide long-term mortgages. While no exact estimate of revenue loss is available at this time on this bill, the revitalization of the construction industry that would occur would provide hundreds of thousands of jobs and millions of additional tax revenue.

Mr. President, there is no simple answer to creating the environment necessary for stimulating capital formation and increasing productivity. We must however remove the disincentive in our system for savings. We must establish a policy to reward savings. As Economist Eliot Janeway has stated:

> The incentive for investors to invest and savers to save is the same as for electricians and machinists to work—take home pay. If only the tax code could be revised to give genuine long-term investors a partial forgiveness of income tax stocks would suddenly offer savers and investors alike, investment parity.

The Savings Incentive Act I am introducing today is an important step in the right direction. It would benefit savers both large and small and would encourage systematic long-term savings and investment.

I am confident it would help provide the capital needed to reinvigorate our Nation's lackluster investment performance, lower interest rates, and create jobs. My bill, the Chafee and Bentsen bills and other savings incentive proposals which have been introduced all have merit and must be given careful consideration. Obviously, the revenue loss and the ability to generate additional savings by all of these measures must be compared carefully so that the best proposal or a combination of several is adopted.

Increased savings incentives are not the only answer, however. They must be coordinated with other tax cuts all working hand in hand to cure our Nation's economic ills.

There is no question that there must be accelerated and simplified depreciation reform.

In the last 2 years, industry's estimated cost of replacing outmoded plant and equipment shot up by $40 billion to $169 billion. Even after inflation is taken into account, the real replacement cost increased about $20 billion. Since 1978, the percentage of the private sectors plant and equipment more than 10 years old has jumped from 31 percent to 37 percent. That trend must be reversed and accelerated depreciation is the key to its reversal.

Over the decade of the 1980's, industry will need more than $5 trillion to meet its investment needs. Accelerated depreciation is just a start. Further tax changes must also be made to provide that capital. Those changes should include:

A further graduation and reduction of corporate income taxes with particular emphasis on small business rate reductions—the single most important step for keeping money in the hands of companies where it can be used to finance business expansion;

A reduction in the maximum capital gains tax rate—recent evidence prepared by the Treasury Department shows that at least initially, the lowering of the maximum tax on capital gains from just under 50 percent to 28 percent, has had a tremendous effect on unlocking equity for critical business expansion;

A reform of estate tax provisions so that an estate can be passed on tax free to a surviving spouse and up to $600,000 can be passed on tax free to the decedent's children—changes long overdue to aid farmers and small businessmen in maintaining family operations;

Capital gains rollover so that the gains

from the sales of an investment in one small business would not be penalized if invested, within a limited period of time, in another small business;

A change critical for small businesses attempting to retain the capital necessary to operate; and

An increase in permissible accumulated earnings.

Each of these proposals is part of the Omnibus Small Business Capital Formation Act of 1981, a comprehensive measure designed to improve capital formation, capital retention and business continuity which I introduced on February 3, 1981.

In the near future, I will also join Senator RUSSELL LONG in introducing legislation to encourage and expand the concept of employee stock ownership plans to give employees the opportunity to invest in and own a portion of the corporation for which they work.

The pros and cons of all of these provisions must be weighed and compared by the tax-writing committees of the Congress so that the best possible package can be enacted. I recognize that there is duplication among some of these ideas. But we need to provide Congress with a menu of proposals from which it can choose the best combination. Our purpose must be to be as creative as possible to develop the best plan possible.

Mr. President, our economy is at a crossroad and we as policymakers must choose the correct path to take. The time is ripe for tax reform which enlarges American economy rather than simply redistributes pieces of it. I will continue to work with the President and my colleagues in our fight against inflation, high interest rates and lagging productivity.

I ask unanimous consent that the Savings Incentive Act be printed following my remarks.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 819

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled That (a) paragraph (1) of section 116(b) of the Internal Revenue Code of 1954 (relating to maximum dollar amount of interest and dividend exclusion) is amended to read as follows:

"(1) Maximum dollar amount.—

"(A) IN GENERAL.—The aggregate amount excluded under subsection (a) for any taxable year shall not exceed the greater of—

"(i) $200 ($400 in the case of a joint return under section 6013), or

"(ii) an amount equal to the product of the sum determined under subsection (a) (for both the individual and spouse in the case of a joint return), multiplied by the applicable percentage.

"(3) APPLICABLE PERCENTAGE.—The applicable percentage shall be determined in accordance with the following table:

"If the taxable year begins in:	The applicable percentage is:
1982	10
1983	20
1984 and thereafter	30.".

(b) The amendment made by subsection (a) shall apply to taxable years beginning after December 31, 1981.

By Mr. JOHNSTON:

S. 820. A bill to amend title 5 of the United States Code to provide that Federal employees may make an irrevocable assignment of interests in certain life insurance policies; to the Committee on Governmental Affairs.

FEDERAL EMPLOYEES' GROUP LIFE INSURANCE IMPROVEMENT ACT OF 1981

● Mr. JOHNSTON. Mr. President, I am today introducing legislation to amend the Federal employees' group life insurance (FEGLI) law to allow participants in the insurance program which that law authorizes to make an irrevocable assignment of all incidents of ownership in their insurance. This change will give Federal employees insured under the program the same rights with regard to assignability as are generally available to others insured under employer-sponsored group life insurance plans. Under appropriate circumstances, the proceeds of assigned life insurance for the latter may be excluded from the gross estate of an insured decedent for Federal tax purposes, but such rights are not now available for FEGLI participants.

In the 96th Congress, legislation was enacted to expand the FEGLI program with regard to the amount of insurance available to Federal employees. I supported that measure in an attempt to address some of the major disparities between group life insurance policies available to workers in the private and Federal sectors. My bill will eliminate yet another disparity and remove a possible disincentive for highly qualified and skilled individuals to join the Federal civil service.

The recent amendments to the FEGLI law added a new option to the program under which employees will be permitted to purchase large amounts of group life insurance at very attractive group rates. My bill will improve FEGLI program participants' estate planning by permitting them to minimize the tax liability on the proceeds from the policy after the death of the insured, as participants in other employer-sponsored group life insurance plans can now do.

The Office of Personnel Management has been studying the assignability issue, at my request, for over 2 years. I have urged them to recommend legislation to address this inequity. OPM advised that, since this issue involves tax policy, it would first seek definitive guidance from the Department of the Treasury regarding the appropriateness and form of such legislation and, assuming a positive response, would investigate the potential administrative problems involved. However, OPM has failed to either propose legislation or furnish a time frame for this undertaking.

Internal Revenue Service rulings currently hold that assignment of group life insurance is generally effective to prevent inclusion of the insurance death proceeds in the decedent's gross estate for Federal estate tax purposes, subject to three conditions. These conditions include the following: First, applicable State law must permit the assignment of group life insurance; second, the master policy must not prohibit assignment of group life insurance; and third, the insured must irrevocably transfer all right, title, interest, and incidents of ownership, both including but not limited to the right to designate beneficiaries and the privilege of converting to an individual policy of life insurance upon termination of group coverage.

There is now a law in every State to support absolute assignment of group life insurance as a gift. My bill will amend the FEGLI law to permit insured employees to irrevocably assign all interest in the insurance in accordance with regulations prescribed by the Office of Personnel Management.

I urge the appropriate Senate committee to schedule hearings on this important matter so details of such a change can be worked out and discrimination against FEGLI program participants can be eliminated.

Mr. President, I ask unanimous consent for the text of this legislation to be printed in full at the end of my statement.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 820

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 8706 of title 5, United States Code, is amended by adding at the end thereof the following new subsection.

"(f) Under regulations prescribed by the Office, each policy purchased under this chapter shall provide that an insured employee may make an irrevocable assignment of the employee's incidents of ownership in the policy.".

(b) The heading for section 8706 of title 5, United States Code, and the item relating to section 8706 in the analysis for chapter 87 of such title are each amended by inserting "; assignment of ownership" after "insurance".

SEC. 2. (a) Except as provided in subsection (b), the amendments made by this Act shall apply to policies purchased after the date of enactment of this Act.

(b) If a company which issued a policy which is in effect on the date of the enactment of this Act agrees, the amendments made by this Act shall apply to such policy.●

By Mr. PACKWOOD (for himself, Mr. GOLDWATER, Mr. SCHMITT, and Mr. PRESSLER):

S. 821. To provide for authorization of appropriations for the Federal Communications Commission; to the Committee on Commerce, Science, and Transportation.

FEDERAL COMMUNICATIONS COMMISSION AUTHORIZATION ACT OF 1981

● Mr. PACKWOOD. Mr. President, the bill I introduce today is entitled the Federal Communications Commission Authorization Act of 1981. It authorizes appropriations for the Federal Communications Commission (FCC) at $76.9 million each year for fiscal years 1982, 1983, and 1984. It also establishes a statutory fee schedule, assessing charges for services received by communications providers and users, at rates that would

guarantee a return to the Federal Treasury of almost half of the FCC annual budget.

The FCC is permanently authorized by Congress pursuant to the Communications Act of 1934. This statute made permanent a regulatory body, originally conceived as an agency, to plan and carry out reallocation of broadcast stations to permit interference. The agency's permanent status was based upon the need to expertly regulate rapidly expanding broadcast services. Today, the FCC has far-reaching jurisdiction over international and interstate communications by radio, television, wire, and cable. As such, the Commission regulates in the following areas: domestic common carrier, including rural telecommunications; international common carrier; broadcasting, including political broadcasting; cable television, and nonbroadcast services.

The Commerce Committee is presently in the process of proposing comprehensive amendments to the Communications Act of 1934 in a manner consistent with the deregulation already undertaken in the airline, trucking, and railroad industries.

The committee has closely monitored recent actions by the FCC to promote competition and deregulation in the telecommunications industry. While the Commission's actions are generally consistent with congressional intent, the decisions have been subject to lengthy judicial review and subsequent agency revision. That is because these decisions are being made in the context of the 1934 act, which is outmoded to a large degree by recent technological advances. As a result, the services or equipment that should be available to the consumer are delayed or more expensive than they should be. Our committee is moving to assert its necessary policymaking role to insure that FCC efforts to promote competition and deregulation benefit the American people.

This authorization bill will provide the Congress an opportunity for regular and systematic oversight of the activities of the FCC. Through vigorous, systematic oversight, the Congress can insure that the Commission implements the congressional mandate, with substantially reduced costs to the taxpayer. Efficiencies created through deregulation and oversight are reflected in the proposed authorization ceilings, although economies may be achieved beyond those ceilings. For that reason, the FCC may reduce the fees to reflect these efficiencies.

The statutory fee schedule is based solely on the cost of regulation. This is the standard established by the U.S. court of appeals in a series of cases in 1976. (*National Cable Television Association* v. *FCC*, 554 F. 2d 1094 (D.C. Cir. 1976); *Electronic Industries Association* v. *FCC*, 554 F. 2d 1109 (D.C. Cir. 1976); *National Association of Broadcasters* v. *FCC*, 554 F. 2d 1118 (D.C. Cir. 1976); *Capital Cities Communications, Inc.* v. *FCC*, 554 F. 2d 1135 (D.C. Cir. 1976)). We believe that in a time of budgetary caution and spending restraint, it is the responsibility of Congress to seek out ways to ease the Federal monetary load without unduly burdening the American public and the providers and users of communications services. This bill establishes specific fees. We believe the fees are reasonable, and will not unduly burden the providers or users of services, but merely be a sensible way to help defray the cost of regulation.

Passage of this bill will resolve the questions that have been raised concerning the FCC's authority to establish fees, and will put to rest the controversy over radio spectrum use fees.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 821

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 4 of the Communications Act of 1934 is amended by adding at the end thereof the following new subsection:

"(p) There are authorized to be appropriated, to carry out the functions of the Commission, $76,900,000 for the fiscal year ending September 30, 1982, $76,900,000 for the fiscal year ending September 30, 1983, and $76,900,000 for the fiscal year ending September 30, 1984.".

(b) The Communications Act of 1934 is further amended by inserting after Section 5 a new section:

"CHARGES

"SEC. 6. (a) The Commission shall assess charges for the services listed in this subsection at the rates listed or at such modified rates as it shall establish pursuant to the provisions of subsection (b) of this section.

"SCHEDULE OF CHARGES

	Charge
"Private radio services:	
"Service:	
"Public coast stations—new, mods, and renewals	$50
"Operational fixed microwave stations—new, mods, and renewals	50

"(b)(1) The Commission may on an annual basis increase or decrease the amounts of the charges established in subsection (a). Increases or decreases shall apply on a pro rata basis to all categories of charges and shall be in the same proportion as the cumulative charges in the Commission's total budget appropriations for the preceding two fiscal years.

"(2) Increases or decreases made pursuant to this subsection shall be adopted as a part of the Commission's rules and regulations.

"(3) Increases or decreases made pursuant to this subsection shall not be subject to judicial review.

"(c) The Commission shall prescribe appropriate rules and regulations to carry out the provisions of this section.

"(d) The Commission is authorized to prescribe by regulation an additional charge which may be assessed as a penalty for late payment of charges required by subsection (a). Such penalty shall not exceed 25 percent of the amount of the charge which was late.

"(e)(1) The charges established in this section shall not be applicable to any governmental body.

"(2) The Commission is authorized to waive or delay payment of any fee established in this section if it determines that the public interest would be served by such action.

"(f) Money received from charges established pursuant to this section shall be placed in the general fund of the Treasury to reimburse the United States for amounts appropriated for use by the Commission in carrying out its functions under this Act.

"(g) The authority to collect the charges established under this section shall be con-

current with the authorization of appropriations under subsection (p) of section 4.".●

By Mr. WILLIAMS:

S. 822. A bill to amend title 18 of the United States Code to make it a Federal crime to vandalize a house of worship or any other religious property; to the Committee on the Judiciary.

RELIGIOUS FREEDOM PROTECTION ACT

● Mr. WILLIAMS. Mr. President, I am today introducing legislation that would make it a Federal crime to intimidate any individual or group or to commit any act of vandalism or theft against religious property, when the act is committed with the intent of interfering with the free exercise of religion guaranteed to every citizen by the Constitution.

While this legislation will extend protection to Americans of every religious background, it provides a particularly appropriate response to an alarming upsurge of anti-Semitic threats and violence. The Anti-Defamation League of B'nai B'rith's annual survey of such episodes found a 192-percent increase in reported acts of anti-Semitism in 1980 compared to 1979. This startling increase, from 120 incidents to 377, consisted of firebombings, thefts, and defacements in 29 States and the District of Columbia. With great unhappiness, I must report that New Jersey reported 69 anti-Semitic acts in 1980, the second highest total for any State. These incidents included—

Synagogue windows smashed by rocks;

The desecration of a cemetery and its holocaust memorial;

The burning of an ornamental altar cloth;

The firing of a .22 caliber bullet through the front doors of a temple;

Placement of a pipebomb in the entranceway of a synagogue. Fortunately, the pipebomb was defused before it exploded.

Similar incidents have taken place from coast to coast. In January, seven handwritten Torah scrolls valued at $15,000 each were stolen from one of the oldest synagogues in Brooklyn, N.Y., threatening its continued functioning. And, while most of the anti-Semitic acts appear to be the work of disturbed individuals acting on their own, two members of the neo-Nazi National Socialist American Workers Party were arrested for the December arson of a Los Angeles temple which caused more than $100,000 in damage.

Dr. Melvin Tumin, a Princeton University sociologist who recently chaired a two-day meeting of B'nai B'rith's task force on anti-Semitism, believes that the rising number of such incidents is just the "tip of an iceberg" of "a pervasive and deep-rooted anti-Semitism which has lain dormant for the past 20 or 30 years". Dr. Tumin believes that this dormancy may be ending due to economic distress and social upheaval here and abroad, and has in part been legitimized by anti-Israeli propaganda, and by the United Nations' despicable adoption of the infamous resolution equating Zionism with racism.

Mr. President, I sincerely hope that Dr. Tumin is mistaken in his assessment of the magnitude of anti-Semitic feeling in the United States. In New Jersey, many schools have programs stressing religious tolerance, and anti-Semitic incidents have brought together religious leaders from every spectrum of the community to decry the scourge of bigotry. However, the fact remains that reported acts of arson, vandalism, and defacement nearly tripled in 1980, and that only 3 percent of the perpetrators were apprehended.

Mr. President, the enactment of this legislation would send a clear signal from the Congress that acts of this kind have no place in the United States. The possibility of severe Federal penalties would undoubtedly provide a significant deterrent effect. And, while Federal involvement would not be appropriate in every instance, the availability of Federal investigatory resources for especially damaging desecrations or very reprehensible acts would increase the likelihood that perpetrators would be apprehended.

Mr. President, even when an act of bigotry consists of no more than a spray-painted swastika or the slogan "Juden sterben" on a synagogue entrance, it sets in motion a wave of fear and concern which sweeps through the entire community. It is not possible for the Jewish people to forget that these words and symbols accompanied the systematic murder of 6 million of their brothers and sisters less than 40 years ago. Nor can they overlook that, even today, the survival of the State of Israel requires constant vigilance and defense. Likewise, we in the Congress should not forget that failure to nip the poison weed of religious intolerance early in its blooming can permit the entire garden of our freedoms to be overrun.

I hope that my colleagues will join me in supporting this legislation by which the Federal Government can do its part to weed out the most virulent aspects of anti-Semitism and bigotry.

I ask that the text of this legislation, as well as three articles describing the recent upsurge in anti-Semitism, be printed in the RECORD.

There being no objection, the bill and articles were ordered to be printed in the RECORD, as follows:

S. 822

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Religious Freedom Protection Act".

SEC. 2. Chapter 13 of title 18, United States Code, is amended by adding immediately after section 246 the following new section:

"§ 247. Interference with religious freedom.".

"(a) Whoever, acting with the intent to interfere with the free exercise of religion by any individual or group, intimidates or attempts to intimidate such individual or group, shall be fined not more than $10,000, or imprisoned not more than five years, or both; and if bodily injury results shall be fined not more than $15,000 or imprisoned not more than fifteen years, or both; and, if death results, shall be subject to imprisonment for any term of years or for life.".

"(b) Whoever, acting with the intent to interfere with the free exercise of religion by any individual or group, vandalizes or defaces, sets fire to, tampers with, or in any other way damages or destroys any consecrated cemetery, religious school, house of worship, or any other real property used for religious purposes, or any religious article contained therein, or acting with such intent, takes and carries away any religious article from such cemetery, school, house of worship, or other real property, or attempts to carry out any such prohibited act, shall be fined not more than $10,000, or imprisoned not more than five years, or both; and if bodily injury results shall be fined not more than $15,000 or imprisoned not more than fifteen years, or both; and, if death results, shall be subject to imprisonment for any term of years or for life.

"(c) Whoever enters into a conspiracy to carry out any act prohibited by the preceding subsections shall be fined not more than $10,000 or imprisoned not more than five years."

SEC. 3. The table of sections for chapter 13 of title 18, United States Code, is amended by adding at the end the following item:

"247. Interference with religious freedom.".

SEC. 4. The provisions of section 2 of this Act shall take effect on the date of enactment of this Act.

REAWAKENING IN U.S.

(By Charles Austin)

NEW YORK.—Although youthful vandals who desecrate Jewish cemeteries or scratch swastikas on synagogues may be unaware of the mental anguish caused by their crimes, Jews in this country are worried that a "dormant anti-Semitism deeply entrenched in U.S. institutions" might lie behind the increase in anti-Semitic incidents last year.

The Anti-Defamation League of B'nai B'rith yesterday concluded a two-day meeting involving educators, law enforcement officials, and sociologists to discuss the increase in anti-Semitic acts. Dr. Melvin Tumin of Princeton University said after the consultation that records seem to indicate that the incidents are mainly perpetrated by young people between the ages of 14 and 20.

SHARP RISE IN EPISODES

The ADL reported last month that there were more anti-Semitic acts of vandalism in Bergen County than in any other New Jersey county last year, and more such acts in New Jersey than in any other state except New York.

Nationally, there was a sharp rise in the number of anti-Semitic episodes reported in the United States, the league report showed. A total of 377 episodes were reported in 1980, a significant increase from the 129 reported in 1979.

Dr. Tumin said some vandalism directed against Jews may be the work of young people "acting out their own personal problems."

"But we have to ask why they act them out this way," Dr. Tumin said. "What are they hearing at home?" Participants in the meeting agreed that there may be a widespread anti-Semitism "buried in our institutions." Dr. Tumin reported. It has lain dormant for the past 20 years, he said, but may be stirring in response to a number of domestic and foreign influences.

Some of the incidents may be attributed to what Dr. Tumin called a "misperception of the relationship between U.S. support for Israel and the cost of oil." Other anti-Semitic feelings could be attributed to the plunging economy, which Dr. Tumin said "makes people look for a scapegoat to take the blame."

The Princeton professor also blamed the surfacing of anti-Jewish sentiments on "Arab propaganda and resolutions promulgated by the United Nations equating Zionism with racism."

"It now seems almost fair to go after Jews," he stated at a press conference at

ADL headquarters just opposite the United Nations building in Manhattan

UNAWARE OF IMPACT

Patrick J. Murphy, chief of operations for the New York City Police Department, agreed that young people involved in vandalism against synagogues and Jewish homes seem to be unaware of the impact of their deeds. "They say it was a prank," Murphy stated, "and when they are caught, they can't understand the outrage."

Both Murphy and Tumin were critical of how the courts handled those convicted of anti-Semitic vandalism. "The judges are not severe enough," said Tumin. The Princeton educator also said that sentences requiring those convicted to write essays on the Nazi Holocaust were too gentle. "Anti-Semitic behavior should be deglamorized by making it very costly," he said.

Murphy said the police were helped when political leaders issued a clear denunciation of anti-Semitic activity, no matter how minor, and when prosecutors energetically pursued those accused of anti-Semitic vandalism.

[From the Star-Ledger, Dec. 30, 1980]

ADL REPORT RECORDS 69 ACTS FOR 1980

(By Monica Maske)

New Jersey ranks second highest in the number of anti-Semitic acts of vandalism reported in 1980 according to statistics released yesterday by the Anti-Defamation League (ADL) of B'nai B'rith.

Only New York, with 120 reported episodes in the past 12 months, reported a higher number of such incidents than New Jersey, where 69 acts of vandalism against synagogues, Jewish schools and homes owned by Jews, were committed in 1980.

The ADL's 1980 audit of anti-Semitic "episodes" in all States and the District of Columbia also showed a sharp increase over 1979. Nationally, there were only * * * such acts committed in 1979 while the number recorded for 1980 jumped by 192 percent to 377.

In New Jersey, the number of anti-Semitic incidents in 1980 was nearly double the 38 reported in 1979. New York's 1980 statistics showed an increase of almost five times the 20 reported in 1979.

Nathan Perlmutter, national ADL director, attributed part of the increase to improved reporting procedures from the ADL's 26 regional offices as well as a greater willingness on the part of the victims to report the acts.

However, he added that the ADL faced a "real problem" in deciding whether to release the statistics because "in the past, we've found these actions tend to be imitative, which means somewhere, somehow, someone has read about someone else doing it and gets the idea to do it too."

"The problem," he said, "is do you sweep it under the rug and prevent imitation or do you point out what is happening and in doing so, actually contribute to it?"

"We need to focus public opinion," he stated, even though the attention might give the idea to some people, "because a larger number is appalled and disgusted by this kind of activity. Publicity, hopefully brings about peer disapproval of what is cowardly, anti-Semitic and anti-American because it is not in consonance with any of the standards we uphold in this nation."

While the statistics do not lend themselves to "specific conclusions" about the nature of the increase in anti-Semitic acts in 1980, the ADL national director said, certain factors are clear.

Anti-Semitic vandalism, he said, tends to be committed by teenagers, acting alone or in pairs. It does not appear to be a concerted effort by a "hate group" or have any "conspiratorial" quality.

Perlmutter also said it tends to be an "imitative" act by teenagers who read or hear of such vandalism.

However, because of the marked increase in the number of anti-Semitic incidents in the nation, the ADL has called an emergency task force meeting at its New York headquarters Jan. 6 and 7.

Participants in the task force session will include law enforcement officials, educators, social scientists and ADL staff. Jeffrey Maas, regional director of the ADL in New Jersey, will also attend.

The aim of the meeting is to analyze the incidents, characterize the average perpetrator, examine the causes and motivations for such acts and suggest remedial action which might be taken to stem the increasing tide of acts of violence against Jews and Jewish property.

The 69 acts of anti-Semitic vandalism in New Jersey, which included a fire-bombing attempt on a Yeshiva school bus in Union City in June, occurred primarily in Bergen, Essex and Middlesex counties.

The highest number of such acts, 22, was reported in Bergen County while Essex and Middlesex counties both reported 14 acts. Union County had three, while the remaining 16 episodes were "scattered" throughout the state according to Judith Mandelbaum of the New Jersey ADL.

All the incidents in New Jersey with the exception of the attempted fire-bombing, fell into the category of the painting of graffiti such as swastikas and other vandalism.

Mandelbaum said many such acts of anti-Semitic vandalism occurred during Halloween. But the number reported during that holiday to her office this year was the same as last year, which she attributed to the call by Attorney General John J. Degnan to the county prosecutors to get tough with youthful offenders.

Only seven arrests were made in 1980 for acts of anti-Semitic vandalism in New Jersey, Mandelbaum said. Three juveniles in Monmouth County and four in Wayne were apprehended for painting swastikas on private homes.

She said that most of the anti-Semitic vandalism in New Jersey is the work of "young people" who she added appear to have a "lack of education about what it means to draw a swastika on someone's home."

She pointed out that the ADL actively supports the "Ethnic Terrorism Bill" sponsored by Assemblyman Byron Baer (D-Bergen) which would increase the penalty for such acts of vandalism from a petty misdemeanor to a third or fourth degree crime which would draw the penalty of a $7,500 fine and/or four years in prison.

However, she noted that the bill doesn't affect juveniles, who appear to be committing most of these acts of vandalism.

[From the New York Times, Dec. 30, 1980]

SURVEY FINDS SHARP RISE IN ANTI-SEMITIC INCIDENTS

A considerable increase in reported anti-Semitic incidents took place throughout the United States this year, according to a report yesterday by the Anti-Defamation League of B'nai B'rith. The group said that 377 cases of assaults and vandalism were reported against properties in 1980, and 112 bodily assaults or harassments against individual Jews or institutions.

Nathan Perlmutter, the civic organization's director, said the data "suggest that there is a high quotient of anti-Semitism and anti-Jewish hostility which still exists just beneath the surface of American life."

The study said that nearly all the reported incidents "appear to be the work of hostile individuals acting without organizational direction."

"The findings underscore once again the anti-Semitism and other forms of racial and religious bigotry remain a virulent social disease, Mr. Perlmutter said. "What is called for is greater public concern manifested through strengthened law enforcement, realistic penalties and expanded educational programs."

The league is to convene a task force of law enforcement officials, educators, social scientists and staff members at its New York headquarters, 345 East 48th Street, Jan. 6 and 7 to analyze the incidents as to characteristics of perpetrators, causes, motivations and remedies.

This year's survey of property incidents included 354 incidents classified as "anti-Semitic graffiti, swastikas, vandalisms" along with 10 arsons, two attempted arsons, four fire-bombings, two attempted firebombings and five cemetery desecrations.

Almost 65 percent of the incidents occurred in five Northeastern states—New York, New Jersey, Massachusetts, Rhode Island and Connecticut. Forty-one percent were directed against such Jewish institutions as houses of worship, schools, community centers and cemeteries; 42 percent were aimed at homes or stores owned by Jews, and the rest involved public property.

The new total compared with 129 property incidents reported in last year's annual survey by the Anti-Defamation League. But Mr. Perlmutter said that part of the 1980 increase might have reflected improved procedures introduced this year in collecting and evaluating information. In 1978, 49 property incidents were reported.

This year's 112 reported incidents of bodily assaults and harassment were cited separately, because there was no comparable count in the 1979 survey.

The incidents against property occurred in 29 states and the District of Columbia. The largest number, 120, were reported in New York State, including 69 in New York City and 39 in Nassau and Suffolk counties on Long Island. Last year 26 incidents were reported in the state. New Jersey was second this year with 69 incidents, up from 38 reported in 1979. Then followed Massachusetts, 34, up from 14; California, 27, up from 15, and Michigan, 21, up from four.

In New York City, 29 incidents were reported in Brooklyn, 23 in Queens, six each in Manhattan and the Bronx, and five on Staten Island. Of the statewide total, 73 involved Jewish institutions, 38 were aimed at private property owned by Jews and nine were against public property.

The report said 20 persons, including eight in New York and seven in New Jersey, had been apprehended in 11 of the 377 incidents. Fourteen of the 20 were 17 years old or younger.

Two persons were described by the police as members of the neo-Nazi National Socialist American Workers Party, arrested in Los Angeles on suspicion of arson in a fire Dec. 6 that caused $100,000 damage at a temple.●

By Mr. THURMOND (for himself, Mr. KENNEDY, Mr. HARRY F. BYRD, JR., Mr. HOLLINGS, Mr. WARNER, Mr. HELMS, Mr. HEFLIN, Mr. DENTON, and Mr. EAST):

S. 823. A bill to provide for the payment of losses incurred as a result of the ban on the use of the chemical Tris in apparel, in fabric, yarn, or fiber, and for other purposes; to the Committee on the Judiciary.

LEGISLATION RELATING TO ECONOMIC LOSSES INCURRED BY THE BAN ON TRIS

Mr. THURMOND. Mr. President, today, I am introducing, along with Senators KENNEDY, HARRY F. BYRD, JR., HOLLINGS, WARNER, HELMS, HEFLIN, DENTON, and EAST, a bill to provide for the pay-

ment of losses incurred as a result of the ban on the chemical Tris.

The bill is identical to legislation that was vetoed by President Carter in 1978 and also to S. 521, which passed the Senate on December 20, 1979, but failed to pass in the House. The threat of another veto by President Carter was sufficient to prevent its passage in the other body.

Mr. President, this legislation seeks to correct economic losses sustained by the ban of the chemical flammability retardant Tris imposed by the Consumer Product Safety Commission on April 8, 1977. To understand more fully the predicament caused by this action, a brief account of the history of the Tris ban may be appropriate.

In 1971, the Secretary of Commerce issued mandatory flammability standards for children's sleepwear in sizes 0–6X under the Flammability Fabrics Act. This regulation, FF–3–71, virtually mandated the use of Tris or an acceptable substitute in all polyester, acetate and tri-acetate fabrics. Objections of the textile industry that chemical flame retardants had not been sufficiently tested for safety were not given any significant consideration by the relevant Government agencies. Subsequently, with textile industry approval, Tris was tested for sensitivity and toxicity under generally accepted standards and was found to be safe.

In February 1977, the National Cancer Institute published preliminary, unverified result of tests indicating that when Tris was fed daily in massive doses to cancer-prone rats and mice over extended periods of time, these rats and mice developed cancer. These testing procedures had not been previously applied to nonconsumable articles, such as children's sleepwear. Although there is no direct evidence linking Tris to cancer in humans, based in large part on its very preliminary data, the Consumer Product Safety Commission issued regulations declaring Tris and all fabrics, yarns, and fibers treated with Tris, and all apparel treated with Tris intended for use by children, to be "banned hazardous substances" under the Federal Hazardous Substances Act.

As a result of these discoveries, the CPSC announced on April 7 that it was banning the sale of any children's clothing containing Tris. The ban also included any Tris-treated fabric for sale to consumers for use in children's wearing apparel. Tris-treated children's garments, which had been purchased by consumers and were not yet washed, were also banned.

The ban took effect on Friday, April 8, when notice of that action was published in the Federal Register. The ban means that any of the affected products in Interstate Commerce or introduced into Interstate Commerce are banned and must be repurchased from retailers and distributors by any manufacturer or others who sold them. Consumers who had purchased, but not washed any Tris-treated children's garments or uncut fabric, would also be entitled to a full refund of the purchase price.

Mr. President, the cost to apparel manufacturers of repurchasing all unsold or unwashed children's garments made from fabric containing Tris and disposing of unsold inventories of children's garments made from fabric containing Tris, has been estimated to be over $50 million.

In a statement by the American Apparel Manufacturers Association before the special hearing panel on July 26, 1977, the amount of the loss was stated to be $150 million. The AAMA now believes the actual losses suffered by all children's sleepwear manufacturers to be about $50,000,000. This includes garments, uncut fabric in apparel plants, and the "to-date" indirect costs, such as transportation, administration, and storage. Of course, some smaller additional costs will be incurred as storage costs continue and potential disposal costs appear.

The harm to industry is catastrophic and irreparable. It imposed an immediate obligation upon the apparel manufacturers to repurchase the garments they have sold. It left the entire industry without an adequate recourse or remedy. Some apparel manufacturers face bankruptcy because their losses as a result of the ban could exceed their net worth.

Mr. President, many other firms will suffer severe financial impairment and be forced to lay off employees. This results because the manufacturers involved have acted in good faith to meet the flammability standards mandated by the Federal Government, and it is unfair to require them to bear the brunt of this bureaucratic bungle. It is this mistake, this arbitrary and inequitable decision that has prompted the introduction of this legislation.

This legislation is not a bailout. It is simply legislation to confer jurisdiction on the U.S. Court of Claims to determine the dollar value and render judgment for losses sustained by producers, processors, manufacturers, distributors dealers, and other persons as a result of actions taken by the Federal Government under the Hazardous Substance Act relating to the ban on apparel, fabric, yarn, or fiber containing Tris.

The bill contains a number of limitations on the claims that may be made by those injured by the Tris ban. For example, the court shall consider the following factors in determining the validity of claims under this legislation:

First, the degree to which reasonable alternative to Tris (2,3-dibromopropyl) phosphate existed at the time the Federal Government established the applicable mandatory Federal flammability standard referred to in subsection (a).

Second, whether it would have been feasible, or reasonable, for the claimant to have tested Tris (2,3-dibromopropyl) phosphate for chronic hazards at the time the Federal Government established such flammability standard.

Third, the degree to which the Federal Government, prior to establishing such flammability standard, tested Tris (2, 3-dibromopropyl) phosphate for toxicity or other health hazards, and disseminated the results of these tests.

Fourth, the degree of good faith demonstrated by a claimant in seeking to comply fully with such Federal flammability standard.

Fifth, the extent to which a claimant may have relied in good faith on assurances from suppliers that the products containing Tris (2,3-dibromopropyl) phosphate were safe.

Sixth, the degree to which a claimant acted reasonably in using Tris (2,3-dibromopropyl) phosphate for the time period that such substance was used.

Seventh, the degree to which a claimant, in good faith, complied with actions taken by the United States under the Federal Hazardous Substances Act on April 8, 1977.

Mr. President, as I mentioned earlier in my statement, on November 8, 1978, President Carter vetoed the bill S. 1503, which had passed both the House and Senate. In his veto message on this legislation, the President said:

> S. 1503 would establish an unprecedented and unwise use of taxpayer's funds to indemnify private companies for losses incurred as a result of compliance with a Federal standard.

This objection to S. 1503 by the President was based on the advice given to him by the Department of Justice.

Although the Justice Department did, in fact, advise the President in this case that passage of S. 1503 would set an unwise precedent, the Department of Justice has also indicated in the past with respect to similar legislation that such a precedent would not be set. In the 92d Congress, legislation was introduced that would have authorized the Court of Claims to enter judgments against the United States for persons who had suffered losses resulting from the Food and Drug Administration's ban on cyclamates. However, the Department of Justice supported the cyclamate legislation both before the House Judiciary Subcommittee and the Senate Judiciary Subcommittee that had responsibility for that legislation. Representatives from the Department of Justice stated that the cyclamate situation was an extraordinary one, and that relief was appropriate because the Government had assured producers and users that cyclamates were safe for use.

Despite the Justice Department's support for cyclamate legislation in 1971 and 1972, it had not taken an opposite position in 1978 with respect to the Tris legislation. Since both claims for relief stem from actions by the Federal Government that were relied on by private industry, it is difficult for me to understand why the Justice Department's position changed. I hope that it will change again.

President Carter in his veto message also echoed the Department of Justice's argument that a regulating agency should authorize payments rather than the Court of Claims. The purpose, however, of relying on the Court of Claims is to insure that the party seeking compensation be required to prove his losses before a body that has experience in deciding the legitimacy of claims against the Federal Government. A law which allowed a regulating agency to make payments would probably result in greater,

rather than lesser, expense to the Federal Government.

In summary, Mr. President, the basis for the industry's claim for indemnification rests upon the double-edged aspect of Government regulation. That is, the Department of Commerce on the one hand, required the industry to use a chemical like Tris in sleepwear and, when in good faith the industry did so, the Consumer Product Safety Commission banned the Tris-treated sleepwear. This is just one example of layer of regulation being placed upon layer of regulation, and as the long arm of the "over-regulators" continues to grow, the image of Government as a responsible and responsive unit shrinks even smaller.

The passage of Tris legislation in this Congress is imperative. It is a recognition that private industry has been over-regulated by the Federal Government, and in so doing, has suffered an economic loss that is not its fault.

Mr. President, this legislation will affect a number of apparel and textile industries in my State of South Carolina. It will also affect industries of this kind in a number of States throughout the country. This legislation is long overdue and should be passed promptly in this Congress and signed by the President.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 823

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) the Court of Claims shall have jurisdiction to hear, determine, and render judgment upon any claim for losses sustained by any producer, manufacturer, distributor, or retailer of children's sleepwear, or by any producer, converter, manufacturer, distributor, or retailer of fabric, yarn, or fiber contained in or intended for use in children's sleepwear, as a result of the actions taken by the United States under the Federal Hazardous Substances Act on April 8, 1977, and thereafter relating to apparel, fabric, yarn, or fiber containing Tris (2,3-dibromopropyl) phosphate: *Provided, however,* That such children's sleepwear and such fabric, yarn, or fiber contained in or intended for use in children's sleepwear was subject to the requirements of or for use in compliance with the mandatory Federal flammability standard FF3–71, or FF5–74, at the time of its manufacture.

(b)(1) In determining the validity of any claim under this Act and the amount of the losses sustained for which such a claim is brought, the court shall consider the following factors:

(A) The degree to which reasonable alternatives to Tris (2,3-dibromopropyl) phosphate existed at the time the Federal Government established the applicable mandatory Federal flammability standard referred to in subsection (a).

(B) Whether it would have been feasible, or reasonable, for the claimant to have tested Tris (2,3-dibromopropyl) phosphate for chronic hazards at the time the Federal Government established such flammability standard.

(C) The degree to which the Federal Government, prior to establishing such flammability standard, tested Tris (2,3-dibromopropyl) phosphate for toxicity, or other health hazards, and disseminated the results of these tests.

(D) The degree of good faith demonstrated by a claimant in seeking to comply fully with such Federal flammability standard.

(E) The extent to which a claimant may have relied in good faith on assurances from suppliers that the products containing Tris (2,3-dibromopropyl) phosphate were safe.

(F) The degree to which a claimant acted reasonably in using Tris (2,3-dibromopropyl) phosphate for the time period that such substance was used.

(G) The degree to which a claimant, in good faith complied with actions taken by the United States under the Federal Hazardous Substances Act on April 8, 1977.

(2) In determining the amount of the losses for which a claim is brought under this Act, the amount of such losses shall not include lost profits, proceeds from distress sales, attorney's fees, or interest on any such loss resulting to any producer, converter, manufacturer, distributor, or retailer of such children's sleepwear, or to any porducer or manufacturer of fabric, yarn, or fiber.

(c)(1) The measure of losses for producers of manufacturers of children's sleepwear shall be the cost of producing goods referred to in paragraphs (1) and (2) of this subsection, held in stock on the date of enactment of this Act, less the fair market value, if any, of such goods and less the amount of any reimbursement received.

(2) In addition to the losses determined under paragraphs (1), (2), and (3) of this subsection, a claimant may also be compensated for reimbursed costs of transportation paid for the return of such sleepwear garments, fabric, yarn, or fiber.

(d) No claim under this Act may be brought as a class action nor may any claim under this Act be brought by two or more parties unless damages are claimed to be jointly recoverable or are disputed among the parties claimant.

(e) Upon payment of any claim under this Act, by court judgment or by settlement, the United States shall be subrogated to the claimant's rights to recover losses or assert a claim against any person or organization relating to the subject matter of the claim paid by the United States. The claimant shall execute and deliver instruments and papers and take whatever steps are necessary to secure such rights in the United States in order to be entitled to the entry of a judgment by the Court and payment under this Act, and the failure of the claimant to perform such acts or take such steps shall constitute cause to deny the entry of such judgment and manufacturing the sleepwear garment plus the cost of the fabric, yarn, or fiber used for such production or manufacture, held in stock on the date of enactment of this Act, less the fair market value, if any, of the sleepwear garment or the fabric, yarn, or fiber. If the sleepwear garment or the fabric, yarn, or fiber has been resold after April 8, 1977, but prior to such date of enactment, then the measure of losses shall be the cost of producing or manufacturing the sleepwear garment plus the cost of the fabric, yarn, or fiber less the proceeds from any such sale.

(3) The measure of losses for producers, converters, or manufacturers of fabric, yarn, or fiber shall be the cost of producing, converting, or manufacturing the fabric, yarn, or fiber plus the cost of the raw materials used for such production, converting, or manufacture, held in stock on the date of enactment of this Act, less the fair market value, if any, of the fabric, yarn, or fiber. If the fabric, yarn, or fiber had been resold after April 8, 1977, but prior to such date of enactment, than the measure of losses shall be the cost of producing, converting, or manufacturing the fabric, yarn, or fiber plus the cost of the raw materials used for such production, converting, or manufacture less the proceeds from any such sale.

(4) The measure of losses for distributors and retailers shall be the distributor's or the retailer's purchase price for payment. The failure of the claimant to perform such acts or to take such steps shall not limit or adversely affect the right of the United States to act as subrogee or assignee to the full extent of its payments under this Act. Any purported limitation on the right of the United States to act as assignee or to become subrogated to the rights of a claimant shall be without any effect, to the extent that the United States has made payments under the Act.

(f) Any claim under this Act shall be barred unless commenced within two years after the date of enactment of this Act.

By Mr. JOHNSTON:

S. 824. A bill to authorize the President to establish a program to reduce and order the demand for motor fuel during a severe energy supply interruption; to the Committee on Finance.

EMERGENCY MOTOR FUEL DEMAND RATIONING ACT OF 1981

● Mr. JOHNSTON. Mr. President, today I am reintroducing legislation I sponsored in the 96th Congress as S. 2570. This bill would give the President an effective alternative to gasoline rationing to deal with truly severe interruptions in U.S. oil imports. Unless we enact legislation addressing this issue in the 97th Congress the President will be without any authority whatever during such interruptions.

The public currently expects that a drastic shortage in oil imports will trigger a Federal program of coupon rationing for gasoline. A standby plan providing the basic outline of a coupon rationing scheme now exists. Last year that plan survived congressional review under the amended procedures enacted in 1979. This standby plan is a rule under the Emergency Petroleum Allocation Act of 1973. Therefore, the authority to make the plan effective will expire on September 30, 1981, when the EPAA expires.

Nearly everyone who has seriously studied the problem of dealing with severe petroleum shortages has concluded that a coupon rationing plan cannot work and, in fact, will dramatically worsen an already very unpleasant situation. Perhaps in recognition of this fact, the 96th Congress refused to adequately fund the preimplementation costs of the coupon rationing plan it approved, and the current administration apparently does not intend to spend any money at all on the plan.

So, even if the authority to implement such a plan existed beyond September 30, 1981, the debate on the desirability of coupon rationing of gasoline remains theoretical and irrelevant. Coupon rationing is not our policy for dealing with severe petroleum shortages. However, no other policy exists to take its place.

The purpose of the bill I am introducing today is to provide a focus for a serious evaluation of workable alternatives to coupon rationing. We cannot be without a policy to deal with the kind of drastic petroleum shortages that are probable as long as the major industrialized nations depend so heavily on oil produced by nations bordering on the Persian Gulf. Severe shortages, in the range of 20 percent or greater, cannot be handled through allocations and gasoline lines.

An alternative policy—in fact, the policy we will adopt by default if we do not legislate this year—would be for the President to do nothing during such a severe disruption. No responsible person believes that this is a viable policy or even a desirable one. The petroleum market and the major oil companies which play such an important role in that market cannot be expected to manage a national emergency. It is unwise and impractical to require private firms to adopt special policies during a national crisis to provide fuel for necessities such as national defense, local police protection, ambulance service, agricultural production, and the rest of the activities within that limited but essential range of basic functions upon which society relies.

We have no choice but to devise an effective standby Federal policy which will restrain petroleum demand while providing for maintenance of these functions during a severe oil supply disruption. I am proposing legislation which can accomplish this without the insurmountable rigidities inherent in coupon rationing and without sacrificing the priniciples of equity the Congress has sought to incorporate in previous rationing plans.

This legislation, the Emergency Motor Fuel Demand Rationing Act of 1981, authorizes the President to restrain motor fuel demand during a severe petroleum supply interruption by imposing a temporary fee on each gallon of fuel sold for a period no longer than is necessary to deal with a specific disruption. All proceeds of this fee would be returned to motor fuel users in a timely manner and in exact proportion to the rights such users would have to receive coupons under the standby coupon rationing plan approved by Congress last year.

The conditions for imposition of the fee would be the same as the conditions the President would have to meet in order to impose upon rationing of motor fuel under existing law. The President would be authorized to set the fee at a level which would restrain motor fuel demand to the extent required by the shortage expected to result from a specific supply interruption. This fee would thus capture any windfall revenue gains which would otherwise result from price increases caused by the shortage.

The proceeds of the fee would be fully rebated. Each user of motor fuel would be entitled to a rebate in an amount directly proportional to the number of rationing coupons that user would have received under the approved motor fuel coupon rationing plan. This rebate could be made through the mail where this is necessary, but, to the maximum extent practicable, refunds would be distributed through the existing income tax and transfer payment system—by reducing income tax withholding, increasing supplemental security income payments and veterans' benefits, and by reduced estimated tax payments by self-employed individuals.

Because the rebate mechanism incorporated in this legislation provides a refund exactly proportional to rights to ration coupons, the benefits to any individual user of the fee rebate plan I am proposing are exactly equivalent to benefits of the coupon rationing plan. From the point of view of equity, a fee with this kind of rebate is indistinguishable from coupon rationing.

However, there is an important fundamental distinction between these two methods for dealing with truly severe petroleum supply interruptions. The one I am proposing will work, and coupon rationing will not. My plan uses a rebate of ordinary money—as opposed to ration coupons. This rebate provides the opportunity for any given user of motor oil to obtain a specified share of available supplies at lower than marginal prices, but avoids the enormous inflexibilities and the crushing administrative burdens which would accompany the creation of a second currency system composed of ration coupons.

The task of distributing and accounting for the new ration coupon currency would rival the effort presently devoted to managing the money supply, but without any of the institutional experience with money we have very painfully acquired over many years of trial, error, and study of economic theory.

The plan I am proposing would use the existing financial mechanisms for interaction between the Federal Government and the economy to provide for the smoothest possible accommodation with a severe petroleum supply interruption through reduced gasoline consumption. No accommodation to a 20-percent petroleum shortfall will be at all pleasant. Enormous costs will come rapidly into existence which cannot be fully cushioned by any system we can devise. But we have an obligation to design the system we do intend to use so that it has a chance to function. Coupon rationing has no such chance. The plan I am proposing does.

Mr. President, it is imperative that the administration and the Congress address the problem of coping with episodic and potentially severe disruptions in our supplies of imported oil. We now have no workable policy at all for these situations. Yet petroleum supply disruptions clearly are not unlikely events. On the contrary, the probability that a truly severe disruption in oil imports will occur sometime during the 1980's is probably close to 1.0. We cannot be unprepared for such an eventuality. We do not have a workable energy emergency contingency plan now, and this is the most important gap in our energy policy. I hope the legislation I am introducing today will assist in beginning the debate needed to close that gap.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 824

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as "the Emergency Motor Fuel Demand Rationing Act of 1981".

FINDINGS AND PURPOSE

SEC. 101. (a) The Congress finds that—

(1) it is very likely that a severe energy supply interruption occasioned by a sudden reduction in the availability of imported crude oil and refined petroleum products will occur sometime during the 1980's;

(2) such an interruption could have widespread disruptive effects on commerce among the several States and on the relations between the United States and foreign nations;

(3) in the event of such an interruption the President should have authority to establish an effective program to restrain energy demand and maintain orderly commerce in fuels and energy, in particular commerce in motor fuels;

(4) a standby gasoline and diesel fuel rationing plan, authorized under title II of the Energy Policy and Conservation Act, would provide the President with one method of allocating the supply of motor fuels among end users in the event of such an interruption, but such a plan will involve inevitable and considerable administrative cost and complexity; and

(5) a program delegating specific authority to the President to restrain motor fuel demand during a severe energy supply interruption through use of a motor fuel rationing fee, the proceeds of which are fully returned to end users of motor fuel, can provide an effective, workable, and equitable response to such an interruption while minimizing such administrative cost and complexity.

(b) It is, therefore, the purpose of this Act to—

(1) grant the President the authority during a severe energy supply interruption to establish, subject to appropriate congressional review, an emergency motor fuel rationing fee designed to restrain motor fuel demand to the extent of any shortage resulting from such interruption;

(2) to provide for the return of the proceeds of such a fee to each end user of motor fuel in proportion to the number of end user rights which would be assigned such user under the standby motor fuel rationing contingency plan approved under applicable provisions of the Energy Policy and Conservation Act, as amended (Public Law 94-163).

AMENDMENT TO THE EMERGENCY ENERGY CONSERVATION ACT OF 1979

SEC. 102. (a) The Emergency Energy Conservation Act of 1979 (Public Law 96-102) is amended by adding at the end thereof a new title as follows:

"TITLE IV—STANDBY MOTOR FUEL RATIONING FEE

"SEC. 401. FINDINGS AND PURPOSES.

"(a) FINDINGS.—The Congress finds that the President should have available the option during a severe energy supply interruption to establish, subject to congressional review, a program to restrain domestic demand for motor fuel through the use of a motor fuel rationing fee, the proceeds of which are fully returned to end users of such fuel.

"(b) PURPOSES.—It is the purpose of this title—

"(1) to grant the President standby authority, which may be made effective subject to congressional review, to establish during a severe energy supply interruption, a motor fuel rationing fee at a level which will insure an orderly market in motor fuel and will restrain demand to the extent required by the shortage of such fuel resulting from such interruption; and

"(2) to require that the proceeds of such a fee be returned to end users of motor fuel in proportion to the number of end user rights which would be assigned such user under the standby motor fuel rationing contingency plan approved by Congress under applicable provisions of the Energy Policy and Conservation Act (Public Law 94-163), as amended.

"SEC. 402. DEFINITIONS.

"For purposes of this title—

"(1) the terms 'international energy program', 'motor fuel', 'person', and 'State' have the meaning assigned such terms in title II of this Act.

"(2) the term 'United States' means all of the several States, the District of Columbia, the Commonwealth of Puerto Rico, and any territory or possession of the United States.

"(3) 'Secretary' means the Secretary of the Treasury.

"SEC. 403. EMERGENCY MOTOR FUEL RATIONING FEE.

"(a) The President may, in accordance with the provisions of this section, require the payment to the Secretary by each person engaged in the production or importation of motor fuel of an emergency motor fuel rationing fee which shall be levied on each gallon of such fuel produced in the United States or imported into the United States.

"(b)(1)(A) Except to the extent provided under subparagraph (B), the President may put the fee under subsection (a) into effect only if—

"(i) the President has found, in his discretion, that putting such fee into effect is required by a severe energy supply interruption or is necessary to comply with the obligations of the United States under the international energy program;

"(ii) the President has transmitted such finding to the Congress in accordance with section 551 of the Energy Policy and Conservation Act, together with a request to make such fee effective; and

"(iii) neither House of Congress has disapproved (or both Houses have approved) such request in accordance with the procedures specified in such section of such Act.

"(B)(i) The President may make such fee effective without regard to the finding required under subparagraph (A)(i) (and without regard to the requirements of subparagraph (A) (ii) and (iii)) if—

"(I) the President has transmitted to Congress in accordance with section 552 of the Energy Policy and Conservation Act a request to waive such requirements; and

"(II) such request has been approved by a resolution by each House of Congress within 30 days of continuous session of Congress after the date of its transmittal, in accordance with the provisions of such section 552 applicable thereunder to energy conservation contingency plans.

"(ii) Any authority to make such fee effective under clause (i) pursuant to a request under such clause shall terminate on the 60th calendar day after the date on which a resolution approving that request is adopted by the second House to have so approved that request.

"(iii) In applying the provisions of section 552 of the Energy Policy and Conservation Act for purposes of this subparagraph—

"(I) subsections (b), (d)(2)(B), and (d)(7) shall not apply;

"(II) the references to 60 calendar days and 20 calendar days shall be considered to refer to 30 calendar days and 10 calendar days, respectively; and

"(III) the references to any contingency plan shall be considered to refer to a request under this subparagraph.

"(c)(1) The President may, from time to time as he deems necessary, after stating in writing his reasons, adjust the fee under subsection (a) so as to insure that the level of the fee meets the requirements of subsection (d), and may remove the fee under subsection (a) at any time he finds, and states in writing the basis of his finding, that circumstances no longer justify its continuation.

"(2)(A) Unless the President finds, and states in writing the basis for his finding, in the case of a fee in effect under subparagraph (b)(1)(A), that continuing the fee in effect during any calendar quarter which begins more than 45 days after the transmittal to Congress of the finding under such subparagraph is required by a severe energy supply interruption or is necessary to comply with the obligations of the United States under the international energy program, the fee shall cease to be effective beginning the first day of that quarter.

"(B) Unless the President finds, and states in writing the basis for his finding, in the case of a fee in effect under subparagraph (b)(1)(B), that circumstances justify the continuation in effect of the fee during any calendar quarter which begins more than 45 days after first day the fee is effective under such subparagraph, the fee shall cease to be effective beginning the first day of that quarter.

"(3) If the fee under subsection (a) is reduced to zero, is removed or otherwise ceases to be effective under this subsection, the President may not thereafter require payment of such a fee except as provided in subsection (b).

"(d) Any emergency motor fuel rationing fee under subsection (a) shall be set by the President at the level which he determines appropriate based on a weighing of—

"(1) the need to restrain the consumption of motor fuel within the United States—

"(A) to the extent required by the shortage of such fuel reasonably expected to result from a severe energy interruption; or

"(B) to the extent necessary to comply with the obligations of the United States under the international energy program;

"(2) the need to capture and return to end users of motor fuel the portion of the price of such fuel which, in the absence of such fee, would result in revenue in excess of the unavoidable costs of producing or importing such fuel;

"(3) the need to maintain orderly commerce in refined petroleum products in the United States, to iminimize economic disruption and to provide, to the extent practicable, for an equitable distribution of such products among regions of the United States at equitable prices;

"(4) the need to moderate the effect of the consumption of motor fuel in the United States on world petroleum markets and on the price of crude oil and refined petroleum products in such markets; and

"(5) such other factors as the President deems important.

"(e) For purposes of this section:

"(1) The term 'severe energy supply interruption' means a national energy supply shortage which the President determines—

"(A) has resulted or is likely to result in a daily shortfall in the United States of gasoline, diesel fuel, and No. 2 heating oil supplies for a period in excess of 30 days (including reductions as a result of an allocation away from the United States under the international energy program) of an amount equal to 20 percent or more of projected daily demand for such supplies;

"(B) is not manageable under other energy emergency authorities, including any energy conservation contingency plans approved under section 201(b) of the Energy Policy and Conservation Act (42 U.S.C. 6261(b)) and any emergency conservation authority available under title II of this Act;

"(C) is expected to persist for a period of time sufficient to seriously threaten the adequacy of domestic stocks of gasoline, diesel fuel, and No. 2 heating oil; and

"(D) is having or can reasonably be expected to have a major adverse impact on national health or safety or the national economy.

"(2) For purposes of determining the shortfall of supplies under subparagraph (1)(A), the projected daily demand for gasoline, diesel fuel, and No. 2 heating oil supplies shall be the amount of such supplies that were available during any consecutive period of 12 calendar months which the President considers appropriate and which occurred during the 36-calendar-month period which immediately precedes the month in which such finding is made, such amount to be adjusted—

"(A) to take into account, for the period between the base period and the month in which the determination is made, the normal growth in demand for gasoline, diesel fuel, and No. 2 heating oil, as determined by the President on the basis of growth experienced during the 36-month period from which the base period was selected; and

"(B) to take into account seasonal variations in demand for such fuels, as determined by the President.

"(3) The term 'necessary to comply with obligations of the United States under the international energy program' refers to a necessity which the President determines to have impacts comparable to those provided for in paragraph (1) of this subsection.

"SEC. 404. PAYMENT OF FEE.

"(a) Any fee imposed under section 403, with respect to any amount of motor fuel subject to such fee, shall be paid by a producer (or, as the case may be, an importer) of such fuel at such time as the Secretary may prescribe, but not later than 90 days after the date of first sale of such fuel in commerce or the date of its importation, whichever is earlier.

"(b)(1) Any motor fuel held for sale on the effective date of a fee under section 403, shall be subject to the same fee as would apply to such fuel had it been produced or imported on such date.

"(2) Whenever motor fuel subject to a fee under section 403 has been sold by a producer or importer of such fuel before the date on which such fee has been removed (or has ceased to be effective) under section 403(c) and is held for sale, there shall be credited or refunded (without interest) to the producer or importer the amount of the fee, if—

"(A) a claim for such credit or refund is filed with the Secretary on or before the end of the 10-month period beginning with the month following the date on which such fee was removed (or ceased to be effective), based on a request submitted to such producer or importer before the end of the 7-month period beginning on such date by the person who held the fuel with respect to which the credit or refund is claimed, and

"(B) on or before the end of the 10-month period referred to in subparagraph (A), reimbursement has been made to such person by the producer or importer for the reduction in applicable fee on such fuel or written consent has been obtained from such person to allowance of such credit or refund.

No credit or refund under this paragraph shall be allowable with respect to motor fuel held for sale by a producer or importer of motor fuel.

"SEC. 405. EMERGENCY MOTOR FUEL RATIONING TRUST FUND.

"(a) There is established in the Treasury of the United States a trust fund to be known as the Emergency Motor Fuel Rationing Trust Fund (hereinafter referred to as the 'Trust Fund') consisting of such amounts as are appropriated to the Trust Fund under this section.

"(b) There shall be appropriated to the Trust Fund an amount equal to the sum of the amounts received in the Treasury as a result of the fee imposed under section 403 this title less those amounts disbursed directly to persons under subsection 406(b).

"(c) The Secretary shall transfer to the Trust Fund any amount appropriated under this subsection.

"(d) The amounts required to be transferred to the Trust Fund under subsection

(c) shall be transferred at least quarterly from the general fund of the Treasury to the Trust Fund on the basis of estimates made by the Secretary in consultation with the Secretary of Agriculture and the Secretary of Health and Human Services to cover disbursements under section 406 (excluding disbursements under subsection 406(b)). Proper adjustment shall be made in the amounts subsequently transferred to the extent prior estimates were in excess of or less than the amounts required to be transferred.

"(e) Amounts in the Trust Fund shall be available only to make the payments provided under section 406 of this title.

"SEC. 406. REBATE OF PROCEEDS OF FEE.

"(a) Each person entitled to assignment of rights, and evidence of such rights, entitling such person to obtain motor fuel in precedence to other persons not similarly entitled under the rationing contingency plan described in section 203 of the Energy Policy and Conservation Act (42 U.S.C. 6263) and approved by Congress under subsection (e) of such section, as amended, shall be entitled to a payment in an amount equal to the product of—

"(1) the number of such rights to which such person should have been entitled had such rationing contingency plan been in effect during the period of effectiveness of the fee under section 403 and

"(2) the value of such fee.

"(b) The Secretary, in consultation with the Secretary of Energy, shall by rule establish procedures whereby, to the maximum extent practicable, classes of person entitled to payments under subsection (a) may receive the payments to which such persons are entitled in the form of a reduction in Federal income tax collected as the source (under section 3402 of the Internal Revenue Code of 1954), reduced declarations (under section 6153 of such code), increased supplemental security income payments under title XVI of the Social Security Act, increased payments under section 415, 521, 541, or 542 of title 38, United States Code (relating to certain veterans' benefits), increased benefits under title III of the Crude Oil Windfall Profits Tax Act of 1980, or other method which the Secretary, with the concurrence of the Secretaries of Energy, Agriculture, and Health and Human Services, shall prescribe.

"(c)(1) There shall be allocated from the Trust Fund to each State monthly from the fee imposed under section 403 an amount that will satisfy the amount required under subsection (a) for persons residing in such State and determined to be necessary to disburse directly to persons residing in such State not compensated under procedures required by subsection (b).

"(2) The Secretary shall adjust the payment to each State to reflect any modifications necessary as a result of any difference between the projected and actual allocation.

"(3) The payment described in subsection (a) shall be made from funds received by each State under subsection (c), under regulations prescribed by the Secretary of the Treasury within 120 days after the date of enactment of this title, to each person residing in such State eligible to receive such a payment to the extent such person is not covered by subsection (b).

"(4) In order to qualify for any payment under section 406 of this title, the State shall establish to the satisfaction of the Secretary that it has a plan to disburse such funds which meets the requirements of this section.

"SEC. 407. PRICE AND ALLOCATION CONTROLS.

"(a) Notwithstanding any other provision of law the President may not make effective any rule, regulation, or order governing the price or allocation of motor fuel for any period during which a fee under section 403 is in effect.

"(b) The prohibition in subsection (a) may be waived by the President in his discretion for a period not to exceed 30 days beginning with the first day on which a fee under section 403 is in effect.".

(b)(1) Title III of the Emergency Energy Conservation Act of 1979 is amended by replacing the word "Act" wherever it appears with the phrase "title I and title II of this Act".

(2) The table of contents of the Emergency Energy Conservation Act of 1979 is amended by adding at the end thereof the following:

"TITLE IV—STANDBY MOTOR FUEL RATIONING FEE

"Sec. 401. Findings and purposes.
"Sec. 402. Definitions.
"Sec. 403. Emergency motor fuel rationing fee.
"Sec. 404. Payment of fee.
"Sec. 405. Emergency Motor Fuel Rationing Trust Fund.
"Sec. 406. Rebate of proceeds of fee.
"Sec. 407. Price and allocation controls.".●

By Mr. JEPSEN:

S. 825. A bill to amend the Internal Revenue Code of 1954 to allow the investment tax credit to certain individuals who purchase used section 38 property used for farming purposes from a related party; to the Committee on Finance.

USE OF THE INVESTMENT TAX CREDIT

● Mr. JEPSEN. Mr. President, today I am introducing legislation to correct a problem in the tax law with regard to use of the investment tax credit when otherwise eligible equipment or property is purchased from a close relative. Section 48(c) of the Internal Revenue Code of 1954 presently reads as follows:

(c) USED SECTION 38 PROPERTY.—

(1) IN GENERAL.—For purposes of this subpart, the term "used section 38 property" means section 38 property acquired by purchase after December 31, 1961, which is not new section 38 property. Property shall not be treated as "used section 38 property" if, after its acquisition by the taxpayer, it is used by a person who used such property before such acquisition (or by a person who bears a relationship described in section 179(d)(2)(A) or (B) to a person who used property before such acquisition).

(2) DOLLAR LIMITATION.—

(A) IN GENERAL.—The cost of used section 38 property taken into account under section 46(c)(1)(B) for any taxable year shall not exceed $100,000. If such cost exceeds $100,000, the taxpayer shall select (at such time and in such manner as the Secretary shall by regulations prescribe) the items to be taken into account, but only to the extent of an aggregate cost of $100,000. Such a selection, once made, may be changed only in the manner, and to the extent, provided by such regulations.

(B) MARRIED INDIVIDUALS.—In the case of a husband or wife who files a separate return, the limitation under subparagraph (A) shall be $50,000 in lieu of $100,000. This subparagraph shall not apply if the spouse of the taxpayer has not used section 38 property which may be taken into account as qualified investment for the taxable year of such spouse which ends within or with the taxpayer's taxable year.

(C) CONTROLLED GROUPS.—In the case of a controlled group, the $100,000 amount specified under subparagraph (A) shall be reduced for each component member of the group by apportioning $100,000 among the components members of such group in accordance with their respective amounts of used section 38 property which may be taken into account.

(D) PARTNERSHIPS.—In the case of a partnership, the limitation contained in subparagraph (A) shall apply with respect to the partnership and with respect to each partner.

(3) DEFINITIONS.—For purposes of this subsection—

(A) PURCHASE.—The term "purchase" has the meaning assigned to such term by section 179(d)(2).

(B) COST.—The cost of used section 38 property does not include so much of the basis of such property as is determined by reference to the adjusted basis of other property held at any time by the person acquiring such property. If property is disposed of (other than by reason of its destruction or damage by fire, storm, shipwreck, or other casualty, or its theft) and used section 38 property similar or related in service or use is acquired as a replacement therefor in a transaction to which the preceding sentence does not apply, the cost of the used section 38 property acquired shall be its basis reduced by the adjusted basis of the property replaced. The cost of used section 38 property shall not be reduced with respect to the adjusted basis of any property disposed of if, by reason of section 47, such disposition involved an increase of tax or a reduction of the unused credit carrybacks or carryovers described in section 43(b).

(C) CONTROLLED GROUP.—The term "controlled group" has the meaning assigned to such term by section 1563(a), except that the phrase "more that 50 percent" shall be substituted for the phrase "at least 80 percent" each place it appears in section 1563(a)(1).

What this means is that if a son were to purchase used section 38 property from his father he would be unable to claim the investment tax credit, even though such property would otherwise qualify if purchase from a nonrelated party. For purposes of determining which related parties are similarly affected by this restriction, the following persons are considered related:

(1) Members of the immediate family, including husband and wife, ancestors, and lineal descendants, but not including brothers and sisters (whether by whole or half blood);

(2) An individual and a corporation of which more than 50 percent in value of the outstanding stock is owned, directly or indirectly, by or for that individual;

(3) Certain corporations of which more than 50 percent of the value of the outstanding stock of each is owned, directly or indirectly, by the same individual;

(4) A trust fiduciary and a corporation of which more than 50 percent in value of the outstanding stock is owned, directly or indirectly, by or for the trust or by or for the grantor of the trust;

(5) The grantor and fiduciary, and the fiduciary and beneficiary of any trust;

(6) The fiduciaries of two different trusts, and the fiduciary and beneficiary of two different trusts, if the same person is the grantor of both trusts;

(7) Certain educational and charitable organizations and a person who, directly or indirectly, controls such an organization.

(8) A partnership and a partner owning, directly or indirectly, more than 50 percent of the capital interest or profits interest in the partnership;

(9) Two partnerships in which the same

persons own, directly or indirectly, more than 50 percent of the capital interest or profit interest; or

(10) Component members of the same group of controlled corporations (applying a more than 50 percent control test).

The scope of the relationship restrictions is such that the investment tax credit for used section 38 property will be unavailable after some of the most typical farm transactions. For example, credit would not be available for property which a child purchases from a parent or grandparent, since they are related as ancestors and lineal descendants. A challenge to this provision, on the ground that it denied the taxpayer equal protection of the law because the legislative classification excluding related taxpayers from investment credit is not rationally connected with a legitimate governmental interest, was unsuccessful (*Schelling* v. *United States*, 76–2 U.S.T.C.). Furthermore, property may be considered used by a person related to a prior user even though there is an intervening unrelated owner. Thus, credit was denied for property originally owned by an orchard farm corporation and later purchased from a bank which had acquired it at a mortgage foreclosure sale where the purchaser and the purchaser's father owned 90 percent of the farm corporation.

I understand entirely the reason why the law contains such restrictions on purchases of section 38 property by relatives. It was feared that relatives might buy and sell the same property back and forth many times, taking the investment tax credit on each occasion. This is a legitimate concern. But as it now reads, the law is unnecessarily restrictive and causes much difficulty, particularly in agriculture.

Therefore, I propose amending the law to allow the investment credit for one-time sales of the same piece of agricultural property, without regard to the related party restriction. Thus, a son could purchase a tractor from his father and claim the credit, but if the same tractor were resold back to the father the credit would be recaptured. I feel that this amendment would adequately protect against the kind of abuses which led to inclusion of the present restrictions in the law, while serving the purposes of the investment credit and not unnecessarily penalizing families engaged in agriculture.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 825

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) subsection (c) of section 48 of the Internal Revenue Code of 1954 (defining used section 38 property) is amended by adding at the end thereof the following new paragraph:

"(4) SPECIAL RELATED PARTY RULE FOR CERTAIN FARM PROPERTY.—

"(A) IN GENERAL.—In any case in which property used in the trade or business of farming is, after its acquisition by the taxpayer, used in the trade or business of farming by a qualified individual, paragraph (1) shall be applied without regard to the second sentence thereof.

"(B) APPLICATION ONLY TO ONE SALE.—For any particular item of property, subparagraph (A) shall only apply with respect to the first sale of that property to a qualified individual.

"(C) DEFINITIONS.—For purposes of this paragraph—

"(i) FARM.—The term 'farm' has the same meaning as such term used in section 2032A(e)(4).

"(ii) QUALIFIED INDIVIDUAL.—The term 'qualified individual' means an individual who is the spouse, ancestor, or lineal descendent of the individual using the property before its acquisition by the taxpayer.

"(D) LIVESTOCK USED FOR BREEDING PURPOSES.—For purpcses of this paragraph, livestock described in subsection (a)(6) shall be treated as property used in the trade or business of farming".

(b) The amendments made by subsection (a) shall apply to property acquired after December 31, 1981.●

By Mr. STEVENS:

S. 826. A bill to delinate the relationship of the Office of Special Counsel to the Merit Systems Protection Board; to the Committee on Governmental Affairs.

RELATIONSHIP BETWEEN THE OFFICES OF SPECIAL COUNSEL AND THE MERIT SYSTEMS PROTECTION BOARD

Mr. STEVENS. Mr. President, since enactment of the Civil Service Reform Act, there has been considerable confusion over the relationship between the Office of Special Counsel and the Merit Systems Protection Board. The confusion became so serious this past year that the Board sued the Special Counsel in Federal District Court requesting certain clarifications in the law.

Shortly after the suit was filed, I voiced my concerns to both the Board and the Special Counsel that a court was an inappropriate forum to resolve such differences. I urged my staff to work with the Board and the Special Counsel to resolve their differences and to draft legislation incorporating an agreement. After an agreement apparently was reached, negotiations broke down, and the agreement which the Senate attached to last year's continuing appropriation bill was dropped in conference.

Today I am introducing again in legislative form the agreement of last year. The bill simply delineates the relationship of the two offices. Mr. President, the Office of Special Counsel remains a battered agency. In fact, the law suit against it is still pending. The Office must be bolstered during this critical transition period. This bill seeks to clarify the law to allow the two agencies responsible for protecting the rights of Federal employees to direct their energies toward the employees rather than against one another.

I ask unanimous consent that the text of the bill be printed in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 826

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 1204 of Title 5, United States Code, is amended as follows:

(a) There is established within the Merit Systems Protection Board the Office of Special Counsel.

(b) The Special Counsel of such office shall be its chief executive and administrative officer.

(c) The Special Counsel shall be appointed by the President from attorneys, by and with the advice and consent of the Senate, for a term of 5 years. A Special Counsel appointed to fill a vacancy occurring before the end of a term of office of his predecessor serves for the remainder of the term. The Special Counsel may be removed by the President only for inefficiency, neglect of duty, or malfeasance in office.

(d) The relationship of the Office of Special Counsel to the Merit Systems Protection Board shall operate in the following fashion:

(1)(A) The Office shall have sole responsibility in the hiring, firing, training, evaluating and promoting of all office personnel, and all other basic personnel matters. The processing papers shall remain in the Office unless the Office and the Board agree otherwise.

(B) The Office shall promptly supply the Board with information regarding any and all personnel actions which obligate Government funds. The Board shall monitor all Office expenditures and shall immediately notify responsible Office personnel if any budgetary problems arise. Upon such notification, the Office shall promptly take appropriate corrective action.

(2) The Office shall submit to the Board all requests for the purchase or rent of equipment, furniture or space, or contract for services. The Board shall promptly notify the Office when funds for the purchase or rent of such equipment, furniture or space or contract for services have been obligated. The Office shall establish field offices. Authority to secure space for such field offices resides with the Board.

(3)(A) The budget of the Office shall be submitted to the Board for inclusion in the Board's budget request to the Office of Management and Budget (OMB) and Congress. The budget request of the Office shall be a separate line item appropriation. The Office's budget request shall not be substantively modified by the Board. The Board may make technical changes to the Office's budget submission to bring it into conformity with the style of the Board's overall budget package.

(B) If the Board disagrees with a substantive budget request submitted by the Office, the Board and the Office shall discuss the disagreement. If the Office and the Board cannot reach an agreement, the Board may attach an addendum to the Office's budget request to OMB and Congress explaining its disagreement. In such a case, the Office shall have opportunity to justify that particular portion of its request before OMB and Congress.

(4) The Office shall have direct access to Congress at all times. The Office shall coordinate legislative activities with the Board and attempt to avoid duplication of effort. The Office shall provide copies of prepared testimony for the Congress to the Board prior to the submission of such testimony to Congress. The Office shall submit to the Board for approval legislative changes the Office proposes to Congress, except legislative recommendations called for by section 1206(m) of this title.

(5) The Office may have its own public information function. It shall be responsible for disseminating information to the public regarding its existence and functions. Whenever practicable publications shall be submitted to the Board for comment prior to public release. The Office and the Board shall coordinate publications of information covering both the Office and the Board. The Office may use its own letterhead on all stationery and publications, but shall clearly indicate the Office's association with the Board.

By Mr. THURMOND (for himself, Mr. HATCH, Mr. DECONCINI, Mr. SIMPSON, Mr. HEFLIN, Mr. LAXALT, Mr. BAKER, Mr. BOREN, Mr. DENTON, Mr. HARRY F. BYRD, JR., Mr. DOLE, Mr. COCHRAN, Mr. EAST, Mr. LUGAR, Mr. ARMSTRONG, Mr. GARN, Mr. GRASSLEY, Mr. NICKLES, Mr. MURKOWSKI, Mr. HUMPHREY, Mr. HELMS, Mr. GOLDWATER, Mr. MCCLURE, Mr. PRYOR, Mr. JEPSEN, Mr. KASTEN, Mr. PRESSLER, Mr. ZORINSKY, Mrs. HAWKINS, Mr. MATTINGLY, Mr. WARNER, Mr. EXON, Mr. WALLOP, Mr. QUAYLE, Mr. ABDNOR, Mr. RUDMAN, Mr. SYMMS, Mr. HAYAKAWA, Mr. SCHMITT, Mr. BOSCHWITZ, Mr. DOMENICI, Mr. D'AMATO, Mr. DURENBERGER, and Mr. PROXMIRE):

S.J. Res. 58. Joint resolution proposing an amendment to the Constitution altering Federal fiscal decisionmaking procedures.

PROPOSED CONSTITUTIONAL AMENDMENT RELATING TO NEW FEDERAL FISCAL DECISIONMAKING PROCESSES

Mr. HATCH. Mr. President, following many months of deliberation, the Senate Judiciary Subcommittee on the Constitution last Congress approved Senate Joint Resolution 126, a proposed constitutional amendment to require the adoption of new budgetmaking processes by the Federal Government. During that time, five subcommittee members including Senator DECONCINI, Senator HEFLIN, Senator THURMOND, Senator SIMPSON, and myself consulted with our colleagues outside the subcommittee, economists, political scientists, constitutional scholars, and other interested individuals and organizations. The Senate Balanced Budget Caucus headed by Senator LUGAR, Senator BOREN, and Senator ARMSTRONG provided invaluable assistance to this effort.

The amendment represented a response to the nearly three dozen separate amendments that had been introduced by our colleagues last year and referred to the Constitution Subcommittee. It is also a response to the 30 States that have applied for a consitutional convention on this subject, as well as to the estimated 80 percent of the public who favor a balanced budget requirement for the Federal Government.

While a great deal of emphasis has been placed upon the new mood of budgetary restraint supposedly operating in Washington since the adoption of proposition 13 in California in June of 1978, it is clear to me that this mood is more apparent than real. The budget for fiscal year 1981, billed by its proponents as "lean and austere" would permit spending of more than $660 billion, an increase of approximately 15 percent over fiscal year 1980. This is a growth rate in a majority of the budgets that have been approved during the past. none-too-frugal, decade. Total budget authority would increase by more than 11 percent to $725 billion.

In addition, the deficit in the fiscal year 1981 budget is projected at more than $55 billion, not including an additional $23 billion in new off-budget outlays. This total deficit has been exceeded only twice in the history of our country. The fiscal years 1975–81 have seen the seven largest peacetime deficits in the history of our Nation. Since fiscal year 1970 alone, our National Government has incurred nearly $530 billion in new deficits, more than one-half the total national debt incurred in the history of our republic.

What have been the results of these policies? Have they stimulated or stabilized our economy in the way that the economists assure us they will? The results, in my opinion, are as follows:

Our Nation is suffering from the highest level of inflation in modern times;

Unemployment, which the economists have taught us is inversely related to inflation, has also remained high. Growing levels of inflation have not stimulated demand so that the economy operates at a fuller capacity;

The dollar is at an all-time low among international currencies. There is growing flight from the dollar as a means for transacting business in international markets;

Our national balance-of-payments debit is near a record high. There is growing domestic sentiment for protectionist policies which, in the long run are inevitably damaging to an economy.

Our Nation's productivity ranks last among developed, industrial nations. We save less and we invest less than virtually any other Western nation; and

Taxes continue to grow as a burden upon the American people. Taxes consume nearly 40 percent of the average worker's income.

Perhaps most importantly, the standard of living for the average American has remained stagnant during the past decade. There has been virtually no real growth in median income during this decade, with a majority of American families having less real after-tax spending power at the end of the decade than at its outset.

PREMISES OF THE AMENDMENT

A constitutional amendment is critically necessary at this time to effect a permanent measure of fiscal responsibility by Congress. It is necessary because our root problem is not simply the fact that there are too many Members of this body who do not understand the relationships between their actions and the state of the American economy. Although this number remains high, just as critical is the fact that all of our legislators operate in an institutional environment which encourages deficits, which encourages high levels of spending, and which encourages high levels of taxation. Senate Joint Resolution 126 (S.J. Res. 43 this Congress) is aimed at altering this institutional environment.

Senate Joint Resolution 43 is not designed primarily as an economic amendment: it is primarily an amendment that affects the political and institutional processes by which our Government determines economic policy. It avoids dictating or specifying particular economic results or outcomes.

The major premises of the amendment are twofold: First, it rests upon the assumption that the political and legislative processes ought to be entrusted to make specific economic and fiscal decisions. Second, it rests upon the assumption that the political and legislative processes cannot presently be entrusted to make these decisions in a fair manner because of political biases that exist within our system that favor higher levels of spending and higher levels of taxation.

Senate Joint Resolution 43 seeks to eliminate these biases and establish a more neutral budgetmaking environment. It does not seek to establish alternative biases—biases that I would personally favor—in behalf of reduced levels of spending and taxes. It is the primary objective of the amendment that the product of our budget process—and no specific budget process is written into the Constitution—will more fairly reflect public sentiment on spending and taxing. If, as I believe, public sentiment presently favors lower levels of spending and taxes, that is likely to result under this amendment. It is not likely to result, and has not resulted, under the present system largely because of the strucutral biases that exist within the present system.

What are these biases to which I refer and to which the amendment is addressed? There are three major ones that I would identify.

First, there is an inherent bias in our present economic process in behalf of higher levels of taxation. This results from the interplay of our tax system with either inflation or real economic growth. Because of this phenomenon of tax bracket creep, the Federal Government is insured an ever growing proportion of the national income. In the absence of any congressional action, revenues grow, from year to year, as a percentage of the economy. The public sector grows increasingly large, while the private sector is correspondingly diminished. Congress is required to take affirmative action if revenues are not to increase as a share of the national income.

Second, there is an inherent bias in our present economic process in behalf of higher levels of spending. This bias exists because of the political advantages to be gained from supporting spending programs and the lack of countervailing political advantages—even the political disadvantages—gained from opposing them. Because spending interests tend to be visible, articulate, and intense in focusing their attentions upon individual spending bills that are likely to accrue to their benefit, and because they are able to reward or punish legislators with their electoral support or nonsupport. it is to the advantage of such legislators to be sensitive and responsive to their concerns.

There is normally no similar constituency in opposition to such spending programs. Those who would logically be most concerned about higher levels of expenditures—the taxpayers—are diffused, unorganized, and politically inarticulate. They have no lobbying organizations as do the spending interests. Even if they are able to perceive the

nature of their self-interest on a given piece of legislation, it is virtually impossible for them to focus or any given program with the same intensity and passion of a beneficiary spending group. While such group may stand to gain millions or even billions of dollars for their relatively small constituencies, the individual taxpayer stands to lose nothing more than a few cents or a few dollars apiece on any single program. It is only when these programs are aggregated that the taxpayer begins to feel the impact of such spending.

At the present time, the political advantages gained through support for a particular program are not offset by the political disadvantages which would result from votes to reduce spending for other programs or from votes to increase taxes. The virtually unlimited access to deficit spending and the absence of any effective spending ceiling precludes the former, while the "tax bracket creep" phenomenon avoids the latter.

It is the primary objective of Senate Joint Resolution 43 to insure, for the first time that such political disadvantages inevitably attach to votes to increase spending. Congress would be free to increase spending, but only by voting to cut other spending programs or by voting to increase taxes.

PROVISIONS OF THE AMENDMENT

How does the proposed constitutional amendment seek to dilute these biases? Let me briefly analyze the amendment section by section.

Section 1 of the amendment would establish, as a constitutional norm, that the Government not spend more dollars than it has available. By requiring that Congress adopt a balanced Federal budget at the planning stage of the budget process, it seeks to reestablish the traditional linkage between revenues and expenditures—or what Professors James Buchanan and Richard Wagner have referred to as our "unwritten constitution". Spending dollars would have to be matched by tax dollars. The political cost-benefit equation that is biased toward spending, when deficits are the norm, would no longer prevail.

Under section 1, however, Congress could choose to incur deficits at any time upon a vote of three-fifths of the Members of each House duly chosen and sworn. If such a super-majority is convinced that Congress must run deficit budgets in order to meet emergencies or respond to changing economic circumstances, Congress may deviate from the balanced budget norm that is established by this section. Such a deficit budget, however—and the precise deficit level must be specified—would be adopted by an explicit rollcall vote on a resolution directed solely to establishing a deficit; it cannot be obscured by placing the balanced budget waiver in a popular pork barrel bill of some sort.

The fact also that the waiver vote, particularly if it is to provide for a substantial deficit level, will occur at the planning stage of the budget process insures that it will not be considered in the "emergency" circumstances that normally characterize votes on waiving the statutory debt ceiling. The vote will assume more of an unambiguous character with those inclined toward large deficits supporting the waiver and those not so inclined opposing it; there will be no overhanging threat of Government shutdown or collapse upon the defeat of a given level of deficit, or of any deficit at all.

Upon the establishment of a balanced budget for some fiscal year, Congress would be prohibited from passing and the President would be prohibited from signing bills which would cause the total expenditures for any year to exceed the expenditures specified in the budget for such year. Once an appropriation bill were considered that threatened, in cumulation with earlier appropriation bills, to exceed the expenditure ceiling, Congress would be required to reject the appropriation or approve—by a three-fifths vote—a revised budget.

Section 2 of the amendment states that receipts, as a proportion of the national income—and any aggregate index could be substituted so long as it remained reasonably related to national economic performance—are not to increase from year to year in the absence of specific votes to that effect by a constitutional majority of each House of Congress, and Presidential approval. Absolute levels of revenues could, of course, continue to rise with levels of inflation or real economic growth, but revenues as a proportion of the economy would be restrained.

The bias in our system in behalf of higher taxes would be eliminated. Congress could no longer acquiesce in a tax increase by the simple act of doing nothing. They could no longer reap the political effects of, and dissipate popular tax reduction sentiment by, occasionally approving tax reductions that did nothing but partially compensate for the hidden, automatic, and silent tax increases of "tax bracket creep." The burden would be upon Congress to approve, by an express vote, tax increases, rather than upon them to disapprove tax increases. A more neutral decisionmaking process would be established. Nothing would prevent Congress from approving tax increases, but they would have to be done above-board.

It is important to recognize the critical relationship between sections 1 and 2. Section 1 establishes the general balanced budget norm, while section 2 establishes that the budget will not be established at levels that consume ever higher proportions of the national product in the absence of clear congressional expression. The conjunction of these two sections also establishes what is in effect a spending limitation. In the absence of a congressional decision to increase taxes as a proportion of the national income, the balanced budget requirement of section 1 would operate to insure that spending would similarly remain stable as a proportion of the national income. The result would be a spending limitation, albeit an indirect spending limitation, similar to that contained in an amendment drafted during the last Congress by Senator HEINZ and Senator STONE in conjunction with the National Tax Limitation Committee.

This spending ceiling—indeed any spending ceiling—would have the immensely desirable effect of altering the so-called concentrated benefit—dispersed cost bias in behalf of higher levels of spending that was earlier referred to. The entire psychology of the congressional spending process would be altered. Under the present system, each of the spending interests competes with the taxpayer to raise the total ante in the Federal Treasury. As a result of the "concentrated-benefit" phenomenon, spending interests more often than not prevail. Under a system, however, in which spending ceiling is established, these same spending interests would suddenly be competing with each other in order to insure themselves a certain proportion of a fixed ante in the Federal Treasury. The spending interests would not only have to convince Congress that their pet program merited funding at a certain level, but for the first time, would have to establish, in addition, the priority of their program. A fixed spending ceiling would require that Congress think in terms of budget priorities; an element of competition among the spenders would be introduced into the budgetary process.

Section 3 of the amendment would allow Congress, by a simple majority vote to waive the provisions of section 1 with respect to any single year in which a declaration of war was in effect. This would eliminate the anomaly by which a simple majority could declare war but might find themselves with insufficient funds to pursue the war for want of a three-fifths majority.

Section 4 contains language common to recent constitutional enactments that clarifies that Congress has the authority to enforce the provisions of this amendment by appropriate legislation. Indeed, given the limitations of the constitutional process to provide specific directions and details to Congress on matters within the scope of this amendment, I would expect that enacting legislation would be extremely important in insuring its efficient and effective implementation.

Finally, section 5 specifies the effective date of the amendment: The first day of January of the second calendar year beginning after its ratification.

SUMMARY

Thus, the proposed amendment is a combination balanced budget-tax limitation-spending limitation. It is a balanced budget amendment through the express provisions of section 1. It is a tax limitation amendment through section 2 which prohibits increases in revenues as a proportion of national income without a vote; it is also a tax limitation amendment in the sense that it eliminates the "indirect tax" of deficit spending, a tax that is reflected either in future inflation or future interest costs. Finally, it is a spending limitation as a result of the conjunction of sections 1 and 2.

Yet this is all achieved through an amendment that strikes me as being more in the nature of a constitutional

amendment than many of the more explicit spending and tax reduction amendments. The amendment is succinct, relatively easy to understand, free of essentially arbitrary numbers, and relatively free of arcane economic jargon. Most importantly, its purpose is that of a constitutional amendment—it seeks to perfect our legislative processes so that the democratic will may be more accurately reflected in an area—budget decisionmaking—where such democratic input is most essential. It seeks to do this by ridding the budget process of opportunities for illusion and concealment, and enhancing levels of political accountability. Section 1 addresses the illusion that there is such a thing as a free lunch, that Congress can spend dollars that it does not have without cost. Section 2 addresses the dishonesty of increas ng the tax burden upon the citizenry covertly, and through inaction. As one witness has testified about this amendment, its primary contribution is that it "increases the flow of economic information in the political marketplace."

In passing, I would like to say just a few words about a criticism that has commonly been made against constitutional amendments generally on this subject matter.

It has often been suggested that such amendments can be relatively easily circumvented if desired. This results, we are told, from the fact that no amendment in this area can hope to fully contemplate the variety of fiscal monetary, and regulatory arrangements that can be entered into by the legislative branch. No amendment can be precise enough to define economic terms with sufficient precision to preclude opportunities of circumventing the spirit of an amendment in this area.

In response, I would suggest that most amendments—or statutes—of human contrivance can also be undermined or distorted by human contrivance. Some of us might suggest that this has already occurred with respect to earlier amendments that were probably considered airtight by their drafters. If there is a will to ignore even a constitutional amendment, I have little doubt that an ingenious Congress or administration can probably do this. The value of a constitutional amendment, despite this fact, is that it elevates to constitutional status a broad principle of government—that of fiscal responsibility and accountability. It thereby serves as a permanent beacon by which Congress and the President can—and must—judge their programs and policies.

Congress, it seems to me, is expected always to act in accordance with both the terms of the Constitution and the spirit of the Constitution. While it is not always easy to enforce this responsibility against either Congress or the President, it nevertheless remains their responsibility. It is not simply the judicial branch that has responsibility for interpreting the Constitution; the legislative branch has a concurrent responsibility to do this.

I am frankly uncomfortable with the attitude that we ought not to propose a constitutional amendment because it is capable of circumvention. I am confident that the public will be capable of identifying those Members of the Congress and the Senate who will perpetually be seeking ways to circumvent. If circumvented, it will certainly not be the first constitutional amendment to be circumvented; if circumvented it will still be justified as an exercise in placing in the organic law of our land an enduring and permanent principle of sound and honest economic policy.

Mr. President, more than 175 years ago, our third President, Thomas Jefferson, remarked:

> Of all the perils facing the nation, public debt is the greatest of the dangers to be feared.

I believe that time has proven him to be correct. The experience of civilization since Jefferson's day has also confirmed the direct and intimate relationships between economic stability and political stability. As this Nation approaches the bicentennial of its Constitution, it is critical that that Constitution recognize the growing and fundamental nature of our Nation's economic dilemma.

I ask unanimous consent that the text of the joint resolution be printed in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 58

Resolved by the Senate and House of Representatives of the United States in Congress Assembled, (two-thirds of each House concurring therein), That the following article is proposed as an amendment to the Constitution of the United States, which shall be valid to all intents and purposes as part of the Constitution if ratified by the legislatures of three-fourths of the several States within seven years after its submission to the States for ratification:

"ARTICLE—

"SECTION 1. The Congress shall adopt for each year a budget, which shall set forth the total receipts and outlays of the United States. No budget in which total outlays exceed total receipts shall be adopted, unless three-fifths of each House of Congress duly sworn and elected approve such budget by a rollcall vote directed solely to that subject. The Congress shall not pass and the President shall not sign any bill which would cause the total outlays for any year to exceed the total expenditures in the budget for such year.

"SEC. 2. The receipts in any year shall not be retained for use of the Treasury in an amount which exceeds as a proportion of the national income, that retained for the prior year, unless a bill directed solely at approving a specific increase in such proportion has been passed by a majority of each House duly sworn and elected and such bill has become law.

"SEC. 3. The Congress may waive the provisions of sections 1 and 2 with respect to any single year in which a declaration of war is in effect.

"SEC. 4. The Congress shall have the power to enforce this article by appropriate legislation.

"SEC. 5. This article shall take effect on the first day of January of the second calendar year beginning after its ratification.".

ADDITIONAL COSPONSORS

S. 259

At the request of Mr. GOLDWATER, the Senator from Florida (Mrs. HAWKINS), and the Senator from New York (Mr. D'AMATO) were added as cosponsors of S. 259, a bill to repeal the earnings ceiling of the Social Security Act for all beneficiaries age 65 and older.

S. 267

At the request of Mr. DECONCINI, the Senator from Indiana (Mr. LUGAR) was added as a cosponsor of S. 267, a bill to amend title 28, United States Code, to provide that the Federal tort claims provisions of that title are the exclusive remedy in medical malpractice actions and proceedings resulting from federally authorized National Guard training activities, and for other purposes.

S. 349

At the request of Mr. HART, the Senator from North Dakota (Mr. BURDICK) was added as a cosponsor of S. 349, a bill to amend title 38, United States Code, to establish certain procedures for the adjudication of claims for benefits under laws administered by the Veterans' Administration; to apply the provisions of section 553 of title 5, United States Code, to rulemaking procedures of the Veterans' Administration; to provide for judicial review of certain final decisions of the Administrator of Veterans' Affairs; to provide for the payment of reasonable fees to attorneys for rendering legal representation to individuals claiming benefits under laws administered by the Veterans' Administration; and for other purposes.

S. 388

At the request of Mr. HATCH, the Senator from North Dakota (Mr. BURDICK) was added as a cosponsor of S. 388, a bill to reinstate the tax treatment with respect to annuity contracts with reserves based on a segregated asset account as they existed prior to issuance of Revenue Ruling 77–85.

S. 445

At the request of Mr. MITCHELL, the Senator from Alabama (Mr. HEFLIN), and the Senator from Michigan (Mr. LEVIN) were added as cosponsors of S. 445, a bill to establish a State set-aside system for propane, middle distillates, motor gasoline, residual fuel oil, and aviation fuels, and for other purposes.

S. 498

At the request of Mr. HART, the Senator from Massachusetts (Mr. KENNEDY), the Senator from Montana (Mr. MELCHER), and the Senator from New York (Mr. MOYNIHAN) were added as cosponsors of S. 498, a bill to amend the Internal Revenue Code of 1954 to provide a tax credit to homebuilders for the construction of residences incorporating certain solar energy utilization characteristics.

S. 540

At the request of Mr. HUDDLESTON, the Senator from Indiana (Mr. LUGAR) was added as a cosponsor of S. 540, a bill to amend the Clean Air Act to provide that the voluntary conversion from oil or gas to an alternate fuel by a stationary source shall be treated in the same man-

ner as a conversion ordered under the Energy Supply and Environmental Coordination Act of 1974 or the Powerplant and Industrial Fuel Use Act of 1978.

S. 541

At the request of Mr. HUDDLESTON, the Senator from Indiana (Mr. LUGAR) was added as a cosponsor of S. 541, a bill to amend the Clean Air Act with respect to temporary emergency suspension of implementation plan provisions.

S. 542

At the request of Mr. HUDDLESTON, the Senator from Indiana (Mr. LUGAR) was added as a cosponsor of S. 542, a bill to provide that major stationary sources complying with all applicable emission limitations and standards of performance established pursuant to the Clean Air Act shall not be subject to any more stringent limitations or standards for a period of 10 years.

S. 550

At the request of Mr. PACKWOOD, the Senator from South Carolina (Mr. THURMOND) was withdrawn as a cosponsor of S. 550, a bill to amend the Internal Revenue Code of 1954 to provide a Federal income tax credit for tuition.

S. 569

At the request of Mr. JEPSEN, the Senator from North Dakota (Mr. ANDREWS), the Senator from Nevada (Mr. LAXALT), the Senator from Alabama (Mr. HEFLIN), the Senator from Indiana (Mr. LUGAR), the Senator from South Carolina (Mr. THURMOND), the Senator from Mississippi (Mr. COCHRAN), and the Senator from Kansas (Mrs. KASSEBAUM) were added as cosponsors of S. 569, a bill to amend the Internal Revenue Code of 1954 to provide an investment tax credit for certain soil and water conservation expenditures.

S. 603

At the request of Mr. ZORINSKY, the Senator from New Mexico (Mr. SCHMITT), the Senator from Kentucky (Mr. HUDDLESTON), the Senator from Nebraska (Mr. EXON), and the Senator from North Dakota (Mr. BURDICK) were added as cosponsors of S. 603, a bill to amend title 17 of the United States Code to exempt nonprofit veterans' organizations and nonprofit fraternal organizations from the requirement that certain performance royalties be paid to copyright holders.

S. 613

At the request of Mr. THURMOND, the Senator from Oklahoma (Mr. NICKLES) was added as a cosponsor of S. 613, a bill to amend section 1951 of the United States Code, and for other purposes.

S. 739

At the request of Mr. DURENBERGER, the Senator from Alabama (Mr. HEFLIN) and the Senator from Maryland (Mr. MATHIAS) were added as cosponsors of S. 739, a bill to amend the Internal Revenue Code of 1954 to make the investment credit for railroad property refundable.

S. 777

At the request of Mr. TOWER, the Senator from North Carolina (Mr. HELMS) was added as a cosponsor of S. 777, a bill to amend the Federal Water Pollution Control Act to restrict the jurisdiction of the United States over the discharge of dredged or fill material to those discharges which are into navigable waters, and for other purposes.

AMENDMENTS SUBMITTED FOR PRINTING

CONCURRENT RESOLUTION ON BUDGET RECONCILIATION

AMENDMENT NO. 20

(Ordered to be printed and to lie on the table.)

Mr. WEICKER submitted an amendment intended to be proposed by him to the concurrent resolution (S. Con. Res. 9) revising the congressional budget for the U.S. Government for the fiscal years 1981, 1982, and 1983.

AMENDMENT NO. 21

(Ordered to be printed and to lie on the table.)

Mr. CHAFEE submitted an amendment intended to be proposed by him to the concurrent resolution (S. Con. Res. 9), supra.

AMENDMENT NO. 22

(Ordered to be printed.)

Mr. RIEGLE proposed an amendment to the concurrent resolution (S. Con. Res. 9), supra.

NOTICES OF HEARINGS

COMMITTEE ON THE BUDGET

Mr. DOMENICI. Mr. President, the Senate Budget Committee will hold 4 days of hearings from Tuesday, March 31, 1981, to April 3, 1981 to discuss matters relating to the first concurrent budget resolution for fiscal year 1982 in room 6202 of the Dirksen Senate Office Building. Testifying before the committee on Tuesday morning, March 31, 1981 at 10 a.m. will be Casper Weinberger, Secretary of Defense, Gen. David Jones, Chairman of the Joint Chiefs of Staff, and DOD Comptroller, Jack Borsting. At 1:30 that afternoon Dr. Alice Rivlin, Director of the Congressional Budget Office, will present her agency annual report to the committee. At 3 p.m., Milton Socolar, Acting Comptroller General of the U.S. General Accounting Office, will testify.

On Wednesday, April 1, 1981, at 9:30 a.m., the Secretary of the Treasury, Donald Regan, will testify, followed by Mr. Murray Weidenbaum, Chairman of the President's Council of Economic Advisors, at 11 a.m. That afternoon an economic panel consisting of Mr. Alan Reynolds, vice president of the First National Bank of Chicago, Dr. Walter Heller, regents professor of economics at the University of Minnesota, and Dr. Rudy Penner, of the American Enterprise Institute, will present their views to the committee on matters relating to the first concurrent budget resolution for fiscal year 1982.

On Thursday, April 2, 1981, at 10 a.m., a panel consisting of Ms. Peggy Taylor, of the AFL–CIO, Representative WALTER FAUNTROY, chairman of the Congressional Black Caucus, Mr. Jack Carlson, executive vice president and chief economist for the National Association of Realtors, and Mr. Richard Lesher, president of the U.S. Chamber of Commerce, will discuss issues of national priority. That afternoon at 2 p.m. Ms. Marion Wright Edelman, president of the Children's Defense Fund, will appear with two other witnesses, yet to be announced.

On Friday, April 3, 1981, State and local leaders will meet with the Members at 10 a.m. They are: Gov. Richard Snelling, chairman of the National Governors Association, Mayor Richard Hatcher, chairman of the Conference of Mayors, and Mr. Roy Orr, chairman of the National Association of Counties.

The final session of hearings will begin Friday afternoon at 2. Witnesses appearing will be Senators HARRISON WILLIAMS of New Jersey and DENNIS DECONCINI of Arizona and Representative HENRY REUSS, chairman of the Congressional Joint Economic Committee.

For further information, please contact Mr. Bill Stringer of the Budget Committee staff at 224–0538.

SUBCOMMITTEE ON TAXATION AND DEBT MANAGEMENT

Mr. PACKWOOD. Mr. President, the Subcommittee on Taxation and Debt Management of the Senate Finance Committee will hold a hearing at 10 a.m. on March 30, 1981. I have scheduled seven bills for the hearing. The seven bills are:

One and two, S. 388, introduced by Senator HATCH and Senator TOWER, and S. 446, introduced by Senator SYMMS and Senator LUGAR, relating to taxation of annuities;

Three, four, and five, S. 464, introduced by Senator DURENBERGER, and S. 500 and S. 501, introduced by Senator MOYNIHAN, relating to the payout requirement applicable to private foundations;

Six, S. 476, introduced by Senator DURENBERGER and Senator BOSCHWITZ, relating to the taxation of private foundations constituting bank holding companies; and

Seven, S. 499 introduced by Senator MOYNIHAN, relating to the taxation of FCC-ordered dispositions of radio stations.

The purpose of this statement is to briefly explain the issues raised by these bills. This may help you chart the progress of tax legislation before the Taxation Subcommittee. It also helps assure greater public awareness of tax amendments coming before a hearing.

ANNUITIES BILLS—S. 388 AND S. 446

S. 388, introduced by Senators HATCH and TOWER, S. 466, introduced by Senators SYMMS and LUGAR, would bar the Internal Revenue Service from enforcing Revenue Ruling 77–85 and Revenue Ruling 80–274 regarding investment annuities and wraparound annuities. The effect of the bills would be to return to Internal Revenue positions issued prior to the two revenue rulings.

PRIVATE FOUNDATIONS PAYOUT REQUIREMENTS, S. 464, S. 500, AND S. 501

S. 464, introduced by Senator DURENBERGER, and S. 500 and S. 501, introduced by Senator MOYNIHAN, change the payout requirement for private foundations.

Under current law, a private foundation is required to distribute currently

for its charitable or other exempt purpose the greater of 5 percent, or the value of its investment assets or net income (code sec. 4942).

S. 464 amends this by deleting the requirement that a private foundation distribute net investment income in excess of 5 percent of its investment assets. S. 501 is identical to this provision in S. 464.

S. 464 also makes three other changes in tax rules applicable to private foundations relating to expenditure responsibility and the definition of disqualified persons.

S. 500, introduced by Senator MOYNIHAN as an alternative to S. 501, would retain the 5-percent payout requirement but reduce the amount of investment income required to be distributed in excess thereof by the amount of income attributable to inflation. As a result, a private foundation would be required to distribute the greater of its inflation-adjusted income or its minimum investment return.

SPECIAL DISTRIBUTION RULE FOR PRIVATE FOUNDATIONS CONSTITUTING BANK HOLDING COMPANIES—S. 476

S. 476, introduced by Senators DURENBERGER and BOSCHWITZ, provides a special valuation rule for purposes of determining the distribution requirement in the case of a private foundation constituting bank holding companies.

The bill would provide a special rule for valuation of securities and bank-related companies for purposes of minimum investment return. The value of such securities would be determined by capitalizing the dividends paid by these banks and bank companies at a rate of 6 percent, that is, by multiplying the dividends by 16⅔.

The principal intended beneficiary of this bill is the Otto Bremer Foundation of Minneapolis, Minn.

ROLLOVER OF GAIN ON FCC-ORDERED DISPOSITION OF BROADCAST PROPERTY

S. 499

S. 499, introduced by Senator MOYNIHAN, amends rules relating to rollover gain on FCC-ordered disposition of broadcast property.

In Revenue Ruling 78–269, the Internal Revenue Service held that gain is not recognized under code sections 171 and 1033 where a corporation divests itself pursuant to an FCC order and certification of stock in a newspaper publishing company, and reinvests in stock of a television broadcasting station. However, in a later "private letter" ruling, the Service held that gain must be recognized for a corporation pursuant to an FCC order and certification, divests itself of a television station and reinvests in newspaper stock. The effect of the bill is to reverse this latter Internal Revenue Service ruling.

The amendments made by the bill would be intended to apply to the FCC-required disposition of television station WWNY in Watertown, N.Y., by Johnson Newspaper Corp., and other similarly situated taxpayers whose disposition proceeds are reinvested in a newspaper.

ADDITIONAL STATEMENTS

AN OPEN LETTER FROM THE ELDERLY OF AMERICA TO PRESIDENT REAGAN

● Mr. GOLDWATER. Mr. President, no group in society feels the brunt of inflation more severely than elderly persons, who are scraping to get by on retirement incomes. Judging by the mail and telephone calls I am getting from older persons, I see a great outpouring of support for President Reagan's economic recovery plan. These sensible people know that if we can succeed in bringing down inflation from double digit rates to a point that is below the rate of growth of the gross national product—which is the aim of the President's program—retired people will benefit tremendously.

At the same time, many older persons rightfully ask just how the President's plan will specifically affect them, and I answer that in my opinion the President has bent over backwards to make this program fair. I know the President is sensitive to the special needs of retired persons and, to offer a case in point, I will mention that the administration has firmly rejected all thoughts of reducing the cost-of-living increases awarded annually to persons receiving social security checks.

It is also my impression that the President's plan will preserve the basic purpose of social security as a pension or annuity earned by workers who have paid into the system during a lifetime of employment.

Mr. President, to give an idea of what older persons are thinking about, I ask that a weekly column for, to, and about Arizona's elderly citizens, written by John Burnham of Tucson, may appear at the close of my statement. This particular column is an open letter to President Reagan, and it has attracted considerable favorable comment from all over my State. I commend this concise, but thoughtful, article to the attention of my colleagues.

The article follows:

COMMONSENSE FOR SENIORS

(By John Burnham)

Dear President Reagan: We are solidly behind you in your effort to cut out waste and unneeded expenditures. Nobody wants to see our nation go bankrupt.

We have seen the multiplicity of public relations people swarming through every department of government, every agency and bureau, often painting those agencies and departments in rosier hues than they sometimes deserve, seeking to justify greater growth and fatter budgets for those agencies.

We have seen so-called research on far-out esoteric subjects which can't possibly ever be of practical use.

We have seen waste and spoilage and graft in foreign aid programs as our nation defies all logic by trying to make people love us by placing them under obligation to us. (Yet every experience of life has proven there is no greater bitterness than that of one placed under an obligation he cannot repay.)

We know about the waste in government travel—billions of dollars last year, plus 400 million dollars spent just to process travel vouchers.

We have seen unjustified subsidies given to private businesses, and a proliferation of laws and rules and regulations to give special aid to those unable to stand on their own commercial feet.

We really hate, Mr. President, to join that growing army of special interest groups mounting a campaign against your efforts, with their battle cry of "Tighten the other fellow's belt, not mine." Yet we find ourself doing so, a little bit uncomfortable at the company we keep as we do so.

Mr. President, the one group of Americans which has borne the brunt of inflation is us elderly. We can't raise prices for we have nothing to sell. We can't strike for a raise because we no longer work. We cannot get a rate increase, as every utility in the land is doing.

We worked our 40 or 50 years in the belief that our little savings were safe. We paid for our homes, educated our children, paid taxes, supported all the institutions of government from the local level up to Washington.

Today our 1940 dollar is—through no fault of our own—worth only a thin dime. We have no way of changing that, for our earning years are over.

So please, Mr. President, lend a compassionate ear and save from your sharp ax those agencies and services which watch over us.

You have assured us that Medicare and Social Security changes will not affect those of us now helped by such service. We hope the same kindly consideration will extend to the Administration on Aging, and the funding for our state and Area Agencies on Aging.

The elderly of America, Mr. President, have been a fiercely independent breed. Now, after their years of earning are over, inflation has made them an endangered species. They have a special need, and are especially deserving. We hope you will look upon them with compassion.●

EXPORT TRADING COMPANIES

● Mr. CHAFEE. Mr. President, when we discuss measures to aid or promote exports, we usually focus on the effect upon business, jobs, and the economy. We have rarely focused on the benefit to consumers. In a recent interview with Consumers for World Trade, Senator JOHN HEINZ observed that beyond providing more jobs, additional exports will reduce our trade deficit and strengthen the dollar. This means that consumers will pay less for those goods we import.

Consumers for World Trade apparently agrees. In testimony before the Senate Banking Subcommittee on International Finance, on legislation to promote the formation of export trading companies, the organization urged passage of the bill. They stated that the legislation would represent "an important signal to our trading partners that the United States is committed to a more open world trade system."

Mr. President, as chairman of the Banking Subcommittee on Consumer Affairs, I am particularly interested in the views of consumers. I ask that the text of the CWT interview with Senator HEINZ be printed in the RECORD.

The text follows:

CWT INTERVIEW WITH SENATOR HEINZ

CWT. Senator Heinz, you've just introduced Export Trading Companies Legislation. Why are export trading companies so important to our economy?

Senator HEINZ. We are faced with a very heavy balance of payments deficit. It has been in the neighborhood of 30 billion dollars a year, for several years. And while the

strengthening of the dollar is good news for us in terms in inflation, it can result in our export problems becoming worse, particularly with respect to manufactured goods. We not only need support for our traditional export activities, such as the Export-Import Bank, but we must recognize that the world around us, in which we are interdependent, has changed dramatically in the last 20 years, and the forms of competition out there demand that we change accordingly. Export trading companies are designed to accommodate that change and take advantage of it in a way we haven't done so far—primarily for our small- and medium-sized manufacturers and providers of services who, up to this point, simply have found the U.S. market a much more attractive place to do business.

CWT. What are the more technical reasons for creating export trading companies?

Senator HEINZ. On the technical side, the reason we need the export trading companies legislation is to deal with two main issues—the ability to provide financial support for export trading companies and the need to have a very clear understanding of the extent which trading companies formed under the Webb-Promerene Act would be subject to antitrust problems. We accommodate the first by permitting banks, under certain circumstances and with appropriate approvals of the bank regulators, to invest in and to be equity owners in trading companies. In this way we believe banks will become actively interested in helping form and finance trading companies. And we have received many indications from banking institutions that they, in fact, intend to do so.

With respect to the antitrust problems that people have found operating under the existing Webb-Pomerene, there are two. First, as Webb-Pomerene was written, it did not include services. But we include services in our expanded definition—not just hard goods as it were. In today's export environment the provision of services is often essential to the export of goods. To draw an artificial line is only to shoot ourselves in the foot.

The other problem with Webb-Pomerene is that it has been difficult for many people using it to get a clear reading from the Justice Department as to when they would or wouldn't be subject to antitrust enforcement and penalties either by the government or to suits that can, under existing law, be brought by third parties with retroactive damages. It is the retroactive damages after you have been doing business for 4 or 5 years that obviously are a cause for great uncertainty.

What our bill does is to streamline the procedures without changing the substance of antitrust law—to continue enforcement of Webb-Pomerene by the Justice Department, but provide that the Commerce Department take the lead in setting up criteria under which the limited antitrust exemption will be granted. We feel that we can get more rapid and more certain certification once we can exempt the trading companies from retroactive penalties, because the Justice Department will know in advance what activities they intend to engage in. If the government does not believe that the trading companies should be engaged in these activities, then certification simply wouldn't be granted. Activities outside those covered by the certificate, of course, would not be immune.

CWT. What is the Administration's position with respect to export trading companies?

Senator HEINZ. They strongly support the bill. Secretary Baldrige of the Commerce Department testified last week on behalf of all the Federal departments—Treasury, Justice, the United States Trade Representative—and indicated the Administration felt this was an extremely important issue and one they would like to see moved through the Senate and the House as quickly as possible. This is in stark contrast, I might add, to the difficulties we had with the previous Administration in getting any point of view whatsoever. The position of the Reagan Administration was taken within three and a half weeks of their taking office. It took us three and a half years to achieve a somewhat comparable result with the Carter Administration.

CWT. Do you think that bank involvement will create the same stumbling block in the House that it did last year?

Senator HEINZ. The Senate has had some advantages, in considering this legislation, over the House. Senator Stevenson and I had held three years of hearings involving export trading companies, specifically, and a variety of issues surrounding our export potential, in general. The legislation was easily moved through the Senate—passed by a vote of 77 to 0. But, until shortly before that time, the House really had not had the opportunity to carefully consider the legislation. A House bill was only introduced in 1980 which gave us a two year advantage in the Senate. It was also referred to three committees on the House side, complicating the procedural situation. We were fortunate in the Senate in that it was referred to only one committee—Banking. It is my feeling that by our moving early in the Senate and passing the legislation as quickly as possible, that the House will have sufficient time during the 97th Congress to hold the necessary hearings, to acquaint themselves with the necessary issues and, hopefully, to come to the same decisions that we have on this side.

CWT. What kinds of support has the legislation received from the private sector?

Senator HEINZ. It seems to have very broad and wide support. We have gotten very good support from the medium-sized and smaller manufacturers. We have gotten support from the people who are now doing international business—the exporters, the freight forwarders, the people who do the financing of exports, including the banks. Of course, this legislation makes special provisions for banks to participate in export trading companies and that is the issue on which people have had to reassure themselves the most.

It is our view that the essential element that makes an export trading company successful is its ability to pay its suppliers cash on normal short-terms and then finance the export which is bought by the importer in a foreign country and then finance the importer until he resells the product. That means that the ability to finance is central to the ability of a trading company to do the job. Banks obviously have a good deal of money for financing and that is why we believe they have to be an integral part of and allowed to participate in trading companies, if we are going to have financially viable trading companies.

CWT. How will American export trading companies compare to those in other parts of the world?

Senator HEINZ. When we look at the rest of the world, it is worth noting that the Japanese trading companies are mammoth enterprises. The Mitsubishi Trading Company, the largest world-wide, is a 60 billion dollar enterprise. And other major trading companies such as Mitsui are all doing 10 or 15 billion dollars worth of business a year. We are talking about the need to have a lot of staying power. What we are proposing is a good deal more modest than what the Japanese or the British have accomplished, but I do believe very effective.

CWT. With respect to your home state of Pennsylvania, what kinds of products would the small- and medium-sized businesses be likely to export?

Senator HEINZ. There is an enormous list of potential items that could be exported. I would imagine synthetic textiles and apparel people would be particular beneficaries of this legislation. And it would be especially good for areas such as Philadelphia, where there are concentrations of textile and apparel people. It would be a mistake, however, to think that only ocean port cities would benefit. Indeed, we have had testimony that many of our inland water ports such as St. Louis will be major beneficaries because of the enormous quantity of goods that move on our inland waterways. We have one of the great inland waterway systems in the world and that means that this will be legislation with truly national benefits.

CWT. How will export trading companies affect the consumer?

Senator HEINZ. I think they would help the consumer in two ways. First, they would create more jobs independent of the Federal government having to create those jobs. That means lower taxes. That means a healthier economy and more opportunities for people. Every billion dollars worth of export creates 40,000 to 50,000 jobs. The second benefit is that we will have a stronger dollar. We'll be able to export more and reduce our trade deficit. That will strengthen the dollar and that means we will be able to buy more cheaply those things that we import.●

BYELORUSSIAN INDEPENDENCE DAY

● Mr. METZENBAUM. Mr. President, 63 years ago, on March 25, 1918, the people of Byelorussia declared their freedom from centuries of Russian domination and opened a brief, but a well-remembered, period of national independence.

That anniversary cannot be observed in the Soviet Union today, but in this country, more than a million Americans of Byelorussian ancestry take this occasion to remind the rest of us the despotism under which their friends and relatives in the U.S.S.R. must live.

This weekend, at a major meeting in New York, representatives of the Byelorussian-American community will formally request the Voice of America to include the Byelorussian language programs in its broadcasts to the Soviet Union. I strongly endorse that request.

Mr. President, last August, I had the occasion to address a national meeting of the Byelorussian community that was held in my State of Ohio.

I ask that the text of my remarks on that occasion be printed in the RECORD.

The remarks follow:

BYELORUSSIAN INDEPENDENCE DAY

I am honored that you have asked me to be with you today as you gather from across the United States and Canada to affirm once again your commitment to preserving in this land of freedom the proud and ancient culture you brought to America from the fertile plains and magnificent forests of Byelorussia.

For the Ohioans among you, this meeting marks a special occasion—the thirtieth anniversary of the Byelorussian-American organization in our State. The Ohio organization has my warmest congratulations and all of you have my thanks—thanks on behalf of all Americans for enriching our common culture by bringing to it your own distinctive tradition.

We have come here today to celebrate that tradition. But as we celebrate, we do so in the sad knowledge that in Byelorussia, in the Ukraine, in the Baltic States and in all the places where Soviet power holds sway, no group of free people like this one can come

together to say what they truly want to say and to be what they truly want to be.

And you who are here today know from bitter personal and family experience that the Soviet Government holds in contempt the principles enunciated in the universal declaration of human rights and you know the value of the promises the Soviets made when they signed the 1975 Helsinki Accords.

Those promises are worthless.

The Soviet Government now is just as determined as it ever was to crush dissent.

Anyone who doubts that can ask what has happened to the heroic men and women in the Soviet Union who asked their country to comply with the promises it made at Helsinki.

At Helsinki, the Soviets promised to "promote and encourage the effective exercise of civil, political, economic, social, cultural, and other rights." And they agreed to "confirm the right of the individual to know and act upon his rights and duties."

Have the Soviets kept their promises?

Ask Balys Gajauskas, editor of an underground Catholic newspaper in Lithuania.

Gajauskas, a Helsinki monitor, was convicted of a crime called "slandering the Soviet State." He drew fifteen years for that, ten of them to be spent in what the Soviets call a "special regime" prison.

A "special regime" prison in the Soviet Union is very special indeed. The food in such places is especially bad. Living quarters are especially cold and crowded. Medical care and hygienic facilities are especially absent. And the risk to life and health and sanity is especially great.

Ask this man what he thinks of Soviet promises.

Ask Mikhail Kukobaka, a 43-year-old workingman from Byelorussia who has spent a quarter of his life in and out of Soviet prisons and psychiatric hospitals.

What was his crime? Kukobaka wrote an essay about the miserable lives of his fellow working men and women. For that, he was convicted last year in what the Soviets call a court of justice for the crime of slandering the state.

Ask Mikhail Kukobaka what he thinks of Soviet assurances.

And while you're at it, ask religious believers in the Soviet Union what they think of their government's promise at Helsinki to "recognize and respect the freedom of the individual to profess and practice, alone or in community with others, religion or belief in accordance with the dictates of his own conscience."

Ask and you will learn that no religious believer—Christian, Jew and Moslem alike—may be a teacher in the Soviet Union.

No religious believer may be a civil servant or an official in the government.

No religious believer may be assured of access to places of worship or to the services of the clergy.

In the Soviet Union, official permission is required for a priest or a minister or a rabbi to visit the sick. Official permission is required even to comfort the dying. And often in the Soviet Union, official permission is refused.

In Moscow right now, another brave man, Father Gleb Yakunin, is on trial for the crime of saying openly what everyone knows—that the guarantees of religious freedom in the Soviet Constitution aren't worth the paper they're written on.

Father Yakunin, an Orthodox priest, heads a group called the Christian Committee for the Defense of the Rights of Believers. He stands accused of slandering the Soviet State—by telling the simple truth. For that crime, Soviet "justice" threatens him with seven years in jail and another five in internal exile.

That's a high price for speaking the truth.

But there are brave people who are willing to pay it.

Ida Nudel, a Jewish activist, was convicted in 1978 of a crime called "malicious hooliganism."

What did she do?

After waiting seven years for permission to emigrate to Israel, she finally hung a banner out her apartment window. It simply read "Where is my visa?"

Ida Nudel is in Siberia today—serving a 4-year sentence.

She is not the only one. Far from it.

In Poland today, we see the inspiring spectacle of thousands upon thousands of ordinary working people defiantly standing up to their oppressors and saying, "We've had enough."

The Polish workers know what they're up against.

They know that their country is surrounded by overwhelming Soviet forces.

They remember what the Soviets did to the Baltic States in the 1940's, to Hungary in the 1950's and to Czechoslovakia in the 1960's.

The Polish people know what Soviet brute force is doing today in Afghanistan.

But still, the Poles stand up.

Our Government has been very careful so far not to say or do anything that could give the Soviets a pretext to intervene in Poland.

I believe that's a prudent policy—for the Government.

But I also believe that we as the people of this country have the right and the obligation to say "Poland, we respect you, we admire you and we stand with you."

I want to hear American labor speaking out for Poland.

I want to hear it in our churches and our synagogues and in the halls of Congress.

And I want to hear groups like this one—hear them say, "Yes, Poland, you're fighting our fight—and we are with you."

Yes, we must stand by Poland.

And I say to you also that we must stand by the heroes and heroines inside the Soviet Union itself—people like Kukobaka and Gajauskas and Father Yakunin. These are people who have risked everything on behalf of what they know and what is right.

We have given them support in the past. Members of the Senate, myself included, have written time and again to the Soviet leaders to ask that they be treated with fairness and decency. But we have heard nothing in return.

Two years ago in 1978, long before Afghanistan, I urged our Government to withdraw from the 1980 Moscow Olympics to protest Soviet violations of human rights. I supported the boycott—but I wish only that we'd done it earlier.

And I wish we had moved earlier to impose trade sanctions against the Soviet Union. Why should we sell to the Soviets the Western technology they need to modernize their economy?

And if the Soviets want to pour their resources into a vast weapons build-up, then I say let them eat their tanks because they won't have U.S. grain.

And I say let them know that we in America care and care deeply about human rights.

President Carter brought the human rights issue to the forefront of American policy. For that, he deserves great credit.

Nevertheless, I think you ought to know that there are those in our Government who believe that we should back away from the human rights issue. No less a person than Henry Kissinger said as much in recent Senate testimony.

There are those who argue that our support for human rights in the Soviet Union complicates our relationship with that country.

We must realize, these people say, that the Soviets consider this an internal matter.

And we must be aware, they tell us, that the Soviet leaders are very sensitive about our criticism.

Well, I am sorry to hear that the Soviet leaders are sensitive.

I would not want to hurt their feelings.

But I want the Soviets to know that I am sensitive too. And I want them to know that the American people are sensitive.

I am sensitive and I am angry when I hear that people like Mikhail Kukobaka have been confined to mental hospitals and jails. And the American people are angry too.

I am sensitive and I am angry when I hear of the 200,000 Soviet Jews who have been denied the right to emigrate to Israel.

I am sensitive and I am angry when I read that people like Father Yakunin and Viktoras Petkus have been jailed for slandering the Soviet state.

How, I ask you, can these men slander a state whose own actions bring down upon it the scorn and contempt of every civilized person?

If it is a crime in the Soviet Union to make that country look absurd, then let them put the judges in these cases on trial. Let them haul Mr. Brezhnev into the dock. Let them try the secret police, the informers and the communist party officials who are so frightened, so insecure in power that they make their country the laughing stock of the world.

The Soviet Government may suppress individuals. But even the KGB cannot kill the idea of liberty.

And make no mistake about it—the idea of liberty is loose in the Soviet Union today—just as it is loose in Poland and in the other nations of the Soviet empire.

I do not say the major changes are about to take place today or tomorrow.

I do not think that the dissidents are in a position to challenge the might of the Soviet state.

But I do think that the existence of the dissidents demonstrates that there is a deep unease in Soviet society. I think that they represent a desire on the part of millions of people there for a better life for more freedom, for the right to practice religion and to honor a national heritage. I believe that those desires will grow stronger and better organized. And someday, they will be felt at the center of Soviet power.

Because I believe these things, I reject the counsel of those who think that our country should back down on human rights.

I reject the idea that we should stop bothering the Soviet authorities with demands about the liberties guaranteed to their citizens by the Helsinki accords and the universal declaration of human rights.

I believe that we should bother them, as often and as forcefully as we can.

And I believe further that we should continue to bother our own government, to let our leaders know that the American people strongly support them when they take up the cause of human rights.

I pledge to you that I, for one, will never back down on human rights. And I urge you in the strongest terms never to abandon the dream that someday, somehow, the nine million people of Byelorussia will live in freedom.

That is a worthy cause. It is a cause that is in keeping with this country's finest traditions. And it is a cause that will always have my strong support.●

SCIENCE POLICY

● Mr. SCHMITT. Mr. President, Senator MATHIAS has recently given a speech which I believe deserves to be recognized. His leadership and understanding of the issues involved in science research and policy are to be commended. As many

in the scientific community will attest to, politicians have, in the past, not focused on the fundamental need for basic and applied research as the backbone of our current economic system. Senator MATHIAS very aptly describes the need for science research and the need science policy must play in public policy.

Mr. President, I ask that Senator MATHIAS' speech be printed in the RECORD.

The speech follows:

THE FUTURE OF BIOMEDICAL SCIENCES IN THE UNITED STATES

I am honored to have been invited to give the New Brunswick Lecture at this Annual Meeting of the American Society for Microbiology. I welcome the opportunity to speak before this august body of scientists. And I look forward to a frank exchange of views that will enable me and my staff to help you grasp the truly miraculous future that is within the reach of science.

Under any circumstances, I would be proud to stand here but as the senior United States Senator from Maryland, I am especially proud because of the great contributions my fellow Marylanders have made to this Society. Dr. Riley Housewright has just become your Executive Director. Dr. Joe Joseph, Director of Laboratories in Maryland, was recently elected to an eighth term as the Society's Secretary—a position which Dr. Donald Shay of the University of Maryland Dental School handled with distinction for many years. Dr. Rita Colwell, the Director of Maryland's Sea Grant Program, is a convener of several of your scientific sessions. And last, but from my point of view certainly not least, your Congressional Fellow for this year, Dr. Henry Williams, is also a Marylander and he is working on my staff.

So I have many parochial reasons to be proud of this Society and its work. But I have other good reasons as well. They stem from my experience with the type of leadership that you, the members of this Society, have provided to our country and to the entire world in moving us to new frontiers in science. Without your vision, without your dedication and your hard work, without the fruits of your genius, the United States would not lead the world today in biomedical scientific research.

I am equally proud of the unsung heroes and heroines among you who work in clinical and medical laboratories to keep America healthy and of those who ensure the safety of our water and food and our environment. Your invisible hands sustain the quality of all our lives. Yet all too often your work goes unnoticed, unpraised and undersupported.

Occasionally, however, someone has the wit and the wisdom to give proper recognition to the wondrous work of scientists. Columnist George Will, for example, wrote a memorable column on the Most Consequential Event of 1975 which began with a fascinating retrospective glance at what had made news in earlier years as compared to the events that ultimately proved to be truly consequential. In 1932, the biggest news was the election of Franklin Delano Roosevelt. But it was also in 1932 at Cambridge University in England that James Chadwick discovered the neutron which was the key to atomic fission. Chadwick's discovery was not a big newsmaker in 1932; 13 years later it was not only "big news", it was a big noise as well.

Will points out that, "In 1953 the big news events were that Eisenhower became President, an armistice was negotiated in Korea, and Konrad Adenauer was Time magazine's 'man of the year'". But everyone in this audience surely is familiar with another event which took place that year: Watson and Crick published a paper that began, "We wish to suggest a structure for the salt of DNA". Today, we are still reeling from the full significance and consequences of their great discovery.

In 1975 the big news was the fall of Saigon and the near fall of New York, the C.I.A and the FBI. Meanwhile, a team of scientists at Harvard constructed a mammalian gene.

Weighing the historic significance of these leading political events against contemporaneous achievements in the sciences, you cannot fail but agree with George Will that in the long run the impact of the scientific events dwarfs to insignificance the political events which at the time dominated the news.

I was so forcibly struck by the importance of George Will's tribute to science that I made a speech about it in the Senate which was printed in the CONGRESSIONAL RECORD. At that time I did not imagine that one day I would be standing before the largest life sciences association in the country, and would have a chance to express my admiration for you face-to-face—admiration that is shared by members of the Congress and by the American people who, I believe, are increasingly aware of your achievements.

Politicians like to pretend that they are up to any challenge, but trying to find something pithy to say to an organization whose members have claimed more Nobel Prizes in medicine and physiology than any other group is a challenge that would daunt even the most dauntless among us.

What I would like to do today and what I hope will be useful for you is to discuss the future of biomedical research in this country from my perspective on Capitol Hill.

There are two important facts which are crucial to this topic—(1) basic research in this country is 60 percent government funded; and (2) some of the results of that research, such as genetic engineering, have grave and far-reaching implications for our society.

Largely because of these two factors, scientific research has come and, in my view, will continue to come under increasingly close scrutiny by the public. And the corollary to this is that any issue that sparks public reaction, positive or negative, also sparks the involvement of elected officials at various levels of government. As public interest increases, science, in my opinion, will come under greater political influence.

Now I know many of you question why something as seemingly apolitical as science and the work you do should come under political scrutiny. The answer, I think, lies in the public's very proper concern to have a say in where tax dollars go, in how and to what purpose these dollars will be spent and in what results these dollars buy.

Public interest translates into pressure on the elected officials who act on budgets and appropriations—the budget for scientific research included. This is the way our government works and it is not such a bad way. The "pure-minded" scientist who cringes at the thought of his work being thrown into the political arena for scrutiny must come to grips with the realities of today's world.

A recent report of the Office of Technology Assessment underscores this point. It says:

"The public's increasing concern about the effects of science and technology has led to demands for greater participation in decisions on scientific and technological issues. An increasingly educated population skilled at exerting influence over policy makers seems to be a strong trend for the future. The media has played an important role in this development, reporting more and more on breakthroughs in science and technology as well as on accidents, pollution, and the side effects or potential dangers of some technologies. While misunderstanding perhaps, the nature of science as a process, the public is becoming disenchanted by recent accidents and apparent abuses associated with technology."

The inevitable result of all this, as the OTA report concludes, "has been the growing politicization of science and technology". The public is no longer satisfied with phrase making about "public policy"; the public wants to make policy and, indeed, that is the public's right. Scientists and politicians alike stand to gain by paying attention to public concern and to a large extent I think most of us are doing that.

The scientific community obviously can respond successfully to this challenge as witness the way scientific organizations, such as this, have responded to the public policy implications inherent in recombinant DNA.

I'd like to offer some suggestions about two specific ways you should involve yourselves in influencing public policy more actively: first, as participants in the legislative and political process; second, as educators and communicators informing the public about your research, its potential benefits, uses and risks, if there are any.

The point of scientists involving themselves more in the legislative and political system is obvious. This system determines what support will be allocated to research and it devises regulations and policies that affect a range of your activities from the type of research done and the accountability of researchers, as addressed by the infamous OMB circular A-21, to the certification of clinical microbiologists.

As you know, the budget process consists of a long chain of events beginning with the individual federal agencies and ending with the Congress. Your society and other professional associations have done a creditable job of establishing contact in the agencies and keeping track of the budget as it meanders through the Congress. But the counsel of scientists in the field and in the laboratory is also needed, especially when Congress begins its deliberations. When a legislative measure with some scientific or technological aspect comes before a committee on which a Senator or Representative from your district serves, make your representative aware of your interest and your expertise. Ask to testify or, working through your society, offer to provide position papers or other assistance. Being present at the creation is the very best way of influencing what is created.

A good example of what I'm talking about was covered in a recent article in your publication, the "ASM News". It reported that Representative George Brown had been getting "bags of mail" opposing the use of live animals in research, but had received little input from scientists knowledgeable about laboratory animals and the alternatives to using live animals in research and testing. There's a lesson to be learned here.

Without such expert testimony, we in Congress, risk producing legislation that is skewed in one direction or another and you risk allowing a situation to develop that may inhibit your scientific inquiries.

Members of Congress welcome your input. Very few of us are professional scientists. Generally our knowledge of science is in direct proportion to the education and information we receive from government agencies, lobbyists, interest groups and informed constituents such as yourselves.

In recent years special interest groups have burgeoned on the Capitol Hill landscape. They are both aggressive and sophisticated in pressing their suits on Congress on such matters as the environment, nuclear energy and genetic engineering. To provide a counterbalance, where one is lacking, the scientific community must also exert itself to inform, to educate and to communicate with elected officials. This will not only protect your own interest, but also allow those of us in policy-making positions to have

access to the professional knowledge so necessary to sound decision.

You should also involve yourselves in the question of government regulation. Personally, I believe the government should be the regulator of last resort. But I do not question for a moment that government has a very legitimate role to play in the regulatory process under certain circumstances.

That principle was established on November 15, 1777, when the Second Continental Congress, meeting at York, Pennsylvania, adopted the Articles of Confederation which contained provisions later written into our Constitution. Among them was the idea that a federal government is obligated "to promote the general welfare". That idea was included in the Third Article of Confederation but 10 years later the Framers of the Constitution moved it up to the Preamble to underscore its importance.

Looking at the historical development of this concept over the past 200 years, I think it is clear that it has come to mean the federal government is obliged to intervene "to promote the general welfare" of the citizenry when no one else can or will satisfy a perceived need. I'd like to repeat that qualifying phrase, "when nobody else can or will satisfy a perceived need", because it is central to the question of federal regulation.

I think I can explain what's involved here by taking a look at how we have dealt with some of the ethical issues raised by biomedical research. These are difficult problems. Government has an obligation to protect society but, at the same time, we do not want to impose undue limitations on scientific inquiry. To deal with such areas as fetal research, the use of prisoners as guinea pigs, the protection of patients in behavioral research, we have established by legislation a National Commission for the Protection of Human Subjects of Biomedical and Behavioral Reseach.

This Commission, appointed by the President has produced a series of reports, so widely acclaimed for their competence and fairness to both scientist and citizen, that they have effectively set the standards in these fields, and defused some potentially explosive societal bombs. Again, the guidelines for recombinant DNA research put out by NIH have been accepted as fair and reasonable by most scientists and citizen groups. So they have short-circuited what might have been hasty and overly restrictive legislation by the Congress.

Why were these efforts successful? First, it is clear that only the federal government could have tackled these problems. But most importantly, success was almost assured by the willingness of the biomedical community to become involved and to lend the process its energy, its wisdom and its prestige. That is the essential point here.

The question is not whether scientists can regulate themselves and their inquiries in ways that will "promote the general welfare". Obviously, they can. The question is whether they will; whether they are willing to. If they are not, the federal government has a duty to fill the gap. It is really up to you whether or not a gap develops.

Two areas will no doubt be the focus of debate in the future. The first has to do with certain types of genetic research in humans. The experiments which led to the so-called "cloning" of mice have already raised some eyebrows. These experiments have prompted calls for a ban on this type of research in humans.

The other controversial area is in the rapidly developing genetic industry. Massive scale-up operations of industrial processes which make use of genetically-engineered organisms or their products are causing some concern. This concern is directed more toward industry and industrialists than toward science and scientists.

Not unnaturally, the public is apprehensive about the potential for abuse especially where there is strong competition in a developing industry for a new market such as we find with recombinant DNA. It is estimated that there will be a market of more than $3 billion for recombinant DNA products by 1990. That is up from a projected $3.6 million in 1982. Obviously, DNA technology is big business and, while I have high regard for business, the negative effects on our lives caused by some industries cannot be overlooked. The industrial contamination of the James River with kepone is an example which comes immediately to mind.

The second area I mentioned where you should get involved, was that of public education. The public needs education and information in the science area today more than ever before. The National Science Foundation and the Education Department produced a joint report recently that suggests the American public today is on the verge of becoming scientifically illiterate. This is a dangerous situation because it comes at a time when American citizens are becoming more and more involved in the regulatory and policy decisions that set directions for scientific inquiry and technological development. Unless something is done to reverse this trend toward scientific illiteracy, important national decisions on science and technology will be at best uninspired and very likely uninformed.

I am happy that the scientific community has begun to attack the problem of public ignorance of science issues through a number of lay publications which have appeared over the last year or so. But this must be considered only the beginning. Science education is not your responsibility exclusively. Substantial leadership from the federal government too will be necessary to turn this situation around. We'll need help from community leaders and state and local government too to change attitudes on our school curriculum where the declining emphasis on science and mathematics is in marked contrast to other industrialized countries.

And that brings me to the final point that I would like to discuss—the relationship between scientific research and a healthy economy.

A talk of this sort is not the place to go into the nitty-gritty of budget recommendations and budget cuts. But I would be remiss not to mention OMB's recommended cuts in the National Science Foundation budget.

Ronald Reagan comes into office with a clear mandate to do something about the economy. And that mandate quite specifically includes cutting the federal budget.

To come to grips with the hard facts of our economic life and do battle with runaway inflation, soaring interest rates and sagging productivity, will require a determined national effort. It will require sacrifice and belt-tightening from everyone. Every single person in America must be prepared to give up something he or she prizes in order to get something we all need—economic stability.

Basic research, although it tops my personal list of cost-effective programs, is not going to be immune from harm when the budget cuts are made. But, it is up to us, working together, to see that we do not get involved in a budget-cutting exercise that is penny-wise and pound-foolish. Frankly, I think cutting science education and funds for upgrading laboratories is pound-foolish.

We have got to get across the idea both in the Congress and to the American people that this is one area of the budget where cuts should be made delicately and with surgical instruments not by hacking away with a butcher's cleaving knife.

Winston Churchill observed that "Modern science is standing on tiptoe, ready to open the doors of a golden age".

To paraphrase another of Sir Winston's famous sayings: I was not elected to the United States Senate to preside over the slamming of those golden doors in the face of the National Institutes of Health or any of the rest of our brilliant scientific research galaxy.

I want to help science open the doors to that golden age. I count on you to show me how.●

VIETNAM VETERANS' READJUSTMENT BENEFITS

● Mr. HART. Mr. President, last week the Senate Budget Committee voted to restore $25 million in funds to continue a counseling readjustment program for Vietnam veterans. The program which is conducted in veterans' centers in 90 cities across the Nation was begun last year and has the support of the Veterans Affairs Committees in both the House and Senate. The program has provided treatment for more than 55,000 Vietnam veterans who have experienced delayed stressed syndrome and other adjustment problems following their return from service in Vietnam.

On March 20 the Washington Star published an excellent column explaining why the veterans' readjustment centers have been an unqualified success. I ask that the article be printed in the RECORD and I recommend it to my colleagues.

The article follows:

[From the Washington Star, Mar. 20, 1981]

LIONIZED VIET VETS IN THE COLD

(By Marc Leepson)

What's going on here? The Reagan administration budget-cutters are planning to ax the Veterans Administration's readjustment counseling program for Vietnam veterans—the government's only successful program for aiding Vietnam vets. Former VA Administrator Max Cleland testified to the dire need for such a program before Congress 12 years ago. Yet it was not until 1979 that Congress set aside funds to set up storefront Vet Centers in cities across the country.

Nearly everyone—including members of Congress who fought against funding programs such as this—agrees that the Vet Centers are an unqualified success. Last year 50,000 Vietnam veterans and their families came to the centers for counseling. Many had given up on traditional Veterans Administration hospitals, where services are geared more toward the problems of older veterans—primarily from World War II and the Korean War.

UNLIKE THE VA

The Vet Centers are different. Located in city neighborhoods and staffed only by Vietnam vets, the atmosphere is decidedly un-VA-like.

Cleland said there was a "tremendous outpouring" of calls to Vet Centers across the country during the welcoming ceremonies for the former 52 American hostages held by Iran.

"The whole hostage issue triggered a deep emotional response upon the part of the Vietnam veterans," Cleland said in a March 4 National Public Radio interview, "because they didn't get that kind of treatment when they came back. So they were calling up and they were experiencing again some readjustment pain. And now I'm afraid those centers will be lost."

Most Vietnam veterans have adjusted well to life back in the United States. But many

vets—especially those who served in combat—are experiencing varying degrees of psychological problems. Cleland, the first Vietnam vet to head the VA began to establish programs for Vietnam veterans when he took over the agency four years ago. He expanded alcoholism treatment and drug rehabilitation units and instituted outreach programs for disabled vets. Two years ago, Cleland and a congressional caucus of Vietnam vets succeeded in pushing through Congress legislation setting up the Vet Centers on a two-year pilot basis.

OBEYED THE CALL

Vietnam veterans had every reason to believe that President Reagan would continue supporting the program, which was scheduled to come up for congressional review in September. At a White House ceremony awarding the Congressional Medal of Honor to retired Vietnam hero Army Master Sgt. Ray P. Benavidez, Reagan lionized Vietnam vets, calling them, "a group of American fighting men who had obeyed their country's call and fought as bravely and as well as any Americans in our history . . . There has been no thank you for their sacrifice."

It now looks as if the "thank you" Reagan and OMB Director David Stockman have in mind for tens of thousands of Vietnam vets is taking away the one government program that has worked well for them.

The White House wants to cut a total of $900 million from the VA's fiscal 1982 budget. In addition to the Vet Centers two programs for Vietnam vets—Legal Services aid and a job development program—are to be cut.

This year the Vet Centers are budgeted for about $12 million out of a total VA budget of some $22 billion. "It's such a relatively small amount," said Rep. David Bonior, D-Mich., of the congressional Vietnam Veterans Caucus, "and I know that the administration's position has been: 'Well, everyone says that.' But it's such a good program that it would be a tragedy to let it die just when it's in its infancy."

DEEPER FRUSTRATION

Max Cleland pointed out that President Reagan praised Vietnam vets during the presidential campaign and called their war effort "a noble cause." Cancelling the program, Cleland told NPR, "is . . . going to deepen the sense of frustration and sense of alienation on the part of Vietnam veterans. And it's going to look to them as another case of governmental b.s. where politicians say one thing during a campaign but turn right around and do another."

It now appears as if the politicians on Capitol Hill at least will fight to keep the Vet Centers in operation. The Senate Budget Committee March 17 recommended adding $25 million for the Vet Centers program at the same time it proposed slashing billions of dollars for other programs. The House Budget Committee is expected to follow suit. Then it will be up to the two Veterans' Affairs Committees to fund the programs. The President, of course, will still have the final say-so.

It's still not too late for Reagan to drop his opposition, and let Congress know that he is devoted to the "noble cause" of keeping the Vet Centers in operation.●

FABULOUS ACHIEVEMENT BY NEW JERSEY STUDENT, PLAYWRIGHT

● Mr. WILLIAMS. Mr. President, on April 1, those who visit the Kennedy Center will be treated to a wonderful performance of the 1981 winner of the American College Theatre Festival's National Playwriting Award.

It gives me great pleasure, both as a trustee of the Center and the senior Senator from New Jersey, to note that the award-winning production, Going On! was written by a student at William Paterson College in New Jersey, Mr. Glenn Treibitz.

Mr. Treibitz, who lives in Montville, N.J., began his work on Going On! as part of a workshop project in a course taught by Dr. Will B. Grant of William Paterson's Department of Theatre.

Mr. President, a fine artistic achievement by an American playwright is always cause for celebration and even more so when it comes from someone young and someone with such a bright future.

I know that those who attend the performance on April 1 will enjoy Mr. Treibitz bright and lively musical, and I just wanted to take this opportunity to express, on behalf of the Senate, our warmest congratulations to Mr. Treibitz and to his fellow students, performers, and faculty members at William Paterson College's Theatre Department.

I ask that a short summary of "Going On!" be printed in the RECORD.

The summary follows:

GOING ON!

Going On! a new musical produced by the Department of Theatre and Pioneer Players of William Paterson College, directed by Dr. Will B. Grant Jr., Professor of Theatre and written by William Paterson College student, Glenn Treibitz of Montville, New Jersey, has won the National Playwriting Award for 1981 of the American College Theatre Festival.

Going On! began as a workshop project in Dr. Grant's Acting: Realism class. With six students, Joyce Klingenberg, Anne Kenny, Donna Marturano, G. Mark Jenkins, Art Denboske, and John Corcoran, the work was known as College Life and was performed in Hunziker Theatre on April 28, 1980. Positive reception by both students and faculty and administrators lead Glenn to create a full-length work which was designed and staged for the Shea Center for the Performing Arts.

The full-length version opened November 13, 1980 at 8:00 and received a standing ovation at each performance. Regional adjudicators from the American College Theatre Festival, Dr. Violet Katell, Dr. Roger Cornish, Dr. Ted Cooper and Dr. Ramon Delgado, viewed the play on Saturday, November 15 and extended an invitation to the company to perform at the University of Delaware as part of the Region II Festival Competition.

Rehearsing throughout the traditional Christmas vacation to develop the script, the cast, production crew and orchestra of 45 members then traveled to Delaware and performed a matinee performance on Friday, January 9th. Once again, the script and the production received a standing ovation.

In the audience during the Delaware performance were the judges of the National Playwriting Committee: well-known theatre critic Martin Gottfried, scholar and playwright Christian Moe and playwright Corrine Jacker and David Young producing director of the American Theatre College Festival. Their judgement of *Going On!* brings the production to Washington.

The American College Theatre Festival is the most prestigious theatre festival in the United States. The National Playwriting Award honors Mr. Treibitz with a $2500 scholarship, professional representation of his work by both Samuel French Play Service and the William Morris Agency, and membership in the Dramatists Guild.

The American College Theatre Festival also honors William Paterson College by inviting the Pioneer Players/Theatre Department Company, directed by Dr. Grant, to perform the production of *Going On!* at the Terrace Theatre in the John F. Kennedy Center for the Performing Arts on Wednesday, April 1st at 7:30, Thursday, April 2nd at 2:00 and Thursday, April 2nd at 7:30.

Prior to the performance on April 1, 1981, Glenn Treibitz will receive the National Playwriting Award, and Dr. Jay Ludwig, Dean of the School of the Arts and Communication will accept the grand prize on behalf of William Paterson College of N.J. Following the performance, student members will be given medallions for their participation in the production by the AMACO companies who sponsor ACTF.●

BISHOP BURT ON THE ARMS RACE

● Mr. METZENBAUM. Mr. President, I recently came across a press account of an address given by Bishop John Burt, one of Ohio's most distinguished religious leaders, before the annual convention of the Episcopal Diocese of Ohio. Bishop Burt's remarks have special relevance for this period in our Nation's history.

Our Nation's "mortal enemy," Bishop Burt told the delegates "is war—war itself."

That, Mr. President, is a very simple truth—and one that is too easy to forget.

I am one who believes that we must take prudent steps to strengthen our defense posture.

But I also believe that we must not lose sight of what it is we are defending. We must not, in other words, allow our concern about Soviet behavior in the world to distract us from our commitment to build the kind of just, decent America. That is the strongest answer we can give to the Soviet challenge.

I ask that an excerpt from Bishop Burt's address that appeared in the February 14, 1981, edition of the Cleveland Press be printed in the RECORD.

The excerpt follows:

OUR MORTAL ENEMY IS WAR—WAR ITSELF

(The following remarks are excerpted from Bishop John Burt's opening address to the annual convention of the Episcopal Diocese of Ohio last Saturday at Trinity Cathedral.)

A few months back a Canadian editor wrote, "There may be no 1990s for human life on this planet. If the present trend continues, World War III will begin sometime between 1988 and 1998."

Now you and I do not have to share that editor's faith in the computer which produced that calculation in order to be impressed by the statistics he summons.

At the present time, the United States has the power to wipe out the Soviet Union 50 times and the USSR could take care of this nation 25 times over. Moreover, the mutual stockpiles grow by three to five bombs per day.

A few years ago a distinguished American made this comment about the arms race:

"Every gun that is made, every warship launched, every rocket fired signifies, in the final sense, a theft from those who hunger and are not fed, those who are cold and are not clothed. This world in arms is not spending money alone. It is spending the sweat of its laborers, the genius of its scientists, the hopes of its children. This is not a way of life at all, in any true sense. Under the cloud of threatening war, it is humanity hanging from a cross of iron."

Do you know what dove said that? What starry-eyed peacenik made that observation? It was General of the Armies Dwight D. Eisenhower.

What has changed most in the last two decades is that great nations can no longer

afford the luxury of enemies. Russia is our toughest adversary but it is not our enemy. Our mortal enemy is war—war itself.

Unless we learn this lesson promptly and thoroughly, thermonuclear war is a certainty. Until we learn that lesson, you and I remain active co-conspirators in plans for the extermination of tens of millions of human beings.

The easiest way for a nation to destroy itself is to make national security the highest value. People are never more insecure than when they become obsessed with their fears at the expense of their dreams—or when the ability to fight becomes more important than the things worth fighting for.

I personally believe it is time for Christians to put their money and their protests where their prayers are. The only world problem the arms race can possibly solve is the population problem and it may just do that—in one fell swoop.

The time for decision on where we stand on the arms race is now for every Christian.●

INTELLIGENCE BLUNDERS

● Mr. SCHMITT. Mr. President, I call the attention of my colleagues to a three-part series which appeared earlier this month in the Norwich, Conn., Bulletin entitled "Intelligence Blunders." The author of the series is William F. Parham, a staff writer for the Bulletin.

The thrust of the articles focuses on CIA estimates of Soviet military spending for the past decade. These estimates have been consistently wrong and have required reestimates after the fact. Each time the original estimates have been far too low in the level of Soviet military expenditures. The implications of these blunders, however, have had far-reaching effects on our military strategy and spending.

During the past 15 years the United States has pursued a policy based on mutual assured destruction (MAD) and unilateral restraint in hopes that the Soviet Union would do likewise. Underestimating Soviet military spending served to reinforce this strategy at a time when the United States should have been rethinking both its defense policy and its relationship with the Soviet Union.

The results of these intelligence blunders have been devastating. The United States has pursued a foreign and defense policy based on unreal assumptions. The bottom line is that our military capability has eroded to the point where we are told that we face a strategic "period of vulnerability" and we lack the ability to effectively counter a Soviet/Warsaw Pact conventional threat in Europe. We are, therefore, forced to play catchup ball which requires major increases in defense spending at a time of economic stress in our country. Had the estimates been accurate during the 1970's, we would have seen the threat sooner; we would have had the opportunity to react sooner.

To be fair, Mr. President, there were many individuals, both in and out of Government, who were warning us throughout the decade about the growing Soviet military threat. We chose not to listen to them and justified our position with the estimates supplied by the intelligence community.

Mr. President, what is disturbing to this Senator is that the realization of these blunders may not result in any changes. The existence of a possible problem surfaced in 1976 after the A team-B team exercise. Yet, we chose not to take any steps to correct the problem at that time. Unless we review the method of collecting data and, more importantly, the quality of the analysis of that data, we shall continue along the same road which we traveled throughout the 1970's.

The articles by Mr. Parham address CIA estimates of Soviet military spending. This, however, is not the only area which has suffered from poor analysis. In the field of energy, intelligence estimates of United States, Soviet, and world energy reserves have been dead wrong. Last year, then CIA Director Stansfield Turner stated before the Senate Energy and Natural Resources Committee that we are reaching the limits of new oilfield discoveries and the technology needed to exploit them. This Senator refuted those assertions on the floor of the Senate at that time.

Estimates of Soviet oil production have also been wrong. We were told by the intelligence community that by the late 1980's the Soviet Union would be a net importer of oil. I seriously doubt that the CIA would want to stand by that statement today.

The estimates of energy resources, Soviet military spending, and other issues are the basis of our foreign and domestic policy decisionmaking both by the administration and the Congress. If that information is faulty, the resulting policy cannot help but be faulty. Attention must be focused on the causes of these intelligence blunders and efforts to correct them must be undertaken immediately. Otherwise, we shall continue down the wrong road until it is too late to salvage our predicament.

Mr. President, I ask that the three articles which appeared in the March 8, 9, and 10 issues of the Norwich Bulletin be printed in the RECORD.

The articles follow:

[From the Norwich (Conn.) Bulletin, March 8, 1981]

INTELLIGENCE BLUNDERS—PART I; THE SECURITY BLANKET THAT FAILED

THE CIA'S BLUNDERS COULD BE COSTLY

(By William F. Parham)

(Today's first installment, "The Security Blanket That Failed," explores the scope of the blunders as seen by a number of experts who have analyzed the reports during both Republican and Democratic Administrations.)

WASHINGTON.—The U.S. government has wasted billions of dollars over the past two decades on inaccurate estimates and forecasts of Soviet military spending and capabilities, according to present and former U.S. intelligence and defense officials.

Ever since the Soviets encouraged the U.S. in the late 1950s to overestimate Soviet deployment and accuracy of intercontinental ballistic missiles (ICBMs) which led to the famous "missile gap," U.S. Presidents and Congresses have reached arms limits agreements with the Soviets and have determined U.S. defense investments on the basis of inaccurate intelligence about what the Soviets were spending on defense and what weapons they were planning to deploy, strategically as well as tactically, The Bulletin has learned.

The inaccurate intelligence has been the subject of often heated debate within the intelligence community since the mid-1960s, with some critics claiming they were forced out of the CIA for questioning the agency's figures. Recently, more ominous questions have been raised about possible explanations for the errors.

Was it simply the result of bureaucratic bungling or stubbornness on the part of those involved, some of the critics ask. Or was it the result of Soviet deception possibly including "moles" or Soviet agents in high positions in the U.S. government?

Whatever the cause, it is beginning to dawn on Capitol Hill and throughout the new Administration that the money wasted on the poor estimates may be only the tip of a very unpleasant iceberg.

An even more significant cost of the U.S. intelligence community's persistently low estimates may be realized in the hundreds of billions of dollars the U.S. may decide to spend during the 1980s on extremely expensive crash programs, such as the MX missile, to prevent the Soviets from gaining an irreversible military advantage, experts say.

If the crash catch-up programs fail over the next decade, says one analyst on Capitol Hill, the ultimate cost of the massive, 20-year U.S. intelligence failure could be "beyond calculation—the paralysis of the West and the victory worldwide of Soviet values by default, all at a time when the inner economic poverty of the Soviet system has never been more readily apparent."

Complicating efforts to put things straight, many of the Central Intelligence Agency's senior intelligence analysts and middle managers responsible for the consistently low Soviet estimates are still in charge of producing them, and still do them in much the same way they used to, The Bulletin has learned.

President Reagan's top appointees to the CIA, William J. Casey, director, and Admiral Bobby Inman, deputy director, expressed their own concerns about the CIA's analytical performance during their recent confirmation hearings.

But a CIA spokesman has told The Bulletin that no major organizational or methodological reforms have yet been undertaken in the section of the agency that analyzes Soviet military spending and weapons programs.

The Bulletin has also learned that:

Current CIA estimates of 1980 Soviet military spending (61 to 66 billion rubles) are probably only half the actual Soviet outlays, which one key expert estimates to be 108 to 126 billion rubles. (The conversion rate for rubles into dollars varies widely according to exactly what is being bought and when, so there is no single accurate conversion rate.)

CIA estimates of Soviet defense spending as a percentage of national production (GNP) for 1980 are 11 percent to 13 percent, while the correct figure is probably 18 percent.

CIA estimates of Soviet outlays for actual weapons purchasing as a percentage of Soviet domestic output of machinery are too low—the proportion is probably well over 50 percent this year, up from 20 percent in the mid-60's and 35 percent in 1970.

The CIA estimates are getting worse instead of better, and unless the CIA changes its methodology for estimating Soviet military spending, the agency is likely to be even further off in five years than it is now.

The CIA was apparently caught unaware by the introduction, refinement or deployment quantity or timing of at least 18 major new Soviet weapons systems and technologies.

Also, analysis of the annual Posture Statements of the various Secretaries of Defense against subsequent developments shows the

CIA was caught by more rapid or extensive development or deployment than it had expected of numerous systems and technologies, including:

A large deployment of Soviet medium bombers in the late 1950s and early 1960s;

A large deployment of medium/intermediate range ballistic missiles (M/IRBMs) in the same period;

The deployment of a second generation of sublaunched ballistic missiles (SLBMs), SS–N–6s, on a fleet of Yankee-class subs in the mid-1960s;

The deployment of multiple independently targetable reentry vehicle (MIRV) warheads on ICBMs;

The development of a third generation of Soviet intercontinental ballistic missiles (ICBMs), the SS–16, SS–17, SS–18 and SS–19 flight-tested in the early 1970s and fitted with MIRVed warheads;

The accuracy of fourth generation MIRVed ICBMs (later modifications of the missiles listed above);

The deployment of multiple independently targetable reentry vehicle (MIRV) warheads on SS–N–18 missiles on Delta-class subs in the late 1970s;

The development and series production in the late 1970s of the advanced, titanium-hulled, deep-diving, nuclear-powered, 48-mile-per-hour Alpha anti-sub submarine;

The massive Soviet Naval emphasis throughout the 1970s and probably through the 1980s on antisubmarine warfare (ASW), especially strategic ASW capability against our strategic ballistic missile submarines (SSBNs), as exemplified most recently by the very extensive ASW equipment aboard their new 23,400-ton Kirov nuclear cruiser which went on sea trials late last year;

The development of the giant new 13,000-ton Oscar anti-ship cruise missile submarine scheduled for sea trials next year and equipped with 24 SS–NX–19 anti-ship cruise missiles with ranges greater than 250 nautical miles;

The deployment of advanced tanks, armored personnel carriers, self-propelled guns, operational-tactical missiles;

The deployment of advanced fighters and fighter-bombers;

The deployment of advanced helicopters;

The deployment of advanced transports;

The deployment with ground forces advanced surface-to-air missiles.

"U.S. intelligence has underestimated Soviet weapons programs far more often than it has overestimated them," says a widely respected Washington consultant and former CIA analyst of Soviet defense spending and programs from 1951 to 1964, William T. Lee.

"And the forecasting record since 1960–1961 seems worse than before, despite the revolution in technical intelligence capabilities over the past two decades and the relative abundance of evidence available from classified and unclassified sources on the Soviet rationale for decisions on weapons acquisitions," Lee says.

Lee told The Bulletin that current CIA estimates of Soviet defense spending for 1980 "are once again off by a factor of two, or nearly so," and should be doubled.

"I tend to think Lee is right on this," says Paul H. Nitze, former Deputy Secretary of Defense under Robert McNamara. "I haven't done original research on this lately, but Lee has been demonstrably right against majority opinion at the agency before. I believe he works at this harder than most and is more knowledgeable," Nitze told The Bulletin.

Lee told The Bulletin that not only are the CIA numbers wrong, but "U.S. intelligence has conspicuously failed to understand Soviet strategic concepts, perceptions and priorities. Soviet M/IRBMs and medium bombers, which are considered by the Soviets just as 'strategic' as ICBMs and heavy bombers, continued to be referred to as 'gray area' and 'peripheral' systems."

"For more than a decade the U.S. has put all of its strategic systems into the hamper of strategic arms limitation talks (SALT) negotiations while allowing the Soviets to withhold about ⅓ of their strategic systems from the bargaining process.

Yale Law School Professor Eugene V. Rostow, Under Secretary of State for Political Affairs for President Lyndon Johnson, called Lee's work in this area "extraordinary—indeed, nearly unbelievable—demonstrating the bias of systematic optimism about Soviet intentions and capabilities that has characterized the American intelligence community for about 20 years."

"Public opinion has viewed our intelligence experts as a group of unreconstructed cold warriors who see Russians under every bed and tend systematically to exaggerate the Soviet threat," Rostow says. "It has been apparent for some time, however, that our problems in this field are quite different."

A former CIA Soviet strategic analyst during the 1971–1977 period concurs with this evaluation. The analyst, David S. Sullivan, told The Bulletin, "Between 1966 and 1979, the Soviet intercontinental ballistic missile force grew to 1,400 from 224 and its sea-launched ballistic missile force to more than 950 from just a handful. At the same time:

"The Soviets introduced two entirely new generations of ICBMs with several variants of each, three new SLBMs, and a new strategic bomber.

"The Soviets during this period matched the U.S. in multiple independently targetable reentry vehicle (MIRV) technology and accuracy.

"They achieved a credible first-strike capability.

"They accelerated a nationwide civil defense program, improved the quantity and quality of their active defense, and incurred estimated dollar costs of at least 2.5 times ours to improve their strategic force.

"But all these facts notwithstanding, a U.S. policymaker relying on the national intelligence estimates between 1965 and 1978 probably would have concluded that the Soviets suffered from hopeless technical inferiority, were for most of the period amassing their forces not to fight and win a war but rather to avoid one through the threat of mutually assured destruction, and had little or no hope of achieving exploitable strategic superiority or a damage limitation credibility," says Sullivan.

Lee adds, "We are about a decade late in realizing that the repeated and systematic underestimates of the intelligence community have had far more serious consequences for U.S. national security than whatever excesses our covert intelligence components may have indulged in."

Former Defense Intelligence Agency Chief Gen. Daniel Graham says, "Between 1975 and 1978 the intelligence community officially disregarded the massive evidence available to it concerning the size, scope and purpose of the Soviet Union's program for building strategic weapons, and repeatedly minimized the importance of what was going on."

Graham, director of the DIA from 1974–76, charges that U.S. intelligence lagged behind some publicly available magazines and other publications with access only to unclassified sources in finally recognizing that "the Soviet Union is indeed trying for the capability to win a nuclear war with minimal damage to itself and is well on the way to achieving such a capability."

"It was even worse than just giving bad information," Graham told The Bulletin. "The CIA stuck to what to many of us seemed unbelievably low estimates of Soviet military spending.

"This gave an excuse to everybody in Washington who did not want to face the real Soviet buildup in weapons deployed," Graham said.

"Everybody could wrap themselves in this security blanket and say, 'the stories of massive Soviet military buildup can't possibly be true because the CIA says the Soviets are only spending 6 or 7 percent of the GNP on defense and their GNP is only half ours, so they couldn't possibly be that much of a threat'," Graham told The Bulletin.

"So these CIA estimates provided the means by which Congressmen and Senators and Administrations could beguile themselves with regard to this immense buildup," Graham said.

CIA forecasting reliability on Soviet military questions during the last few years has been questioned by members of several recent administrations.

Former Defense secretary Donald H. Rumsfeld in 1978 presented testimony before Congress that since 1977, "U.S. intelligence estimates have been found to have again underestimated Soviet efforts, progress and capabilities.

"In the strategic realm," Rumsfeld said, "Soviet ICBM accuracy improvements and MIRVing rates, among other things, have been more rapid and impressive than were officially forecast."

Most recently, President Carter and members of his Administration occasionally expressed confusion and surprise in public about Soviet military capabilities and intentions.

Former Defense Secretary Harold Brown said in his Fiscal Year 1980 and 1981 Posture Statements that the explanation for the Soviets' buildup, far beyond what they need to defend themselves, was not clear.

In the closing days of the Carter Administration, defense officials admitted quietly that several U.S. strategic weapons programs had been allowed to be delayed for several years because of 1977 intelligence underestimates of the rapidity of both Soviet deployment of multiple independently targetable reentry vehicle (MIRV) warheads on their intercontinental missiles, and accuracy improvements to their SS–18 and SS–19 missiles.

"I have to admit that I was quite surprised," former Pentagon Research and Development Chief William J. Perry told the Washington Post in mid-December. New indisputable intelligence on Soviet tests, he said, "gave us a new sense of urgency, told us we were caught short."

After extensive hearings, the House Intelligence Committee alluded in its annual report issued last month to past CIA estimates of Soviet defense spending that had to be doubled to square with the demonstrated facts.

In testimony before that committee, Dr. Steven Rosefielde, University of North Carolina economics professor and a recognized authority on Soviet military spending, concluded that "In my opinion, the Central Intelligence Agency's estimates are highly unreliable.

"They are unreliable in dollars; they are unreliable in rubles," Rosefielde testified. "In my view, the Agency tends to project an image of hard science regarding their estimates. Their estimates have an unacceptable discretionary element in them, a discretionary element which is usually concealed in their published material."

Rosefielde told The Bulletin that the CIA estimated Soviet weapons procurement in 1979 to be 24.2 billion rubles, while his own work showed the Soviets actually spent 55.2 billion rubles on buying weapons for that year.

And five years from now, if the agency doesn't change its methodology, Rosefielde told The Bulletin, "they may only be getting a quarter" of the actual Soviet budget.

"I can't give you a quantitative estimate right now, but I'm sure there is some under-

estimation in the present estimate," says Dr. Albert Wohlstetter, who in 1974 first wrote publicly about systematic CIA underestimates of Soviet defense spending and programs. Formerly with the University of Chicago, Wohlstetter is now with the Hoover Institute at Stamford University in California.

"The essential thing," Wohlstetter told The Bulletin, "is that we have an enormously sophisticated high-technology collection apparatus, but a very defective analytic capability."

The new top intelligence officials installed at CIA by the Reagan Administration confirmed at their confirmation hearings several weeks ago much of what Lee and other critics say, and have admitted they face severe problems in the CIA's analytical operations. The problem is not with the technical collection of intelligence data, or the covert operations of the so-called "black side" Directorate of Operations of CIA, but with the "white side" Directorate of Intelligence where the data collected is analyzed, they agree.

William J. Casey, President Reagan's choice for director of the Central Intelligence Agency, stressed in his confirmation hearings January 13 before the Senate Select Committee on Intelligence that all was not well on the CIA's analytical side:

"In almost every instance in recent years, so-called intelligence failures have been the result of shortcomings in intelligence analysis, and sometimes in policy conclusions," Casey said.

"The necessary relevant information, the facts, were generally available. But frequently, either good analysis or sound conclusions did not follow."

Admiral Bobby Inman, new Deputy CIA Director, agreed at his confirmation hearing February 3 that the problem was with underestimates rather than overestimates of Soviet military programs, and that Casey "has indicated his desire that we share in his number one priority of starting to improve the quality of intelligence available, and particularly the estimative functions."

"We indeed have a building process, I think, particularly in the analytical area," Inman said.

The new chairman of the Senate Select Committee on Intelligence, Sen. Barry Goldwater, agreed with Casey and Inman that analytical shortcomings had caused intelligence failures in recent years.

The CIA doesn't discuss its budget for collection and analysis of Soviet military budget and programs. But collection and analysis costs of CIA estimates of just the Soviet military budget alone are estimated to have totaled between one half billion and one billion dollars over the past 20 years.

In addition, collection and analysis costs of evaluations of specific Soviet military programs and deployments is estimated by The Bulletin to have cost the U.S. considerably more, probably several billion dollars more.

Despite the critics' arguments, CIA spokesmen have maintained the critics are wrong and the agency correct.

"We began making estimates of Soviet defense expenditures during the 1950s," a CIA spokesman testified last September before the House Intelligence Committee.

"Over time, we have continually refined both our data base and our cost-estimating methodologies, and the confidence that we place in the accuracy of our estimates has increased accordingly."

INTELLIGENCE BLUNDERS—PART II: CRITICS WIN BATTLES BUT NO WARS

HOW THE CIA WAS WRONG 11 YEARS IN A ROW

(By William Parham)

(In this second part of a three-part series on two decades of criticism of the CIA for years of systematic blunders in underestimating Soviet defense spending and weapons plans and deployments, The Bulletin reviews some of the attempts critics made to correct the underestimates and what happened to some of the critics.)

WASHINGTON.—There were unsettling indications as early as the 1960s that something might be wrong with U.S. intelligence estimates of Soviet military spending and weapons development and deployment.

In the late 1950s Soviet Premier Khrushchev and Defense Minister Malinovsky had encouraged the U.S. to overestimate Soviet intercontinental ballistic missile capabilities and deployments.

Then, when incontrovertible technical evidence convinced U.S. analysts that they had badly overestimated Soviet ICBM missile capabilities and deployments and contributed erroneously to the famed "missile gap" that helped elect John Kennedy to the Presidency, many CIA analysis concluded the Soviets tended generally to overstate their deployments and capabilities.

Stung by their errors in overestimating Soviet ICBM capabilities, the analysts began bending over backwards to avoid such overestimates in the future.

But early in the 1960's, a number of experts both inside and outside the agency felt something was again going wrong, and that many analysts were now systematically underestimating Soviet capabilities.

These analysts tried to do something about it. They were rebuffed, ignored, ostracized, or, if they were CIA employees, forced out.

"For 20 years, readily available evidence from published Soviet economic data led me to believe that the CIA was underestimating Soviet defense expenditures in rubles," says William T. Lee, a widely respected Washington consultant who was a CIA analyst of the Soviet economy and military spending from 1951 to 1959 and then an analyst of Soviet military programs until 1964.

"I remember a half-hour confrontation with my boss at CIA one time over this," recalls Lee. "For a long time I had been his favorite analyst, but he kept telling me I was overestimating Soviet defense expenditures.

"I kept asking him where and why I was wrong, in the Soviet sources or in my arithmetic. He couldn't tell me. Finally he said to me, 'Bill I don't know what is wrong in your estimates but they are wrong and I should be fired if I had anybody spend the amount of time on them necessary to find out why they're wrong.' "

"I resigned from the agency in 1964. They wouldn't give me any further promotions because they wanted me to admit that I was wrong about the Soviet weapons procurement estimate and I wouldn't do it," Lee told The Bulletin. "So when a much better offer came along I took it."

"I remember having lunch with one guy several times to talk about these estimates," Lee told The Bulletin. "At every lunch, he would dish out as many excuses as he could think of. Finally he just looked at me, and said, 'This is the way we operate, don't you understand? We may not always be right, but we're never wrong.' "

Lee's lunch partner was John Arthur Paisley, former Deputy Director of CIA's Office of Strategic Research and long-time agency employee. Paisley left the CIA in 1974 to become a private consultant. He worked as a CIA consultant on Soviet strategic capabilities, and was the CIA's contact for the famous "Team B" of outside experts assembled in 1976 by then-CIA Director George Bush to independently assess Soviet arms programs.

On October 1, 1978, a bloated and badly decomposed body identified as Paisley was found floating in Chesapeake Bay, a .9 millimeter gunshot wound behind the left ear and 38 pounds of weighted diver's belts around the waist. The Senate Intelligence Committee's investigation of the incident and Paisley's CIA background was classified, and Paisley's death was officially ruled a suicide.

Two years after Lee left the agency, another analyst was forced out. In July 1986, CIA analyst Ray Robinson says he was forced to resign for refusing to alter his forecasts that the Soviets had a large sub-launched ballistic missile program underway.

Only a few months after Robinson departed, his forecasts were vindicated when the Soviets launched the first of a fleet of 34 Yankee-class nuclear-powered ballistic missile subs carrying 544 SS–N–6 missiles.

Air Force Major General George J. Keegan Jr., chief of Air Force Intelligence from 1971 to 1977, remembers having "extremely sharp differences with the CIA during the 1960s—with their reading of Soviet ideology and intent, their reading of Soviet technical competence, forecasts of Soviet introduction of swept-wing fighters, turbojets, the quality of Soviet metallurgy."

Keegan, who agrees with Lee's judgment that the present CIA estimates of Soviet military spending should be doubled, told The Bulletin the CIA had been wrong in the 1950s but that "in the 1980s the trend accelerated and seemed to be politically motivated."

"Every year, after months of arduous negotiating," Keegan told The Bulletin, "the intelligence community would reach an agreed position on the national intelligence estimate, but then the CIA committee chief would come in the room with a little white slip of paper from the White House or the State Department. He'd reject by fiat the agreements we'd wrought most carefully, saying, 'This is the way its going to be, and the issue is no longer discussable.' "

"The CIA, sitting close to the seat of government policymakers, came to reflect the hopes and aspirations of the policymakers for cooling the rhetoric of the Cold War, for pushing detente, and for giving the Soviets the benefit of the doubt."

Keegan became notorious in the intelligence community for challenging CIA findings and for taking a hard-line view of Soviet actions. During his 6 years as Air Force intelligence chief, both CIA Director William Colby and National Security Advisor/Secretary of State Henry Kissinger tried to get him fired, Keegan told The Bulletin.

The continuing disagreements within the U.S. intelligence community were kept muted, and the public generally remained unaware of them, but, the controversy broke into public print in 1974, when Professor Albert Wohlstetter of the University of Chicago published articles in Strategic Review, "Legends of the Strategic Arms Race," and Foreign Policy, "Is There a Strategic Arms Race?"

Using newly declassified data, Wohlstetter demonstrated in those articles that U.S. intelligence had not only badly underestimated Soviet strategic missile and bomber deployments through the 1960s, but also that the underestimates grew progressively worse at the end of the decade, just as the evidence of the constant Soviet strategic deployment rate was becoming increasingly clear.

"The facts were all very shocking," Wohlstetter told The Bulletin. "It was pretty much like spitting in church. People were used to thinking that we were running the arms race with ourselves, and dragging the Russians along kicking and screaming. It was a big shock and there were lots of attempts at rebuttal. But that gave me a splendid opportunity to respond, and I was able to get more of the classified National Intelligence Estimates data declassified and put out systematically."

Wohlstetter's response to attempts at rebuttal was published in a 1975 article in Foreign Policy. He then summed up unfavor-

able trends in relative U.S. and Soviet military strength in a 1976 article in Survey magazine entitled "Racing Forward or Amoling Back?"

In 1975, the CIA discovered that the Soviets had spent 50 billion rubles for defense in 1970, or twice what the CIA had previously thought. The agency had estimated 24 billion rubles; Lee had independently estimated 43 billion to 49 billion.

"So in 1976, the CIA doubled its 1970 numbers and more than tripled its estimates for (actual 1970 weapons) procurement—but did not change its methodology," Lee says.

In early 1976, when the CIA was about to publish its revised (doubled) numbers, Lee went to the agency, he told The Bulletin, "on my own time, and unsuccessfully pleaded with them, 'Don't put out the new numbers until you find out what's wrong in the methodology; if you do, you'll be wrong again. The 1970 numbers will be jacked up to fit the 1970 facts, but the projected rate of increase will still be wrong and then immediately afterward the numbers will be wrong again—and yet those numbers will be defended to the death'."

"Not only wouldn't they delay, they told me I was telling them that their analysts were fools and traitors," Lee said.

The CIA then discovered that in 1972 the Soviets had actually spent 58 billion rubles on defense. Lee's independent estimate had been 53–60 billion. The CIA estimate had been 48 billion.

In 1976, then-CIA Director Bush brought in the "Team B" of outside experts, to use highly classified CIA data furnished through Paisley and to come up with conclusions on Soviet defense programs independent of CIA's own "Team A."

Team B, drawn from outside academics and former senior intelligence and defense officials, was headed by Dr. Richard E. Pipes of Harvard, formerly director of Harvard's Russian Research Center and now the Russian specialist on President Reagan's National Security Council staff. Other Team B members were: General Daniel Graham, former Defense Intelligence Agency head; Paul Nitze, former Deputy Secretary of Defense and SALT negotiator; Paul Wolfowitz, now head of the State Department's Office of Policy Planning; Thomas W. Wolfe of the RAND Corporation; Professor William Van Cleave of the University of Southern California; and retired Air Force General John Vogt.

Whereas previous national estimates of Soviet programs and aims had concluded the Soviets merely wanted rough parity strategically with the U.S., Team B concluded the Soviets were driving toward superiority over the U.S., which many of the critics had been arguing all along.

Most observers agreed the Team B exercise had been extremely instructive.

One who did not was Dr. Herbert Scoville, former head of the CIA's Office of Scientific Intelligence, who had had a heavy input into CIA analyses of Soviet military technical capabilities in the 1960s, and who in the late 1950s had made a critical but still classified judgment on technical feasibility that provided a technical basis for the initial "missile gap" overestimates of Soviet ICMB capabilities.

Scoville, who retired in the 1960s and who is now president of the Arms Control Association, was keynote speaker recently at an anti-defense-spending activists' seminar in Farmington, Conn. Afterwards he told The Bulletin that CIA estimates of Soviet military spending and capabilities had been as good as could be expected, and that the Team B exercise had been "very damaging."

But others, such as New York Senator Daniel P. Moynihan, reviewed the experiment and concluded otherwise. Moynihan observed that it's only reasonable "to look at how well one institutional arrangement, or line of argument, has predicted and explained recent events."

"In the current case," Moynihan concluded, "it would appear that the National Intelligence Estimates of the past dozen years have, by and large, failed this test."

In 1976, the Congressional Budget Office warned that the Soviet military was in "an unprecedented modernization program", and warned that earlier U.S. estimates of Soviet defense spending "may have been off by nearly 100 percent."

In late 1978, Fred C. Ikle', a former director of the U.S. Arms Control and Disarmament Agency during the early 1970's, wrote in Fortune magazine that "It was a massive intelligence failure in the 1960's that brought about our harmful persistence in unilateral restraint as a policy for inducing Soviet restraint.

"For 11 years in a row," Ikle' said, "the annual U.S. intelligence forecasts underestimated the number of missiles Russia would deploy.

"Whatever else this strange episode tells us, it reflects an almost perverse inability to learn from past mistakes," Ikle' said. "It is to be hoped that our intelligence organizations have since taken steps to be more receptive to new information, even when it contradicts accepted views."

But several months ago, Lee testified before the House Intelligence Committee that the same type of evidence that enabled him to make his correct forecasts for 1970 and 1972 Soviet defense spending, now showed that current CIA estimates are still grossly understated.

"The same evidence, which is as good or better than before, now leads me to conclude that the revised CIA estimates are nearly as much in error as before," Lee said.

"Moreover, the CIA estimates are so stereotyped and predictable that anyone can make them with a miniscule amount of effort."

How could the U.S. government spend so much money on crucial intelligence collecting and analysis but come up with such poor results?

"One of the downsides of the 1970's was that there was a great reluctance from the academic world, from industry, and even from other U.S. institutions to fully cooperate with the U.S. intelligence community," says Admiral Bobby Inman, new deputy CIA director.

"Perhaps it was the hope of a negotiated and ratified Strategic Arms Limitation Talks agreement, a hope that made analysts see things as they hoped they'd be, rather than as they are," says consultant Lee.

"It certainly wasn't the result of political orders from above, but probably it resulted from a particular mindset and atmosphere, self-feeding, that this is what the people above us think, so this is what we think," Lee says.

"Much of it probably has to do with mirror-imaging, thinking that the Soviets do things and think about things the way we do, listening to Soviet rhetoric directed to us instead of listening to what they're telling their own people and their own military, as well as ignoring institutional patterns evident in Soviet weapons systems development."

"There was probably the sincere hope that things would be different," another analyst told The Bulletin. "And a lot of it was probably the intellectual atmosphere in U.S. universities, the feeling there that the Cold War was more our own fault than anyone else's, that whole guilt complex that a generation of us learned."

Inman says there was a generation gap in the intelligence community.

"We have in fact lost across the community a lot of people who came in in the 1940s, who enjoyed the business, and who stayed for a career," Inman says.

He adds that there are "a variety of reasons, pay inversions and others, that have caused large numbers to retire.

"But we indeed have a building process I think, particularly in the analytical area, to give them the time.

"I have a sense that we need to expand the capability for them to be promoted while staying in the same general area, not to require them to move frequently on the managerial jobs in order for them to have a chance to be promoted, but to offer the capability that deep expertise in a country or a geographical area can also offer them the way to move up the promotion ladder," Inman says. "And if we can achieve that, I think we will help in improving the quality of the analytical product."

Former C.A Soviet strategic analyst David Sullivan, now a senior official at the U.S. Arms Control and Disarmament Agency, adds that recurrent problems included "inadequate attention to Soviet decisionmaking and political analysis; inadequate understanding of Soviet doctrine; inadequate appreciation of the possibility, indeed the likelihood, of Soviet deception; and a tendency to 'mirror-image' U.S. strategic posture and doctrine."

Adds another analyst: "Ignorance, incompetence, self-delusion, self-protection by critic-elimination after the errors had been made, and then history-rewriting."

Says an intelligence source: "The hell of it is that when the office heads who felt this way were doing their thing, they were promoting people that thought the same way, did things the same way, and gave the same answers. This was pervasive throughout the system."

"The trouble wasn't with the people who were recruited; it happened to them after they got there," says another observer.

"People learned that if you go along, you'll get along, and if you don't, we'll clobber you," another analyst told The Bulletin. "You either went along with the company line or you got out, and only a couple of guys went out."

A source told The Bulletin, "There was just an elitish attitude, that said, in effect, that they were the only people who were disinterested and without any axes to grind. But the personal axe of their own past errors turned out to be the biggest axe in town."

INTELLIGENCE BLUNDERS—PART III: A CHILLING HYPOTHESIS

DID A RED MOLE CAUSE THE CIA TO BLUNDER?

(By William Parham)

(This is the final part of a Bulletin series on 20 years of CIA underestimates of Soviet military spending, capabilities and plans. Today The Bulletin looks at a hypothesis suggested by a minority of the critics who during the 1960s and 1970s were unable to convince the CIA to correct its estimates.)

WASHINGTON.—Was the failure of the CIA to correctly estimate Soviet military spending and weapons development over the past 20 years purely the result of bureaucratic bungling, or an unfortunate, self-deluding mind-set by the experts, as most critics assume?

Another explanation for the two decades of low CIA estimates of Soviet defense spending and weapons development plans—despite repeated efforts by critics to get the agency to change its methods of analyzing the data—occurs to some people in the intelligence community who take seriously the possibility that the U.S. has been skillfully deceived by Soviet leaders.

"I personally believe that you can't just explain away this 20-year disaster as purely the result of bureaucratic incompetence," one intelligence analyst told the Bulletin.

Dr. William R. Harris of the Rand Corporation has written recently that Soviet Premier Khruschev may have activated a modern "double cross by national technical means" to dupe U.S. analysts into believing

the Soviets would have no reason for extraordinarily large missile deployments.

Photographic data (national technical means) from America's U–2 spyplanes had proved Soviet heavy bomber and missile deployments during the 1950s to be much less than claimed by Soviet leaders.

Thereafter, U.S. analysts were known to be relying increasingly on rapidly developing U.S. technical intelligence collecting abilities, including the interception of radio signals (telemetry) from Soviet missile tests.

"With an understanding of the technical indicators and methods of U.S. estimation of ballistic missile accuracy," Harris told the U.S. Senate Select Committee on Intelligence last year, "the Soviets managed to underrepresent the accuracy of intercontinental ballistic missiles."

Harris suggests that Premier Khruschev and KGB Chairman Shelepin, who had centralized strategic deception planning under a special KGB department. In 1959, may have systematically altered radio signals from Soviet missile tests to convince U.S. intelligence technicians in the 1960s that the accuracy of Soviet missiles was insufficient to threaten U.S. hard-site protected Minutemen and Titan II missiles.

Harris suggests that this ploy caused U.S. analysts to wrongly infer that the Soviets would not deploy large numbers of high-yield counterforce (silo-busting) missiles.

But, some critics worry that Soviet deception efforts may have been assisted by Soviet "moles", or long-term, deep-penetration agents who have been able to assume positions of influence in the U.S. government and U.S. intelligence agencies, and to provide the Soviets with "feedback" on the success of Soviet deception efforts.

To be sure, Soviet agents have in recent decades had remarkable success from time to tie in penetrating other U.S. Allies, governments and intelligence agencies.

Could the Soviet Union's KGB have penetrated CIA's analytical side, the Directorate of Intelligence?

When long-time CIA Soviet expert John Arthur Paisley's body was found in 1978 in the Chesapeake Bay with a bullet hole behind the left ear, authorities ruled his death a suicide.

Shortly afterward, Time magazine reported that a longstanding search for a Soviet "mole" in the CIA had been focused on Paisley's department. A Senate Intelligence Committee report on Paisley's background with the agency and his death remains classified. Authorities ruled publicly that there was no cause for a full-blown counterintelligence investigation.

One Soviet emigré writer who has published widely in the U.S., Lev Navrozov, discounts the mole/penetration theory as being far too crude and obvious:

"If the CIA or any other such expert outfit consisted entirely of Soviet agents it would never have dared tell Congress or the American people in 1974 that the Soviets might well be spending the same proportion of GNP on military purposes as the Americans were.

"Bona fide spies would have been prevented from telling such a fib by the fear of instantly being unmasked as impudent Soviet 'disinformation agents.'"

Navrozov has written that much of the CIA's ignorance of Russia "is spontaneous, rooted in a long-standing unwillingness to understand that Russia is not some exotic primitive tribe, but a vast, mortally dangerous, highly complex civilization, more sophisticated, advanced and rational in some ways than the United States.

"Much of it, however," Navrozov says, "is the result of deliberate self-insulation by the government-academic establishment, guarding its own prerogatives and tending to discriminate against talent or even ordinary knowledge when it comes from outside."

Other Bulletin sources argue that there are a number of well-known motives that could drive U.S. citizens to assist the Soviets, including ideological or monetary motives, or threat of blackmail because of family ties in the Soviet bloc, or even because they've been compromised in Soviet-bloc-photographed sex traps or other potential scandal discovered by the Soviets.

Earlier this year, the Washington Post reported that the KGB apparently tried to compromise an American military attache in the Soviet Union who was being considered for the position of Soviet affairs adviser to Vice President George Bush, a position in which he would have access to top secret information.

The attache, Major James R. Holbrook, was travelling with another U.S. military attache, Army Lt. Col. Thomas A. Spencer, in mid-January in the Soviet Union near the Polish border. Military attaches, who are under constant surveillance by the KGB, travel in pairs for reasons of safety.

Spencer fell ill, possibly from drugs, and became separated from Holbrook, who according to the Post "then became the target of an entrapment attempt that centered on attempts to get compromising photographs of him" at a party in the Soviet city of Rovno.

Holbrook, the Post said, may have been drugged, and was kept isolated by the Soviets for hours. But he reportedly refused to be blackmailed by sexually embarrassing photographs that had been taken of him, refused a Soviet blackmail offer to become a KGB agent, returned to Moscow, told his superiors of the incident, and was immediately flown home to the U.S.

Bulletin sources say hundreds of such Soviet-bloc staged blackmail attempts have been reported by U.S. citizens in the past two decades.

The intended victim is incapacitated with drugs, photographed in embarrassing situations, awakened, confronted with evidence of his unacceptable behavior, and then offered an easy way out—cooperation with the KGB in little favors here and there. Once the agent is hooked, the little favors then become bigger favors.

But there are even more fascinating methods the Soviets have used to try to plant their agents in the U.S. government.

A respected counterintelligence authority in Washington told The Bulletin about an extremely significant but publicly ignored aspect of a recently-cracked espionage case—the long-term, patient, laborious training of carefully selected youngsters of KGB parents.

The youngsters are groomed carefully by the KGB to eventually slip into influential positions in the U.S. government.

The most recent such case publicized was associated with the defection to the U.S. of Soviet KGB Col. Rudolph Albert Herrmann, announced last March by the FBI.

Herrmann, his wife, and his teenaged son had been illegal residents of the U.S. for 11 years, working for the KGB until "doubled" (convinced by FBI counterintelligence to become double agents on behalf of the U.S.).

The operation was discontinued and the family resettled and granted asylum after indications the KGB suspected Herrmann might be cooperating with the U.S.

But unnoticed by the Washington press corps was the information in the FBI press release that the KGB had spent many years already grooming Herrmann's teenage son for future deep-cover KGB service in Washington.

The KGB plan for the son was that he was to enter a prestigious U.S. college, study political science, and then go on to enter U.S. politics or government in Washington.

At the time the case was broken, the son was a student at Georgetown University and was a staff member of the school newspaper.

Before the operation was ended, the Soviets had repeatedly recalled the family to Moscow's KGB Center for retraining and debriefing, most recently in 1977.

Herrmann and his family had been trained by the KGB first in East Germany, then West Germany, then for six years in Canada until in 1968 they illegally entered the U.S. and quickly melted unnoticed into a neighborhood near New York City, where Herrmann, alias "Douglas," obtained work as a free-lance photographer and routinely supplied his KGB handlers, usually officials assigned to the Soviet U.N. mission and the U.N. Secretariat, with information on U.S. public opinion toward U.S.-Soviet trade negotiations, the neutron bomb and detente.

Herrmann's son traveled with him on numerous expeditions, including a trip to Chicago in 1976 to bury containers for another agent to pick up later, a trip to Fayetteville, Tennessee, to set up a series of hiding places, or dead drops, for messages, and was ordered by the KGB to befriend, monitor, and report on visiting Chinese exchange students.

The FBI said the KGB's codename for the son, "ERBE", translated "inheritor," hinted at the KGB's long-term plans for the son.

There are occasionally unconfirmed reports of villages in the Soviet Union where only English is spoken. And there are reliable accounts of the very long-term training in the Soviet Union of carefully chosen youngsters from trusted families for assignments involving infiltration of governments in English-speaking countries.

"Some time ago I met two Radio Moscow broadcasters, Victor Kuprianov and Joe Adamov, who were born and raised somewhere in Russia, and who had never been to the U.S.," a Washington counterintelligence expert told The Bulletin.

"Their accents were so good you'd swear they'd grown up as your next door neighbors.

"During the 1930s," this source continued, "a number of communists in the West left their own countries and went to live in the Soviet Union. Later their kids were trained and sent back to infiltrate their parents' original countries."

Whatever the success the Soviets have had or have not had in planting agents in the U.S. government, there still is a growing consensus in Washington that for the past 20 years, CIA analysts have tended to miss the boat on Soviet defense spending, weapons development and deployment.

Though there is a growing consensus in the Reagan Administration on the problem, a consensus on what needs to be done may take a little longer.

"We must expand and strengthen the analytic core and their support systems," new CIA Deputy Director Admiral Bobby Inman says.

"We need to be able to attract good people and establish a long-term management commitment, improving analysis through career incentives, training, investment in improving data bases, and support, and critical constructive product evaluation."

"To be truly beneficial to consumers," says new CIA Director William J. Casey, "the data collected must be subjected to critical and insightful analysis, conducted by trained, competent professionals with a rich background in the subjects required.

"The issues with which we have to deal require the best analytical capabilities, applied to unclassified as well as classified sources," Casey says.

"The attractiveness of intelligence analysis as a profession, part-time as well as full-time, needs to be increased, and we need to tap the insights of the nation's scholars in the efforts to upgrade the quality of intelligence analysis," Casey says.

"It is unfortunate that the CIA, in effect, has a monopoly on estimating Soviet defense expenditures in the U.S. intelligence commu-

nity," agrees Washington consultant and ex-CIA analyst William T. Lee.

"There is no effective competitive analysis to keep the CIA honest. At the very least," says Lee, "there is a serious need for regular outside critique and reassessment of our estimates."

Casey adds, "We must search for new and better ways to get continuing input from the outside world in order to gather information available inside and outside of government, and to get the best analysis of the full range of views and data available.

"A revival of the President's Foreign Intelligence Advisory Board (discontinued during the Carter Administration) can contribute substantially to this," Casey says.

Finally, most analysts agree that an improved U.S. counterintelligence effort would help to guard against Soviet penetration or compromise of key intelligence and government posts.

"We are really wide open right now as a society," says one Washington counterintelligence expert.

"Our defenses have been severely eroded, and the Soviets have built up 63 years of very successful experience in penetrating their opposition. There's a very good chance that we've suffered very severe damage without knowing it."

Says another intelligence analyst: "Our counterintelligence is desparately undermanned, morale has been down, and nobody seems to care that sometimes it seems like the Soviets can probably exert more pressure in this town than the most powerful domestic lobbying group."

A source familiar with U.S. counter-intelligence efforts adds: "Soviet and Soviet-bloc espionage agents in the U.S. outnumber our guys trying to catch up with them. We simply can't.

"We're outnumbered in our own country to the extent that we can't even monitor Soviet bloc covert action on our own home ground."

Another counterintelligence source told The Bulletin, "There are a lot of opportunities available, and our weaknesses are substantial, but the Soviets aren't always able to exploit them because of our own weaknesses and problems."

"If we make it through, it'll probably be a case of God watching over those who are incapable of watching over themselves."●

NATIONAL RECOGNITION DAY FOR VETERANS OF THE VIETNAM ERA

● Mr. BURDICK. Mr. President, it is important for the American people to recognize the contribution that men and women serving in the Armed Forces during the Vietnam era have made to our country. The contribution is significant not only because the conflict claimed more than 55,000 American lives and left many wounded and permanently disabled, but Americans asked fellow Americans to participate in an unpopular war.

No war has ever been popular with the American people, but regardless of individual positions it has been their tradition to honor those veterans and their families who made tremendous personal sacrifices for our country. This has not been true with Vietnam-era veterans. As a nation not only do we need to recognize those who suffered the most but we must also demonstrate our commitment to them by supporting legislation and programs to meet the unique needs of Vietnam-era veterans.

In an effort to address some of those needs, I have cosponsored a bill to extend eligibility for services at vet centers until September 1983. Current law limits services to those who sign up prior to September of this year, but since many of the 91 centers have been in operation less than 1 year, the majority of Vietnam vets have not even had the opportunity to learn about the centers.

North Dakota has one vet center in Fargo, another will open in Minot if the Federal civilian hiring freeze is lifted by the administration. According to the Veterans' Administration, 11,000 of the 18,000 Vietnam-era veterans from North Dakota served in combat. In North Dakota, as well as elsewhere, vet centers are popular with those who have utilized them. I firmly believe that the services should continue to be available for another 2 years.●

THIS NATION'S AGRICULTURE

● Mr. BURDICK. Mr. President, I would like to take a few minutes today to comment on this Nation's agriculture. It is a marvelous system when you stop to think about it. We have available to us daily an enormous variety of food in huge quantities. No one in this country has an inadequate diet because food does not exist. Hunger and inadequate diets exist for other reasons. But, most of us have the means and the food.

Agriculture is a necessary and formidable force. Farmers this year will spend about $150 billion on production expenses and another $35 billion earned on and off the farm on family living. Farmers will spend $13 billion on farm machinery. They operate more than 4 million tractors and about 3 million trucks. They consume more steel than the automotive industry. They will spend $10 billion on wages and contract labor. Farmers will spend another $10 billion on energy. The production, processing, and distribution of food and fiber accounts for one-fifth of the U.S. gross national product.

Modern agriculture is a huge, unwieldy, and diverse industry—incapable in itself of rapidly adjusting production to market demands. Modern farming is a highly technical and complex business. It is interesting to travel across my State, North Dakota, during the growing season and watch farmers in action and juxtapose that with farmers in Southeast Asia tending rice paddies with the same type of hand-held tool used 400 years earlier, or families in Egypt irrigating small fields with hand pumps exactly like those used centuries ago, or even in modern industrial Germany where some farmers haul hay on ox-drawn carts .

It is a good day for us to think about the sources of our good fortune—both the natural physical features and our farm people.

Mr. President, one of our farm organizations in North Dakota, the North Dakota Farmers Union, has sent me their policy statement. I ask that it be placed in the RECORD.

The policy statement follows:

[Telegram]

NORTH DAKOTA FARMERS UNION,
Jamestown, N. Dak., March 20, 1981.

Senator QUENTIN BURDICK,
U.S. Senate,
Washington, D.C.:

The following policy statement was adopted by the North Dakota Farmers Union Board of Governors (county presidents) at their meeting on Thursday, March 19, during the National Agriculture Day observance:

"Today, March 19, has been set aside through state and national proclamations as "National Agriculture Day" to honor those within agriculture and to give recognition to the contributions of agriculture to this society. The North Dakota Farmers Union joins in this observance.

"The theme of this year's observance is "Agriculture: It's Your Heartbeat, America!"

"While much of the emphasis of today's observance is designed to illustrate the vital role that agriculture has in the state's and the national economy, the day should also be dedicated to discussion of the national food and agricultural policies which will re-establish the family farm system of agriculture as the primary food production system for this nation.

"It is ironic that on this very day set aside to honor and recognize agriculture, the US Senate is considering legislative action which would penalize agriculture for its ability to effectively produce an abundant and reliable supply of food for the American public.

"Today's US Senate review of dairy price support legislation will be an indication of whether National Agriculture Day is merely an exercise in empty promotional rhetoric or if it is a meaningful commitment to the future of agriculture.

"The family farm system of agriculture is truly the "heartbeat of this nation." However, without substantive changes in the direction of national and food agriculture policies, the pulse of the family farm will continue to weaken, National Agriculture Day should mark the day in which the heartbeat is strengthened, rather than the day that the eulogy is performed."

STANLEY M. MOORE,
President.

TRIBUTE TO WES UNSELD

Mr. HUDDLESTON. Mr. President, today I wish to honor a native Kentuckian who has reached the pinnacle of his chosen profession—professional basketball.

From the playgrounds of Louisville, Wes Unseld began a career which saw him lead his high school basketball team to two Kentucky State championships. As a member of the University of Louisville team, Wes led the Cards to postseason tournaments each of his three seasons and was named first-team All America by AP, UPI, and other polls as both a junior and senior.

Voted Most Valuable Player in the league and Rookie of the Year in his first season in the National Basketball Association, Wes has for 13 years been the "heart and soul of the Bullets' franchise" and was instrumental in the Bullets' charge to the NBA championship in 1978.

Not only a leader on the basketball court, Wes has been active in community activities and made a strong commitment to the youth of the Baltimore area.

We applaud Wes for his many out-

standing achievements and wish both him and his wife, Connie, well in his new career as a vice president of the Bullets and the Capital Centre.

I ask that the text of Betty Cuniberti's story about this remarkable gentleman, which appeared in the March 23 Washington Star, be inserted in the RECORD.

The article follows:

TRIBUTE TO WES UNSELD

(By Betty Cuniberti)

At the Newburg community playground on the outskirts of Louisville, Ky., they rolled dice, drank wine and played basketball day and night, lining up cars near the sidelines and turning on the headlights when the sun went down.

The important thing they did there was to keep track.

Over years and years they could give you the exact numbers, the important ones: how many of them stayed on this asphalt fantasy stage, how many of them left, and how many of them left and came back again.

They separated the men from the dreamers.

"Those who didn't make it," said Wes Unseld, "were instrumental in the lives of those who did. I remember when I was there, there were four away, three back and one to go."

Wes Unseld was one to go.

He would never go back to that playground which he says took him from boy to man. But he says if he did, he'd find many of the same people he had played with, edging into their 40s to the clicking of old dice and the taste of too-familiar wine.

Despite peculiar size and limited natural abilities, Wes Unseld separated himself from the dreamers. The man whom Bullets owner Abe Pollin calls "the heart and soul of this team from the first day he set foot on the court" is retiring after 13 years with the Bullets in Baltimore and Washington, walking away on knees that now qualify as the eighth and ninth wonders of the world for continuing to function at all.

In a recent column on Unseld's announced retirement, an orthopedist was quoted as saying that one of those knees is "so ugly inside, you wouldn't want to look." Bill Neil, the Bullets' physical therapist and a longtime friend of Unseld, was asked about that and responded, "Yes, but don't discount his ankles. His ankles are worse."

Neil said that the 35-year-old Unseld faces a life of pain and medication increasing with each decade. The pain has been going on for years but he only first discussed it with his wife, Connie, two weeks ago, and only then because it was finally time for the two of them to talk about Wes' retirement.

Much to his distaste Unseld is being honored left and right. He has been offered a job as vice president of the Bullets and the Capital Centre and an official Wes Unseld Appreciation Night is scheduled for the Bullets' last regular season home game next Sunday.

Never mind the fact that Unseld was the league's rookie of the year, turning the Bullets around from 36 wins and 46 losses in 1968 to 57-25 in 1969. Forget that the Bullets never had a winning season before he arrived, and have had 10 since.

Never mind the fact that Boston Celtics president Red Auerbach calls Unseld "the greatest outlet passer of them all, the only one I would rate better than Russ (Bill Russell)." Never mind that the coach of Auerbach's team, Bill Fitch, says he's "never seen an opponent who's gotten so much out of the tools he was given to work with," and don't listen to Chris Ford, a player on that team, who touches on the most sensitive issue in the National Basketball Association today, that "we need class players like that for the image of the NBA."

Unseld is no doubt aware that he stands out in a league that too often finds its players in headlines for alcohol, drug and sex charges, not to mention bitter salary negotiations for paychecks so big you and I might have to pool fingers to count the commas.

Unseld does not want to hear any of this praise.

At a retirement press conference he grudgingly attended only because Pollin insisted, Unseld glared at reporters in the way only he can, his almost Oriental-looking eyes piercing his audience from their place atop that forbidding, 6-foot-6, 267-pound body. The floor had been opened for questions. Unseld glared, and there were none.

"See," he said aside to Bullets management personnel. "I've got them well trained."

Unseld could be a pain and a half to a reporter seeking an answer to the simplest question. Partly, he refused to cooperate because of an incident his second year in the league when a New York writer somehow mistook him for another player on the court who had punched an opponent. The writer wouldn't believe Unseld when he said he didn't hit anybody. It bothered Unseld. His integrity had been questioned. He never thought of himself as a great player, and he didn't much care what someone said or wrote about that. But integrity was important. It was everything.

But with or without the New York incident, Unseld came to believe in keeping to himself.

"I don't think athletes deserve all the praise and notoriety they get," said Unseld. "There are people who are doing much better things. If people could just keep sports in perspective, it wouldn't be so bad."

Unseld was great in his quietness and quiet in his greatness. While other players whimpered and skipped games with injuries medical science could not detect, Unseld endured needles half a foot long in his peanut-brittle knees and played without complaint. He wanted to retire before this season because of the pain, but he felt obligated to come back because the team, quite frankly, is disintegrating into something awful. And it bothers him even now that he is quitting "at the wrong time. It's easy to quit when your team is not doing well."

The things Unseld has been most reluctant to discuss are the best things. But now he will.

He recalls the day he was sent to Baltimore's Kernan Hospital to be treated for an ailment he described as a cold. He saw children missing limbs, children with burns. "I felt small," the big man said. "You see kids struggling to sit up, and here I was complaining about a cold."

That happened seven years ago. Since then, he has been a steady volunteer in the Kernan Hospital physical therapy department and has become the youngest member of the board of directors.

Neil, the head physical therapist there, says, "I like to call Wes for the problem cases, kids who are tough, mixed up, mean and belligerent. He does a better job on that kid than a high-priced social worker."

Half the proceeds from Wes Unseld Appreciation night will go to Kernan Hospital, by his request. He asked that the other half go to Washington's Children Hospital.

After basketball, and maybe another knee operation, Unseld hopes to return to school for a master's degree in special education. He looked into physical therapy, but says he fears he doesn't have the qualifications to be accepted into a school in the area.

Unseld does not appear at Kernan Hospital as often as he used to, partly because last January, he and Connie bought what was a nursing school building and opened their own day-care developmental center for children. Unseld helps the children learn motor skills, checks their work, built a sandbox, dug up a vegetable garden, used his influence to bring doctors in for eye tests, arranges field trips, and, as Joyce Smith, one of the teachers says, administers "a lot of kissing and hugging."

This is the Unseld the public doesn't see but surely senses. They could tell what kind of man he was by watching what kind of player he was.

People are amazed that Unseld, with virtually no foot speed or jumping ability, played against centers as much as nine inches taller and still distinguished himself. More than anything, Unseld was a unique player. He used his quick hands, awesome strength, timing and intelligence for all they were worth. He excelled most in the least selfish aspect of basketball—passing. He could have scored much more than the 10,000-plus points he will finish with, but he came to a team already laden with scorers so he did the dirty work. He went to the glass and fought for rebounds. He set bruising picks, and foremost in the memory of anyone who saw him, he passed.

The lasting picture is Unseld swatting down a rebound on the defensive board, and in one motion, turning and heaving the ball from overhead 70 feet to a Kevin Loughery or Mike Riordan streaking downcourt for a layup. Loughery and Riordan made their livings off those Unseld passes.

Ultimately it was Unseld who brought the Bullets their 1978 world title and the city of Washington its first sports championship in 36 years. He insured it with two free throws in the final 12 seconds of the final game. He had dreamed for 10 years of celebrating a world title, but when it came, he and Connie went out and got sandwiches, went back to their Seattle hotel room and Unseld collapsed into sleep.

While his accomplishments in basketball mean a great deal to Unseld, he refuses to think of himself as a big man.

His father was a big man.

Because he was so consistent, because he showed no joy on the court, because he never sought publicity and always performed the thankless chores in utter quiet, they call Unseld a punch-the-clock worker.

That is how he thinks of himself. Maybe it is in his blood.

His father, with a sixth-grade education, helped raise his own seven children, two orphaned foster children and, in Unseld's own sad and serious words, his father "killed himself working."

Unseld's father worked the graveyard shift oiling harvesters and by day he worked construction. He was the inspiration. Unseld's mother worked in a school lunchroom. She was the disciplinarian. Unseld recalls being told to take a bath and shooting back, "Jackie Robinson doesn't get told to take a bath."

His mother threw him in the tub head first with his clothes on.

He shared with four brothers a bedroom his father built onto the house.

"We called it the snake pit," said Unseld. "And there were days our sisters would not walk in there."

Though neither parent had been to college, they insisted on it for all their children. Today five of the seven Unseld children have teaching degrees.

"Black people feel college is your only chance," said Unseld. "You don't stand a prayer without it."

Unseld was forced into his first basketball game by a fifth-grade teacher and was so embarrassed at how poorly he played he didn't try it again for four years. Football, he says, was "a manly sport," basketball "a sissy sport."

He came to change his mind. Basketball was going to get him through college. And he

even started to like it, perhaps because he played it a little like football. Today he says what he'll miss about the game is "the bangin'."

Practicing every day after high school meant he missed the only bus home, "so my brother and I walked home six miles," said Unseld, "while the white kids got in their cars and drove home." He attended a predominantly white school, "and it wasn't so bad," said Unseld, "except that for the first time, I started realizing what I didn't have."

Basketball would bring him those things, too. But he didn't know it at the time. The first thing Unseld can remember wanting to be was a cross-country truck driver. That seemed to be the way to see the world.

His parents thought Unseld would become a doctor. He was always bringing home sick and injured animals, all kinds, even snakes, and nursing them to health.

By the time he was a high school senior Unseld had literally hundreds of options. A member of the National Honor Society, Unseld could choose among academic scholarships. But he was also a basketball high school all-American, an honor that opened up even more opportunities. At that time he was the best player ever reared in Louisville, and he could have gone almost anywhere. But he stayed home and attended the University of Louisville, hardly the glamour capital of college basketball.

"My father had had his second heart attack by then," said Unseld. "I really wanted to stay where he could see me play. I was also very much a mama's boy. I still am."

Today it is considered unusually noble if a fine college athlete gets a degree at all. It was important to Unseld not just to obtain his undergraduate degree (history) but also to get it in the normal amount of time, not string it out through summer school or an extra year.

That accomplished, he had to choose between the Kentucky Colonels of the old American Basketball Association and the Baltimore Bullets of the NBA, leagues dueling for college talent with fistfuls of cash. Again his father was the key figure in the decision.

"I wanted to stay home and play for the Colonels," said Unseld. "I don't want to open up a Pandora's box, but the Colonels did some very unscrupulous things. Some unsavory actions on their part caused me to sign with the Bullets.

"They offered my father money if he could convince me to go to the Colonels. It has gone down as my decision, but my father told me, 'I didn't raise fools.' To him, it bordered on selling me. He would not hear of my playing for the Colonels."

So he headed away from home for the first time, alone to Baltimore. He did not employ an agent to negotiate his salary. Instead, he and Pollin agreed to meet, each with a salary figure on a piece of paper. Pollin turned over his piece of paper first. Unseld looked at it and, embarrassed, crumbled his own.

"His figure was higher," Unseld recalled. "A lot higher."

That is the way the negotiations went for 13 years.

During those years, Unseld married a principal's daughter from Louisville, and when the Bullets moved to Washington, the Unselds stayed in Baltimore. Baltimore, says Unseld, "is more like Louisville." Parents of 7-year-old Kimberly and 5-year-old Westley, they have lived in the same house 11 years now. Connie drives a 1973 Volvo. The children attend public schools.

Unseld had enough money to tow the family to a Chevy Chase mansion in a fleet of Cadillacs. He had enough money to buy a farm back in Kentucky for off-season residential splendor. But he stayed in Baltimore, year-round, and plans to remain there after retirement.

What he spent a big chunk of his money on was the Unselds' School.

It began as something of a giant gift to Connie, who five years ago made simultaneous (but then unrelated) discoveries that alarmed her: athletes' wives had "no identity," and child-care facilities in Baltimore were scarce and below what she considered to an acceptable level of quality.

"I had been home with children seven years, and that was not really fulfilling," said Connie. "I went through the whole thing—gained weight, took yoga, karate, did volunteer work."

During this time, she was looking for a day-care center for their daughter and did not find anything she liked.

"She kept complaining about it," said Wes. "So finally I said, 'Stop complaining and do something about it.' She certainly took my advice."

A five-year search for a suitable building ensued and the Unselds finally found one that could meet regulations in the old nursing school. Their aim is high: to provide more than just bab,sitting service. That is why it is called The Unselds' Developmental Center for Children.

As Unseld walks through the school with a reporter, he insists he doesn't do that much around here. He peeks into every doorway.

"Mr. Wes!" the children invariably screech.

"I like your dress, Danielle," Unseld says.

"Michael," says Unseld in another room, "let me see your letters. Did you do this yourself?"

One child, he points out, couldn't dress or feed himself when he came here. Many weren't toilet-trained, but these things were taught, which is almost unheard of in a day-care center. One little girl is moving away soon, Unseld says, and he'd like one of the Star photographer's pictures of the two of them. Another girl just got out of the hospital. He calls each child by name. But of course, he doesn't spend much time here. Only three times a week in the season, every day in the offseason. Connie tells you that. He also knows every teacher, in fact paid for 12 of them to take a first-aid course.

This clearly has become as much his crusade as Connie's.

Will it be enough to offset what he calls the withdraw? He doesn't know. He doesn't feel it yet. He will.

But at least he left the game a legacy. Didn't he?

"I don't feel I've left a legacy," said Unseld, sitting in the office at the school. "I don't think I have a place in basketball history. Whatever I did will be erased. That's the way it should be.

"I never thought I'd leave an indelible mark on the game. Few players play in such a way that they change the game, leave a mark. I'm not one of them."

Then what was it all about? What was he?

"Somebody," said Unseld, "who tried to do the best job he could do every night, realized his best wasn't good enough on a lot of occasions, and stunk up the joint on some occasions."

It may be more of a legacy than he cares to admit.

PROGRAM

Mr. BAKER. Mr. President, I have cleared the request I am about to make with the distinguished minority leader.

Mr. President, I ask unanimous consent that the time for the two leaders on Monday under the standing order be reduced to 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, might I inquire if there is an order to resume the consideration of the Riegle amendment on Monday at a time certain?

The PRESIDING OFFICER. Yes, there is.

Mr. BAKER. And a time certain to conclude the consideration of the Riegle amendment?

The PRESIDING OFFICER. One hour of debate will be in order on Monday morning.

Mr. BAKER. Mr. President, as I recall, there is an order to stack votes on Monday until the hour of 2 o'clock. Is that not correct?

The PRESIDING OFFICER. Yes.

Mr. BAKER. Mr. President, as I see the schedule, the Senate will stand in recess until the hour of 9:45 a.m. on Monday. At that time, after the recognition of the two leaders under the standing order, which will be diminished to 5 minutes each, and an adjustment of time until the hour of 10 o'clock, the Senate will resume consideration of the Riegle amendment and debate will continue for 1 hour under the terms and conditions previously ordered. Any votes that may be ordered on this amendment or any other amendment that may be taken up on Monday prior to the hour of 2 o'clock will be stacked until 2 o'clock and will occur back to back at that time.

RECESS UNTIL 9:45 A.M., MONDAY, MARCH 30, 1981

Mr. STEVENS. Mr. President, if there be no further business to come before the Senate, I move, in accordance with the order previously entered, that the Senate stand in recess until 9:45 a.m. Monday, March 30, 1981.

The motion was agreed to; and at 5:41 p.m., the Senate recessed until Monday, March 30, 1981, at 9:45 a.m.

NOMINATION

Executive nomination received by the Senate March 27, 1981:

GENERAL SERVICES ADMINISTRATION

Gerald P. Carmen, of New Hampshire, to be Administrator of General Services, vice Rowland C. Freeman III, resigned.

CONFIRMATIONS

Executive nominations confirmed by the Senate March 27, 1981:

UNITED NATIONS

Charles M. Lichenstein, of the District of Columbia, to be the Alternate Representative of the United States of America for Special Political Affairs in the United Nations, with the rank of ambassador.

IN THE COAST GUARD

The following officers of the U.S. Coast Guard for promotion to the grade of rear admiral:

Capt. Robert S. Lucas, USCG.
Capt. Kenneth G. Wiman, USCG.
Capt. Edwin H. Daniels, USCG.
Capt. Clyde T. Lusk, Jr., USCG.

Vice Adm. James S. Gracey, U.S. Coast Guard, to be the Commander, U.S. Coast

Guard Atlantic area with the grade of vice admiral while so serving.

Rear Adm. James P. Stewart, U.S. Coast Guard, to be the commander, U.S. Coast Guard Pacific area with the grade of vice admiral while so serving.

The above nominations were approved subject to the nominees' commitments to respond to requests to appear and testify before any duly constituted committee of the Senate.

DEPARTMENT OF THE TREASURY

Norman B. Ture, of Virginia, to be Under Secretary of the Treasury.

Beryl Wayne Sprinkel, of Illinois, to be Under Secretary of the Treasury for Monetary Affairs.

IN THE U.S. AIR FORCE

Lt. Gen. Evan W. Rosencrans, U.S. Air Force (age 54), for appointment to the grade of lieutenant general on the retired list pursuant to the provisions of title 10, United States Code, section 8962.

IN THE U.S. ARMY

The following-named officer to be placed on the retired list in grade indicated under the provisions of title 10, United States Code, section 3962:

To be lieutenant general

Lt. Gen. Charles Robert Myer [redacted], (age 56), Army of the United States (major general, United States Army).

The following-named officer under the provisions of title 10, United States Code, section 3066, to be assigned to a position of importance and responsibility designated by the President under subsection (a) of section 3066, in grade as follows:

To be lieutenant general

Maj. Gen. William Ivan Rolya [redacted], Army of the United States.

IN THE NAVY

The following named officer of the U.S. Navy for permanent promotion to the grade of rear admiral, pursuant to title 10, United States Code, sections 5780 and 5791.

To be rear admiral

Raymond N. Winkel

IN THE MARINE CORPS

The following-named brigadier general of the Marine Corps Reserve for temporary appointment to the grade of major general under the provisions of title 10, United States Code, section 5902:

John B. Hirt

The following officers of the Marine Corps Reserve for appointment to the grade of brigadier general under the provisions of title 10, United States Code, section 5902:

Constantine Sangalis
William H. Gossell

DEPARTMENT OF DEFENSE

Fred Charles Ikle, of Maryland, to be under Secretary of Defense for Policy.

William H. Taft, IV, of Virginia, to be General Counsel of the Department of Defense.

IN THE AIR FORCE

Air Force nominations beginning Tommie G. Church, to be captain, and ending David F. Woolwine, to be lieutenant colonel, which nominations were received by the Senate on February 23, 1981, and which appeared in the CONGRESSIONAL RECORD on February 24, 1981.

Air Force nominations beginning John W. Baxter, to be lieutenant colonel, and ending Douglas B. Neumann, to be lieutenant colonel, which nominations were received by the Senate on March 6, 1981, and which appeared in the CONGRESSIONAL RECORD of March 17, 1981.

IN THE ARMY

Army nominations beginning Phillip G. Abbott, to be colonel, and ending John F. Clary, to be lieutenant colonel, which nominations were received by the Senate March 2, 1981, and which appeared in the CONGRESSIONAL RECORD of March 3, 1981.

Army nominations beginning Howard R. Bixby, to be major, Regular Army and lieutenant colonel, Army of the United States, and ending Michael S. Tucker, to be second lieutenant, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of March 17, 1981.

Army nominations beginning Steven B. Acenbrak, to be second lieutenant, and ending Catherine M. Zipoli, to be second lieutenant, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of March 17, 1981.

IN THE NAVY

Navy nominations beginning Thomas E. Digan, to be ensign, and ending Steven G. Detsch, to be commander, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of February 24, 1981.

Navy nominations beginning Philip J. Aarons, to be lieutenant, and ending Deborah A. Zanot, to be lieutenant, which nominations were received by the Senate March 2, 1981, and which appeared in the CONGRESSIONAL RECORD of March 3, 1981.

Navy nominations beginning Keith T. Adams, to be lieutenant, and ending Jennifer L. Mustain, to be lieutenant, which nominations were received by the Senate March 2, 1981, and which appeared in the CONGRESSIONAL RECORD of March 3, 1981.

Navy nominations beginning James E. Halwachs, to be lieutenant commander, and ending Larry D. Aasheim, to be ensign, which nominations were received by the Senate March 6, 1981, and which appeared in the CONGRESSIONAL RECORD of March 17, 1981.

Navy nominations beginning Rudolph Abel, Jr., to be captain, and ending Jane E. Sharp, to be commander, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of March 17, 1981.

IN THE MARINE CORPS

Marine Corps nomination of Bonnie H. Bass, to be major, which nomination was received by the Senate March 2, 1981, and which appeared in the CONGRESSIONAL RECORD of March 3, 1981.

IN THE COAST GUARD

Coast Guard nominations beginning Welton H. Jones, Jr., to be captain, and ending Marcus J. Wallace, Jr., to be captain, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of January 5, 1981.

Coast Guard nominations beginning John L. Glen, to be lieutenant commander, and ending Michael P. Farrell, to be ensign, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of January 5, 1981.

Coast Guard nominations beginning Michael B. Karr, to be lieutenant, and ending Timothy C. Hess, to be lieutenant, which nominations were received by the Senate January 15, 1981, and which appeared in the CONGRESSIONAL RECORD of January 19, 1981.

Coast Guard nominations beginning Michael G. Barrier, to be lieutenant commander, and ending Edward R. Williams, to be commander, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of February 24, 1981.

Coast Guard nominations beginning Robert R. Albright II, to be ensign, and ending James R. Yacobi, Jr., to be lieutenant (junior grade), which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of February 24, 1981.

Coast Guard nominations beginning Wallace F. Kelley, to be commander, and ending Michael T. Bohlman, to be commander, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of March 5, 1981.

Coast Guard nominations beginning Carsten L. Henningsen III, to be lieutenant (junior grade), and ending Lewis S. Blankenship, to be lieutenant (junior grade), which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of March 17, 1981.

HOUSE OF REPRESENTATIVES—*Monday, March 30, 1981*

The House met at 12 o'clock noon.

The Reverend Mr. Charles Mallon, permanent deacon, Holy Family Church, Mitchellville, Md., offered the following prayer:

I love Thee, O Lord, my strength. The Lord is my rock, and my fortress, and my deliverer, my God, my rock, in whom I take refuge, my shield, and the horn of my salvation, my stronghold. I call upon the Lord, who is worthy to be praised, and I am saved from my enemies.—Psalms 18: 1-3.

Father, raise our national awareness to the fact that we are a united country with a common responsibility toward all. Help us to set aside regional and parochial priorities and raise our consciousness to those issues which strike at the fiber of our society.

Father, You sanctioned the formation of our society with the unalienable rights of life, liberty, and the pursuit of happiness. We ask Your continuing blessing on those of us who make this commission a reality. And we ask Your pardon for those of us who enjoy the benefits of our Nation but fail to comprehend Your purpose.

We ask this through Christ our Lord. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

TIME FOR THE PRESIDENT TO LET AMERICANS KNOW FACTS ABOUT THE EMBARGO

(Mr. ALEXANDER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ALEXANDER. Mr. Speaker, during the Presidential campaign, Mr. Reagan blasted the Soviet grain embargo as unfair and ineffective. Yet on Saturday, March 28, he announced that the embargo would not be lifted.

More important than what he said was what he did not say. He did not say that the continuation of the embargo, coupled with his proposals for dismantling the farm price support system, would decimate farmers by depressing prices while removing the "safety net" represented by the target price and farmer-held reserve systems.

He did not tell Americans that continuation of the embargo will add to our balance-of-trade deficits and severely harm the export expansion program so painfully put in place during the past 3 years.

He did not tell Americans that the embargo forces the American farmer—the most productive sector in our economy—to shoulder the burden of U.S. foreign policy alone.

Mr. Speaker, it is time for the President to let Americans know the facts about the embargo and it is time for the Congress to act to define what our national policy with regard to embargoes of food ought to be.

WASTEFUL MILITARY SPENDING IS NOT THE ANSWER

(Mr. WHITTEN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WHITTEN. Mr. Speaker, like you and the membership of the House, I believe we must stop inflation and work toward a balanced budget. To do that, I further believe we must reduce interest rates, cut out wasteful spending, and, of course, provide for national defense and increase production. However, a factor which greatly disturbs me is that the benefits from cutbacks in unnecessary or wasteful Federal spending avail little net savings because such large increases are recommended by both national political parties for additional defense spending.

To increase defense spending does not necessarily mean receiving more defense or better defense, but is likely to weaken defense. The wasteful spending in the name of defense, which I know about and hear of, is very frightening because such wasteful spending is highly inflationary and might lead the President and our leaders to believe we are much stronger than we are and to take steps that are dangerous in the extreme.

It is on that basis we asked for an investigation of military procurement practices. What we have learned, to date, seems to confirm my fears. I truly believe we must keep up business activity, increase production, and balance the budget at a high level if we are to meet the interest payments on the present national debt and to meet essential needs of the people.

We must recognize that we must distinguish between productive spending and keep that going while we cut down or cut out wasteful spending. The benefits of cutting out wasteful spending, however, will be neutralized if the same or greater amounts are added to wasteful military spending, which so many seem to think is equivalent to true defense preparedness.

Our concern over these matters is not new. Years ago, the Defense Appropriations Subcommittee requested, and the investigative staff was directed to conduct, a similar investigation into the procurement practices of the Department of Defense. The investigation substantiated our fears that the DOD was spending billions of dollars needlessly and actually endangered real defense. These findings appeared in the hearings before our Committee on Appropriations for 1956.

Without going into the details of the 1956 report, let me say that findings were such that the then Secretary of Defense, Mr. Wilson, said it made him mad and sad to realize the situation existing in his Department. Subsequently, many other investigations have been made with beneficial results.

The investigative staff, under direction, has already developed information on a number of issues. A summary of these findings has been incorporated in a "Briefing Book" which has been provided to each member of the Defense Appropriations Subcommittee and to the Secretary of Defense. This "Briefing Book" shows instances of mismanagement, waste, duplication, and a few areas in which our readiness has been seriously degraded.

Chairman ADDABBO of the Subcommittee on Defense and I wrote the Secretary of Defense on February 4 requesting that the finalization of any new ship and submarine construction contracts be held in abeyance. This action was considered necessary because of a new clause contained in the January 1981 contract with Electric Boat for the construction of another Trident submarine. This new clause permits Electric Boat to procure commercial insurance for defective workmanship, defective material, mismanagement, and delay and disruption. I find it incredible that the contract permits the cost of such insurance as an overhead charge under the contract. I hope that this will be a matter of detailed discussion during the course of hearings before the Defense Subcommittee.

It is reported that an important missile in our inventory is unsafe for use aboard a ship due to radiation hazards. Because of sensitivity to radar, the missile cannot be removed from the ship's magazine and loaded aboard

□ This symbol represents the time of day during the House proceedings, e.g., □ 1407 is 2:07 p.m.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

an aircraft lest the missile be inadvertently detonated. This situation has existed for several years, and although the missile's firing circuit could be changed for $2 per missile, no corrective action has been taken.

A very similar situation exists which precludes the loading of a gun on one of our aircraft. The ammunition for the gun was found to be unsafe for use aboard Navy ships since the ships' radar—and even static electricity—could accidentally detonate the rounds. Several thousands of costly handmade rounds were purchased, but they too were found to be unsafe. During a recent important deployment, this particular aircraft operated with empty magazines. This deplorable situation speaks for itself.

There have been several significant and critical reports on the use of professional service contracts—civilians employed to perform technical operations. The criticisms touch on the problem of unsolicited proposals presented in almost half of the contracts, use of sole-source awards in about two-thirds of the cases, and failure to adequately consider available in-house capability, the total extra cost of which has not yet been determined.

In fiscal year 1979, it is estimated that the Department of Defense spent about $1.6 billion on all types of professional service contracts. This seems to be a runaway method of doing business. We expect this trend to be reversed. However, I fear that expenditures in this area may increase as the proposed Department of Defense increases recommended by the President may include such additional unnecessary expenditures.

The highly complex and difficult problem of maintaining weapons systems being procured by our military departments has been a concern for several years, not only from a cost standpoint but upon the dependability in combat. I am sure that this reservation is shared by members of the Defense Subcommittee.

Recently, the number of civilian personnel aboard four aircraft carriers operating with the Atlantic Fleet in the Indian Ocean totaled 131 at a cost of approximately $80,000 per man-year.

The commander of a Navy F-14 fighter wing advised the investigative staff that his unit would experience at least a 50-percent reduction in operational capability without the present level of civilian contractor support.

A high-ranking military official advised the investigative staff that without the "technical mercenaries," the E3A (AWACS) aircraft could not function as a viable airborne warning system—including those in Saudi Arabia.

The Navy's dependence on civilian contractor personnel has increased to such a degree that they are used as logistics support representatives to locate and facilitate the delivery of spare parts within and through the Navy's own supply system.

The last subject I will mention involves what should have been a rather simple procurement action. However, the Army's design and subsequent action to procure a self-contained transportable hospital (MUST) to care for our wounded turned out to be a catastrophic exercise in incompetence.

To date, the Army has lost at least $8.5 million as a consequence of the procurement of defective equipment.

For instance, 207 of 384 multipurpose shelters had to be disposed of at a cost of $2.3 million.

A total of 315 corridor connectors and 355 passageways were delivered and accepted but found to be unusable—this loss was $2.5 million; 44 inflatable shelters were shipped to Europe and, as a result of faulty packing, were found to be full of water after being stored outside. The cost to refurbish the shelters was $109,000.

About 416 inflatable shelters will have to be shipped back from Europe to correct defective fasteners—the cost is estimated at $3.4 million.

We only hope our colleagues will give serious consideration to our concerns and exert all their efforts to assure that a dollar spent for defense buys a dollar's worth of defense, while we try to keep our economy on an even keel at a high level.

MONTANA'S 30-PERCENT SEVERANCE TAX TOO HIGH

(Mr. PICKLE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PICKLE. Mr. Speaker, the U.S. Supreme Court this afternoon hears arguments over the right of a State to charge excessively high severance taxes on minerals sold out of State. Texas and a dozen other States are challenging Montana's 30-percent coal severance tax.

The Western States fear they will lose States rights if they do not prevail, but I would disagree. All Texas and other States are telling Montana is that when you levy a tax on a natural resource, recover your costs, protect your people, manage the resource, but be reasonable about it. When the resource is used in other States, residents of those other States should not have to bear the brunt.

Texas and other States have expressed the State prerogative by charging severance taxes but not to the extreme as our friends in Montana. We are all dependent upon each other. We can have States rights and a unified country at the same time. But high severance taxes—30 percent—can lead to an unfortunate balkanization of the States and this is not in the national interest. So we watch the Supreme Court proceedings with interest.

COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER laid before the House the following communication from the Clerk of the House of Representatives:

WASHINGTON, D.C.,
March 30, 1981.

Hon. THOMAS P. O'NEILL, Jr.,
The Speaker, House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: Pursuant to the permission granted in the Rules of the House of Representatives, the Clerk received on Friday, March 27, 1981, the following messages from the Secretary of the Senate:

(1) That the Senate agree to the amendment of the House of Representatives to the bill (S. 509) entitled "An Act to amend section 201 of the Agricultural Act of 1949, as amended, to delete the requirement that the support price of milk be adjusted semiannually.".

(2) That the Vice President, pursuant to Public Law 86-380, appointed Mr. Roth and Mr. Durenberger to be members, on the part of the Senate, of the Advisory Commission on Intergovernmental Relations.

(3) That the Vice President, pursuant to Public Law 70-770, appointed Mr. Cochran to be a member, on the part of the Senate, of the Migratory Bird Conservation Commission, in lieu of Mr. Bellmon, retired.

With kind regards, I am,

Sincerely,

EDMUND L. HENSHAW, Jr.,
Clerk, House of Representatives.

H.R. 1986, AMENDING SECTION 201 OF AGRICULTURAL ACT OF 1949 LAID ON THE TABLE

The SPEAKER. Without objection, the bill (H.R. 1986) to amend section 201 of the Agricultural Act of 1949, as amended, to delete the requirement that the support price of milk be adjusted semiannually, as passed by the House on March 26, is laid on the table.

COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER laid before the House the following communication from the Clerk of the House of Representatives:

WASHINGTON, D.C.,
March 30, 1981.

Hon. THOMAS P. O'NEILL, Jr.,
The Speaker, House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: Pursuant to the permission granted in the Rules of the House of Representatives, I have the honor to transmit a sealed envelope from The White House, received in the Clerk's Office at 10:35 a.m. on Monday, March 30, 1981 and said to contain a message from the President wherein he transmits the Ninth Annual Report on Federal Advisory Committees.

With kind regards, I am,
Sincerely,
EDMUND L. HENSHAW, Jr.,
Clerk, House of Representatives.
By W. RAYMOND COLLEY,
Deputy Clerk.

NINTH ANNUAL REPORT ON FEDERAL ADVISORY COMMITTEES—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, referred to the Committee on Government Operations:

(For message, see proceedings of the Senate for today, Monday, March 30, 1981.)

PERSONAL EXPLANATION AS TO VOTE ON HOUSE JOINT RESOLUTION 182

(Mr. DANIELSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. DANIELSON. Mr. Speaker, I was unable to be present on the floor of the House of Representatives on Thursday, March 26, 1981, when the House voted on rollcall No. 20, and passed House Joint Resolution 182, to designate April 26, 1981, as "National Recognition Day for Veterans of the Vietnam Era." Had I been present, I would have voted "aye."

BARNES OUTLINES POLICY ON EL SALVADOR

The SPEAKER pro tempore (Mr. DANIELSON). Under a previous order of the House, the gentleman from Maryland (Mr. BARNES) is recognized for 30 minutes.

Mr. BARNES. Mr. Speaker, since I became chairman of the Subcommittee on Inter-American Affairs 2 months ago, I have spent a great deal of time analyzing the situation in El Salvador. The full Committee on Foreign Affairs has held hearings which covered this issue, including meeting with the Secretary of State in both public and private. The subcommittee has held five extensive hearings devoted in whole or in part to this issue, hearing from the widest possible range of witnesses; and I have personally tried to see everyone I could who is knowledgeable on the issue, in private meetings and in sessions with my colleagues on the subcommittee.

During this time I have specifically refrained from publicly stating or adopting a position with respect to American policy in Salvador, but I have become increasingly concerned about our policy there. As the Congress faces the issue of appropriate levels of assistance for Salvador, I believe that I now have a responsibility to make recommendations based upon the hearings that we have held.

I am now convinced that our policy vastly understates the political and economic dimensions of the Salvadoran conflict, and vastly overstates the international and military aspects of that conflict. I also believe that our policy will undermine the perception that the United States conducts its international relations in a manner consistent with our democratic ideals and our fundamental commitment to human rights.

Our policy separates us from other Western Hemisphere and European democracies, virtually none of whom see the conflict in the same apocalyptic terms that we do, and virtually all of whom are seriously worried about a U.S. policy that is seemingly out of control.

Our policy threatens to reawaken decades-old fears in Latin America about gunboat diplomacy by the United States—and Americans must remember that, historically, people in Central America and the Caribbean have much more experience with American than with Soviet intervention.

Our policy plays straight into the hands of the Soviets, whose intervention in Afghanistan and threat to Poland have not been subjected to the scrutiny they deserve because of our own actions in Salvador and the purposeful effort of the administration to ballyhoo those actions through massive, almost unprecedented, promotion in the media. At a time when the world's attention should be focused directly on Poland and Afghanistan—where the Soviet Union is again displayed as a repressive, totalitarian international force—our policy in Salvador, particularly the presence of American military personnel, has diverted that attention.

Our policy may be starting us down the same slippery slope we have been on once before, when a big propaganda campaign, based on captured documents, was launched to justify the introduction of just a few advisers here, a few Green Berets there, into another nation, until eventually the war in that land became ours to fight—and to lose.

Our policy is leading to the very outcome we are trying to avoid. By giving too little economic assistance, we fail adequately to promote the viability of the economy, and we reduce the capability of the Duarte government to accomplish the reforms necessary to reduce the appeal of the left. By giving too much military assistance, we further escalate the conflict, further polarize the situtation, reduce the incentive of the military to seek a political solution, and we make converts for the left as centrist elements become radicalized.

If we want to nurture the radical left in Salvador and unite the continent against us, the best way is to send in American military personnel, and pour in vast quantities of arms without any conditions on the policy they are supposed to support.

Let us think clearly about what we want in Salvador. I believe that we can all agree—Democrats and Republicans—that we want a stable government that is not hostile to the United States and is not a base for the subversion of other governments in the region. We want a broad based, representative government capable of withstanding the assaults of both the extreme left and the extreme right and of pursuing necessary reforms. We want the Salvadoran people to be able to participate in the development of their own country while living in dignity in a political system that respects basic human rights. if we can achieve those objectives, I suggest to you that we will automatically achieve our objective of reducing the spread of Communist influence in our hemisphere.

The means to achieve those objectives are clear. We must work with our friends in the region—not in isolation from them—to shore up the moderate, civilian components of the Salvadoran Government, to encourage and support reforms, to help the Government clamp down on rightist terrorism, and to foster contacts among democratic forces both inside and outside the Government leading to a political settlement, leading ultimately to the promised elections.

Only in conjunction with these efforts, only with precise conditions, does it make sense to provide limited military support to convince the left that it cannot win power through military means.

Nothing in the policy I propose is contrary to the administration's own stated objectives. Therefore, I would hope and frankly expect that this policy would command broad support in the Congress and among the public.

When the Subcommittee on Inter-American Affairs takes up the administration's economic and military aid request for Salvador next week, I intend to press for the inclusion of the following provisions in the bill.

First, all U.S. military advisers must be removed from Salvador. The symbolism of this military presence is simply too damaging. The few advisers we have there do not do enough good to justify the fact that they let the Soviets off the hook in Afghanistan and Poland. The American military personnel are sitting ducks for any terrorists who wants to exacerbate the situation and further embroil the United States in the conflict. Training, if necessary, can be done out of the country,

79-059 O - 84 - 6 (Pt. 5)

or it can be done by civilians. The military advisers must come out of Salvador.

Second, the military assistance request must be reduced and the aid subjected to stringent restrictions on how it is used and on the purposes for which it is used. We are already providing $35 million worth of military assistance in the current fiscal year. We do not need an additional $26 million on top of that in fiscal year 1982. That is just throwing arms at the problem. Some of these funds should go for economic aid instead.

Any military aid that we do provide must be given only on the condition that there is no military coup, that the Government of El Salvador investigates the murder of representatives of U.S. religious and labor organizations and brings the individuals responsible to justice, and that the Government takes adequate steps to control rightist terrorism, implement land reform, hold free and fair elections, and seek a political settlement.

Third, economic assistance must be given only so long as the civilians remain in the Government and continue to pursue economic reforms. Economic assistance must be structured so as to assure that it reaches those who need it most and helps to solve Salvador's most pressing economic problems.

Mr. Speaker, Congress cannot abdicate its responsibility by simply authorizing large quantities of military aid without restrictions. If we are to provide arms to Salvador, we must work our own will on the amount of that assistance, and we must provide a clear statement of the conditions under which the aid is being supplied. Only in that way will we place the United States unequivocally behind a solution in Salvador which genuinely allows the people of that nation to determine their own future.

Finally, Mr. Speaker, let me say that to suggest—as President Reagan did yesterday in an interview published in the Washington Post—that all critics of American policy in Central America are somehow dupes of an international Communist conspiracy is both absurd and demeaning to our own political process. Our subcommittee has heard testimony from large numbers of expert witnesses, and I reject the President's thesis that those individuals who may have disagreed with his policy in one respect or another have been, as he said, "confused" by "concerted and well-orchestrated * * * propaganda."

Mr. Speaker, the policy I have delineated today will not be easy to carry out. But it can work. It can gain the support of the American people. It can gain the support of our friends and our allies in the Western Hemisphere and around the world. It can gain the respect of our adversaries and refocus international attention on the actions of those who seek to undermine freedom.

Most importantly, Mr. Speaker, this policy can succeed in giving the people of Salvador justifiable hope for economic and political progress. For, as I was recently told by President Duarte, when the people believe that their future, their children's future, will offer lives of dignity, economic opportunity, and political freedom, the left—the Marxists and Communists—will have no appeal. That is what our policy should be all about.

□ 1215

Mr. SEIBERLING. Mr. Speaker, would the gentleman yield?

Mr. BARNES. I will be happy to yield to the distinguished gentleman from Ohio.

Mr. SEIBERLING. Mr. Speaker, I want to commend the gentleman from Maryland for his very thoughtful, careful, and thorough hearings which he has had on this very important subject and to express my personal gratification that, after all of the study that the gentleman has put in on it, his conclusions correspond to my own, as outlined in the RECORD on several occasions. Mine have been based on a much less extensive examination than his, mostly a feel of the subject from reading about it in the newspapers, and from the fact that one of my sons was in El Salvador for 2 years. He was a missionary there, and he came back in 1979. As a result, for the last 4 years I have followed the subject with much more than the ordinary degree of interest.

I agree with the gentleman completely that the emphasis of the Reagan administration on shoving military assistance at the Duarte government well beyond what was even sought by Mr. Duarte is a basic error. I am glad to see that the gentleman from Maryland is putting the full weight of his knowledge and intellect behind a critique of this policy.

Mr. BARNES. I thank the gentleman from Ohio for his comments. I suspect that, because of the gentleman's family association in Central America, he has a better understanding than many of our colleagues who have not had a chance to really review what is going on there. So the gentleman's comments are very helpful and I am grateful for them.

Mr. SEIBERLING. I thank the gentleman.

STATEMENT BY MR. FRENZEL ON PENSION VESTING

The SPEAKER pro tempore (Mr. DANIELSON). Under a previous order of the House, the gentleman from Minnesota (Mr. FRENZEL), is recognized for 5 minutes.

● Mr. FRENZEL. Mr. Speaker, earlier this week I, and Congressmen HOLLAND, PERKINS, ASHBROOK, and ERLENBORN introduced legislation to clarify the vesting requirements under section 1012(a) of the Employee Retirement Income Security Act of 1974 (ERISA). Clarification has become necessary because the Internal Revenue Service has completely disregarded the obvious congressional intent of ERISA.

The IRS, in their proposed regulations, published at 45 FR 24201 and 45 FR 39869 on April 9 and June 12, 1980 respectively, simply invented its own standard, rather than following the congressional mandate. The IRS proposals have generated a large amount of protest over the past year from all segments of the private pension plan community.

It should be pointed out that legislation on this issue should not be necessary. Congress made clear in ERISA that 4-40 vesting should be made an acceptable safe harbor, except in cases where actual abuse was found in accordance with the standard set forth in section 411(d)(1)(A) of the Internal Revenue Code (IRC). Unfortunately, the Internal Revenue Service has twice chosen in the past to ignore, by regulation, congressional intent that 4-40 be considered a safe harbor.

The Treasury Department based all of its actions on one word in the conference committee report on ERISA, and ignored all other indications of congressional intent in this area. The conferees clearly stated their concern in the conference report that the law in this area has been administered on a case-by-case basis, without uniform results in fact situations of a similar nature. As a result, the conferees gave a clear directive to the IRS not to require a vesting schedule more stringent than 4-40, except in cases where actual misuse of a plan occurs in operation.

The IRS regulations ignored the synonymous meaning of the words "misuse" and "abuse," and issued regulations which disregarded 4-40 vesting as a safe harbor and require more stringent vesting for plans, beyond the pattern of abuse situations provided for under section 411(d)(1)(A) of the IRC.

There are two objectionable results of the proposed regulations. First, the regulations, if allowed to go into effect as proposed, including the June 12, 1980, modifications, would totally undermine the expressed congressional desire to achieve a degree of certainty for plan sponsors through the uniform application of the nondiscrimination standards in connection with vesting. In fact, the regulations as amended do not provide a safe harbor for any plan, thus creating the uncertainty attendant with the discretionary administra-

tion by local IRS offices which existed prior to ERISA.

The revenue procedures currently applicable to this area—revenue procedure 75-40 and 76-11—provide at least some measure of certainty by guaranteeing a favorable IRS determination letter to those plans adopting 4-40 vesting. The new regulations would negate even this practice and place nearly one-half million pension plans in jeopardy of losing their tax exempt status on a prospective or even retroactive basis.

Second, the proposed regulations are particularly offensive because the Congress, by means of the conference report, intended to reserve for itself the authority to require more stringent vesting standards in connection with the nondiscrimination rules to the extent that further studies show a need for additional safeguards. During the previous administration, the Treasury Department and the IRS ignored the conference report directive to supply the Congress with information as to patterns of benefit loss under various vesting schedules and, instead, attempted to preempt congressional authority by regulation.

The purpose of our proposed legislation, the text of which follows, is to restore congressional prerogative in setting vesting standards in connection with the nondiscrimination rules under section 411(d)(1) of the IRC. It would codify the result intended by the ERISA conferees that 4-40 vesting be considered a safe harbor, thus preventing plan disqualification except in the event there is found to be a pattern of abuse—see new section 411(d)(1)(B)(iii). It would also codify as safe harbors the present value and cross-section tests contained in the June 12, 1980 revision to the proposed regulations—see new sections 411(d)(1)(B)(i) and 411(d)(1)(B)(ii), respectively.

It is expected that for purposes of new section 411(d)(1)(B)(i) the term "officers" will be defined in accordance with the principles of Revenue Ruling 68-300, 1968-2 C.B. 159, to include only those persons, regardless of title, who perform substantive duties in the nature of top management. Thus, persons who have titles solely for convenience but whose administrative and management duties are nominal, sporatic, or inconsequential, would not be considered officers. By the same token, persons who exercise substantial duties of top management but who do not have corporate titles should be considered officers for the purpose of this test.

It is also expected that new section 411(d)(1)(B)(ii) will be interpreted consistently with the principles of Revenue Ruling 70-200. 1970-1 C.B. 101, Revenue Ruling 74-255, 1974-1 C.B. 93, and Revenue Ruling 74-256, 1974-1 C.B. 94. However, for purposes of this test, only persons who are plan participants should be taken into account and not persons who are properly excluded under section 410 from participation in the plan.

I urge all of my colleagues to join us in supporting this bill, so that a degree of certainty and stability can be returned to our pension plan system.●

INTRODUCING LEGISLATION TO EXTEND THE DEFENSE PRODUCTION ACT OF 1950

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Michigan (Mr. BLANCHARD) is recognized for 5 minutes.

● Mr. BLANCHARD. Mr. Speaker, I am today introducing legislation to extend the Defense Production Act of 1950 for another year.

The Defense Production Act was first enacted as an outgrowth of the lack of a state of preparedness revealed during the Korean war. Its basic reason for being is to equip the President with sufficient standby authority to guarantee that the critical elements of the Nation's industrial base will suffer no interruption or breakdown in case of threats to the Nation's security. In recent years, it has been the practice of the Congress to extend this authority on an annual basis.

Mr. Speaker, I wish to also announce that the House Banking Subcommittee on Economic Stabilization will conduct a hearing on this legislation on April 15 for purposes of taking testimony from various witnesses of the administration.●

RULES OF THE SELECT COMMITTEE ON AGING

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida (Mr. PEPPER) is recognized for 15 minutes.

● Mr. PEPPER. Mr. Speaker, pursuant to the rules of the U.S. House of Representatives, I hereby submit, for the RECORD, the rules of the Select Committee on Aging as adopted and amended at its organizational meeting on February 19, 1981.

RULES OF PROCEDURE

RULE NO. 1

Except where the terms "full committee" and "subcommittee" are specifically referred to, the following rules shall apply to the *Select Committee on Aging* and its subcommittees as well as to the respective chairmen.

The rules of the committee shall be subject to amendment at any time.

[See House Rule XI, 1.]

RULE NO. 2

The regular meetings of the full committee shall be held on the *first Thursday of each month at 2:00 p.m.*, except when the Congress has adjourned or recessed. The chairman is authorized to dispense with a regular meeting or to change the date thereof, and to call and convene additional meetings, when circumstances warrant. A special meeting of the committee may be requested by members of the committee in accordance with the provisions of House Rule XI, 2c (2). Subcommittees shall meet at the call of the subcommittee chairmen.

Every member of the committee or the appropriate subcommittees, unless prevented by unusual circumstances, shall be provided with a memorandum at least 3 calendar days (excluding Saturdays, Sundays, and legal holidays) prior to each meeting or hearing explaining (1) the purpose of the meeting or hearing; and (2) the names, titles, background and reasons for the appearance of any witnesses. The minority staff shall be responsible for providing the same information on witnesses whom the minority staff may request.

[See House Rule XI, 2(b).]

RULE NO. 3

A majority of the members of the full committee and each of the subcommittees shall constitute a quorum of the committee or subcommittee for the purpose of convening meetings, conducting business, and voting on any matter: Provided, That the chairman of the full committee may determine that one-third of the members of the full committee shall constitute a quorum of the full committee at any meeting for such purpose (other than for the reporting of any measure or recommendation, and voting on the authorization of subpoenas and on the closing of hearings and business meetings to the public) if he gives written notice to that effect to the members prior to the meeting. Any committee member present at a committee meeting may make a point of order that a quorum is not present under the conditions set forth above, but a quorum shall be deemed present unless a member objects to the transaction of business because of the lack of a quorum. Two members shall constitute a quorum for taking testimony and receiving evidence. A majority of the members of the committee must approve any report, or any staff study containing policy recommendations, and the chairman is empowered to obtain that approval in any appropriate manner, including by polling members of the committee in writing, provided, that the proposed report or staff study has been available to the members of the committee for at least 3 calendar days (excluding Saturdays, Sundays, and legal holidays). The Chairman, with the consent of the Ranking Minority Member, may waive the 3 calendar day notification requirement. Proxies shall not be used to establish a quorum. If the chairman is not present at any meeting of the committee or subcommittee, the ranking member of the majority party on the committee or subcommittee who is present shall preside at that meeting.

[See House Rule XI, 2(h).]

RULE NO. 4

Every investigative report shall be approved by a majority vote of the committee at a meeting at which at which a quorum is present. Supplemental, minority, or additional views may be filed in accordance with House Rule XI, 2(l)(5). The time allowed for filing such views shall be 3 calendar days (excluding Saturdays, Sundays, and legal holidays) unless the committee agrees to a different time, but agreement on a shorter time shall require the concurrence of each member seeking to file such views. A proposed report shall not be considered in subcommittee or full committee unless the pro-

posed report has been available to the members of such subcommittee or full committee for at least 3 calendar days (excluding Saturdays, Sundays, and legal holidays) prior to the consideration of such proposed report in subcommittee or full committee. The Chairman, with the consent of the Ranking Minority Member, may waive the 3 calendar day notification requirement. If hearings have been held on the matter reported upon, every reasonable effort shall be made to have such hearings available to the members of the subcommittee or full committee prior to the consideration of the proposed report in such subcommittee or full committee.

RULE NO. 5

A member may vote by proxy on any measure or matter before the committee and on any amendment or motion pertaining thereto. A proxy shall be in writing and be signed by the member granting the proxy; it shall show the date and time of day it was signed and the date for which it is given and the member to whom the proxy is given. Each proxy authorization shall state that the member is absent on official business or is otherwise unable to be present, and shall be limited to the date and the specific measure or matter to which it applies; and, unless it states otherwise, it shall apply to any amendments or motions pertaining to that measure or matter.

RULE NO. 6

A rollcall of the members may be had upon the request of any member.

RULE NO. 7

The committee staff shall maintain in the committee offices a complete record of committee actions including a record of the rollcall votes taken at committee business meetings. The original records, or true copies thereof, as appropriate, shall be available for public inspection whenever the committee offices are open for public business. The staff shall assure that such original records are preserved with no unauthorized alteration, additions, or defacement.

[See House Rule XI, 2(e).]

RULE NO. 8

There shall be *Four* (*4*) subcommittees with appropriate party ratios which shall have assigned or fixed jurisdictions.

[See House Rule XI, 1(a)(2).]

RULE NO. 9

The chairman and the ranking minority member of the committee shall be ex officio members of all subcommittees. They are authorized to vote on subcommittee matters; but, unless they are regular members of the subcommittee, they shall not be counted in determining a subcommittee quorum other than a quorum for the purpose of taking testimony.

RULE NO. 10

Except as otherwise provided by House Rule XI, 5 and 6, the chairman of the full committee shall have the authority to hire and discharge employees of the professional and clerical staff of the full committee and of subcommittees subject to appropriate approval.

After approval by the majority caucus, the authorization for the creation of new positions shall be approved by a majority vote of the committee, a quorum being present.

RULE NO. 11

Except as otherwise provided by House Rule XI, 5 and 6, the staff of the committee shall be subject to the direction of the chairman of the full committee and shall perform such duties as he may assign.

RULE NO. 12

The chairman of the full committee will announce the date, place, and subject matter of all hearings at least 1 week prior to the commencement of any hearings, unless he determines that there is good cause to begin such hearings at an earlier date. In order that the chairman of the full committee may coordinate the committee facilities and hearing plans, each subcommittee chairman shall notify him of any hearing plans at least 2 weeks in advance of the date of commencement of hearings, including the date, place, subject matter, and the names of witnesses, willing and unwilling, who would be called to testify, including to the extent he is advised thereof, witnesses whom the minority members may request. The minority members shall supply the names of witnesses they intend to call to the chairman of the full committee or subcommittee at the earliest possible date. Witnesses appearing before the committee shall, as far as practicable submit written statements at least 24 hours in advance of their appearance.

A subcommittee holding hearings in the field may investigate matters that are within the committee's jurisdiction, whether or not the matter being investigated falls within the jurisdiction fixed for that subcommittee.

[See House Rule XI, 2(g), 2(j), and XI, 3(f)(2).]

RULE NO. 13

Meetings for the transaction of business and hearings of the committee shall be open to the public unless closed in accordance with Rule XI of the House of Representatives.

[See House Rule XI, 2(g).]

RULE NO. 14

A committee member may question a witness only when recognized by the chairman for that purpose. In accordance with House Rule XI, 2(j)(2), each committee member may request up to 5 minutes to question a witness until each member who so desires has had such opportunity. Until all such requests have been satisfied, the chairman shall, insofar as practicable, recognize alternately on the basis of seniority those majority and minority members present at the time the hearing was called to order and others on the basis of their arrival at the hearing. Thereafter, additional time may be extended at the direction of the chairman.

RULE NO. 15

Investigative hearings shall be conducted according to the procedures in House Rule XI, 2(k). All questions put to witnesses before the committee shall be relevant to the subject matter before the committee for consideration, and the chairman shall rule on the relevance of any questions put to the witness.

RULE NO. 16

A stenographic record of all testimony shall be kept of public hearings and shall be made available on such conditions as the chairman may prescribe.

RULE NO. 17

When approved by a majority vote an open meeting or hearing of the committee or a subcommittee may be covered, in whole or in part, by television broadcasts radio broadcasts, and still photography, or by any such methods of coverage, subject to the provisions of House Rule XI, 3. In order to enforce the provisions of said rule or to maintain an acceptable standard of dignity, propriety, and decorum, the chairman may order such alteration, curtailment, or discontinuance of coverage as he determines necessary.

[House Rule XI, 3.]

RULE NO. 18

The chairman of the full committee shall:

(a) make available to other committees the findings and recommendations resulting from the investigations of the committee or its subcommittees as appropriate;

(b) submit to the Committee on the Budget views and estimates, as appropriate, required of standing committees by House Rule X, 4(g); and

(c) prepare, after consultation with subcommittee chairmen and the minority, a budget for the committee which shall include an adequate budget for the subcommittees to discharge their responsibilities. After approval by the majority caucus, a majority of the members of the committee must approve the budget, and the chairman of the committee is empowered to obtain that approval in any appropriate manner, including polling members of the committee in writing.●

PERSONAL EXPLANATION

(Mr. SEIBERLING asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. SEIBERLING. Mr. Speaker, on Thursday, March 26, the House unanimously approved House Joint Resolution 182, designating April 26, 1981, as "National Day of Recognition for Veterans of the Vietnam Era." I am a cosponsor of House Joint Resolution 182. Regrettably, at the time of the vote on passage of the resolution, I was chairing a hearing by the Monopolies and Commercial Law Subcommittee of House Judiciary on the antitrust implications of the Export Trading Company Act. As a courtesy to the witnesses before the subcommittee, I stayed in the chair so that they could finish giving their testimony. Had I been present during the vote on House Joint Resolution 182, I would have voted "Aye."

This day of recognition for Vietnam veterans is long overdue. My record in Congress shows my opposition to the conflict in Vietnam. When I came to Congress in 1970, I was convinced that the way to best take care of our servicemen in Vietnam was to bring them home from that unfortunate conflict. Since the end of the conflict in Vietnam, the special needs of Vietnam veterans have been largely ignored. It appears now that this neglect is ending and that we are, as a nation, at last going to recognize the special courage and sacrifice of those men and women who served, fought, and died in Vietnam.

If there is to be real meaning behind the sentiment expressed in House Joint Resolution 182, however, we are going to have to translate that senti-

ment concretely into legislative programs which administer to the very special needs of the Vietnam veteran. Suicide, alcoholism, unemployment, and drug abuse are all significant problems for Vietnam veterans. In 1979, Congress finally recognized the need for a counseling program tailored to the particular problems associated with service in Vietnam, and enacted a Vietnam veterans' outreach program. These 91 storefront counseling centers have helped thousands of Vietnam veterans since their creation. The outreach center in Akron, Ohio, estimates that it sees 65 veterans a month, two-thirds of whom are suffering from the so-called delayed stress syndrome.

The outreach centers have not yet completed their work. Indeed, as more and more Vietnam veterans recognize that the nightmares and depression they have suffered stems from delayed stress reaction to service in Vietnam, it is likely that demand for the counseling program available at the outreach centers will increase, rather than decline.

Unfortunately, the Reagan administration has decided to save a trivial amount of the Federal budget by not extending the outreach program. I have cosponsored legislation in the House to extend the program for 3 years, and I note with satisfaction that the Senate has refused to comply with the administration's decision to end the program. I trust the House will do the same.

Yet there is more that Congress can do for Vietnam veterans than just extending the authorization of the outreach center program. Vietnam veterans were subjected to particular hazards during their service in Southeast Asia. One of those hazards was the military's use of the defoliant 2,4,5-T, known as agent orange. There is a growing body of evidence suggesting that agent orange exposure may be responsible for birth defects, neurological disorders, cancer, and skin eruptions. Yet the Veterans' Administration rarely, if ever, acknowledges that agent orange exposure is a legitimate reason for granting disability compensation. This shabby treatment flies in the face of the reports which are constantly in the news of Vietnam veterans suffering the agonies of cancer, incapacitating headaches, and skin rashes, and the heartbreak of parenting deformed children. Accordingly, I have cosponsored legislation to create a presumptive disability category for veterans who were exposed to agent orange, and to waive the delimiting date for disability claims filed due to exposure to agent orange.

Whether or not one agreed with the conflict in Vietnam—and I did not—it is abundantly clear that we have a debt to repay to our Vietnam veterans. Passage of House Joint Resolution 182 is a small step in that direction, and I am hopeful that Congress will do what is necessary to follow up on the promise of a national day of recognition for those who served in Vietnam.●

CONTRARY TO REAGAN ASSERTIONS, HUMAN RIGHTS POLICY HAS AIDED UNITED STATES

(Mr. SEIBERLING asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. SEIBERLING. Mr. Speaker, on March 3, the Cleveland Plain Dealer reprinted an article from the New York Times by Jennifer Seymore Whitaker, the associate editor of Foreign Affairs magazine. In this article, which was just recently called to my attention, Ms. Whitaker points out that, contrary to the view of the Reagan administration, the Carter human rights initiative made possible significant strategic gains for the United States. She cites the Zimbabwe settlement as a prime example, as well as the role of Nigeria in cooling Angolan support for attacks on pro-Western Zaire.

In Latin America, she points out that there was a parallel transformation which resulted from the demonstrated U.S. opposition to torture, assassination, arbitrary detention, and other evils associated with various repressive regimes and that this caused other Latin American states to support U.S efforts to encourage the installation of centrists in the juntas in Nicaragua and El Salvador. She notes that building Latin American support for a mediated end of violence in El Salvador will require continued demonstrated U.S. opposition to right-wing repression as well as to leftist terrorism.

Ms. Whitaker also notes that in Asia the serious human rights dilemmas of our military allies, South Korea and the Philippines, have yet to be squarely faced. She states that if these continue, the resulting instability may offer ripe opportunities for our adversaries and that a strategy that ignores these prospective vulnerabilities must be called shortsighted.

Ms. Whitaker concludes: "Any projection of U.S. power that does not fully use our human rights arsenal will quickly find its weapons turned against us. No pragmatic policy can ignore this reality."

Mr. Speaker, I am pleased to see such a distinguished expert in foreign affairs, stating, far more eloquently than I, essentially the same point I have made in earlier statements to the House. Her article also serves to reinforce the points made in his address to the House today by the distinguished chairman of the Foreign Affairs Subcommittee on Inter-American Affairs, the gentlemen from Maryland (Mr. BARNES).

I offer Ms. Whitaker's complete article for inclusion in the RECORD immediately following these remarks:

[From the Cleveland Plain Dealer, Mar. 3, 1981]

CONTRARY TO REAGAN ASSERTIONS, HUMAN RIGHTS POLICY HAS AIDED U.S.

(By Jennifer Seymour Whitaker)

Human rights has taken a bum rap.

The policy initiated by Jimmy Carter is now widely viewed as a novel way to beat up on friends while letting adversaries get away with bloody murder. Accordingly, the Reagan administration appears ready to discard this moralistic breast-beating in favor of a new though-minded pragmatism.

Contrary to that view, however, the human rights initiative launched in 1977 actually made possible significant strategic gains for the United States. The Zimbabwe settlement is a prime example.

Early in the Carter administration, the forcible U.S. opposition to white-minority rule in Southern Africa laid the groundwork for a new relationship of close communication and increased understanding with the African frontline states and the liberation movements. This increased trust eventually made possible the successful negotiations for Zimbabwe's independence.

Because all participants in the conflict—not merely the parties inside Rhodesia—were thus brought into the settlement, the war ended. Thus, the Soviet Union, the guerrilla, fighters' main military patron, was cut out of the action.

In effect, the Soviet Union and its Cuban allies were deprived of the cause that had given them entry into the Zimbabwean situation. Despite substantial Soviet expenditures on arms for their side in the struggle, a virtually cost-free series of Western political maneuvers left Moscow with nothing to show for its efforts.

Similarly, if the United States continues to press for an internationally sponsored transfer of power in Namibia, another obvious area of opportunity will also be foreclosed to Soviet and Cuban adventurism.

The transformation of Nigeria into an extermely helpful diplomatic ally should also be counted as a major payoff of the human rights policy in Africa. At issue in this instance is not Nigeria's oil—though at 16 percent of U.S. imports this surely constitutes a real strategic interest.

Rather, what must be counted as a solid plus for the Carter policy is Nigeria's active support for the Western plan on Rhodesia and Nigeria's cooperation with the Western powers during the 1977 conflict involving Angola and Zaire. Although Lagos refused entry to Secretary of State Henry A. Kissinger in 1976, one year later it was deeply involved in British and American-sponsored negotiations on Zimbabwe.

And when that beleaguered ward of Western mining interests, "pro-Western" Zaire came under attack by insurgents pouring across the Angolan border—into Shaba province, Nigeria used its good offices to open communications between Zaire and Cuban-supported Angola.

In Latin America, a parallel transformation in the political climate resulted from the demonstrated U.S. preference for democratic regimes and opposition to the worst evils associated with repression: torture, assassination, arbitrary detention. The discernible shift in Latin America public atti-

tudes about Yankee intentions brought the backing of key governments for U.S. positions.

One example was the support that the United States got from the Andean Pact Foreign Ministers Council when Washington was putting pressure on Ecuador and Bolivia to hold democratic elections. Another was the Organization of American States' endorsement in 1978 for U.S. mediation in Nicaragua that was intended to install a democratic government of the center.

Again, on El Salvador, support by such "neutrals" as Venezuela, Costa Rica and Colombia, for Carter administration efforts to find a center that would hold was made possible by the new political atmosphere. For the Reagan administration, building Latin American support for a mediated end to violence in El Salvador will require demonstrated U.S. opposition to government repression as well as to leftist terrorism.

As in Africa, such regional support is a sine qua non for enduring settlements, giving credibility to professed U.S. intentions to include parties from all across the political spectrum. And broadly based hemispheric backing for U.S. political initiatives creates the most effective pressure against Cuban military involvement.

In Asia, the serious human rights dilemmas of our military allies, South Korea and the Philippines, have yet to be squarely faced. If these continue unresolved, the resulting instability may offer ripe opportunities for our adversaries. However tough-minded in intention, a strategy that ignores these prospective vulnerabilities must be called shortsighted. Any projection of U.S. power that does not fully use our human rights arsenal will quickly find its weapons turned against us. No pragmatic policy can ignore this reality.●

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Member (at the request of Mr. LEE) to revise and extend their remarks and include extraneous material:)

Mr. FRENZEL, for 5 minutes, today.

(The following Members (at the request of Mr. SUNIA) to revise and extend their remarks and include extraneous material:)

Mr. LEHMAN, for 60 minutes, today.

Mr. BLANCHARD, for 5 minutes, today.

Mr. PEPPER, for 15 minutes, today.

Mr. GONZALEZ, for 15 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(The following Members (at the request of Mr. LEE) and to include extraneous matter:)

Mr. FRENZEL in two instances.

Mr. JOHNSTON.

Mr. GILMAN.

Mr. FINDLEY in two instances.

Mr. MICHEL in four instances.

Mr. ROTH.

Mr. DERWINSKI in two instances.

Mr. JEFFORDS.

Mr. WINN.

(The following Members (at the request of Mr. SUNIA) and to include extraneous matter:)

Mr. FRANK in two instances.

Mr. MAVROULES.

Mr. WILSON.

Mr. ASPIN in two instances.

Ms. MIKULSKI.

Mr. WYDEN in two instances.

Mr. DIXON in 15 instances.

Mr. ANDERSON in 10 instances.

Mr. GONZALEZ in 10 instances.

Mr. BROWN of California in 10 instances.

Mr. ANNUNZIO in six instances.

Mr. JONES of Tennessee in 10 instances.

Mr. BONER of Tennessee in five instances.

Mr. DYSON.

Mr. FORD of Michigan.

Mr. SKELTON.

Mr. BARNES.

Mr. BEDELL.

Mr. CHAPPELL.

Mr. PEPPER.

Mr. HUBBARD.

Mr. STOKES.

SENATE ENROLLED BILL SIGNED

The SPEAKER announced his signature to an enrolled bill of the Senate of the following title:

S. 509. An act to amend section 201 of the Agricultural Act of 1949, as amended, to delete the requirement that the support price of milk be adjusted semiannually.

ADJOURNMENT

Mr. BARNES. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 12 o'clock and 28 minutes p.m.), the House adjourned until tomorrow, Tuesday, March 31, 1981, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

926. A letter from the Acting Administrator, Environmental Protection Agency, transmitting a draft of proposed legislation to extend the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, for 2 years; to the Committee on Agriculture.

927. A letter from the Deputy Assistant Secretary of Defense (Military Personnel Policy), transmitting the annual report for calendar year 1980 on special pay for duty subject to hostile fire, pursuant to 37 U.S.C. 310; to the Committee on Armed Services.

928. A letter from the Secretary of the Army, transmitting notice of the proposed disposal of certain chemical agent identification sets at Rocky Mountain Arsenal, Colo., pursuant to section 409(b)(4) of Public Law 91-121; to the Committee on Armed Services.

929. A letter from the Secretary of the Army, transmitting notice of the recent discovery and disposal of a suspected lethal chemical nerve agent munition at Dugway Proving Ground, Utah, pursuant to section 409(b)(4) of Public Law 91-121 and section 506(d) of Public Law 91-441; to the Committee on Armed Services.

930. A letter from the Secretary of the Navy, transmitting notice of the proposed transfer of the obsolete destroyer *Ex-Kidd* (ex-DD-661) to the State of Louisiana, Louisiana Naval War Memorial Commission, Baton Rouge, La., pursuant to 10 U.S.C. 7308; to the Committee on Armed Services.

931. A letter from the Principal Deputy Assistant Secretary of the Navy (Logistics), transmitting notice of the proposed conversion to contractor performance of the base operations support functions at the Naval Air Facility, Midway Island, pursuant to section 502(b) of Public Law 96-342; to the Committee on Armed Services.

932. A letter from the Acting Assistant Secretary of the Air Force (Research, Development and Logistics), transmitting notice of the proposed conversion to contractor performance of the commissary shelf-stocking and custodial services function at Fairchild Air Force Base, Wash., pursuant to section 502(b) of Public Law 96-342; to the Committee on Armed Services.

933. A letter from the Chairman, Council of the District of Columbia, transmitting D.C. Act 4-12 "To provide, on a temporary basis, a procedure to exempt classes or groups of employees from the residency requirement set forth in the District of Columbia Government Comprehensive Merit Personnel Act of 1978," pursuant to section 602(c) of Public Law 93-198; to the Committee on the District of Columbia.

934. A letter from the Chairman, Council of the District of Columbia, transmitting D.C. Act 4-13, "To authorize the Council of the District of Columbia to adopt an official seal," pursuant to section 602(c) of Public Law 93-198; to the Committee on the District of Columbia.

935. A letter from the Chairman, Council of the District of Columbia, transmitting D.C. Act 4-14, "To order the closing of a portion of a public alley abutting lot 78 (formerly lots 59, 60, 65, and 812) in square 218 bounded by 14th Street NW., K Street NW., 15th Street NW., and I Street NW., and to accept the dedication of land in square 218 for alley purposes (S. O. 80-156) (ward 2)," pursuant to section 602(c) of Public Law 93-198; to the Committee on the District of Columbia.

936. A letter from the chairman, Council of the District of Columbia, transmitting D.C. Act 4-15, "To order the closing of a public alley abutting lots 16, 49, and 54 in square 163, bounded by 18th Street NW., L Street NW., Connecticut Avenue NW., and K Street NW. (S. O. 80-220) (ward 2)," pursuant to section 602(c) of Public Law 93-198; to the Committee on the District of Columbia.

937. A letter from the chairman, Federal Council on the Aging, transmitting a report on programs conducted under the Older Americans Act; to the Committee on Education and Labor.

938. A letter from the Acting Administrator, Environmental Protection Agency, transmitting a draft of proposed legislation to extend the Toxic Substances Control Act for 2 years; to the Committee on Energy and Commerce.

939. A letter from the President and Chief Executive Officer, Communications Satel-

lite Corporation, transmitting the 17th annual report of the Corporation, pursuant to section 404(b) of the Communications Satellite Act of 1962, as amended; to the Committee on Energy and Commerce.

940. A letter from the Vice President for Government Affairs, National Railroad Passenger Corporation, transmitting the financial report of the Corporation for the month of January 1981, pursuant to section 308(a)(1) of the Rail Passenger Service Act of 1970, as amended; to the Committee on Energy and Commerce.

941. A letter from the Assistant Secretary of State for Congressional Relations, transmitting notice of the proposed issuance of a license for the export of certain defense articles sold commercially to Greece (Transmittal No. MC-4-81), pursuant to section 36(c) of the Arms Export Control Act; to the Committee on Foreign Affairs.

942. A letter from the Assistant Secretary of State for Congressional Relations, transmitting notice of the proposed issuance of a license for the export of certain defense articles sold commercially to Saudi Arabia (Transmittal No. MC-8-81), pursuant to section 36(c) of the Arms Export Control Act; to the Committee on Foreign Affairs.

943. A letter from the Assistant Secretary of State for Congressional Relations, transmitting notice of the proposed issuance of a license for the export of certain defense articles sold commercially to Korea (Transmittal No. MC-9-81), pursuant to section 36(c) of the Arms Export Control Act; to the Committee on Foreign Affairs.

944. A letter from the Assistant Secretary of State for Congressional Relations, transmitting notice of the proposed issuance of a license for the export of certain defense articles sold commercially to Israel (Transmittal No. MC-10-81), pursuant to section 36(c) of the Arms Export Control Act; to the Committee on Foreign Affairs.

945. A letter from the Acting Director, International Communication Agency, transmitting a draft of proposed legislation to authorize appropriations for fiscal years 1982 and 1983 for international communication and educational and cultural exchange programs; to the Committee on Foreign Affairs.

946. A letter from the Secretary of Housing and Urban Development, transmitting a report on the Department's activities under the Freedom of Information Act during calendar year 1980, pursuant to 5 U.S.C. 552(d); to the Committee on Government Operations.

947. A letter from the Chairman, Foreign Claims Settlement Commission of the United States, transmitting a report on the Commission's activities under the Freedom of Information Act during calendar year 1980, pursuant to 5 U.S.C. 552(d); to the Committee on Government Operations.

948. A letter from the Acting Chairman, Securities and Exchange Commission, transmitting a report on the Commission's activities under the Freedom of Information Act during calendar year 1980, pursuant to 5 U.S.C. 552(d); to the Committee on Government Operations.

949. A letter from the Acting Assistant Secretary for Health, Department of Health and Human Services, transmitting notice of a proposed new records system, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

950. A letter from the Acting Chair, Equal Employment Opportunity Commission, transmitting notice of a proposed new records system, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

951. A letter from the Acting Secretary, Federal Trade Commission, transmitting a report on the Commission's activities under the Government in Sunshine Act during calendar year 1980, pursuant to 5 U.S.C. 552b(j); to the Committee on Government Operations.

952. A letter from the Acting Comptroller General of the United States, transmitting a list of reports issued or released by the General Accounting Office during February 1981, pursuant to section 234 of the Legislative Reorganization Act of 1970; to the Committee on Government Operations.

953. A letter from the Under Secretary of the Interior, transmitting a statement supporting a previously-submitted draft of proposed legislation to rectify certain discrepancies between the proposed constitution for the Virgin Islands drafted by a Virgin Islands Constitutional Convention and Federal law; to the Committee on Interior and Insular Affairs.

954. A letter from the Acting Commissioner of Patents and Trademarks, Department of Commerce, transmitting the annual report of his office for fiscal year 1980, pursuant to 35 U.S.C. 14; to the Committee on the Judiciary.

955. A letter from the Acting Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting copies of orders entered in cases in which the authority contained in section 212(d)(3) of the Immigration and Nationality Act was exercised in behalf of certain aliens, pursuant to section 212(d)(6) of the act; to the Committee on the Judiciary.

956. A letter from the Under Secretary of the Interior, transmitting a draft of proposed legislation to amend the Marine Mammal Protection Act of 1972 to extend the authorization of appropriations; to the Committee on Merchant Marine and Fisheries.

957. A letter from the Acting Administrator, Environmental Protection Agency, transmitting a draft of proposed legislation to amend and extend title I of the Marine Protection, Research, and Sanctuaries Act, as amended; to the Committee on Merchant Marine and Fisheries.

958. A letter from the Acting Administrator of General Services, transmitting a report on the building project survey for Bakersfield, Calif., requested by a resolution of the House Committee on Public Works and Transportation to the Committee on Public Works and Transportation.

959. A letter from the Acting Adminstrator, Environmental Protection Agency, transmitting a draft of proposed legislation to authorize appropriations for environmental research, development, and demonstrations for fiscal years 1982 and 1983; to the Committee on Science and Technology.

960. A letter from the Acting Administrator, National Aeronautics and Space Administration, transmitting notice of the proposed reprograming of $60 million of funds appropriated to NASA for fiscal year 1981 to the Space Shuttle program, pursuant to section 4 of Public Law 96-316; to the Committee on Science and Technology.

961. A letter from the Acting Administrator of Veterans Affairs, transmitting a draft of proposed legislation to amend title 38, United States Code, to extend authority to provide contract hospital care and medical services in Puerto Rico and the Virgin Islands, and for other purposes; to the Committee on Veterans' Affairs.

962. A letter from the Secretary of Labor, transmitting a draft of proposed legislation to amend the Trade Act of 1974 to provide for changes in adjustment assistance for workers and for other purposes; to the Committee on Ways and Means.

963. A letter from the Comptroller General of the United States, transmitting a report on the Department of Labor and selected CETA programs vulnerability to fraud and abuse (AFMD-81-46, March 27, 1981); jointly, to the Committees on Government Operations and Education and Labor.

964. A letter from the Comptroller General of the United States, transmitting a report on Federal policies and practices of Outer Continental Shelf lease sales (EMD-81-59, March 26, 1981); jointly, to the Committees on Government Operations, and Interior and Insular Affairs.

965. A letter from the Comptroller General of the United States, transmitting a report on problems created by delay of enactment of funding legislation (PAD-81-31, March 3, 1981); jointly, to the Committees on Government Operations, Rules, and Appropriation.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BLANCHARD (for himself and Mr. MCKINNEY):

H.R. 2903. A bill to extend by 1 year the expiration date of the Defense Production Act of 1950; to the Committee on Banking, Finance and Urban Affairs.

By Mr. COLLINS of Texas:

H.R. 2904. A bill to amend the Public Health Service Act to provide that an employer who includes in an employee health benefits plan a health maintenance organization which meets the requirements of State law shall not be required to include in such plan a federally qualified health maintenance organization; to the Committee on Energy and Commerce.

By Mr. DERWINSKI:

H.R. 2905. A bill to amend section 8118 of title 5, United States Code, to provide for physical examinations with respect to claims for compensation for work injuries, and to provide that continuation to pay under such section shall not begin until the fourth day of disability; to the Committee on Education and Labor.

By Mr. EVANS of Iowa:

H.R. 2906. A bill to amend the Internal Revenue Code of 1954 to clarify the valuation, for estate tax purposes, of farm and other real property when such property is rented by a member of a decedent's family, and for other purposes; to the Committee on Ways and Means.

By Mr. FRANK:

H.R. 2907. A bill to authorize grants under the Safe Drinking Water Act to public water systems to clean and update waterlines for purposes of meeting requirements under such act, and for other purposes; to the Committee on Energy and Commerce.

H.R. 2908. A bill to amend the copyright law to secure the rights of authors of pictorial, graphic, or sculptural works to prevent the distortion, mutilation, or other alteration of such works, and for other purposes; to the Committee on the Judiciary.

H.R. 2909. A bill to provide additional assistance to small business concerns in ac-

quiring procurement information and contracts from the United States; jointly, to the Committees on Government Operations and Small Business.

By Mr. GILMAN:

H.R. 2910. A bill to amend the Comprehensive Drug Abuse Prevention and Control Act of 1970 to permit the Attorney General to use certain proceeds from forfeited property for the purchase of evidence and other information; jointly, to the Committees on Energy and Commerce and the Judiciary.

By Mr. LOTT:

H.R. 2911. A bill to amend the Contract Work Hours and Safety Standards Act and the Walsh-Healey Act to permit employees, to whom such acts apply, to work any combination of hours in a 40-hour workweek; jointly, to the Committees on Education and Labor and the Judiciary.

By Mr. PRICE (for himself and Mr. DICKINSON):

H.R. 2912. A bill to authorize appropriations for the acquisition of strategic and critical materials for the national defense stockpile and to authorize the disposal of certain materials currently held in the stockpile; to the Committee on Armed Services.

By Mr. SAWYER:

H.R. 2913. A bill to amend the Internal Revenue Code of 1954 to increase the number of taxable years to which a net operating loss may be carried back; to the Committee on Ways and Means.

By Mr. WHITEHURST:

H.R. 2914. A bill to provide temporary authorities to the Secretary of Commerce to facilitate emergency actions to mitigate the impacts of the current drought and promote water conservation; to the Committee on Banking, Finance and Urban Affairs.

By Mr. WHITTEN:

H.R. 2915. A bill to amend section 3 of the Clayton Act; to the Committee on the Judiciary.

MEMORIALS

Under clause 4 of rule XXII,

30. The SPEAKER presented a memorial of the Legislature of the State of Nevada, relative to ratification of the California-Nevada Interstate Compact; to the Committee on Interior and Insular Affairs.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. LUJAN:

H.R. 2916. A bill for the relief of Los Alamos Developers, Inc.; to the Committee on the Judiciary.

H.R. 2917. A bill for the relief of Mary Concepcion Jugal Narrido and Conchita Jugal Narrido; to the Committee on the Judiciary.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 459: Mr. SIMON and Mr. WIRTH.

H.R. 567: Mr. MORRISON.

H.R. 568: Mr. STANGELAND, Mr. JEFFRIES, Mr. HORTON, Mr. GOODLING, Mrs. SCHNEIDER, and Mr. BURGENER.

H.R. 1309: Mr. PICKLE, Mr. MITCHELL of Maryland, and Mr. FORD of Tennessee.

H.R. 1362: Mr. CLAUSEN, Mr. CROCKETT, Mr. DOUGHERTY, Mr. GILMAN, Mr. LAFALCE, Mr. LEE, Mr. MCHUGH, Ms. OAKAR, Mr. OTTINGER, Mr. PANETTA, Mr. STANGELAND, and Mr. UDALL.

H.R. 1504: Mr. FISH, Mr. PEPPER, Mr. GLICKMAN, Mr. MOORHEAD, Mr. EVANS of Georgia, Mr. HENDON, Mr. ERLENBORN, Mr. HUGHES, Mr. HYDE, Mr. ROE, Mr. WINN, Mr. FORSYTHE, and Mr. JOHNSTON.

H.R. 1666: Mr. DAUB and Mr. GARCIA.

H.R. 1863: Mr. ECKART.

H.R. 1864: Mr. MATSUI.

H.R. 2007: Mr. MOLLOHAN.

H.R. 2068: Ms. MIKULSKI, Mr. MARTIN of North Carolina, Mr. STENHOLM, Mrs. BOUQUARD, and Mr. SIMON.

H.R. 2225: Mr. MOTTL.

H.R. 2312: Mr. BADHAM, Mr. BURGENER, Mr. COELHO, and Mr. GOODLING.

H.R. 2393: Mr. CHAPPIE, Mr. PORTER, Mrs. SCHNEIDER, and Mr. WAXMAN.

H.R. 2473: Mr. MATSUI and Mrs. HECKLER.

H.J. Res. 202: Mr. AKAKA, Mr. ALBOSTA, Mr. ALEXANDER, Mr. APPLEGATE, Mr. BADHAM, Mr. BAILEY of Pennsylvania, Mr. BEREUTER, Mr. BIAGGI, Mrs. BOGGS, Mr. BREAUX, Mr. BURGENER, Mr. JOHN L. BURTON, Mr. BUTLER, Mrs. BYRON, Mr. CARNEY, Mr. CHAPPIE, Mr. CLINGER, Mr. COATS, Mr. COLLINS of Texas, Mr. CONYERS, Mr. CORRADA, Mr. DANNEMEYER, Mr. DWYER, Mr. ERTEL, Mr. FLIPPO, Mr. FOGLIETTA, Mr. FOLEY, Mr. FORD of Michigan, Mr. FORSYTHE, Mr. FROST, Mr. GOLDWATER, Mr. GRAMM, Mr. GREEN, Mr. GUYER, Mr. HALL of Ohio, Mr. HAMILTON, Mr. HUNTER, Mr. HYDE, Mr. JEFFORDS, Mr. KASTENMEIER, Mr. LAFALCE, Mr. LEATH of Texas, Mr. LOWERY of California, Mr. LUNDINE, Mr. MCCURDY, Mr. MCDADE, Mr. MADIGAN, Ms. MARTIN of Illinois, Mr. MATTOX, Mr. MAVROULES, Mr. MAZZOLI, Mr. MOORHEAD, Mr. MURPHY, Mr. MURTHA, Mr. NEAL, Mr. NELLIGAN, Mr. NICHOLS, Mr. OBEY, Mr. O'BRIEN, Mr. PASHAYAN, Mr. PICKLE, Mr. PORTER, Mr. REGULA, Mr. REUSS, Mr. RINALDO, Mr. RITTER, Mr. ROSE, Mr. ROTH, Mr. ROUSSELOT, Mr. SCHEUER, Mrs. SCHNEIDER, Mrs. SCHROEDER, Mr. SHAMANSKY, Mr. SMITH of New Jersey, Mr. STRATTON, Mr. SYNAR, Mr. TAUZIN, Mr. UDALL, Mr. WALGREN, Mr. WATKINS, Mr. WEBER of Ohio, Mr. WHITEHURST, Mr. WILSON, Mr. WINN, Mr. WIRTH, Mr. WON PAT, Mr. WORTLEY, Mr. WYDEN, Mr. YATES, Mr. YATRON, and Mr. YOUNG of Alaska.

H. Con. Res. 71: Mr. WAXMAN and Mr. BINGHAM.

H. Con. Res. 87: Mr. BROWN of California.

H. Con. Res. 98: Mr. EDGAR, Mr. GARCIA, Mr. GEJDENSON, Mr. KILDEE, and Mr. SHAMANSKY.

H. Res. 65: Mr. CONTE, Mr. FARY, Mr. GRAY, Mr. GREEN, Mr. JEFFORDS, Mr. KILDEE, Mr. MCHUGH, and Mr. MINETA.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

43. By the SPEAKER: Petition of the Hawaii Federation of Chapters, National Association of Retired Federal Employees, Pearl City, Hawaii, relative to permitting the use of higher sulfur-content oil at the Kahe Power Plant; to the Committee on Energy and Commerce.

44. Also, petition of the City Council, New York, N.Y., relative to home health programs; jointly, to the Committees on Energy and Commerce and Ways and Means.

SENATE—*Monday, March 30, 1981*

(Legislative day of Monday, February 16, 1981)

The Senate met at 9:45 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, LL.D., offered the following prayer:

Let us pray:

Hear O Israel: The Lord our God is one Lord; and you shall love the Lord your God with all your heart, and with all your soul, and with all your might.—Deuteronomy 6: 4-5 (R.S.V.).

God of Abraham, Isaac, and Jacob, we know instinctively that this commandment is the very foundation of life and order. Our hearts witness to its truth.

We so easily invert our priorities, making position and power and popularity more important than Thee. Forgive us the idolatry which puts things above God—which worships the idols of secularism and humanism.

Help us to see that true humanness is found in the love of God—that Thy command is basic to order and justice and peace.

Lord God, help us to love Thee and serve Thee with all our hearts, and with all our souls, and with all our might; we pray in Thy name and for Thy sake. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The majority leader is recognized.

THE JOURNAL

Mr. BAKER. Mr. President, I thank the Chair.

I ask unanimous consent that the Journal of the proceedings of the Senate be approved to date.

The PRESIDENT pro tempore. Without objection, it is so ordered.

LEGISLATIVE SCHEDULE RESPECTING BUDGET RESOLUTION OF RECONCILIATION AND INSTRUCTION

Mr. BAKER. Mr. President, on Friday I expressed the hope that we would be able to finish consideration of the pending resolution and the amendments thereto some time the first part of this week.

I do not have any idea how many amendments remain, and I hope that in the course of the day Senators on this side who have amendments will make it known to the leadership so that we can assemble a list of prospective amendments. Then I will be able to confer with my counterpart, the distinguished minority leader, so we can get some estimate of how long this measure will be before the Senate.

I inquire of the Chair how much time has been used of the 50 hours.

The PRESIDENT pro tempore. The Senator from New Mexico (Mr. DOMENICI) has used 281 minutes out of 1,500. The Senator from South Carolina (Mr. HOLLINGS) has used 270 out of his 1,500.

Mr. BAKER. I thank the Chair.

In any event, it appears there is a great superabundance of time remaining on both sides.

I would not anticipate that the Senate would use anywhere near the remaining time, but we need to identify the amendments that remain in order to permit the leadership to decide how late we will stay in session tonight, to explore the possibility of a firm or even a tacit understanding on when we might finish this measure, and, of course, to provide for the scheduling of other business that may come before the Senate.

So I urge Members on this side to let the leadership know if they have amendments, how long they expect to take on those amendments, whether they expect to ask for rollcall votes, and to do so before the hour of noon today.

The cloakroom will receive those messages. That will put me in a position then to confer with the distinguished minority leader on the schedule for the remainder of this day and the days remaining as necessary to complete consideration of this resolution.

Mr. President, might I inquire of the distinguished minority leader at this point if he has any insight into the number of amendments remaining on his side or the prospects of looking toward the completion of action on this resolution?

Mr. ROBERT C. BYRD. Mr. President, listening to the Presiding Officer respond to the inquiry as to how many minutes have been used, it occurs to me that less than 600 minutes have been used out of a total of something like 3,000, which would indicate that to run the 50 hours out at the rate the Senate is going would require a total of 10 days of Senate sessions.

I think, Mr. President, that the Senate ought to complete action on this legislation tomorrow or Wednesday. I would hope to see it complete action tomorrow and I think no later than Wednesday. If Wednesday is required that would be a total of 5 days, which would indicate the Senate would have taken only half or less than half of the total time allotted.

So I will be talking with my colleagues on this side of the aisle to try to ascertain how many amendments will remain to be called up and I will be discussing this with the distinguished majority leader, hopefully, before the day is out.

But I should think that Tuesday or Wednesday ought to see us complete action on this measure.

Mr. BAKER. Mr. President, I thank the minority leader.

I agree that Tuesday or Wednesday are good target dates. We will confer, I am sure, during the course of the day today.

Mr. President, I have no other need for my remaining time under the standing order, if any time does remain. I am happy to yield the remaining time, if any, to the distinguished minority leader or yield it back, as he prefers.

RECOGNITION OF THE MINORITY LEADER

The PRESIDING OFFICER (Mr. GORTON). The minority leader is recognized.

Mr. ROBERT C. BYRD. Mr. President, I thank the majority leader.

DESIGNATION OF THE SQUARE DANCE AS THE NATIONAL FOLK DANCE OF THE UNITED STATES

Mr. ROBERT C. BYRD. Mr. President, today I am introducing a Senate joint resolution to signify the ebullient spirit of our society. I am calling for the designation of the square dance to be the national folk dance of the United States of America.

Our early settlers worked hard. When the week's work was done, they socialized. When they socialized, they danced. The Puritans danced, and so did the Cavaliers. These colonial caperers were no respecters of persons—high and low took their places in the "longways" and took their turns to swing and dip. George Washington, in the parlors of the 13 colonies, and Daniel Boone in the backwoods huts, understood the square dance, so-called from the adoption of the "squares" popularly danced in France. The square dance evolved in the ballrooms, log cabins, and wagon trains, and with the expansion of our Nation, spread from the mountains of the East to the prairies and the deserts of the West.

Built on a pyramid of folk dances, jigs, minuets, and contras, the square dance spread—ever changing, ever elaborating. Callers began to direct the dancers, their calls becoming familiar tunes—"swing your partner—right and left all around, sashay and promenade"—a strange mixture of French and English, and now Americana.

Every community has its own way of square dancing, and every fiddler his own way of playing the tunes. There is nothing like the square dance elsewhere in the world. Yet, the American square dance is popular today on the European continent, in Asia, in the Orient, Latin America, in every portion of the civilized world. Therefore, I feel this jolly envoy from our great Republic should be honored by my bill to designate the square dance to be the national folk dance of our country.

Mr. President, I ask unanimous consent that the joint resolution be printed in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 59

Whereas square dancing has been a popular tradition in America since early colonial days;

Whereas square dancing has attained a revered status as part of the folklore of this country;

Whereas square dancing is a joyful expression of the vibrant spirit of the people of the United States;

Whereas the American people value the display of etiquette among men and women which is a major element of square dancing;

Whereas square dancing is a traditional form of family recreation which symbolizes a basic strength of this country, namely, the unity of the family;

Whereas square dancing epitomizes democracy because it dissolves arbitrary social distinctions; and

Whereas it is fitting that the square dance be added to the array of symbols of our national character and pride: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the square dance is designated the national folk dance of the United States of America.

FIRST ANNUAL SENATOR ROBERT C. BYRD SCHOLARSHIP TESTIMONIAL DINNER

Mr. ROBERT C. BYRD. Mr. President, on Saturday, March 28, I was honored at the First Annual Senator ROBERT C. BYRD Scholarship Testimonial Dinner, given in Charleston, W. Va., by the March of Dimes Birth Defects Foundation, and the Greater West Virginia Chapter of the March of Dimes.

The National Foundation for Infantile Paralysis was created to fight epidemic polio, and is the only voluntary organization in history to eradicate the disease it was organized to combat. Now, the March of Dimes has turned its attention to the No. 1 child health problem in our Nation—birth defects.

The vital contribution that the March of Dimes is making in providing health education, genetic counseling, and counseling in maternal and infant care should not go unnoticed.

I ask unanimous consent that the text of my remarks on the occasion of the dinner be inserted in the RECORD.

There being no objection, the remarks ordered to be printed in the RECORD are as follows:

MARCH OF DIMES BIRTH DEFECTS FOUNDATION MAN OF THE YEAR AWARD BANQUET

(By U.S. Senator ROBERT C. BYRD)

I thank Senator Randolph for that gracious introduction.

And I thank the greater West Virginia chapter of the March of Dimes birth defects foundation for honoring me with its "Man of the Year award."

You have chosen tonight to pay tribute to me. But perhaps it would be more appropriate this evening for me to pay tribute to you. Together with countless other Americans, your care and concern have already guaranteed a better life for millions. Not only through the March of Dimes, but through your churches and synagogues, your professions and careers, your civic clubs, and dozens of other associations, you contribute daily to a struggle to make our country a healthier and more decent and civil place in which to live.

Some centuries ago, John Donne wrote, "No Man Is an Island, Entire of Itself." Suffering is universal; disease is a common enemy; crime, brutality; want, and tyranny are threats to us all. Yet, too many people seem lost in the "tunnel vision" of their own problems. And too many others seem caught up in a whirl of diversion. They apparently fail to understand that they may have a role to play in resolving the dilemmas that confront mankind everywhere.

But throughout history, it has been true that progress and the improvement of man's lot have usually rested on the shoulders of a few. Wherever justice has adavnced, wherever compassion has triumphed, and enlightenment has spread, one most likely finds that there was some one with more mature vision than most of his neighbors.

Through the March of Dimes, in the memory of most of us here tonight, Americans banded together to deliver the ultimate defeat to the scourge of polio. Decades ago, with the coming of every summer, fathers and mothers suffered the recurring fear that polio might that season visit their homes. Every community shared the heartbreak of seeing the year-by-year increase of the number of little crippled limbs. And the majority of us can probably remember the unmistakable sounds of small braces scraping against concrete floors and sidewalks as the victims of infantile paralysis tried to fight their way back into the stream of normal human life.

But people like you would not surrender. You kept giving and giving. And finally your dedication and patience earned their dividends. The Salk and Sabine vaccines were your rewards.

However, when you won the war against polio, you did not lay down your weapons. You kept your alliances intact. You went after birth defects, congenital disease, and the innumerable hidden flaws that deny rich, full lives to millions. I salute you as you stand tonight at your new posts of duty.

There are lessons in that noble persistence. Innumerable anti-prophets claim that Western civilization is at the end of its tether; that America's greatness is gone and in the past; that the problems facing us in our country and around the world are insurmountable—too overwhelming to solve.

It is not the American tradition to fold up in the face of a challenge. Whether our frontiers are medicine, education, business, politics, economics, government, or the home, Americans—in body and spirit—are pioneers. And I am confident that, in the spirit that defeated polio, we can halt the ravages of inflation, answer our energy crisis, and continue redeeming the ageless promises of the American dream.

But there is another lesson in the example of the March of Dimes. One unique value of our civilization is our belief in the eternal worth of the individual. Too often, we take that principle for granted. We forget that millions live in the grip of political and economic systems that every day deny that truth. The governments of some foreign countries exist, not to promote the well-being of their citizens, but, rather, to insure the survival of those who govern. In such countries, the government does not belong to the citizen; the citizen belongs to the government. And in the long and ruthless histories of those governments, they have snuffed out the lives of thousands with the nonchalance with which you and I might swat so many flies.

But under the American system, the people are served. Because each individual has his or her own worth, you were not content to let some battle alone against polio. You, too, joined in the battle against polio. And you were not content with winning that battle. You are waging the battle against birth defects.

In America, we are not subjects; we are citizens. As citizens, we have responsibilities in our generation—just as our forefathers had in their generations. Civilization is organic. The seeds we plant today will flower tomorrow, and our sons and daughters will enjoy the fruits of our labors the day after that. Our greatest satisfaction may be in knowing that we planted well.

So, I commend you for the seeds you are planting through the March of Dimes Birth Defects Foundation, I again thank you for the honor you have bestowed on me tonight. And for those whom you have helped and will help in the future, I thank you for proving that none of us is an island—that we need not stand alone against the evils that can beset us all. Thank you for lighting candles and not just cursing the darkness.

Mr. ROBERT C. BYRD. Mr. President, I yield such time of my remaining time as he may require to Mr. PROXMIRE.

"THE TESTAMENT"

Mr. PROXMIRE. Mr. President, the ratification of the Genocide Treaty is as timely an issue now as it has been since it was first submitted for ratification by President Truman in 1949.

As an example of this continuing interest, I offer the recent publication of the new novel by Elie Wiesel, "The Testament." Mr. Wiesel's family was a victim of the holocaust. He has a tragic personal knowledge of the crime of genocide. He is already the author of many accounts of the crimes of World War II, including "Night" and "The Gates of the Forest."

"The Testament" is the story of a Russian Jew named Kossover. Kossover is a dedicated Marxist, however, his religion and his profession (he is a poet) cause him to be imprisoned by Stalin's Communist regime. Kossover's plight, while not genocide, is typical of the victims of genocide: His religion is the cause of his persecution. The plot of Wiesel's novel involves the journal that Kossover keeps while he is imprisoned, and how Kossover persuades his guard

to get the journal to Kossover's son after Kossover's death.

The reviewer for the Washington Star, Julian Hartt, found Wiesel's book full of the powerful message of horror and hope. The horror that man is capable of the crime of genocide is complemented by at least one message of hope. At least the survivors of these crimes can leave their testaments to all of us, as Kossover does for his son and, of course, as Wiesel does with all his writings.

There is also a special message for the Senate in "The Testament," and in all Wiesel's writings dealing with the crime of genocide. We have the opportunity to take one step in the direction of worldwide justice. We can note our profound opposition to the crime of genocide, and demonstrate our hope that there will be no new incidents of it to write about. We should take that step and ratify the Genocide Treaty. Clearly, making genocide an international crime is an issue that cannot and will not be forgotten.

Mr. President, I thank the minority leader and I yield the floor.

The PRESIDING OFFICER. What is the pleasure of the Senate?

Mr. BAKER. Mr. President, might I inquire of the minority leader if he has need for the remainder of his time?

Mr. ROBERT C. BYRD. Mr. President, I do not have any further need for my time. I yield it back.

ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business not to extend beyond the hour of 10 a.m. this morning, in which Senators may speak therein.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

EASTER RECESS SCHEDULE

Mr. BAKER. Mr. President, while there is a moment to discuss such matters. I would like to invite the attention of the minority leader to the schedule for the recess at Eastertime. As he knows—he and I have had conversations on that subject—it appears that the House of Representatives will not be in session during the week of the 20th of April.

It had been announced previously that the Senate would reconvene on the 21st of April. But, in view of the fact that the House will not be in session, I have taken the liberty of discussing with the Speaker of the House of Representatives and with the minority leader the possibility of extending the recess of the Senate over until the opening of business on the 27th of April.

I anticipate we will have the budget resolution out of the way and the standing and jurisdictional committees of the Senate could find a good use for that week unencumbered by the Senate sessions—no order has been entered yet; no resolution has been drafted nor submitted to that effect.

But I take this opportunity to apprise my friend the minority leader of those negotiations—he is already aware of them; he and I have had extensive conversations, as well—and to let every Member know that this is a possibility, I will have a letter to Members on this side in this respect. If the Easter recess is extended to April 27, that should be in no way interpreted as meaning that during the week of April 20 committees should not continue with their work. Rather, committees should continue consideration of measures before them and make every effort to report bills to the floor of the Senate so that we can meet our deadline for the introduction of authorizing legislation by the 15th of May, so that the Senate will be in a position to deal in an orderly way with the budget resolution and other matters that must come before the Senate this spring.

It would be my hope that the Senate could extend the Easter recess to include the week of April 20, to resume on April 27, but with the clear understanding that this does not apply to the committee work, and that Senators will be expected to be here to participate in committee activities as may be necessary during that week in order to preserve the schedule of the Senate.

I yield to my colleague the minority leader.

Mr. ROBERT C. BYRD. Mr. President, I join in the remarks of the distinguished majority leader in the hope that committees would utilize the time referred to with meetings and possibly preparing legislation for the calendar.

In the light of the fact that the House will not be meeting during the week of April 20, I think it would be appropriate for the Senate, likewise, not to meet, but with the admonition to Senators on both sides of the aisle that the additional time out of session, as far as the floor work is concerned, could be well utilized in the uninterrupted meetings of committees and subcommittees.

So I will carry that message to my colleagues as we discuss the Easter legislative holiday privately and collectively.

Mr. BAKER. Mr. President, I thank the minority leader.

Mr. President, with this colloquy in mind, and with notice to all Senators on this side of the aisle and to Senators on the other side by the statement of the minority leader, I will proceed, as part of the joint leadership, to try to make this firm with the other body as soon as possible.

It will be my full expectation that the Senate would not be in session during the week of the 20th of April, but that committees would meet and function at that time.

BUDGET RESOLUTION OF RECONCILIATION AND INSTRUCTION

The PRESIDING OFFICER. Under the previous order, the hour of 10 o'clock having arrived, the Senate will resume consideration of Senate Concurrent Resolution 9, which the clerk will state by title.

The assistant legislative clerk read as follows:

A concurrent resolution (S. Con. Res. 9) revising the congressional budget for the United States Government for the fiscal years 1981, 1982, and 1983.

The Senate resumed consideration of the concurrent resolution.

AMENDMENT NO. 22

(Purpose: To restore funds for social security minimum benefits)

The PRESIDING OFFICER. The clerk will state the pending amendment, amendment No. 22, offered by the senior Senator from Michigan.

The assistant legislative clerk read as follows:

The Senator from Michigan (Mr. RIEGLE), for himself, Mr. CHILES, Mr. LONG, Mr. BENTSEN, Mr. ROBERT C. BYRD, Mr. METZENBAUM, Mr. KENNEDY, Mr. MITCHELL, Mr. MOYNIHAN, Mr. WILLIAMS, Mr. TSONGAS, Mr. MATSUNAGA, and Mr. LEVINE, proposes an amendment numbered 22.

The amendment is as follows:

On page 2, beginning with "$52,144,000,000" in line 17, strike out through "$47,694,000,000" in line 20 and insert in lieu thereof the following: "$53,625,000,000 and outlays by $36,945,000,000 in fiscal year 1982; to reduce budget authority by $60,128,000,000 and outlays by $47,694,000,000 in fiscal year 1983.".

On page 7, beginning with "$9,354,000,000" in line 16, strike out through "$10,870,000,000" in line 18 and insert in lieu thereof the following: "$8,554,000,000 in fiscal year 1982; and to reduce budget authority by $4,494,000,000 and outlays by $9,970,000,000.".

On page 8, beginning with "$4,776,000,000" in line 25, strike out through "$6,388,000,000" on page 9, in line 3 and insert in lieu thereof the following: "$5,576,000,000 in budget authority and $5,490,000,000 in outlays for fiscal year 1982; $7,260,000,000 in budget authority and $7,288,000,000".

The PRESIDING OFFICER. Time for debate on this amendment is limited to 1 hour.

The Senator from Michigan is recognized.

Mr. RIEGLE. I thank the Presiding Officer.

As I understand it, we are now beginning 1 hour of debate on the amendment at the desk, the amendment which would preserve the minimum benefit under social security, and the time is to be evenly divided.

I want to say to my colleagues who are listening, who have a strong interest in this, that I would like to make time available to them during the half hour which I control. I ask that they come to the floor.

Mr. President, I will now take about 4 or 5 minutes to summarize the amendment, and then I will want to reserve the remainder of my time.

This amendment proposes to save the minimum benefit that is now paid under social security. The Reagan administration and the Budget Committee have proposed that the minimum benefit be eliminated.

It is important to understand that that proposal would not only eliminate the minimum benefit for new people coming on social security. It would have an immediate effect on those who presently receive the minimum benefit. They would lose their benefits.

Mr. President, there are 3 million people who now receive the minimum benefit under social security. That benefit is frozen at $122 a month. It is not indexed by inflation.

In looking at those 3 million people, we have found that half of them have incomes below $3,100 a year. I want to stress that to my colleagues. They are people in very modest circumstances, in many cases just managing to scrape by financially.

We learned late on Friday the age profile of people who receive this minimum benefit and who are now threatened with having their benefits reduced under the system. We found that 13,678 of these recipients who will lose this benefit are aged 95 and older.

In the age group from 90 to 94, there are over 66,000 persons who presently receive this minimum benefit who would lose that benefit.

In the age group from 85 to 89, there are 167,552.

In the age group from 80 to 84, there are 284,534.

Mr. President, I ask unanimous consent to have printed in the RECORD a table showing the other age distributions.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

Age distribution of aged minimum benefit beneficiaries

Age:	*Number of beneficiaries*
62–64	230,956
65–69	533,118
70–74	508,226
75–79	410,376
80–84	284,534
85–89	167,552
90–94	66,396
95 and over	13,678

Source: Department of Health and Human Services.

Mr. RIEGLE. The significant fact is that what the Reagan administration has done is to target a group of people on social security who are among the oldest citizens in our country. Many are in poor health, many unable to even think about the task of organizing to come down here and press a case in their behalf to try to maintain this benefit.

This flies right in the face of a solemn campaign promise made by the Reagan administration: No dismantling of social security. Here are 3 million people who face that prospect right now. Many of these elderly people will only have the welfare program for aid.

I do not know how somebody who is 97 years old and in a nursing home is going to get to the welfare office to save these few dollars for the Federal Government. I think it is an outrageous proposition. If the public understands what is being done—that this is a violation of the pledge that the Reagan administration itself made—I think we could turn this around.

The dollar amounts are $800 million for fiscal year 1982 and $900 million for fiscal year 1983. The way we propose to maintain this benefit is by requiring and mandating savings in other parts of the Federal Government. We have enumerated a number of areas where we think those savings could be made: Consultant fees, extravagant Government travel costs, films, things that we know are of low priority.

We further would mandate, with this amendment, that those savings come out of civilian departments—not out of the Defense Department.

So we are mandating an effort to find savings of $800 million in fiscal year 1982 and $900 million in fiscal year 1983, to maintain this minimum social security benefit.

Mr. President, if the administration succeeds in slicing this part of the social security system and dropping these 3 million people overboard, as they are proposing to do here, no one on social security will feel safe in the future. If they establish this precedent today, despite their pledge to the contrary, then who knows who is next?

We know this: There will be other efforts made—if we start down this road—to cut parts of the Social Security System to make budget savings. It is only a matter of time before they come after others. It is sad that the first group they decide to target is the group that is least able to fight back. When I think of the older people in this country, in their eighties or nineties, some even older than one hundred, who are to lose this small but vital benefit in the name of economy, I think it is an absolute outrage.

This administration went up and down the country, saying no, they were not going to hurt anybody on social security. That is just not true. Unless this amendment carries, there will be one more broken promise that we can add to the broken promise to the veterans, the broken promise to the schoolchildren, and everybody else that we have seen affected by this administration's broken promises.

Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. DOMENICI. Mr. President, may I inquire of the distinguished Senator from Michigan—and I say this in all honesty—I do not understand the setoffs that he is talking about. I understand the unearned social security minimum benefit that he would restore as an assumption, but I do not see anything that indicates he can, somewhere else, save the $800 million in the amendment.

Mr. RIEGLE. Let me state the way we see as the best way to accomplish that. As the Senator knows, there is a lot of waste in Government. Waste is something he has spoken about, I have spoken about, and the President has spoken about. We want to get at it and get rid of it. So the amendment would issue an instruction to the Governmental Affairs Committee to identify, across the civilian agencies of the Federal Government, savings that could be made in an amount equal to these benefits, which would be $800 million in 1982 and $900 million in 1983.

We can specifically target for their attention Government travel, Government consultants, films, public relations activities—things that we know are excessive. We think that amount of money can be saved and we think it is better to save it in this form than to save it in terms of eliminating these minimum benefits.

Mr. DOMENICI. Mr. President, I shall reserve any comment on whether or not the amendment as proposed actually has any chance of causing any savings to offset the $800 million. Let me speak for just a minute about the instructions to the Committee on Finance, and I hope everyone understands that when we talk about instructions to a committee, we are talking about an aggregate figure. Certainly, the Committee on Finance does not have to change the unearned social security minimum benefit to comply with the instruction. I do not argue with the distinguished Senator when he says that he wants to get rid of the assumption that it might be changed. I merely want to say that there has been a lot of talk in this body about the entitlement programs.

Most of the entitlement programs come from the Committee on Finance. I am not going to make an argument today—at least not now—on the minimum benefits. I think that, clearly, the President's package justifies the elimination of that.

Let me point out that the Senate Committee on Finance has endorsed full savings in programs within its jurisdiction as recommended by the President. Let me repeat that. The Committee on Finance has met; they have indicated to the Senate Budget Committee, and I think we can, in turn, indicate to the Senate at large, that they fully intend to cause savings by changing laws within their jurisdiction equal to the amount requested by the President. That is the issue here. The issue is not particularly the minimum social security benefit. The issue is that the Finance Committee has said they can find savings equal to those requested by the President.

This is a rare opportunity for the Senate. We have a committee with that kind of jurisdiction saying, "OK, we shall be instructed; tell us, Senate, to go ahead and find the amount of savings that the President asked for." They have voted and said, "We will do it." Then why in the world would we come down here and adopt an amendment that the Senator from Michigan proposes saying, "You do not have to do that much, Senate Finance Committee; we are just going to let you do less."

They have jurisdiction, and I hope not to be trite, with billions of dollars of outlay impact—not hundreds of millions, billions. They have met and said, "OK, we will at least save that much, the

amount requested by the Senate Budget Committee in its instruction here, on the floor."

So, everyone should know that if you take this amendment of the distinguished Senator from Michigan, if you buy the argument that the minimum social security benefit should not be changed and then you take this $800 million out as he requests, all we have done is said to the Finance Committee, "You only have to save $800 million less."

This does not have much to do with what they finally do, but it has a great deal to do with whether or not we are going to come close in this first package to numbers, quantitywise, that can be carried out by appropriate jurisdictional committees that will effect the savings in the President's package.

That is the issue, Mr. President. As I indicated, there have been many recommendations about this minimum social security benefit which came into being long before we had SSI, before we had other programs to take care of the very poor. There are many people that have been thinking for years that this piece of the social security program ought not to be around, that it really is abused as much as it is used.

As to those who are poor and take advantage of it, there are many more people who take advantage of it after they have vested all kinds of other pensions and go out in the private marketplace and work that minimal period of time—indeed, it is a very small amount of time—and thus vest another pension—to wit, a minimal, unearned, social security benefit.

So I hope the Senate does not think this is particularly a vote on that minimal social security benefit.

I repeat: The Finance Committee has told us in a general communication—by telling the Budget Committee, they tell the Senate—"We can indeed make these savings." Do not relieve them of what they voluntarily said they could do. That would be the epitome of a step backward, when we are telling the American people that we are trying to save money. In order to get this budget under control in the out years, do not relieve them of something they have said they willingly can do.

Mr. RIEGLE. Mr. President, I want to try to help my friend from New Mexico, the chairman of the Budget Committee, so that he is not confused.

The ranking Democratic member, Senator LONG, has managed the Finance Committee for many years and is a cosponsor of the amendment. Senator LONG did speak on the floor on Friday night, and I urge the Senator to take a look at his comments.

I think the Senator is mistaken in the notion that we are mandating that the Finance Committee alone come up with these savings. We are not doing that.

Mr. DOMENICI. Who is confused?

Mr. RIEGLE. I will try to explain it and see if it is helpful and clear to the Senator.

We are saying that we want to maintain the minimum social security benefit only for those who presently receive it. We are not trying to maintain the benefit for people who would qualify for it in the future. We only want to make sure that people presently receiving it are not dumped overboard, the very old people I referred to earlier.

To find the savings, we are mandating the Governmental Affairs Committee to look at all civilian activities of the Federal Government, and we have enumerated several where we think savings can be made. I believe the Senator knows that the figures spent there are higher than they need be.

Mr. DOMENICI. Mr. President, will the Senator yield, on my time?

Mr. RIEGLE. I yield.

Mr. DOMENICI. I did not say that. I said you are relieving the Finance Committee of a burden they have welcomed, and you are saying that the Governmental Affairs Committee can find it in fraud and abuse and the like.

I am merely suggesting that, the Finance Committee having voted overwhelmingly that they could make these savings, we should not relieve them of doing it. You are relieving them of that much responsibility to change laws within their jurisdiction.

Mr. RIEGLE. I do not think that is correct.

Mr. DOMENICI. If the Senator will look at the amendment, it says that the Finance Committee will not be required to save the amounts of money the Budget Committee asked them to save, to the extent that you want to put back the assumed savings from the unearned minimal social security. That means they will save less.

The Senator from Michigan, in turn, says the Governmental Affairs Committee, which is not the authorizing committee, has travel expenditures, has the waste he has talked about, has films, within their jurisdiction.

People wonder about the pay of Federal employees and the Postal Service. The Budget Committee already told the Governmental Affairs Committee that it has direct spending jurisdiction over the pay of Federal employees and part of the Postal Service. We have already told them to save $4.7 billion.

There is no way, in an amendment in a reconciliation instruction, you can tell them to save money out of fraud and abuse and waste. You can say, "Governmental Affairs, we would like you to come up with a nice fraud and abuse statute," and it will tell the Senate and all the Government to save money. But there is no way to match that off against the $800 million you are taking away from the Finance Committee. After you look at all the departments, it might save money. But they do not have jurisdiction to pass a law to save money in fraud and abuse, in a way that you can set off in the budget.

I understand the genuine concern of the sponsors with respect to the unearned social security minimum benefit, but I submit to the Senate that we should leave the Finance Committee right where it was when it communicated with us. They said, "We can make the savings you asked us to do." It would be a great day in the Senate if, in the name of helping someone, we said to the Finance Committee, with its capacity to understand the problems of people, "You don't have to do that. We will relieve you of that $800 million."

Mr. President, I yield now to the Senator from Kansas. How much time does the Senator desire?

Mr. DOLE Ten minutes.

Mr. DOMENICI. I yield 10 minutes to the Senator from Kansas.

Mr. DOLE. Mr. President, I do not know how many Senators, other than those in the Chamber, are listening to this discussion. Some Senators may be listening to it in their offices, but I know that a number of Members have committee obligations this morning.

In the floor debate, Friday, there was a great deal of rhetoric spewed forth that was not particularly accurate. I want to try to correct some of this misinformation which was spread around on the Senate floor—and I assume some of it may have gotten into the press.

I should add by way of defense of those who gave incorrect information on Friday that the social security programs and their interrelationships are quite complicated. Indeed, much as we have undertaken an attempt to simplify the Internal Revenue Code in the last couple of years, simplification in our social programs might be a good idea.

On Friday the Senator from Michigan laid down an amendment to the budget resolution. That amendment would reduce the savings required to be made by the Finance Committee by $800 million in fiscal year 1982 and $900 million in fiscal year 1983. These expenditure reductions would be offset by nonspecified savings in the Governmental Affairs Committee.

I should preface this attempt to set the record straight on the minimum benefit proposal by saying that what we are really talking about here is committee expenditure reduction targets. There is, I believe, no one in this Chamber who believes that specific legislative changes can be made through a budget resolution. That is the very thing the Senator from New Mexico has just been discussing. Rather, the question we are debating is whether the Finance Committee should be required to find this $800 million reduction in spending or whether another committee should.

The Senator from Kansas does not necessarily endorse every saving assumption that went into the total savings of the Finance Committee. It may well be that we want to modify this or other proposals or that we want to substitute something not considered by the Budget Committee to obtain the $800 million savings from the minimum benefit.

The point is that we are talking here about expenditure reduction targets, not legislation. The Finance Committee is responsible for $375 billion in annual spending. Even after interest on the public debt is subtracted the total is still pretty big. I think we can find a way to make up these savings if the committee does not want to report this proposal.

I want to go into some of the allegations, and I will quote the statements made on Friday.

Allegations were repeatedly made about the number of persons who would be hurt by the minimum benefit proposal.

Senator RIEGLE said:

It [the proposal] is going to do harm to millions of older people in this country.

Senator RIEGLE also said:

We have a bill right here on the floor that, unless we amend it, is going to hurt 3 million people on social security.

Senator LONG said:

The Government has reneged on its promises to 3 million [persons].

Senator RIEGLE finally stated:

I do not know whether it is the zealots down at OMB who targeted these poor old people or who it was.

In fact, there are, as the Senators state, 3 million people eligible for a benefit based on the minimum benefit, but, according to the best estimates of the Department of Health and Human Services, less than 300,000 would be adversely affected by having less total income and by having adequate income.

First, 1 million of the total 3 million are not receiving such a benefit because they are receiving a higher amount from their spouse's earnings record. Of the remaining 2 million, 200,000 would have no reduction because their "formula," or earned, benefit is the same amount, and 1.1 million are now getting SSI or could do so to make up the difference. Of the remaining 700,000 persons, 360,000 are receiving governmental pensions and 40,000 are dependent on the earnings of a nonretired spouse. This leaves only about 300,000 persons who might be adversely affected as to total income and who might have no other income. Many of this group of 300,000, however, may have independent income of a nongovernmental nature or substantial assets.

It is thus just not correct to say that anything like 3 million people will be hurt by this proposal. And certainly the "poor old people" are not targeted. Indeed, they are not really affected.

Another allegation was made with pounding on the table and lots of other noise.

Senator KENNEDY said:

If we start down this road, we will see social security dismantled piece by piece.

Senator RIEGLE said:

If the administration breaks its promise and gets away with it, I do not think anybody on social security can feel secure in the future.

The fact is, of course, that no one is talking about dismantling the social security system. Rather, we are talking about removing one unearned benefit.

In fact, President Reagan as a candidate and now as President has gone out of his way to indicate we are not to touch the social security program as far as earned benefits are concerned.

I might add that one way to preserve the social security program is let us make some of these spending cuts in other programs so we do not have it all eaten up by inflation.

We are in difficulty now with the social security program that we will discuss later. We are all committed to a strong, healthy social security system. The President has not broken his promise, nor have the rest of us.

Another allegation by the distinguished Senator from Maryland, Senator SARBANES:

I thought one of our objectives on a whole range of programs has been to move people off welfare, not to move people onto welfare, which will be one of the consequences of this cut.

The fact is that the minimum benefit bonus is not an earned benefit, thus it is not unlike welfare. Unfortunately, the minimum benefit in many cases provides "welfare" to those who are not needy, and it draws money from the social security trust fund rather than from general revenues like other welfare programs.

Another statement by the distinguished Senator from Maryland, Senator SABRANES:

As I understand it, over a million of the people receiving the social security minimum benefit have total incomes of less than $3,100 a year, is that correct?

Senator RIEGLE said:

That is my understanding, yes.

In fact, it is unclear what the source is for the statement that over a million people who receive the minimum benefit have incomes under $3,100. The GAO report has no such conclusion and officials of the Social Security Administration know of no study that draws such a conclusion. Indeed, they feel the figure is way too high.

Presumably this statement came from the March 26 "Dear Colleague" letter of the proponents of this amendment. That letter states:

While GAO found that 15 percent of people getting minimum benefits are retired Federal employees, over a million of the recipients are elderly or disabled and have incomes below $3,100 a year. That is not the kind of person whose benefits should be cut.

Mr. RIEGLE. Mr. President, will the Senator yield at that point?

Mr. DOLE. I will yield when I finish my statement. To clarify the record, GAO found a million of those eligible for the minimum benefit are also eligible for SSI. This group could have incomes as high as $9,000 and in any event will not have their benefits reduced because reductions will be offset by SSI.

Another allegation made on Friday by the distinguished Senator from Michigan, Senator RIEGLE:

I know of no case where we have walked away from a group of people who rely on this social security income. We have never done this before. I do not think anyone on social security can count on anything in the future if this part of the program is stripped away.

There are many cases where benefit reductions and eliminations have been made in the past when this seemed necessary so as to eliminate anomalies or to alleviate financial stress on the system. For example, in 1955, persons were removed from the benefit rolls when the retirement test was made applicable to all employment (not merely covered work as had been the case). Also, the original law "guaranteed" every worker the return in benefits of all the employee taxes paid; this was eliminated in 1939. Again last year, benefits were reduced for persons disabled after 1979—even for some who were already disabled and serving out their 5-month waiting period. Senator LONG was the floor manager of that bill, H.R. 3239, which became Public Law 96-265.

Another statement made on the floor by Senator LONG, the distinguished Senator from Louisiana:

And so we will cut by $50 the magnificent sum of $122 a month they are getting to live on.

Senator RIEGLE also said:

And since 1979, the entry level minimum benefit has been frozen at $122 per month.

The fact is that the minimum benefit is not uniformly fixed at $122. Indeed, most minimum benefit recipients receive more than $122 per month, and some get up to $153.10 per month. A person retiring today at age 65 eligible for the minimum benefit would receive $153.10 per month. Even those who receive a minimum benefit of only $122 per month, like those recently qualified for benefits, under the DI program will receive increases in benefit payments when cost of living adjustments are made. After the cost-of-living increase scheduled for July, many minimum beneficiaries will receive about $170 per month.

This Senator does not mean to imply that he feels that $153 is a lot of money. Rather, I merely intend to set the record straight.

The distinguished Senator from Massachusetts, Senator KENNEDY, said on Friday:

So, the Senator's amendment which I have cosponsored will restore benefits to 3 million of the neediest individuals in our society, the elderly who have complied with the law and who are going to see some reduction in their total income.

The fact is that the proposal would by no means result in a loss of income for 3 million persons. About 1.2 million would continue to receive the same amount as before from social security because, although they qualify for the minimum benefit in their own right, they have elected to receive a higher spouse benefit or actually earned a benefit that happens to equal the minimum benefit. Any remainder who are elderly would have a continuing economic net of protection from supplemental security income, which guarantees an income to the aged and disabled of $238 a month for single persons and $357 for married couples.

The PRESIDING OFFICER (Mr. SIMPSON). The 10 minutes yielded to the Senator have expired.

Mr. DOLE. Mr. President, I yield myself 2 additional minutes by unanimous consent.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, any remainder elderly would have a continued income net of protection from SSI.

Indeed, all elderly over age 65 who are poor and who do not have assets over those in the SSI test would not lose one dime of net benefits, because any minimum benefit reduction would be made up by SSI. Instead of 3 million elderly poor being affected, as some have said, the number should be zero. Therefore there was a slight overstatement.

Again Senator RIEGLE said on the floor:

> We have a bill right here on the floor that, unless we amend it, is going to hurt 3 million people on social security.

I just indicated that is not the case and the same argument would apply.

However, it is important to remember the Senate is considering a budget reconciliation resolution, not substantive social security legislation. Thus, the vote on Senator RIEGLE's amendment will have no effect on any group of social security recipients, whether 300,000 or 3 million. All that is at stake is a budgetary savings instruction that will be sent to the Senate Finance Committee. Once the Finance Committee receives this instruction, it will decide how to achieve those savings. Regardless of the outcome of this vote, the Finance Committee may decide to find other ways to make savings rather than changing the minimum benefit. Chairman PICKLE of the House Social Security Subcommittee, for example, has recently unveiled a list of approximately 14 social security savings proposals a number of which could be adopted in lieu of any change in the minimum benefit.

Senator LONG asked:

> What are these old souls 90 years old who never did own much to begin with, going to do at this point in life?

The answer is no one 90 years old who is below the SSI asset and income levels will lose 1 cent because of this proposal. So the answer to Senator LONG's question is that these "old souls" will receive their same total income, but some of it will come from a different source.

In addition, we had all the misinformation disseminated last Friday, there were some implications that may be misleading.

For example, one might infer from Senator RIEGLE's discussion of the high cost of medical care for the elderly that some elderly people will have medical benefits reduced by this proposal to eliminate the minimum benefit. This is not the case. Eligibility for medicare is unaffected by the size of an individual's cash benefit under OASDI. This means that if the minimum benefit were eliminated, anyone already eligible for medicare would remain eligible. An elderly person's out-of-pocket medical expenses will not go up.

Mr. President, let me conclude by saying that there may be good reasons to eliminate the minimum benefit. It tends not to help the poor so much as it adds additional income to those above the poverty line. The GAO study which I quoted on Friday is worthy of brief mention again. So I go back to the GAO study in my final seconds. The GAO stated—

> We found that the minimum benefit provision, which was intended to help the poor, has in recent years mainly benefited retired government workers with pensions, and homemakers supported by their spouses' incomes. Ironically, most needy people receive no additional income from the minimum provision because they are already covered by the Supplemental Security Income program, which require a dollar for dollar offset for other income received.

If there are inequities, truly needy people who are affected, I believe we on the Finance Committee can find a way to minimize their problems.

That is the point I want to make to the Senator from Michigan and others. We are not oblivious to some of the concerns and problems being raised in the Chamber.

I think we have a responsible committee. I believe you will see us dealing with the questions raised by the Senator from Michigan, the Senator from Louisiana, and others, when we get into legislation in the Senate Committee on Finance. But I think it is a cop-out to suggest, that we ought to give it more of the burden to Governmental Affairs. But the point is that the Finance Committee is a responsible body. There are 9 Democrats and 11 Republicans on the committee. We do not all march in lockstep to this President or any other President.

So I say to my friend from Michigan, give us an opportunity to try to work out some of the inequities. We will do what we can and we believe we can accommodate many of the problems raised. We cannot accommodate some of the fictions spread around the floor last week, but we can accommodate some of the real concerns.

I think my time has expired.

Mr. RIEGLE. Mr. President, the fact of the matter is the Reagan administration is taking a meat ax to social security, and once those facts get outside this Chamber and across the country, as they will, you are going to find a real backlash on this issue.

You boil down everything that was just said, and the answer I am hearing coming from the other side of the aisle is "Let us take away the minimum social security benefit and let these old people go on welfare." That is the answer. "They can go down to the welfare office, and they can sign up and we will provide income that way."

I do not think the social security recipients should be forced onto welfare, and that seems to be a basic difference between the two parties.

I yield to the Senator from Arkansas 4 minutes.

Mr. DOLE. Mr. President, will the Senator yield?

Mr. RIEGLE. I will, but I promised to yield to the Senator from Arkansas.

Mr. PRYOR. Mr. President, I did not this morning come to this Chamber prepared to make a speech. I walked in this Chamber, and I see us playing a classic game of ring-around-the-rosy, because here in this great ornate Chamber, the greatest deliberative body in the world, with all of us making good salaries, without hope of getting an increase this year, but certainly without fear of suffering a decrease, we are talking about taking thousands of social security recipients across this country and cutting them back $122 a month.

Every time we bring this up, Mr. President, we are striking a knife into the hearts of the elderly of this country. We are sending panic waves, literally fear, that we cannot even recognize in this body, that they are suffering today while we perpetuate this debate in the Congress and in the Senate about who has jurisdiction over this matter.

Is this just going to relegate itself to a turf battle? Is this just going to be one of those fights here in the Senate that the people are watching, where they say, "Those politicians up there doing nothing but arguing among themselves," while what we are really talking about doing is taking thousands of people, taking their minimum-income payment, and cutting it off.

I would like to say, Mr. President, we are talking today about a country that is graying—and graying very rapidly; a country today that is 11 percent over the age of 65 years. We are talking about people in some 26,000 nursing homes across this country who are watching this debate today, who are living in mortal fear of what we are about to do.

We are talking about thousands of elderly citizens in this country who today are literally eating out of garbage cans to keep alive.

We are not talking to just food stamp recipients or CETA employees or others who today participate in our welfare programs, who have an option. We are talking about a percentage of our population today who have no option, who have no right to work, who have no other way that they can gain even a subsistence allowance.

I know the Senator from New Mexico, the distinguished chairman of the Budget Committee, stated a few moments ago that he felt there might not be within the jurisdiction of the Governmental Affairs Committee a way to find this additional money or that we can be sure that the money is even there.

I would like to read from the CONGRESSIONAL RECORD of March 24, 1981, where the very distinguished chairman of the Budget Committee introduced legislation on debt collection, and in his own statement he made the remark unequivocally that the "General Accounting Office recently discovered 14,000 audit reports gathering dust that amounted to some $4 billion due and recoverable from contractors, grantees who misspent Government funds."

Those are the words of the Senator from New Mexico who questions the fact that Governmental Affairs may not find this money and the Governmental Affairs Committee certainly has jurisdiction over this matter.

Well, I cannot speak for the entire Governmental Affairs Committee, Mr. President, but I can speak without doubt for one member and say that in about 10 minutes' time, given the proper environment and the willingness to cooperate in this matter and to find this $800 million that we should spend for minimum in-

come for social security recipients, I say without question that the Governmental Affairs Committee can find this money and find this waste.

For example, let me talk specifically about who would be affected by a cut such as this. In December of 1979 the Department of Energy Inspector General issued a report on compensation paid to consulting firms—and I get tired talking about consultants, I know my colleagues get tired hearing me talk about it, but here is one good example—in two firms two top executives were receiving annual salaries of $92,700 and $75,000 respectively, as of June 1979.

The Secretary of the Department of Energy was paid only $66,000 per year during that time. Ninety percent of these consulting firms' efforts were on behalf of the Federal Government and a full 50 percent were for the Department of Energy alone.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. PRYOR. May I have 1 additional minute? Why do I not yield back or yield to Senator CHILES, if there is any time?

Mr. RIEGLE. Mr. President, I ask unanimous consent that the Senator be allowed to complete his remarks.

The PRESIDING OFFICER. Without objection.

Mr. RIEGLE. I know the Senators from Florida and Ohio desire recognition. I yield 3 minutes to the Senator from Florida first.

The PRESIDING OFFICER. The Senator from Florida is recognized.

Mr. CHILES. Mr. President, over the years I have taken the lead in the Budget Committee and on the floor to try to cut back on some of the extra benefits. It was my floor amendment which froze the minimum benefit back in 1977, and I have introduced legislation now in an effort to try to correct the financial condition of the social security system and make it sound. My bill which would cut out the minimum benefit in the future, for people who are not now receiving it, and would phase out the student benefit.

But I think we would be very unwise to cut back on people who now are receiving the minimum benefit. Certainly there are some people, who are double-dipping, receiving this minimum benefit, but there are also many widows who entered the work force late in life, who are getting the minimum.

When GAO did this study they found that they could not determine the status of 26 percent of the recipients. Many of those people were farmers, and they were added to social security in the 1950's, and we do not have a very good record on their wage histories.

I happened to be in one of my more rural counties Saturday making a speech to REA co-op members and there were 5,000 or 6,000 people there, and I was mobbed by people there. Most of those people are farmers, and the greatest concern of the older people who were there, was whether they were going to have their social security checks cut.

I found to my amazement how many of them are receiving the minmum benefit. These are farmers.

They are people who were only put into the system in the fifties, and most of them, I guess, I was talking to, had to be aged 70, 75, or up. We found that a large number of these, over 1 million of them, are over 75.

What in the world are those people going to do? They cannot go back and get a job. Those people, many of them, are not on welfare now. Are we going to consign them to have to go get welfare? Many of them do not get welfare and they do not get food stamps because it is against their pride to do that, and they felt they had the dignity of being able to live out a program they had paid something into, the minimum benefit of the Social Security System.

I think the worst of all things we could do to save the amount of money is to turn on these people. What in the world does the "safety net" mean if you are not going to try to take care of these people over 75, a million of whom are below the poverty level, who have been drawing the minimum benefit?

How in the world under anything we are talking about of cutting waste, cutting fat, cutting those people who can help themselves and putting back to work, how in the world do any of these people fall into this? That is the hardest thing I have been able to try to find out.

I am willing to find some way to cut the money—we have part of the money to cut under fraud and waste. If we cannot cut it here, let us find some other way. I do not know where we need to find it, but for goodness sake I think the worst kind of mistake we could be making as far as anything to deal with fairness, equity, or compassion would be to cut these people off now.

The PRESIDING OFFICER. The Senator has used his 3 minutes.

Mr. CHILES. I hope this body will not go along with this cut, and will adopt our amendment to restore the necessary funds.

The PRESIDING OFFICER. The Senator from Michigan has the floor at the present time.

Mr. RIEGLE. I yield 4 minutes to the Senator from Ohio.

The PRESIDING OFFICER. The Senator from Ohio is recognized.

Mr. METZENBAUM. Mr. President, the other day Mr. Stockman appeared before our committee and I saw fit to indicate I thought this program of the administration was cruel, inhumane, and unfair, and I know of no better evidence of that than the effort to cut back on the minimum $122 a month for people who have no effective lobby in this Congress. I cannot believe that the milk of human kindness has ceased to run through the hearts, the bodies, and the souls of my colleagues on the other side of the aisle, so how in the world can they break a contract with those persons who have no lobby?

Two hundred and seventy thousand of these people are over 85, 13,678 of them are over 95, 531,000 are over 80, and almost a million, 941,000 are over 75 years of age.

The only argument that has been made is the argument that somehow we are eliminating double dipping. Well, you very courageous men and women of the majority side, if you want to eliminate double dipping, why do you not do it where it really bites—with all of those Government employees and military personnel who are indeed double dipping these days? Then you would be cutting back on some real dollars. But, no, we are going to go pick on the aged. They cannot do very much about it. They have only worked to make this Nation the great Nation that it is. They have only performed the rigors and the toil in the vineyards of the country developing our industrial might.

The President of the United States is now coming forward with a great new program. It is called workfare. Well, according to the morning paper, the workfare program did not work very well out in California and I doubt that it will work in this country. But I think maybe we ought to reverse the words. I think maybe we ought to make it fair to workers, fair to those who have contributed so much to make this Nation as great as it is, who had a contract with their Government that they would get social security if so many dollars were taken out of their pay and out of their employers' pay. That was their money. If it had not gone into the fund, it would have gone to them. It was a part of the labor cost.

This program is wrong. This amendment of the Senator from Michigan and those of us who have joined in cosponsoring it with him, is right. And I only say to those of the majority party: Where is your kindness? Where is your humanity? How can you be so cruel to so many without any real justification?

Mr. GRASSLEY addressed the Chair.

The PRESIDING OFFICER. The Senator from Iowa.

Mr. GRASSLEY. I yield 2 minutes to the Senator from Alaska.

The PRESIDING OFFICER. The Senator from Alaska is recognized.

Mr. STEVENS. Mr. President, I oppose the Senator's amendment. He seeks to restore this money by requiring the Governmental Affairs Committee to save $800 million in travel and consultants costs. We are dedicated to attempting to save additional money in those areas but the bulk of that money is not under the control of the Governmental Affairs Committee.

As a matter of fact, the subcommittee that I chair is the committee that would be affected by this. It would be necessary to cut civil service and postal areas and to cut them very deeply. We have already cut $956 million from the postal service and we have cut $500 million in civil service retirement and $3.78 billion from Federal pay.

Now, when you look at the impact of this, it will mean that we are going to be looking at a 30-cent stamp. We are looking at cutting civil service pay, not even able to hold it at the level we have in this bill.

I do not understand the concept men-

tioned by the Senator from Ohio. Certainly, when we talk about human kindness we are talking about some sort of balance between those who are required to bear this burden. The subcommittee I chair is taking 10 percent of the burden of the total cuts in the Federal Government. And this amendment seeks to put on it another $800 million on the people that we are trying to be fair with, those that are working now and those that worked in the Civil Service plus the recipients of U.S. mail.

I urge this be opposed. We have taken the amount that was specified in the President's budget. And I think that the leeway that the Budget Committee has given us is sufficient in order to work this out so that there is a balance in terms of sharing the burdens that all Americans must share right now.

Mr. RIEGLE. Will the Senator yield for a point on my time?

Mr. STEVENS. Yes.

Mr. RIEGLE. I think there is some confusion between civilian agency and civilian service. What our amendment does is require the finding of these savings across all the civilian side of the Government and not Civil Service.

Mr. STEVENS. There is no way you can do that by function in terms of what you are doing. The impact of it will come to our subcommittee and there is no other way in our subcommittee except to put it on Civil Service and on retirees.

What the Senator asks is just not possible. If we can make savings next year, in terms of the actual impact of across-the-board savings through administration, that would be another matter.

The PRESIDING OFFICER. Who yields time?

Mr. RIEGLE. Mr. President, I yield 2 minutes to the Senator from Arkansas.

Mr. PRYOR. Mr. President, I thank the distinguished Senator from Michigan for yielding to me.

I rise in support—strong support—of this amendment. I honestly do not feel, Mr. President—and I say this in the greatest of respect to the man—that the President of the United States himself, as an individual, recognizes the impact of this decision on thousands and thousands of senior Americans. David Stockman may recognize it, I am not sure. There may be some people down in OMB that recognize it, Mr. President. But I do not think the President of the United States himself recognizes it.

When we are judged by historians 100 or 200 years from now, I do not think they are going to judge us on whether or not we sent a space shuttle up, or sent the first man to the Moon, or whether or not we built the tallest skyscraper or the greatest road system since the Romans or whatever.

I think, Mr. President, they are going to recognize and judge this country on how we treated that portion of our population that could not help themselves. And I am talking about the elderly today, who have no options, who have no redress, and who have no other way to subsist unless they are supported by the taxpayers of this country.

Mr. President, they have supported this country. They have won our battles, they have fought our wars and they have made this country great. And today we cannot turn our backs on them.

I strongly feel that the people of America are not regarding this vote as a frivolous one. I think that this body, if we study closely what Senator RIEGLE, the distinguished Senator from Michigan, is attempting to do, will realize this benefit is not a handout. This is not a frivolous program. This is not a budget buster, Mr. President. This is an offset. We are offsetting $800 million, restoring this money that has been cut out of the budget. We are offsetting it, charging the Governmental Affairs Committee to come forward with the savings that we know are there in fraud, waste, and abuse. I strongly support the amendment. I hope that it will receive favorable consideration.

Mr. GRASSLEY addressed the Chair.

The PRESIDING OFFICER. The Senator from Iowa.

Mr. GRASSLEY. Before I yield the remainder of our time to the Senator from Delaware, I think at this point we ought to remind the Senator from Arkansas, who talks about the cutting back on social security, that social security expenditures will increase—increase—by $20 billion next year under the Budget Committee recommendations.

The Finance Committee knows that we can save this money. We can save money that has been asked to be saved by the Budget Committee. This may or may not be saved in social security, but saying we are cutting social security is obviously hogwash.

I yield the Senator from Delaware the remainder of the time.

The PRESIDING OFFICER. The Senator from Delaware is recognized.

Mr. ROTH. Mr. President, I wish to express my deep concern that the debate on the Senate floor could be causing real concern among the social security beneficiaries. I think it is very important to understand that no one I am aware of is talking about beginning the distmantling of social security benefits.

I think it is important to understand that most of us feel very strongly that the Social Security System is our most important social program.

The benefits provided under the basic old age pension, which the program was originally designed to provide, are the most important source of income for senior citizens. I would fight any proposal which threatens these basic benefits.

I think it is also important to understand that the Finance Committee has not taken any position with respect to the minimum benefit, and that all it is obligated to do is to meet the targets for expenditures and savings that have been set by the Budget Committee. Let me underscore that at this time the Finance Committee, which has jurisdiction over half of the Federal budget, has not determined where to make the savings contained in the reconciliation. Today's vote is not—and I emphasize—is not a vote on the minimum benefit, but spending targets for the Finance Committee.

Mr. President, I am deeply concerned about what is being done to the Governmental Affairs Committee budget target.

I think it is important to recognize that we are already obligated to make savings of $5.2 billion; that this savings was proposed by my committee even though there were some reservations in the committee that we should go this far.

I would like to point out that we are also directed to make savings in appropriations and expenditures from trust funds estimated to be $700 million in budget authority and $1.3 billion in outlays in fiscal year 1982, and $1 billion in budget authority and $2 billion in outlays in fiscal year 1983.

I can assure my friends on the other side of the aisle that the areas that we will be investigating and trying to make substantial savings in include both travel and filmmaking. We hope to have hearings in the very near future. This, as I say, is an area where we do hope that further reductions can be made.

The PRESIDING OFFICER (Mr. RUDMAN). The Chair will advise the Senator from Delaware that his time has expired.

Mr. GRASSLEY. Mr. President, I will yield 2 minutes time to the Senator from Delaware on the concurrent resolution.

Mr. ROTH. I will not require further time.

Mr. RIEGLE. Mr. President, how much time remains on both sides?

The PRESIDING OFFICER. Time in opposition on the amendment has expired. The Senator from Michigan has 4 minutes remaining.

Mr. RIEGLE. The Senator from Delaware knows that this Government is wasting billions of dollars. Let us find that waste, fraud and abuse in the budget. The majority party here in the Senate also controls the executive branch and all the other agencies of Government. They have made a pledge to find waste, fraud, and abuse. Go find it. But do not go after the social security recipients, the old, the blind, and the sick, and tell them that they have to go on welfare.

If that is the difference between the parties, then let us really understand what that difference is. I do not know why you have targeted these old people; 14,000 of them are over the age of 95. I think it is an outrageous proposition that your only answer to them is if they need money, let them go on welfare.

I yield 2 minutes to the Senator from Florida.

Mr. CHILES. Mr. President, I have heard so many arguments about the need to make this particular cut to make the social security system sound, I want to say that I introduced, I think, the most comprehensive bill trying to work with the problems of social security in both the short term and long term. I held a series of four hearings at the close of last year as chairman of the Senate Committee on Aging at that time, and listened to all of the Presidential commissions make all of their re-

ports. I recognized then that to take care of the short-term cash flow problems you are going to have to do something more than just allowing borrowing among the trust funds.

To make the necessary savings, I made a proposal that we say in the future we will not pay minimum benefits, and in the future we will begin to phase out student benefits. We can do that over 4 years by not letting new students into the program. Under my bill, we would not cut one single minimum benefit today, but say we are going to do that in the future. The Congressional Budget Office estimates, and all of the other information that I have, show that if we adopt those more moderate proposals we will have sufficient money in the system to take care of the short-term problem if we also allow the trust fund borrowing.

If we can take care of that financial problem without cutting these people off why should we do it? We know that this money comes out of the trust fund—in spite of the fact that we are dealing with a unified budget. The money we are dealing with here comes from the trust fund, it comes out of wages that people have paid into the system. So why in the world should we turn around to have a little mathematical advantage on that unified budget? Why in the world should we turn around and cut this minimum benefit from the people who are now receiving it? It just does not make sense. It is not something that we have to do to protect the system.

I just want to urge people not to do it. I do not care about the politics of it. It is just not fair that we should be doing it and I urge Senators not to do that.

The PRESIDING OFFICER. The time of the Senator has expired. The Senator from Michigan has 1 minute remaining.

Mr. RIEGLE. I think what is being clearly established today is that the Republican Party is attacking the foundations of the social security system. They are forcing the people off the system who are least able to fend for themselves and to fight back. To eliminate the minimum benefit from the person who gets the least amount of help from social security and to turn around and say that the answer for them is to go on the welfare system is totally unacceptable. I believe elimination of the minimum benefit turns its back on everything that social security has stood for in this country. It violates the President's pledge during the campaign, and it is just another broken promise here on the Senate floor today.

The PRESIDING OFFICER. The Chair advises the Senator from Michigan that time on the amendment has expired. The Chair recognizes the majority leader.

Mr. BAKER. Will the Senator from New Mexico yield 1 minute on the concurrent resolution?

Mr. DOMENICI. I am delighted to yield.

Mr. BAKER. I thank the Chair and the distinguished majority manager of the bill, the chairman of the Budget Committee.

Mr. President, the Riegle amendment would lower the Finance Committee expenditure reduction totals by $800 million in fiscal year 1982 and $900 million in fiscal year 1983. These savings would have to be made up by the Governmental Affairs Committee.

I urge all my colleagues to vote against this amendment. There may be good reasons to eliminate the minimum benefit in the Social Security Act. The Finance Committee has heard testimony that this provision tends to help retired Federal workers and homemakers supported by their spouses' income rather than the poor. The point is that we need not make that decision today. We are not considering substantive legislation. These are budget totals we are asked to vote on today.

The chairman of the Finance Committee has indicated that the committee may well decide against some of the changes recommended by the administration and instead find other means of achieving its budget targets. I am confident that the Finance Committee will act responsibly and compassionately. The Finance Committee is now only in the hearing process on the President's economic package. To the extent that the Finance Committee finds that any of the proposed savings proposals are inequitable, it will find ways of curing that inequity. Thus, I do not think the Riegle amendment is either necessary or wise. Accordingly, I urge all Members to vote to defeat the amendment.

Mr. President, may I finally say I think we ought to keep in mind throughout this debate we are not making program changes here. We are adopting a budget, a budget resolution, and we are instructing the several jurisdictional committees to make the adjustments in those programs that are necessary to accommodate those new lower figures. There is no way any of us can say with a degree of certainty what one of those committees will do under the circumstances.

Mr. RIEGLE. Mr. President, I yield myself time from the concurrent resolution.

The PRESIDING OFFICER. The Senator from Michigan.

Mr. RIEGLE. This budget document which is on this floor today contains two things. One is a recommendation by the President of the United States to eliminate the minimum benefit for social security recipients. The Budget Committee, as the chairman knows, adopted the President's recommendation and made a determination we would not include money for that purpose, and the money is not here.

It has been taken out. Unless we put the minimum benefit back in today, let the message go out across this country as to what is happening. I know of no previous case where recipients of social security have had their entire benefits stripped away. I know of cases where it was reduced, but I know of no case like this one.

Let us not start down this road. We have given an offsetting saving. They are against waste, fraud, and abuse. Fine; so are we. Let us go find it. Set those junkyard dogs loose. Let us not go out there and throw these people under the welfare system.

Mr. President, I ask unanimous consent that the Senator from Arkansas (Mr. PRYOR) be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. RIEGLE. I ask for the yeas and nays at an appropriate time.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. Under the previous agreement, the vote will occur at 2 o'clock.

Mr. DOMENICI. Mr. President, I yield 1 minute to the Senator from Kansas on the resolution.

Mr. DOLE. Mr. President, we are trying to get correct information on the record with regard to the statements made by the Senator from Michigan. He is outraged in the morning, he is outraged in the afternoon, he is outraged at night. But the facts are not as stated.

We are not putting people on welfare. We are not taking earned benefits away. I think if we stick to the facts, we may be able to save the economy of this country, saving our economy is important to Michigan, important to Kansas, and important to every other State. We may bring down the high inflation rates, high interest rates, and correct everything else that is wrong with our economy. Let us not get carried away by the rhetoric. Let us try to get facts to the Members, who want the facts by the time they vote.

Mr. DOMENICI. Mr. President, I yield myself 1 minute on the resolution.

I thank the Senator from Kansas for his remarks. I do want to say that I do not think there has been a Senator who has come down here to talk about what is going on that has understood the issues and sensed what is really happening as well as the Senator from Kansas. I appreciate his help.

Let me repeat, Mr. President, this is part of an instruction to the Committee on Finance of the U.S. Senate and its counterpart in the House. The jurisdiction of the Committee on Finance in terms of moneys spent annually is $300 billion. We are suggesting in this instruction that they assume the responsibility set out in the totals that they will have to save. They have told us that they can save that amount of money. No one can tell them precisely how.

I suspect that, in their collective wisdom, they will take care of those that really are going to have a problem under this minimum unearned benefit. To stand here and tell the Senate and speak the way those opposing this instruction are speaking is to imply that the vote today takes away any of the latitude from that committee with $300 billion worth of jurisdiction as to how they will find the $800 million in the entitlement savings for 1982.

I submit, Mr. President, that they are going to do what is right as to the programmatic effect and, equally, they are going to do what is right to begin cutting back the automatic expenditures of this Federal Government, which have had a part of getting this country in the mess that it is in.

Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. DOMENICI. As I understand it, we will now proceed with another amendment, and we shall not vote on any amendments until 2 p.m. Is that correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. DOMENICI. Mr. President, I yield the floor.

Mr. RIEGLE. Mr. President, I yield 2 minutes off the bill to the Senator from Florida.

Mr. CHILES. Mr. President, I want to say that I am delighted to hear the remarks of the distinguished chairman of the Committee on the Budget. It gives me a little bit of hope that maybe something will be done here.

The only thing that we have been operating on is the information that we received in the Budget Committee from the Committee on Finance. That information was that they were going to cut the minimum benefit. We had a long debate in the Budget Committee on that and we discussed that the Finance Committee had reported to the Budget Committee that they were going to make some savings. And where were those savings going to be made? They were going to cut the minimum benefit.

Now, we are hearing, "Who said the Finance Committee would cut the minimum benefit?" The distinguished Senator from Delaware said, "I have never wanted to cut the minimum benefit."

I listened to the distinguished chairman of the Finance Committee now, "Goodness gracious, let us cut the minimum benefit."

Thank goodness, if they are not going to cut the minimum benefit. And if they are not, it is perhaps because they get the message—perhaps they get the message that these old folks need some help. They are hurting.

They cannot get a job. They cannot do anything else. I say thank goodness, that the Finance Committee now says maybe it will not cut the minimum benefit. Maybe what the Finance Committee voted on before did not mean a thing. Thank goodness, we are not going to see a cut in the minimum benefit.

I take it I heard today a pledge from all these people that we are not going to see the present recipients cut. I say thank goodness.

Mr. DOLE. Mr. President.

The PRESIDING OFFICER. Who yields time?

Mr. DOMENICI. I yield to the Senator from Kansas.

Mr. DOLE. I shall just put in the RECORD the letter we sent to the Budget Committee. I do not think that we even mentioned minimum benefits in that letter. But I have said on many occasions, publicly, privately, and otherwise, that we are going to comply with the aggregate budget saving requests of the Budget Committee. But we understand that the Budget Committee does not have the legislative authority the Finance Committee does. The distinguished Chairman just pointed out the Finance Committee has $300 billion worth of jurisdiction. Actually that figure is closer to $375 billion, he shortchanged us $75 billion there.

Mr. DOMENICI. It goes up fast.

Mr. DOLE. That is probably interest on the debt, which we cannot do much about.

Mr. President, I say to the distinguished Senator from Florida, for whom I have the highest regard, and others on that side, we are going to try to accommodate those who might slip through the safety net otherwise. If we find a case where someone is adversely affected and we do not believe he should be, we shall make some changes. We are not oblivious, nor are we lacking compassion in the Finance Committee; we are just lacking money.

Mr. RIEGLE. Mr. President, I yield myself 2 minutes off the resolution, because there are some facts that we ought to consider here.

The Budget Committee's report in Senate Concurrent Resolution 9, the reconciliation instruction we are considering, was prepared by people on that side of the aisle, who control the committee, control the chairmanship, control the staff, there is an item on page 96, "Reductions in Federal Spending." Here it is: it explains the Budget Committee's recommendation that the Finance Committee achieve savings by eliminating social security minimum benefits.

Those benefits are taken out. And the Members on that side know that. We should not confuse the issue. They know they propose to take those benefits out. As a matter of fact, we tried to restore funds for this purpose in committee.

Mr. President, if you look at page 196 of the report, the vote on that matter is recorded. It was vote No. 31 on a motion by Senator CHILES, of Florida. He moved to restore this money, to maintain this minimum social security benefit. That motion failed on a vote of 10 to 11, and it was a straight party line vote.

The chairman of the Committee on Finance should know that every single member of the Budget Committee from his party on his side voted against retention of the minimum benefit. That pretty clearly defines the course of his party on this issue. They have chosen to cut spending by removing this social security benefit. Funds for this benefit are not in this budget before us today. That is what we are arguing about, we are trying to put the funds back in.

The amendment at the desk will provide room in the budget for this benefit. I welcome the Senator from Delaware and others as cosponsors. This is a way to make sure that money is in the budget.

We are not proposing to raise spending by 1 penny. We want to find enough money by cutting waste, fraud, and abuse areas to maintain this benefit. We are confident that we can.

I have heard the President say many times that he feels he can find those savings. He is running the executive branch of Government. Let us show confidence in his ability to achieve those savings. Let us make it clear we will tighten the budget by removing those unnecessary amounts and not by taking funds away from the people on the bottom rung of the social security ladder. Let us not tell these people that the answer of this Government is, "Go on welfare. Go on the welfare system so we can cut the social security budget. We can no longer afford the social security minimum benefit that helps you pay your food bills and your medical bills. You go on the welfare system."

That is what you are saying here. There can be no mistake about it. That is the answer you propose. It is an outrageous answer.

Mr. MCCLURE addressed the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. DOMENICI. Mr. President, I yield 2 minutes to the junior Senator from Washington, and I do not have any other requests on this side. This is my last request on this proposal, I say to the Senator from Michigan.

The PRESIDING OFFICER. The Senator from Washington.

Mr. GORTON. I thank the Senator from New Mexico.

Mr. President, I point out that in spite of all the eloquence on the part of the Senator from Michigan, he is speaking of an unearned social security benefit. He speaks of the proposition that, somehow or other, by bringing social security back to an earned benefit, the way it was designed in the first place, we will be hurting people.

At the same time, however, he agrees to this very idea if we will only defer it a few years and not apply it to the people who are getting that money now.

He uses as an example—among 3 million people who are entitled to this benefit at the present time—15,000 who, somehow or other, may be required to go on welfare, over the age of 90 or 95—one-half of 1 percent of all the beneficiaries of this program, most of whom do not need it all, none of whom have earned it.

I suggest that if we are to meet the problem of inflation which is facing this country today and meet the problems of facing expenditures which are out of control, we can do better than provide a program for one-half of 1 percent of its intended beneficiaries.

Mr. RIEGLE. I yield myself 1 minute on the bill.

Mr. President, I must say, in friendship, to the Senator from Washington that I believe he does not state the issue correctly. We see a major danger from having Congress eliminate benefits which social security recipients have been receiving, on which they have come to rely. Once we start reducing the checks of people because of budgetary restraint, then confidence in the whole system will be shaken. We will spark fear and uncertainty that will spread far beyond those who will be directly affected. If these people had never been promised this benefit, the problem would be different. But the budget proposal here is to reduce the monthly checks of individuals—many of whom are very elderly and all of whom have been prom-

ised that they would be getting this benefit.

I yield 1 minute to the Senator from Texas.

Mr. BENTSEN. Mr. President, I rise today to join Senators RIEGLE, LONG, and CHILES in cosponsoring an amendment to restore funding of the social security minimum benefit for those persons currently receiving that benefit. Adopting this amendment will require $800 million in fiscal year 1982 outlays and $900 million in fiscal year 1985 outlays. I should like to stress that to offset that expenditure, the amendment also calls for a spending reduction by instructing the Government Affairs Committee to report legislation requiring comparable savings in fiscal years 1982 and 1983. These savings will be achieved by placing more stringent controls on governmental travel; by reducing or eliminating government filmmaking; by cutting back on consultant expenses; by reducing the cost of supplies; and by scaling down the costs of other such services. These budgetary cuts are to be applied to all civilian government agencies. In other words, this amendment will retain the minimum social security benefit for those now receiving it without increasing the size of the overall budget.

Mr. President, the proposal to eliminate the minimum benefit is predicated on the findings of a study which does not thoroughly examine the potential efforts of implementing such a change. In fact, we know very little about these 3 million minimum benefit recipients except that they are retired or disabled, most are women, and approximately one-third have annual incomes of less than $3,100.

While it is clear that we have a mandate to reassess the advisability of continuing to fund many Federal programs, Mr. President, great care must be taken to insure that reductions made are just and that we do not place an intolerable burden on those least able to afford it. These individuals—3 million people—entered into a solemn agreement with their Government and retired with the understanding that the terms of their agreement would be honored over time. It would be unconscionable to terminate this benefit for a group of Americans on the basis of the limited information available to us today.

The Senator from Washington was just commenting on what he thought the effect of eliminating this benefit might be. Yet we heard some contradictory information in the Finance Committee. Frankly, we do not have enough information on which to base a sound judgment in this matter. If I am going to err, I am going to err on behalf of those who are receiving that minimum benefit.

I am delighted to see that there is an offsetting savings placed against this expenditure, so that we are not talking about increasing the deficit, and I therefore urge each of my colleagues to join me in support of the pending amendment.

Mr. RIEGLE. We do have an offsetting saving here. We are not increasing the budget.

I ask the chairman of the Finance Committee, is it not true that the Finance Committee debated the minimum benefit and that the Finance Committee voted to recommend the elimination of the benefit in its March 15 report to the Budget Committee? I understand that a vote was taken to save the minimum benefit, but that the proposal was turned down by the Finance Committee. Am I correct in my understanding?

Mr. DOLE. This is all preliminary. We go through these games with the Budget Committee. They send us letters and we send them letters. We put out press releases. Some may speak on the floor.

Mr. RIEGLE. Was there a vote in the committee against the social security minimum benefit?

Mr. DOLE. There was.

Mr. RIEGLE. That is what I thought.

Mr. DOLE. We are still a legislative committee; the Budget Committee is not.

We will be glad to listen to the Senator, whenever he wants to put out another press release and come to our committee.

Mr. RIEGLE. We would like you to be on the record in support of the benefit. If you are for it, please say so. If you are against it, then let the record show that.

I would be delighted to have you say here, right now, that you are not going to eliminate minimum benefit, and I will yield you a minute of my time to do so.

Mr. DOLE. Give me a minute, and I will think about it during the minute.

We could take it out of trade adjustment assistance. That is the same function. That would please the Senator from Michigan.

I suggest that we are a responsible committee. We are not a partisan committee in the sense that we are going to use anything any administration sends to us.

We have heard Senator BENTSEN, a highly regarded member of that committee; and I see Senator BRADLEY, and I think you can count on his support. From time to time, you can count on the support of this Senator. But I have a larger obligation now, and that is to try to help the economy.

I am not going to point any fingers of blame, but we understand our responsibility, and we hope the Senator from Michigan will give us some credit for that. I say it in all seriousness. We are going to have more hearings. We welcome his presence and his testimony, and we will do the best we can to accommodate some way to to save the economy and try to make certain that no one who really should be protected is impacted by this amendment.

Mr. RIEGLE. Mr. President, I appreciate the sentiments of my friend from Kansas. I know him to be a reasonable man on many issues.

However, the record is clear. He knows and I know that the Budget Committee has gone on record in favor of removing the money for these minimum benefits. The Finance Committee has voted to make this reduction. The cut would be in line with the President's recommendation. I feel strongly that the full Senate should go on record in opposition to this cut.

If the Senator is saying, between the lines, that he does not agree with the administration proposal or that the proposal might be altered, it would be good to know. That is what we are voting on today. We are voting on whether we should maintain this benefit. We have provided an offsetting saving. The Senator might not like the saving, but we think it is reasonable.

We feel that we should maintain this benefit, and people will have to decide how they feel about that. There are a lot of elderly people who depend on the minimum benefit, and they are likely to lose it unless we support this amendment today.

Mr. PERCY. Mr. President, after listening to the debate and carefully weighing all the issues involved, I must oppose the amendment offered by Senator RIEGLE. The amendment would restore $800 million to the budget of the Finance Committee by requiring the Governmental Affairs Committee to make an additional savings to offset that amount for the purpose of restoring the social security minimum benefit.

First, Mr. President, let me reiterate what the distinguished chairmen of the Budget and Finance Committees have said here this morning. We are not debating actual program changes today. We are debating which Senate committees will be required to make what savings in the programs within their jurisdictions. The Senate Finance Committee has already agreed to make a certain amount of savings, including this $800 million, in the programs under its jurisdiction.

This does not mean, however, that it is locked into eliminating the minimum benefit by this reconciliation resolution. The distinguished chairman of the Finance Committee, Senator DOLE, has said that if his committee uncovers new information in the coming days that shows the elimination of the minimum benefit will impose an undue hardship on millions of elderly Americans, the committee will still be able to reject repeal of the minimum benefits—even if this amendment is defeated.

Second, Mr. President, the intent of the amendment to cut funds for Government travel, filmmaking, and hiring of consultants by requiring the Governmental Affairs Committee to come up with an additional $800 million in savings will not have that result at all. Those items, for the purposes of this reconciliation resolution, are not within the power of the Governmental Affairs Committee to cut. The only place that additional cuts can be made are in areas where the committee has already made substantial reductions: $900 million in civil service retirement, $976 million from the Postal Service and $37.8 billion in Federal pay.

While I support the goals of cutting Government waste, and have introduced legislation of my own to do so, this amendment will not achieve those goals.

With regard to the minimum social security benefit itself, the findings of independent studies show that those who will be most affected are not the elderly poor. Two prominent studies have recommended that it be eliminated be-

cause for many beneficiaries it represents a "windfall" rather than a very needed supplement to a modest income.

Mr. President, the minimum benefit was originally adopted to provide a minimum amount of monthly income to the elderly poor. For that reason, Congress has sought to protect it through the years by increasing it more rapidly than other social security benefits.

In 1977, the Congress, as part of its action to reform the financing of the social security system, reviewed the minimum benefit and decided to freeze it and phase it out. That decision in part was based on the fact that the minimum benefit from 1940 to 1977 had increased tenfold while other benefits had increased only five times. In addition, Congress found at the time that the minimum benefit was being paid to people who did not, during their working years, rely on their covered earnings as a primary source of support. Thus as a group these beneficiaries were receiving unintentionally high benefits which were intended mostly to help the elderly poor who had little or no other income.

The General Accounting Office in its 1979 study recommended that the minimum benefit be eliminated rather than phased out gradually. The GAO study found the following:

Forty-four percent of sampled beneficiaries received no additional income from the minimum provision because of offsets required in other federal benefits.

Of the remaining 56 percent (who did receive additional income from the minimum benefit), 15 percent received federal pensions averaging $900 per month,

Ten percent depended on working spouses earning an average of at least $13,700 during the first year after the beneficiary began receiving social security, and

Two percent relied on retired spouses with federal pensions averaging $12,500 per year.

The GAO also found that most sampled minimum beneficiaries were part-time or intermittent workers and were never a permanent part of the labor force covered by social security. Nearly half had gaps in employment of 20 years or more and about one-third had not worked in covered employment for 10 years.

Because of marginal work in employment covered by social security, sampled beneficiaries had paid little in social security taxes. For these people, social security was a new source of income upon becoming eligible for the minimum benefit, rather than a replacement of lost covered earnings. GAO found that this group will recover their total contribution of social security taxes, on the average, 6 times faster than people who have contributed the most to the trust fund, and in some cases, as much as 30 times faster.

Most recently, the National Commission on Social Security in its final report urged elimination of the monthly minimum benefit because the extra costs of paying these unearned benefits are borne by workers who pay into the social security system for their entire working careers. The report cited the example of a worker with the minimum required covered employment of 10 years who contributes one one-fourth of what those covered by social security throughout their entire work lives contribute, but receives nearly one-half the total benefits.

It is to rectify this inequity that the elimination of the social security minimum benefit is advocated. No one on this side of the aisle has any intention of denying this benefit to the elderly who need it. Since the enactment of the minimum benefit Congress established a minimum income level through the implementation of the supplemental security income program. For the needy, SSI will make up for the reduction in the social security minimum benefit dollar for dollar.

I feel just as strongly about the needs of older Americans as those on the other side of the aisle. But it is clear from the evidence presented today that the minimum benefit is no longer serving its original purpose and is in fact putting a very serious drain on the resources of the trust fund which pays basic retirement and survivors' benefits to millions of elderly Americans.

Nonetheless, I am reassured by Chairman DOLE'S intention to scrutinize the impact of the repeal of the minimum benefit on the elderly poor and make whatever adjustments are necessary to protect this group when the full Senate is called upon to consider the legislative proposals designed to meet the savings of this reconciliation resolution.

● Mr. MOYNIHAN. Mr. President, I rise as a cosponsor of Senator RIEGLE'S amendment to restore the social security "minimum benefit," and to express my strong support of this effort.

The Social Security Act provides a benefit floor for anyone who qualifies for social security payments—3.1 million older Americans now receive this minimum benefit of $122 per month. The administration proposes to recalculate these benefits on the basis of the recipients' work history. Some beneficiaries receive the minimum payment because it happens to be the benefit for which their work history makes them qualified. But for the majority of recipients, recalculating benefits will mean losing benefits.

Quite simply, this is wrong. It is unconscionable to allow people to retire under a given set of rules, expecting a certain minimum level of provision from their Government, then to change the rules on which they depend. These people cannot return to work in order to qualify for a higher benefit. Indeed, the Federal Government allowed them to retire, to forgo the additional years of work needed to qualify for higher benefits, and promised them a secure income floor. It is this commitment on which the President is asking us to renege.

It is a principle of ours that Government does not break its commitments to the people. It is one thing to propose eliminating the minimum benefit in future years. It is quite another to eliminate the minimum for those now dependent on it. And dependent they are. The administration itself estimates that 26 percent of minimum benefit recipients—more than 800,000 older Americans—will lose some of their social security benefit and seem to have no outside annuity with which to supplement their income. More than a million minimum benefit recipients have incomes below $3,100 per year.

Restoring the minimum benefit will reduce fiscal year 1982 outlay savings by $800 million. It will still, however, allow $1.4 billion of savings in all social security programs and $8 billion in all Finance Committee programs. I cannot claim that $800 million is an insignificant sum. But in comparison to the level of protection the minimum benefit affords older workers, it is a small amount indeed.●

SOCIAL SECURITY MINIMUM BENEFIT

Mr. ROBERT C. BYRD. Mr. President, the debate has begun in earnest on the many complicated questions which affect our current system of social security. There is hardly an American family today that is not touched by social security in some way.

Today, the issue before the Senate is whether to eliminate—without any detailed committee study—the social security minimum benefit through the budget process. The minimum benefit is, in a very real sense, part of what makes our social security system distinct from a private insurance or retirement program. The inadequacy of private retirement plans made it necessary to create a social security system in the first place.

We cannot simply eliminate the minimum benefit on the grounds of cost cutting. We must examine its purpose, determine whether it still serves that purpose and decide whether it is worth the cost.

We must also consider the administrative difficulties involved in eliminating the minimum benefit for current beneficiaries. Health and Human Services Secretary Schweiker recently confirmed this administrative problem.

Since the wage history of many beneficiaries goes back many years, not all are on the social security computers. This means an expensive undertaking to hire new employees to go through files and recalculate benefits. The resulting chaos could very well delay the processing of checks for all social security beneficiaries.

Social security affects the daily lives of 35 million Americans, and, for almost a third of our Nation's elderly, it is their major source of retirement income. With a program as large and complex and costly as social security, there is an inevitable risk that the critical issues do not receive the attention that they merit. It is my hope that there will be more deliberate and careful study of the system. In the meantime, I cannot support the elimination of the minimum benefit and the imposition of human hardships on those beneficiaries who depend on this program.

I reject the notion that has been proffered by the administration that the neediest recipients of the minimum payment should be asked to abandon the social security system and turn to the welfare system.

I support a balanced budget. But I reject the notion that the budget should

be balanced on the backs of the elderly of this country.

Mr. DOMENICI. Mr. President, in order to be consistent with our previous understanding, I yield the floor to Senator McCLURE, who has an amendment; and I will control the time in opposition, since I oppose the amendment.

I yield to him at this time.

UP AMENDMENT NO. 27

(Purpose: To restore funding for the Strategic Petroleum Reserve and for other purposes)

Mr. McCLURE. Mr. President, I send an amendment to the desk by way of a substitute.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Idaho (Mr. McCLURE) proposes an unprinted amendment numbered 27.

Mr. McCLURE. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Page 2, line 21, strike Committee amendment number 9 (subsection 9(b), section 10 and section 11) through page 22, line 13 and insert in lieu thereof the following:

(b) The Committees on Appropriations of the House and Senate shall report not later than June 5, 1981, legislation to reduce previously enacted appropriations by $13,300,000,000 in budget authority and $1,500,000,000 in outlays for fiscal year 1981; by $3,200,000,000 in outlays for fiscal year 1982; and $1,800,000,000 in outlays for fiscal year 1983.

(c) Not later than May 31, 1981, the committees named in subsection (c)(1) through (c)(29) of this section shall submit their recommendations to the Committees on the Budget of their respective Houses. Those recommendations shall be sufficient to accomplish the reductions required by subsections (c)(1) through (c)(29) of this section. After receiving those recommendations, the Committees on the Budget shall report to the House and Senate a reconciliation bill or resolution or both carrying out all such recommendations without any substantive revision.

SENATE COMMITTEES

(1)(A) The Senate Committee on Agriculture, Nutrition, and Forestry shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce outlays by $163,000,000 in fiscal year 1931; to reduce the budget authority by $474,000,000 and outlays by $928,000,000 in fiscal year 1982; and to reduce budget authority by $659,000,000 and outlays by $618,000,000 in fiscal year 1983; and

(B) The Senate Committee on Agriculture, Nutrition, and Forestry shall also report changes in laws within the jurisdiction of that committee sufficient to require reductions in appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $645,000,000 in budget authority and $3,000,000 in outlays for fiscal year 1981; $3,243,000,000 in budget authority and $3,200,000,000 in outlays for fiscal year 1982; and $4,011,000,000 in budget authority and $3,961,000,000 in outlays for fiscal year 1983.

(2) The Senate Committee on Armed Services shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce budget authority by $233,000,000 and outlays by $233,000,000 in fiscal year 1981; to reduce budget authority by $966,000,000 and outlays by $966,000,000 in fiscal year 1982; and to reduce budget authority by $899,000,000 and outlays by $899,000,000 in fiscal year 1983.

(3) The Senate Committee on Banking, Housing, and Urban Affairs shall report changes in laws within the jurisdiction of that committee sufficient to require reductions in appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $6,146,000,000 in budget authority and $133,000,000 in outlays for fiscal year 1981; $15,460,000,000 in budget authority and $958,000,000 in outlays for fiscal year 1982; and $18,412,000,000 in budget authority and $2,274,000,000 in outlays for fiscal year 1983.

(4)(A) The Senate Committee on Commerce, Science and Transportation shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce budget authority by $150,000,000 and outlays by $150,000,000 in fiscal year 1982 and to reduce budget authority by $300,000,000 and outlays by $300,000,000 in fiscal year 1983; and

(B) The Senate Committee on Commerce, Science, and Transportation shall also report changes in laws within the jurisdiction of that committee sufficient to require reductions in appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $1,558,000,000 in budget authority and $884,000,000 in outlays for fiscal year 1982 and $1,598,000,000 in budget authority and $1,328,000,000 in outlays for fiscal year 1983.

(5) The Senate Committee on Energy and Natural Resources shall report changes in laws within the jurisdiction of that committee sufficient to require reductions in appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $2,071,000,000 in budget authority and $106,000,000 in outlays for fiscal year 1981; $714,000,000 in budget authority and $434,000,000 in outlays for fiscal year 1982; $660,000,000 in budget authority and $669,000,000 in outlays for fiscal year 1983.

(6)(A) The Senate Committee on Environment and Public Works shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce outlays by $185,000,000 in fiscal year 1982 and to reduce outlays by $900,000,000 in fiscal year 1983; and

(B) The Senate Committee on Environment and Public Works shall also report changes in laws within the jurisdiction of that committee sufficient to require reductions in appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $2,350,000,000 in budget authority and $68,000,000 in outlays for fiscal year 1981; $1,935,000,000 in budget authority and $793,000,000 in outlays for fiscal year 1982; and $3,035,000,000 in budget authority and $1,872,000,000 in outlays for fiscal year 1983.

(7)(A) The Senate Committee on Finance shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce budget authority by $212,000,000 and outlays by $295,000,000 in fiscal year 1981; to reduce budget authority by $4,354,000,000 and outlays by $9,354,000,000 in fiscal year 1982; and to reduce budget authority by $4,494,000,000 and outlays by $10,870,000,000 in fiscal year 1983; and

(B) The Senate Committee on Finance shall also report changes in laws within the jurisdiction of that committee sufficient to require reductions in appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $93,000,000 in budget authority and $112,000,000 in outlays for fiscal year 1982 and $114,000,000 in budget authority and $132,000,000 in outlays for fiscal year 1983.

(8) The Senate Committee on Foreign Relations shall report changes in laws within the jurisdiction of that committee sufficient to require reductions in appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $1,050,000,000 in budget authority and $301,000,000 in outlays for fiscal year 1982 and $600,000,000, in budget authority and $367,000,000 in outlays for fiscal year 1983.

(9)(A) The Senate Committee on Governmental Affairs shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce outlays by $513,000,000 in fiscal year 1982 and to reduce outlays by $414,000,000 in fiscal year 1983; and

(B) The Senate Committee on Governmental Affairs shall also report changes in laws within the jurisdiction of that committee sufficient to require reductions in appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $4,776,000,000 in budget authority and $4,690,000,000 in outlays for fiscal year 1982 and $6,360,000,000 in budget authority and $6,388,000,000 in outlays for fiscal year 1983.

(10) The Senate Committee on the Judiciary shall report changes in laws within the jurisdiction of that committee sufficient to require reduction in appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $116,000,000 in budget authority and $13,000,000 in outlays for fiscal year 1982 and $133,000,000 in budget authority and $81,000,000 in outlays for fiscal year 1983.

(11)(A) The Senate Committee on Labor and Human Resources shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce budget authority by $39,000,000 and outlaws by $49,000,000 in fiscal year 1981; to reduce budget authority by $658,000,000 and outlays by $622,000,000 in fiscal year 1982; and to reduce budget authority by $1,601,000,000 and outlays by $1,495,000,000 in fiscal year 1983; and

(B) The Senate Committee on Labor and Human Resources shall also report changes in laws within the jurisdiction of that committee sufficient to require reductions in appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $2,388,000,000 in budget authority and $414,000,000 in outlays for fiscal year 1981; $10,303,000,000 in budget authority and $7,928,000,000 in outlays for fiscal year 1982; and $12,363,000,000 in budget authority and $10,913,000,000 in outlays for fiscal year 1983.

(12) The Senate Select Committee on Small Business shall report changes in laws within the jurisdiction of that committee sufficient to require reductions in appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $97,000,000 in budget authority and $67,000,000 in outlays for fiscal year 1981; $526,000,000 in budget authority and $390,000,000 in outlays for fiscal year 1982; and $564,000,000 in budget

authority and $541,000,000 in outlays for fiscal year 1983.

(13)(A) The Senate Committee on Veterans' Affairs shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93–344, sufficient to reduce budget authority by $14,000,000 and outlays by $14,000,000 in fiscal year 1981; to reduce budget authority by $32,000,000 and outlays by $32,000,000 in fiscal year 1982; and to reduce budget authority by $28,000,000 and outlays by $28,000,000 in fiscal year 1983; and

(B) The Senate Committee on Veterans' Affairs shall also report changes in laws within the jurisdiction of that committee sufficient to require reductions in appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $414,000,000 in budget authority and $375,000,000 in outlays for fiscal year 1982 and $397,000,000 in budget authority and $404,000,000 in outlays for fiscal year 1983.

HOUSE COMMITTEES

(14)(A) The House Committee on Agriculture shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93–344, sufficient to reduce outlays by $183,000,000 in fiscal year 1981; to reduce budget authority by $232,000,000 and outlays by $693,000,000 in fiscal year 1982; and to reduce budget authority by $400,000,000 and outlays by $362,000,000 in fiscal year 1983; and

(B) The House Committee on Agriculture shall also report changes in laws within the jurisdiction of that committee sufficient to reduce appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $645,000,000 in budget authority and $3,000,000 in outlays for fiscal year 1981; $3,462,000,000 in budget authority and $3,400,000,000 in outlays for fiscal year 1982; and $4,210,000,000 in budget authority and $4,161,000,000 in outlays for fiscal year 1983.

(15) The House Committee on Armed Services shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93–344, sufficient to reduce budget authority by $233,000,000 and outlays by $233,000,000 in fiscal year 1981; to reduce budget authority by $966,000,000 and outlays by $966,000,000 in fiscal year 1982; and to reduce budget authority by $899,000,000 and outlays by $899,000,000 in fiscal year 1983.

(16) The House Committee on Banking, Finance and Urban Affairs shall report changes in laws within the jurisdiction of that committee sufficient to reduce appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $7,146,000,000 in budget authority and $143,000,000 in outlays for fiscal year 1981; $14,139,000,000 in budget authority and $808,000,000 in outlays for fiscal year 1982; and $16,534,000,000 in budget authority and $1,669,000,000 in outlays for fiscal year 1983.

(17) The House Committee on the District of Columbia shall report changes in laws within the jurisdiction of that committee sufficient to reduce appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $39,000,000 in budget authority and $40,000,000 in outlays for fiscal year 1982 and $56,000,000 in budget authority and $64,000,000 in outlays for fiscal year 1983.

(18)(A) The House Committee on Education and Labor shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93–344, sufficient to reduce budget authority by $808,000,000 and outlays by $725,000,000 in fiscal year 1982 and to reduce budget authority by $1,681,000,000; and outlays by $1,532,000,000 in fiscal year 1983; and

(B) The House Committee on Education and Labor shall also report changes in laws to modify programs within the jurisdiction of that committee sufficient to reduce appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $2,282,000,000 in budget authority and $372,000,000 in outlays for fiscal year 1981; $8,578,000,000 in budget authority and $6,733,000,000 in outlays for fiscal year 1982; and $10,035,000,000 in budget authority and $8,968,000,000 in outlays for fiscal year 1983.

(19)(A) The House Committee on Energy and Commerce shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 41(c)(2)(C) of Public Law 93–344 sufficient to reduce budget authority by $176,000,000 and outlays by $110,000,000 in fiscal year 1981; to reduce budget authority by $695,000,000 and outlays by $1,011,000,000 in fiscal year 1982; and to reduce budget authority by $903,000,000 and outlays by $1,537,000,000 in fiscal year 1983; and

(B) The House Committee on Energy and Commerce shall also report changes in laws to modify programs within the jurisdiction of that committee sufficient to reduce appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $764,000,000 in budget authority and $19,000,000 in outlays for fiscal year 1981; $1,885,000,000 in budget authority and $1,118,000,000 in outlays for fiscal year 1982; and $2,251,000,000 in budget authority and $1,887,000,000 in outlays for fiscal year 1983.

(20) The House Committee on Foreign Affairs shall report changes in laws to modify programs within the jurisdiction of that committee sufficient to reduce appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $150,000,000 in budget authority and $101,000,000 in outlays for fiscal year 1982 and $196,000,000 in budget authority and $167,000,000 in outlays for fiscal year 1983.

(21) The House Committee on Interior and Insular Affairs shall report changes in laws to modify programs within the jurisdiction of that committee sufficient to reduce appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $331,000,000 in budget authority and $84,000,000 in outlays for fiscal year 1981; $815,000,000 in budget authority and $369,000,000 in outlays for fiscal year 1982; and $796,000,000 in budget authority and $564,000,000 in outlays for fiscal year 1983.

(22) The House Committee on the Judiciary shall report changes in laws to modify programs within the jurisdiction of that committee sufficient to reduce appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $116,000,000 in budget authority and $13,000,000 in outlays for fiscal year 1982 and $133,000,000 in budget authority and $81,000,000 in outlays for fiscal year 1983.

(23)(A) The House Committee on Merchant Marine and Fisheries shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93–344, sufficient to reduce budget authority by $39,000,000 and outlays by $39,000,000 in fiscal year 1981; to reduce budget authority by $242,000,000 and outlays by $242,000,000 in fiscal year 1982; and to reduce budget authority by $479,000,000 and outlays by $479,000,000 in fiscal year 1983; and

(B) The House Committee on Merchant Marine and Fisheries shall also report changes in laws within the jurisdiction of that committee sufficient to reduce appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $147,000,000 in budget authority and $15,000,000 in outlays for fiscal year 1982 and $60,000,000 in budget authority and $32,000,000 in outlays for fiscal year 1983.

(24)(A) The House Committee on Post Office and Civil Service shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93–344, sufficient to reduce outlays by $513,000,000 in fiscal year 1982 and to reduce outlays by $414,000,000 in fiscal year 1983; and

(B) The House Committee on Post Office and Civil Service shall also report changes in laws within the jurisdiction of that committee sufficient to reduce appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $4,737,000,000 in budget authority and $4,650,000,000 in outlays for fiscal year 1982 and $6,304,000,000 in budget authority and $6,324,000,000 in outlays for fiscal year 1983.

(25)(A) The House Committee on Public Works and Transportation shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Iaw 93–344, sufficient to reduce outlays by $185,000,000 in fiscal year 1982 and to reduce outlays by $900,000,000 in fiscal year 1983; and

(B) The House Committee on Public Works and Transportation shall also report changes in laws within the jurisdiction of that committee sufficient to reduce appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $2,350,0000,000 in budget authority and $68,000,000 in outlays for fiscal year 1981; $6,446,000,000 in budget authority and $1,033,000,000 in outlays for fiscal year 1982; and $5,122,000,000 in budget authority and $2,697,000,000 in outlays for fiscal year 1983.

(26) The House Committee on Science and Technology shall report changes in laws within the jurisdiction of that committee sufficient to reduce appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $82,000,000 in budget authority and $35,000,000 in outlays for fiscal year 1981; $78,000,000 in budget authority and $39,000,000 in outlays for fiscal year 1982; and $90,000,000 in budget authority and $59,000,000 in outlays for fiscal year 1983.

(27) The House Committee on Small Business shall report changes in laws within the jurisdiction of that committee sufficient to reduce appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $97,000,000 in budget authority and $67,000,000 in outlays for fiscal year 1981; $526,000,000 in budget authority and $390,000,000 in outlays for fiscal year 1982; and $564,000,000 in budget authority and $541,000,000 in outlays for fiscal year 1983.

(28)(A) The House Committee on Veterans' Affairs shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in sec-401(c)(2)(C) of Public Law 93–344, sufficient to reduce budget authority by $14,000,000 and outlays by $14,000,000 in fiscal year 1981; to reduce budget authority by $32,000,000 and outlays by $32,000,000 in fiscal year 1982; and to reduce budget authority by $28,000,000 and outlays by $28,000,000 in fiscal year 1983; and

(B) The House Committee on Veterans' Affairs shall also report changes in laws

within the jurisdiction of that committee sufficient to reduce appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $414,000,000 in budget authority and $375,000,000 in outlays for fiscal year 1982 and $397,000,000 in budget authority and $404,000,000 in outlays for fiscal year 1983.

(29)(A) The House Committee on Ways and Means shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce budget authority by $36,000,000 and outlays by $710,000,000 in fiscal year 1981, to reduce budget authority by $3,659,000,000 and outlays by $7,861,000,000 in fiscal year 1982; and to reduce budget authority by $3,591,000,000 and outlays by $9,373,000,000 in fiscal year 1983; and

(B) The House Committee on Ways and Means shall also report changes in laws within the jurisdiction of that committee sufficient to reduce appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $978,000,000 in budget authority and $994,000,000 in outlays for fiscal year 1982 and $1,294,000,000 in budegt authority and $1,312,000,000 in outlays for fiscal year 1983.

(30) In addition to the actions required by subsections c(1) through c(29) each Committee of the Senate and House referred to therein shall report changes in laws within their respective jurisdictions sufficient to reduce budget authority by .6 percent for fiscal year 1982 and by .5 percent for fiscal year 1983; and to reduce outlays by .8 percent in fiscal year 1982 and .62 percent in fiscal year 1983; *Provided*, That no such Committee shall reduce budget authority or outlays in function 050.

SEC. 10. The enactment of savings required by this resolution is critical to the health of the economy of the Nation; and

Expeditious action on legislation pursuant to these instructions is critical to achieving the savings required by this resolution; and

The Senate is committed to completing action on the savings legislation required by this resolution at the earliest possible time; and

It is the sense of the Senate that Senate committees instructed in section 9 (c)(1) through (c)(13) of this resolution should begin deliberations on the legislation those committees are required to report under this resolution as soon as the resolution is agreed to in the Senate; and

It is the further sense of the Senate that Senate committees should report the legislation required by section 9 of this resolution as agreed to in the Senate, except to the extent that the amounts referred to may be modified in conference with the House of Representatives, by May 31, 1981.

SEC. 11. The Senate Committee on Governmental Affairs should report changes in laws within the jurisdiction of that committee which would reduce the costs to the Government which result from waste, fraud, and abuse. Savings in appropriations and expenditures from trust funds from such statutory changes are estimated to be $700,000,000 in budget authority and $1,300,000,000 in outlays in fiscal year 1982 and $1,000,000,000 in budget authority and $2,000,000,000 in outlays in fiscal year 1983.

ORDER OF PROCEDURE

Mr. STEVENS. Mr. President, will the Senator yield?

Mr. McCLURE. I yield.

Mr. STEVENS. Mr. President, I ask that it be in order to send to the desk an amendment to the committee amendment and that it be reported at this time.

The PRESIDING OFFICER. Is there objection?

Mr. RIEGLE. Reserving the right to object, I did not hear the request.

Mr. BAKER. Mr. President, what request was made? There was no unanimous-consent request made that I know of.

Mr. STEVENS. Yes, there is. I requested that I be permitted to file this amendment. It is an amendment to restore $1.5 billion for SPRO. It is to the committee amendment. This is a substitute for the committee amendment.

I have to return to the committee I have been attending. The Senator from Idaho has an hour on his amendment, and I cannot file my amendment until he has finished.

Mr. BRADLEY. Mr. President, was there a unanimous-consent request propounded as to $1.5 billion?

Mr. STEVENS. That is correct.

Mr. BRADLEY. I object.

The PRESIDING OFFICER. Objection is heard.

The amendment offered by the Senator from Alaska would be in order when the time for debate on the amendment by the Senator from Idaho had expired or the time had been yielded back.

Mr. STEVENS. I sought no special advantage, other than to return to the committee and to let the Senate know that I have an amendment for $1.5 billion. The hour can run, and I will offer it then.

Mr. BRADLEY. Mr. President, will the Senator yield?

Mr. STEVENS. I yield.

Mr. BRADLEY. The Chair has clarified the issue. As I understand the Chair's statement, there would be no effect if the Senator offered his amendment now versus having offered it at the end of the debate on the amendment of the Senator from Idaho.

Mr. STEVENS. That is correct.

Mr. BRADLEY. The first vote then would occur on the amendment of the Senator from Alaska?

Mr. STEVENS. That is right.

Mr. BRADLEY. And it is the intention of the Senator from Idaho to call for the yeas and nays on the underlying amendment?

Mr. McCLURE. Mr. President, it is not my intention to do that, and I shall explain to the Senator from New Jersey what I have in mind which is simply this: The issue of how the strategic petroleum reserve will be funded is a matter of great concern to the Senator from New Jersey and this Senator from Idaho, as it is to others in this body. The amendment which I have offered, which is a substitute for the committee amendment that is now pending, calls for full funding of the strategic petroleum reserve, normally known as SPRO, in fiscal years 1982 and 1983, with offsetting cuts to accommodate that $3 billion addition to the budget figures for each year. The Senator from Alask believes that that is too great an addition and he will offer, rather than that figure, an amendment that will increase the funding by $1.5 billion. Under the parliamentary situation which would then obtain, the vote would first occur on the committee amendment. It is my expectation that, having given the Senate an alternative upon which to vote, if his amendment were adopted, I shall withdraw mine.

Mr. BAKER. Mr. President, will the Senator yield to me?

Mr. McCLURE. I am happy to yield.

The PRESIDING OFFICER. The Senator from Tennessee.

Mr. BAKER. Mr. President, I thank the Chair.

Mr. President, at the conclusion of the time allocated under the act for the McClure amendment, at the appropriate time the amendment the Senator from Alaska will be offered. The Senator from Alaska and the Senator from Idaho have explained their respective amendments. I ask the Senator to yield simply in order for me to say that I will be opposed on both amendments.

Mr. McCLURE. I thank the Senator, I guess.

The PRESIDING OFFICER. The Senator from New Jersey.

Mr. BRADLEY. Mr. President, it is my understanding that at the end of the debate period on the underlying amendment any amendment would then be in order, not just the amendment of the Senator from Alaska. Is that correct?

Mr. McCLURE. The Senator is correct.

The PRESIDING OFFICER. Will the Senator from New Jersey please restate his statement and question to the Senator from Idaho?

Mr. BRADLEY. At the end of the period for debate on the amendment of the Senator from Idaho, the floor would be open to amendment by any Senator at that point?

Mr. McCLURE. To the committee amendment, that is correct.

Mr. BRADLEY. To the committee amendment, is that correct?

Mr. McCLURE. That is correct.

The PRESIDING OFFICER. To the amendment addressed by the amendment of the Senator from Idaho, that is correct.

Mr. BRADLEY. But not until all time has expired on the underlying amendment, is that correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. McCLURE. Mr. President, I ask the Chair to indicate that an amendment to the amendment offered by the Senator from Idaho may be in order. My understanding is that there would be an amendment to the committee amendment.

The PRESIDING OFFICER. The Chair did not state that. The amendment to a change in the language proposed by the Senator from Idaho, I believe.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Chair wishes to consult with the Parliamentarian.

The Chair will state that an amendment to the committee amendment would be in order and an amendment to the McClure amendment, the amendment of the Senator from Idaho, would not be in order since that is a second-degree amendment.

Mr. BRADLEY. Mr. President, I raise the question of the procedure we have been following in this debate where one side offers an amendment and the other

side then offers its amendment. Does not this procedure violate the alternating of amendments, that the Senator's side of the aisle would be offering two amendments as opposed to offering only one amendment and giving the Democratic side an opportunity to offer an amendment?

Mr. STEVENS. Mr. President, this is a common procedure to have a substitute amendment to the committee amendment filed at the same time and considered at the same time. I do not see any reason to go to an amendment from the Senator's side dealing with something else and come back. To my knowledge, no one else has an amendment to SPRO.

Mr. BRADLEY. I have an amendment to SPRO, and it would not deal with this other issue. If we were going to abide by an agreement it is a Republican-Democratic-Republican-Democratic amendment, so I ask: Are we still abiding by that procedure?

The PRESIDING OFFICER. The majority leader.

Mr. BAKER. Mr. President, will the Senator from Idaho yield to me for a moment?

Mr. McCLURE. I am happy to yield.

Mr. BAKER. Mr. President, I made that suggestion that we alternate to the extent that it was possible to do that and we have done that more or less.

I point out to the Senator from New Jersey that the first three amendments were offered in sequence by Democrats.

I do not know of any ironclad requirement that we do it, I am perfectly willing to consider how we proceed on this basis, but the suggestion was a matter of comity and convenience. I hope that this matter which is now pending by the Senator from Idaho would be disposed of and/or at least the time consumed and then the Senator from Alaska would have an opportunity to offer an amendment to the underlying committee amendment in sequence. To interrupt it, it seems to me to be unnecessary and unwise.

But the suggestions that the amendments alternate were made by the distinguished minority leader, and he and I discussed it and we have done that, with some exceptions, since it began, but I think this should be one of those cases, and I reiterate that so far there have been a great number of Democratic amendments, far in excess of the number of Republican amendments that have been offered.

Mr. BRADLEY. Let me ask the distinguished majority leader. By simply saying it is my understanding that when Democrats offered their amendments in sequence there was no Republican desirous at that point of offering an amendment. This is an issue of great concern to me as it is to the chairman of the Energy Committee, and I feel that it would preempt my option of not only abiding by the procedural agreement but of also seeking to fulfill the intent of the distinguished chairman of the Energy Committee in his underlying committee amendment.

Mr. STEVENS. I might say to my good friend, if the Senator will yield to me.

Mr. BRADLEY. I yield.

The PRESIDING OFFICER. The Senator from Idaho.

Mr. McCLURE. Mr. President, I ask unanimous consent that this colloquy with respect to procedure be taken off the resolution rather than off the substitute offered by the Senator from Idaho.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield?

Mr. McCLURE. I yield.

Mr. ROBERT C. BYRD. Mr. President, I wonder if we could forgo any definite setting in concrete the subject of sequential offering of amendments at this point. Perhaps we can work it out. There is something to be said for both sides of the argument here.

Mr. BAKER. If the Senator will yield to me, I think the minority leader is right. I do not think we should get tangled up at this point in trying to resolve this issue. I am perfectly willing to meet with the distinguished Senators from Idaho, Alaska, and New Jersey, and the minority leader, and see what we can work out.

I do not think we need to spend any more time on that issue in the Senate.

The PRESIDING OFFICER. The Chair understands that the Senator from New Jersey has reserved the right to object and continues to do so.

Mr. BRADLEY. That is correct.

Mr. STEVENS. Mr. President, will the Senator yield me a minute?

Mr. DOMENICI. Mr. President, could I yield 1 minute to the Senator from Alaska off the resolution at this point?

Mr. STEVENS. I appreciate the position of the majority and minority leaders. What I said to my friend from New Jersey is that I was at the hearings on this matter now for 6 years on the Appropriations Subcommittee. I served on the Energy Committee also. It has been a matter that the former Senator from Oklahoma and I have been deeply involved in since its inception. So it is not something that I come at lightly. I chaired the hearings the other day, as a matter of fact, dealing with the outside witnesses on SPRO.

It is a very controversial matter, and my amendment is not one that is just thrown in there. It is something that I feel very strongly about. I intend to offer it and I intend to seek the recognition to offer it, as I intended here, as part of the offset really on a package from this side dealing with the question of SPRO. I will seek recognition at the close of the time.

The PRESIDING OFFICER. Objection is heard and the pending question is the amendment by the Senator from Idaho.

Who yields time?

Mr. DOMENICI. Mr. President, will the Senator yield 1 minute to the Senator from New Mexico and take it off the resolution, please?

Mr. McCLURE. Yes.

Mr. DOMENICI. Mr. President, I say to my good friend from New Jersey, as the majority leader designee on this resolution I think we have had a good accommodation. I have not been trying to force any process or procedure. The Senator is correct, for the most part, with three Democratic amendments that came, because there was not any real desire to offer any.

But I can say to the Senator there has been a request that we not push very hard because some Democratic Senators wanted to offer their amendments. I mean I could have insisted on rigidity, too, and found an amendment. There are still three or four pending.

I just say that in the sense that I hope we can accept the minority leader s recommendation and resolve this without us having to break that kind of accommodation that has occurred.

Mr. BRADLEY. I thank the Senator.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield? I think the arrangement has worked very well thus far. It is true the Democrats have offered amendments when the Republican side of the aisle did not have amendments ready, but I must say also the Republican leader has been very considerate of our needs on this side of the aisle and has proceeded to allow us to lay down an amendment on Friday when it was the Republican's turn. So I think it has worked out very well thus far. I hope we can work out some equally desirable approach that would be mutually satisfying to both sides.

The PRESIDING OFFICER. The Senator from Idaho.

Mr. McCLURE. I thank the Chair.

Mr. President, the purpose of the procedure that is being set up here, and is being discussed now, is to allow the Senate to see simultaneously a range of different possibilities to deal with SPRO and choose among them so we can come to a resolution of it in an orderly way rather than having an amendment against which all others are arrayed, without having any before us, and having to vote for or against one without knowing what else was the alternative.

There is no attempt on the part of anyone, so far as I am aware, to freeze anybody else out or to avoid giving a range of options if, indeed, there are others, but let me indicate at the outset that the amendment which I am offering as a substitute for the committee amendment would restore the entire $3 billion, which the Budget Committee assumed would be taken off budget, to support the expenditure for the strategic petroleum reserve.

As you know, this Senate has many times voted to fill the strategic petroleum reserve. The administration has now undertaken to do that and has submitted a budget request for $3.8 billion for that purpose during fiscal 1982.

The Budget Committee, in looking at that $3.8 billion reduced it by $3 billion, leaving slightly over $800 million still in the budget, with the balance to be financed by some off-budget mechanism as yet undefined.

The Senator from Alaska, among others, believes that the budgetary impact of doing that with the offsets is too onerous a burden for the budget to bear.

The amendment which I understand he will offer will be to restore one-half the amount which was cut by the Budget Committee and require the balance to

be put in an off-budget mechanism rather than the entire $3 billion. Thus $1.5 billion would be on budget rather than off budget, as suggested by the Budget Committee, so we have the alternative thus presented. If we believe what has transpired this morning, you have the Budget Committee position of $3 billion taken off budget, financed in some other way, if possible; the amendment to be offered by the Senator from Alaska, which would preserve half of the amendment offered by the Senator from Idaho, which would restore the entire $3 billion.

Mr. President, the strategic petroleum reserve——

Mr. DOMENICI. Mr. President, will the Senator yield for a question at that point?

Mr. McCLURE. I would be happy to yield for a question only.

Mr. DOMENICI. And the time for the question and answer can be taken from the time of the opposition.

Did the Senator say the difference is not only that the Senator's amendment puts the full $3 billion back and the Senator from Alaska's intended amendment would put back $1.5 billion, but there is an additional difference, is there not?

Mr. McCLURE. There is.

Mr. DOMENICI. In that you would then provide for the $3 billion that you put back by cutting other programs or at least instructing the committee to save the full $3 billion through some approach the Senator was going to describe, and the Senator from Alaska would not, is that correct?

Mr. McCLURE. The Senator is correct.

Mr. DOMENICI. The net effect is, if his amendment is agreed to, we have added $1.5 billion to the budget for SPRO. Under the Senator's amendment it would be a wash, $3 billion in but $3 billion cut from committee's instructions on programs.

Mr. McCLURE. The Senator is correct.

Mr. DOMENICI. I thank the Senator.

Mr. McCLURE. Mr. President, the strategic petroleum reserve was created by the Energy Policy and Conservation Act, Public Law 94–163, and signed into law on December 22, 1975. Motivated by concern for national security, the objective of the strategic petroleum reserve is to reduce the United States vulnerability to severe interruptions of petroleum supplies through the acquisition and storage of up to 1 billion barrels of petroleum.

The initial storage target was 500 million barrels by 1982. The Congress subsequently approved the implementation of a Government reserve of 750 million barrels with the decision on the timing and method for the fourth 250-million-barrel increment being deferred.

Last year the Congress in the Energy Security Act directed the President to immediately undertake and continue crude oil acquisition, transportation, and oil injection activities at a minimum rate of 100,000 barrels per day during fiscal year 1981 and beyond.

In recognition of the vital role that the strategic petroleum reserve can serve in providing for our national security former President Carter proposed the requisite fiscal year 1982 appropriations to achieve an average annual fill rate of approximately 230,000 barrels per day. This rate will essentially fill existing reserve capacity by the end of 1982. This objective is now supported by President Reagan despite its on-budget impact. And the Committee on Energy and Natural Resources support President Reagan. In its March 20 report to the Senate Budget Committee, the Energy and Natural Resources Committee stated:

> The committee supports President Reagan's budgetary totals for programs within its jurisdiction as contained in the administration's proposed budget for fiscal year 1982. Further it is the sense of the committee, in the case of funding for the strategic petroleum reserve, that the committee will move expeditiously to consider and report an alternative off-budget funding mechanism. When such an alternative mechanism is developed by the Committee on Energy and Natural Resources, or any other committee, and is enacted into law, we will support an appropriate reduction in authorizations and appropriations for the strategic petroleum reserve.

Thus I am disturbed, and we should all be disturbed, by the proposed budget reconciliation resolution reported from the Budget Committee which recommends cutting $3 billion of the $3.8 billion recommended by President Reagan for the strategic petroleum reserve (SPR). We support the search for private financing mechanisms, but we must support retention of SPR funds until an acceptable mechanism has been identified and implemented.

The Budget Committee seems to support the SPR on both economic and national security grounds. Moreover the Budget Committee does not appear to dispute the fact that the SPR can provide insurance against the economic dislocations, protection against international blackmail, and a source of fuel supplies for the military during wartime mobilization.

On these points we are in agreement. Where we are in disagreement is that an offbudget mechanism to raise the necessary funds to purchase petroleum is already known. Such is not the case. While several funding mechanisms are postulated, none of the private proposals made so far has been subjected to careful examination. The committee is currently conducting such a review. The hearings began this morning in the subcommittee chaired by the Senator from Virginia (Mr. WARNER). But we do not now have a final proposal. For this reason the committee supports the positions I stated, and for this reason I have offered this amendment to retain the funds recommended by President Reagan.

Mr. BAKER. Mr. President, will the Senator from Idaho yield to me for a moment?

Mr. McCLURE. I would be happy to yield to the Senator.

Mr. BAKER. Mr. President, I wish to ask the distinguished Senator from Kansas if she would permit the time we are about to utilize for a brief colloquy with the minority leader to count against the resolution and not against the amendment offered by the Senator from Idaho?

Mrs. KASSEBAUM. Mr. President, I would be glad to do that.

Mr. BAKER. Mr. President, I thank the Senator from Kansas.

Mr. President, a question arose a few moments ago about the sequence in which amendments would be offered. Let me state my understanding of the parliamentary situation of the agreement in respect to the interchange of the alternating opportunities of Republicans and Democrats to offer amendments.

As the matter stands at this time, the substitute amendment of the distinguished Senator from Idaho, which is a complete substitute for committee amendment No. 9, is pending.

The PRESIDING OFFICER. The Senator is correct.

Mr. BAKER. The Senator from Alaska has indicated that, at the expiration of the time allocated under the act for the consideration of this measure, he will send to the desk and offer a perfecting amendment to the underlying amendment, the committee amendment, not to the substitute.

The PRESIDING OFFICER. The Senator is correct.

Mr. BAKER. Mr. President, the point was made by the distinguished Senator from New Jersey, while perhaps not in literal disagreement with the informal arrangement that we had, that he, too, has an amendment to be offered.

Now, I would propose that we handle the matter in this way: That after the expiration of the time for the consideration of the substitute amendment by the Senator from Idaho, that, indeed, the Senator from Alaska offer his perfecting amendment, as he has already indicated that he would, and that, at the expiration of the time for the consideration of that perfecting amendment and after its disposition, since you cannot have two perfecting amendments pending at the same time, the Chair then recognize the distinguished Senator from New Jersey to offer another amendment.

Now, it is my understanding—and I would ask the Chair on this point—that, unlike other legislative matters, under the Budget Act, in consideration of a budget resolution such as we are now undertaking, there is no prohibition against amending the same language or the same number more than once; provided the amendment is mathematically consistent.

The PRESIDING OFFICER. The Senator is correct. An amendment which makes or maintains mathematical consistency is in order, notwithstanding the fact that it amends the figures contained within the amendment.

Mr. BAKER. Or more than one.

The PRESIDING OFFICER. Yes.

Mr. BAKER. And that they have been amended once before.

So, in any event, after the Stevens' perfecting amendment is disposed of, whether Senator STEVENS wins or loses

under that arrangement, the Senator from New Jersey would have the opportunity to offer an amendment that might perhaps deal with the same numbers.

The PRESIDING OFFICER. The Senator is correct.

Mr. BAKER. Or would deal with the same subject.

The PRESIDING OFFICER. The Senator is correct.

Mr. BAKER. Mr. President, I have one other suggestion on the matter of handling this. This would, indeed, be the case of two Republican amendments—that is to say, the debate on the McClure substitute and the disposition of the Stevens perfecting amendment—before the other side offers an amendment.

So I would suggest that the amendment offered by the Senator from New Jersey not count as an amendment for the purpose of the alternating procedure that we have carried on so far and, indeed, another minority member, another Democratic Senator, will be entitled to call up and offer another amendment in sequence after the Senator from New Jersey.

Mr. President, that would be my suggestion on how we handle this. If it is agreeable to the distinguished minority leader, the Senator from New Jersey, the manager of the bill, and the manager of the substitute amendment, I would propose that we have an understanding that that is the way we will proceed and ask the Chair if they would honor that representation.

Mr. McCLURE. Mr. President, will the Senator yield?

Mr. BAKER. Yes.

Mr. McCLURE. Mr. President, as far as the Senator from Idaho is concerned, I understand the parliamentary situation and it is an appropriate way to deal with the question. I have no objection.

Mr. BAKER. I thank the Senator from Idaho.

Mr. ROBERT C. BYRD. Mr. President, if the majority leader will yield, I think it is an eminently fair approach to the matter.

I would like to be sure that I understand—and I am sure I do, because I have discussed it—that the second amendment which may be offered on this side of the aisle, then, would not pertain to the SPRO subject matter.

Mr. BAKER. That is correct.

Mr. ROBERT C. BYRD. We are not being held only to the second amendment that deals with that.

Mr. BAKER. The Senator is correct. I just thought that if there would be two amendments on this side there would be two amendments on that side. The second amendment would not need to deal with SPRO.

Mr. BRADLEY. Mr. President, will the majority leader yield for a question?

Mr. BAKER. Yes.

Mr. BRADLEY. The perfecting amendment would be in order at the point of the disposition of the amendment of the Senator from Alaska.

Mr. BAKER. That is my understanding.

Mr. BRADLEY. That means, since votes are backed up, that the Chair would recognize the Senator from New Jersey at the conclusion of those backed-up votes for the purpose of offering the perfecting amendment to the committee amendment.

Mr. BAKER. If the Senator would permit me, it is my understanding of the arrangement that if the time for the Stevens amendment had expired before the hour of 2 o'clock, when we have ordered votes backed up until that time, that the Senator from New Jersey would be recognized before 2 o'clock in order to call up his amendment, but he could not have a vote on the amendment until after 2 o'clock.

Mr. BRADLEY. Mr. President, the vote would have to occur on the Stevens amendment. As soon as that vote occurred. I would be recognized for the purpose of offering another perfecting amendment.

Mr. BAKER. Mr. President, I think the Senator is right, now that I think about it, because you cannot have two perfecting amendments pending at the same time. It would require the disposition of the Stevens amendment before you could offer a perfecting amendment which, necessarily, then, would mean that there would have to be a vote on the Stevens amendment. So the Senator is correct. That is the way it would operate.

Mr. BRADLEY. It is correct that if the Stevens amendment is the third amendment in a sequence of five amendments, I would be recognized at the point of the vote on the Stevens amendment or after the vote on the fifth amendment in the sequence.

Mr. BAKER. No. The Senator would be recognized, as I understand it—and I am willing to make provision absent an objection to that procedure—at the conclusion of a vote on the Stevens amendment to call up his amendment and that any votes that may occur after that would occur in the normal course of events. The order that we have on stacking votes simply provides that any votes ordered before 2 o'clock will be stacked until 2 o'clock. So the effect of that agreement will expire at 2 o'clock.

Mr. BRADLEY. I think I understand it and I concur in this arrangement.

Mr. BAKER. Mr. President, I thank the Senator. Mr. President, I thank the Senator from Idaho for yielding.

The PRESIDING OFFICER (Mr. SYMMS). Who yields time?

Mr. McCLURE addressed the Chair.

The PRESIDING OFFICER. The Senator from Idaho.

Mr. McCLURE. Mr. President. I will take a brief time further to explain what my substitute does and also the situation as I see it developing here on the floor with respect to the strategic petroleum reserve.

First of all, my amendment does have within it an offset. It requires that the $3 billion to be added in the budget figures be offset exactly by a decrease by all of the rest of the authorizing committees on all areas except defense.

Mr. President, I exempted defense from that suggestion because we all know that it is the expectation that defense spending will rise. So I, accepting that as a given, suggest that the first cuts that are necessary to accommodate the $3 billion increase for the strategic petroleum reserve would be offset by that corresponding cut.

Let me read the language, those who are looking at the amendment, since it is drafted as a substitute, may find it difficult to find the offest language because the substitute repeats all the language in the committee amendment.

But, on the next to the last page of the amendment, you will find this language:

> On page 21, after line 9, insert the following new paragraph:
>
> (30) In addition to the actions required by subsections (c)(1) through (c)(29) each committee of the Senate and House referred to therein shall report changes in laws within their respective jurisdictions sufficient to reduce budget authority by 0.6 percent for fiscal year 1982 and by 0.5 percent for fiscal year 1983, and to reduce outlays by 0.8 percent in fiscal year 1982 and 0.62 percent in fiscal year 1983: *Provided* That no such committee shall reduce budget authority or outlays in function 050.

Mr. President, that is the substance of the amendment to find the additional money that was necessary without increasing the total amount set out by the Committee on the Budget. The Senator from Alaska, in the amendment that I understand he will offer, if I understand it correctly, would add $1.5 billion, with no offsetting cuts. It would leave it below the President's mark for the total budget, but would be $1.5 billion higher than the total amount stated for the budget as reported by the Committee on the Budget.

Mr. President, I yield 5 minutes to the Senator from Alaska (Mr. MURKOWSKI).

(Mr. SYMMS assumed the chair.)

Mr. MURKOWSKI. Mr. President, I thank the Senator from Alaska for yielding.

Mr. President, I wish to express my support for this amendment, which would restore the level of budget authority recommended by President Reagan for the strategic petroleum reserve for fiscal year 1982.

Mr. President, this amendment has been made necessary by the Budget Committee's instructions, contained in the reconciliation resolution to the Senate Energy and Natural Resources Committee, to achieve savings of $3,714,000,000 in budget authority in fiscal year 1982. The simple truth is that the Senate Energy Committee cannot meet the savings target set forth in the reconciliation resolution without eliminating almost all funding recommended by President Reagan for filling the strategic petroleum reserve. The Budget Committee itself—as evidenced by reading its report—assumes about a $3 billion reduction from the level recommended by the President for this important program.

Mr. President, the strategic petroleum reserve is perhaps our most important, near-term energy security program. Established by Congress in 1975, after the shock of the 1974 oil embargo, it is designed to provide our country with

emergency oil supplies in case of future oil supply disruptions. It may not be a perfect safeguard, but, Mr. President, it is certainly the best safeguard we now have.

At a time when the Congress is awakening to the need for an enhanced military capacity, it would be foolhardy to undermine the only real program we have to assure the availability of energy supplies necessary to fuel our fundamental military and civilian needs in case of an oil supply disruption.

Mr. President, I was greatly disappointed that the Senate Budget Committee's reconciliation resolution contained instructions to the Senate Energy Committee which will definitely require a drastic reduction—about $3 billion—in budget authority for the strategic petroleum reserve. The argument has been made that all Congress needs to do is to develop an "off-budget" alternative plan to substitute for the present program. It has been further argued that eliminating budget authority for the reserve in fiscal year 1982 will force Congress to adopt some other oil reserve plan which it otherwise might not do.

Mr. President, I for one am not willing to take this very large risk. Several ideas have already been proposed as to a possible substitute for the present program. They may have merit, but they have already caused great controversy and generated much criticism.

Senator WARNER, chairman of the Subcommittee on Energy and Mineral Resources, has already initiated hearings which began today to consider alternatives to the present program. I commend Senator WARNER for this initiative. As a member of this subcommittee, I intend to work with him and other members of the committee and the Senate in efforts to find a better, alternative program. The point is the legislative process to develop an alternative to the present program has just begun. We do not know what plan—if any plan—can be developed and enacted which is preferable to the present strategic petroleum reserve. The fact is that we are very far away indeed from enacting a substitute program to protect the country against an unexpected oil disruption.

Mr. President, we should not destroy the present strategic petroleum reserve program until we have enacted a substitute. Our national security may very well be at stake. I urge the Senate, therefore, to adopt the pending amendment.

Mr. President, I thank the Senator from Idaho for yielding his time.

The PRESIDING OFFICER. Who yields time?

Mr. McCLURE. Mr. President, I yield 10 minutes to the Senator from New Jersey.

Mr. BRADLEY. Mr. President, I support the amendment offered by the Senator from Idaho. In my view, this is clearly the most pressing national security question before the Senate in this reconciliation process. The need for a strategic petroleum reserve is not understood by the American people. It is not an issue that they have focused on. Yet, if we lose 8 to 10 million barrels of oil a day in the Persian Gulf, the American people would look to the leaders of Congress and ask. "Why has not something been done?" So, Mr. President, anticipating that and looking at the general area of the Persian Gulf and the dangers that are there, I cite only one recent press report from last Tuesday's New York Times. It says that the Iranian side in the Iraq-Iran war has said very clearly that they do not intend to seek a solution, to seek a truce, until Iraq withdraws from the occupied territory.

Mr. President, this is clearly, as I have said, the most pressing national defense issue before the country today. It is an issue that would protect this country if the strategic reserve were filled. If we look at the range of probable threats to our national security, most people would say the Soviet Union is the greatest threat. Yet, if we look at the probabilities of that threat materializing, either in the form of a missile exchange or the invasion of North Asia or Central Europe or Western Europe, I think one would say the probability of that Soviet action is not significant. But if we look at the record in the Persian Gulf in the last 6 to 7 years, where there have been three oil-supply interruptions in 7 years, we see nearly a 1-in-2 probability that an oil-supply interruption will occur again in that region of the world in the next 2 or 3 years. If, indeed, an interruption did occur, the United States would not be prepared. Emergency preparedness is the lost child of energy policy in this country today.

For a year and a half, I have been on this floor calling for us to fill the strategic petroleum reserve, calling for serious demand strength measures to be taken, so that we would reduce our dependence on foreign sources of oil and so we would cushion our economy against the increased probability of that oil supply interruption.

We have before us today a decision taken by the chairman of the Committee on Energy which I applaud, a decision which says we should fill the reserve at 230,000 to 300,000 barrels a day and that the elected representatives of the American public should bite the bullet and spend that money. There is no better way to protect our energy future than to stockpile oil. There is no better way to protect our national security than to stockpile oil.

Mr. President, this is not an easy amendment for the Senator from Idaho to offer. It goes contrary to the Budget Committee. The chairman of the Budget Committee serves on the Energy Committee as well. He has been voting on both sides of this issue, which I understand, because it is an issue that generates mixed feeings. Yet, I think that the vote on this issue should clearly be understood as a vote for national security.

The amendment would restore $3 billion. Opponents of the amendment will argue that there are other means to fill the strategic reserve than to spend money on budget. There will be an argument offered that it is better to spend money off the budget, that it is better not to go through this process but to take it off budget and fund it through the bond market.

I cite another article, from the Wall Street Journal of last week, that conveyed "Bond Prices Fall on Treasury Borrowing and Fear of Heavy Corporate Debt Issues." That is what the headline read.

Clearly, Mr. President, if we are going into the bond market to fill the reserve, it would have a same macroeconomic effect as funding in the budget.

Another approach that has been argued is that we issue oil bonds. Today the proponent of that argument, Representative GRAMM, was before the Energy Committee testifying. There are so many problems with the oil bond solution that it is clearly not a direction we should follow, expecting that it will put oil in the reserve in the next 3 to 6 months to a year. There are enormous complications. In fact, if we project what the Office of Strategic Petroleum Reserve says, as they project a rise in the price of oil over the next 10 years, a 9.95-percent increase a year, it is not even a good investment. So I think we cannot take that route.

Another route would be that we have an industrial petroleum reserve. The question of who owns the reserve, who will draw it down, is also fraught with problems.

The final suggestion is that we allow the oil companies to place oil in the reserve and the Government pay them over a 10- or 11-year period. Mr. President, I respect the distinguished Senator from Kansas, who offered that suggestion, but I would state that the oil companies will fight that in the courts and it will prevent the filling of the strategic petroleum reserve precisely at the time when there is a sufficient slack in world markets that we could fill it even above 300,000 barrels a day.

So, Mr. President, there is no easy answer to this question if we do not bite the bullet.

By seeking to say it can be done in the private sector or it can be done off budget, what we are telling the American people is that there is business as usual in the Senate of the United States; that emergency preparedness is not on the front burner; and that we prefer to think about our energy future 10 or 12 years down the road instead of protecting this country against the economic damage and the national security damage that could accrue from an oil supply disruption today in the Persian Gulf.

Mr. President, I will speak specifically to the amendment offered by the Senator from Idaho. In my view, it merits careful attention and support.

I would prefer, of course, that it not cut the budget with offsets in every area but defense. One can make an argument that the strategic petroleum reserve is one of the more effective defense mechanisms we have available to this country, that the reconciliation measure that has come before the Senate has in its parliamentary form no measure dealing with defense. So we cannot cut the defense number because there is no number in reconciliation.

I say to the distinguished chairman and to the Senate that it would be my intent, on the first budget resolution, to make the argument that this is clearly a national defense issue and that the budget for defense should reflect its fair share of this burden of financing the strategic petroleum reserve, just as every other department and every other committee will bear its fair share.

So, Mr. President, I support this amendment because I believe it is consistent with the will of the Senate as expressed last year. I believe it is consistent with the will of this administration, which sent a $3.8 billion funding for the strategic petroleum reserve.

Does anyone believe that if this administration were certain that it could fill the strategic petroleum reserve out of private financing, it would not have done so? It is not my impression that they have been reluctant to cut the budget. Would they have missed this $3 billion opportunity? I seriously doubt it. I argue that the reason they did not cut the budget in the strategic petroleum reserve area is that there are grave reservations as to whether they could get the oil in the reserve if the budget were cut or if it were done off budget or in the private area.

So, Mr. President, I am supporting the amendment because I believe there is no better way we can spend an energy dollar than to stockpile oil in view of the situation in the Persian Gulf and the probability of an oil supply disruption. There is no better way we can spend a dollar in the short term to protect our national security than to have oil in a stockpile that can be drawn out to cushion the effect of that loss of oil on our military, not to mention our economy.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. BRADLEY. Mr. President, I strongly support this amendment. It is my intention to fight for a $3 billion figure even if the amendment of the Senator from Alaska is accepted by the Senate, and the agreement provides that.

I ask the chairman if, pending further discussion with him, he would yield the floor back to me for another minute, at which point I would consider asking for the yeas and nays on the underlying amendment.

The PRESIDING OFFICER. The Senator from Idaho.

Mr. McCLURE. I will withhold that judgment for the moment. I will discuss it while an opponent of the measure is speaking.

The PRESIDING OFFICER. Who yields time?

Mr. SCHMITT. I should like to enter into a colloquy with the distinguished Senator from New Mexico.

Mr. DOMENICI. Mr. President, I suggest the absence of a quorum, on the time of the resolution.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. DOMENICI. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. QUAYLE). Without objection, it is so ordered.

Mr. SCHMITT. Mr. President, if my distinguished colleague from New Mexico would spend a minute or so, I should like to ask a few questions to try to clarify some of the background and thinking on the issue of the strategic petroleum reserve.

As I recall, the concept first surfaced as a serious concept back around 1974, in the Nixon-Ford administration. At that time, the objective was to create a reserve that could provide about a million barrels a day for about 6 months. As I recall the estimates at that time, they felt it would cost about $6 billion to do that.

Is the Senator's recollection roughly along those lines?

Mr. DOMENICI. I believe the Senator is correct.

Mr. SCHMITT. Has that objective changed? Is that still roughly the objective of the strategic petroleum reserve, should it be funded?

Mr. DOMENICI. Obviously, the part that is no longer operative is the cost. The overall goal is correct.

I am delighted that the Senator is asking these questions, because I should like everyone to know that to this point we have spent about $4 billion. If the proposal of the Senator from Idaho prevails, we will have spent $12 billion by 1933.

Mr. SCHMITT. That is about double the cost when it was first considered by the Nixon-Ford administration in 1974.

At that time, I was director of NASA's energy research and development programs and entered into a discussion with the then Federal Energy Administration as to whether this expenditure of then $6 billion, now $12 billion, really was the most cost-effective way of providing a strategic reserve capacity.

At that time, after considerable study, I concluded that the answer was no; that if you had $6 billion in 1974 to spend, you could create, through some mechanism, so long as the money was available, a productive capacity from normal well production of about a million barrels a day for the duration or the life of a field, which varies, but it can be as much as 20 years, averaged over that period of time.

So it never made much economic sense to this Senator at that time to invest the money in putting holes in the ground to establish a million-barrel-a-day capacity for 6 months when, for roughly the same cost per barrel, you could create even an offshore capacity for producing about the same amount of oil.

It is my understanding that if you had $12 billion today, you probably could do a little better than that in terms of creating an actual productive capacity in the offshore, even with inflation of drilling costs and production costs.

Mr. DOMENICI. I believe the Senator is correct on economics.

I believe there would be an argument that, obviously, this would be totally under the control of the Government. It would be assured. It would be there if you needed it.

The Senator and I are now discussing what could happen in the marketplace in terms of offshore production for the dollars.

Mr. SCHMITT. The point is that in the kind of national emergency we would face when we would want to draw off our strategic petroleum reserves, I find it hard to think that we would not also be able to draw off any inherent productive capacity that existed domestically.

Perhaps the Senator can imagine a few scenarios in which the strategic petroleum reserve might be used as leverage in international situations, but I believe it would be far less of a capable lever than the existence of a domestic productive capacity which, just its very existence, would have an influence on world affairs far beyond anything that $12 billion of oil in the ground, which would only last 6 months at a million barrels a day, would have.

Mr. DOMENICI. The Senator is correct.

Huge investments are being made, onshore and offshore, in an effort to increase capacity, and everyone is counting on that to cut our daily requirements for importing.

The Senator is suggesting that to the extent that $12 billion was invested directly, with the idea of counting that $12 billion as an increase, that would not otherwise be available and it would produce more than the reserve and would be available. I believe the Senator is correct.

Mr. SCHMITT. I am saying that there are indirect ways in which the industry could be encouraged or is being encouraged to expand those levels of resources for exactly that purpose.

I believe it would be important in this context to separate a strategic petroleum reserve from other types of strategic materials reserves. The basic element of distinction is in the quantity you need for that reserve to have any significant influence.

Frankly, I do not believe that 1 million barrels a day for 6 months will have a significant influence on anybody anywhere in the world, in terms of their making a decision as to whether or not to utilize an embargo as an instrument of their foreign policy directed to the United States. The only thing that is going to influence that is if they know we have the inherent productive capacity to last beyond 6 months. If 6 months is all we have, I see no way it can influence the basic foreign policy decisions of this country.

However, when we look at other types of strategic materials that require far less volume to have a multiyear influence on the ability to sustain industrial production, then the strategic reserve makes sense.

However, when you are talking about energy which is required in extraordinary volumes to last for multiyear periods, strategic reserves, or the concept that is being discussed here, do not make any basic philosophical sense.

I am a strong advocate of a new look at our strategic mineral reserves, absent the minerals, as we geologists call them, such as oil and natural gas. But a stra-

tegic reserve for oil and natural gas that will last only 6 months does not make any sense.

What it makes sense to do is to concentrate our energies—legislative, economic, and otherwise—on encouraging and insuring that there is an inherent domestic productive capacity that can provide for our essential energy supplies in any kind of embargo or interdiction situation.

I thank my colleague from New Mexico for his courtesy in answering these questions. I believe that the basic rationale that apparently underlies the Budget Committee's decision to look at the strategic petroleum reserve as cost-effective way of reducing Federal expenditures is extremely well grounded, and I will support him in his efforts in this matter.

Mr. DOMENICI. I thank my colleague.

I yield myself 5 minutes.

Mr. President, I believe the Senator from Idaho (Mr. McCLURE) knows that it is always with reluctance that I oppose amendments or policy proposals that he brings to the Senate. I wish to speak a little about why I think the Senate should reject his proposal of $3 billion put back into the budget and cutting $3 billion in addition to all we have already cut, in terms of instructions to committees.

Everyone should understand that it is two pronged. We have been voting on the floor on issues such as cutting a little out of veterans, a little out of this program or that. The second part of this amendment says that both cuts are not enough, that we have to take six-tenths of 1 percent more across the board, except defense. That is easy enough to understand. Just put your pencil to each of those committee figures, and you will see that in some cases it is a few million dollars and in others it is a few hundred million dollars. That would not bother me if I were absolutely certain that what we have been doing in SPRO and what we are planning to do in the future is right.

I am an advocate of having a reserve. Let me tell the Senate what the McClure amendment would do and why I believe the Budget Committee did not go along with putting the entire Presidential request in.

Everyone should know, also, that if you go along with the Budget Committee you are not going along with the President of the United States on this issue.

First of all, we are talking about 3 years—1981, 1982, and 1983.

There is sufficient money remaining in SPRO funding in the reconciliation instruction to allow a fill rate in 1981 equal to the existing fill capacity of the present places that we intend to store. In other words, we could not put any more in, in 1981 in any event; 168 million barrels is the total fill capacity.

Second, for 1982, the reconciliation assumptions—they do not have to be bought by the committee, they can change and take out of some other energy program—assume they did it; there is $1,047,000,000 in outlays in 1982 for SPRO, sufficient to allow a higher fill rate than 1980.

When combined with a private funding formula, it is obvious that we can be better off than we are now clear through 1982, not tomorrow morning as some would make it appear, not next week, but there is 1½ years for the committees of this Congress, the President of the United States and his Secretary of the Treasury, and financially bright people in this country, to come up with a private sector approach to financing SPRO.

Senator BRADLEY says that if the President thought there was a way would he not have included private sector financing? Let me just say this: Neither his people in the Department of Treasury, nor people in the Department of Energy to this point in time have thought that there is a way. But I am firmly convinced that they really have not taken the broad base of financial talent in this country and asked them how to finance SPRO, whether it is through some changes in the tax laws that would encourage private sector storage in excess of capacity. I am certain they have not asked private financial people, "How can we finance a reserve through the private sector, and then let us find out, after you have told us how, whether the kind of reserve you tell us we will have is adequate or not?"

We have done it backward. We have said, "Can you finance the kind of SPRO we want?" And the kind of SPRO we want is to put oil in the ground. It will be there basically, from the financing standpoint, forever, because we have said you will only take it out in the event of a serious supply interruption, which is a 20-percent shortfall, which might never occur.

Therefore, who can finance that? Who can put money in some kind of futures market? Who can do any of the typical things when you are financing assets that are growing in value that might someday be usable? So it seems to me we have done it backward.

Why do we not get the bright financial people of this country to tell us how it would be financeable, what the conditions imposed on the oil and research are, and then let Congress see if that is not a good reserve?

I yield myself 5 additional minutes.

For instance, what would be wrong if we put oil in 10 years at a time and took a look after 10 years? It would certainly be a reserve equivalent of what we have for the 10 years. That might be financeable and might lend itself to some kind of investment prospect or potential.

In addition, I recall for the Members of the Senate that immediately after the Iranian shortfall, when there was a tremendous pressure in this country to make sure that in particular Eastern America did not run short of fuel oil, the problems immediately after the first Iranian cutoff, not the big embargo, but the next one, when we had run short, the market had plenty of oil in it again. And what happened?

In a period of 2½ months the private sector put in reserve over their normal needs 165 million barrels of petroleum products. When we finish 1981 at the complete maximum fill rate we will have 168 million barrels. Private sector in 2½ months had 165 million more than they needed because they were fearful there might be another shortfall or another cutoff.

We were not even bright enough to get together and say, "How can we encourage them to keep that?" Is there some way we can do like some other countries have done and say, "If you will do that we will make it economically good for you to do it?" We did not. There is authority in the Department of Energy to do it but they have not done it. That authority exists there.

In a nutshell, I can go through the figures and tell Senators what we have and what we do not have. But if we leave the Budget Committee figures alone we have 1½ years to find a solution to the problem. We will have filled at the 1980 rate and indeed we will have filled out the present capacity that we have for strategic petroleum reserves.

I know and I wholeheartedly agree with my friend from Idaho and with the distinguished Senator from New Jersey, who has spent a great deal of time and effort on this, that that might not be enough. I wish we could double the reserves. I wish we could double the amount we are putting in the ground. I wish we had another facility ready right after the ones we have are filled and we had standby right there ready to go.

But the truth of the matter is we do not. There is never going to be any real assurance but obviously we have to proceed. We are not recommending that we not proceed. We are recommending a rather substantial fill for another 1½ years and we still leave over $800 million in 1983 in the event this kind of solution does not reach fruition.

Mr. BRADLEY. Mr. President, will the Senator yield for a comment?

Mr. DOMENICI. I am pleased to yield to the Senator from New Jersey and then I promised the Senator from Kansas I will yield to her.

Mr. BRADLEY. It will be very brief.

The PRESIDING OFFICER. The Senator may proceed.

Mr. BRADLEY. Mr. President, the rationale that the Budget Committee has offered for their action and the rationale that the Senator has offered as an explanation of the Budget Committee's action is what I call the green-eyeshade approach to the strategic petroleum reserve. Sure the American people want to cut the budget. There is no doubt about that. But the American people also expect their Government to protect them against national security threats and economic catastrophe.

The idea you have a sharp pencil out and you write down a cut of $3 billion and you will have $3 billion for something else in the budget is not looking further than the end of your nose if you look at the probability of an oil supply interruption in the next 3 years.

To make the debate on the Senate floor according to the green-eyeshade approach sends the wrong message to our allies where we should be the leader in emergency preparedness, not the one that has to be pushed for demand restraint or for stockpiling.

It sends the wrong message to our allies. It sends the wrong message to our friends in the Middle East who have to recognize that the United States does have a national interest and can express that national interest and can follow policies that protect that national interest.

I think that for the Senate to render a judgment on this issue because you have a sharp pencil out that you are going to save $2.53 billion here and add it somewhere else is not what the American people want. The American people expect this Government to protect their national security and the economic health of our country.

So my only comment to the defense that is offered by the distinguished chairman of the Budget Committee is that I respect him and I know deep down in his heart he is for this program.

I only hope that cooler heads prevail when we come into the first budget resolution because at the time you are spending hundreds of billions of dollars on defense, the most pressing national defense issue remains unanswered if this cut is adopted.

Mr. DOMENICI. Mr. President, how much time does the Senator from Kansas desire?

Mrs. KASSEBAUM. Three minutes.

Mr. DOMENICI. I yield 3 minutes.

Mrs. KASSEBAUM. Mr. President, I would like to say to the distinguished Senator from Idaho, who is so ably leading the Energy Committee, that I would concur with what he has said about the importance of filling the strategic petroleum reserve. As he has eloquently stated, and as has the Senator from New Jersey, I think we all recognize the importance of it to us both for domestic policy and international policy. But I also strongly believe we will never fashion an alternative to direct Government purchase of oil reserves unless budget discipline requires use to do so, and I think, in response to the Senator from New Jersey, the administration, which is now remaining neutral on this issue, would be very pleased to have the initiatives and talents of the Energy Committee directed toward means of filling the petroleum reserve other than direct Government purchase.

I think with all of the ability in that committee I have every confidence it can be done.

This should not be an argument at this time on what means can be found to privately finance the reserve, although I do believe that Senate bill 707, which is my bill, does provide a workable constitutional model from which we can enact and fill a reserve program. But that really is not the debate. I think we do have to decide at this point whether we can expeditiously fashion a workable private financing system, and I strongly believe that we can, and we can do it soon.

I commend the Energy Committee for starting hearings now as to different methods by which we can do this. But unless we stick to the budget discipline, which a majority of the Budget Committee has approved, I do not think we will be able to fashion that mechanism except through the impetus, and given the push, by the Budget Committee.

I thank the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. DOMENICI. Mr. President, how much time does the Senator from the New Mexico have?

The PRESIDING OFFICER. Seven minutes.

Mr. DOMENICI. I would be pleased to yield whatever time the Senator from New Hampshire wishes.

Mr. HUMPHREY. Mr. President, I rise in support of the amendment offered by the Senator from Idaho. I do not believe anyone in these Chambers who is familiar with my past voting record with respect to the Federal budget will deny that I have not been hesitant to support significant cuts in Government spending. However, in considering the Budget Committee's proposal to reduce the administration's budget request for the strategic petroleum reserve by a startling $3 billion, I find that my desire for reductions in Federal spending is overcome by my desire to enhance the national security of our country. For this reason, I, along with 18 other members of the Committee on Energy and Natural Resources, voted to support the President's request for $3.8 bilillon for the strategic petroleum reserve in fiscal year 1982.

The contribution of the strategic petroleum reserve to our national security is well documented. Just 8 days ago, Dr. Alice Rivlin, Director of the Congressional Budget Office, testified before a House subcommittee that although the United States has significantly reduced the rate at which it imports crude oil, we are still very vulnerable to a supply interruption or severe reduction. It was this recognition of our national vulnerability that led to the establishment of the reserve in the first place. Dr. Rivlin testified that in the event of an oil import disruption of 2 million barrels per day, which is the equivalent of approximately 11 percent of our projected oil consumption in the mid-1980's, a reserve of 750 million barrels could avert a loss in our gross national product of approximately 3.6 percent and could avert an increase in unemployment by 1.1 percentage points. In the event of such a disruption, each barrel of oil in the strategic petroleum reserve could mitigate up to $200 in GNP losses.

In her testimony, Dr. Rivlin made perfectly clear her belief that although other policy responses could be used during an oil import disruption—such as rationing or special taxes—no policy would be as effective as the strategic petroleum reserve at minimizing the economic losses resulting from the oil shocks. The Congressional Budget Office is not alone in its assessment of the value of the strategic petroleum reserve. Last year, in its report on the geopolitics of oil, the Committee on Energy and Natural Resources underscored the importance of the reserve by declaring—

> U.S. energy policy should give highest priority to building a domestic petroleum reserve. This belief was reiterated in a report by Harvard's Energy and Security Research Project, which not only emphasized the value of the reserve, but also accurately described the current status of the reserve. "To say that the Strategic Petroleum Reserve is behind schedule," the report states, "is to be guilty of gross understatement."

So that is where we are today. There is widespread agreement on two points: The first point being that the strategic petroleum reserve is of unquestionable value as a means to enhance our national security, and the second point being that we are shamefully behind schedule in developing such a valuable strategic tool. It is in this environment that the Budget Committee has recommended a reduction of $3 billion in funding for the strategic petroleum reserve in the hopes that the Congress will be successful in adopting an alternative method of financing the development of the reserve.

Now there are some strong arguments to be made for pursuing an alternative method of financing. I do not deny that fact. Proposals to issue shares in the strategic petroleum reserve have the advantage of allowing investors to determine if they are willing to assume the risks associated with SPR financing. This would allocate the risk of investing in the reserve in a free-market fashion and would reduce the Federal deficit by attracting private dollars to the project. The risk of investing in the project is described by the CBO as the risk that oil prices will not rise at a rate equal to or greater than the interest rate. If oil prices rise more slowly, then the SPR will not be self financing and its owners will bear a long-term cost. At present, the taxpayers are the owners and therefore the taxpayers assume this risk. By selling SPR shares, the Government would shift the risk to private investors.

Another alternative proposal has been to establish an industrial petroleum reserve. The major advantage to an industrial petroleum reserve is that such a reserve might be more appropriate for smaller supply disruptions—disruptions during which the Government might deem it imprudent to deplete the strategic petroleum reserve. Again, if industry does foot the bill, the Federal deficit is reduced and the accompanying inflationary expectations are mitigated.

Other proposals which utilize various resources of Government such as royalties or revenues from leasing, are not really proposals to go off-budget at all. They reduce direct outlays for the strategic petroleum reserve, but they also reduce revenues flowing into the Treasury.

Some of these proposals have definite advantages to our current method of financing the strategic petroleum reserve which is debt financing. But the point which must be made is that they have their definite disadvantages also. A shares system could lead to attempts to influence the Federal Government's control of the SPR because shareholders would obviously want reserves to be withdrawn when they determine it is at its peak price. Moreover, CBO has cited as the major disadvantage to this method of financing the possibility that the sale of shares might be insufficient to gain the desired level of funding. In such a situation we would be forced to

seek supplemental appropriations by the Congress.

The Congressional Budget Office has also cited serious disadvantages to their industrial petroleum reserve approach. If private companies believe their IPR reserves would be available to them during oil import disruptions, they might be tempted to reduce their conventional inventories. The CBO concluded that such action would seriously reduce the effectiveness of the reserve, and went on to cite other disadvantages to this method of financing.

I think it is clear that we have a situation in which the grass looks greener on the other side of the fence, and, therefore, I think it is important to remind ourselves that each attractive new alternative is not without its drawbacks. They are certainly worth investigating, and the Energy Committee in its report to the Budget Committee has pledged its intention to investigate them. But I am confident that I represent the consensus of the committee when I say that I cannot support a reduction in funding for the strategic petroleum reserve until an alternative proposal has withstood the scrutiny of the committee and has gained the approval of the Congress. Only then, when every possible threat to national security has been addressed, can I support a reduction in funding for the strategic petroleum reserve.

Mr. McCLURE. Mr. President, I have listened to the debate with a great deal of interest.

Let me, in the first instance, indicate that there is an error in the numbers which the Budget Committee staff earlier furnished to me. I understand they have suggested that because we did not take into consideration the way in which the budget treats the public debt and the trust funds, that with no change in the reductions required in outlay reductions, for fiscal year 1983, the figures for budget authority would have to be modified to 1.5 percent for 1982, and 1.4 percent for fiscal year 1983, and the outlay for fiscal 1982 would be increased to 0.7 percent rather than 0.6.

Mr. President, I send a modification to the desk, including the following proviso:

Provided further, That no committee shall be required to reduce budget authority associated with revenue to trust funds: *And provided further,* That no committee shall be required to reduce budget authority nor outlays associated with interest on the public debt.

I send that modification to the desk.

The amendment, as modified, follows:

On page 21 of the committee amendment after line 9, insert the following new paragraph in lieu of the paragraph set forth in unprinted amendment numbered 27:

"(30) In addition to the actions required by subsections c(1) through c(29) each committee of the Senate and House referred to therein shall report changes in laws within their respective jurisdictions sufficient to reduce budget authority by 1.5 percent for fiscal year 1982 and by 1.4 percent for fiscal year 1983; and to reduce outlays by 0.7 percent in fiscal year 1982 and 0.6 percent in fiscal year 1963: *Provided,* That no such committee shall reduce budget authority or outlays in function 050; *Provided further,* That no committee shall be required to reduce budget authority associated with revenues to trust funds: *And provided further,* That no committee shall be required to reduce budget authority nor outlays associated with interest on the public debt.".

Mr. McCLURE. I did not think that changed the thrust of the debate. I think the Senator from New Mexico would agree that those figures are the correct figures.

Mr. DOMENICI. Yes, Senator, if you will yield on my time.

Mr. BRADLEY. Mr. President, will the Senator yield? I did not understand what he was modifying.

Mr. DOMENICI. On my time I just wanted to tell the Senator that the previous percentages we gave him to the extent that our staff was in error we apologize. I think it was a misunderstanding, but I think what the Senator has got now is accurate, and I have no objection to the modification.

Mr. McCLURE. I thank the Senator.

The purpose, of course, in offering the modification at this time is to make certain that no one is misled as to what the effect will be. Because of the way in which trust funds, trust fund moneys, and the national debt are accounted for in handling the account procedure they have a different impact upon the budget authority side than they would have on the outlay side, and it has been to adjust those figures that I made this modification. But the reduction in outlays remains the same for 1982 and 1983, 0.7 percent and 0.62 percent instead of 0.6 percent and 0.62 percent.

Mr. President, I understand what the Senator from Kansas has indicated, but it seems to me the argument he raises simply focuses on which issue do you want the budget process to put the pressure on, put the pressure on the adoption of a substitute method of filling SPRO and, if so, surely the Budget Committee adopted the right strategy. That will have a maximum pressure on finding a substitute way for financing the filling of SPRO. If, on the other hand, you are more concerned about making certain that SPRO is filled, then you should adopt my substitute because that will have the maximum pressure on getting SPRO filled, and it would be those who want to save the money for other purposes who would have the pressure put on them to assist in finding the off-budget mechanism which would then yield the results which the Budget Committee found.

With respect to my friend from New Mexico's saying that indeed that private inventory went up and that that private inventory allowed us to draw down during the period of supply interruption during the turmoil in Iran and the war between Iran and Iraq, he is exactly correct. It worked, and it worked well, and the result was we did not see the price dislocations that many, many people thought would occur.

But let me remind the Senator before this very happy circumstance occurred, when the Shah fell from power, the world went from a 2- to 3-percent surplus of supply to a 2- or 3-percent shortage of supply, and the price of oil doubled overnight.

Had we had a strategic reserve at that time upon which we could draw we would not now be paying the nearly $40 per barrel for oil which we are paying. It would be substantially less than that.

So what would the investment in the insurance policy of a strategic reserve mean to us in terms of our policies in this country?

The PRESIDING OFFICER. The Senator's time has expired.

Mr. McCLURE. Would the Senator yield me 5 minutes on the resolution?

Mr. DOMENICI. I would be pleased to yield 5 minutes.

Mr. McCLURE. I thank the Senator for yielding that time.

It seems to me we would have saved many times the few billion dollars SPRO will cost.

I do not have any illusions about that cost. I have some concerns about it, as the junior Senator from New Mexico (Mr. SCHMITT) mentioned a while ago. But how much would alternative expenditures yield us? Well, do you cancel your insurance policy because you do some fireproofing in the building? It seems to me we want both. We want to be able to do the alternatives, and we want to have the insurance policy; we want to have the strategic reserve and we want to have the insurance policy of increased inventories in the private sector.

Until we find that magic mechanism which will finance this offbudget, it seems to me the better part of wisdom is to do what the Energy Committee has voted, after looking at this problem in some depth for some time, and to require that SPRO be filled, no ifs, ands, or buts, require that it be filled; provide the money to fill it, and then if we devise that method, which I pledge we will attempt to do, and if we find it, then we can start talking about what the alternatives are.

Mr. President, I yield back the remainder of the time.

Mr. DOMENICI. Mr. President, I would just say to my good friend from Idaho, the Senator has just cited as an example the 186 million barrel reserve over normal storage that the private sector had in place shortly after the Iranian problem settled down, and how salutary that was for our economy.

But I would submit that the present conditions that we impose upon SPRO will not have that kind of salutary effect in the event of a 1 or 2 percent shift in the availability of oil in the world market because, as the Senator knows and as the Senate must know, that oil is in the ground under a substantive law that says it does not come out unless the President declares a national emergency, and that is predicated upon a 20-percent shortfall.

So while the Senator is correct that whatever America could have in reserve will have a good, buttressing effect in this fragile world market in terms of oil, certainly a strategic petroleum reserve with those kinds of conditions is not going to be a buttress for that. It will be the buttress Senator BRADLEY and you and others have spoken of, including

this Senator, in the event of a disaster, a major catastrophe which we have legislatively equated with a shortfall.

In fact, Mr. President, the very conditions upon which we put that oil in the ground, the one I have just described, is one of the reasons you cannot get it financed in the private sector. There is not any way to invest in a futures market or to buy certificates, to hedge on inflation by buying into that reserve, when, as a matter of fact, it can never come out unless there is a Presidential declaration of emergency accompanying a 20-percent shortfall.

That is why the Senator from New Mexico is confident that in the 1½ years that we have, with a very high fill rate, under the Budget Committee's numbers if chosen by the authorizing committees, that we have that time to figure out what kind of criteria does the private sector need from us and do they meet the criteria of a strategic petroleum reserve.

If the Senator from Idaho needs no more time, I will yield back my time. It is my understanding that the Senator from Alaska is now prepared to offer his amendment. Is that correct?

Mr. STEVENS. That is correct.

UP AMENDMENT NO. 28

(Purpose: To restore $1.5 billion in funding for the strategic petroleum reserve and for other purposes)

Mr. STEVENS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Alaska (Mr. STEVENS) proposes an unprinted amendment numbered 28.

Mr. STEVENS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Page 6, line 3, in Section 9 strike paragraph 9(c)(5) and insert in lieu thereof,

"(5)(A) The Senate Committee on Energy and Natural Resources shall report changes in laws within the jurisdiction of that committee sufficient to require reductions in appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows:

"$2,071,000,000 in budget authority and $106,000,000 in outlays for fiscal year 1981; $2,214,000,000 in budget authority and $2,004,000,000 in outlays for fiscal year 1982; and $3,660,000,000 in budget authority and $3,628,000,000 in outlays for fiscal year 1983;" and

Page 15, line 8, strike all after the semicolon through the semicolon on line 9 and insert in lieu thereof the following: "$3,385,000,000 in budget authority and $2,688,000,000 in outlays for fiscal year 1982;"

On page 2, lines 16 through 18 strike $52,144,000,000 and $36.945,000,000 and insert in lieu thereof "$51,325,000,000" and "$35,545,000,000."

Mr. STEVENS. Mr. President, I request the Parliamentarian to take a look at that amendment to make certain that its form is correct.

I seek to increase the funds in the committee amendment by $1.5 billion. As I stated previously, I have been involved with this program since its inception and I support SPRO.

I also feel that the national security concepts of SPRO are slightly exaggerated at this time. The security situation in the country demands that we marshal all of our funds to procure military supplies and hardware. In that way we can insure our defense readiness and expedite what I call playing "catch up" in many strategic areas as far as the Soviets are concerned.

Further the full funding of SPRO at this time could remove needed petroleum supplies from the market commencing in September. This would tend to force up the price of our petroleum supplies, particularly gasoline, as we go into 1982.

This $1.5 billion would permit the purchase of approximately 110,000 barrels per day on an annual average compared to 230 barrels per day resulting from the administration's proposal.

Were we operating under different circumstances, I would absolutely support Senator MCCLURE's amendment, because I do believe in filling the reserve as quickly as economically possible. I also believe in the approach of the Senator from Kansas (Mrs. KASSEBAUM) in terms of trying to fund the filling of the reserve so it would be off budget. I have done some studies and we have held hearings demonstrating that a number of other nations have, in effect, prepared for energy emergencies by requiring their businesses and their individual government agencies to store a sufficient amount of energy to counter the effects of a supply shortfall.

The real problem though, is the impact of this amendment upon the budget. My amendment would not affect the budget resolution. It is within the limits set by both the committee and by the President, and, therefore, it does not need to address as what Senator MCCLURE's amendment does, the effect of the increase on all of the other committees.

The $1.5 billion will not break the budget resolution, and it is within our goal.

It is possible, incidentally, for us to fill at the rate of 230,000 barrels a day for a period of time under this amendment. The daily rate of fill is not in the amendment. It is the $1.5 billion that would be made available for the program that is in issue.

There are some who argue that more would be saved by quickly securing 230,000 barrels per day. Indeed there might be some savings involved in that plan. I believe that the question of how the money should be spent ought to be looked into by the Appropriations Committee. We ought not to deal with the technical details of the daily rate to fill in the context of a budget resolution. As I indicated, this amendment does not touch upon that issue. It does provide the $1.5 billion that is necessary under my approach to proceed with the program.

I reserve the remainder of my time, Mr. President.

Mr. MURKOWSKI. Mr. President, will the senior Senator from Alaska yield to me?

Mr. STEVENS. I am happy to yield time to my friend and colleague from Alaska. I hope that he understands these unusual circumstances. He has just given his statement in support of full funding. I, too, support that. I just do not think we can afford it right now.

Mr. MURKOWSKI. Mr. President, as I have previously stated, I would prefer that the Senator restore the full $3.8 billion in budget authority for the strategic petroleum reserve recommended by President Reagan.

However, given the efforts we are all making to reduce the Federal budget, I believe now that the amendment offered by my distinguished colleague, Senator STEVENS, is a reasonable compromise and I intend to support it. I thank the Senator.

Mr. STEVENS. I thank the Senator.

The PRESIDING OFFICER. Who yields time?

Mrs. KASSEBAUM. Mr. President, I yield to the Senator from New Hampshire.

Mr. HUMPHREY. Mr. President, I would like to direct a question or two to the author of the amendment. I wonder if the Senator from Alaska can tell us what, in his view, will come of the $1.5 billion savings, so-called, which his amendment would generate? I believe I read something in the paper about a move to come up with a billion dollars or two in order that we can restore to our recommendations some of the things which the Budget Committee deleted in following the President's instructions.

Mr. STEVENS. Mr. President, I am pleased to respond to my good friend from New Hampshire. I read the paper, too. There is no connection between my amendment and any other amendment.

As I said, I was part of a hearing the other day on this matter and I have been involved with it in the Interior Appropriations Subcommittee for several years now. I feel the filling should continue. I asked for the amount of money that would permit us to continue at approximately the rate that is being filled right now and that is why I have indicated the $1.5 billion figure.

As far as savings are concerned, I do not think there are savings. We are trying to meet the President at least halfway on this program. When the Budget Committee indicated that it did not support this funding, those of us who supported the program in the past—and I have been one of them—sought to regain a reasonable amount of the lost funding.

This is an alternative to the McClure amendment and not tied into any other package.

Mr. HUMPHREY. I thank the Senator from Alaska for that clarification.

But I would submit, Mr. President, that the temptation is going to be very great for other committees and other patrons of various programs to look at this as $1.5 billion which has been broken and can now be used for other projects.

Mr. STEVENS. Mr. President, I do not see how that could be. I am adding $1.5 billion. My amendment would add a billion dollars and a half to the Senate Budget Committee's resolution. It does not take any away.

I do not understand the Senator's rationale. If I request the Senate to increase it $1.5 billion, where is the savings?

Mr. McCLURE. Will the Senator yield?

Mr. HUMPHREY. Yes.

Mr. McCLURE. It does not seem to me that the substitute which I have offered, or the amendment to the committee amendment offered by the Senator from Alaska, in any way plays to the desires of the people who are trying to develop some package to put some additional spending in any other of the programs. The substitute which I have offered would simply be a wash by adding $3 billion for SPRO and subtracting $3 billion in all the rest of the categories. It would have no effect upon the totals at all but would reduce by 0.6 of 1 percent for fiscal year 1982 and 0.7 of 1 percent for fiscal year 1983 the outlays for all of the rest of the programs except as noted. That would be taken off the amounts that they do have.

The amendment that the Senator from Alaska has offered would simply add $1.5 billion to the budget authority for the SPRO and would, therefore, have gone above the Budget Committee's mark by $1.5 billion, and whatever cushion others are looking at would have been reduced by $1.5 billion, therefore making it more difficult for them to find additional money, I should think.

Mr. HUMPHREY. I thank the Senator from Idaho and the Senator from Alaska for the explanation.

Mrs. KASSEBAUM. Mr. President, I am happy to yield to the Senator from Idaho.

Mr. McCLURE. I thank the Senator from Kansas for yielding.

Mr. President, most of the debate we have had on the substitute which I have offered is equally applicable to the amendment offered by the Senator from Alaska. I do not know what we can say in opposition to the amendment of the Senator from Kansas except to say that we have been temporizing with this issue for years. As I noted in my opening remarks, we passed, in 1975, the idea that we are going to have a strategic petroleum reserve. We still do not have it. At various times since then, we have legislated for it. We have always said we are for it, but we have never come up with the money for it.

The Budget Committee, in looking at it this year, said, yes, it is a good idea, we are going to have it, we are going to find some other way to spend for it than out of the budget, however. The Senator from Alaska says, do not find all the money somewhere else, go find $1.5 billion somewhere else.

The Senator from New Mexico, chairman of the Committee on the Budget, indicated that we can keep on filling at the same rate we did in 1980 through 1981 and 1982 with the money out of the Budget Committee but that is the problem, Mr. President. If that is all we do, no more than we did in 1980, the Senate and the Congress as a whole have said repeatedly, that is not good enough.

One of the debates we had with the last administration was that the fill rate was not adequate to meet the needs of the strategic reserve, and we would not have by 1982, or 1983, or 1984, or 1985, or 1986, or 1987, or 1988—not until 1989 would we have a strategic reserve that is minimally sufficient to meet our needs. Mr. President, it does not seem to me that to say that we can temporize with our security requirements is adequate at this time.

I understand what my friend from Alaska is doing. It may well be that that is all the Senate can now do. It may be that the pressure upon other programs is so severe that the Senate will not vote for my substitute. It may be that the pressures for spending and the maintenance for the levels of spending in these other programs is so great that we shall allow the strategic reserve to dangle upon the thread of the opportunity to find some other way to finance it.

The Congressional Budget Office, in testimony before the Subcommittee on Energy and Mineral Resources of the Committee on Energy and Natural Resources, chaired by the distinguished Senator from Virginia (Mr. WARNER), this morning went on record again as saying that these other methods of financing have advantages but they do not look very optimistic; regarding the principal advantage of an on-budget SPRO financing. This is that it is certain. We know when it is going to be accomplished, we know how much of it will be done, and we know our objectives will be met.

If we go to public capitalization, we have no guarantee that the market will buy that approach. Such a funding mechanism has been submitted in legislation in the other body, and the author of that legislation, Representative PHIL GRAMM, was before the same subcommittee this morning, saying, "I know it will work. Well, that is, I believe it will work." And he bases his belief upon the track record that if future oil price increases are as great as past oil price increases, then the people who would invest in SPRO would, indeed, make a good return on their investment. But the whole exercise is to try to guarantee that we do not repeat that in the future. The whole exercise is to make certain that it does not go up that much in the future.

So, will they? Or will they not? I do not know. We are going to explore that. I hope we can find the means by which we can induce private investors to invest in SPRO, off budget. If we cannot, then where do we look? To some kind of a development of an industrial petroleum reserve?

I know the distinguished Senator from Kansas (Mr. DOLE), chairman of the Committee on Finance, is very interested in finding tax mechanisms that would induce businesses to do what we want done here, in terms of building up reserves, but to do it without budgetary impact that is the question before us. There are some great strengths in doing it that way.

Have we developed that yet? No. Have we talked about it? Yes. Have we studied it? Yes. Have we found the answer? No. It is just that difficult.

Do we mandate private contributions to SPRO? There are those who argue that as a matter of fact, we have the right, indeed the urgency, to compel people to do what they do not want to do and require them to invest in a publicly held but privately financed reserve system. As has been earlier pointed out here on the floor, that is subject to its own constitutional, legal, and ethical programs.

So, what are the alternatives, Mr. President? As chairman of the Energy and Natural Resources Committee, it is my responsibility and my pledge that we shall continue to examine these alternatives with a heightened sense of urgency. Whether this substitute that I have offered passes or not, whether the amendment offered by the Senator from Alaska passes or not, we are going to explore the alternatives and we, perhaps, will be able to develop the means by which we can finance the strategic petroleum reserve without having it financed through direct payments from the Federal Treasury.

But I have no illusions about whether it will be easy. If it were easy, it would have have been done. It is not going to be easy. But that does not minimize by 1 minute my determination to embark upon that task. If we can find something that looks promising, we are going to try it. Perhaps that is the answer: We shall try something. We shall see whether it works. But we shall not know until after the fact whether it is going to work. Meantime, the security of the United States will have been diminished to some degree.

How short our memory is around here. In 1973, in the fall of that year, in spite of all the best intelligence of ourselves and our friends, the Israelis, a war broke out. As a result of the unity that was forged by that common conflict, the Arab oil exporters embargoed the United States because of our support from the combatants on the other side of that war. Our fleet operating in that area, trying to protect our own interest, was unable to buy oil from the normal supplies in that area. And our fleet, to protect our interest, was unable to operate for more than 2 weeks. Two weeks to protect our interest means that war had to be over pretty quickly, did it not? Or our interests would have been beyond our capacity to protect.

It seems to me, Mr. President, that if we had looked at that, we would have built with greater urgency those mechanisms which are necessary to make certain it does not happen again.

I shall support increased spending for defense because I think it is essential. But as the Senator from New Jersey has pointed out, there is nothing more essential to our defense than an adequate supply of petroleum to keep our defense forces moving, capable of defending us. We will indeed be voting in the next weeks and months on additional ships for the Navy.

I say now to those members of the Armed Services Committee that I shall support those efforts to make as many of those ships nuclear powered as it is economic to do, with the idea that when we have nuclear powered surface and submarine ships, we do not have to send tankers halfway around the world to resupply them. They can contribute to the solution instead of being part of the problem.

Even if we do that, we still have to have petroleum requirements to keep our fleet moving, to keep our airplanes flying, to keep our tanks and armored personnel carriers moving in the direct military sense, as well as in the ability to keep our civilian economy vibrant and alive and capable of supporting whatever may be necessary.

A 1-year reserve is not a large reserve. A billion barrels in reserve is not a waste of money. It is, at best, only a means by which we minimize the dangers to our country that might come about as the result of hostile action in other areas of the world. Who can say that we were not close to a blockade of the Straits of Hormuz last year, when President Carter threatened to use military force if that happened?

Was he talking just because there was a campaign coming up? I do not believe so. I did not believe it then; I do not believe it now. He was talking because there was a very real possibility that hostilities in that area of the world would get out of hand and that the shipment of oil through the Straits of Hormuz, whether it be from Iraq or Iran, would be viewed by the other combatants as somehow strengthening their capacity to fight the war; therefore, there was a real possibility that one of the two would move to interdict that oil supply and, in so doing, interfere with the supply of oil coming from other of the gulf states that are such an important part of the total energy supply for our friends in Japan and Europe, and to ourselves.

Mr. President, it is not a waste of money nor a usefuless effort to build a strategic reserve. It is absolutely essential to the security of this country.

So, Mr. President, while I understand what the Senator from Alaska is doing, and it may well be that that is the best the Senate can do, it is only a half step, buying us some time.

I hope the Senator from Alaska will agree with me that if his amendment is adopted, it will not be our intention to spread that fill over the entire period of 1981 and fiscal 1982 at an even rate, financed only at slightly better than a 100,000 barrels a day, as we were doing in 1980, or at the 150,000 or 160,000 barrels a day his amendment would permit, but that we would fill it as rapidly as possible.

While the Senator from New Mexico indicates that we will have filled existing storage facilities before the end of 1982, at the funding authorized by the Budget Committee within their assumptions, we are embarked upon building more storage facilities; and if we get those next two units online as is projected we could fill at the rate of 230,000 barrels a day through all of fiscal 1982, and that should be our objective, not a lesser figure.

Mr. STEVENS. Mr. President, will the Senator yield?

Mr. McCLURE. I yield.

Mr. STEVENS. The distinguished Senator from Idaho is chairman of the Subcommittee on Appropriations, and there are other items in that portion of the appropriations process that might not be funded in substitute for fully funding SPRO.

It seems to me that there is a possibility that Senator McCLURE, being a member of the subcommittee, might find even more than $1.5 billion before we are finished with this process.

I would not disagree with him about the rate of filling, except that I hope our committee will look into the question of the impact of increasing the 120,000-barrels-a-day drawdown to fill SPRO upon gasoline prices this fall. I still believe there is an economic limit and that we should not cross the line at which we start exacerbating the problem of rising fuel costs.

We are basically in agreement and are trying to accomplish the same end. I believe that if we look at the energy budget and other portions of the budget within the jurisdiction of the Appropriations Subcommittee, we could very well find that, notwithstanding this limitation on the function of the Energy Committee, we can find additional moneys in the appropriation process to allow for filling at a greater rate.

Mr. McCLURE. I say to the Senator from Alaska that, yes, there are other restrictions and opportunities.

The available facilities to fill is one of the restrictions. We have to appropriate money and keep that program online in order to create two new facilities into which this crude oil would be placed when purchased. We still have to do that.

We have other opportunities in which we might find additional money to make certain a facility is available, as well as the money to buy the oil. There are some alternatives, which have been discussed at various times, about the Federal Government putting its own royalty oil in the reserve, rather than going out into the market and buying it.

It has the same effect upon the budget, because it denies the Treasury the income from the sale of that oil; but, at the same time, it reduces the amount it would have to pay to buy it in the open market.

Second, now is a good time. The markets are relatively soft. There is a supply that exceeds demand in the world today, and this is a good time to buy.

I have never believed that we should mandate a fill-fixed rate of so many barrels a day without regard to market conditions. There are times markets are tight and times they are not. The administration should have enough flexibility to deal with that.

The demand for a fill-fixed rate came out in the frustration of the last administration, that they were not doing anything. We had to mandate 100,000 barrels a day in order to get them to do that.

The new commitment President Carter expressed last year, which has been reaffirmed by President Reagan, has been a welcome commitment to filling at the rate of 230,000 barrels a day, but it is not a fixed and rigid amount. It would depend upon market conditions, and I do not believe any of us want to see the consumer market adversely affected unduly.

Again, had we had this kind of reserve when the regime of the Shah of Iran fell and we suddenly went from a 2-percent surplus to a 2- or 3-percent shortage, we would not have seen the price of oil double. It would have increased, but it would not have gone up twice, and the American consumer might have been protected by having his prices protected slightly, by having an adequate fill rate, rather than by having no reserve at all.

Mr. President, I will indicate what my intentions would be. Our parliamentary situation is this: I have offered a substitute for the committee amendment. It includes the restoration of the $3 billion which the Budget Committee has removed. It offsets that $3 billion by a decrease in all the remainder of the programs, save defense, which, as the Senator from New Jersey has mentioned, is not before us in this budget reconciliation.

I have sent to the desk a modification that would carry with it the corrected figures which the Budget Committee has advised me are necessary to effect that result. It would be a 0.7-percent reduction in outlays for 1982 and a 0.6-percent reduction in fiscal 1983. There are slight increases in the original figures so far as budget authority is concerned but not in outlays for those same years.

Mr. President, the Senator from New Jersey has indicated that he wants to have a vote on the $3 billion restoration regardless of what happens to the amendment of the Senator from Alaska. The Senator from Alaska, instead of adding the $3 billion, would add half of that back, but with no offsetting cuts. A vote will occur first on the perfecting amendment to the committee amendment offered by the Senator from Alaska.

The Senator from New Jersey has indicated that he wants a vote on the $3 billion add back. Rather than have the vote occur upon the substitute, it would be my intent that if he does not do so, I would do so, to offer a perfecting amendment to the committee amendment following the vote on the amendment by the Senator from Alaska, so that any vote would occur on my proposal, not on a substitute, but upon a perfecting amendment to the committee amendment.

I can explain in some detail, if anybody wants to know why I would do it that way, rather than voting on the substitute. It has to do with the procedural effects on the remainder of the bill. I announce that that is my intention so that people might be advised before we get to that point. Thereupon, it would be my intention to withdraw the substitute in order to avoid those other consequences, which I do not believe anybody wishes to have happen, in the event it should be adopted.

Mr. STEVENS. Mr. President, my

amendment will permit the continued filling of the strategic petroleum reserve at approximately the rate it is being filled now.

I concur with the statements made by the Senator from Idaho, but, I do not think that this is the time to increase the spending for SPRO. We do need increased spending in other national defense areas. I believe we must support the Budget Committee to the extent possible, consistent with our national security requirements.

Mr. McCLURE. Mr. President, will the Senator yield on that point?

Mr. STEVENS. I yield.

Mr. McCLURE. When the Senator says we should continue filling at the present rate, we are talking about using the available money to continue to fill as rapidly as possible, rather than spread it over fiscal 1981 and 1982.

Mr. STEVENS. I leave that up to the committee process. I do not believe we can determine this in the budget resolution. We are just talking total dollars amount.

Mr. McCLURE. I understand that. I am trying to get a feeling on the part of the people here today as to whether we are going to reduce the rate at which we fill or whether we are going to maintain the rate at which we fill while we explore the alternatives that have been suggested for financing, other than direct budgetary expenditures.

Mr. STEVENS. It is my feeling that after the hearings and appropriations process we should mandate continued filling at the maximum daily rate possible consistent with the money available and its impact on consumer pricing. These factors need to be ascertained as a result of our hearings process.

Mr. McCLURE. Mr. President, will the Senator yield?

Mr. STEVENS. I do not disagree with the Senator in terms of the rate. I just raise the question of what is the impact going to be on consumer pricing if we accelerate the actual rate. We are not filling it 230 right now.

Mr. McCLURE. Mr. President, will the Senator yield further?

Mr. STEVENS. I yield.

Mr. McCLURE. I think there is a feeling on the part of some that if the funding is reduced they somehow will be averaged over the total number of days remaining in 1981 and fiscal 1982 and it will be averaged on that daily rate.

The point I am trying to make is that we can fill ahead of that daily rate at the maximum feasible rate until the money ran out and, therefore, increasing our strategic reserve as rapidly as possible, bearing in mind the considerations which the Senator has expressed and in the meantime trying to find the alternative financing method that can pick up at the end of that period of time rather than waiting at the end of fiscal 1982.

Mr. STEVENS. I concur.

Mr. McCLURE. I thank the Senator.

Mr. STEVENS. I do not think that the $1.5 billion is the maximum that we can reasonably allocate under the budget process. It may be that we can bring about savings within the appropriations process that will accelerate that even further.

I do not want to make sure that the Senate understands that this does not mean that we will necessarily come back with a bill from appropriations that will allow only $1.5 billion for this project. We could effect some savings in the Energy Department items and actually bring back a bill from appropriations that would not be subject to a budget point of order.

Mr. President, I know of no one who seeks time on my amendment to support it. I do not believe it is the most sensible approach right now, in view of the problems we face, but under the circumstances, I yield back the remainder of my time.

Mr. McCLURE. Have the yeas and nays been ordered?

Mr, STEVENS. No; I ask for the yeas and nays on my amendment.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

Mr. STEVENS. I yield back the remainder of my time.

The Senator from Kansas has additional time.

Mr. CHAFEE. Mr. President, I ask the Senator from Kansas, does she control the time in opposition?

Mrs. KASSEBAUM. I control the time in opposition.

Mr. CHAFEE. I wonder if she will yield me 3 minutes.

Mrs. KASSEBAUM. I am happy to yield to the Senator from Rhode Island.

Mr. CHAFEE. I thank the Senator.

Mr. President, I rise in opposition to the amendment. As you know, we are working under very tight constraints here where we have come in under the President's budget because of the SPRO. It does not leave us much maneuvering room.

Mr. President. I have an amendment coming up, which I believe has considerable appeal to those here, which would provide add-ons in fiscal year 1982 and outlays of $973 million.

These add-ons deal with low-income energy assistance, health services, elementary and secondary education, weatherization, community development, UDAG, block grants, which in effect would restore the amount that the President originally asked for, and mass transit.

Mr. President, I say to Members here that if this SPRO amendment add-on for $1.5 billion passes that reduces the chances it seems to me for the add-ons that I have proposed, and I personally feel that we can get along without the additions to SPRO, to the strategic petroleum oil reserves, that have been suggested and feel that these items that I have proposed in this package along with my chief cosponsor, Senator HEINZ of Pennsylvania, are more important to the citizens of our country in the fiscal year 1982 and the fiscal year 1983.

So I urge my colleagues to reject the amendment proposed by the senior Senator from Alaska.

I wish to thank the lady Senator from Kansas for allowing me this opportunity.

Mrs. KASSEBAUM. Mr. President, I wish to comment just briefly because we have heard these arguments.

I wish to say to the Senator from Idaho that I am sure that none of us wish to leave the strategic petroleum reserve dangling by a thin thread.

I have great confidence in the Senator as chairman of the Energy Committee that I feel very sure that, indeed, it will not dangle and that he will find a means by which it can be filled by private financing.

In talking to the amendment of the Senator from Alaska, it is really a question of half a loaf and is it any better? Or are we just further putting off what I feel is an important direction to go? It seems to me it really does not satisfy either side of this argument.

The Senator asked if we were focusing our attention in this debate on whether we should find other means by which to fill the reserve or whether we should fill the reserve. I think the focus is already on filling the reserve and that there is agreement to the importance of that.

But I still maintain that if we do not exercise the budget discipline that I feel is necessary to direct us to alternative methods for filling the reserve we will continue to resort to direct Government purchasing. True, other methods have been discussed and have not been found feasible, but neither has there been the incentive to absolutely find the other measures by which it might be possible.

I feel that the Budget Committee has left in enough revenue to provide the transitional funding that is necessary. As has been pointed out, the proposal provides for a fill rate equal to the fill capacity in 1981.

In 1982, $1.047 billion is provided in the Budget Committee proposal which is enough to provide substantial transition funding. It is not enough, I agree, to fill the reserve to capacity that the Senator supports and that I support.

But I do not believe the amendment of the Senator from Alaska just adding half the amount really solves either problem that we wish to address. It does not provide the funding that I think will be necessary to give us the latitude that we need in a substantial strategic petroleum reserve, nor does it address the need for the Energy Committee to exert its full effort in finding alternative methods for funding the reserve.

Is there anyone else wishing to speak in opposition?

Mr. DOLE. Mr. President, if my colleague will yield, I wish to propound some questions to either the Senator or the distinguished Senator from New Mexico, and it does not make any difference, or both, but I am one of those who has been sort of leading the charge, along with the Senator from New Jersey—in fact my staff tells me I made about 19 statements on SPRO on the Senate floor trying to get the last administration to speed up the fill rate and now I am in somewhat of a dilemma. I do not want to do violence to what we are trying to do with reference to the budget process. But can someone advise me if everything is defeated then what is

the status, if the Senator from New Mexico can tell me what happens then?

Mr. DOMENICI. Yes. If Senator STEVENS' fails and Senator MCCLURE's fails, the money left for SPRO in this reconciliation is sufficient to allow the fill rate in 1981 equal to the existing fill capacity, that is, about 168 million barrels in total fill capacity. There will be $1.047 billion left if nothing else, if both amendments fail, in outlays in 1982. That is sufficient to allow an even higher rate of fill than the 1980 fill rate if we combine it with only a meager private sector approach. Certainly some part of this is going to be fillable by the private sector, resulting from some enticement to retain inventories in excess of normal. In addition, when we are all finished with that if Congress did nothing else, there would still be $820 million in 1983 left in these projections.

Mr. DOLE. At what rate? Is that 110,000 or 115,000 barrels?

Mr. DOMENICI. At that very end in 1983, if nothing else happened, that will be between 70,000 and 85,000. But that is the lowest and that would be in 1983. That would be 1½ full years before that occurred during which time we could be looking at alternatives and, as the Senator knows, because he comes to the floor understanding this process, if that happened, we are not stuck in concrete. The worst that could happen is that the Energy Committee would have to change the level of authorization for SPRO and then we would go look, and if it did not come through, and I am confident it will myself, but if it did not, we can come back through this process and change it again. There is not anything around here that is binding forever. We just believe the only way to get off this idea of paying for it dollar for dollar and putting it in the ground under a national law that says you cannot ever take it out unless there is a national emergency, and a 20-percent shortfall is the criteria, is to make some good faith effort, which I am confident the chairman will attempt. But, you really do not have the pressure on to try to find some way to take that valuable asset, which is increasing every year, and avoid putting the taxpayers' dollar in the ground to increase the amount of that oil, which cannot even be used. There is another way to do it. That is what the whole theory is.

Mr. BRADLEY. Mr. President, will the Senator yield?

Mr. DOLE. I just ask one more question.

Mr. DOMENICI. Sure.

Mr. DOLE. There has been a lot of talk about national security, and the way this is designed we will almost have to be in a war before we can use it. It would not have to be an armed conflict but border on that. Has any thought been given to somehow charging this to defense? It seems to me that, in effect, is what it is. Has that been considered by the appropriate committees?

The PRESIDING OFFICER. The time has expired. All the time on the amendment has expired.

Mr. DOMENICI. Mr. President, I yield whatever time I need on the resolution.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. DOMENICI. I hope that Senator MCCLURE, Senator BRADLEY, Senator DOLE, and four or five other Senators who have had a very, very grave concern in this area, and some House Members who have been concerned, would take the message from the Senate in the event the Budget Committee prevails as a serious opportunity to sit down and explore all avenues, one of which obviously is the one the Senator just suggested.

Here we are, our new President and his Secretary of Defense, as the Senator knows, saying we need to increase our military. I do not think there is any doubt about that. I think the people clearly expect that has to happen. But we have not responded by saying, "What about the strategic petroleum reserve?" Nor have they.

We merely said, continue as they have and let the Department of Energy do this and let them own it when it is finished and let them be the ones who have to allocate it in the event we have this crisis the Senator described.

I think it is a very good time in our international history and in our fiscal history to be realistic about where this money should come from. It is still going to be tax dollars, and we understand that. But it might very well be that they themselves could produce some of the flexibility in terms of its use that is lacking now. Maybe if it were military, it would not have to be in the ground pending the crisis the Senator has spoken of. Maybe in 4 or 5 years they will asssess their needs and assess the world and decide they want to use part of it, all of which would make it far more palatable to those who are very concerned.

We will have $12 billion if the McClure amendment passes; with $3 billion put back in, the President's recommendation, we will have $12 billion authorized to be spent for SPRO at that point in history.

I think you would acknowledge if we are on that course we have barely begun. That certainly is not the reserve of the type that anybody has said we ought to have. This Senator believes the fill rate that is going to be remaining, if these amendments are defeated, is enough to stay on the path; that allowable money, the authorization money, is enough for the appropriators to increase the fill. It will not be there for a long time, but for a year or so, an increased fill rate will be there while we put the pressure on to see what is a better method than doing it this way.

Several Senators addressed the Chair.

Mr. BRADLEY. Mr. President, will the Senator yield? Let me address the Senator's concern about national security because I think it is a real concern and, as I said earlier, budget action reduces outlay by $3 billion in the SPRO, and it is a green-eyeshade approach to national security. It is an attempt to save $13 billion for a short-term budgetary reason.

Let us just try to think this through. If we have a threat to our national security a likely area where this threat might be manifest is the Persian Gulf. If the threat indeed is manifest in the Persian Gulf we will more than likely lose oil supplies. If we lose the oil supplies we will not be able to mobilize our military to the degree that we would if we had oil and, therefore, our effectiveness in defending the Persian Gulf area will be impaired.

The point is that it makes no sense to spend $150 billion for weapons procurement, $184 billion on defense, and not spend $3 billion to buy oil and put it in stockpile. It is as simple as that.

I might point out for my distinguished chairman of the Committee on Finance, because I know he is interested and I know he has been on this floor with me any number of times calling for the fill of SPRO, that this position of defense mobilization but no oil stockpile is precisely the position the Japanese found themselves in at the time of Pearl Harbor.

So I think there are compelling national security reasons to fill this strategic reserve. I think it makes eminent sense to take it from the defense budget. Indeed, it is a defense measure, and it is clearly the most pressing and immediate threat to our national security.

I would also like to address the response of the distinguished chairman of the Budget Committee. How will things be affected if we only partially fund this? Well, one way they will be affected is that purchase of oil for the strategic reserve is long term, 6 months, 9 months, 12 months. You have to know the money is coming before you can buy the oil. If you cut it off, and when Congress sees the message the budget is going to be cut, that will affect that process.

Second, I think the price for the oil is directly related to a steady purchase. If you cut it off and start it again you are going to be buying oil at a much higher price, and more than likely are going into the spot market to buy the oil.

These are not insignificant economic considerations, in addition to the national security considerations I mentioned.

Mr. DOLE. I thank the Senator.

Mr. MCCLURE. Mr. President, will the Senator yield? The Senator from New Mexico has correctly said that filling at the existing fill rate for which there is enough money will fill the existing storage capacity. But what he has not said is that there is a phase 2 to storage capacity that has been authorized, it has been funded, and it is intended to expand that storage capacity. The money made available under the budget resolution would not include the money that is necessary to buy the oil to fill that storage which will be made available during fiscal 1982.

So we should not leave a misperception that the Budget Committee money will fill all of the facilities which will be available during 1982. If we do not find more money, there will be facilities built, available, and ready to be filled but no oil to put in them.

Mr. DOLE. Do I understand that phase 2 will happen in fiscal 1982?

Mr. MCCLURE. It is underway now and it is happening in fiscal 1981 and in fiscal 1982.

Mr. DOLE. I appreciate the comments by all three Senators.

I guess what the Budget Committee is suggesting is that we just sort of postpone this for a while on the assumption that something will happen, and I mean that sincerely, that something, that the administration of the appropriate committee will devise a plan where we can get to the fill rate of 230,000 barrels per day; is that accurate?

Mr. DOMENICI. That is absolutely correct.

Mr. DOLE. You are confident that that will happen?

Mr. DOMENICI. Senator, I am confident that this country should insist that that happen, and there is no way it is going to happen until we decide we are not going to put this many billions of tax dollars into the ground.

If we put the people of this country, the best financial people—this President and his Secretary of the Treasury, with the kind of Americans with financial innovativeness—to work on it, because Congress has said, "We are just not going to do it this way."—I am confident they are going to find a way.

The 230,000 barrels the Senator mentioned, I am not confident that that is going to go into the ground in the way we have done it in the past.

I mean there have been plenty of problems with that, and there are plenty of people who are not so sure it is going to work after you got it in there. I am saying we need a reserve buildup very soon at about that many barrels a day. Whether it comes with increased private sector storage that is projected and that they receive some kind of incentive to do it, along with some kind of a private financing with certificates of deposit or futures so you can also put it into some kind of a reserve of this type, when you combine them the goal ought to be what you described.

I would also say, when the good Senator from New Jersey suggests a scenario where our fleet does not have enough oil at some point because of a temporary interruption, even he is not suggesting that this would be available for that because it is obvious that Congress would have to change all the laws on the books because that will be available in the event of a 20-percent shortfall and a declaration of national emergency.

We produce 8.5 million barrels a day domestically. That is where you would get the oil for that fleet, not out of the salt domes that handle this oil now in the event of a very short interruption.

But it is an economic situation if we have a long term, long interruption we have all been talking about. To mix that with our 8.5 million to see how we can minimize the economic catastrophe we have is what I am talking about.

On the other hand, the military might want a reserve which, I think, we have been discussing here, which could be completely different. It could be the very reserve we are speaking of, but it would be a reserve nonetheless. If the military got into a bind on a temporary basis, they would have more supply than they have been presently buying. They have a pretty good reserve now.

Mr. DOLE. Do I understand the chairman correctly that if the Appropriations Committee decides to speed up the fill rate and, perhaps, in 8 or 9 months at a speeded-up rate it will run out of money, is the Senator prepared, as chairman of the Budget Committee, in a timely fashion to come back to Congress, if we have not worked out some plans, the administration has not worked out some plans, to either through a supplemental appropriation or some legislative appropriation ask for additional money?

Mr. DOMENICI. I am prepared. I do not know precisely what event would occur, I do not know if it is the second concurrent budget resolution in August or September, but the answer to your question is "Yes."

Mr. DOLE. I would be happy to yield the floor.

Mr. BRADLEY. I would like to ask the distinguished chairman of the Budget Committee does that mean the chairman of the Budget Committee would come back to the floor of the Senate and request the extra $1.5 billion to finance the strategic petroleum reserve?

Mr. DOMENICI. I did not say that. Senator DOLE asked me the hypothetical in the event the Appropriations Committee wanted to take the money that is left for the strategic petroleum reserve, absent the new money from the Stevens amendment, absent the new money provided by McClure——

Mr. BRADLEY. The money that is left.

Mr. DOMENICI. The money that is there, can they provide that in a manner that would increase the daily fill, and my answer was yes. But it would certainly run out sooner than the year and a half I have described.

He asked if that occurred and we had not found some private sector, some financial approach, some combination of military, the old idea of SPRO and some private, and we had none of those in place would I be disposed to support continuing the fill, which would mean we would have to add budget authority to the Energy Committee, and my answer was yes.

I did not want to commit to what point in time. At first, it seemed like the second concurrent next year sounded right. I did not want to limit that to that. That is pretty quick, it is a few months away.

Mr. BRADLEY. That assumes what fill rate? You would be willing to come back and ask for increased budget expenditures for the strategic reserve if you used up the money by purchasing the oil at what rate?

Mr. DOMENICI. I am not——

Mr. BRADLEY. Three-hundred thousand barrels as the Senator is on record as suggesting last year?

Mr. DOMENICI. I am not going to say 200,000 or 230,000. I am merely saying that certainly the Appropriations Committee can provide within its jurisdiction for filling faster than it is being filled now, and there would be money for that.

If they want to go to 200,000 I am not going to object. That would be another piece of legislation.

As you know, it probably would be in the appropriations bill. I am not going to object. I do not want it to stretch out so that we are proved right. I think in 8 or 9 months we ought to know that answer to whether or not we can find another mechanism or combination of mechanisms, Senator.

Mr. BRADLEY. Mr. President, let me point out to the Senator from Kansas that this 20-percent number that is being thrown around expires on September 30. That is when the legislation that sets this number expires.

It would be this Senator's hope—and I think it is the hope of many Senators in this body—that we move away from controls and allocations. So we are talking about a 20-percent number that is going to disappear in the air in a puff of smoke in September, particularly if the Senator from New Mexico, the Senator from Idaho, and the Senator from New Jersey have their way about what might replace those controls and allocations.

So I think one should not be locked into a 20-percent number.

The second thing is that the IEA, the International Energy Agency, is now engaged in a discussion as to what should constitute a common draw-down policy. The numbers that are being thrown around there are much, much lower than 20 percent. So I think the Senator should know that.

Mr. KENNEDY. Will the Senator yield?

Mr. BRADLEY. I do not think I have the floor.

The PRESIDING OFFICER. The time is under the control of the Senator from New Mexico.

Mr. DOMENICI. Mr. President, has all the time been used up for the Stevens amendment?

The PRESIDING OFFICER. That is correct.

Mr. McCLURE. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. BRADLEY. Mr. President, who has the floor?

The PRESIDING OFFICER. The Senator from New Mexico has the floor.

Mr. McCLURE. Mr. President, will the Senator yield for a parliamentary inquiry?

Mr. DOMENICI. Mr. President, I yield to the Senator from Idaho.

Mr. McCLURE. Mr. President, under the current parliamentary situation, we have already agreed to vote on one amendment at 2 o'clock, is that correct?

The PRESIDING OFFICER. That is correct. There are two amendments back to back at 2 o'clock.

Mr. McCLURE. What is the second amendment?

The PRESIDING OFFICER. The second amendment is the Stevens amendment. The first amendment is the Riegle amendment.

Mr. McCLURE. Mr. President, if the time on the Stevens amendment has expired—and it has expired—it will then be the second amendment and there is no further amendment pending to be voted upon, is that correct?

The PRESIDING OFFICER. The

McClure amendment is pending, but we will not have a back-to-back vote.

Mr. McCLURE. Mr. President, as I understand it, the agreement entered into is that following the disposal of the Stevens' amendment the Senator from New Jersey would be recognized to offer an amendment. Is that correct?

The PRESIDING OFFICER. That is the agreement.

Mr. McCLURE. And upon disposal of the amendment of the Senator from New Jersey, it would then be in order to offer a further perfecting amendment to the committee amendment.

The PRESIDING OFFICER. The Senator is correct.

Mr. BRADLEY. Mr. President, the amendment of the Senator from New Jersey is a perfecting amendment. If that did not succeed, another perfecting amendment would be in order. That is my understanding.

Mr. McCLURE. That is my understanding. As a matter of fact, upon the disposal of any perfecting amendment, another perfecting amendment may be offered.

The PRESIDING OFFICER. The Senator is correct; that is correct whether or not it succeeds.

Mr. McCLURE. Mr. President, a further parliamentary inquiry. In the 8 minutes between now and the time the Riegle amendment is voted on, another perfecting amendment could be offered and be the pending business at the end of that sequence?

The PRESIDING OFFICER. The Stevens amendment has not been set aside. If it had been, that would be true.

Mr. BRADLEY. Mr. President, I did not understand the Chair.

The PRESIDING OFFICER. The Stevens amendment has not yet been laid aside. If it were laid aside, that would be true.

Mr. McCLURE. And unless it is laid aside, it remains the pending amendment until the hour of 2 o'clock?

The PRESIDING OFFICER. The Senator is correct.

Mr. HOLLINGS addressed the Chair.

The PRESIDING OFFICER. The Senator from South Carolina.

Mr. HOLLINGS. Mr. President, I wonder if the distinguished Senator from Idaho would yield for a question. I am just catching up with respect to his offset by trying to reinstitute $3 billion for SPRO, that we are going to make that up with the cuts of six-tenths of a percent from all programs, save and excepting the 050 defense function; is that correct?

Mr. McCLURE. Mr. President, I sent a modification to the desk a little earlier, because the figures provided to me by the Budget Committee had not included in their calculations the effect of the national debt and the social security trust fund. The figures were modified to indicate a reduction in budget authority of 1.5 percent in 1982; 1.4 percent for fiscal year 1983; and outlays would be seven-tenths of 1 percent in 1982 and eight-tenths of 1 percent in 1983, with the proviso that no committee shall be required to reduce budget authority associated with revenues to trust funds; and provided further that no committee shall be required to reduce budget authority nor outlays associated with interest on the public debt.

Mr. HOLLINGS. Am I to understand, then, that social security is not affected?

Mr. McCLURE. The Senator is correct.

Mr. HOLLINGS. I thank the distinguished Senator.

Mr. DOMENICI addressed the Chair.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. DOMENICI. Mr. President, have the yeas and nays been ordered on the Stevens amendment?

The PRESIDING OFFICER. They have.

Mr. DOMENICI. Mr. President, I am going to suggest the absence of a quorum. I wonder if the distinguished minority manager would agree to charge that equally to both sides.

Mr. HOLLINGS. Yes.

Mr. DOMENICI. Mr. President, I suggest the absence of a quorum on those conditions

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BAKER. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mrs. HAWKINS). Without objection, it is so ordered.

VOTE ON AMENDMENT NO. 22

The question is on agreeing to amendment No. 22 proposed by the Senator from Michigan (Mr. RIEGLE). The yeas and nays have been ordered. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Mississippi (Mr. COCHRAN) and the Senator from South Dakota (Mr. PRESSLER) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Arkansas (Mr. BUMPERS), the Senator from Arizona (Mr. DECONCINI), the Senator from Massachusetts (Mr. TSONGAS), and the Senator from New Jersey (Mr. WILLIAMS) are necessarily absent.

I further announce that if present and voting, the Senator from Arkansas (Mr. BUMPERS) and the Senator from Arizona (Mr. DECONCINI) would each vote "yea."

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 39, nays 55, as follows:

[Rollcall Vote No. 50 Leg.]

YEAS—39

Baucus	Exon	Matsunaga
Bentsen	Ford	Melcher
Biden	Glenn	Metzenbaum
Boren	Hart	Mitchell
Bradley	Heflin	Moynihan
Burdick	Huddleston	Nunn
Byrd, Robert C.	Inouye	Pell
Cannon	Jackson	Pryor
Chiles	Johnston	Randolph
Cranston	Kennedy	Riegle
Dixon	Leahy	Sarbanes
Dodd	Levin	Sasser
Eagleton	Long	Zorinsky

NAYS—55

Abdnor	Grassley	Packwood
Andrews	Hatch	Percy
Armstrong	Hatfield	Proxmire
Baker	Hawkins	Quayle
Boschwitz	Hayakawa	Roth
Byrd, Harry F., Jr.	Heinz	Rudman
Chafee	Helms	Schmitt
Cohen	Hollings	Simpson
D'Amato	Humphrey	Specter
Danforth	Jepsen	Stafford
Denton	Kassebaum	Stennis
Dole	Kasten	Stevens
Domenici	Laxalt	Symms
Durenberger	Lugar	Thurmond
East	Mathias	Tower
Garn	Mattingly	Wallop
Goldwater	McClure	Warner
Gorton	Murkowski	Weicker
	Nickles	

NOT VOTING—6

Bumpers	DeConcini	Tsongas
Cochran	Pressler	Williams

So the amendment (UP No. 22) was rejected.

Mr. DOLE. Madam President, I move to reconsider the vote by which the amendment was rejected.

Mr. DOMENICI. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

VOTE ON UP AMENDMENT NO. 28

The PRESIDING OFFICER. The question is on agreeing to the amendment by the Senator from Alaska (Mr. STEVENS), unprinted amendment No. 28. On this question the yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Mississippi (Mr. COCHRAN) and the Senator from South Dakota (Mr. PRESSLER) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Arkansas (Mr. BUMPERS), the Senator from Arizona (Mr. DECONCINI), the Senator from Massachusetts (Mr. TSONGAS), and the Senator from New Jersey (Mr. WILLIAMS) are necessarily absent.

I further announce that, if present and voting, the Senator from Arizona (Mr. DECONCINI) would vote "nay."

The PRESIDING OFFICER. Are there any other Senators wishing to vote?

The result was announced—yeas 23, nays 71, as follows:

[Rollcall Vote No. 51 Leg.]

YEAS—23

Biden	Hayakawa	Moynihan
Bradley	Huddleston	Murkowski
Cannon	Inouye	Pell
Cranston	Jackson	Sarbanes
Dodd	Kennedy	Specter
Durenberger	Leahy	Stevens
Ford	Matsunaga	Zorinsky
Glenn	Metzenbaum	

NAYS—71

Abdnor	Cohen	Hart
Andrews	D'Amato	Hatch
Armstrong	Danforth	Hatfield
Baker	Denton	Hawkins
Baucus	Dixon	Heflin
Bentsen	Dole	Heinz
Boren	Domenici	Helms
Boschwitz	Eagleton	Hollings
Burdick	East	Humphrey
Byrd, Harry F., Jr.	Exon	Jepsen
Byrd, Robert C.	Garn	Johnston
Chafee	Goldwater	Kassebaum
Chiles	Gorton	Kasten
	Grassley	Laxalt

Levin	Packwood	Schmitt
Long	Percy	Simpson
Lugar	Proxmire	Stafford
Mathias	Pryor	Stennis
Mattingly	Quayle	Symms
McClure	Randolph	Thurmond
Melcher	Riegle	Tower
Mitchell	Roth	Wallop
Nickles	Rudman	Warner
Nunn	Sasser	Weicker

NOT VOTING—6

Bumpers	DeConcini	Tsongas
Cochran	Pressler	Williams

So Mr. STEVENS' amendment (UP No. 28) was rejected.

Mr. DOMENICI. Madam President, I move to reconsider the vote by which the amendment was rejected.

Mr. HOLLINGS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 29

(Subsequently numbered amendment No. 24)

(Purpose: To restore funds for the Strategic Petroleum Reserve)

The PRESIDING OFFICER. The Senator from New Jersey.

Mr. BRADLEY. Madam President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

Mr. KENNEDY. May we have order, Madam President.

The PRESIDING OFFICER. The Senator is correct. The Senate will be in order.

The clerk will report the amendment.

The assistant legislative clerk read as follows:

The Senator from New Jersey (Mr. BRADLEY) proposes an unprinted amendment numbered 29.

Mr. BRADLEY. Madam President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 2, beginning with $52,144,000,000" in line 17, strike out through "$47,694,000,000" in line 20 and insert in lieu thereof the following: "$49,825,000,000 and outlays by $33,945,000,000 in fiscal year 1982; and to reduce budget authority by $56,228,000,000 and outlays by $44,694,000,000".

On page 6, beginning with "$3,714,000,000" in line 10, strike out through "$3,628,000,000" in line 13 and insert in lieu thereof the following: "$714,000,000 in budget authority and $404,000,000 in outlays for fiscal year 1982; and $660,000,000 in budget authority and $628,000,000".

Mr. BRADLEY. Madam President, the amendment I have just offered restores the figure of $3 billion to the budget for the strategic petroleum reserve. That brings the number for the strategic petroleum reserve to the number that the Reagan administration proposed in its budget, the number of $3.8 billion.

SENATE SCHEDULE

Mr. ROBERT C. BYRD. Madam President, will the distinguished Senator yield with the understanding that he will not lose his right to the floor? I would like to ask the distinguished majority leader what the schedule will be for the rest of the day and into the remainder of the week.

Mr. BAKER. Madam President, I thank the minority leader, and I thank the Senator from New Jersey for yielding so that we can pursue this subject which began with a colloquy with the minority leader.

Madam President, I would say, in response to the minority leader's question, we have done a canvass on this side of the aisle about the number of amendments remaining, and it would appear that there are three, perhaps four, that would be offered on this side. I do not expect more time than the time allocated for the amendment itself to be utilized, that is to say, I would not expect extensive time to be yielded on the resolution.

I wonder if the minority leader can tell us what he sees in prospect on his side of the aisle before we make a decision on today or tomorrow or thereafter in the matter of trying to finish this resolution?

Mr. ROBERT C. BYRD. Madam President I would venture there may be another dozen amendments on this side of the aisle or there may not be, and the reason I say there may not be——

Mr. BAKER. Do I get a choice? [Laughter.]

Mr. ROBERT C. BYRD. The reason I say there may not be, I understand Mr. CHAFEE may have a package that would be coming along a little later, and in that package are some several items in which we are interested also on this side of the aisle, and depending upon the outcome of that vote, it might not be necessary to call up amendments on this side of the aisle that would be directed to some of the individual items in the package.

I think we can dispose of the amendment by Mr. BRADLEY, and then depending upon whether or not there would still be the vote on the McClure substitute, it would then be our turn on this side of the aisle and rather than call up a package at that time on this side of the aisle we would hope to go with an amendment by Mr. MOYNIHAN that would deal with certain education programs.

Then if Mr. CHAFEE would call up his package amendment, the outcome of that vote might determine whether or not Members on this side of the aisle would be going for individual items within the package and, perhaps, not.

It would seem to me, may I say to the majority leader, in any event we ought to be able to finish the action on this resolution no later than some time on Wednesday. If we ran the full time out, it would go through into the early part of next week, but we have no intention of stringing out the debate and no desire to string out the debate. We are simply hoping to get some votes on a few amendments to keep people in groups from falling through the holes in the President's "safety net," and then we are ready to have a vote up or down on the resolution.

There is no desire to delay, no desire to string it out. I would say to the distinguished majority leader in any event I think we would go no later than on Wednesday, conceivably we could finish tomorrow.

Mr. BAKER. Madam President, I thank the distinguished minority leader.

I assumed the distinguished Senator from Rhode Island (Mr. CHAFEE) intends to offer this amendment during the course of today?

Mr. CHAFEE. It is my intention to follow Senator MOYNIHAN.

Mr. BAKER. I thank the Senator. Of course, we have the Senator from Idaho's substitute and—might I yield to the Senator from Idaho?

Mr. McCLURE. I wanted to address a question to the Senator from Tennessee and the minority leader, too, because I do have a substitute pending that will follow after the Bradley amendment to the committee amendment.

It would be my intention to offer the substance of my substitute as a perfecting amendment in the event the Bradley amendment is not adopted, and have a vote on it rather than upon the substitute in order to preserve greater parliamentary flexibility in the further consideration of this matter.

Mr. ROBERT C. BYRD. Very well. Then after the vote on the McClure amendment there would be a vote on the amendment of Mr. MOYNIHAN because we would prefer Mr. CHAFEE going with his package. We do not rule out the possibility of our offering a package if that package should fail, but a good many of us over here feel like we will support it. So we will go then to Mr. MOYNIHAN and then go to Mr. CHAFEE on the package.

I will say then, Madam President, that we ought to finish no later than on Wednesday even without going late into the evening either today or tomorrow.

Mr. BAKER. Madam President, I thank the distinguished minority leader.

Let me suggest this, to get a better reading on how things are going to go, that we leave intact the suggestion that we might be late tonight. I would like to avoid that, if possible, and as soon as we get a little further along I will address that issue once more.

ASSASSINATION ATTEMPT ON PRESIDENT REAGAN

Mr. BAKER. Madam President, may I take this opportunity to advise the Senate that I have been advised that the President of the United States was the target of a shot fired at him a few moments ago? He was not hit. His press secretary, Mr. James S. Brady, was hit and wounded very seriously. One police officer and, perhaps, one Secret Service man were hit, as well.

The President is well. He was not injured, but apparently there were other injuries.

I have no other detail, but as soon as these details are supplied I will, of course, report them to the Senate.

I thank the Senator for yielding.

Mr. BRADLEY. Madam President, I am going to proceed with my amendment, but I must say that as one Senator

I am in a state of some anxiety about the events the majority leader has just conveyed to the Senate. I hope we will have a chance to reflect upon these events in the next few days, and that we might address ourselves in some way to the underlying sickness that exists in a society where these kinds of events become commonplace.

Not only can they not be tolerated, but there must be a conviction of each individual to see that they are not tolerated within his own experience, that the attitudes that lead to this kind of thing are rejected categorically by all Americans.

BUDGET RESOLUTION OF RECONCILIATION AND INSTRUCTION

The Senate continued with the consideration of the concurrent resolution.

UP AMENDMENT NO. 29

Mr. BRADLEY. Madam President, let me go on with this amendment in the wake of this news by simply saying that the Senate has recorded itself in the previous vote to reject $1.5 billion for the strategic petroleum reserve. My amendment would place $3 billion for the reserve, bringing it to $3.8 billion, which is the Reagan administration's budget figure.

Now, having seen the vote on a previous amendment, I am not at all optimistic that my amendment will be accepted by the Senate.

But let me say that the failure to accept my amendment, the Reagan administration number, or the amendment of the Senator from Alaska is a green eyeshade approach to national defense.

We are spending $1.85 billion for defense and we cannot find $3 billion to put oil into a reserve.

Mr. President, as the events in the Persian Gulf today attest, the war continues to rage. It could spread and it could lead to a drop in production of several million barrels of oil a day.

The United States is not prepared for that event. We have no cushion to absorb that kind of loss of oil. Our economy would be thrown into a catastrophe.

And to make matters even more poignant for my colleagues who are sensitive to the issues of national defense, the most probable threat is the Soviet Union, one area that the Soviets might move. If the Persian Gulf was cut off, we would not have the oil sufficient to mobilize our economy to continue our military efforts to defend the vital interests of this country.

So, Madam President, there is a clear national security reason for this amendment. There is a clear economic security reason for this amendment. I know that the opponents have suggested that we have alternate means of financing, that we can do it in the private sector or we could do it by Government bonds. But let me assure the Senate that none of these measures are in place today, so that if we fail to authorize moneys for the strategic petroleum reserve and a catastrophe occurs at this moment in the Persian Gulf, we will have no oil flowing into a reserve. If it happens 6 months from now and we are depending on the other mechanisms, we will have no oil flowing into a reserve.

Let me say that this is an amendment of $3 billion. The Budget Committee reported a reconciliation bill that was $2.3 billion under the administration request. Because of the nature of this reconciliation bill, there cannot be defense authorizations cut in the areas of the largest defense expenditures.

So that we are in a position here of talking about the strategic petroleum reserve as a defense issue and unable to make that tradeoff in this bill. What I am arguing is that the $2.3 billion that the Budget Committee came under the Reagan administration be applied to the strategic petroleum reserve and that the $700 million additional could certainly be obtained out of the $185 billion budget authorization that is going to be passing through this body in the first concurrent budget resolution.

Madam President, I would argue as strongly as I can that there is no better way to spend an energy dollar than to buy oil and put it in the reserve. There is no better way to spend dollars for national security, given the present world circumstances, the probability of an oil supply interruption, having had three in the last 7 years, and our continued dependence on oil for our economy and our military efforts.

Madam President, I know that there are other Members on the floor who would like to speak in support of this amendment. I would be pleased to yield to them for that purpose at this time, reserving the remainder of my time under my control.

Mr. JACKSON. Will the Senator yield?

Mr. BRADLEY. I yield to the Senator from Washington for his comments.

Mr. JACKSON. Madam President, the Senate Budget Committee in Senate Concurrent Resolution 9 seeks to instruct the Committee on Energy and Natural Resources to reduce the budget for the strategic petroleum reserve by $3 billion in fiscal year 1982 and by $3 billion in fiscal year 1983. The Committee on Energy and Natural Resources is in essence instructed to find an alternative funding mechanism for financing the SPR. I rise in support of the Bradley amendment to restore the $3 billion for the SPR.

I should say from the start that there is no other item in the energy budget than the SPR from whence $3 billion could be cut, especially in light of the budget slashes that have already been proposed by the administration. SPR funds are almost half of the nondefense portion of the Reagan DOE budget.

Madam President, what is the real issue here?

I do not think the issue is whether the SPR program is functioning properly and is worthy of support. Senator DOMENICI, chairman of the Budget Committee, would no doubt agree that despite early difficulties, the SPR program is now working well. There are 118 million barrels in storage and another 27 million barrels are on order, bringing the total to 145 million barrels either in storage or under contract. Right now the SPR is capable of drawing down at a rate of 1.7 million barrels per day, which is about 36 percent of this Nation's current crude oil imports. We are filling the SPR at an average rate of about 207,000 barrels per day in this fiscal year.

On July 23, 1980, I asked the GAO to report monthly to the Committee on Energy and Natural Resources on the progress of the SPR program in meeting its legislative mandates, particularly as to the rate of filling the SPR. No other energy program has received such scrutiny in our committee. The GAO reports indicate that the program is generally doing well. So that is not the issue here today.

There is also no dispute that a large SPR is an important element of our national security. I do not think Senator DOMENICI would disagree if I said that a large SPR is essential to our national security. The Congress said last year in the conference report on the Energy Security Act:

> The Strategic Petroleum Reserve should be regarded as a national security asset of paramount importance.

In fact, it is difficult to overstate the value of this energy program. Both the Democratic and Republican platforms in the last election singled out the SPR to favor a rapid fill of the reserve. As the former chairman and now ranking minority member of the Committee on Energy and Natural Resources, I have examined all of our Nation's energy programs. As I think of the energy programs that will yield significant benefits to our energy posture in the next decade, a decade that is certain to include continued instability in the Middle East, I can think of no other energy program more important than filling the strategic petroleum reserve.

Next, I think Senator DOMENICI would concede that there is no disagreement over whether the Congress should seek an alternative method of financing the SPR. In its report to the Budget Committee, the Committee on Energy and Natural Resources said:

> Further it is the sense of the Committee, in the case of funding for the Strategic Petroleum Reserve, that the Committee will move expeditiously to consider and report an alternative off-budget funding mechanism. When such an alternative mechanism is developed by the Committee on Energy and Natural Resources, or any other committee, and is enacted into law, we will support an appropriate reduction in authorizations for the Strategic Petroleum Reserve.

The Committee on Energy and Natural Resources is moving rapidly to fulfill this pledge. Hearings on the SPR are already scheduled in the committee.

I certainly would not stand in the way of effective legislation that would require the oil companies to shoulder the burden of filling the SPR, if that is the will of the Senate. I would welcome any other suggestions as to how we can reduce the budget impact of the SPR, as long as we continue to fill the reserve.

So a willingness to find an alternative means of financing the SPR is certainly not the issue.

What is the real issue here today?

The question is simply this. We have a program that all agree is functioning satisfactorily and is essential to our national security. Should the Congress yank the fiscal year 1982 and fiscal year 1983 funds from the SPR with the pious hope that a new and effective financing mechanism will be enacted and implemented before the fiscal year 1981 SPR funds run out? That is the key issue. The answer of course is—that depends on how confident we are about the success of the alternative financing mechanism.

Apparently, the Reagan administration is not so confident about the alternative funding mechanism. The President chose to request full funding for the SPR, even though it is the single most expensive item in the entire DOE budget. The administration's budget books indicate that they are continuing to search for alternative funding mechanisms. We know that the administration, including several agencies, have studied this matter intensely. No proposal has been sent to the Congress.

Last week, the White House congressional liaison told our staff that the White House favored full funding for the SPR, although a half hour later they changed signals and said that they have no position on this amendment. That should tell you how confident they are about the alternative financing mechanisms.

Yet we are asked by the Budget Committee to rely on an unspecified alternative funding mechanism before we have even completed hearings on the issue.

Madam President, I hope the day never comes that other programs deemed essential to the national security are treated so casually. Despite our Nation's economic difficulties, I believe that we can afford to fund programs that are vital to the national security. I believe we can wait until an alternative funding mechanism is proven effective before we slash the budget for the strategic petroleum reserve.

It is obvious, Madam President, that there is a real need to address the issue now before the Senate.

The fact is the President of the United States asked for $3 billion for the strategic petroleum reserve, the acronymic SPRO.

I sponsored this legislation back in 1975. I regret to say that until just recently we have not done very well in implementing that legislation. We still have a long way to go to get 1 billion barrels in the reserve.

Madam President, anyone who has followed the events, as we have in the Energy Committee, over the past 2 years in connection with our investigation on the geopolitics of oil will say categorically and without any reservation, as we did in the report, that the chances of an interruption in the 1980's is for real.

Now, I am not going to engage in magic here, Madam President, because I do not profess to know what is going to happen, but prudence tells me that the best way to be prepared to deal with this problem is in fact to be prepared to deal with this problem. The President understands the need.

Now we are lost in a bookkeeping shuffle here on the floor. I think the worst signal that we could send during these difficult and precarious times is that we are cutting out the money for SPRO, for the strategic petroleum reserve.

Every Member will have to face that issue if we have a cutoff over the period that we face ahead. I believe that it is vital and essential, as an element at least in trying to bring the international pricing of oil under control, that we have something to back it up. And that something needs to be a credible strategic reserve.

I hope, Madam President, that this body will send the right signal—up to now it is the wrong signal—that we are determined to protect our own security and the economic interests of the Western world.

I have no quarrel with those who say, "Well, we will finance SPRO by some other means." I want to take a look at it, obviously.

But Madam President, there is only one requirement, one way or the other, and that is to get on with the business of filling that strategic reserve. It is going well thus far. We finally got it moving again. The worst thing that we can do in this body during these very uncertain times is to send a wrong signal and not let the world know that we are prepared to deal with contingencies, no matter how adverse.

So Madam President, I hope this body will send the right signal and support the Bradley amendment.

Mr. DURENBERGER. Will the Senator yield?

Mr. BRADLEY. I yield 5 minutes to the Senator from Minnesota in support of the amendment.

Mr. DURENBERGER. Madam President, not too long ago, my good friend and distinguished colleague, Senator ARMSTRONG, was asked if there was anything to which he could compare the Senate's expedited schedule on the budget. Senator ARMSTRONG's response was, "Have you ever seen a dinosaur gallop?" I assume he was referring to last year's process.

Frankly, I wish the same analogy could be used for the strategic petroleum reserve. Unfortunately, instead of bringing the petroleum reserve to a gallop, the policies of recent years have driven the reserve to the brink of the same fate suffered by the real-life dinosaurs: that is extinction.

I want to thank Senator STEVENS for his efforts to impress us earlier today for the need for SPR. I want to congratulate the ranking member of the Energy Committee on his eloquent statement on this country's needs and of the President's recognition of that need.

I want to thank and congratulate my colleague from New Jersey for his persistent leadership and efforts to make sure we avoid the fate I was talking about earlier. Through hearings in his committee and by amendment on this floor to various bills, he has aggressively defended this most important part of our energy policy. In the past I have always been with him in his efforts to provide for our national security and today I am once again joining him by supporting his amendment.

Now, the challenge laid down by President Reagan is not merely to cut Federal spending. I am convinced that if it were just that, the support his programs have generated would hardly be the spur that got the dinosaur to gallop.

Instead, his program is designed to curb and then reduce inflation and to redirect many of the policies of the National Government. That is why I have voted—and will continue to vote—to support his efforts.

President Reagan has consistently endorsed a rapid fill rate for the reserve. That is an essential element in reducing energy cost impact on inflation. He did not make any changes in former President Carter's budget proposal in regard to the reserve.

In addition to President Reagan, every energy expert who has advised the Congress has agreed that a rapid fill rate for the strategic petroleum reserves is the most important step that we can take to reduce our dependence on the oil producers of the Middle East. And yet, the history of the reserve is primarily one of failed commitment in the Congress, delay at the Department of Energy, and poor management in the field. Only recently have we in the Senate been able to turn that record around.

The real question before us today—and I am confident that Senator BRADLEY would agree with me—is how do we keep the pressure on the Senate Committee on Energy and Natural Resources to design a program that will assure a rapid fill rate without spending huge sums of money. All of us are looking for the best solution to a critical issue. My vote for the Bradley amendment is not a vote to break the President's budget. It is a vote to support the stated intention of the administration and the Congress to find a practical answer to the problem of filling the petroleum reserve.

The importance of the strategic petroleum reserve cannot be underestimated. Even though Americans have dramatically cut their consumption of imported from about one-half of our daily supply in 1978 to about one-third today, our dependence on uncertain foreign supplies is a potential disaster. Let me remind my colleagues that the gasoline lines and other effects of the oil shortage in 1979 were caused by a shortfall of no more than 5 percent of our supply. If we were to lose one-third of our daily oil needs—the amount we import—the consequences are almost unimaginable.

I know that there are Senators who sincerely believe that it is possible to design a program that would provide for private financing of the reserve. And, if that is possible, we should carefully explore the option in these times when Federal dollars must be devoted to only the most important undertakings. They argue that we should support the Budget Committee recommendations which cut

almost all of the funding for the strategic petroleum reserve in fiscal years 1982 and 1983 and, by doing so, we will create a climate in which the private financing approaches might be seriously considered.

But, I ask these Senators to look at the record on the strategic petroleum reserve. It has been strangled for funds throughout its history. And no private financing scheme has been put in place as yet. I understand that private financing was carefully considered by the panel which originally designed the reserve, but no successful arrangement was found.

Frankly, as I said, I am not convinced that Senator BRADLEY's amendment offers the best solution. It does, however, offer the best hope that we will find the best solution. Senator BRADLEY has held many hearings on the reserve in the Energy Committee and a new round will begin in a subcommittee next week. I hope to participate in those hearings because I have my own ideas on how the fill rate might be maintained at lower cost to the Federal Government.

One idea came to me from the president of the largest independent petroleum pipeline in the Nation. He pointed out that world inventories of crude oil continue to increase with each passing week. This puts increasing pressure on the storage capacity. Storage capacity for each additional barrel gets more and more expensive. In normal markets the oil companies at this point would leave the oil in the ground, rather than pay the very high storage charges. But leaving it in the ground may often mean not having it when it is necessary because of the uncertain production policies of foreign nations.

He suggests that we lease space in the strategic petroleum reserve to the oil companies. We could, in fact, have the oil companies paying the Federal Government to use the capacity of the reserve for oil that they would continue to own. If we combined a low monthly lease rate for the space and a high turnaround charge, we might achieve a very rapid fill rate with some assurance that it would be removed only at the time of a serious shortfall. We could make it a cheap place to keep oil but very expensive to remove it. When budget exigencies are less severe we could buy the oil that had been placed in the reserve and put the American public in charge of its ultimate disposition.

This idea has a great deal of appeal to me. I would like to see the Energy Committee study its detail to see if in fact it can be used to reduce the cost of reserve while preserving its important role in our energy policy. However, I am not willing to abandon the security that a rapid-fill rate provides, in the hope that this idea or some other can take the place of Government purchases. I will be aggressive in assisting the Energy Committee in its examination of every proposal that promises reduced cost for the reserve program.

But, I cannot vote now to abandon a commitment to the reserve which I have in the past worked to secure. I will support the Bradley amendment because by doing so I believe I am supporting the vital effort to find a solution to this critical link in our Nation's energy policy.

Mr. BRADLEY. Madam President, how much time remains on the side of the proponents?

The PRESIDING OFFICER. The Senator has 12 minutes.

Mr. BRADLEY. I yield 5 minutes to the Senator from Massachusetts.

VIOLENCE IN AMERICA

Mr. KENNEDY. Madam President, I am saddened, as I am sure all of the Members of this body are, at the news of the attack on President Reagan. I know all of us are relieved that he has not been hurt, and I think all of us feel a sense of sadness and grief about the wounds inflicted on Mr. Brady. All Americans now pray for his recovery and for the recovery of others who were hurt in the incident.

My family has been touched by violence. Year after year in recent times we have seen violence in this country: My brother John Kennedy and my brother Robert Kennedy, Martin Luther King, Medgar Evers, George Wallace, Al Lowenstein, Vernon Jordan, the attack or the attempted attack on President Ford, and now the attack on President Reagan.

All of us understand that all of these good individuals had a common purpose. That was to make this a better country. All of them were committed to the public interest for the people of this Nation, and for the better good of mankind throughout the world.

Violence and hatred have no place in our society or in our country. They know no partisanship, they know no party, they know no rationality. Nonetheless, we see it continue in our society and in our country.

All of us who care about this country and who care about our fellow citizens bear an important responsibility in whatever way we possibly can to rid this society and to rid this country of the kind of violence and hatred that we have seen.

Violence and hatred are alien to everything that this country is about. It does not bring about a change in policy. It is alien to what is best in our Nation.

With our prayers for those who have been wounded today must go our resolution to rid our society of violence and to commit ourselves to do everything that we possibly can to eliminate hatred and the causes which contribute to hatred in our society.

BUDGET RESOLUTION OF RECONCILIATION AND INSTRUCTION

The Senate continued with the consideration of the concurrent resolution.

Mr. KENNEDY. Madam President, I am rising in support of the amendment of the Senator from New Jersey.

I believe that protecting our Nation's energy security is a critical element of our national security efforts. Building a strong strategic petroleum reserve is essential to healing our economy, protecting the Nation from future oil cutoffs, and securing our interests in the Middle East.

In the past 8 years no single factor has been more damaging to our economy than the dramatic increase in oil prices caused in large part by the OPEC cartel. Huge rises in oil prices have severely damaged the economies of the Western World. The round of prices set off by the 1979 Iran shutdown wiped out the equivalent of 3 years of economic growth in the OECD nations.

A large strategic petroleum reserve is critical to protecting our economy and making possible renewed economic growth in the West. If a large reserve existed, the price jumps could be prevented by bringing oil from the reserve to the market, and preventing the spot market from driving up oil prices to astronomical levels.

A large strategic petroleum reserve is also critical to protecting our Nation from cutoffs. The experts may debate the most effective methods of achieving emergency reductions in oil demand if there is a cutoff. But all the experts agree—and commonsense makes clear—that pumping oil from a reserve is the most effective immediate protection of all. Every major examination of this issue has concluded that a large reserve—even with its very significant expense—is the most cost-effective energy security program in the Federal Government.

Finally, building a strong strategic petroleum reserve is critical to our position in the Middle East and to the security of our most important ally in that region—Israel. When the reserve is filled, there can be no question about our commitment to protect Israel's security.

I am very concerned that this administration cannot seem to make up its mind about the strategic petroleum reserve. First, it asked for the necessary funds. Then the Budget Committee, which has done the administration's bidding on almost every occasion, removed those funds. When the Senator from New Jersey announced that he was going to offer an amendment to restore the funds that the administration had originally requested, the administration announced that it would not support his amendment.

I hope that these new proposals to fund the strategic reserve will work. But I am not willing to gamble this critical energy security program on unproven schemes.

I believe, we must fill the strategic petroleum reserve without delay. We will not settle for a strategic reserve in name only. There can be no retreat from that commitment.

Mr. DOMENICI. Madam President, I assume no time has been yielded in opposition at this point, is that correct?

The PRESIDING OFFICER (Mrs. KASSEBAUM). The Senator is correct.

Mr. DOMENICI. Madam President, let me just say to the Senate on this issue which is before us, the amendment that the good Senator from New Jersey offers, everyone should understand in addition to returning $3 billion to SPRO does not in any way cut any of the other committee recommendations so that basically we now reach that point if the Senate buys and adopts this amendment. We took a great deal of pride in the fact that we were going to at least come up with as many savings in terms of dollars, quantity, that would at least be equivalent to the President's method. Everyone knows if this method is adopted we will not have done that. We will now

have accomplished less than he. I will get the exact number on how much we have now failed to come up with in savings that are equivalent to the President. I will inform everyone on that.

Basically, without being overly dramatic, this is, in a very real sense, the first amendment that really has a chance of destroying the objective that we had in mind when we produced this resolution.

I know that there are those who will say, what does that matter? Let me say to all my colleagues, no matter what we look at over the next 2 years, if we want to argue with the new macroeconomics, if we want to argue with the new additions to defense, the truth of the matter is that to get where we have to be by 1984, at least the basic part that the President sent us up front must be accomplished. There may be latitude in the next 2 or 3 years to argue about how much is adequate for defense. There may be room to argue about whether the economic assumptions are correct or not, but I can guarantee that we are not going to get where we have to be unless the basic package that the President sent us is at least given an honest chance to get by both bodies.

If this amendment is adopted, we shall be below the President for the first time since we brought this resolution to the floor.

Very simply, Madam President, the Senator from New Mexico has heard all the arguments about the importance of the strategic petroleum reserve. I have been a staunch advocate of our doing as much as we can to put into some kind of reserve oil that would buttress the American economy in the event of a disaster such as a 20-percent shortfall, which is brought about by the activities of other countries or by some kind of activities that prevent the flow of energy in the world markets. But that does not mean that those who want to support the Budget Committee's resolution are without concern. What it says is that if this amendment passes, we shall have put $14 billion at the disposal of a strategic petroleum reserve and that, for 2½ years of that reserve's life, almost 3, it will have plenty of money.

Some Senators said it is going to be strangled. Well, it was not strangled over the years; it was just the Government being unable to decide how to do it. The management of the reserve was in chaos. I submit that, even today, it is not in the best shape.

We shall leave, if the Senate defeats the Bradley amendment, $1,047,000,000 into the 1981 fiscal year for acquisition of oil. We shall have substantial quantities in 1981.

We shall even let the Appropriations and other committees of jurisdiction work their will on that package, on that amount of money. They can expedite the daily fill, but if they do not and they keep it where it is, we have 1½ years at today's fill rate to decide whether there is a better way, an alternative and option to the approach which has not worked.

We knew we ought to have reserves. But we just think that American ingenuity, the American financial community, the American companies, if given an opportunity and if they are told this kind of reserve is not going to be the order of the day unless there is no other way, within a short period of time—not a year and a half, which is what we provided money for—there will be a better way than to continue to invest billions of dollars in the ground when we really do not have to and still have a reserve.

So, Madam President, I hope that all those Senators that voted against the Stevens amendment because it added $1.5 billion that is not necessary will vote again not to put $3 billion back this time.

This one will break our goal. It will break it absolutely. Then we shall have other amendments that will follow it here, on the floor, and there will be little chance that we can leave this floor with the kind of resolution we started with.

I do not want the Senator from New Jersey to think that I am not mindful of his concern. I am. I, too, am concerned. I am just convinced that if we squeeze this committee down, American ingenuity will find an option and we shall have a good, solid reserve, without $14 billion buried in the ground.

Mr. President, I reserve the remainder of my time.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

NINTH ANNUAL REPORT ON FEDERAL ADVISORY COMMITTEES—MESSAGE FROM THE PRESIDENT—PM 40

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with an accompanying report; which was referred to the Committee on Governmental Affairs:

To the Congress of the United States:

In accordance with the provisions of Section 6(c) of the Federal Advisory Committee Act, I am pleased to transmit the Ninth Annual Report on Federal Advisory Committees.

This Report, which was prepared by the General Services Administration, summarizes the activities, status, and changes in the composition of Federal Advisory Committees for calendar year 1980.

On January 22, 1981, I directed all Executive departments and agencies to reduce obligations for advisory committees by five percent for 1981. As part of the annual review of advisory committees, which will begin in April, we will scrutinize the activities and responsibilities of each advisory committee to determine whether it should be renewed or abolished.

RONALD REAGAN.

THE WHITE HOUSE, *March 30, 1981.*

MESSAGE FROM THE HOUSE

ENROLLED BILL SIGNED

At 12:40 p.m., a message from the House of Representatives delivered by Mr. Gregory, one of its reading clerks, announced that the Speaker has signed the following enrolled bill:

S. 509. An act to amend section 201 of the Agricultural Act of 1949, as amended, to delete the requirement that the support price of milk be adjusted semiannually.

The bill was subsequently signed by the President pro tempore (Mr. THURMOND).

The message also announced that the House has passed the following joint resolutions in which it requests the concurrence of the Senate:

H.J. Res. 84. Joint resolution designating the week of October 4 through October 10, 1981, as "National Diabetes Week".

H.J. Res. 155. Joint resolution to authorize and request the President to issue a proclamation designating May 3 through May 10, 1981, as "Jewish Heritage Week".

H.J. Res. 182. Joint resolution to designate April 26, 1981, as "National Recognition Day for Veterans of the Vietnam Era".

HOUSE BILLS REFERRED

The following joint resolutions were read twice by their titles and referred as indicated:

H.J. Res. 84. Joint resolution designating the week of October 4 through October 10, 1981, as "National Diabetes Week"; to the Committee on the Judiciary.

H.J. Res. 155. Joint resolution to authorize and request the President to issue a proclamation designating May 3 through May 10, 1981, as "Jewish Heritage Week"; to the Committee on the Judiciary.

HOUSE JOINT RESOLUTION PLACED ON CALENDAR

The following joint resolution was read twice and placed on the calendar:

H.J. Res 182. Joint resolution to designate April 26, 1981, as "National Recognition Day for Veterans of the Vietnam Era".

ENROLLED BILL PRESENTED

The Secretary of the Senate reported that on today, March 30, 1981, he had presented to the President of the United States the following enrolled bill:

S. 509. An act to amend the Agricultural Act of 1949, as amended, to delete the requirement that the support price of milk be adjusted semiannually.

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-781. A communication from the Acting Administrator of the Veterans Administration, transmitting a draft of proposed legislation to amend title 38, United States Code, to extend authority to provide contract hospital care and medical services in Puerto Rico and the Virgin Islands, and for other purposes; to the Committee on Veterans' Affairs.

EC–782. A communication from the Acting Administrator of the Rural Electrification Administration, transmitting, pursuant to law, notice of an approval of a guaranteed non-REA loan to the Western Farmers Electric Cooperative of Anadarko, Oklahoma; to the Committee on Agriculture, Nutrition, and Forestry.

EC–783. A communication from the Acting Administrator of the Environmental Protection Agency transmitting a draft of proposed legislation to extend the Federal Insecticide, Fungicide, and Rodenticide Act for two years; to the Committee on Agriculture, Nutrition, and Forestry.

EC–784. A communication from the Principal Deputy Assistant Secretary of Defense, Office of the Comptroller, transmitting, pursuant to law, a listing of contract award dates for the period March 15 to June 15, 1981; to the Committee on Armed Services.

EC–785. A communication from the Secretary of the Panama Canal Commission, transmitting a draft of proposed legislation to authorize appropriations for the Commission for fiscal years 1982 and 1983; to the Committee on Armed Services.

EC–786. A communication from the Deputy Assistant Secretary of Defense for Military Personnel Policy, transmitting, pursuant to law, a report on special pay for duty subject to hostile fire; to the Committee on Armed Services.

EC–787. A communication from the General Counsel of the Department of Defense, transmitting a draft of proposed legislation entitled "the Department of Defense Authorization Act, 1982; to the Committee on Armed Services.

EC–788. A communication from the Acting General Counsel for the Department of Energy transmitting a draft of proposed legislation to authorize appropriations for conservation, exploration, development, production, sale, and use of naval petroleum reserves and naval oil shale reserves for fiscal year 1982 and fiscal year 1983; to the Committee on Armed Services.

EC–789. A communication from the Acting General Counsel for the Department of Energy, transmitting a draft of proposed legislation to authorize appropriations for the Department of Energy for national security programs for fiscal year 1982 and fiscal year 1983; to the Committee on Armed Services.

EC–790. A communication from the Acting Assistant Secretary of the Air Force, transmitting, pursuant to law, a study with respect to converting the commissary shelf-stocking and custodial services function at Fairchild Air Force Base, Washington and a decision with respect thereto; to the Committee on Armed Services.

EC–791. A communication from the Secretary of the Army, transmitting, pursuant to law, notification that the U.S. Army intends to initiate the disposal of chemical agent identification sets at Rocky Mountain Arsenal, Colorado, on or about 13 April 1981; to the Committee on Armed Services.

EC–792. A communication from the Acting Director of the Federal Emergency Management Agency, transmitting a draft of proposed legislation to authorize appropriations for studies under the National Flood Insurance Act of 1968 for the fiscal years 1982 and 1983; to the Committee on Banking, Housing, and Urban Affairs.

EC–793. A communication from the Comptroller General, transmitting, pursuant to law, a report entitled "Federal Budget Concepts And Procedures Can Be Further Strengthened"; to the Committee on the Budget.

EC–794. A communication from the President of the Communications Satellite Corporation, transmitting, pursuant to law, the Seventeenth Annual Report to the President and the Congress on the operations, activities, and accomplishments of the Communications Satellite Corporation; to the Committee on Commerce, Science, and Transportation.

EC–795. A communication from the Under Secretary of the Interior, transmitting a draft of proposed legislation to amend the Marine Mammal Protection Act of 1972 to extend the authorization of appropriations; to the Committee on Commerce, Science, and Transportation.

EC–796. A communication from the Vice President of the National Railroad Passenger Corporation, transmitting, pursuant to law, information concerning the operation of AMTRAK for the month of January, 1981; to the Committee on Commerce, Science, and Transportation.

EC–797. A communication from the Vice President of the National Railroad Passenger Corporation, transmitting, pursuant to law, the National Railroad Passenger Corporation's legislative recommendations; to the Committee on Commerce, Science, and Transportation.

EC–798. A communication from the Under Secretary of the Interior, transmitting a draft of proposed legislation to amend the previously submitted draft constitution for the Virgin Islands; to the Committee on Energy and Natural Resources.

EC–799. A communication from the Acting Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Issues In Leasing Offshore Lands For Oil And Gas Development"; to the Committee on Energy and Natural Resources.

EC–800. A communication from the Acting Administrator of the General Services Administration, transmitting, pursuant to law, a report on building projects survey for Traverse City and Mount Pleasant, Michigan; to the Committee on Environment and Public Works.

EC–801. A communication from the Acting Administrator of the General Services Administration, transmitting, pursuant to law, a report on a building project survey for Bakersfield, California; to the Committee on Environment and Public Works.

EC–802. A communication from the Acting Administrator of the United States Environmental Protection Agency, transmitting a draft of proposed legislation to authorize appropriations for environmental research, development, and demonstrations for fiscal years 1982 and 1983; to the Committee on Environment and Public Works.

EC–803. A communication from the Acting Administrator of the United States Environmental Protection Agency, transmitting a draft of proposed legislation to amend and extend Title I of the Marine Protection, Research, and Sanctuaries Act, as amended; to the Committee on Environment and Public Works.

EC–804. A communication from the Chairman of the United States Nuclear Regulatory Commission, transmitting, pursuant to law, a report on contract activity under section 11 of Public Law 95–601 for fiscal year 1980; to the Committee on Environment and Public Works.

EC–805. A communication from the Fiscal Assistant Secretary of the Treasury, transmitting, pursuant to law, the third annual report on the financial conditions and results of the operation of the Black Lung Disability Act; to the Committee on Finance.

EC–806. A communication from the Acting Director of the International Communication Agency, transmitting a draft of proposed legislation to authorize appropriations for the International Communication Agency for fiscal years 1982 and 1983; to the Committee on Foreign Relations.

EC–807. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, legislation adopted by the Council on March 10, 1981; to the Committee on Governmental Affairs.

EC–808. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, legislation adopted by the Council on March 10, 1981; to the Committee on Governmental Affairs.

EC–809. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, legislation adopted by the Council on March 10, 1981; to the Committee on Governmental Affairs.

EC–810. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, legislation adopted by the Council on March 10, 1981; to the Committee on Governmental Affairs.

EC–811. A communication from the Acting Chairman of the Equal Employment Opportunity Commission, transmitting, pursuant to law, a report on a proposed new system of records for the Commission for implementing the Privacy Act; to the Committee on Governmental Affairs.

EC–812. A communication from the Acting Comptroller General of the United States, transmitting, pursuant to law, a list of reports transmitted to the Congress during February 1981; to the Committee on Governmental Affairs.

EC–813. A communication from the Acting Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Funding Gaps Jeopardize Federal Government Operations"; to the Committee on Governmental Affairs.

EC–814. A communication from the Chairwoman of the Merit Systems Protection Board, transmitting, pursuant to law, the annual report on the activities of the Board under the Freedom of Information Act for calendar year 1980; to the Committee on the Judiciary.

EC–815. A communication from the Secretary of Housing and Urban Development, transmitting, pursuant to law, the annual report on the activities of the Department under the Freedom of Information Act for calendar year 1980; to the Committee on the Judiciary.

EC–816. A communication from the Acting Chairman of the Securities and Exchange Commission, transmitting, pursuant to law, the annual report on the activities of the Commission under the Freedom of Information Act for calendar year 1980; to the Committee on the Judiciary.

EC–817. A communication from the Acting Commissioner of the Immigration and Naturalization Service, Department of Justice, transmitting, pursuant to law, a report on the temporary admission of certain aliens under section 212(d)(3) of the Immigration and Nationality Act; to the Committee on the Judiciary.

EC–818. A communication from the Chairman of the Federal Council on Aging, transmitting, pursuant to law, a report on programs conducted under the 1978 amendments to the Older Americans Act that were directed by the Congress; to the Committee on Labor and Human Resources.

EC–819. A communication from the Director of the National Science Foundation, transmitting a draft of proposed legislation to authorize appropriations for the National Science Foundation for fiscal years 1982 and 1983; to the Committee on Labor and Human Resources.

EC–820. A communication from the Secretary of Education, transmitting, pursuant to law, final regulations for Financial Assistance to Local and State Agencies To Meet Special Educational Needs; and Financial Assistance to Local Educational Agencies for Children with Special Educational Needs. Amendments to Title I, Elementary and Secondary Educa-

tion Act of 1965; to the Committee on Labor and Human Resources.

EC–821. A communication from the Acting Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Weak Internal Controls Make the Department of Labor and Selected CETA Grantees Vulnerable to Fraud, Waste, and Abuse"; to the Committee on Labor and Human Resources.

PETITIONS AND MEMORIALS

The following petitions and memorials were laid before the Senate and were referred or ordered to lie on the table as indicated:

POM–50. A petition from a citizen of Penn Yan, N.Y., favoring congressional cooperation with the efforts of the Reagan administration to strengthen the military power of the United States; to the Committee on Armed Services.

POM–51. A concurrent resolution adopted by the Legislature of the State of North Dakota; to the Committee on the Budget:

"HOUSE CONCURRENT RESOLUTION No. 3037

"Whereas, inflation is crippling and devastating the economies of both the state of North Dakota and of the United States; and

"Whereas, one of the causes of inflation is deficit spending by the federal government; and

"Whereas, each year during which the federal budget is not balanced results in increasing the national debt; and

"Whereas, fiscal discipline is needed to restore financial responsibility at the national level;

"Now, therefore, be it resolved by the House of Representatives of the State of North Dakota, the Senate concurring therein: That the Forty-seventh Legislative Assembly urges the Congress of the United States to reduce federal spending and balance the federal budget; and

"Be it further resolved, That copies of this resolution be sent to the speaker and clerk of the United States House of Representatives, the president and the secretary of the United States Senate, and each member of the North Dakota Congressional Delegation."

POM–52. A petition from a citizen of Silver Spring, Md., urging fiscal responsibility by the Federal Government; to the Committee on the Budget.

POM–53. A petition from a citizen of Granite City, Ill., favoring action to end the United States hunt for fur seals; to the Committee on Foreign Relations.

POM–54. A joint resolution adopted by the Legislature of the State of Nevada; to the Committee on the Judiciary:

"ASSEMBLY JOINT RESOLUTION No. 6

"Whereas, After many years of negotiation, the states of California and Nevada reached final agreement in 1971 on the California-Nevada Interstate Compact; and

"Whereas, In developing the Compact the Joint California-Nevada Interstate Compact Commission met 62 times between 1956 and 1968, and separately the Nevada Compact Commission held 137 meetings and the California Compact Commission held 75 meetings between 1955 and 1972; and

"Whereas Several special committees were formed to consider special problems, including the Joint Truckee River Committee, which met 22 times, the Joint Carson River Committee, which met 31 times, the Joint Walker River Committee, which met 26 times, the Joint Lake Tahoe Committee, which met 16 times, and the Joint Engineering-Legal Committee, which met 10 times; and

"Whereas, Other special committees included those on drafting, definitions and water rights, and committees to consider comments received from federal agencies and to explain the compact to interested persons; and

"Whereas, The Nevada Compact Commission expended $387,000 from the state general fund between 1956 and 1972 and the California Compact Commission was appropriated $857,000 between 1956 and 1969 and spent additional funds to employ consultants; and

"Whereas, Under section 10 of Article I of the Constitution of the United States, and as provided in article 22 of the compact, ratification by the Congress of the United States is required before the compact may become effective; and

"Whereas, Valuable natural resources would be conserved and important agricultural interests would be benefited by congressional ratification; now, therefore, be it

"Resolved by the Assembly and Senate of the State of Nevada, jointly, That the Nevada legislature urges the Congress of the United States to ratify the California-Nevada Interstate Compact; and be it further

"Resolved, That copies of this resolution be immediately transmitted by the legislative counsel to the Vice President of the United States as presiding officer of the Senate, to the Speaker of the House of Representatives, and to all members of the Nevada congressional delegation; and be it further

"Resolved, That this resolution shall become effective upon passage and approval."

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. DANFORTH (for himself and Mr. EAGLETON):

S. 827. A bill to change the names of a dam and reservoir on the Salt River, Missouri, from the "Clarence Cannon Dam and Reservoir" to the "Clarence Cannon Dam and Mark Twain Lake;" to the Committee on Environment and Public Works.

By Mr. JOHNSTON:

S. 828. A bill to declare and recognize the vital importance of ports and harbors to this country's economy and energy self-sufficiency, and to authorize expeditious construction of essential river and harbor improvements in order to promote domestic commerce and U.S. export capabilities for coal, agricultural commodities, manufactured goods for export, and other commodities; to the Committee on Environment and Public Works.

By Mr. BAUCUS:

S. 829. A bill to amend the Internal Revenue Code of 1954 to provide for cost-of-living adjustments in annuities for survivors of tax court judges; to the Committee on Finance.

By Mr. ROBERT C. BYRD:

S.J. Res. 59. Joint resolution designating the square dance as the national folk dance of the United States; to the Committee on the Judiciary.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. DANFORTH (for himself and Mr. EAGLETON):

S. 827. A bill to change the names of a dam and reservoir on the Salt River, Mo., from the "Clarence Cannon Dam and Reservoir" to the "Clarence Cannon Dam and Mark Twain Lake"; to the Committee on Environment and Public Works.

RENAMING THE CLARENCE CANNON DAM AND RESERVOIR

● Mr. DANFORTH. Mr. President, today I am introducing legislation to change the name of the Clarence Cannon Dam and Reservoir, on the Salt River in Missouri, to the Clarence Cannon Dam and Mark Twain Lake.

This change has been sought by the residents of the area, who commonly refer to the dam and lake in those terms already. Additionally, the change is supported by Clarence Cannon's two daughters, his only children.

I am joined in sponsoring this legislation by my colleague from Missouri, who introduced a similar bill in the previous Congress, and I am hopeful that speedy passage will be achieved.●

By Mr. JOHNSTON:

S. 828. A bill to declare and recognize the vital importance of ports and harbors to this country's economy and energy self-sufficiency, and to authorize expeditious construction of essential river and harbor improvements in order to promote domestic commerce and U.S. export capabilities for coal, agricultural commodities, manufactured goods for export, and other commodities; to the Committee on Environment and Public Works.

PORTS AND NAVIGATION IMPROVEMENT ACT OF 1981

● Mr. JOHNSTON. Mr. President, today I send to the desk a bill which I, and several of my colleagues, believe is of vital importance to the economic well-being of our Nation's ports and harbors and our very ability to compete successfully in the world trade arena.

This bill declares and recognizes the vital importance of ports and harbors to this country's economy and national defense, and the world's economy and energy self-sufficiency, and authorizes expeditious construction of essential river and harbor improvements in order to promote domestic commerce and U.S. export capabilities for coal, agricultural commodities, manufactured goods for export, and other commodities.

My good friend and colleague from Virginia, Senator WARNER, also recognizes the urgency of this situation and will himself introduce legislation on this subject in the near future.

This Nation has over 30 percent of the world's proven reserves of coal. As other countries look ever more closely at the United States as a stable and reliable source for coal, our transportation system is the one major area where we lack the ability to provide that reliable source. This bill will provide the impetus to correct that deficiency and will indicate to our trading partners that we are serious in our purpose to upgrade our ports and harbors to handle the ever-increasing foreign demand for United States coal and other commodities.

We must act and act quickly if we are truly serious in our desire to improve our export capability. This bill is the first step.

IMPROVEMENT OF U.S. HARBORS AND WATERWAYS

The United States presently faces a challenge which will assume immense importance to the Nation over the re-

maining decades of this century. Stated most simply, it is comprised of the following elements:

The industrial nations of the world, because of constraints resulting from high cost of petroleum, are moving in many instances to coal-based industrial energy, and doing so at a rate much greater than had been anticipated.

The United States possesses vast supplies of both metallurgical and steam coal, and is the logical and preferred export supplier in the view of many nations, because of its advanced technology, guaranteed supply, and political and economic stability.

Notwithstanding the existence of factors which inherently favor this Nation as a major world supplier, it has failed over recent decades to keep pace with the changing maritime developments of this period—particularly the move to jumbo commodity carriers requiring deep-draft harbors and advanced dockside or in-harbor cargo handling equipment.

This condition will shortly render the United States increasingly noncompetitive with other coalexporting nations unless steps are taken immediately to render key U.S. harbors capable of accommodating large seagoing carriers (from 60,000 to 100,000+ deadweight tons) which transport such products as coal, grain, and other dry commodities important to U.S. commerce.

Although the most visible present manifestation of this problem is the inadequacy of loading facilities (which has caused unprecedented traffic jams in U.S. ports, chiefly by ships waiting to load coal for export markets), this is a temporary problem which the collaboration of industry and local government is effectively solving. The basic problem remains, however—the inability of supercolliers and other jumbo cargo vessels to navigate fully loaded into or out of U.S. seaports. This inability severely penalizes U.S. products carried on such vessels by increasing freight costs per ton to levels which can make the commodity being carried dangerously noncompetitive.

There is underway at present an upgrading program conducted by the Federal agency responsible for maintaining the Nation's harbors and waterways—the U.S. Army Corps of Engineers—designed to identify U.S. harbors in need of upgrading, to provide criteria against which such harbors must qualify, and to provide—upon the satisfaction of such criteria—for the actual dredging and other work required to render the harbors capable of handling the jumbo vessels which today make up a significant portion of international ocean commerce.

This program, designed in a preenergy crisis era and at a time when the United States still enjoyed a virtually "automatic" favorable balance of payments, is not presently capable of meeting essential timetables to permit the United States to recapture and maintain a dominant role in today's highly competitive world trade—not only in coal, but in other basic U.S. export commodities as well.

Legislation to foreshorten the qualification process and accelerate the actual work of deepening channels and harbors critical to U.S. trade, national defense, and balance of payments is pending in the current Congress. It requires rapid and favorable committee consideration, floor action, and executive branch approval and implementation.

The United States is the world's leader. It has—and should—at each point in contemporary history been the leader in developing those technologies and meeting those needs most important to the Nation and to the world community of which it is such a vital part. Today it should move rapidly to assume a position of unquestioned leadership in the modern and efficient production, transportation, handling, and export of a commodity in which it is rich and for which a vast and, as yet, unpredictable level of growth is clearly developing in world demand—coal.

If this country elects to meet this challenge it must, as a first and most vital step, make possible U.S. compatibility with today's generation of jumbo oceangoing vessels, whose economies of scale can help establish a U.S. competitive advantage largely unattainable by other exporting nations.

The resultant trade can and will offset the losses of U.S. exchange occasioned by continuing imports of foreign oil and can bring about conditions in increasing numbers of nations under which such oil imports will be less and less significant. Action of the type proposed herein can demonstrate forcefully and soon that the crisis condition which many nations are experiencing as a result of OPEC oil pricing need not exist—that it can be reversed, and reversed dramatically.

Such reversal is doable. It is doable largely by the United States, if this country so elects. It is doable now—not at some indefinite point in the future. The virtual fate of industrialized society should not lie in the hands of those who are alien to many of its most basic precepts. It should repose in those hands in which it has already attained a level unprecedented in world history—those of the industrialized nations, and principally the United States, which invent, manufacture, and control the technology—and thus the quality of modern life—of our entire planet.

SCOPE OF INTERNATIONAL COAL TRADE

The growth of U.S. exports of coal over the past few years, however significant, is greatly eclipsed by export projection levels for the next two decades. Actual U.S. exports of coal in 1979 totaled 66 million tons. Projections for the year 2000—only two decades from now—vary widely, but range from as low as 200 percent over current levels to upward of 600 percent or more. Responsible estimates of 250 to 400 million tons or more in exports by year 2000 are common, and form the basis for much of the industrial planning occurring in the United States today.

The U.S. capability to produce, both for domestic consumption and for export, virtually unlimited quantities of coal, responsive to whatever levels of demand may arise, derives from this Nation's position as possessor of some 60 percent of the world's known coal reserves—enough coal to last for years present levels of production and export. By way of contrast, the Kingdom of Saudi Arabia possesses some 5 percent of the world's known oil reserves.

Considering the proportions of trade from the standpoint of principal coal importing nations, the world's major coal importing region—Western Europe—is projected to import coal over the coming decades at a high, totally unprecedented level. In 1977, this area—chiefly France, the United Kingdom, Netherlands, and Belgium/Luxembourg—imported 2 million tons.

Estimates projected for the year 2000 anticipate Western European imports of some 333 million tons—an increase of some 900 percent over the 1977 level. Even more dramatic is the increase projected for Japan—121 million tons of such coal imports by year 2000, an increase of more than 6,000 percent.

In 1980, movements of metallurgical coal through U.S. ports were 28 percent above the 1979 level; steam coal exports were up 100 percent over 1979 levels. The latter figure illustrates that development which presents both greatest change, and the greatest challenge, to U.S. producers and exporters of coal. Historically, U.S. coal exports have consisted chiefly of those coals particularly suited to metallurgical use. These have come almost exclusively from the eastern fields, principally those in Appalachia. In recent years, such metallurgical coal exports have chiefly gone to fuel Japan's booming steel industry.

This traditional pattern is changing rapidly. Continuing rises in the cost of bunkering fuel for maritime vessels have made U.S. coal more attractive to Western Europe than that imported from the traditional but more remote exporting countries, such as Australia and South Africa. In consequence, U.S. steam coal—heretofore not a significant item of this country's export trade—is increasingly being imported into Western Europe from U.S. sources. Led by France, the United Kingdom, and the Benelux countries, Western European nations have been responsible for a distinct change in the longstanding U.S. export pattern, and it is expected that steam coal—including that from the expanding U.S. western coalfield production—will continue to grow in importance and ultimately will constitute a major portion of anticipated high U.S. export levels over coming decades.

This will be true, however, only if the United States acts immediately to upgrade its harbors. South Africa, Australia, and Canada, recognizing the possibility of U.S. attainment of coal exporting supremacy because of long-haul economics and other factors which impact their exporting capability, are already engaged in extensive government-instigated and financed programs of harbor upgrading. Completion of these programs will expand significantly the

ability of these coal exporting competitors of the United States to compensate—through economies of scale—for the advantages of proximity to markets held by the United States. To retain a competitive position in the greater part of the world coal trade over the coming two decades, the United States must move swiftly to render its own major coal exporting ports capable of accommodating, at full load levels, the jumbo dry bulk carriers—including, particularly, supercolliers—which today carry an increasingly significant portion of the world's ocean trade in coal.

The urgency with which other coal exporting countries are viewing the task of improving their harbors relates directly to immediate concerns of importing countries. There is a move by major coal importing nations to contract for coal supplies as far into the future as possible, taking advantage of a present abundance of uncommitted production. The largest coal importing country in Western Europe—France—has expressed through both official and commercial spokesman a reluctance to enter into such long-term agreements with U.S. producers until firm assurance is available that those eastern seaboard and gulf coast seaports through which most Europe-bound coal exports clear will be upgraded in the immediate future to accommodate fully-loaded supercolliers and other jumbo bulk dry commodity carriers. In the absence of such assurances, or in a climate in which the determination of the U.S. Government to undertake such necessary upgrading is seen as equivocal, the willingness of major coal importers to enter into substantial contracts for the delivery of American coal becomes highly questionable.

PROJECTED EXPORT LEVELS

Coal shipments abroad by all of the world's exporting nations are expected to total by year 2000 the equivalent of approximately 927 million tons, as follows:

	Tons
United States	350,000,000
Australia	200,000,000
Republic of South Africa	100,000,000
Canada	67,000,000
All other nations	210,000,000
Total	927,000,000

While there is frequently disagreement over the accuracy of any given set of projections, there is general agreement that increase of both production and international traffic in coal will be by a factor of several hundred percent at the very least. More important, there is agreement that present distribution of share of the export market is likely to change markedly among the world's coal exporting nations—partly in response to variations in geographic proximity of exporter to importer, because of fuel costs associated with ocean shipment; and, more significantly even, in favor of those nations most able to ship in jumbo-carrier bulk quantities from ports which can accommodate the drafts of such vessels and which can load them rapidly and economically.

It is not overstatement to say, concerning those nations which move to establish such a capability, that in securing the major share of world coal exports, "no others need apply."

Those nations, such as South Africa, Australia, and Canada, which are moving swiftly to upgrade coal and other dry bulk handling facilities, and of even greater long-term importance, to dredge and otherwise improve those seaports and their access channels most proximate to internal transport systems serving areas of principal coal production, are those nations which in the coming decades will capture and retain the greater part of the expanded world trade in coal. To function as a major world supplier, the United States will be obliged not only to accomplish such dredging and other upgrading itself, but must do so with the utmost speed.

In the face of rapid changes being accomplished already by coal exporting nations in their harbor configurations, it is evident that the present shares of market enjoyed by coal-exporting nations can in no way be assumed or assured. For instance, it is projected that three Commonwealth countries alone—Australia, South Africa, and Canada—together by the year 2000 will export an estimated 367 million tons of coal—a level in excess of Western Europe's projected imports by that date. Similarly, U.S. exports are seen as exceeding levels of the same Western European import projections by year 2000.

The primary significance of these projections is simply that no worldwide shortage of coal is foreseen over coming decades. In consequence, a commodity trade which is already highly competitive will become even more so. A major—indeed, a critical—factor in this Nation's ability to compete successfully will be how rapidly and how effectively it places its key coal exporting harbors into competitive position through upgrading to accommodate jumbo seagoing bulk commodity carriers.

SHIFTING U.S. PRODUCTION PATTERNS

A shift in production patterns within the United States, evident for more than a decade, is likely to alter significantly the economics of coal export. Presently, the bulk of U.S. coal export tonnage moves through the Hampton Roads/Newport News or Baltimore port areas. Proximity to the chief types of coal most commonly exported in the past, most of which has been produced in the Appalachian coal fields served by the Norfolk & Western Railroad and the Chessie System, has made these two port areas a natural outlet for export shipments.

Two developments are changing this pattern. The first is the upsurge in U.S. exports of steam coal, particularly to Western Europe; the second is the growth of Western coalfield production in the United States as a percentage of overall production.

In the 20-year period from 1965 to 1985, the geography of coal production in this country has changed, or is projected to change, as follows:

PERCENTAGE OF TOTAL U.S. PRODUCTION

Year	Eastern U.S. fields (east of Mississippi)	Western U.S. fields (west of Mississippi)
1965 (actual)	95	5
1975 (actual)	83	17
1985 (projected)	60	40

This growth in Western production is expected to have significant impact on the export traffic moving through gulf and west coast ports. With much of such production, as well as that from the Eastern Interior Basin (southern Illinois, western Kentucky) and Appalachia accessible to the complex of navigable waterways which drain the entire midcontinent and are tributary to the Mississippi, increased coal traffic down the Mississippi corridor is a distinct likelihood, and it is probable that the New Orleans and Baton Rouge areas will become significant coal-exporting ports. Similarly, such west coast ports as Long Beach and others presently undergoing the upgrading process will experience an increase in the volume of coal traffic coming from the Western coal fields for shipment chiefly to the Far East.

Notwithstanding these shifts in the geographic distribution of U.S. coal production, their impact on U.S. export trade—potentially of major proportions—will not be felt unless a concerted Federal effort can be mounted to accelerate upgrading of U.S. seaports affected—on the west coast and gulf coast, whose ports will serve as export points for much of this new production, and on the eastern seaboard, already the Nation's principal export funnel and destined for further major increase as foreign imports—particularly in Western Europe—rise to expected levels.

THE SHALLOW PORT PROBLEM

General U.S. neglect of its harbor facilities in recent decades has placed it at a serious disadvantage with respect to operating convenience and economy which world maritime nations find in other countries whose harbor facilities have kept pace with the times. With the decline in American-flag vessels, and the emergence of foreign-flag maritime supremacy over this period, has come a comparable decline in the capability of American seaports to accommodate the new generation of supertankers and supercolliers increasingly common in world shipping.

Whatever its causes, the United States faces a severe problem of obsolescence in the capability of its major seaports to accommodate the current generation of bulk cargo carriers without lightloading or offshore loading required by inadequate harbor depths and/or inadequate loading/unloading facilities.

Today, faced with growing worldwide demand for coal—a commodity which the United States possesses in virtually unlimited supply and faced similary with continuing and growing demand for other bulk commodities—including grain, ores, and petrochemical products in which U.S. preeminence has long been established—the inadequacy of key U.S.

seaports to accommodate the carriers which today provide the chief means of transoceanic shipment of such commodities has become a major impediment to the assumption of a leading U.S. role in their export.

Nowhere is this situation more evident at the moment than in the case of coal. The familiar sight of colliers backed up by the scores or hundreds in the channels approaching the ports of Baltimore or Hampton Roads is a sharp reminder of the condition of desuetude in which U.S. ports today find themselves. Illustrative of the present-day "horror stories" encountered by foreign buyers seeking to purchase U.S. commodities is that of one French coal importer whose ships stood idle for 3 months in the harbor of Hampton Roads, Va., awaiting dockside coal-loading capability.

Another area seriously in need of rapidly accelerated upgrading is the 200-mile-long corridor of the lower Mississippi River embracing the ports of New Orleans and Baton Rouge. Dredging of some 21 miles above the mouth of the river and dredging bars upriver at some nine locations would create, in effect, a 100-mile-long seaport serving not only the constant flow of commodities presently reaching world markets through these ports, but expanded quantities of coal, grains, and other dry bulk commodities whose ocean freight costs in export trade would be greatly lessened by the ability of jumbo dry bulk carriers to load fully in this potentially vast seaport complex.

The lower Mississippi waterway is illustrative of a range of problems caused by past neglect of harbor depth and other necessary waterway maintenance, and serves as a useful case study in examining the plight of east and west coast U.S. ports as well.

Over the past decade—since 1970—the number of large vessels entering the lower Mississippi waterway—those of 60,000 deadweight tons or more—has increased from 23 ships in 1970 to more than 3,000 in 1979. Because such vessels, which fully loaded require drafts of 50 to 60 feet, can neither enter nor leave this major waterway without operating at light-load levels—to permit navigating the 40-foot depths encountered—their economies of scale are essentially lost, and the cost of shipping U.S. commodities to world markets can range as much as $9 or more per ton higher than would be the case if such vessels could operate at optimum depths. The disastrous effect of such a shipping cost differential on the competitive position in world trade of U.S. commodities—whether coal, grain, or other bulk commodities—is readily and appallingly obvious.

HARBOR IMPROVEMENT/UPGRADING

Existing statutory and congressional advisory actions convey to the U.S. Army Corps of Engineers sole responsibility for the maintenance and development of internal navigational waterways of the United States, and additionally provide for their dredging and other upgrading from time to time to meet the needs of commerce and the national defense.

The process of qualification for such dredging or other upgrading involves a "trigger" mechanism under which petitioning seaports, upon the completion of certain requirements, become eligible for Corps of Engineers action to dredge and provide other port development services related directly to the navigable waterways and their physical features and configurations.

At the present time, three U.S. seaports are in a position of advanced qualification for such upgrading by virtue of their progress in the completion of requisite actions—including cost effectiveness determinations, environmental impact assessment, among others. These are the Hampton Roads/Newport News (Norfolk) complex—harbor and channels; the Mobile, Ala., harbor; and the lower Mississippi channel from the gulf to Baton Rouge, La.

The latter area is that which has perhaps proceeded furthest toward qualification, with hearings conducted by the Corps of Engineers in late January 1981 on the project affecting the area, titled "Deep-Water Draft Access to the Ports of New Orleans and Baton Rouge, Louisiana." The proposal to accomplish upgrading of this important trade and shipping corridor was initiated in 1967 by resolutions of the Committees on Public Works of both the U.S. Senate and House of Representatives—an action taken because of the continuing increase in ocean-going commerce through the ports of Baton Rouge and New Orleans and the general world trend toward larger ocean-going ships.

ILLUSTRATIVE DREDGING PROGRAM: NEW ORLEANS-BATON ROUGE CORRIDOR

In the case of proposed dredging of the Mississippi channel between New Orleans and Baton Rouge to 55-foot depth, scheduled steps would be as follows (assuming, for purposes of illustration, mid-1980 startup):

Dates and Steps

July 1980, preliminary submission to Lower Mississippi Valley Division (Corps of Engineers) (LMVD) of Draft Report and Environmental Impact Statement (EIS).

October 1980, Public meeting on draft.

February 1981, Submission of final District Report and EIS to LMVD.

September 1982, Final planning, completion of EIS, final public hearings, and Congressional authorization.

December 1982, Authorization for construction.

December 1983, Preliminary 50-foot channel.

December 1985, Completion of 55-foot channel.

Dredging/upgrading in other port areas, subject to varying circumstances and requirements, would follow essentially the same scheduling approach, although—optimally—the actual time intervals involved would be highly compressed to permit accelerated dredging, particularly in the most vital coal-exporting regions, at a rate rapid enough to permit U.S. exporters to contract for major increments of the growing coal trade before such trade is preempted by exporting nations already possessed of deep-harbor and jumbo-carrier-handling capabilities.

OTHER HARBOR AREAS

In the process of upgrading are additional harbors on the Pacific coast—Long Beach, Puget Sound, and the Columbia River Basin, among others. Seaports on the Gulf of Mexico and Atlantic seaboard which have expressed interest in Corps of Engineers upgrading include Galveston, Lake Charles (La.), Savannah, Charleston, Philadelphia, and New York. As has been the case with Hampton Roads, Mobile, and New Orleans/Baton Rouge, criteria have been established under which other U.S. seaports can trigger advanced qualifications processes established both by statute and the Corps of Engineers, leading to dredging and other upgrading required to bring such harbors to a level of capability adequate to handle jumbo carriers of the world maritime fleet.

Existing criteria for such upgrading, it should be noted, have been in force for a number of recent years and do not necessarily reflect the tempo of national needs in the face of present circumstances and exigencies. While it would be inaccurate to describe the qualifications timetable as "leisurely," it is clearly susceptible of review and revision of time considerations, and legislation is presently before the Congress to accomplish marked acceleration of the total process in order to respond to world needs and to posture the United States favorably in the meeting of those needs.

ECONOMIC BENEFITS

In a national climate of growing fiscal conservatism, the cost benefits of any requested expenditure of Federal funds will be increasingly subject to critical scrutiny. As is indicated below, the cost/benefit ratio of upgrading selected U.S. harbors on an accelerated basis is exceptionally high, and merits both priority and prominence as an example of wise Federal investment. The Federal role in dredging, developing, and otherwise maintaining the Nation's waterways is long established by both statute and tradition. The exercise of such a role in the face of current challenges and opportunities, arising from a greatly expended production and export of U.S. coal, does not constitute Federal intrusion into the private sector but, rather, exemplifies that role which the Federal Government is best equipped to perform—that of facilitator.

The upgrading of key U.S. harbors to accommodate a worldwide return to the use of coal as an industrial energy base, by facilitating greatly expanded U.S. exports of that commodity, entails Federal expenditures already essentially committed. Foreshortening the requirements preliminary to such upgrading in order to accelerate the completion of the dredging work required simply concentrates such expenditures over a shorter time period.

The payback for such expenditures is substantial. The energy independence essential to the long-range security of the United States is brought much closer. The Nation's balance-of-payments deficit, which currently derives chiefly from U.S. oil purchases abroad, is reversed. Employment—both old jobs and new—

is stimulated in mining, transportation, and related industries. New and viable industries are established to accommodate the expanded traffic in coal—blending plants, coal terminals, among others—in many waterway areas serving the chief coal-exporting seaports.

BALANCE OF PAYMENTS

Because of the rapidity with which it occurs, reversal of the Nation's balance-of-payments deficit is likely to be the most dramatic and immediately beneficial payback from accelerated dredging of waterways essential to expanded coal export trade.

For reasons discussed elsewhere in this study, the United States is increasingly viewed by industrialized nations as the preferred long-range source of coal required to accomplish the reconversion of their energy bases from petroleum fuels. This preference will be converted to actual trade supremacy in coal, however, only if this Nation can compete in delivered cost with other coal-exporting nations. The ability of the United States to do so, as has been repeatedly stressed, is contingent on this country's ability to accommodate and fully load at dockside or bargeside those supercolliers comprising a large and growing part of the international coal-carrying fleet. This is something which the United States presently cannot do except in very limited degree.

OTHER PRODUCTS AND COMMODITIES

While coal is the most dramatic exemplar of the benefits which will be realized by upgrading rapidly those U.S. harbors which are already well along in the qualification process, this country's present major export—edible and industrial grains—will receive renewed impetus. Some present U.S. grain exports are already shipped in bulk carriers of 60,000 deadweight tons or greater, even though shipments outgoing from most U.S. ports are lightloaded (well below the rated capacity of such carriers) because of harbor/channel depth limitations.

Rapid dredging of harbors and channels in the major grain-exporting areas through which such traffic chiefly moves would not only permit the fuller loading of such vessels (at reduction in per-ton freight rates of major proportions) but would tend rapidly toward the use of additional such vessels in the grain export trade as the feasibility of doing so became apparent. The competitive advantages this would permit would have significant effect on the volume and direction of the U.S. trade in grain, already the Nation's leading export commodity.

Additional commodities—ores from the northern and western midcontinent, petrochemical products, and others—would similarly benefit in at least two ways from upgraded harbors:

First. Expansion of the internal transportation systems, both rail and barge (particularly in the case of the Mississippi River corridor), would have a carryover effect on other commodities than coal, providing stimulus for the more efficient and economical use of such systems in high-volume configuration to the enhancement of existing trade and, as economic factors warrant, to its expansion.

Second. The same potential for expanded use of jumbo bulk commodity carriers, presently impractical or only marginally so because of light-loading requirements, exists as in the case of coal shipments abroad, with similar advantages of lower per-ton shipping costs and a resultant enhancement of competitiveness of such U.S. commodities.

It is foreseen that the same increased capability to handle jumbo vessels at dockside and at full cargo capacity will impact favorably on many U.S. manufactured products which presently travel via smaller vessels to foreign markets.

COLLATERAL BENEFITS

While it is important to stress the broad national benefits which are realizable from the dredging of key U.S. harbors on a priority basis—stimulation of industry, increased employment, balance of payments, gross national product, among others—it should be borne in mind that benefits accrue in a regional/local sense as well. Individual industries, both large and small, clearly benefit: Mines; granaries; rail, barge, and truck carriers; terminal operators; other providers of support services in the general seaport areas.

Less obvious benefits accrue to these and other providers of services or dealers in products throughout the entire geographic area served by the transportation network feeding the export seaports. This indirect, but very substantial, indirect regional benefit is dramatically illustrated, for example, by the New Orleans-Baton Rouge corridor which, with essentially minimal dredging (9 river crossings and a 21-mile river section downstream) will become, in effect, a 100-mile-long seaport with a minimum 55-foot channel. This corridor seaport, providing a terminus for the commodities and manufactured products of the total American midcontinent, will serve not only two major exporting harbors, but will serve as well a vast complex of high-technology industries—particularly in the petrochemical sector—whose viability to both the region and the Nation will be strongly influenced by access to significantly more cost-effective export facilities.

Perhaps epitomizing the return, both to the region and to the Nation as a whole, realizable from the investment in an accelerated drilling effort, are the cost-effectiveness figures for those areas presently in advanced stages of qualification for near-future dredging.

That for the New Orleans-Baton Rouge corridor is determined to be on the order of 8.5 to 1—a statistic which, of itself, commends the desirability of the activity. In the case of Hampton Roads, cost effectiveness ratio is 6.6 to 1; that for Mobile, the third seaport presently on a fast track for accelerated dredging, is 1.6 to 1.

Such figures emphasize that priority attention to the upgrading of such seaport areas, to facilitate—initially—expanded coal exports, is wise application of Federal funds. The resultant capability of the United States to function competitively in the expanding international coal trade will have impact and pay benefits for decades to come.

The economic benefits of abundant coal supplies, exported in fully loaded jumbo seagoing carriers, marketed at prices which are world competitive, are not alone domestic in nature. Trading partners of the United States—whether industrialized or developing countries—will find it possible, given guaranteed, affordable supplies of coal, to move increasingly toward applications of coal as an energy base which will lessen dependence on high-priced oil from areas of the world traditionally less stable than the industrialized West. Patterns of payment for U.S. coal, particularly from less-developed countries, may be expected to alter, perhaps drastically, the nature and substance of much Third World trade with this country and Western Europe.

NATIONAL SECURITY

As has been demonstrated, the national security will be well served by the rapid advancement toward U.S. energy independence which will result from expanded international use of coal and from this Nation's expanded role as a primary source of world—as well as domestic—supplies. Further contributing to the basic national security objective of a stable, hard-currency economy will be the balance-of-payments impact of a greatly expanded U.S. coal trade.

A further economic benefit of upgrading key U.S. harbors is the piggy back benefit of such dredging operations to the Nation's defense posture. At a time when defense capability has been diminished by the constraints of an ailing economy, service to the national interest by harbor upgrading, already justifiable solely from an economic standpoint, is further enhanced by the beneficial effects of such upgrading on maritime aspects of U.S. defense capability—and will do so without distinct or significant additional cost to the taxpayer.

In effect, the renewed effort to bring U.S. military preparedness to acceptable levels for the exigencies of the times will receive a "no-cost" bonus in the Federal decision to accelerate upgrading of key U.S. harbors against a rationale which, even absent national defense considerations, is clearly highly cost beneficial in nature.●

By Mr. BAUCUS:

S. 829. A bill to amend the Internal Revenue Code of 1954 to provide for cost-of-living adjustments in annuities for survivors of Tax Court judges; to the Committee on Finance.

COST-OF-LIVING ADJUSTMENTS IN ANNUITIES OF SURVIVORS OF TAX COURT JUDGES

● Mr. BAUCUS. Mr. President, today I am introducing a bill to correct a very unfair, inequitable situation, that has been overlooked for some time. Fortunately, it is a situation that can easily be rectified.

The widows of Tax Court judges—there currently are six—receive a survivors' annuity, as provided by section 7448 of the Internal Revenue Code. However, through an oversight, neither this

section nor any other section provides for any type of cost-of-living adjustments for these annuities. As a result, the six widows—whose average age is 80—receive annuities that have remained unchanged in amount since the time of their husbands' deaths. In fact, the total annual amount for all six annuities is currently only $77,122.

Widows and other survivors of all other Federal judges receive cost-of-living adjustments to their annuities as provided by Public Laws 94–470 and 94–554. However, because of the somewhat unusual nature of the Tax Court, covered by title 26 (the Internal Revenue Code) rather than title 28, the provisions of these laws do not apply to the survivors of Tax Court judges.

I therefore urge speedy consideration by the Senate of this long overdue legislation.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 829

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. ADJUSTMENT OF ANNUITIES FOR SURVIVORS OF TAX COURT JUDGES FOR INCREASES IN COSTS-OF-LIVING.

(a) IN GENERAL.—Section 7448 of the Internal Revenue Code of 1954 (relating to annuities to surviving spouses and dependent children of judges) is amended by redesignating subsection (s) as subsection (t), and by inserting after subsection (r) the following new subsection:

"(s) INCREASES ATTRIBUTABLE TO INCREASED PAY.—Whenever the salary of a judge under section 7443(c) is increased, each annuity payable from the survivors annuity fund which is based, in whole or in part, upon a deceased judge having rendered some portion of his or her final 18 months of service as a judge of the Tax Court, shall also be increased. The amount of the increase in such an annuity shall be determined by multiplying the amount of the annuity, on the date on which the increase in salary becomes effective, by 3 percent for each 5 percent by which such salary has been increased. In the event that such salary is increased by less than 5 percent, there shall be no increase in such annuity.".

(b) CATCH-UP FOR SURVIVORS ANNUITIES IN PAY STATUS ON DATE OF ENACTMENT.—If an annuity payable under section 7448(h) of the Internal Revenue Code of 1954 (relating to entitlement to annuity) to the surviving spouse of a judge of the United States Tax Court is being paid on the date of the enactment of this Act, then the amount of that annuity shall be adjusted, as of the first day of the first month beginning more than 30 days after such date, to reflect the amount of the annuity which would have been payable if the amendment made by subsection (a) applied with respect to increases in the salary of a judge under section 7443(c) of such Code taking effect after December 31, 1970.

SEC. 2. EFFECTIVE DATE.

The amendment made by subsection (a) of section 1 shall apply with respect to increases in the salary of judges of the United States Tax Court taking effect after the date of the enactment of this Act.

By Mr. ROBERT C. BYRD:

S.J. Res. 59. Joint resolution designating the square dance as the national folk dance of the United States.

(The remarks of Mr. ROBERT C. BYRD on this legislation appear earlier in today's RECORD.)

ADDITIONAL COSPONSORS

S. 170

At the request of Mr. MOYNIHAN, the Senator from Alabama (Mr. HEFLIN), the Senator from Oklahoma (Mr. BOREN), and the Senator from New York (Mr. D'AMATO) were added as cosponsors of S. 170, a bill to amend the Internal Revenue Code of 1954 to allow the charitable deduction to taxpayers whether or not they itemize their personal deductions.

S. 321

At the request of Mr. BENTSEN, the Senator from Illinois (Mr. PERCY), the Senator from Iowa (Mr. JEPSEN), the Senator from Nevada (Mr. CANNON), and the Senator from Missouri (Mr. DANFORTH) were added as cosponsors of S. 321, a bill to amend section 265 of the Internal Revenue Code of 1954 with respect to the deduction, by certain financial institutions, of interest paid on deposits of public funds where those deposits are secured by tax-exempt obligations.

S. 443

At the request of Mr. DANFORTH, the Senator from New Hampshire (Mr. HUMPHREY) was added as a cosponsor of S. 443, a bill to clarify the limits of the authority of the Department of Education.

S. 491

At the request of Mr. GLENN, the Senator from New Mexico (Mr. SCHMITT) was added as a cosponsor of S. 491, a bill to amend title 5 of the United States Code to provide death benefits to survivors of Federal law enforcement officers and firefighters, and other purposes.

S. 597

At the request of Mr. JEPSEN, the Senator from Wyoming (Mr. SIMPSON), the Senator from New Hampshire (Mr. HUMPHREY), the Senator from Alabama (Mr. HEFLIN), and the Senator from New Mexico (Mr. SCHMITT) were added as cosponsors of S. 597, a bill to eliminate the position of elevator operator in the Senate office building.

S. 598

At the request of Mr. JEPSEN, the Senator from Idaho (Mr. SYMMS) was added as a cosponsor of S. 598, a bill to amend the Internal Revenue Code of 1954 to exempt from taxation the earned income of certain individuals working outside the United States.

SENATE JOINT RESOLUTION 30

At the request of Mr. JEPSEN, his name was added as a cosponsor of Senate Joint Resolution 30, joint resolution to designate April 26, 1981, as "National Recognition Day for Veterans of the Vietnam Era."

SENATE JOINT RESOLUTION 40

At the request of Mr. JEPSEN, his name was aded as a cosponsor of Senate Joint Resolution 40, joint resolution to designate April 26, 1981, as "National Recognition Day for Veterans of the Vietnam Era".

SENATE JOINT RESOLUTION 47

At the request of Mr. WEICKER, the Senator from Texas (Mr. BENTSEN) was added as a cosponsor of Senate Joint Resolution 47, joint resolution to authorize and request the President to issue a proclamation designating the week beginning May 10, 1981, as "National Small Business Week".

SENATE RESOLUTION 101

At the request of Mr. WEICKER, the Senator from Oklahoma (Mr. NICKLES), and the Senator from Oregon (Mr. PACKWOOD) were added as cosponsors of Senate Resolution 101, resolution to change the status of the Committee on Small Business to that of a standing committee, and for other purposes.

AMENDMENT NO. 22

At the request of Mr. RIEGLE, the Senator from Arkansas (Mr. PRYOR) was added as a cosponsor of amendment No. 22 proposed to Senate Concurrent Resolution 9, concurrent resolution revising the congressional budget for the U.S. Government for the fiscal years 1981, 1982, and 1983.

AMENDMENTS SUBMITTED FOR PRINTING

BUDGET RESOLUTION ON RECONCILIATION

AMENDMENT NO. 23

(Ordered to be printed.)

Mr. McCLURE proposed an amendment to the concurrent resolution (S. Con. Res. 9) revising the congressional budget for the U.S. Government for the fiscal year 1981, 1982, and 1983.

AMENDMENT NO. 24

(Ordered to be printed.)

Mr. BRADLEY proposed an amendment to the concurrent resolution (S. Con. Res. 9) supra.

NOTICES OF HEARINGS

COMMITTEE ON SMALL BUSINESS

Mr. WEICKER. Mr. President, the Committee on Small Business will hold full committee hearings on April 27 and 28, 1981, on the Small Business Administration's contracting procedures and personnel policies, at 10 a.m., in room 424 of the Russell Senate Office Building. For additional information, contact Marc Smolonsky or Mike Haynes at 224–5175.

ADDITIONAL STATEMENTS

VIETNAM VETERAN COMMEMORATIVE STAMP—SENATE JOINT RESOLUTION 30

● Mr. JEPSEN. Mr. President, recently the American Legion presented its Distinguished Service Medal to the dead and

missing Americans of Vietnam at the Tomb of the Unknowns in Arlington National Cemetery. It is the highest award of this country's largest veterans organization, and the first national recognition of this sort for those who fought in Vietnam. An additional observance was held at the State headquarters of the American Legion in my home State of Iowa.

Recognition of the service and sacrifice of the Vietnam veteran has been far too slow in coming. Divisions over the war have caused Americans to pay far less attention to our Vietnam veterans than we have given to veterans of any other 20th century American war. Many have tried to bury the memory of the Vietnam war so deeply that they have forgotten about the obligations all Americans, regardless of their position on the war, have to the Vietnam veteran. Some 300,000 were wounded in Vietnam, 75,000 were disabled, over 57,000 died, and 2,512 remain unaccounted for today.

Acknowledgment of and thanks for these sacrifices is long overdue. I am proud of the effort made by the American Legion. I am hopeful it will be the first of many to this end I am cosponsoring Senate Joint Resolution 30 to designate April 26, 1981, as National Recognition Day for Veterans of the Vietnam Era. Additionally I am recommending to the U.S. Postal Service that they issue a stamp commemorating this day.

I am supporting a design by former Marine Corps captain and Vietnam veteran Richard Braley of Cedar Rapids, Iowa. The stamp is of yellow background. The top 60 percent of the stamp will contain three vertical red bars. Adjacent to the bars will be a red eagle's head. The significance of the three red bars is threefold: First, the South Vietnamese flag was red and yellow with three red bars placed horizontally. Second, the campaign ribbon given to all who served in Vietnam was yellow with three red vertical bars. Finally, the three bars also represent the feathers of the eagle. The bottom 40 percent of the stamp contains the words "Vietnam Veteran". National Recognition Day—April 26, 1981.

I would like to see this commemorative stamp issued on or immediately prior to Veterans Day next year. I cannot think of a better way for our Postal Service to recognize this holiday or the Vietnam veteran. I think it is an excellent design for a stamp whose issue is long overdue.

I urge my colleagues to support this idea and this design. I further ask that my fellow Senators and my fellow Americans think of whatever small ways they can to help recognize the past efforts of our Vietnam veterans.●

SOIL CONSERVATION IS AN INVESTMENT IN AMERICA'S FUTURE

● Mr. HELMS. Mr. President, much has been said in the past few years about the critical need to insure adequate soil and water conservation systems on our Nation's farm and range lands.

There is an old saying "if man takes care of the land, the land will take care of man."

History reveals this in such examples as the fall from agriculture production of ancient civilizations of northern Africa, the Tigris and Euphrates and even areas of the United States in the early 1930's when we experienced severe erosion through wind erosion in the Great Plains and water erosion in the East.

An early North Carolinian, Hugh Hammond Bennet, became concerned about the severe erosion and primarily through his efforts in 1933 this Nation commissioned a conservation effort that has made great progress toward controlling erosion and increasing agriculture production. Hugh Bennet, the first Chief of the Soil Conservation Service, made great progress and the severely gullied fields of the Southeast and the dust-blowing plains were converted to grass, trees, strip-cropped, and terraced fields.

In recent years, however, increased economic pressures, export demands, reduced Federal expenditures for soil conservation, complacency, et cetera, once again has set this Nation on a course of soil and water degradation.

Soil erosion may decrease the productivity of a soil if it occurs at a rate faster than the topsoil can be replenished by natural processes. This is generally accepted at an average of 5 tons per acre, although some soils can only afford a 2-ton loss.

A soil conservation service inventory conducted in 1977 revealed that from sheet and rill erosion alone 97 million acres of cropland experienced rates of erosion greater than 5 tons per acre per year. This area is equivalent of the total amount of land in Iowa, North Carolina, and Ohio.

Another more dramatic way to put it is that the United States is literally exporting its precious soil, as one leading grain exporting State, Iowa, is losing the equivalent of two bushels of soil for every bushel of corn they produce. Since agriculture exports are vital to this country's balance of trade, our fight against inflation, our effort to feed ourselves and other peoples of the world, the wise use of our soil and water resources is imperative.

Our defense capability is closely interwined and as this administration is striving to rebuild our defense capabilities, the Nation must consider ways to build a stronger soil conservation program to turn the tide from degradation to nondegradation. And I think America is ready for this.

My good friend, Louis Harris, conducted a poll last year for USDA on this question. His survey revealed that 77 percent of the public sees conservation as an area of joint and private responsibility and they support an increased effort in soil conservation programs.

The Agriculture, Nutrition, and Forestry Committee, which I chair, is now holding hearings on the 1981 farm bill.

I expect the committee to take a long hard look at our soil and water conservation efforts, and I can think of no Senator better qualified to chair the subcommittee which oversees this effort than the good Senator from Iowa, ROGER JEPSEN.

As I mentioned earlier, Iowa is experiencing much soil erosion in its large crop-producing efforts.

Senator JEPSEN understands the relationship between production and protection of our agricultural lands resource base. Recently he gave a speech at the Eastern Iowa Tillage Show where he outlined his views on the future of conservation in this country.

My goal is to put vitality back into our conservation efforts by adopting adequate incentives to successfully promote voluntary participation.

I assure the Senator I intend to join him in his efforts.

Mr. President, I ask that the text of Senator JEPSEN's speech at the Eastern Iowa Tillage Show be printed in the RECORD at the conclusion of my remarks.

The text follows:

CONSERVE THE FUTURE NOW

(By Senator ROGER W. JEPSEN)

When the Senate Agriculture Committee held soil and water conservation hearings last summer in Iowa, one of my friends from Waterloo, a farmer by the name of Jim Sage, summed up his feelings about farming this way: "Live as though you are going to die tomorrow," he told me, "and farm as though you are going to farm forever."

Something tells me that a good number of farmers here today share Jim's thoughts. Because the truth is, a farmer has to make an extra effort to conserve his land for future generations. That's why I feel privileged to be here with you today. You are doing something about the future now. You're not waiting for Washington to tell you that you have a problem, and that it's too late to do anything about it.

It's refreshing to come to Iowa and see government employees join together to get some constructive work done. You know what they say about Washington government employees, don't you? You get five Washington bureaucrats together in one room, and they'll come up with six different answers.

Or have you heard the definition of a Washington Bureaucrat? They are people who look for trouble, find it everywhere, diagnose it wrongly, and apply unworkable solutions.

There's no question that the Eastern Iowa Tillage Show is the biggest and the best tillage show in the country. The very first year the show was held, in 1980, about three thousand farmers attended, and I hear that the turnout today is just as strong. The Soil Conservation Service, the A.S.C.S., the Extension Service, the Soil Conservation Districts, and the Iowa Department of Soil Conservation have all been involved in planning "Operation Save Our Soil". They're to be commended for the great job they've done.

More farmers practiced reduced or minimum tillage in 1980 than in years past. This increase was reflected especially in the eastern part of the State, and I am sure that last year's tillage show had a lot to do with it. According to a survey conducted by local S.C.S. offices in Iowa, the number of farmers using the no-till method nearly doubled from 800 in 1979 to nearly one-thousand-five-hundred in 1980. In 1979, 75-thousand

acres were planted by no-till; and in 1980, one-hundred-eleven-thousand acres. However, since the total number of Iowa acres presently devoted to rowcropping is 21-million, we still have a long way to go.

But it's a fact that in nearly every county of Iowa, some acres are tilled by this soil-conserving method. I am firmly convinced that education and practical demonstration—like those seen here at the show today—are the best methods possible to use in showing farmers the value of saving soil, energy, and water quality by the no-till method. In addition, it appears that two-thirds of our Iowa farmers are tilling without the use of the moldboard plow, a strong contrast to only 14 percent ten years ago.

Iowa, as anyone with any interest in soil conservation knows, is setting the example as a leader in innovative programs to help prevent soil erosion. The Iowa farmer puts his money where his mouth is.

Iowans are taking the necessary steps to conserve the future now. In the past two years alone, since FY 1979, Iowa has contributed more funds and services to soil and water conservation districts than any other state in the country. We were the first state to appropriate funds for a statewide soil conservation cost-sharing program, contributing five-million to six-million dollars every year. Iowa has also taken the initiative to set up a wind erosion control incentive program in seven counties, and a conservation tillage demonstration project in eight. And, it's impressive to me that a number of Iowa counties provide cost-share funds to help finance the construction of conservation practices or make funds available for additional technical assistance.

The list doesn't end there. Perhaps, most importantly, Iowa is the only state in the nation which has made the commitment to reduce soil losses to non-depleting levels by the year 2000. Iowa's example shows how goals can be set nationwide to limit soil losses and establish procedures to meet those goals. I am particularly pleased to observe that the Iowa 2000 Soil Laws stress the absolute need for local grassroots control in soil conservation decisions—decisions that affect the fertile source of our food and fiber as well as shape our role as stewards of the land.

There's good reason for Iowa to take the lead in promoting soil conservation. According to the Iowa Five-Year Resource Conservation Plan, soil erosion is rapidly depleting our state's soil resources and polluting our waters. Some 14-million acres of Iowa cropland is eroding nine-point-nine tons of soil for each acre. Altogether, Iowa farmers lose 26-million tons of soil every year.

When Larry Vance, Director of the Iowa Department of Soil Conservation, testified at the Agriculture Committee soil hearings, he put the loss in a context we can all understand—MONEY. He explained it by drawing a picture for us: Nine-point-nine tons of earth—Iowa's average soil loss per acre per year—fill two dump trucks. Since truckloads of soil sell for about 60 dollars a load in Iowa, that means you're losing 120 dollars for every wasted acre. Multiply that figure by 26 million acres lost to soil erosion every year in Iowa, and that means we're losing over three billion dollars just in soil alone. Since Iowa is one of the largest crop-producing states in the U.S.—but the one that loses the most acres of cropland to soil erosion in the United States—Iowa's soil erosion problem has serious national implications.

But there are even more compelling reasons for concern. New statistics are beginning to reveal that the deterioration of agricultural land quality, coupled with loss of land quality, could be so great in the next few years that what once seemed like an almost infinite capacity to produce food and fiber for the world may no longer be possible.

Neil Sampson of the National Association of Conservation Districts reported an interesting fact recently. In 1975, the Council for Agricultural Science and Technology estimated that soil erosion cost about 160 million dollars nationally, including: 83 million dollars to dredge channels and harbors; 50 million dollars for flood plain overwash and reservoir sedimentation; and 25 million dollars for added water treatment costs and system maintenance in municipal and industrial water systems. Furthermore, the report estimated that it would have cost one-point-two billion dollars to replace the plant nutrients lost through soil erosion that year.

As most of you know, in 1977 Congress passed the Resource Conservation Act for two reasons; to collect extensive data on every aspect of our land base, and to use the data gathered to determine the direction of future conservation programs and policies. The Department of Agriculture has spent about three years on this process and will soon propose a general conservation program based on this data as well as public comment. While we are not certain what this program will involve, I am sure it will not be drastically different in philosophy from present U.S.D.A. programs. There may be an option to direct funds to areas with critical erosion. Block grants to the states to run their own conservation programs may also be a probability.

I do know that we can be sure of support from President Reagan and Secretary of Agriculture Block for soil conservation. President Reagan has said, "Stewardship of our soil and water is a national responsibility . . . It's appropriate for the Federal government to help defray the costs of conservation practices which are beyond the means of individual farmers and ranchers . . . Voluntary participation with adequate incentives is essential to effectively conserve soil and water."

The President continued, "We are committed to:

(1) Programs which give vitality to conservation practices;

(2) Expanding Federal funding for research, including conservation research, and

(3) Encouraging appropriate local and state programs, as well as Federal, or a combination of all of these.

"Our Administration", he said, "is committed to adequate funding for conservation programs. But it is not desirable at this time to indicate unqualified support for increases in Federal outlays, except for programs necessary to our defense."

During Senate confirmation hearings for Secretary Block earlier this month, I asked the Secretary about his views on conservation. He began by describing his experience with the state of Illinois' soil and water conservation cost-share program when he was Illinois Secretary of Agriculture. He said he was happy to see states beginning to take a greater interest in soil and water conservation.

"We can farm intensively," he said, "producing as much food as possible if we do it properly—if we take care of our soil." In addition, just before his appointment, the Secretary wrote a paper on national agriculture conservation policy. It is clear that he understands the relationship between protection of our agricultural lands resource base, and production. And better production means more profit.

He added, "Investment in our natural resources is one of the best ways for government to spend money wisely. The interest gained is reflected in healthy economics in lands where those natural resources are abundant. If our natural resource conservation programs are not redirected soon, America will suffer. The program I support helps individual Americans help themselves. It stresses the involvement of local government. We cannot export our topsoil forever," the Secretary concluded. "The nation's strength lies in its soil and its wise development." He knows that we need to conserve the future now through adequate soil conservation programs.

As chairman of the Agriculture Committee's soil conservation subcommittee, my goal is to put vitality back in our conservation efforts by adopting adequate incentives to successfully promote widespread voluntary participation. I have heard many opinions, and I am convinced that these kinds of approaches are what Iowans—indeed most of the nation—want. Nearly 100 people testified at the soil and water conservation hearings I held last summer in Waterloo, Ames, and Fairfield.

In addition, many Iowa food producers have already responded to a questionnaire sent by my office to determine which of several conservation policy options farmers prefer. The support for certain proposals is overwhelming: 95 percent of the questionnaires to date listed soil erosion as a significant problem for Iowa farmers; 71 percent favored an expanded research program to develop more effective soil and water conservation measures; 83 percent, tax credits; 76 percent, a special low-interest loan program to help new or small farmers set up soil and water conservation practices; and 65 percent did not want the Federal Government to tell farmers how to practice soil and water conservation practices on their own lands.

I was glad to see such strong support for conservation research. As many of you know, I strongly favor the location of a soil tilth center at Iowa State University. I testified for two consecutive years on this project and will be introducing legislation to authorize the new Secretary to construct such a facility at Iowa State. The Subcommittee will hold hearings on this and other related proposals later in the 97th Congress.

There are a number of options available to us to help encourage voluntary soil conservation while keeping in mind President Reagan's pledge not to expand our Federal budget. These proposals include:

Establish a critical areas conservation program to accelerate erosion control in areas of the country that have been identified as having serious erosion problems. The soil and land resources data the Department of Agriculture has gathered through the RCA process would be very helpful in this regard.

Authorize the Secretary of Agriculture to offer grants to States and local agencies to carry out soil and water conservation activities. Over the past few years many states and local communities have intensified their interest and investments in soil conservation. Local communities, in my opinion, are better able to measure the needs of local landowners, who are anxious to become involved in conservation programs.

Establish a National Endowment for Soil Conservation patterned after the National Endowment for the Arts. The fund could receive donations, which could use the interest from such contributions to promote soil and water conservation practices.

Authorize the Secretary to make loans available to individuals who want to install approved conservation practices.

Establish a system that would allow farmers who invest their own money in installing and maintaining conservation practices on their lands, to claim Federal tax credits. Tax credits would appeal particularly to absentee landowners who generally have little incentive to prevent erosion. Significantly, such a tax credit program would help avoid an increase in the conservation budget.

I'd like to add that while the tax credit idea has been kicked around a lot lately, no

one seems to have a good idea about how to make such a program work. I propose that we get down to brass tacks and come up with a workable piece of legislation that we intend to pass in the 97th Congress. At my request, a preliminary meeting was held in Washington recently with conservation and tax experts on the economic feasibility of such a tax credit program. This concept has already received support from many individuals and groups, and prospects look promising for its serious consideration.

We also need to determine whether many of the recent predictions concerning the loss of actual productive farmland acreage are correct, because it raises a controversial question: How great is the loss? Will we be unable to meet the demands of the American people and our trade partners? I will be urging the soil conservation subcommittee to help resolve this question.

Another issue involves whether Federal agencies adequately consider how their many projects and land acquisition policies affect our farmland resource base. A General Accounting Office report released last year recommended that Congress review the Federal government's practice of "acquiring as much private land as possible regardless of need, alternative land control methods, and impact on private landowners." I expect the Subcommittee to study this issue in depth and propose solutions that will recommend more state and local control over these decisions.

According to Mark 4:28: "The earth bringeth forth fruit of herself, first the blade, then the ear, after that the full corn in the ear." This was true in Biblical times, it is true today, and it should be true hundreds of years from now. There is, however, an important point to remember. The land the Bible refers to, the land where agriculture first developed at least seven thousand years ago in the fertile valleys between the Tigris and Euphrates Rivers, is fertile no more. I can attest to its ravishment. Last year I visited this land which once held so much promise during a tour of the Middle East. Why are Egypt's lands now so impoverished? The people overgrazed and overused their lands, causing the rivers to fill with silt. The river waters entered the acquifers which were so desperately needed to irrigate the land; they clogged up, and the lands are cracked and spoiled today. We need to learn a lesson from history here. We need to learn that the time to conserve our future is now.

Granted, our technology is more advanced today than it was in the days of ancient Egypt. But even though the United States has the best technology in the world, the best fertilizers, herbicides, and the most modern equipment, the basic and most important ingredient for providing abundant food to feed a hungry world is good soil.

Despite the renewed interest and commitment to soil conservation, quick and easy fixes just aren't available. "Quick Fixes" usually don't solve the problem. And, as Mr. A. J. Hollingsworth of New London, Iowa, wrote to me recently, you can't expect one program to fit the needs of every farmer. He ended his letter with two words: "Good luck," he said.

But we need more than just good luck; by taking positive and preventive action now for soil conservation, we will have a future to leave our children. We all need to work together to take care of the land—farmers, landowners, government officials, research scientists, and taxpayers. And if we take care of the land, the land in turn will take care of us, yieldiing increased production as well as profit.

In the fall of 1979, Pope John Paul the Second expressed this feeling about the reward of being good stewards. It was October, the month of harvest when the land rewards us for our good care. The Pope made his remarks as corn, ready to be picked, waved in abundance in the fields. "Conserve the land well," he urged us, "so that your children's children and generations after them will inherit an even richer land than was entrusted to you."

Iowa farmers don't need to be told this. You know that there is no true production without profit, and no true profit without production. The key, yesterday, today, and tomorrow, is conservation of the land, because it is both our present inheritance and our future promise.●

BIPARTISANSHIP IN AMERICAN FOREIGN POLICY

Mr. MOYNIHAN. Mr. President, there is a tradition of bipartisanship in American foreign policy, and President Reagan, like many of his predecessors, has pledged to observe it. It was a theme of his campaign for office and will, we hope, remain a theme of his administration.

Last month the Coalition for a Democratic Majority, of which I am an honorary cochairman along with Senator JACKSON, observed one of the ceremonies of this bipartisanship. We held a luncheon to honor Jeane Kirkpatrick, one of the founding and most active members of CDM and now, under a Republican administration, U.S. Permanent Representative to the United Nations. Those who attended, and those who spoke, wished to show their pride in her and their conviction that the bipartisanship required for a successful foreign policy could not be better embodied than by her appointment.

The position that Jeane Kirkpatrick holds has several times been filled by men—and, we can at last say, woman—not belonging to the President's party. Thus it was Warren Austin, himself often a delegate to Republican conventions, who represented the United States at the United Nations under President Truman. At the founding of the United Nations, Arthur Vandenberg and Tom Connally sat together on the American delegation. And though a Democrat I served at the United Nations under President Ford.

Such appointments are part of the substance of bipartisanship. But let it be said that Jeane Kirpatrick represents more than merely views and policies that are acceptable to both parties. Rather, in a distinguished academic career, she made it her task to write on, and give life to, the principles that unite our Nation and reflect our distinctive commitment to liberty. She will make this her task as well in the great work that is ahead of her.

Mr. President, at the February 2 luncheon in honor of Jeane Kirpatrick, speeches in her honor were given by Lane Kirkland, president of the AFL–CIO, by Ben Wattenberg, chairman on the CDM, and by Senator JACKSON. I ask that their remarks, as well as those of Ambassador Kirkpatrick herself, appear in the RECORD.

The material follows:

REMARKS OF BEN J. WATTENBERG, FEBRUARY 2, 1981

Welcome on behalf of the Coalition for a Democratic Majority. This is a remarkable occasion for CDM—a moment of mixed pride and irony. Our dilemma can be found in our name: We are still surely a coalition—you will find faces around this room from the Labor Movement, from the academic world, from the professions and the business community—

We are still surely Democrats, as Jeane Kirkpatrick has noted. We've seen some fights within our party, we've lost some, but we're still there fighting. But—just as surely as we are still a Coalition and still Democrats, alas, the election returns have told us that we don't seem to be a Majority any longer.

Strangely enough, it is that latter circumstance that brings us here to honor Dr. Jeane Kirkpatrick and wish her Godspeed in her mission to the tarnished forum of humankind at Turtle Bay.

The bitter-sweet irony of this occasion runs deep—and directly to the core of the problem of the Democratic Party. It is not a secret that Jeane's name was put forth to be an Ambassador in the Carter Administration—in fact, a Presidential Commission recommended her for posts on three continents. Indeed, it would be remarkable if a woman of Jeane's experience, intelligence and eloquence would not have been put forth to serve in a Democratic Administration. What was remarkable was only that while recommended she was never asked to serve. We can only speculate on why that did not happen; we do know, however, that members of CDM were considered something of a problem for the previous Administration. It was said that we were too hard-line. In retrospect a definition emerges—a hard-liner was someone who found out about the Soviets before the President found out about the Soviets.

Because of this attitude, because the most vocal wing of the Democratic Party came to dominate the foreign policy of the Democratic Party, because realists like Jeane Kirkpatrick were not asked to help steer the ship of state, a perception grew in the country that the Democratic Party stood for weakness, vacillation and indecision, or in the immortal words of Jeane's friend Richard Scammon, it was perceived that if the Democratic Party took your dog for a walk around the block, they wouldn't come back with the same animal.

This perception, of course, was contributory to the stunning defeat of Democrats in 1980. It was a strange defeat. On the one hand, it robbed the nation and the world of certain aspects of the legislative leadership of American stalwarts like Scoop Jackson and Pat Moynihan. On the other hand, it was a defeat that brought not only Jeane Kirkpatrick but many other CDM people to the ranks of high foreign policy positions.

How do we deal with this strange set of events?

First. We salute Jeane Kirkpatrick and her CDM colleagues who have gone into this new Administration. We salute the new administration for recognizing and honoring her views. We salute her, and her CDM colleagues going into this Administration as persons of intelligence and wisdom whose efforts, we believe, will make for a stronger America, whose efforts will lead to a world where liberty is more likely to flourish. We know, if not everyone else does, that over the decade of the 1970s it was CDM members and CDM allies who first began the ferment which brought the concern for human rights to center stage—the people are here—Senator Jackson, Senator Moynihan, Lane Kirkland and the AFL–CIO, (and before him George Meany), Max Kampelman Dorothy Fosdick,

Penn Kemble, Josh Muravchik, Tom Kahn, Sonny Dogole, Eliot Abrams, Norman Hill, Austin Ranney, Paul Nitze, Bud Zumwalt, and of course, Jeane Kirkpatrick.

Second. We note that the position that CDM subscribes to—American strength, American internationalism, American championship of human rights—has until the recent past been very much the philosophy of the Democratic Party and a source of much of its strength. We note too that while the new President is no Ronnie-Come-Lately to many of these issues, he presides over a Republican Party, that like our own, has taken some strange and corrosive paths in the foreign policy arena in recent years. Accordingly we offer our brothers and sisters to help make sound American policy but those of us who remain behind do not buy the idea that a sound foreign policy can only flourish in a Republican setting.

And so, third, we rededicate, ourselves to the promotion of those views within the Democratic Party, the institution that presided over their birth. For all its problems, which are many and complicated, for all its recent false starts, we have not given up hope for our Democratic Party, which has in the past been the great engine of change, progress and reform in this country, a party still dedicated to liberty and equity of every race, class and region of this nation, a party still dedicated to freedom at home and abroad.

(There could be worse things than having two parties with a sound foreign policy.)

REMARKS OF LANE KIRKLAND, FEBRUARY 2, 1981

I am delighted to join with CDM in this tribute to our friend Jeane Kirkpatrick, as she embarks on her new assignment.

As to her prospects at the United Nations, we have the highest hopes, grounded in the experiences we have shared with her over the years.

It comes as no surprise to this audience that Jeane has been a good friend of the AFL–CIO, as she has been a friend of all the members of what Pat Moynihan has aptly called "The Liberty Party."

That Party has had few leaders as articulate, thoughtful, and persuasive as she. Jeane will bring more than a touch of class to the American voice at the United Nations. She will bring clarity to the expression of the mood of national self-respect and genuine patriotism which is the natural disposition of most Americans.

Moods can be fleeting and they are no substitute for durable policy. But they can create a public climate for policies which otherwise would not have been possible or credible. Any who doubt this have only to look back on the corrosive effects on American Foreign Policy of the guilt and self-doubt so carefully cultivated by our disillusioned elites in the aftermath of Vietnam.

If that fog is now lifting, Jeane Kirkpatrick's appointment to the United Nations is perfectly timed.

I spoke earlier of the experiences we have shared with Jeane. Those experiences flowed in large measure from our common efforts to challenge a perverse view of the world which too often produced an unnatural separation between the pursuit of democratic ideals, on the one hand, and our national strategic and political interests on the other.

Let me be plain. We have no taste for jingoism, or for the empty flag-waving of those whose Americanism consists of contempt or indifference to the fate of other peoples. But we do strongly assert that the future of human rights and the prospects of economic development depend on the survival and growth of democratic institutions, and that such institutions cannot thrive amidst the erosion of the American position in the world.

The AFL–CIO remains committed to human rights as an integral part of American Foreign Policy. That was the governing principle of our own activities before the last Administration took office, and we stand by it as the new Administration takes office. But we understand better than most that the goal of a human rights policy must be the strengthening of democratic institutions and not their abandonment.

A human rights policy that yields the frontiers of political democracy, or that in effect transfers political territory from the authoritarians to the totalitarians, is an anti-human rights policy. A human rights policy that results in a declining influence for the Western democracies in world affairs is not a human rights policy. A human rights policy whose proponents are indifferent to a strong national defense is not a human rights policy.

So it is in the real world. It will be nice, once again, to have a U.N. Ambassador who inhabits it.

As we in the AFL–CIO gird ourselves for the battles that loom all too clearly on the horizon, this pleasurable occasion reminds us that every cloud has a silver lining, Jeane, your appointment shines especially bright, and we wish you all the best.

REMARKS OF SENATOR HENRY M. JACKSON, FEBRUARY 2, 1981

Ben Wattenberg, Senator Moynihan, Lane Kirkland, Huber Matos, Jeane Kirkpatrick, and all the assembled friends of CDM:

I am convinced that one reason we Democrats lost the election was the Republican success in pre-empting the historic stance of the Democratic Party on issues of defense and foreign policy.

The Republicans struck at the heart of our Party—the tradition of Franklin Roosevelt and Harry Truman—champions of a strong and resolute America, leader of the Free World, proud of its greatness.

Some of us have been sounding these themes over the years, and battling to get them accepted in the councils of government. To its everlasting credit, CDM has been out front in this struggle.

We have held:

That a robust strategic equivalence with the Soviet Union is an essential foundation for an effective American foreign policy, one which will assure our national security and the safety of free nations.

That a policy of détente and accommodation with the Soviets is transformed into a policy of retreat and appeasement when our leaders fail to insist that restraint must be reciprocal, that forbearance must be mutual.

That no SALT II Treaty is preferable to an unsafe one that sanctions the massive buildup of Soviet strategic power, advantages them in critical respects, and contains provisions of great importance that we are unable to adequately verify.

That one of the great coverups of this century is the effort by Western governments, who know better, to muffle the facts about Soviet-bloc support for international terrorism.

That something is wrong with a policy on human rights that finds it convenient to criticize the petty dictatorships, with which the world unhappily abounds, but inconvenient to speak out about the Soviet system that inspires repression around the world.

That Israel, structurally stable, militarily capable, and pro-Western in orientation constitutes an indispensable Western asset in the Middle East.

That the United Nations is out of hand and operating in many ways to undermine our basic national interests.

My friends, we can't blame the Republicans for picking up these themes and walking off with them. They make sense. Moreover, they are central to the future of our nation and its free institutions, and to the destiny of all free peoples.

Too many of our fellow Democrats misjudged the mood of the country. We were told it was out of bounds for good Democrats to sound patriotic. We were told that to call America a great country was passé. Well, the recent vast and tumultuous outpouring of unabashed patriotism should put that myth to final rest. What a chance we Democrats missed! What a reservoir of support we failed to tap! The American people are yearning to have this country great again. They were looking for a leadership that understood.

In the period ahead, CDM should be very busy. We have to watchdog the Republican foreign and defense team. And we have to redouble our efforts to bring the Democratic Party into the 1980's, prepared again to govern the country.

Meanwhile, this is a special celebration today for one of our members who is joining the new Administration—to carry on the battle from the inside.

Over the years, Jeane Kirkpatrick and I have shared many spirited efforts within the Democratic Party. After the recent election, I served with Jeane on President Reagan's Interim Foreign Policy Advisory Board. We aren't supposed to report on what went on behind the closed doors. But I can tell you this: Jeane Kirkpatrick was the star. She proved once again her scholarly grasp of the complexities of foreign policy, her shrewd ability to sort out the key issues, her solid judgment, and her unusual skill in exposition. Jeane Kirkpatrick is equipped and ready to undertake the formidable task of handling American relations with the United Nations. She has my personal pledge of cooperation and my very special blessings.

REMARKS BY AMBASSADOR JEANE J. KIRKPATRICK, FEBRUARY 2, 1981

Ambassador Kirkpatrick. Obviously, this is a very pleasant and thoroughly enjoyable occasion. I don't just like it, I love it. When I hear such praise from men whom I so respect and admire—Senator Jackson, for whom I have repeatedly worked for the office of President, that's my most concrete testimony of what I think of him; Senator Moynihan for whom I would happily work for election as President of the United States; my good friend Lane Kirkland, whose organization I consider myself in total solidarity with and with whom I expect to be working side by side in the future as in the past; Senor Huber Matos who in a very special way, in very much the same way that Aleksandr Solzhenitsyn and certain other genuine and authentic heroes in our time demonstrate that no amount of totalitarian terror can in fact kill the human hope and determination, the avocation and vocation for freedom; and Ben Wattenberg, my good buddy, and Penn Kemble and Max Kampelman—well this is a very nice occasion for me, and I am very happy to be here.

I see all my good friends in the room and I like it a lot, and I want you to know two things about that: One is that your expectation for my performance defines another and very important and for me really definitive dimension of my new responsibilities. These new responsibilities are at best and at their minimum onerous and a bit awesome, and your expectations for me confronted with that office and those responsibilities fill me with fear and trembling and determination. I'll do my best. The second point I want to make it that, pleasant though it is to be here, I understand very well that you are not gathered just to honor me.

I want to assure you that I know better. There is quite another and much more important reason that we, a band of Democrats, are crowded into this particular smoke-

filled room. We have lived in smoke-filled rooms at some points in the past and hopefully we shall in the future—smoke-filled rooms, some would say, are our natural habitat—but the reason I think that we really are here today, is that we have come to celebrate a victory. That victory is, of course, for a perspective on foreign policy; and my appointment, as I understand very well, is a symbol of the victory of that perspective on foreign policy and national security in this country at this time.

Obviously the partisan context of this occasion makes it for most of us bittersweet. Most of us have long been Democrats, we've been real, live, serious Democrats. Perhaps the best way to communicate how serious we've been in our family as Democrats is to tell you a story about one of my sons who, when he came home one day from a Sidwell Friends' transition class, in a classroom with one of Sandy Vanocur's sons, reported at dinner, today we talked about what we are. My husband and I asked, what do you mean "what we are;" and he said, "well you know, Jimmy said that he was a Catholic and Annie said she was a Jew and Tim said he was a Quaker—and I told them we were Democrats." It takes a family of serious Democrats to produce a nursery school response like that.

My situation is also not very different than that of another good friend Aaron Wildavsky, distinguished political scientist and I think freedom fighter, who at a meeting, of all places, of the Reagan Foreign Policy Advisory Council last Spring said to me, "I never even saw a Republican until I was fourteen." So I think you know we have been serious Democrats, and for serious Democrats this is obviously a bitter-sweet occasion. But more even than serious Democrats, I believe that those of us who are here have been serious freedom fighters. And it is, therefore, a kind of political, collective, and partisan as well as personal misfortune that brings us here today—and a kind of collective and personal good fortune as well.

As I look around the room, I think we were all there when a particular kind of new liberalism spread through our party like the plague. In fact we all tried very hard, those of us in CDM, to fight off and stop the spread of that particular plague, to ameliorate its symptoms, and to treat the victims. We know too that we have never been a coalition for a democratic "majority" in the sense that, since we formed, we have not been a majority within the leadership of our party. CDM was in fact formed precisely to meet that particular problem—the problem of having the leadership of our party assumed by some people who thought very differently about a great many things.

We thought and we think today that the kind of plague that swept through our party and which I believe led to massive Democratic defeats in 1972 and in 1980 is one that involves a very peculiar kind of arrogance. It tends to devalue the views and values of ordinary people—ordinary rank and file members of the Democratic Party, members of the AFL–CIO, members of the American nation. It tends to elitism, and to utopianism of a sort that is prepared to trade real goods for symbolic ones.

Most especially, we feel that the plague which swept our party and for a period captured its leadership—not all its leadership but some portions of it—led in turn to a situation that struck me dumb (which is by the way, a hard condition to bring about). I literally hardly knew how to respond to the notion that I and inferentially my colleagues, who have been preaching and insisting on the centrality of human rights in foreign policy, that we should be accused of devaluing human rights in foreign policy is so stunning a notion that I hardly knew how to respond.

Now, after thinking it over with a little help from my friends, Senator Moynihan, Penn Kemble, Ben Wattenberg, and others, I came to realize that it was but one more example of a peculiar kind of orthodoxy and the intolerance associated with it—a certain form of what I would call perverted liberalism in our times which seeks to control politics and reality and reputations and power, most especially and most seriously distributions of power, by way of controlling the symbolic environment.

In the lexicon of this peculiar and intolerant orthodoxy, the woman who supports the legitimacy of mothering may be treated as a non-woman or not really a woman or not really a proponent of rights for women. A Black who supports equal opportunity and opposes quotas may be treated as an oreo—you all remember oreos, black on the outside and white on the inside, not really a Black. Or a labor leader who supports the fundamental success of the American system and the democratic institutions which guarantee collective bargaining and the right of workers to seek their own good according to their own lights may be considered a lackey of capitalism. By the same token, a human rights advocate who does not embrace a particular and particularly abstract notion of human rights becomes no partisan of freedom.

This is a dreadful kind of orthodoxy with which the partisans of unfreedom of our time have plagued the world. Indeed in our age they have sought to remake the standard usage embodied in the Oxford English Dictionary and Webster's International to define freedom and non-freedom; according to this peculiar orthodoxy, whether a nation practices genocide becomes less important than whether a nation signs a particular version of a particular convenant on genocide produced by a particular institution at a particular time. Whether a nation stands for human rights is determined by whether it in fact subscribes to a particular "progressiste" and I insist we have no accurate equivalent in English for that concept—a particular "progressiste" conception of human liberty which associates it with the triumph ultimately of the totalitarians in society after society.

I think everybody here knows that reality in our time has become confused by words. Words are used systematically to confound innocent and unwary people, and freedom has become in our times, more than once, a semantic tool for attacking and undermining free people and free institutions. The fact is that freedom is a precious good which is won by particular people at particular times, protected by very particular and usually very complicated institutions and restraints. I think it is awfully important that we all take the cure of history in thinking about freedom and human rights. And the cure of history is nothing more or less than the cure of reality.

If we take the cure of history, we will discover something about the very essence of freedom and the very essence of human rights. We will discover that the freedom of the American people was based not on the marvelous and inspiring slogans of Thomas Paine but in fact on the careful web of restraint and permission and interests and traditions which was woven by our founding fathers into the Constitution and explained in the Federalist Papers—and rooted, of course, ultimately in our rights as Englishmen. Just as the freedoms of modern France consist and are built not on the slogans of the French Revolution but on the very long, arduous struggles of the French people to give reality to those slogans, a reality that exists in the constitutional structures and in the conventions and the institutions of French society.

With respect to the protection and enhancement of human rights, an aspect of the human condition, one finds that force must reinforce legitimacy. Force in the real world is unfortunately necessary to reinforce freedom; and American power, it seems to me, is quite clearly necessary to protect and expand the frontiers of freedom in our time. I think we all wish that the human condition were not what it is and that human society is not what it is, and that the mode of expanding and operating the power arenas in our time were not what they are.

I can't resist quoting Edmund Burke—I said to my husband today I consider Edmund Burke an 18th century Aristotelian and I consider myself a 20th century Aristotelian—Burke said concerning the French revolution and freedom in France, "I should therefore suspend my congratulations on the liberty of France until I was informed as to how it had been combined with government, with public force, with discipline, with obedience of armies, with the collection and effectiveness of a well distributed revenue, with morality and religion, with solidity and property, with peace and order, with civil and social manners. All these are good things, too. Without them liberty is of no benefit whilst it lasts and is not likely long to continue."

We all know that a great many modern revolutions are made in the name of liberty and that they result in the reality of tyranny. In my hearings at the Senate Foreign Relations Committee, which I took very seriously, I made only one pledge. And my pledge was that I should try very hard, in the tradition of Daniel Patrick Moynihan, to make certain that I understood what the United States acted upon and responded to before we acted upon it and responded to it; that I should try to make very clear that we agreed to nothing or disagreed to nothing until we knew what it meant; and finally that I should try very hard to make certain that nothing we agreed to diminished freedom in the world.

Thank you.

ORDER OF PROCEDURE

Mr. BAKER. Madam President, who has control of the time?

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. BAKER. Madam President, will the Senator yield to me?

Mr. DOMENICI. Yes.

THE ASSASSINATION ATTEMPT ON PRESIDENT REAGAN

Mr. BAKER. Madam President, I think most people on the floor are as concerned as I am and as anyone is about the condition of those who were involved in the shooting incident at the Washington Hilton. There are now unconfirmed reports—at least I cannot confirm them—that the President himself was shot. I suggest that, in view of those circumstances, we consider going into recess. I have asked Senator BYRD to come to the floor and, as soon as he arrives here, we shall make some further disposition of that.

In the meantime, Madam President, I ask unanimous consent that it may be in order to suggest the absence of a quorum without charging it to either side.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS SUBJECT TO CALL OF THE CHAIR

Mr. BAKER. Madam President, if the distinguished Senator from New Mexico will continue to yield to me, I might report that I do not have confirmed information that the President was shot. I do have unconfirmed information that that was or may be the case. In view of the gravity of that situation, I ask unanimous consent that the Senate stand in recess subject to the call of the Chair.

There being no objection, the Senate, at 3:17 p.m., recessed subject to the call of the chair; whereupon, at 6:04 p.m. it reconvened when called to order by the President pro tempore (Mr. THURMOND).

REPORT ON THE CONDITION OF THE PRESIDENT OF THE UNITED STATES

Mr. BAKER. Mr. President, I would like to take this opportunity, before we proceed, to report on the condition of the President of the United States.

I have just concluded a conversation with representatives of the White House and with Senator LAXALT, who is at the hospital with Mrs. Reagan.

Senator LAXALT authorized me to report that the President is still in surgery and that he is doing very well; that the surgeons now have found the bullet which penetrated the chest cavity and lodged in his lung; that they expect the surgery to be completed within the hour. The President will then be taken to the intensive care section of the hospital where his recovery is considered to be certain.

He is strong, he has withstood surgery well, and things are proceeding as well as could be expected.

Mr. President, in a similar situation, it was the policy of the former majority leader, Senator Mansfield, to conclude the proceedings of the Senate by a recess in recognition of the gravity of the situation when President Kennedy was shot.

In a few moments I will ask unanimous consent that the Senate stand in recess until tomorrow. But at that time also, I note the majority leader invited the Chaplain to offer a prayer, expressing the wishes of the Senate for the recovery of the President.

Our Chaplain is with the Reagan family at the hospital. I have talked to Dr. Halverson and urged him to remain there. In his absence, in a few moments I would hope that Senator DANFORTH, of Missouri, who is also a clergyman, would offer that prayer.

Before we do, Mr. President, I have to necessarily transact some business. It is my intention that the Senate should resume its regular activities on tomorrow.

ORDER FOR RECESS UNTIL 9:30 A.M. TOMORROW AND TO RESUME CONSIDERATION OF SENATE CONCURRENT RESOLUTION 9

Mr. BAKER. Mr. President, I ask unanimous consent that at the conclusion of the prayer to be offered by Senator DANFORTH on behalf of the Members of the Senate for the President's recovery, that of his staff, and those involved in this incident, that the Senate stand in recess until the hour of 9:30 a.m. tomorrow. At that time we will resume consideration of Senate Concurrent Resolution 9. There will be leadership time in accordance with the standing order and following that leadership time we will resum consideration of Senate Concurrent Resolution 9.

The Bradley amendment, No. 29, will be the pending amendment.

It is my hope. Mr. President, that we can complete action on Senate Concurrent Resolution 9 tomorrow, and to further that hope I would urge Senators to consider that we may be late on tomorrow evening.

Mr. President, I am sure I speak for every Member of the Senate when we express our great sorrow at the developments of this day.

Now. Mr. President, I am prepared to yield to the distinguished Senator from Missouri for the purposes I have just stated after the Chair has granted the request that I have put.

The PRESIDENT pro tempore. Without objection, it is so ordered.

The Senator from Missouri will offer a special prayer.

PRAYERS

Mr. DANFORTH. I ask you to join me in three short prayers, one for the President, one for those who were injured with him, and one for our country.

PRAYER FOR THE PRESIDENT

Let us pray, first for the President of the United States.

O Father of mercies and God of all comfort, our only help in time of need. We humbly beseech Thee to behold, visit and relieve Thy servant the President of the United States. Look upon him with the eyes of Thy mercy. Comfort him with Thy goodness. Restore him to health, and grant that he may grow in faith and strength to Thy glory. Through Jesus Christ our Lord.

PRAYER FOR JIM BRADY, THOMAS DELAHANTY, AND TIM M'CARTHY

Let us pray for Jim Brady, Thomas Delahanty, and Tim McCarthy.

O merciful God, giver of life and health, Bless we pray Thee Thy servants Jim Brady, Thomas Delahanty, and Tim McCarthy and those who minister to them of Thy healing gifts, that they may be restored to health of body and mind through Jesus Christ our Lord.

PRAYER FOR OUR COUNTRY

Let us pray for our country:

O God, merciful and compassionate, who art ever ready to hear the prayers of those who put their trust in Thee; Graciously harken to us who call upon Thee, and grant us Thy help in this our need; through Jesus Christ our Lord.

RECESS UNTIL 9:30 A.M. TOMORROW

The PRESIDENT pro tempore. The Senate now stands in recess.

Thereupon, at 6:10 p.m., the Senate recessed until tomorrow, Tuesday, March 31, 1981, at 9:30 a.m.

EXTENSIONS OF REMARKS

RELIGION AND POLITICS

HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, March 30, 1981

● Mr. MICHEL. Mr. Speaker, Father James V. Schall, S.J., has written an article about religion and politics that is so lucid, so brilliant and so important that it would be an injustice for me to attempt to paraphrase it. What Father Schall says strikes the very heart of the question of El Salvador.

At this point I wish to insert in the RECORD, "Priests as Revolutionaries, Religion as Power Politics" by James V. Schall, the Washington Star, March 27, 1981.

PRIESTS AS REVOLUTIONARIES, RELIGION AS POWER POLITICS

(By James V. Schall)

Those of us who stand more or less within the orbit of America's religions, in my case the Catholic variety, have noticed within the past year or so an intense, promotional flood of documentation—press releases, mimeograph forms, reprints, translations from the Spanish, testimonials, and pleas—urging us to support the present Nicaraguan regime and a "new" one in El Salvador.

Though the causes and quantity of this remarkable outpouring are largely unknown to the general public—I have accumulated about a foot and a half just by myself—it is very available to clergy, nuns, chaplains, university and media types. Anyone can obtain it through the Latin American Bureau of the U.S. Catholic Conference, and certain Protestant or Catholic publications.

The religious option to promote such Central American regimes, however high-sounding, will eventually undermine any serious claim of religion to an independent space in our society which is not totally political. If such efforts are successful in Central America, they will make religion largely responsible for guiding a series of people into totalitarian-type systems.

In an interview, Father Miguel d'Escoto, the clerical foreign minister in Nicaragua, itself a government with more clergy in public office than anywhere this side of Iran, argued:

PRIESTS AND CITIZENS

"It was necessary for any Nicaraguan who was qualified to heed the call of the revolutionary government. Any citizen whatsoever, and a priest is a citizen; he is a citizen before he is a priest . . . It is our hope [the bishops] will not ban the priests' significant function in state institutions."

This is classical Throne and Altar talk in a leftist dialect. Even more, it is the "reduction" of the priest to the citizen, rather than the "elevation" of the citizen to the priesthood.

Michael Novak has pointed out that the churches in the United States have themselves been "discovered" by Marxist and radical movements, which long had held them to be hopelessly reactionary. Ecclesiatical property, platforms, and press are strategically located in this country. If they could be utilized to support certain lines of political action, they would reach masses of people hitherto untouched by radical ideas and, at the same time, provide a privileged political sanctuary difficult to confront under American procedure.

But the churches are not "used" wholly unknowingly. A rapid change of perspective in recent years toward activist religious involvement in politics paved the way. Though not universal, the identification of religious authenticity with conformity to certain political ideologies reflects for many the loss of a sense of the transcendent and, consequently, a loss of what politics might be in the Christian outlook.

El Salvador has become such a controverted area because its "success" as a revolutionary "victory" would legitimate a peculiar understanding of "human rights," itself the main avenue for the contemporary politicizing of religion.

"Human rights" in recent years, as Professor Iredell Jenkins of the University of Alabama wrote in his brilliant Social Policy and the Limits of Law, is the way by which the older and more valid understanding of natural and legal rights has been transformed into statist and absolutist control of the individual person. "Human rights," unfortunately, have both totalitarian and democratic contexts, which are diametrically opposed to each other. That this intellectual undermining of the dignity of the human person be promoted in the name of "human rights," with a dogmatic presumption that "pure socialism" is the only regime under which men can achieve them, is consequently, no accident.

This suggests a serious decline in the quality of religious intelligence in this country, a practical loss by religion of its own autonomous philosophical foundations. Its consequence appears to be the growing inability of many segments of Protestantism and Catholicism to recognize the content and direction of ideological movements in our era.

What is important from a civil point of view, however, is that a religion that presents itself as politicized, by seeming to promote military and political movements in foreign parts, must expect to fall under political rules and norms. A religion acting politically cannot validly claim religious immunity.

So the importance of El Salvador is nothing less than the self-renunciation of the main distinction between religion and politics as a major factor of the public order. Just as Father d'Escoto conceives himself to be a "citizen" before a "priest," so "religion" grasps itself as "political" in its religious expression.

What about "human rights," "oppression of the poor," "opposition to dictators," and justifications of religious intervention in politics? No religious leader wants to be caught being against "human rights" or the poor, even if he knows the ideological usages of such notions.

But religious leaders ought to be sufficiently alert to factual questions of what such noble ideas mean in context. Do they really originate in reasonable or religious sources? Where do they lead in practice?

The disillusioned Nicaraguan leader Alphonso Robelo remarked, "I think the American people and the world in general should know that in Central America in the Carribbean area, there is a struggle going on between totalitarian forces and democratic forces and the future of the Western Hemisphere could right now be solved in that area."

In other words, if it is correct that "human rights" and "aid to the poor" are in practice rooted mainly in a tactic to impose a totalitarian regime in this area, then religion in the United States that supports this risks alienating itself from American interests and appears to become itself an activist missionary countermovement directed rather to the home front. Religion finds itself advocating what goes on in these regimes as a kind of practical idealism.

WHAT RELIGION MUST DO

Contemporary religion is in dire need of discovering the nature of an economy that is based on productivity, not merely statist "redistribution." The Christian advocacy of "socialism" as a means to aid the poor is largely ignorant both of the continual failures of actual socialisms and of the new studies and experiences of democratic capitalism, showing how to aid the poor to aid themselves.

Christians must learn again about the distinction between religion and politics, priest and citizen. Not only would this reestablish religion's testimony as witness to a reality that is not merely political; it would restore our capacity to see politics and economics apart from ideology.

The religious "passion" concerning El Salvador must be seen in the context of religion promoting and justifying ideological power moves. It may constitute the greatest public crisis religion in America has faced. Its essence will be whether the "clergy" will seek to reclaim their "citizenship" in order to promote "human rights" and "aid to the poor"—noble ideas, no doubt—in an ideological setting that can, objectively, only be seen as totalitarian.●

SUBCOMMITTEE ON CRIME TO CONDUCT HEARINGS ON THE OPERATIONS OF THE PRETRIAL SERVICES AGENCIES

HON. WILLIAM J. HUGHES

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Monday, March 30, 1981

● Mr. HUGHES. Mr. Speaker, I wish to inform my colleagues that the Subcommittee on Crime of the House Committee on the Judiciary will hold hearings on March 31 and April 6 to take testimony on the activities of the pretrial services agencies (PSA's).

In 1974, a pilot program of 10 PSA's was established to determine whether the Federal courts could benefit in making bail related decisions by having better information about per-

sons arrested on Federal criminal charges. Results from these 10 districts have shown an increase in the number of defendants released on bail pretrail, thereby saving money by cutting down on unnecessary detention. At the same time, rates of failures to appear and pretrial rearrests have stayed the same, or have decreased.

Along with Judiciary Committee Chairman PETER W. RODINO and my colleague DON EDWARDS, I have introduced H.R. 2841, which would expand the PSA program into all Federal judicial districts. The Judicial Conference of the United States is on record as advocating such an expansion of PSA's.

Consequently, the purpose of the hearings in Washington and New York will be to determine whether the pilot PSA program has worked effectively, and whether it can be improved.

The March 31 hearing will be held at 10 a.m. in room 2237 Rayburn House Office Building. The April 6 hearing will be held at 9 a.m. in the Ceremonial Courtroom of the Federal Courthouse for the Eastern District of New York, 225 Cadman Plaza East, Brooklyn, N.Y. The hearing in New York will give the subcommittee the opportunity to hear from those involved with the PSA's on a national level, including representatives of the Judicial Conference, the Administrative Office of the U.S. Courts, as well as, several persons familiar with the operation of the PSA's on the Federal and local levels. The witnesses for the New York hearing will be judges, magistrates, lawyers, and probation and pretrial officers, who have local field experience with the agencies.

All interested persons or organizations wishing to submit testimony for the record of the hearing on H.R. 2841 or desiring further information should address their communications to the Subcommittee on Crime, Committee on the Judiciary, 207E Cannon House Office Building, Washington, D.C. 20515. Telephone: (202) 225-1695.●

FEDERAL ASSISTANCE FOR BUSINESS

HON. LOUIS STOKES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, March 30, 1981

● Mr. STOKES. Mr. Speaker, since President Reagan unveiled his program for economic recovery last month, this body has been enveloped in an often heated debate over the President's proposals. Serious questions have been raised about the validity of supply-side economics, the wisdom of dramatically increasing the already excessive defense budget and the equity and justice of the proposed budget cuts.

Thus far, we have primarily focused on budget cuts as they relate to social programs. Many Members of Congress share my firm contention that these reductions will have a devastating impact on the millions of Americans who must rely on Federal assistance for subsistence. If these cuts are agreed to, we can expect the incomes of those whose level of existence balances precariously on the margin of poverty to plunge quickly below that margin. And those Americans who currently live at or below the poverty level will plunge to a depth which will in all likelihood preclude them from ever improving the quality of their lives.

Mr. Speaker, I am extremely concerned about the administration's recommendations not only because of the inevitable devastation that will result, but also because these proposals represent an apparent denial of the economic injustice in this country and the extent to which so many Americans must rely on Federal support to subsist. Therefore, I have committed myself to insuring that the health and well-being of millions of Americans is not sacrificed while this administration experiments with economic theories.

Yet, Mr. Speaker, in the course of this ensuing debate, we have focused our attention on Federal assistance only as it pertains to social support services. We have neglected to examine other forms of assistance which this administration intends to expand, rather than limit. In the process of providing business and industry with the capital needed to modernize and engage in more research and development, the Federal Government will offer business a $164.3 billion reduction of tax revenues through 1984. If the use of tax policy to regulate the economy or bring about social change is not a legitimate function of the Government, what purpose do tax exemptions serve?

I would like to bring to the attention of my colleagues an article which appeared in the New York Times, Friday, March 15, 1981. The article, written by Robert Nesson, astutely points out the inherent contradictions in the Reagan proposal to reduce Federal spending for programs which fulfill fundamental human needs while reducing Federal revenues in the form of tax abatement for business and industry.

The text of this article reads as follows:

THE SAME OLD BEGINNING

CONCORD, MASS.—For one moment, while listening to President Reagan's State of the Union Message, I was electrified. He made a statement that, if I heard it correctly, struck at the very heart of our tax system. But since it was the night before my 49th birthday, and my faculties are not what they once were, I thought it possible that I had been mistaken.

The next morning, before anyone could wish me a happy birthday, I rushed to get the newspaper. And, yes, I was right. There it was. "The taxing power of the Government must be used to provide revenues for legitimate Government purposes. It must not be used to regulate the economy or bring about social change."

This, indeed, was the clarion call for a new beginning. Such a limited view of the taxing power was nothing short of a revolutionary change in perspective. And I was prepared to endorse Mr. Reagan on this point with my entire being.

Yet, something nagged at me—a recollection of something else that did not quite fit. So I reread the speech until I finally found what was bothering me.

"The third part of the tax package is aimed directly at providing business and industry with the capital needed to modernize and engage in more research and development. This will involve an increase in depreciation allowance. . . ."

"Why isn't this," I asked myself, "a use of taxing power to regulate the economy?" I was mystified. But not for long. The answer is—this is a use of the taxing power to regulate the economy.

Mr. Reagan was suggesting a revision of depreciation rates that would allow for huge increases in deductions for those investing in plant and equipment. Although he used several words, instead of two, to describe it, he was talking about tax shelters.

Accelerated depreciation, which bears no necessary relationship to an actual decline in value, is the classic way to shelter income from taxation. And whether you call the deductions supply-side incentives, spurs to productivity, or (as some of us still remember) "trickle-down" economics, they have the effect of regulating the economy—in fact, their express purpose is to bring about a specific kind of economic behavior. And the larger the deductions, the more the regulation.

Then, I wondered, was President Reagan being disingenuous? If he was, why wasn't there a hue and cry from some of my favorite liberal congressmen, newspaper columnists, and television commentators? Could it be that there is a grand conspiracy to conceal in vigorous rhetoric what is being done?

I do not like conspiracy theories, and perhaps the way Mr. Reagan, his advisers, and members of Congress see it, no Government monies are being spent by allowing for an acceleration of depreciation. Rather, the private sector, through tax savings, provides the funds necessary to get the "sleeping giant" moving again.

If, however, this accurately describes what is happening, then there is something perplexing about one of the tables produced by the Administration. Under the heading "Depreciation Reform," there is shown a $164.3 billion reduction of tax revenues through 1986. This means that the Government is not going to supply business with $164.3 billion. It is only going to allow business to pay $164.3 billion less in taxes.

But how is this different—except for the mechanics—from raising $164.3 billion in taxes and then giving it back to business? The $164.3 billion is not some phantom figure just floating around somewhere in space. Rather, it is a Government grant—albeit indirect—in real, hard currency.

Why, then, doesn't the Government simply make outright grants to those investing in new plant and equipment?

This approach would certainly go far in simplifying the Internal Revenue Code, probably the most monstrously complicated and complex piece of Federal legislation

ever enacted. Moreover, the Government could direct the funds to those areas of the economy most in need of help.

The proposal, as it now stands, does not discriminate between advanced technological facilities and warehouses to store cosmetics, nor between those industries that are already profitable enough (the oil companies, for example) and those whose survival may depend upon governmental assistance.

It may be that Mr. Reagan has fallen victim to the necessities of modern public relations. How would any of us react to a headline reading: "Reagan Proposes $164.3 Billion Cash Subsidy for Business."

But whatever the reasons and motives underlying Mr. Reagan's plan, isn't it more of the same old wine being poured into the same old bottles? Isn't this the way it has always been done—making economic policy covertly through the use of the tax laws, thereby enabling Congress and the President to do indirectly what they would not dare do directly (and, for that matter, what the business community wouldn't have the temerity to suggest they do directly)?

And, alas, could it be that there has been no new beginning, after all?●

THE SOMALIA REFUGEE CRISIS

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, March 30, 1981

● Mr. DERWINSKI. Mr. Speaker, something that has concerned me for some time has been the terrible condition of the refugees in Somalia. The size of the problem of the large numbers of people involved, of whom many are children and the intensity of their needs, is of truly crisis proportions. At its midwinter meeting, the Executive Council of the American Federation of Labor & Congress of Industrial Organizations adopted a resolution on the Somalia refugee crisis which I am reprinting below:

SOMALI REFUGEE CRISIS

The United Nations High Commissioner for Refugees estimates that there are more than 3.4 million refugees on the African continent. There are nearly 1.5 million in Somalia alone, and 91 percent of those refugees are women or children under the age of 15. The more than 300,000 children under the age of six in Somali refugee camps suffer the highest mortality rate, primarily due to measles and diarrhea.

There is an urgent need for medicine, vaccines, hospitals, doctors, nurses, food, clothing and shelter for the Somali refugee population.

Despite its extremely limited resources, the Somali government has allocated health and educational personnel, trucks, well-digging equipment, and, most inportantly, food to the refugees. Because Somalia is a net importer of food, the provision of any food supplies to the refugees creates shortages among its own population.

While the United States has been the major source of food for the refugees, there is an urgent need for further refugee assistance, particularly immunization vaccines and other medical supplies. We urge the United States government to increase emergency refugee relief assistance to Somalia.

We applaud the efforts of our affiliates, the American Federation of Teachers and the Graphic Arts International Union, to focus public attention on this crisis.

The AFL-CIO will join this effort to publicize the urgent need for assistance to the refugees in Somalia. We urge our affiliates to provide financial assistance to the private organizations engaged in relief efforts.●

EFFECTS OF OIL IMPORTS ON NATIONAL SECURITY

HON. CHARLES WILSON

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Monday, March 30, 1981

● Mr. WILSON. Mr. Speaker, I wish to submit to you today the findings of a study by the Department of the Treasury on the effects of oil imports on national security. This comprehensive report concluded in 1979 that our overdependence on ever-more-costly imported oil has a disastrous effect on America's national security.

Unlike the temporary effects we feel during gasoline shortages, when people wait for hours to fill their gas tanks, this national security threat has far graver implications in terms of our defense capabilities. The impression of vunerability created by this Nation's seeming inability to control its increasing dependence on oil imports directly affects our defense and foreign policies. The U.S. reliance on foreign oil is perceived by its industrialized allies, the developing countries, the Soviet bloc, and the oil-exporting countries as a sign of weakness and evidence of a lack of international cooperation. This perception works to the Nation's great disadvantage in terms of our national defense and foreign policy.

I submit the Department of Defense's description of the impact of U.S. dependence on foreign oil:

The threatened impairment of the national security must be assessed not only in terms of domestic capabilities to support national defense needs, but also in terms of international perception. Other countries make decisions on foreign relations and defense matters based upon their perceptions of our strength. The impact of petroleum import dependence on the United States could alter those perceptions significantly causing foreign governments to misjudge U.S. intentions. Such decisions would directly affect the security of the United States.

In the area of foreign policy, the State Department has reported:

It is our view that the current oil import situation impairs our ability to achieve our foreign policy objectives both economic and political. Moreover, the way in which we deal with this situation is widely regarded by other countries as a test of the United States leadership and determination to play a constructive role in international relations.

Certainly, the Nations's current and projected dependence on foreign oil is appreciably greater than when past findings in the 1960's and 1970's determined our dependence threatened national security. The risk of interruption has not been sufficiently lessened, and measures to substantially reduce the impact of interruptions are not yet in place. But they can be. We can and must work now to lessen our dependence on foreign oil and provide energy independence for America.

This is why I stand here in support of the Department of Energy's demonstration plan programs to develop synthetic fuels from domestic natural resources so that we may displace current oil imports. Consider that one synthetic fuels plant producing at commercial size could produce the equivalent of 100,000 barrels of imported oil each day. The $90 billion we spend overseas each year on oil could be spent in our country, at home, to provide jobs and needed public services.

Since the 1950's, our defense agencies have been warning us that our dependence on foreign oil has deleterious effects on national security. It is time we changed that situation and proved we have the national will to produce domestic energy for Americans. Our allies and foes alike must realize that we are not only committed to building sophisticated weaponry be we are equally committed to producing domestic energy that will fuel our jets, tanks, and ships.

I urge my colleagues to support the Department of Energy's demonstration projects for synfuel production by leaving the fiscal year 1981 funding intact and voting for continued funding in fiscal year 1982 and the years to follow.●

ANNUAL REPORT OF THE OFFICE OF TECHNOLOGY ASSESSMENT

HON. LARRY WINN, JR.

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Monday, March 30, 1981

● Mr. WINN. Mr. Speaker, in recent weeks the Office of Technology Assessment submitted its report to the Congress. This report summarizes what I consider to be a very productive year. OTA completed 27 studies which addressed some of the most important issues this Congress faces: energy from oil shale and biomass, technological and competitive strength of our steel industry, advanced air transport technologies, ocean thermal energy systems, and coal slurry pipelines, just to name a few.

Admittedly, it is very easy to study an issue without actually accomplishing anything of substance. I submit to you though that this is not the case with the OTA. Last year OTA representatives were requested to testify

before 9 different congressional committees on 17 separate occasions and gave 249 individual briefings and responses to Members of Congress. In addition, according to GPO records, OTA reports are among the bestselling in its category with gross receipts of $250,000 for 1980.

In recent years OTA has experienced some growing pains but this relatively new arm of the Congress has finally become of age. This small group of 130, under the direction of Dr. John Gibbons, is establishing a solid reputation of integrity. I commend their efforts in 1980.●

WILD SHOTS, HALF TRUTHS

HON. ROBERT H, MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, March 30, 1981

● Mr. MICHEL. Mr. Speaker, whenever I hear a big spender of tax dollars use the word "compassion" I check to see if my wallet is still there. Compassion to these big spenders usually means taking money away from hardworking families and pouring it into programs which have long since grown away from their original purposes and over which there are few controls and little oversight. Anyone suggesting that these programs' unlimited appetite for tax dollars be curbed is immediately said to lack compassion. Well, I am glad to say we have a President with the courage to have true compassion for taxpayers, for families whose budgets are ravaged by inflation, and also for those originally intended as beneficiaries of the programs.

The New York Post, in a typically straightforward and unmistakably clear manner puts the case for President Reagan's program very well. I include in the RECORD an editorial from that newspaper, "Reagan's Economic Critics: Wild Shots, Half Truths," March 25, 1981.

REAGAN'S ECONOMIC CRITICS: WILD SHOTS, HALF-TRUTHS

President Reagans's economic plan is now running into fierce attacks from the self-appointed keepers of the nation's conscience. They are trying to exaggerate and distort the alleged effects it will have on the truly poor. They are trying to exploit these alarms to present Budget Director David Stockman as "cruel, inhumane and unfair."

Their aim is wild. Their half-truths skew their argument.

Many of the critics are clearly part of the huge bureaucracy which now provides welfare services and have a vested interest in protecting their own special turf. Others are protesting for obvious political reasons the first genuine change in direction of this country in 50 years.

For example, much is made of a University of Chicago study purporting to show that the working poor would be hardest hit by proposed welfare changes and thus no longer have any purpose in working. The facts are quite different: 80 per cent of the welfare population does not work at all—two-thirds of them are children.

There can be no doubt that in some cases the incentive to work will be diminished. It is impossible to achieve at one and the same time (1) a reasonable floor level of cash welfare benefits to the poor; (2) reasonable costs; (3) a low marginal "tax"—or less benefits—on those who go to work and still receive welfare benefits.

To provide the incentive for the poor working family to go to work, it is calculated, would require making their benefits worth $15,000 a year—while not increasing those of the truly needy living, say, next door.

Welfare must be a safety net for the poor, not an income supplement for the working poor. The abuses of the welfare system are well known. So are the abuses of the school lunch and food stamp programs, with the children of middle-income families getting unnecessary free meals along with those who genuinely need them.

Stockman has no scruples about taking this approach further—and he is right to do so. Under current New York State law, the $8333 total cash welfare benefits available for a family of four are the equivalent of $4.87 per hour compared with the minimum wage of $3.35.

The truly poor who qualify for these programs have a legal right to them—and that right is in no way being changed or challenged. But the truly poor and the near poor—and most certainly millions of others who are not poor at all—do not have a right to the huge array of unnecessary government social services which have grown up over the last 15 years.

These cover 40 separate federal categorical grant programs—some for less than $2 million a year each. They include High Blood Pressure Service, Migrant Health Service, Home Health Service, Maternal and Child Health Service, Sudden Infant Death Service, Genetic Services, Hemophilia, Family Planning, Fluoridation, Rat Control, Lead Paint, Runaway Youth, Child Abuse, Low Income Energy Assistance, etc. etc.

In the present fiscal year 1981 budget they cost $9.1 billion and were scheduled to rise in the next budget to $9.5 billion. That is a huge amount of money for the federal government to be giving away. That is the way to the Welfare State—from the cradle to the grave, courtesy of an increasingly bankrupt federal government.

These 40 separate services are now being consolidated into four separate block grants to the states, two covering health services, two social services (including legal services).

If the states wish to turn themselves into separate welfare states, that is entirely their affair. But it is not and should not be the federal government's affair. What the critics of Reagan and Stockman want, clearly, is an expanding welfare state. That is not what the people voted for, and Reagan and Stockman are going to insure that is not what they get.●

INSTANT ANALYSIS REGARDING THE ECONOMY

HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Monday, March 30, 1981

● Mr. SKELTON. Mr. Speaker, we are all well acquainted with the various television instant analysis following the President's address to the Nation. After the recent address by the President regarding the economy, the Kansas City, Mo., television station KCMO deleted the network's instant analysis and provided viewers with the names and addresses of their elected Representatives and urged the viewers to think about the President's remarks and write to the Members of Congress.

A recent news release from Kansas City's TV channel 5 comments on their stand on instant analysis, and I commend them.

The comments follow:

VIEWERS SUPPORT TV CHANNEL 5 STAND ON INSTANT ANALYSIS

Community reaction in Kansas City, Missouri, continues to mount after KCMO-TV, the city's CBS affiliated station, deleted the network's instant analysis of President Ronald Reagan's economic address to Congress last week. Instead of the analysis, the station provided viewers with the names and addresses of elected representatives and invited viewers to think about the President's remarks and to write to their Senators and Representatives.

"Telephone calls and letters to the station are running 92 percent in favor of the station's position, and never before has the station received such a large volume of comments," according to Philip A. Jones, Vice President and General Manager of KCMO-TV.

Commentators from the three major television networks customarily analyze the remarks of Presidents immediately following major speeches. The station's concern developed during the networks' analyses of President Reagan's news conference on February 4, 1981. "Their remarks dealt primarily with Mr. Reagan's style and delivery, rather than with the content of his message," said Jones, "and I was concerned that their opinions, delivered immediately after the news conference, could not permit Americans sufficient time to interpret the remarks for themselves."

Jones convened the station's editorial board the next morning and a plan was developed to broadcast station editorials on the subject and to delete the analysis that was expected 12 days later (February 18) when the President addressed Congress.

"We had originally planned to videotape the analysis and play it back later that evening," according to Jones, "but CBS would not permit us to run it later. They believed it wouldn't have any meaning if it were broadcast out of context with the speech."

Local stations can pre-empt network programming without permission but they must have network approval to broadcast it at a different time. Jones is not dissatisfied with the network, saying "CBS has been much more responsive to constructive criticism than other networks and I am confident that they will be receptive this time. Our objective was to measure viewer reaction and to share it with the network. That reaction was far greater and more sympathetic than we ever imagined, as we've now received over 600 phone calls and letters and less than 50 of them have been negative. We apparently struck a sensitive nerve with our viewers and we would guess viewers all over the country have similar thoughts," Jones said.

The station will now provide the network with copies of the mail, in hopes the public outcry will encourage the network and the commentators to think a little more about what they're saying.

According to Jones, "Like our viewers, we do not oppose summaries of Presidential remarks. But we do oppose the editorialization that so often creeps into the analysis or summary . . . editorialization that affects the shaping of public opinion at a time when the American public is attempting to shape its own opinion on the topic being discussed. We believe the analysis could either become strictly a summary or be broadcast by the network at a later hour.

"We are hopeful that our action will bring about a network analysis of its own policy on analysis," Jones concluded.●

VERMONTERS EXPRESS VIEWS ON MAJOR ISSUES FACING CONGRESS

HON. JAMES M. JEFFORDS

OF VERMONT

IN THE HOUSE OF REPRESENTATIVES

Monday, March 30, 1981

● Mr. JEFFORDS. Mr. Speaker, approximately 3 months ago I sent to all Vermont households a questionnaire on issues facing what was then a brandnew session of Congress.

The task of tabulating the responses has now been completed. Because the response to the questionnaire represents a large-scale outpouring of opinion on many of the key issues that will come before us this year. I wish to share the results with my colleagues.

In all, just under 9,000 Vermonters responded to the questionnaire. Not all respondents expressed an opinion on every issue listed, so where appropriate, I have computed the responses in terms of percentages of Vermonters who expressed an opinion on each given issue.

It should be emphasized that this questionnaire was distributed prior to President Reagan's budget proposals. Therefore, it may be risky to project from the responses the degree of support in Vermont for the President's economic strategy. However, as a general observation, my guess is that most of those who responded to the survey would approve of the overall economic strategy but disagree sharply with some of the budget-cutting priorities.

NATIONAL DEFENSE

Almost all respondents chose among four statements, indicating which of the four comes closest to their own views on defense. The results indicate a wide diversity of opinion on this key issue in Vermont, although a majority—55 percent—indicated that defense spending should be increased. The four statements, and the percentage of Vermonters agreeing with each, follow:

We must greatly step up our national defense effort to attain military superiority over the Soviet Union. 31 percent agreed.

We should significantly increase military spending, although military superiority is not an attainable goal. 24 percent agreed.

We should maintain current military spending levels and better target funds by eliminating wasteful programs like the MX Missile. 31 percent agreed.

We should reduce military spending levels. 14 percent agreed.

ARMS CONTROL

As with defense, there is hardly a consensus among Vermonters on the issue of arms control. However, a very substantial majority believe it in our interests to seriously pursue arms control talks with the Soviet Union.

Respondents were asked to choose from five statements the one coming closest to their opinions. The statements, and percentage of Vermonters agreeing with each, follow:

The U.S. should take the lead by unilaterally making significant reductions in its nuclear weapons. 9 percent agreed.

We should ratify the SALT II treaty and negotiate a SALT III agreement making greater reductions in nuclear weapons. 21 percent agreed.

We should negotiate a SALT III agreement while striving for parity with the Soviets in conventional weapons and forces. 34 percent agreed.

We should negotiate a new SALT II treaty which is more advantageous to us. 22 percent agreed.

We should discontinue the process of negotiating arms control agreements with the Soviet Union. 14 percent agreed.

THE ECONOMY

There is a virtual consensus in Vermont favoring movement toward a balanced Federal budget. Two options were listed depicting different philosophies of movement toward a balanced budget: 97 percent of respondents checked one or the other.

Of those who responded, 74 percent said:

Congress should cut costs by making programs more efficient, moving toward a balanced budget as soon as possible but without significantly injuring worthwhile programs.

The other 26 percent said:

The budget should be balanced this year, even if that means eliminating or significantly cutting back services.

The President's program obviously falls somewhere between those two positions.

Only 59 percent of respondents expressed an opinion on whether the Government should exert more or less control over business, indicating perhaps that many feel the overall amount of Government control is about at the right level. But of those who expressed an opinion one way or another, 82 percent said the Government should have less control over business, while the other 18 percent opted for more Government control.

Of all respondents, 70 percent expressed an opinion on whether the Government should assist ailing industries such as Chrysler. Of those responding, 13 percent said "yes," and 87 percent said "no."

Other questions on the economy did not list opposing viewpoints, so the percentage responses may be somewhat understated. Of all those returning questionnaires, 25 percent said inflation should be reduced even at the risk of higher unemployment; 51 percent said steps to reduce inflation should be pursued even if they lead to tighter credit conditions; 19 percent said the Government should enact wage and price controls; 48 percent said taxes should be reduced for individuals; and 26 percent said taxes should be reduced for businesses.

ENERGY

Three options were listed depicting alternative positions on the issue of oil prices and taxation of oil profits. A total of 72 percent of respondents checked one of the three options, indicating perhaps that many Vermonters hold positions not well summarized by the questionnaire. Following are the options and the percentage of Vermonters who expressed an opinion who agreed with each:

Allow oil companies to make higher profits, so that they can develop new energy sources. 23 percent agreed.

Tax the oil companies' profits more heavily, so that the government can fund more energy programs. 43 percent agreed.

Re-enact price controls, to hold down oil prices. 34 percent agreed.

Nuclear power is another complex issue, with a diversity of opinion difficult to capsulize in a simple question. But 84 percent of respondents chose among three options, and of them, the results are as follows:

Speed up licensing of new nuclear fission plants. 28 percent agreed.

Stop licensing new nuclear fission power plants until the waste disposal problems are resolved, and phase out existing plants as soon as reasonably possible. 54 percent agreed.

Build no new nuclear plants, and shut down existing plants immediately. 18 percent agreed.

The general issue of tradeoff between energy production and environmental protection was addressed by 89 percent of those who returned questionnaires. Again, three options were listed. The options, and the percentages of Vermonters agreeing with each, follow:

Loosen environmental restrictions, so that more energy can be produced. 29 percent agreed.

Tighten up restrictions, to assure better protection of health, safety, and the environment. 35 percent agreed.

Maintain environmental restrictions at about the same level we have now. 36 percent agreed.

Finally in the energy area, the vast majority of Vermonters indicated they would like to see more assistance for alternative energy sources, and more incentives for conservation.

The tabulations for these two issues may be understated, as they can only be expressed in terms of percentages

of the total number of Vermonters who returned questionnaires. But even so, 76 percent of respondents said we should "Provide more assistance for alternative energy sources such as solar, wind, hydro, and alcohol fuels," and 69 percent volunteered that we should "Adopt more incentives for energy conservation."

BEVERAGE CONTAINER DEPOSITS

Unlike most of the other issues covered by the questionnaire, many of my colleagues may not feel that beverage container deposit legislation is among the highest priorities for action by this Congress.

However, as a long-time proponent of national deposit legislation, I feel it symbolizes much of what needs to be done by this Congress: It would be anti-inflationary, would save substantial amounts of energy and valuable material resources, reduce waste, and improve the environment with little or no sacrifice by the general public.

The best test of whether these goals are accomplished by deposit legislation is the level of support such a system has among people who have lived with it for many years. The many national studies showing great benefits to be attained by a national deposit law would be meaningless if people who have lived with the system for a period of years did not agree it is worthwhile.

Vermonters, in overwhelming numbers, believe it is worthwhile. Of those returning the questionnaire, 95 percent expressed an opinion on the State deposit law. Of those, 97 percent said "I support Vermont's deposit law. It should remain in effect." Only 3 percent said "I oppose Vermont's deposit law. It should be repealed."

With the possible exception of motherhood, that is about as close as you can come to a consensus on any issue, anywhere in the country. I sincerely hope my colleagues will take note of it.●

H.R. 1362—COSPONSORS, HEARINGS

HON. BERKLEY BEDELL

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 30, 1981

● Mr. BEDELL. Mr. Speaker, I am pleased to add a new group of names to the list of Members who are cosponsors of H.R. 1362, the Small Business Motor Fuel Marketer Preservation Act of 1981. This brings to 75 the number of cosponsors of the legislation in the House.

On Tuesday and Wednesday of this week the Subcommittee on Energy, Environment and Safety Issues Affecting Small Business will hold hearings on H.R. 1362. Each day, the hearing will begin at 2 p.m. in room 2359, Rayburn House Office Building.

The subcommittee is calling a wide range of witnesses and the hearings should be rather informative. They will be open to the public.●

LEGAL AID IS ESSENTIAL TO OUR SYTEM

HON. BARBARA A. MIKULSKI

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Monday, March 30, 1981

● Ms. MIKULSKI. Mr. Speaker, the President has proposed to eliminate the Legal Services Corporation. I have always been a strong supporter of the Legal Services Corporation. This is not a program of some radical do-gooders. Ours is a society based on law, and on equal access to law. Doing away with the Legal Services Corporation will deprive one segment of society of this equal access.

Stephen H. Sachs, the attorney general of Maryland, has written an article which appeared in the Baltimore Sun on March 22. The article points out that the Legal Services Corporation provided absolutely essential legal assistance to 76,000 persons last year in Maryland who could not afford a private lawyer. There is no way that private attorneys could fill the void that would be created if legal aid were eliminated.

According to Robert Cahill, speaking for the Baltimore City Bar Association:

There just are not enough lawyers to go around. We presently supplement existing programs through volunteers and we fill in during emergencies, but there is no way we could do it all, no matter how public-spirited our members may be.

A copy of Mr. Sachs' article follows:

LEGAL AID IS ESSENTIAL TO OUR SYSTEM

(By Stephen H. Sachs)

President Reagan's budget cutters want to kill the federally funded Legal Services Corporation, whose 5,000 lawyers serve the legal needs of nearly 30 million citizens who live in poverty.

The attorney general of a state that has frequently been sued by the corporation's local outpost, Legal Aid, might be expected to anticipate the last rites more in satisfaction than in sorrow. As my mother-in-law would put it, I need additional costly legal challenges like I need "water in my shoes," especially when Maryland's legislative axes are busily biting into the sinew and bone of an already lean state budget.

But the truth of the matter is that we all need the Legal Services Corporation very much. In fact, of all the trumpeted economies of the new team in Washington, I can't think of any that is more wrong headed—and mean-spirited—than the plan to scuttle Legal Services.

For many, it is a matter of fundamental fairness. Government at all levels has armies of lawyers on public payrolls to counsel, to sue and to defend against suit. Corporations have found it increasingly necessary to rely on expensive legal advice, which is recognized as a legitimate business expense and subsidized through substantial tax deductions.

The poor have legal problems, too. Big ones. Even their "routine" encounters with the law—injury at work, eviction, divorce—are aggravated by the unremitting bleakness of poverty. Most of us will never know what it is like to fight an unlawful eviction notice—alone.

But the poor also live in symbiotic relation to a faceless bureaucracy that administers a complex web of regulations governing welfare, Medicaid, unemployment insurance and all the other support services that even the new administration regards as a "safety net" for the poor. For such citizens, a bureaucratic error or an administrator's carelessness can produce a life crisis.

Imagine, for example, the effect on a family when a father is injured on the job and is mistakenly denied his application for a $375 monthly disability allowance. It happens. Few of us would think of facing such a judgment uncounseled, or of suffering it quietly if grounds for challenge exist.

Many of the poor, however, not only have no way of knowing that an error was committed; they don't know where and by whom the decision was made. Comprehending the forces that control your life is a bit of a luxury at $8,200 a year, Legal Services' poverty line for a family of four.

For the poor, living with the possibility of a shattering and incomprehensible injustice is the badge of their condition. Legal Services is an attempt to alleviate that condition. The program's simple credo is that a nation that professes a belief in "equal justice" should not permit poverty to weigh so heavily on the scales of justice.

When Legal Services lawyers serve their clients they also help to enforce the law. The criminal law, of course, is enforced by federal and state prosecutors and police. But most laws are civil statutes that create legal rights and protections owed to citizens by government. Thus, just as the law protects a local business from a takeover by a foreign corporation or confers on an oil company rights to a depletion allowance to encourage exploration, so, too, does the law give citizens living in poverty certain rights and entitlements to medical treatment, rent supplements and food.

In a perfect world, all of these laws and regulations would be models of clarity perfectly administered. In fact, however, because of the increasing complexity of the law, fiscal pressures on public officials and the occasional inattention or ignorance of administrators, the civil law frequently depends for its administration and implementation—its enforcement, in other words—on the administrative claims or law suits pressed by the affected parties themselves.

Our legal system expects and depends upon this sort of private law enforcement. For corporations and most citizens, such claims are pressed by corporate lawyers and the private bar. For the poor, that enforcement role has been played—quite successfully—by Legal Services Corporation lawyers. Here in Maryland, for example, suits by Legal Aid lawyers have:

Regained unemployment compensation for 24,000 Marylanders whose benefits were reduced because of an erroneous interpretation of law by a state agency.

Restored Medicaid services to 188,000 Marylanders, mostly elderly and children, whose aid was improperly terminated.

Guaranteed indigent veterans and their widows a right to be heard before termina-

tion or suspension of monthly veterans' or widows' benefits.

Established the right of all citizens to a hearing before involuntary commitment to state mental hospitals.

These are only some of Legal Aid's victories in Maryland courts. Legal Services lawyers have prevailed in scores of similar suits around the country. They also, of course, press claims and file suits that do not, and should not, prevail. When they do, my office, and my local and federal counterparts vigorously oppose them. Legal Services' lawsuits, in other words, are sometimes "wrong." It may also be that some of the corporation's practices, like its aggressive and indiscriminate pursuit of attorney's fees in every civil rights case, need rethinking.

But as we have seen, Legal Services lawyers are often "right." And when they are "right" they have not only won dollars or services or protection for their clients; they have enforced the law, and they have made our proud boast about "the rule of law" a reality for millions of Americans.

Many of these enforcement successes have seriously antagonized some of Legal Services' critics, most notably Mr. Reagan. These critics resist and resent the notion that Legal Services lawyers rattle establishment cages—especially when they win, as they often did in California when Mr. Reagan was governor. To the extent that these successes have endangered Legal Services' survival, it might be said that the organization sued "not wisely but too well."

The critics believe that Legal Services' attention should be limited to the specific legal problems of the individual indigent client who seeks advice—a divorce, a Social Security claim, a dispute with a landlord. They appear to view poverty law as a kind of charitable calling whose practitioners, like some medieval friars, wander among the poor dispensing legal alms. The view is not ungenerous. It is, however, a form of noblesse oblige—American style. "Oh, look dear, the poor have divorce lawyers just like us!".

But his narrow view of the Legal Services program overlooks the fact that with one attorney for every 6,000 poor people, filing class action lawsuits is good lawyering and often the only way in which Legal Services lawyers can represent their clients. In so doing, these lawyers play exactly the same role as that quite properly played by counsel for industry, labor, trade associations and special interest groups of all kinds when they seek to enforce the civil law for the benefit of their clients.

Finally, Legal Services lawyers ensure that the adversary process—the engine that drives our judicial system—runs well. The root premise of the adversary system is that "the truth," or its closest approximation, is most likely to emerge from the clash of competing courtroom forces, the forceful presentation of opposing views of the law and the facts and the testing of witnesses by vigorous cross-examination. It resembles familiar economic models in its assumption that competitors, each acting in its own self-interest, will produce the most socially desirable result.

But for the system to work, the fight must be fair. Only if both sides are ably represented by lawyers who have the time and the energy to research and investigate and prepare can we be confident that the decision-makers, judges and juries, will do—or approximate—justice.

The sound working of the adversary system is uniquely important in the United States. Due no doubt to our federal structure and our written Constitution, almost every great cause eventually becomes a legal issue to be decided finally by the courts.

Lawyers, some feel, are too much with us in America. An Englishman once called us a race of lawyers. We undoubtedly litigate too often about too little and misuse the courts to resolve disputes best handled by mediation and arbitration.

But it surely is little exaggeration to say that a reader of the Supreme Court Reports is as well informed about the nature and quality of life in America as is a reader of The New York Times or The Sun. It is difficult to disagree with the notion that courts—which decide almost every issue of public concern, from busing and abortion to prison overcrowding and prayers in schools—have as much to do with governing this country as do presidents, governors and legislators.

Access to the judicial system in this country, then, is access to government itself. Denial of access amounts to a special kind of disenfranchisement. Such a thing would not only cheapen our claims to be a democratic society. It would invite the fatal flaw of every closed society—creation of a bitter underclass with no confidence or stake in the system, ready to abandon rational discourse and to settle its mounting grievances in the streets. And it would come at the worst possible time—when the summary dismantlement of federal programs places the poor in greatest need of legal counsel.

It hasn't been so long ago that we sanctified the sweatshop in the name of "liberty of contract" and perpetuated badges of slavery in the name of "separate but equal." Goldsmith's observation that "Laws grind the poor and rich men rule the law" has, unfortunately, more than a little modern application. But many lawyers, in public and private practice, work very hard all their professional lives to blunt what truth there is in that statement.

Legal Services lawyers are among them. They should be permitted to continue their valuable work. They help make "equal justice under law" more than an empty phrase.●

MASSACHUSETTS HOUSE OF REPRESENTATIVES MEMORIALIZES CONGRESS ON ATLANTA TRAGEDY

HON. BARNEY FRANK

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Monday, March 30, 1981

● Mr. FRANK. Mr. Speaker, the tragic killings and disappearances of black children in Atlanta has become a great concern for the people of good conscience throughout the country. This is not just a matter for the black community or for the Atlanta community. This horror affects us all and touches us all.

Recently the Massachusetts House of Representatives passed a resolution memorializing the Congress to utilize all the powers of the Federal Government to assist in the solution of these senseless killings. Mr. Speaker, I am proud to have cosponsored H.R. 2316, filed by my colleague from Connecticut, Mr. MOFFETT, which would authorize funds to the city of Atlanta to help in the investigation. I believe that the Congress must and should show its support to the city of Atlanta by passage of this bill.

I commend the Massachusetts House of Representatives, in which I had the honor to serve for 8 years, for their concern and compassion for the victims of these heinous crimes and for their families. I am proud to insert the resolution in the RECORD.

A copy of the resolution follows:

RESOLUTIONS MEMORIALIZING THE CONGRESS OF THE UNITED STATES TO ASSIST IN THE SOLUTION OF THE UNSOLVED MURDERS AND DISAPPEARANCES OF CHILDREN IN ATLANTA, GEORGIA

Whereas the city of Atlanta, Georgia has during the last nineteen months witnessed the unsolved murders and disappearances of twenty-one children of African-American descent; and

Whereas these senseless murders have ignited fears among citizens throughout this Nation and the Commonwealth of Massachusetts; and

Whereas the young victims of the Atlanta tragedy have been denied the chance to witness the fulfillment of the principles of equality and justice for all expressed in Dr. Martin Luther King, Jr.'s momentous speech of 1963. "I have a dream": Therefore be it

Resolved That the Massachusetts House of Representatives lends its voice to other legislative bodies throughout this great Nation in calling for our Federal Government to utilize all powers of our United States Justice Department to assist in the solution of these senseless killings; and be it further

Resolved That we, the Massachusetts House of Representatives, recognize the symbol of the green ribbon as an expression of our sympathy for the families of the victims, and of our sincere concern over these senseless tragedies; and be it further

Resolved That copies of these resolutions be forwarded by the Clerk of the House of Representatives to the President of the United States. The United States Justice Department, the Presiding Officer of each branch of the Congress, and to the members thereof from this Commonwealth.●

UTILIZING CRIMINAL ASSETS TO PURCHASE EVIDENCE FOR DRUG INVESTIGATIONS

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, March 30, 1981

● Mr. GILMAN. Mr. Speaker, during the closing days of the 96th Congress, I introduced H.R. 8233, a measure cosponsored by 14 of my colleagues on the Narcotics Select Committee, that would permit our Federal drug law enforcement officials to use proceeds from the sale of forfeited property to purchase evidence and other information in connection with their drug trafficking investigations. Today, I am introducing a revised version of that

proposal, retaining the original purpose of H.R. 8233 and placing a ceiling on the amount of forfeited proceeds that could be used to purchase evidence and other information—commonly called PE/PI money or drug buy money.

Section 511(e) of the Comprehensive Drug Abuse Prevention and Control Act of 1970 (Public Law 91-513, 21 U.S.C. 881 (e)) currently requires the Attorney General to turn over to the U.S. Treasurer the proceeds of forfeited property, which, after certain expenses have been paid, are deposited in the general fund of the Federal Treasury. Rather than turning this balance over to the general fund, my proposal would permit the Drug Enforcement Administration (DEA) to utilize not more than $5 million of the forfeited proceeds to purchase evidence and other information for its drug investigations during fiscal year 1982 and thereafter, $10 million in forfeited proceeds or the equivalent of 5 percent of DEA's authorized appropriation, whichever is greater. These amounts are intended to supplement, not to replace or to reduce authorized appropriations for DEA's drug trafficking investigations and are limited to a specific function: the purchase of evidence and other information needed for the arrest and conviction of drug traffickers. The Attorney General would be required to transmit an annual report to the Congress on the expenditure of these funds.

During numerous hearings conducted by our Narcotics Select Committee—of which I am a member—Federal, State, and local law enforcement witnesses have complained that they do not have sufficient funds to conduct their drug investigations. Out of a total budget of approximately $208 million for fiscal year 1981, DEA has about $10 million to purchase evidence and other information, which according to an official, is insufficient to operate all of its domestic and foreign operations.

In fiscal year 1980, DEA, working with the Internal Revenue Service, the U.S. Customs Service, and State, local, and foreign law enforcement agencies, seized $90.8 million illicitly obtained drug assets, of which more than $42 million was forfeited to the Federal Government. At a time when dollars are scarce, why not utilize some of these forfeited drug proceeds to help underwrite drug investigations? Why not use some of these untaxed criminal dollars to help convict drug traffickers?

Mr. Speaker, my proposal would not place an additional burden on our overburdened taxpayers. It would not cost them an extra single penny. It would not increase any appropriation to DEA. Rather, the additional funds to conduct drug buy-money operations would come from the drug traffickers themselves—their illicitly obtained drug assets that were seized and forfeited to the Federal Government: the cash, boats, aircraft, cars, homes, securities, and other financial instruments that were used in their sordid drug trafficking transactions.

Federal, State, and local law enforcement agencies are faced with shrinking budgets and a shortage of real dollars eroded by inflation. These dollar cuts come at a time:

When narcotics trafficking and drug abuse have reached epidemic proportions both in this country and abroad;

When heroin from the record-yielding poppyfields of the Golden Crescent—Iran, Afghanistan, and Pakistan—and the Golden Triangle—Burma, Laos, and Thailand—are adversely impacting upon our cities, towns, and school districts;

When more and more of our citizens are becoming dependent upon or addicted to drugs;

When hospital emergency rooms and treatment centers are reporting increased numbers of drug injuries and drug deaths;

When budgetary restraints have forced the closing of certain DEA overseas operations, the curtailment of a successful DEA task force, and a proposed cutback in law enforcement personnel; and

When the cost to purchase heroin has skyrocketed to approximately $10,000 an ounce or more than $320,000 a kilogram.

The Comprehensive Drug Abuse Prevention and Control Act of 1970 permits the seizure and forfeiture of illicitly obtained drug assets, a valuable tool that attacks drug traffickers where it hurts the most—in their pocketbooks. My proposal would take the additional step not provided in that act. It would: first, help meet the increased costs of conducting drug investigations, of which the purchase of evidence and other information is a vital ingredient, by permitting drug law enforcement officials to tap a limited amount of forfeited drug assets before they are turned over to the general fund; second, make effective use of an available resource; and third, use untaxed criminal dollars to help convict drug traffickers.

Sterling Johnson, a frontline special narcotics prosecutor for New York City, has commented:

> How ironic it would be for drug traffickers to share the burden of our taxpayers by being sent to prison from the proceeds of their illicit transactions.

Mr. Speaker, in an effort to help achieve that irony, I am at this point in the RECORD inserting the complete text of my bill and I urge my colleagues to join me in providing our law enforcement officials with urgently needed dollars, at no cost to our taxpayers, to help interdict the epidemic drug trafficking that exists in our Nation and throughout the world.

H.R. 2910

A bill to amend the Comprehensive Drug Abuse Prevention and Control Act of 1970 to permit the Attorney General to use certain proceeds from forfeited property for the purchase of evidence and other information

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 511(e) of the Comprehensive Drug Abuse Prevention and Control Act of 1970 (21 U.S.C. 881(e)) is amended—

(1) by inserting after the second sentence the following new sentence: "Of such moneys and proceeds remaining after payment of such expenses, there are authorized to be appropriated (in addition to such amounts as are otherwise authorized to be appropriated for such purpose) to the Attorney General, for the purchase of evidence and other information in connection with investigations of violations of this title or title III, not to exceed $5,000,000 for fiscal year 1982 and, for each succeeding fiscal year, not to exceed the greater of $10,000,000 or 5 percent of the amount authorized for the Drug Enforcement Administration for its activities for that fiscal year.", and

(2) by striking out the period at the end of the third sentence and inserting in lieu thereof the following: "and for such evidence and other information in accordance with this subsection. The Attorney General shall transmit to the Congress, not later than four months after the end of each fiscal year, a report on the purchase of evidence and other information during the fiscal year (whether under this subsection or otherwise) in connection with investigations of violations of this title or title III.".

(b) The amendments made by subsection (a) shall apply to fiscal years beginning with fiscal year 1982.●

THE PENNYSAVER

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, March 30, 1981

● Mr. DERWINSKI. Mr. Speaker, recently, one of the local advertising newspapers in my congressional district, The Pennysaver, serving the Cook County area of Illinois, was purchased by the Chicago Tribune. The Pennysaver, a shopper publication, provides an outstanding community service to the residents of 35 communities in the southwest suburban area of Chicago. Its publisher and innovator, James Schude, has devoted his career to improving the shopper news industry. He was instrumental in naming the first week in May as National Shoppers Week. Under his leadership, the circulation of the Pennysaver had jumped to 155,000 and became the largest chain of shopper publications in Illinois.

Jim has made an indelible mark on the shopper publication industry as well as having had a significant impact

upon the people and communities served by the Pennysaver. His determination to keep his publication among the best was the key to its great success and quality. Known as one of suburban Illinois most innovative newspaper publishers, Jim Schude was honored by a resolution adopted by the House of Representatives of the Illinois General Assembly. I wish to insert this resolution into the RECORD as I believe this is an honor that is certainly well-deserved:

HOUSE RESOLUTION NO. 1040 OFFERED BY REPRESENTATIVES MEYER, BARNES, AND HUSKEY

Whereas, James Schude, the founder and publisher of the Pennysaver, a paper with a circulation of 155,000 in the Bremen, Orland, Worth and Mt. Greenwood areas, has sold his publication to the Chicago Tribune on August 15, 1980; and

Whereas, During his 15 years as publisher, Mr. Schude's publication has provided employment for over 60 people and has served the citizens of 35 communities; and

Whereas, In its 15 years of existence the Pennysaver, according to audited figures, has become the largest chain of shopper publications in Illinois; and

Whereas, Mr. Schude caused to be introduced in the United States Congress a resolution naming the first week of May of each year as National Shoppers Week, and has devoted his career to upgrading the image of the shopper publication industry; and

Whereas, Over 100,000 people nationwide now find employment in the shopper publication industry and Mr. Schude is one of the pioneers in this new technology; and

Whereas, Mr. Schude will remain with the Pennysaver as publisher for several years in order to further improve the paper's service to its communities; and

Whereas, The industriousness, talent and dedication of this pioneering Illinois publisher deserves commendation; therefore, be it

Resolved, by the House of Representatives of the Eighty-First General Assembly of the State of Illinois, That we join in saluting Mr. James Schude for his distinguished service and far sighted efforts; and, be it further

Resolved, That a suitable copy of this preamble and resolution be presented to Mr. Schude in recognition of our high esteem for him.

Adopted by the House of Representatives on November 21, 1980.

WILLIAM REDMOND,
Speaker of the House.
JOHN O'BRIEN,
Clerk of the House.●

PACIFISM AND ECONOMIC CRISIS IN EUROPE

HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, March 30, 1981

● Mr. MICHEL. Mr. Speaker, Richard V. Allen, National Security Adviser to the President, recently addressed the growing problems of pacifism and economic crisis in Europe. The Baltimore Sun excerpted part of Mr. Allen's remarks before the Conservative Political Action Conference.

At this time I wish to insert in the RECORD, "Europe: A Dangerous Economic Crisis and a Mood of Pacifism" by Richard V. Allen, from the Baltimore Sun, March 27, 1981.

EUROPE: A DANGEROUS ECONOMIC CRISIS AND A MOOD OF PACIFISM

(By Richard V. Allen)

WASHINGTON.—Much is changed from the original days of the Atlantic Alliance when the threat was clear in military and political terms and the tasks of rebuilding the war-shattered economies and societies of Western Europe were clear.

One of the most far-reaching changes is economic. We have heard many times that the combined gross national product of the members of the Atlantic Alliance far exceeds that of the Warsaw Pact and that there is for that reason no particular cause why the alliance cannot field a stronger defense than the Warsaw Pact. This formulation simply neglects the great economic crisis which the industrial democracies have brought on themselves in the past dozen years.

As President Reagan has pointed out, previous leaderships on both sides of the Atlantic were too ready to embrace the fiction that money which governments were spending came from somewhere else—when, in fact, the only place such money could come from was from the pockets of ordinary citizens. We have lacked the political will, both in this country and in Europe, to discipline our social programs. The result has been inflation which has, is, ravaging the economies of all the industrialized economies. At one level this inflation has had the obvious expense of squeezing essential defense expenditures. The prices of the goods and services in the defense sector have been rising, making real increases in defense capabilities more difficult.

We are seeing this effect right now in [West] Germany, for example, the strongest European economy, with an enviable 4 or 5 percent inflation rate; even there in Germany, inflation made such large inroads in the real purchasing power of the defense budget that the government is considering stretch-out and cancellations of key defense programs.

At the same time, I am concerned with the more profound effects of our economic policies of the past years. The deficit-spending, the uncontrollable social programs, have insulated the citizenry of many countries from the reality of their economic circumstances. It makes them reluctant to face the facts. The facts are that Europe is confronted with an economic crisis every bit as dangerous as that which immediately followed the Second World War. Similarly, the United States is faced with an economic crisis which it must solve to maintain its position of world leadership.

Another important change which affects the strength of the alliance is the mood of Europe. It is difficult to discuss this subject without risking some affront or some insult to our friends on the other side of the Atlantic. But it is a subject that cannot be avoided.

The components of this mood are many. One could be the distorted interpretation which some, but certainly not the German leadership itself, give to the concept of Ostpolitik, a policy toward the East. The gifted statesmen who originated this concept saw it as an attempt to find a way to live peacefully and constructively with members of the Warsaw Pact—taking place, for example, for the Germans, on at least three levels:

The relationship with East Germany, the so-called reunification syndrome, taking place on another level with the countries of Eastern Europe, and on a third and most important level in terms of relations with the Soviet Union.

Those who constructed this concept and began its practice recognize that to live on those terms with a large and well-armed neighbor required that their countries had to keep up their own defenses, that they had to do hard bargaining, that they had to maintain their economic and social strength. Unfortunately, however, some parts of public opinion, aided by an unremitting Soviet propaganda effort, prefer to see merit in using the solid gains which East-West progress has achieved as a reason for doing away with safeguards which made such progress possible in the first place.

Another component part is the outright pacifist sentiments which are surfacing abroad. One recent incident of concern is the split in the British Labor Party. Right now the second largest party in Great Britain has adopted as part of its official platform the renunciation of nuclear weapons. We are even hearing, in other countries, the contemptible "better red than dead" slogan of a generation ago.

Still another component of this mood in Europe is the advocacy of arms control negotiation as a substitute for military strength. Arms control, indeed as President Reagan insists, arms reduction, is a component part of our grand strategy and will remain so for the four years of his presidency. As many of this audience know, in December, 1979, the North Atlantic Alliance took a collective decision to modernize its long-range threat nuclear weapons. The current generation of weapons is obsolete and the Soviets are deploying the SS-20, dramatically increasing their capability for long-range nuclear strikes in Europe.

At the same time, NATO has stated that its commitment was to arms control negotiations of those weapons. We detect now some in Europe who believe that the arms control negotiations can somehow substitute for, rather than complement, the modernization efforts in our weapons systems. They believe we can bargain a reduction of a deployed Soviet weapons system for a promise not to deploy our own offsetting system. Common sense as well as the long history of arms negotiations with the Soviet Union shows that the only way to deal with the Soviets is from a strong position. Only if it is absolutely clear then that we are in the process of fielding weapons of our own, will they agree to serious bargaining on their weapons.

We, therefore, believe that the two parts of the December, 1979, decision are inseparable. We will negotiate but we will negotiate while we modernize. We are perfectly willing to set limits on the systems in Europe which will result in a stable balance in the military power on that continent—a balance at all levels of warfare, from conventional forces up to the various types of nuclear forces. If these negotiations should fail, we will want to be sure that we have a stable balance anyhow, and that we will offset the growing Soviet strength with out our own.

The facts of the matter are, and they are harsh, somewhat cold, that the Soviet Union has mounted what has become the

most significant arms buildup in the history of mankind. The momentum of that arms buildup seems not to cease. So that when we refer to the decade of the Eighties as a dangerous decade, and when we speak of a growing "window of vulnerability," it means that the challenges during the mid-decade period will be even greater—that the call on our resources, our patience, our strength, our forbearance will be very great indeed. We will have to see if we measure up to that challenge.

[Richard V. Allen is assistant to the President for national security affairs. This article is excerpted from Mr. Allen's speech last Saturday to the Conservative Political Action Conference, his first public address since becoming national security adviser.]●

DELIA BROWN—A SHINING EXAMPLE OF GOOD WILL TOWARD MAN

HON. BILL CHAPPELL, JR.

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 30, 1981

● Mr. CHAPPELL. Mr. Speaker, I would like to pay tribute today to the oldest funeral director in the State of Florida. That alone is an impressive distinction but in addition to running her own funeral business, Delia Joan Brown is a woman and she is black. She was recently honored by the Ocala community on the occasion of her 100th birthday. I just wanted to acquaint my colleagues with the background and nobility of this wonderful and kind human being.

The oldest of 14 children, Delia graduated from Fessenden Academy High School, taught school in Marion, Levy, and Citrus Counties for 15 years. She later went to New York City and received the call through a dream to be a mortician. She was so gifted she was able to memorize her anatomy and physiology books in 3 weeks and finish the 9-month program at Renouard School of Embalming in 2 months. After working at the Lawton J. Pratt Funeral Home in Jacksonville, Delia moved back to Ocala and opened the D. J. Brown Funeral Home in 1929. She is still there and said she will only retire "when she is not able to perform her exacting science, but until that time, she said she will be there for anyone who needs her."

This quote, taken from the Ocala Star Banner, personifies the spirit and personality of Delia Brown. She is truly one of the kindest people I know. A devoted teacher, she has trained many in the art of embalming. Six of her pupils in Ocala have gone on to become licensed practitioners and open their own businesses around the State. Her support of young people goes beyond those she has taught. There are children in Ocala who Miss Brown befriended and helped them get a start in life.

It is an honor and a privilege to be in the company of this kind and gentle woman. I hope God blesses Delia Brown with many, many more exceptionally successful and productive years.

Mr. Speaker, again I congratulate Delia Brown on her many accomplishments.●

NATIONAL EFFORT TO COMBAT DRUNK DRIVING—PART III

HON. MICHAEL D. BARNES

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Monday, March 30, 1981

● Mr. BARNES. Mr. Speaker, on two occasions last week I brought to the attention of the House the No. 1 threat to life on our Nation's highways—driving while intoxicated. Today, I submit for the RECORD an excellent article and editorial published recently in the Washington Post further exposing this national horror and addressing the need for action.

The statistics are clear: One American killed every 23 minutes, 70 every day, 26,000 every year and one-quarter million over the past decade in drunk driving incidents. As the Washington Post story suggests, the human suffering hidden behind these statistics can never be measured. Drunk driving is no accident—it is a crime. It is a national epidemic that poses one of the greatest threats to our children in every community across the Nation.

Changes in our laws and attitudes toward drunk driving are essential. My bill, H.R. 2488, offers one important part of the total solution to a problem our society has allowed to continue and worsen.

The article and editorial follow:

[From the Washington Post, Mar. 22, 1981]

A NATIONAL OUTRAGE

DRUNKEN DRIVERS KILL 26,000 EACH YEAR

(By Joseph D. Whitaker)

It's been three years now since Carol and Doug Weiger received the visit that haunts them to this day. Your son, the police officer said, has been hit by a car.

Half an hour later, their son was dead. A year later, the Weigers learned that the man who killed him had pleaded guilty to a drunken driving charge—and had been fined $600.

Today the Weigers are angry—angry at the sentence that they assail as obscenely lenient and angry that what happened to 16-year-old Peter Lewis Weiger has happened to so many thousands of America's sons and daughters.

Nearly 70 persons a day—about 1 every 23 minutes—are killed in drunken driving crashes—the nation's single greatest killer of people under 34, according to the National Highway Traffic Safety Administration.

Nearly 26,000 persons die in the United States each year in drunken driving incidents—the nation's leading cause of highway deaths.

Over the last decade, more than 250,000 Americans have died because of drunken drivers on U.S. highways, more than four times the number of Americans killed during a decade of fighting in the Vietnam War.

The more than 1 million crippling and other serious injuries attributable to drunken driving cause economic losses estimated at more than $5 billion a year in this country.

One of every two Americans will be involved in an alcohol-related auto crash in his or her lifetime.

On a Saturday night, one in 10 drivers on America's streets and highways will be legally drunk.

While only one out of every 2,000 drunken drivers will ever be arrested—and far fewer will ever receive stiff punishment for their crime—an estimated one out of every 100 babies born this year will die in a crash with a drunken driver.

"The drunk-driving problem in this country has reached epidemic proportions," said John Moulden, a research psychologist with the National Highway Traffic Safety Administration. "It's a national outrage that even when thousands of people are being killed each year by drunk drivers, our society continues to accept drinking and driving as a normal part of daily life."

Peter Weiger, a popular sophomore at Thomas J. Wootton Senior High School in Rockville, Md., was walking down a winding country road on the night of Oct. 8, 1977, when a neighbor in a pickup truck ran over him and kept going. The driver of a car following the truck copied the tag number and the driver was promptly arrested.

The Weigers rushed to Suburban Hospital in Bethesda, expecting to find their son badly injured, but alive. Instead, a doctor told them Peter had died of massive head injuries shortly after he reached the hospital. His battered body had already been taken to the hospital morgue.

Now, every time a fire engine or ambulance passes their home, the Weigers—who have a 13-year-old daughter and a 21-year-old son—say they relive the night of Peter's death.

"We think about Peter and we look around for the other kids just to be sure they're safe," said Carol Weiger. "We couldn't bear to lose another child."

"He really was a great kid," Douglas Weiger said. "He loved people. He enjoyed loud music, parties and girls. He was a 4-H Club member and a Boy Scout. It makes me angry every time I think that someone took my child's life."

What has left the Weigers even more bitter and distressed, they say, is the sentence meted out to the driver, their former neighbor Edgar Garfield Rogers.

The outcome: According to court records, Rogers pleaded guilty in Montgomery County District Court to driving while impaired by alcohol and to hit and run, and was fined a total of $610.

"There were 1.3 million drunk-driving arrests in the United States last year," said Moulden of the national highway agency. "The few statistics available show that not many drunk drivers ever receive serious punishment for their crime.

"A lot of prosecutors, judges and jurors put a low priority on drunk-driving cases," he said. "When they see a drunk driver, in a lot of ways they tend to see themselves and take the philosophical view that, 'But for the grace of God, there go I.' "

Last year, 950 drivers were arrested on drunken-driving charges in Montgomery County. A total of 1,001 cases—including 41 cases unresolved in 1979—went to court.

In court, 574 drivers were found guilty. Judges gave 189 drivers "probation before judgment," a device in Maryland state law that permits judges to place a person on probation and erase all records of the original charge. Sixty-six drivers were tried by jury and 42 of these were found guilty. The state's attorney dismissed 130 cases.

"I'm dissatisfied with the sentences judges hand out in general," said Montgomery County State's Attorney Andrew Sonner. "But I think over-crowded jails have given judges a legitimate reason to lock up fewer drunk drivers. Five years ago, 100 percent of our convicted armed robbers were sent to state prisons. Now at least 40 percent of them must be sent to the county detention center."

Judge Robert S. Heise of Anne Arundel County District Court said penalties placed on drunken drivers often are too harsh, and that he rarely finds it necessary to impose jail terms in such cases.

"The philosophy of some people is that you have to make the punishment fit the crime," he said. "But that's the wrong way to look at drunk drivers. These are social drinkers who went a little overboard. They're not alcoholics or criminals. Most of the time they've done nothing dangerous, but have merely violated a law."

Judge Heise said there is not much evidence that a jail term is appropriate punishment for a drunken driver, even for alcohol-related fatalities.

"I just feel that some of these people [convicted of drunken-driving deaths] have already suffered more than I could impose on them," Heise said. "Besides that, the state prison system has told me they're overcrowded and that I shouldn't send them anyone else. When I have to choose between sending an armed bank robber or a drunk driver to jail, I think it's more important to send the robber."

Barbara Gilman, 18, was driving home from a church picnic on Aug. 19, 1979, when her car was hit on a curve near her Upper Marlboro home and forced off the road. She died instantly. The other driver was not injured.

Just a month before her death, Gilman—the youngest of 12 children—had been at a family reunion with her parents. Shortly before that, she had participated in an older sister's wedding.

"Barbara loved sports. She enjoyed music and played the French horn," remembers her mother, Emily Gilman. "Her death has left a big vacuum in our lives. It's tough to adjust to what's happened."

"I am not bitter or angry. You have to try to accept the will of God," she said. "But it seems like the drunk drivers get off so easily. They just go back out and hurt somebody else."

The outcome: According to court records, the police found beer cans in the other driver's car and charged him with driving under the influence of alcohol, passing in a no-passing lane and automobile manslaughter. As is his right, the driver refused to take tests that would have established the alcohol content in his blood. He was acquitted of drunken driving and the charge of illegal passing, but was convicted of vehicular manslaughter and was sentenced to three years in prison—18 months of which were suspended, according to the court records.

The District of Columbia—distinguished as the capital of the United States—also has the dubious distinction of having the second highest level of liquor consumption in the country.

In 1979, Washingtonians and their guests drank 5.95 gallons of alcohol for every man, woman and child in the city, according to the Distilled Spirits Council of the United States. That was second only to Nevada's rate of 6.25 gallons per person.

District police arrested 3,439 drivers on drunken-driving charges last year, and there were 46 alcohol-related traffic deaths in the city, which has one of the nation's toughest law enforcement programs against drunken driving.

The D.C. corporation counsel took 3,395 cases to court. Of that number, 411 drivers pleaded guilty to driving while under the influence of alcohol. Fifty-four went to trial on drunken-driving charges. Thirty-five of those were convicted and 19 were acquitted. In 477 cases, all charges were dismissed.

In about 1,500 cases, those charged with driving under the influence of alcohol were allowed to plead guilty to the less serious charge of reckless driving.

Of eight negligent homicide cases—most of them alcohol-related—handled by the U.S. Attorney's Office in the District last year, two were found guilty by jury, two cases are awaiting trial and four drivers pleaded guilty.

Among the drivers who have pleaded guilty to negligent homicide in D.C. is Lester Lee Mackey Jr., a former Marine charged in the death on Dec. 22, 1979, of 63-year-old Earl S. Mathews.

Mackey, 36, said he remembers driving down 11th Street NW near Rhode Island Avenue when he saw a man several blocks away step off the curb and start to cross the street at an angle.

"I had decided to speed up and hurry on by the man when all of a sudden he turned and ran straight into my lane of traffic," Mackey said. "When he ran to my side of the street, I knew I would have to hit him. There was no way I could stop."

Mathews, a resident of Northwest Washington, was killed immediately.

"I had drank a little whiskey and a few beers, but I wasn't drunk," said Mackey, a Vietnam veteran, who added that he was disabled in 1978 when a stranger shot him in the back and injured his spine. "I feel within myself there was nothing I could have done to avoid the accident except not be there."

"I try not to think about [the fatal accident] that much," said Mackey, who works part time as a hair stylist. "I've seen a lot of people die in Vietnam and even on the streets of Washington. All I can say is God forgive me."

The outcome: Mackey, who said he lobbed the can of beer he'd been drinking out of the car seconds before police arrived at the scene, was originally charged with involuntary manslaughter. He pleaded guilty on Jan. 11, 1980, to the lesser charge of negligent homicide. He was sentenced to six months in jail. The jail term was suspended and Mackey was placed on two years' probation.

Charles and Irma Jacobsen of Arlington, Va., had celebrated George Washington's birthday last month by going on an early morning shopping trip. When they returned home that afternoon, she began preparing dinner while he disappeared into the basement.

Moments later, a car careened across the Jacobsens' front lawn, mowed down a row of azaleas, uprooted a pine tree, and knocked down a brick wall before coming to rest on top of the Jacobsens' car.

"I heard an awful crash. I ran to the window and saw the man's car had knocked down the brick wall," said Irma Jacobsen, a native of Italy who married her husband there seven years ago. "I started calling my husband. I thought he was still in the basement. I wanted him to come up and help me call an ambulance because I thought the driver may have been hurt."

She was still looking for her husband when she went outside where neighbors had gathered on her driveway.

"Someone shouted, 'Mrs. Jacobsen, your husband is over here'. I thought my husband was behind the car helping an injured person," she said. "I took a look and saw that he had been crushed in the accident."

Six hours later, Charles P. Jacobsen IV, 33, died at the hospital from internal bleeding.

The outcome: According to Arlington County court records, the driver, Walter John Anholt, has pleaded guilty to driving while intoxicated and is awaiting an April 6 trial on a charge of involuntary manslaughter.

Arlington County recorded 1,965 drunken-driving arrests and three alcohol-related deaths last year. A conviction rate of more than 80 percent was achieved primarily by reducing drunken-driving charges to lesser offenses.

The Fairfax County General District Court processed 4,725 drunken-driving cases in 1980. About 200 of those were dismissed, and 4,527 defendants were convicted on guilty pleas or jury verdicts. Jail terms—although largely suspended in most cases—were meted out in 1,368 cases.

Both Fairfax and Arlington counties resolve most of their drunken-driving cases by allowing most of the offending drivers to enroll in the Alcohol Safety Action Program (ASAP), an eight-month program of treatment and education. After the driver successfully completes the program, the drunken-driving charge is automatically reduced to the less serious reckless-driving charge.

Fairfax County Commonwealth's Attorney Robert F. Horan said ideally he would like to see drunken drivers who kill someone with their automobile convicted of manslaughter. "But it is almost impossible for us to get a manslaughter conviction when the incident involves alcohol," Horan said. "We must convince a jury that the driver's behavior exemplified a willful, wanton and reckless disregard for human life. And it's rare that we are successful with that approach to the prosecution."

Most often, Horan said, alcohol-related cases that otherwise would be considered manslaughters—carrying a penalty of one month to five years in state prison—are reduced to reckless driving, a charge that carries a lesser penalty. That penalty, Horan said, can range up to one year in county jail, but judges rarely impose the maximum.

John R. Pierce, a former employe of The Washington Post, and his wife and daughter were driving home from a New Year's Eve party in upper Northwest Washington during the early morning hours of last Jan. 1. At one moment, Pierce was making a left turn from Wisconsin Avenue onto Woodley Road. Seconds later, he was scrambling from the wreckage of his mangled automobile. His daughter, Barbara, had been seriously injured. His wife, Jean, a Washington Post employe, had been killed almost instantly.

A 16-year-old driver—who was also returning from a party—had slid through a red light and struck the Pierces' car broadside. The youth escaped injury in the crash.

I'd seen the headlights coming a block away," said Pierce, 71, of Northwest Washington. "My natural instinct was that [the oncoming driver] would stop. Someone in the car said, 'He's traveling awfully fast.' Next thing I knew, we'd been hit."

It was particularly ironic, Pierce said, that his wife was killed by an automobile. "Over the years, a number of our friends had been killed in automobile accidents, [and] Jean had developed a real fear of the automobile as an instrument of destruction. When she used to walk down the street, she would be afraid to step off the curb to cross the street. She'd ask me, 'How do you know the cars are going to stop?'

I would jokingly tell her, 'You can't stand on the corner all of your life,' and we would cross the street together.

The outcome: The youth was originally charged with drunken driving, speeding and running a red light. The drunken-driving charge was dismissed after blood alcohol tests showed he had a .08 blood-alcohol level—two points below the city's legal limit of .10.

D.C. Superior Court sources said negligent homicide charges against the youth were reduced in juvenile court to reckless driving, to which the youth pleaded guilty. He was placed on probation. The speeding and red light charges are both civil charges that can be resolved with the payment of a fine.

In all but two states, a person is considered legally drunk when his or her blood-alcohol content registers .10 percent. To achieve this limit, a 150-pound man would have to consume four one-ounce shots of 100-proof liquor or drink four 12-ounce beers in one hour, according to the Distilled Spirits Council of the United States. This level, local medical officials said, is sufficiently high to eliminate social drinkers.

Laws in Maryland and Mississippi allow a blood-alcohol content of .15 percent, which amounts to six shots of liquor or six 12-ounce beers in one hour for a man who weighs 150 pounds.

Revisions in the drunken-driving laws under consideration by Maryland legislators would lower the legally permissible blood-alcohol level to .10.

Legislation introduced recently on the federal level by Sen. Claiborne Pell (D-R.I.), and Rep. Michael D. Barnes (D-Md.), would make a 10-day jail term mandatory for drunken drivers convicted of the offense two or more times within five years. A repeat offender would also lose his or her driver's license for a mandatory one year.

Last July 12 had been an exciting day of fishing in the Chesapeake Bay for Tommy Sexton, 15, and two other youths. As Sexton drove home with his neighbors and their father, a car swerved across the center line and collided with theirs. The driver at fault was not hurt. The two youths and their father escaped with only minor injuries. But Tommy Sexton was killed.

"You feel a lot of outrage when something like this happens. You wish there was some way you could strike back," said his father, Thomas Sexton. "He was such a kind kid. He loved to go fishing. But he didn't have the heart to kill the fish. He'd always throw them back."

"We consider that our son died as the result of a senseless crime," added Dottie Sexton. The Sextons also have a daughter, 12, and a son, 7. "In this instance, we do not feel that the criminal has been fairly punished for what he did."

The outcome: A month after his son's death, Thomas Sexton, who lives in Bowie, Md, sat in Calvert County District Court and watched a judge pronounce sentence on two men in two separate cases.

The first man, charged with stealing a pickup truck, was sentenced to two years in the county jail.

The second was David William Watkins Jr., who hit the car in which Tommy Sexton was riding. he pleaded guilty to a charge of homicide by motor vehicle while intoxicated. Watkins was sentenced to two years in prison, with all the jail time suspended. The judge then ordered Watkins to pay a $1,000 fine, of which $800 was suspended.

Watkins paid the $200 and was placed on two years' probation, court records show.

"I think the biggest outrage is that the courts seem to place a much higher priority on a loss of personal property than they do on the loss of human life when it comes to drunk-driving cases," said Dottie Sexton, fighting back the tears as she talked.

"We still cry when we think about what's happened to our son. We look at his school pictures often. One of the hardest things to accept is that his [picture] will never change. We haven't touched his room—but we know he won't be back."

[From the Washington Post, Mar. 24, 1981]

DRIVING DRUNK

The Slaughter on the highways makes them bloodier than the battlefields of most wars. Drunken driving is the special culprit. In Sunday's paper, reporter Joseph D. Whitaker set out the facts: One person is killed every 23 minutes in a drunken driving crash. In the past decade, four times as many Americans died in these crashes as were killed in Vietnam. One out of two Americans will be involved in an alcohol-related auto accident. If these statistics do not convince you that drunk driving ought to be regarded as the nation's No. 1 crime problem, go back and read Mr. Whitaker's account of the lives of innocent people taken by drink on the road.

Yet drunk driving is generally regarded as a trivial offense by judges, prosecutors and—if juries are a proper cross section—society as a whole. Burglars and auto thieves go to jail; drunk drivers who have killed someone seldom do. Maybe drunk drivers don't belong in jail, as some judges argue, especially now that the jails are about full. But they don't belong on the highways, either.

The simple truth is that of all the criminal offenses on the books, drunk driving is one where fear of punishment can make a difference. Most drunk drivers are, as one judge put it, "social drinkers who went a little overboard. They're not alcoholics or criminals." That is precisely the kind of person who can be deterred if the punishment is harsh, swift and sure.

Punishments short of jail terms can be imposed. Why not automatically suspend, for a year or more, the driving privilege of every convicted drunken driver? Why not revoke that privilege permanently after a second conviction? Why not let drunken drivers inhabit the local jails, instead of the local bars, on Saturday nights? If the idea could be implanted in the minds of those "social drinkers" that a drunk driving conviction meant 52 Saturday nights in jail and 52 weeks without a license, the number of drunks on the highways just might diminish.

Law makers and enforcers are too often tolerant: "But for the grace of God, there go I." The Maryland legislature, for example, is hesitating now over a far less Draconian set of bills designed to make it easier to catch and convict drunk drivers. Until the idea is accepted that drunk driving is a major crime, not a social offense, the daily highway slaughter will continue. Think about it: one of every 100 babies born today will die in an alcohol-related automobile crash.●

WRONG ANSWER FOR AUTOS

HON. BILL FRENZEL

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 30, 1981

● Mr. FRENZEL. Mr. Speaker, Eugene McAllister, of the Heritage Foundation, in a Washington Star article of March 26, states, "Quotas are not the solution for the auto industry's woes."

"Wrong Answer for Autos" is the title of McAllister's piece, and it thoughtfully points out that imports have not been the most significant factor in the declining sales of U.S. produced cars.

Like the International Trade Commission, McAllister cites recession, high costs, and changing consumer preferences, and correctly points out that auto buyers' financial status will not be improved by quotas. Those potential buyers will become actual buyers only when they see the right product at the right price.

I commend the article which identifies the beneficiaries of quotas as the stockholders and employees of the big domestic producers and identifies the victims as consumers who want to buy cars.●

UNITED STATES-CHINA FARM TIES

HON. PAUL FINDLEY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, March 30, 1981

● Mr. FINDLEY. Mr. Speaker, 3 years ago, I had the privilege of leading the Illinois Agriculture Mission to the People's Republic of China—a mission of leaders in agriculture, business, education, and Government who foresaw the great opportunities the United States has for expanding trade and scientific and cultural exchanges with that vast Asiatic country.

As an outgrowth of that mission, we advanced the idea of establishing programs in which we would exchange visits of scientists for the mutual advancement of the agriculture of our two countries. Last fall, this idea bore fruit as the University of Illinois College of Agriculture sent two teams of scientists, in soybean genetics and swine breeding, to the People's Republic of China.

The benefits of this exchange program are reflected in the following reports by Ira Kleinberg which appeared in the University of Illinois newspaper, The Daily Illini:

VARIETY ABUNDANT IN CHINESE SOYBEANS

America may be the land of the free and home of the brave, but China is the home of the soybean.

The soybean, domesticated in China in the 11th century, is a relative newcomer to the New World. In fact, the most recent record of soybean plants being grown in the United States dates from 1804, according to Theodore Hymowitz, professor of plant genetics.

Hymowitz and Roy Stahlhut, a graduate student specializing in soybean genetics and fluent in Chinese, visited China in September. The two were the first Americans to travel to China in more than 50 years with the express purpose of collecting soybean seed samples from the country.

When these seeds—collectively referred to as "germ plasm"—are brought to the United States in about two or three years the inventory of soybean seeds stored in this country's three germ plasm banks will most likely double, Hymowitz said. That's good news for soybean breeders here in this country.

"The soybean industry in the United States is based on the soybean's introduction from China, and also small amounts from Korea and Japan . . . and breeders need diversity. They're always looking for diversity," Hymowitz said. China, unfortunately, has the necessary variety of seed types.

The Chinese are making great efforts to collect the widest variety of previously-uncataloged soybean seeds from farms and villages throughout their country, Hymowitz said.

"There are an estimated 8,000 to 9,000 different kinds of soybeans (the Chinese) will have collected. They are building a facility to store them in Peking," he said. "We'll have to wait until the seeds are collected from all the provinces, but once they are into Peking and cataloged, we can get anything we want."

"Anything," in this case, is everything the Chinese are willing to offer. Hymowitz said he is primarily interested in "land races"—soybean plant varieties grown by Chinese farm families generation after generation. "Not for yield purposes," Hymowitz added, "but for economic purposes, because they are resistant to diseases."

Hymowitz said he and Stahlhut travelled 4,000 miles by train in the 30 days they were in China collecting samples. During the course of the trip, Hymowitz also gave nine lectures to inform Chinese scientists about what's being done in the area of germ-plasm research in this country.

CHINESE PIGS TO AID U.S. PORK PRODUCTION

A more efficient pork production system, and perhaps a resulting drop in pork prices for consumers, may be just two future benefits of closer relations with China in the area of agriculture.

The benefits are possible, but it is still uncertain when they will be realized, according to Daniel Gianola, assistant professor of animal science. Gianola visited China in October to study certain breeds of Chinese swine that are more prolific and heartier than their American counterparts.

"In each of the places we visited, there was an effort to observe local breeds and methods of production," Gianola said. "It was a unique opportunity (and) two or three breeds might be interesting," Gianola said.

"But we need to experiment first," he added.

Certain Chinese swine breeds, Gianola said, are resistant to a variety of diseases, while others have the ability to digest roughage. Some swine breeds have an earlier age of sexual maturity and can produce litters of tremendous size.

"We're interested in pursuing the possibility of introducing genetic material from these swine—and starting research—in Urbana," Gianola said. "These breeds do have a lot to offer."

Gianola specifically mentioned small litter size as a problem in American swine. "Prolificacy in swine has been a problem for the last 30 years," he said. Using Chinese swine semen to create a breed of swine capable of producing larger litters is just one possibility being investigated.

There is "no question" that certain varieties of Chinese swine are naturally prolific, Gianola said. "My colleagues and I agree that with the introduction of a new breed, there would be a 25 percent to 30 percent increase in litter size.

"If this is possible, we will have a very important project in hand," he said.

The Chinese are eager to exchange the semen of their swine with the United States to experiment with the creation of a new breed. Frozen semen, Gianola said, would probably be the most effective method for the exchange because importing the animals would be too costly.

Unfortunately, there is one small hitch in the plans of Gianola and his colleagues—the stringent federal quarantine restrictions imposed by the U.S. Department of Agriculture.

Though he was denied a waiver once, Gianola is still hopeful the government will allow the importation of the Chinese swine semen sometime soon. "We're awaiting a decision from the U.S. Department of Agriculture," he said.●

WISCONSIN FARMERS RATE FARM PROGRAMS

HON. TOBY ROTH

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Monday, March 30, 1981

● Mr. ROTH. Mr. Speaker, I recently polled northeast Wisconsin farmers to learn their priorities with regard to farm programs which will be affected by the new farm legislation currently under consideration by the 97th Congress.

Six thousand rural residents gave a higher priority to dairy price support adjustments and casein import restrictions than to parity, according to the poll.

Asked in the survey to rank eight programs, the Wisconsin respondents held casein import restrictions No. 2 and the price adjustment No. 3. Farm price parity ranked only fifth in importance.

Inheritance tax reform was the No. 1 issue cited in the survey. I am the author of a major bill in Congress to exempt family farms and small businesses under $500,000 from Federal estate taxes.

The business and industry loan program at the Farmers Home Administration ranked at the bottom of the eight programs surveyed.

Export promotion won fourth place in the poll, followed by agriculture assistance and Federal food distribution programs.

In order of ranking in the poll, here are the results:

First, inheritance tax reform.

Second, casein import restrictions.

Third, price adjustments in the dairy price support program.

Fourth, farm export expansion.

Fifth, farm price parity.

Sixth, agriculture assistance programs, such as soil conservation and crop insurance.

Seventh, Federal food distribution programs, such as the school lunch and food stamp programs.

Eight, FmHA business and industry loans.●

LEGAL AID

HON. ROY DYSON

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Monday, March 30, 1981

● Mr. DYSON. Mr. Speaker, Mr. Allen Eckel of Cambridge, Md., requested that I insert the following article by Maryland's Attorney General Stephen H. Sachs which appeared in the March 23, Baltimore Sun:

LEGAL AID IS ESSENTIAL TO OUR SYSTEM

(By Stephen H. Sachs)

President Reagan's budget cutters want to kill the federally funded Legal Services Corporation, whose 5,000 lawyers serve the legal needs of nearly 30 million citizens who live in poverty.

The attorney general of a state that has frequently been sued by the corporation's local outpost, Legal Aid, might be expected to anticipate the last rites more in satisfaction than in sorrow. As my mother-in-law would put it, I need additional costly legal challenges like I need "water in my shoes," especially when Maryland's legislative axes are busily biting into the sinew and bone of an already lean state budget.

But the truth of the matter is that we all need the Legal Services Corporation very much. In fact, of all the trumpeted economies of the new terms in Washington, I can't think of any that is more wrong-headed—and mean-spirited—than the plan to scuttle Legal Services.

For many, it is a matter of fundamental fairness. Government at all levels has armies of lawyers on public payrolls to counsel, to sue and to defend against suit. Corporations have found it increasingly necessary to rely on expensive legal advice, which is recognized as a legitimate business expense and subsidized through substantial tax deductions.

The poor have legal problems, too. Big ones. Even their "routine" encounters with the law—injury at work, eviction, divorce—are aggravated by the unremitting bleak-

ness of proverty. Most of us will never know what it is like to fight an unlawful eviction notice—alone.

But the poor also live in symbiotic relation to a faceless bureaucracy that administers a complex web of regulations governing welfare, Medicaid, unemployment insurance and all the other support services that even the new administration regards as a "safety net" for the poor. For such citizens, a bureaucratic error or an administrator's carelessness can produce a life crisis.

Imagine, for example, the effect on a family when a father is injured on the job and is mistakenly denied his application for a $375 monthly disability allowance. It happens. Few of us would think of facing such a judgment uncounseled, or of suffering it quietly if grounds for challenge exist.

Many of the poor, however, not only have no way of knowing that an error was committed; they don't know where and by whom the decision was made. Comprehending the forces that control your life is a bit of a luxury at $8,200 a year, Legal Services' poverty line for a family of four.

For the poor, living with the possibility of shattering and incomprehensible injustice is the badge of their condition. Legal Services is an attempt to alleviate that condition. The program's simple credo is that a nation that professes a belief in "equal justice" should not permit poverty to weigh so heavily on the scales of justice.

When Legal Services lawyers serve their clients they also help to enforce the law. The criminal law, or course, is enforced by federal and state prosecutors and police. But most laws are civil statutes that create legal rights and protections owed to citizens by government. Thus, just as the law protects a local business from a takeover by a foreign corporation or confers on an oil company rights to a depletion allowance to encourage exploration, so, too, does the law give citizens living in poverty certain rights and entitlements to medical treatment, rent supplements and food.

In a perfect world, all of these laws and regulations would be models of clarity perfectly administered. In fact, however, because of the increasing complexity of the law, fiscal pressures on public officials and the occasional inattention or ignorance of administrators, the civil law frequently depends for its administration and implementation—its enforcement, in other words—on the administrative claims or law suits pressed by the affected parties themselves.

Our legal system expects and depends upon this sort of private law enforcement. For corporations and most citizens, such claims are pressed by corporate lawyers and the private bar. For the poor, that enforcement role has been played—quite successfully—by Legal Services Corporation lawyers. Here in Maryland, for example, suits by Legal Aid lawyers have:

Regained unemployment compensation for 24,000 Marylanders whose benefits were reduced because of an erroneous interpretation of law by a state agency.

Restored Medicaid services to 188,000 Marylanders, mostly elderly and children, whose aid was improperly terminated.

Guaranteed indigent veterans and their widows a right to be heard before termination or suspension of monthly veterans' or widows' benefits.

Established the right of all citizens to a hearing before involuntary commitment to state mental hospitals.

These are only some of Legal Aid's victories in Maryland courts. Legal Services lawyers have prevailed in scores of similar suits around the country. They also, of course, press claims and file suits that do not, and should not, prevail. When they do, my office, and my local and federal counterparts, vigorously oppose them. Legal Services' lawsuits, in other words, are sometimes "wrong." It may also be that some of the corporation's practices, like its aggressive and indiscriminate pursuit of attorney's fees in every civil rights case, need rethinking.

But as we have seen, Legal Services lawyers are often "right." And when they are "right" they have not only won dollars or services or protection for their clients; they have enforced the law, and they have made our proud boast about "the rule of law" a reality for millions of Americans.

Many of these enforcement successes have seriously antagonized some of Legal Services' critics, most notably Mr. Reagan. These critics resist and resent the notion that Legal Services lawyers rattle establishment cages—especially when they win, as they often did in California when Mr. Reagan was governor. To the extent that these successes have endangered Legal Services' survival, it might be said that the organization sued "not wisely but too well."

The critics believe that Legal Services' attention should be limited to the specific legal problems of the individual indigent client who seeks advice—a divorce, a Social Security claim, a dispute with a landlord. They appear to view poverty law as a kind of charitable calling whose practitioners, like some medieval friars, wander among the poor dispensing legal alms. The view is not ungenerous. It is, however, a form of noblesse oblige—American style. "Oh, look dear, the poor have divorce lawyers just like us!".

But this narrow view of the Legal Services program overlooks the fact that with one attorney for every 6,000 poor people, filing class action lawsuits is good lawyering and often the only way in which Legal Services lawyers can represent their clients. In so doing, these lawyers play exactly the same role as that quite properly played by counsel for industry, labor, trade associations and special interest groups of all kinds when they seek to enforce the civil law for the benefit of their clients.

Finally, Legal Services lawyers ensure that the adversary process—the engine that drives our judicial system—runs well. The root premise of the adversary system is that "the truth," or its closest approximation, is most likely to emerge from the clash of competing courtroom forces, the forceful presentation of opposing views of the law and the facts and the testing of witnesses by vigorous cross-examination. It resembles familiar economic models in its assumption that competitors, each acting in its own self-interest, will produce the most socially desirable result.

But for the system to work, the fight must be fair. Only if both sides are ably represented by lawyers who have the time and the energy to research and investigate and prepare can we be confident that the decision-makers, judges and juries, will do—or approximate—justice.

The sound working of the adversary system is uniquely important in the United States. Due no doubt to our federal structure and our written Constitution, almost every great cause eventually becomes a legal issue to be decided finally by the courts.

Lawyers, some feel, are too much with us in America. An Englishman once called us a race of lawyers. We undoubtedly litigate too often about too little and misuse the courts to resolve disputes best handled by mediation and arbitration.

But it surely is little exaggeration say that a reader of the Supreme Court Reports is as well informed about the nature and quality of life in America as is a reader of The New York Times or The Sun. It is difficult to disagree with the notion that courts—which decide almost every issue of public concern, from busing and abortion to prison overcrowding and prayer in schools—have as much to do with governing this country as do presidents, governors and legislators.

Access to the judicial system in this country, then, is access to government itself. Denial of access amounts to a special kind of disenfranchisement. Such a thing would not only cheapen our claims to be a democratic society. It would invite the fatal flaw of every closed society—creation of a bitter underclass with no confidence or stake in the system, ready to abandon rational discourse and to settle its mounting grievances in the streets. And it would come at the worst possible time—when the summary dismantlement of federal programs places the poor in greatest need of legal counsel.

It hasn't been so long ago that we sanctified the sweatshop in the name of "liberty of contract" and perpetuated badges of slavery in the name of "separate but equal." Goldsmith's observation that "Laws grind the poor and rich men rule the law" has, unfortunately, more than a little modern application. But many lawyers, in public and private practice, work very hard all their professional lives to blunt what truth there is in that statement.

Legal Services lawyers are among them. They should be permitted to continue their valuable work. They help make "equal justice under law" more than an empty phrase.●

GREEK INDEPENDENCE DAY

HON. NICHOLAS MAVROULES

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Monday, March 30, 1981

● Mr. MAVROULES. Mr. Speaker, March 25 marked the 160th anniversary of Greek independence. Throughout history, the Greeks have been leaders in man's endless search for liberty. Few nations have had to undergo the hardships Greece has endured for the sake of freedom. Today we pay tribute to the unbreakable spirit of the Greek people in their struggle for independence.

In the 15th century, the Turks invaded Greece, and for 400 years subjected its people to the most brutal kind of tyranny. But even though the Turks physically occupied Greece, they could not conquer the spirit of the Greek people. Greece could not be defeated.

And in 1821, freedom-loving Greeks threw off the chains of alien rule, and returned democracy to its birthplace.

Greeks and Americans have often stood together when peace and freedom were threatened. In World War II, the outnumbered Greek Army de-

feated Mussolini's Fascist forces. It took an invasion by thousands of Hitler's best storm troopers before Greece was finally occupied. But Greece could not be defeated.

While we celebrate Greek Independence Day, it is also fitting to recognize the great contributions made by Greek Americans to this country.

Greek immigrants began to arrive in America more than 300 years ago, although their numbers were not large until the 1890's. They settled in almost every part of this Nation, and have excelled in every walk of life, from government and business to entertainment and the arts. I am proud to be a Greek American, and proud of the success that Greeks have enjoyed in the United States.

I am even prouder, Mr. Speaker, of the heritage which my forefathers left for freedom-loving people everywhere. The concept of democracy upon which the government of Athens was founded more than 2,000 years ago has had a profound influence on the development of Western civilization. The ancient Greeks' emphasis on the dignity and rights of the individual, and on the rule of law, are still the basis for democracy today.

But the struggle continues. Oppressed people the world over long for the freedom that Greece, through years of struggle, has won for itself. On this occasion, it is especially fitting to remind the world that America is strongly committed to freedom and equality for all nations, and all peoples.

In a larger sense, Greek Independence Day is a celebration of the birth of freedom for all mankind. The world can never repay the debt it owes the Greeks who first developed the principles of democracy, but a fitting memorial would be to continue the fight against tyranny wherever it exists.

Those who remain enslaved, both physically and mentally, can be inspired by the example of the Greek people, who fought for freedom throughout the centuries. As long as the fight for democracy continues, the spirit of the ancient Greeks can never be defeated. And that spirit, that heritage, is really what Greek Independence Day is all about.●

LET THE AX FALL ON LEGAL SERVICES

HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, March 30, 1981

● Mr. MICHEL. Mr. Speaker, when Dr. Johnson said, "Patriotism is the last refuge of the scoundrel" he quite accurately pointed out that good causes and ideals can be used by those who need them for a front. The legal services program, allegedly a program to help the poor, has quite often turned out to be front for radicals and intellectuals bent upon using the tax dollars of Americans to foster causes those Americans detest. In short, legal services is the last refuge of the activists.

I insert in the RECORD at this point a brilliant article on the abuses of legal services by two distinguished lawyers. That article is "Let Ax Fall on Legal Services" by Thomas A. Bolan and Roy M. Cohn, the New York Post, March 26, 1981.

LET AX FALL ON LEGAL SERVICES

A mere $320 million which the Legal Services Corporation costs the American taxpayer each year was eliminated from the proposed Reagan budget, along with thousands of other items. The elimination has not gone unnoticed. Howls of protest have been heard from elements of the legal profession—some of the usual self-protective do-gooders and some lawyers and jurists of standing. We think the protesters are wrong.

Let's look at a few basics. Under the prior administration, New York and the nation approached the outer limits of insolvency. Swollen welfare roles, "do good" programs like the Legal Services Corp., a burgeoning civil and political service, etc., had produced rampant inflation, an unprecedented prime rate, and unacceptably high unemployment.

The Reagan philosophy is that even many good programs can no longer be federally funded, but must become the responsibility of the states, municipalities, or private support. In other words, an economy cannot survive simply by using a printing press.

Even if we were wallowing in surpluses, we seriously question whether the Legal Services Corp. is, in fact, a good program, consistent with the best interests of our nation and profession. It is little understood. It does not aid indigent defendants in criminal cases where our rights are secured, and perhaps oversecured, by the 18-B program of panels of lawyers and by the Legal Aid Society. It does not assist in curing the much-talked about lack of practical experience and legal competence of attorneys due to inadequate law school training.

No, the Legal Services Corp. spends $320 million a year in fostering litigation in civil cases for those allegedly unable to pay. We think at once of a hapless indigent with an injury or threatened with financial extinction. An examination of the Legal Services Corp. shows that its main efforts have been directed to anything but help for such individuals. Its primary function has been to serve and encourage "public interest" litigations of the [Ralph] Nader type and Gay Rights type.

Numerous examples demonstrating what the Legal Services Corp. is all about have apparently been overlooked by the judges who signed the extravagant statement in support of it that was printed on the front page of the *Law Journal* (March 12). Some of the Legal Services' attorneys have considered such things as mobilization of rent strikes, the promotion of abortion and a surplusage of contentions to back prison "rights" as their function.

In Florida, the Legal Services group there filed a suit to stop the state Dept. of Education from requiring high school graduates to pass a simple and basic literacy test before obtaining a diploma. The signatories to the petition apparently are unaware of the activities of the director of the Research Institute of the Legal Services Corp., Alan W. Houseman. Houseman spends close to $1 million a year "researching" such problems as how to support various poverty groupings and migrant programs. He recently tried to rally Legal Services Corp. officials to "take all the steps necessary" to prevent cutbacks in social welfare programs. This memorandum backed affirmative action, abortion and other controversial issues which hardly seem appropriate for a program that most people think is designed to give aid in an individual case to a meritorious claim by an aggrieved person.

The sum total of all this:

(1) The program costs the taxpayer $320 million a year. If it were good, we couldn't afford it.

(2) It is a program dominated by "public interest" do-gooders, who get their jollies by harassing the government.

(3) It clogs already unmanageable court calendars with cases that are often without merit.

(4) It whacks the taxpayers both coming in and going out. We finance their litigation against government, and then have to pay the costs and the judgement if they prevail.

Does this mean that a poor person who has a legitimate civil cause should be cut off from legal assistance? Of course not. But where is it written that such assistance should be provided by Federal government? The state and municipalities have block funds and other means to do this if it should be publicly funded at all. And isn't it a perfect area for those of us with successful law firms to do our share? Why not a voluntary or involuntary program whereby law firms make available personnel one month a year or some such formula?

Let's realize that $320 million for civil cases handled free by the Legal Services Corp is not a function for the Federal government, and let us realize that those demanding its restoration are flying in the face of an across-the-board program of budgetary cuts, on the success of which might well depend on the economic well-being of those citizens who work for a living.●

MURDER OF BLACK CHILDREN IN ATLANTA

HON. RON WYDEN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Monday, March 30, 1981

● Mr. WYDEN. Mr. Speaker, it has not been very long since we untied yellow ribbons as our hostages returned from Iran. Now we are witnessing a new sprouting of ribbons for an equally serious crime against America—the murder of 20 children in Atlanta.

These murders have riveted attention once again on the rising rate of crime throughout the Nation. This wave of crime, in a very real sense, has made each of us feel as if we are hostages in our own homes, our neighborhoods, our cities.

The fact that these children are black makes the murders no more or

no less important than any other crime. But the failure to stop more murders from occurring and to apprehend the killer or killers are understandably rekindling resentment and bitterness in our black community—a community that knows all too much about being a hostage in their own land.

President Reagan deserves praise for taking steps to assist Atlanta police officials in their investigation. His efforts have helped ease mounting tensions in the Atlanta community. I have agreed to cosponsor legislation by my colleague, Mr. Clay, for an appropriation of $1.5 million to beef up police efforts to track down the killer of these children. My thoughts and hopes are with one of our friends, former Portlander Lee Brown, as he leads those efforts.

To me though, the issue runs far deeper than merely a concern for rampant crime in the streets. What bothers me is the waste of human potential these killings—and all violent crimes—produce.

Of these 20 children, one may have grown up to be the scientist who discovered a way to harness solar energy so it is affordable in all our homes. Another may have been a doctor who saved lives. Still another may have excelled in the arts and given us an inspiring play or novel. And yet another may have been a hard-working father and friend to his children.

We will never know because these 20 children are lost forever. Their loss robs America of productivity for the future. It diminishes our chances to make a brighter tomorrow.

Regretably we will never stop all violent crime. But we must move quickly to solve this particular crime against the children of Atlanta, against the community of Atlanta, against the blacks of Atlanta—and the rest of the Nation.

If we fail, our failure will symbolize much more than faulty police work. It will symbolize that the very foundations of our society are crumbling, and that our great experiment of men and women living in a free society at peace is in terrible jeopardy.●

PRAYER IN PUBLIC SCHOOLS

HON. PHILIP M. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, March 30, 1981

● Mr. PHILIP M. CRANE. Mr. Speaker, just recently I asked the Congressional Research Service to inform me of all State laws concerning voluntary prayer, Bible reading, or other affirmations of Diety. Their report revealed that nearly every State has a stipulated policy allowing acknowledgement of the Creator in State institutions.

Indeed this should not be any surprise in a Nation which declared its independence with the faith that—

All men are created equal, that they are endowed by their Creator with certain unalienable rights, that among these are life, liberty and the pursuit of happiness.

To allow each State the prerogative to set its own policy with respect to voluntary prayers, I have introduced H.R. 2347. This legislation would prevent Federal courts from disturbing State court decisions relative to prayer in public buildings.

Recently the national commander of the American Legion, Michael Kogutek, made a well-reasoned argument for removing Federal court jurisdiction in this manner. If, after you have read his address, you would like to cosponsor H.R. 2347, please get in touch with me or my staff.

PRAYER IN PUBLIC SCHOOLS

Isn't it ironic that Americans applaud the Roman Catholic church of Poland for being the guardian of Poland's moral fiber; that we believe the Poles' faith in God is at least partly responsible for their indomitable resistance to Godless Communism—yet we fail to protest loudly as U.S. courts curtail freedom of religious exercises in our public schools by not allowing voluntary prayer?

We are in the vanguard of those who acknowledge the importance of a solid religious foundation which gives strength to nations fighting for freedom from oppression. Is it not then incumbent upon us who are free to stoutly defend our conviction that unfettered religious freedom is our most precious legacy as Americans? Today that conviction is being put to the test by court decisions—however well intended—that have, in effect, abridged our children's free exercise of their religious beliefs.

It is not the function of the public schools to provide religious training. Yet, it is not their function to discourage religious belief either. We all know that "as the twig is bent, the tree's inclined," and I think most of us are disinclined to deprive our young people of the character-building experience which we as students enjoyed years ago when allowed to participate in classroom prayer.

Certainly there can be no harm done by reinstituting the practice of voluntary prayer to our Creator. His presence has been officially acknowledged by United States Presidents and by Supreme Court justices. Our legal tender, our National Anthem and our Pledge of Allegiance all pre-suppose that a Supreme Being exists and has "shed his grace on thee." Clearly, no one ever thought it possible that the day would come when praying under any conditions or in any place would be declared unconstitutional based on our own laws.

Yet, the courts have ruled:

Students at Guilderland High School near Albany, NY, cannot participate in voluntary prayer meetings in a classroom before starting the school day because the "mere appearance of secular involvement in religious activities" by the school might indicate state approval of the establishment of a specific religion.

Privately paid-for copies of the Ten Commandments cannot be posted in Kentucky's public schools because they are "plainly religious in nature."

It is unconstitutional for school-children to join together in voluntary prayer at the start of the day. They can't even repeat aloud at lunch-time the well-known: "God is great. God is good. And we thank Him for our food." Indeed, the courts have also ruled that it is illegal for our children and grandchildren to read aloud in the classroom the prayer of the House or Senate chaplain as reprinted in the CONGRESSIONAL RECORD.

Can we believe that such nonsense really was the intent of the Founding Fathers when they wrote the First Amendment which states: Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof . . ."? Of course, there will be disagreements among reasonable people regarding the interpretation of our Constitution, but should they be at liberty to ignore the binding precedents of history and custom?

The Court has ruled that states must be neutral toward religion and that they cannot mandate either prayer or Bible reading in public schools. We won't argue that point. However, the Court went a step further and ruled that voluntary prayer in public schools was also unconstitutional. And that is a step too far because it ignores the checks and balances built into our Constitution. While the Constitution forbids "establishment," it is swift to also forbid enactment of laws prohibiting "free exercise" of religion.

The American Legion is not asking for mandatory prayer in public schools. No, we are asking that those who wish to offer a voluntary prayer be given the opportunity to do so. It is just as wrong to prevent students from praying as it is to coerce their participation.

The First Amendment doesn't outlaw religion, and it doesn't outlaw public prayer. Consequently, people should be free to pray to—or even ignore—their Creator in their own way, as long as they don't infringe upon another's equal right. Though unwilling to impose religion or a national church on any individual, the Founding Fathers were quick to recognize their own and their country's dependence on God. And we today should still be free to cite that dependence at any time, whether it be in a public school or not.

As long as our children are compelled to attend school—that is, as long as we have compulsory primary education—their right to the free exercise of religion should not be suspended just because classrooms are in buildings paid for by public funds. Thus, it is our view that the outlawing of voluntary prayer in public schools is contrary to the intent of the authors of the First Amendment.

The American Legion recognizes that allowing prayer in schools will not, in and of itself, reshape our culture and reverse objectionable trends in our society. Nor will it, alone, instill in our youth all of the values and principles essential for the creation of upright character. It may provide fertile soil, however, for the nurturing of traditional values—values which may one day provide again the national strength and the will to defend our freedoms.

I urge you to write to your Congressman. Tell them that you, just as 76 percent of Americans recently polled nationally, support legislation which will "deprive federal courts of the jurisdiction to enter any judgment, decree, or order denying or restricting as unconstitutional voluntary prayer in any public school."●

REINDUSTRIALIZATION

HON. BILL FRENZEL

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 30, 1981

● Mr. FRENZEL. Mr. Speaker, recently, a small steel company in St. Paul settled a 140-day strike by signing a 3-year contract to expire in September 1983.

Here is what the employees got: An entry level sweeper or general laborer, who rotates shifts, works 4 hours of overtime each week, and receives profit sharing equal to 1980, will receive, assuming a 10½-percent inflation rate, total remuneration in the last year of the contract of about $34,400. A millwright or electrician would, on the same basis, make about $42,400.

We are told that the average union employee of the big automakers receives $18.50 per hour which, in a 2,000-hour year without overtime, amounts to $37,000.

High pay for high productivity is good and reasonable. But steel and auto making are industries which have petitioned the Congress for protection. They are not competitive in world markets.

Their labor rates are not in line with other U.S. rates or with labor rates in the industrialized world. Labor costs are not the whole of the steel or auto problem, but it is not reasonable to expect $6 per hour, or $10 per hour, wage earners to pay more to protect the wages of noncompetitive steel and auto workers making $18 or $20 per hour. Auto buyers are already voting with their pocketbooks and telling America its domestic-produced cars are too expensive.

Obviously, reindustrialization of America will require more than escalated depreciation, and protectionist trade policies.●

U.S. CHAMBER OF COMMERCE PRESIDENT URGES CONGRESS TO ENACT PRESIDENT REAGAN'S TAX CUTS FOR INDIVIDUALS AS WELL AS BUSINESS

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, March 30, 1981

● Mr. KEMP. Mr. Speaker, the U.S. Chamber of Commerce has been a consistent advocate of economic policy which is good for the country, not just for business. Richard L. Lesher, president of the U.S. Chamber, has proven this once again in a letter to all Members of Congress, outlining his reasons for supporting the 3-year, 30-percent reduction in marginal income tax rates.

Mr. Lesher thoroughly refutes three frequent and baseless arguments against the President's plan: That it would unfairly benefit the rich, that personal rate cuts would fuel inflation, and that the Reagan plan is similar to Margaret Thatcher's economic program.

In addition, Lesher points out:

One of the most compelling arguments for the President's across-the-board, 3-year personal rate cut—and one that is being totally ignored—is that by definition, it will also be a tax cut for small business. The overwhelming majority of the 14 million firms in America are unincorporated small businesses which are exposed to the steeply graduated personal rates. Even many incorporated small businesses—more than 350,000—are exposed to these same rates, because they elect to be taxed through their individual shareholders.

Lesher also argues against confining significant incentives only to business depreciation:

We must never forget that all income ultimately flows from individuals. Thus, if Congress again deprives taxpayers of across-the-board rate reductions and settles for another one-year quick fix—even while approving credible spending reductions and better corporate depreciation schedules—it will actually be endorsing further massive tax increases on individuals and small business. If it does, Congress could preclude all chance of a sustained economic recovery.

Finally, Lesher argues:

On behalf of our members, I implore you not to make such a mistake. It would not only be bad economics, it would also be bad politics.

I strongly commend this plea, from a statesman of business, to my colleagues:

U.S. CHAMBER OF COMMERCE,
Washington, D.C., March 20, 1981.

Hon. JACK KEMP,
House of Representatives,
Washington, D.C.

DEAR JACK: President Reagan has now submitted his comprehensive spending and tax reduction package. As I testified on March 9 before the House Budget Committee on behalf of our 111,000 members, the U.S. Chamber has endorsed the President's program in full, and without qualification, despite the sacrifices it will entail for many of our firms. We are heartened that Congress seems ready to reduce the growth in spending and to encourage new business investment by supporting an accelerated capital cost recovery system. We will remain especially vigilant on both these issues.

It is very important to the business community that certainty be provided with respect to the effective date of the capital cost recovery changes. Unless Congress provides solid assurances that the effective date will be retroactive to January 1, 1981, businesses will hesitate before making the increased investment our economy so urgently needs.

Unfortunately, the President's plan to reduce personal income tax rates by ten percent a year for three consecutive years has been critized in a way that, while widely publicized, is both unfair and misinformed.

The nation needs a constructive debate guided by evidence rather than inflammatory rhetoric. The U.S. Chamber strongly supports the personal tax rate reduction proposal, and indeed, deems it essential to a sustained, economic recovery. Whatever your feelings about this issue, I want you to know why we disagree with the three most prevalent arguments being used against it.

FIRST: THE PROPOSAL UNFAIRLY BENEFITS THE RICH

Which rich? Consider this very revealing statistic that concerns your constituents: During the past ten years, the percentage of the returns falling into 30, 40 and 50 percent tax brackets at least tripled. Apparently many of us are becoming rich. But are we, just because inflation combined with a progressive tax code to push us into higher tax brackets, and often without any real increase income? Of course not.

Then too, in the President's proposal, the biggest percentage reduction in tax rates goes to the lowest income earners. Certainly people who make more money will get a big tax cut, but the highest ten percent of all taxpayers—those earning approximately $30,000 a year or more—already shoulder nearly one-half the entire federal income tax burden. By contrast, fully one-half of all taxpayers—those earning $11,000 a year or less—pay less than seven percent of the total tax burden. If Congress genuinely wants to reduce taxes rather than simply redistribute more income, then the across-the-board concept must be maintained.

Also, a profile of individuals in the upper brackets would hardly match that legendary caricature of the infamous, greedy fat cat. Spurred by inflation, the new trend in America is for both spouses within a family to hold jobs, even though their incomes are often combined in one return. But does that make these people rich? A member of Congress who really believes—and says—this is so risks a very angry reaction.

Obviously America does have a genuine class of super-rich who also pay taxes at exceptionally high rates, which is why they seek to shelter their income. Why not coax that income into more productive—and taxable—investments by lowering their tax rates? Because, conventional economists claim, there is no proof the rich will invest. But history demonstrates there is proof. Every major tax rate reduction in this century resulted in increased government revenues.

In 1920, with the top personal rate at 77 percent, there were 3,649 tax returns reporting $100,000 or more of income, and they paid a total of $321 million in tax. Between 1920 and 1928 however, the top tax rate was reduced from 77 to 25 percent and the effect was electric: By 1928 there were 15,997 tax returns reporting at least $100,000 of income and they paid a total of $714 million in tax. Thus, the top tax rate in 1928 was only a third of what it had been eight years earlier, but revenues received by the government had more than doubled.

Unfortunately, both Herbert Hoover and Franklin Roosevelt subsequently increased tax rates and these benefits were lost. When President Kennedy took office, the highest marginal tax rate had soared above 90 percent. Following an across-the-board reduction in tax rates of approximately 20 percent, revenues, received by the government once again increased sharply, propelled by increased payments from the wealthy. Savings as a component of disposable personal income also rose, from 4.7 percent to 7.5 percent Commenting in 1965 on the results of the Kennedy reductions, Walter Heller, who was the president's chairman of the Council of Economic Advisers, said: "What happened to the tax cut in 1965 is difficult to

pin down, but . . . did it pay for itself in increased revenues? I think the evidence is strong that it did."

Many people now argue that this evidence is invalid because it occurred during a period of low inflation, whereas today we have high inflation and the economy will not respond as well. According to this logic, the reduction in the capital gains tax passed in 1978 should have had little economic impact, since we were well into a period of rapidly rising inflation. Nevertheless, it has a very strong impact becasue it has already led to a $1.1 billion revenue gain, as contrasted with a $2.7 billion revenue loss forecast by the Treasury.

Then there was Governor Carlos Romero Barcelo in Puerto Rico who reduced income tax rates there by 15 percent in the last two years. The reductions were followed by a 13.5 percent increase in revenues and an increase in the number filing returns—i.e., people who had previously been unemployed, hiding in the underground economy or sheltering their income.

Why not examine the example provided by the world's new industrial giant—Japan? Not only is there *no* capital gains tax in Japan, but tax rates on personal levels of income are much lower, with the top bracket of 70 percent applicable only to earnings over $396,000 The personal savings rate in Japan is more than four times greateer than our own.

How much longer will Congressional critics ignore all this evidence while maintaining that the beneficial effects of lower tax rates are nothing more than theory? Are we Americans, of all people, about to deny the key role incentives play in creating economic progress, and through it, human progress?

One of the most compelling arguments for the President's across-the-board, three-year, personal rate cut—and one that is being totally ignored—is that by definition, it will also be a tax cut for small business. The overwhelming majority of the 14 million firms in America are unincorporated small businesses which are exposed to the steeply graduated personal rates. Even many incorporated small businesses—more than 350,000—are exposed to these same rates, because they elect to be taxed through their individual shareholders.

Last year, approximately 600,000 small firms went out of business. But as you know, historically small business has been our best source of new jobs, new technologies and dynamic growth. To ensure that it remains so, we must allow entrepreneurs to retain a greater share of their earnings to recycle back into their enterprises.

SECOND: PERSONAL RATE CUTS WILL INCREASE THE DEFICIT, FUEL CONSUMPTION AND WORSEN INFLATION

A tax cut will do all of the above if it is the typical one-shot, here-today, gone-tomorrow tax credit or rebate of revenues which is received regardless of personal effort, and which merely redistributes income and fuels consumption. But by permanently cutting the marginal tax rates that determine how much individuals can keep on each extra dollar earned from work, savings and investment, we will be fighting inflation by providing incentives for greater productivity from every taxpayer.

In effect, Congress will be signalling taxpayers that for three consecutive years, the possibility of greater after-tax rewards will reduce the price of additional work, savings and investment while increasing the price of additional leisure and consumption. The former will become increasingly more attractive than the latter, and, as experience proves, revenues to the government will increase.

We are told it is inflationary when individuals are allowed to keep more of their own money to spend, save or invest, but it is not inflationary when government taxes it away and ends up spending every cent. Why is it then, that while raising taxes to their highest levels in history, government has managed only one balanced budget in the last 20 years, and we now have chronic double-digit inflation?

Also, the increased economic growth that has historically resulted from reducing tax rates can work in the 1980s to reduce the demand for higher government spending, particularly in transfer payment programs, such as unemployment compensation, food stamps, trade adjustment, welfare, and so on. Stimulating economic growth through tax reduction results in large numbers of people leaving the public dole and entering the private economy. The explosion in federal spending in recent years is a direct result of our sluggish economy, aggravated by the last administration's refusal to support general rate reductions.

Given these two beneficial effects of supply-side tax cuts—large revenue feedbacks and a lower level of government spending—it is both impossible and misleading to assume that tax-rate reductions will mean automatically higher deficit and inflation.

THIRD: THE PRESIDENT WILL FAIL, BECAUSE MARGARET THATCHER TRIED HIS IDEAS AND FAILED

Poppycock! The two situations are not comparable. Britain's industrial base is weak and her basic industries had already been nationalized. What's more, Margaret Thatcher did not move to cut income tax rates equally across the board, and she compounded that error by doubling the value-added tax. Overall, she has significantly increased the general tax burden as well as public spending and money growth.

Some people are criticizing the President's proposal as insufficient to stimulate savings and investment. The fact is people will begin saving and investing more just as soon as they realize the long-awaited incentives are on their way and the trends on inflation have been reversed. By steadily increasing after-tax rewards over a three-year period, while eliminating the distinction between "earned" and "unearned" income, and by complementing these actions with a sustained effort to reduce the rate of increase in federal expenditures and monetary growth, the President's plan meets both objectives.

It is true, of course, that his plan does not represent the final answer. The President himself has admitted as much. But it does represent an absolutely essential first step, because it will give people something they do not have now—the means to save and invest.

Without permanent tax rate reductions, it is simply a matter of time before even the lowest wage earners are approaching the highest marginal tax brackets. Currently, the marginal tax rate for the average family already exceeds 30 percent when federal and state income taxes and social security taxes are combined.

For years, Congress has failed to limit, let alone reverse, the near automatic increase in revenues collected by government each year. But the results of the last election demonstrate the public's patience has worn thin. The size of the underground economy, the search for tax shelters, the incidences of tax cheating and recent tax protests are all examples of increasing public dissatisfaction, and they should serve as a warning of potentially greater dangers down the road.

We must never forget that all income ultimately flows from individuals. Thus, if Congress again deprives taxpayers of across-the-board rate reductions and settles for another one-year quick fix—even while approving credible spending reductions and better corporate depreciation schedules—it will actually be endorsing further massive tax increases on individuals and small business.

If it does, Congress could preclude all chance of a sustained economic recovery. Instead, and ironically, it could simply recreate the familiar dilemma in which an economic slowdown leads to new demands for more spending and higher monetary growth, both of which will combine to give us much worse inflation.

On behalf of our members, I implore you not to make such a mistake. It would not only be bad economics, it would also be bad politics.

Sincerely,

RICHARD L. LESHER.●

GOVERNMENT REGULATIONS AND SPENDING

HON. CARROLL HUBBARD, JR.

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Monday, March 30, 1981

● Mr. HUBBARD. Mr. Speaker, I submit today a letter from my constituent, Carol F. Ruff, Ph. D., clinical psychologist, Hopkinsville, Ky., about the proliferation of Government rules and regulations that is bogging down the mental health profession. This dilemma is part of a larger, complicated problem that Members of the 97th Congress must come to grips with. Mr. Speaker, I trust my colleagues will take note of the following:

As you know, I have been a loyal supporter of yours for many years. However, I voted for Ronald Reagan because it was my firm belief that our country could not withstand another four years of Jimmy Carter without disaster. I am strongly in favor of the President's budget-cutting proposals and urge you to support them. I am also in favor of extreme reduction in government regulation.

From my own personal experience, I have worked as a psychologist in a state mental hospital since 1959. In the early years of my career, I was able to devote approximately 90% of my time to direct patient services, such as evaluation and psychotherapy. At present, the great majority of my time, together with physicians, nurses, social workers, rehabilitation counselors, and other professional staff, are devoted to meetings discussing seemingly endless rules and regulations dictated by:

1. Joint Commission on Accreditation of Hospitals,
2. Federal Regulations for Medicare and Medicaid,
3. National Institute of Mental Health,
4. Licensing and Regulation, and
5. Legislative Research Commission.

Needless to say, there is frequently little conformity among the various agencies. It will probably not surprise you to learn that the excessive regulations have not resulted in better patient care but have resulted in large increases in number of staff who devote most of their time to professional busy work.

Just last week I participated in a meeting designated to the writing of progress notes. There was a 45 minute discussion as to whether a weekly progress note had to be written in addition to a termination summary or whether it could be contained within the termination summary. It is obvious to those of us working on the "front line" that many of the regulations and suggestions have been devised by persons in an office far away who know nothing about the day to day functions of mental hospitals. For example, one suggestion made from a Washington desk was that we encourage patients to join a Book of the Month club after leaving the hospital. Many of our patients cannot even read. I could elaborate for hours but I mainly wanted you to know how strongly I feel about the necessity of reducing government spending and federal regulations in every area.

Sincerely,

CAROL F. RUFF, PH. D.●

COMMENTS ON REAGAN'S TAX CUTS

HON. EUGENE JOHNSTON

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 30, 1981

● Mr. JOHNSTON. Mr. Speaker, the Washington Post printed an editorial on March 13, 1981, which argued that, under President Reagan's tax reduction plan, "the largest real tax cuts would go to taxpayers now in the 54 percent to 70 percent brackets."

On March 25, 1981, an advertisement was placed in the Wall Street Journal, among other publications, by W. R. Grace & Co., which challenged the Post's conclusions about the President's tax proposals. In its response to the Washington Post's editorial, W. R. Grace makes a strong case for the opposite conclusion, and in so doing, casts serious doubt on both the Post's methodology and its findings. I would like to insert the response to the Washington Post's assertions at this time, as I think W. R. Grace & Co. presents a much more accurate assessment of the Reagan tax plan than did the Washington Post.

WE SAY REAGAN'S TAX CUTS DON'T FAVOR THE RICH—THE WASHINGTON POST SAYS WE'RE WRONG—YOU BE THE JUDGE

In a recent ad we said that the Washington Post, among others, was "confused" about the Reagan tax proposals. We argued that the Reagan cuts favored the lower income taxpayer, and we proved it with numbers.

Not surprisingly, the Post said we were wrong.

The newspaper thought it had discovered that we had failed to consider the effect of inflation, and that our argument was thereby flawed.

Had we forgotten inflation? Of course not. We wish we could.

In fact, to prepare for that ad, we programmed our computer to give us a printout comparing the Reagan tax rate proposals with current tax rates:

For every major kind of tax-on wages and salaries, dividends and interest, capital gains, etc.

For each of these taxes individually, as well as incrementally added or "piggy-backed" to each other.

For each year the tax cuts would apply within the period 1981-1984.

And—Washington Post take note—for seven distinct rates of inflation: from zero inflation through a "livable" 7% to an intolerable 12%.

The computer run comes to 43,200 numbers. And, we learned that inflation didn't really affect the pattern of tax reductions by income levels.

Still, for the benefit of the Washington Post and other interested parties, we show below charts similar to those we showed in our previous ad, but this time—in deference to our critics—they are "corrected" for average annual inflation rates of 8%, 10% and 12%.

First, let's look at the percent reductions proposed by the President for average tax rates on wages and salaries, otherwise known as earned income:

REAGAN TAX PROPOSAL PERCENT REDUCTION IN AVERAGE TAX RATES ON WAGES AND SALARIES FOR 1984

1980 wage and salary income	Percent reduction in tax rates at 4 annual inflation rates			
	0	8	10	12
$10,000	[1] 28.5	28.3	28.2	[1] 27.6
30,000	27.2	26.8	26.7	26.6
50,000	26.7	24.9	24.6	24.1
100,000	22.0	16.7	16.6	15.7
200,000	[1] 12.5	9.0	8.5	[1] 7.8

[1] Indicates average.

Inflation makes very little difference here. The lower income earner consistently gets the bigger percent break.

But perhaps someone will say that the problem lies with the so-called "unearned" income or investment income, which includes dividends, interest, capital gains and the like. So, let's add earned and "unearned" income together as total income, based on latest IRS data for income mix, and see what happens. Again inflation makes very little difference:

REAGAN TAX PROPOSAL PERCENT REDUCTION IN AVERAGE TAX RATES ON TOTAL INCOME FOR 1984

1980 total income	Percent reduction in tax rates at 4 annual inflation rates			
	0	8	10	12
$10,000	28.5	28.3	28.2	27.6
30,000	27.2	26.7	26.5	26.7
50,000	26.8	26.3	26.6	26.2
100,000	26.0	25.1	24.8	24.4
200,000	24.9	23.3	23.0	22.7

Next, let's look at reductions proposed by the President for the marginal tax rate for total income. This is the rate which applies to the last dollar of your income per the IRS tax tables. The rate you would pay if you make an extra effort by working harder or investing more—which is exactly what the Reagan tax program would encourage.

REAGAN TAX PROPOSAL PERCENT REDUCTION IN MARGINAL TAX RATES ON TOTAL INCOME FOR 1984

1980 total income	Percent reduction in tax rates at 4 annual inflation rates			
	0	8	10	12
$10,000	28.6	25.0	25.0	25.0
30,000	27.0	25.6	26.5	26.5
50,000	26.5	25.9	25.9	21.2
100,000	23.6	23.3	18.7	18.7
200,000	22.1	19.4	19.4	19.4

No matter how you look at it, inflation makes little difference.

What you cannot do in good conscience is to compare the year 1984 with the Reagan tax cuts and with the effect of inflation to the current law in 1980 without inflation. That's comparing apples to oranges. And that's apparently what the Washington Post did, in good faith, but ill-advisedly.

So you be the judge. The Washington Post has said that the Reagan tax cut proposal is "less progressive."

Our work from the tax tables shows just the opposite. The lower income brackets get the higher tax cuts.

The Washington Post has argued that we didn't take inflation into acount.

We did, of coure. In general, the greater the inflation rate, the more progressive the tax cut. If the tax structure was "progressive" before Reagan, it will be more "progressive" now—inflation or no inflation.

We are not alone in this argument. It affects all of us. And so we ask others who care—the business community, the press, and the people at large—to take an interest in this debate and be heard.

Write your Congressmen today and tell them you support the Administration's efforts to lower our tax burden and cut government spending.●

CONTINUE PELL GRANTS

HON. RON WYDEN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Monday, March 30, 1981

● Mr. WYDEN. Mr. Speaker, students who have already made financial commitments to attend college this fall have been put on hold by Mr. Reagan's hasty action to halt Pell (BEOG) grants. While I welcome the opportunity to debate possible change in Federal student aid programs, it is imperative that students on tenterhooks know now what hope they have for school this fall.

Pell grant recipients are needy students—those least likely to be able to adjust their financial plans to Mr. Reagan's untimely action.

I believe we have a moral commitment to continue Pell grants through the 1981-82 school year. In support of this position, I want to share a thoughtful argument from the Oregon Association of Student Financial Aid Administrators:

OREGON ASSOCIATION OF STUDENT FINANCIAL AID ADMINISTRATORS,
March 5, 1981.

Hon. RON WYDEN,
House of Representatives, Longworth House Office Building, Washington, D.C.

DEAR REPRESENTATIVE WYDEN: The Oregon Association of Student Financial Aid Administrators is a professional organization made up of 180 financial aid officers from virtually every post-secondary institution in the state of Oregon. As such we have continuous contact with Oregon students and their parents. We are receiving signals of alarm and concern with reference to the Pell Grant (Basic Educational Opportunity Grant) Program.

President Reagan's economic recovery program has brought some proposed changes to the Pell Grant Program which are creating delays and some very real processing problems and could lead to a bureaucratic nightmare. None of us would argue with the intent of the administration's program to balance, over time, the federal budget. It is important to inform you, however, that the delays we are now experiencing in notifying students of next fall's Pell Grant awards are creating for students an untenable position from which to make sound decisions about post-secondary education. Many students could end up not attending the college or univeristy of their choice.

For this reason we urge your support in keeping the Pell Grant Program of 1980-81 intact for 1981-82. This would mean forgoing for a year the administration's "student self-help" proposal which has not had adequate study. We are not asking for full funding of the program (maximum awards under law of $1,900) but merely a continuation of the $1,750 amount of 1980-81. But more importantly we need to proceed with the business of getting financial aid to students. Coming to some closure on how the Pell Grant will be administered would be a major step.

On behalf of the students and parents of Oregon we serve, thank you for your understanding in looking into this concern. If we can provide information in support of our concern we will be pleased to do so.

Sincerely,

BART HOWARD,
President.●

THE MYTH OF THE AFFLUENT AUTO WORKER

HON. WILLIAM D. FORD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, March 30, 1981

● Mr. FORD of Michigan. Mr. Speaker, it has become fashionable in some quarters—inside and outside of Congress—to contend that the problems in the automobile industry are attributable primarily to what some call high wages of autoworkers. Most of those who make this argument simply are not familiar with the economic facts of life for the men and women employed in the industry.

It is useful, I think, to make comparisons of the economic status of autoworkers and their families with data relating to other American families before arguing that what is really needed is a reduction in autoworkers' wages. Obviously, the autoworkers are willing to share in the sacrifice which may be necessary to help the industry regain its viability. The UAW and its members demonstrated this in voting three times to grant concessions to the Chrysler Corp., as a condition for additional increments of loan guarantees authorized by Congress in 1979. But let us not be misled that the autoworkers are, as some people contend, affluent.

For those who believe this, I recommend an article which appeared in the February 13, 1981, issue of Solidarity, a publication of the United Auto Workers. The article attempts to provide some perspective on the issue of autoworker's wages, and it demonstrates that the myth of the affluent autoworker is indeed just that—a myth.

Mr. Speaker, I insert the Solidarity article as part of my remarks at this point in the RECORD. I urge that my colleagues and other readers of the RECORD take a few minutes to read the article:

When economist Robert M. Dunn Jr. told auto workers just before Christmas that they deserved a "sizable pay cut" because they're overpaid, he hadn't talked to Armintery Sullivan.

When U.S. Industrial Council executive Anthony Harrigan railed in his syndicated column against the "excessive wages" paid auto workers, he hadn't spoken with Dan Rotar.

And when the mayor of a small Michigan town blamed "workers for lack of productivity" as a reason for losing a Ford plant, he reflected a growing trend to punish the victim for the crime.

Across North America, a campaign is in the wind to place the burden of current economic problems on the backs of workers. From top auto executives to conservative economists, from magazine writers to radio commentators, the theme is the same: unionized auto workers are overpaid. Only cuts in wages and labor costs can get the country rolling again.

Armintery "Mint" Sullivan, a sewing-machine operator at General Motors' Fisher Body plant in Cleveland, Ohio, wants to get the country rolling again, too.

"Sure, we've got to beat the challenge from the imports," she says. "But how can they ask us to cut our wages?"

On her hourly pay of $9.35 plus $1.15 in cost-of-living allowance, Sullivan must support her partially disabled husband and two daughters. One daughter, enrolled at Findlay College, costs the family $6,200 a year in tuition and room-and-board. "We've got nothing left for luxuries or extras, even for the girls," she says. "We've had to stop taking trips. If I didn't come home and sew from patterns to make all their clothes, we'd be in the hole."

For Dan Rotar, a 33-year-old father of three who works as a draw tank compound operator in Ford's Sterling Heights, Mich., axle plant, a trip to the supermarket becomes a weekly trauma.

Standing at the peanut-butter counter and adding up the cost of what he's bought, Rotar says, "Food's our major problem. Last week I spent $89 and didn't buy any meat."

Rotar earns $9.36 an hour plus $1.15 in COLA, taking home $285.83 for working his customary 40 hours. "I hear it all the time—'autoworkers are overpaid,' " he says. "But we're not. I'm not living any better, and I don't think we're overpaid when I see what the company charges today for a part that I work on, compared to what it used to charge."

Mint Sullivan, Dan Rotar, and hundreds of thousands of other auto workers hardly fit the image of the wealthy, overpaid, underproductive employees.

"They've worked hard in one of America's most productive industries," says UAW President Douglas Fraser. "Our union has insured them a fair piece of the pie, and they've shared in the high productivity and high profits.

"Our union knows there's no economic Santa Claus," Fraser says. "But the focus on wages diverts public attention from the real problems. The auto industry can't survive unless it has sales volume.

"The only way we'll return to health is if our country abandons economic policies that have tried to wring inflation out of the system by creating high unemployment," he says. "We need actions that will bring down interest rates and impose fair trade rules on the Japanese firms exploiting our situation."

Autoworkers' average earnings are not high in terms of the income needed to maintain a reasonable standard of living.

In 1979, the average GM and Ford worker under a "pattern" UAW contract, earned $19,157.

During the same period, the U.S. Dept. of Labor estimated that an urban family of four needed a $19,684 annual budget to live "modestly but adequately." Since less than a third of UAW members, according to a Peter Hart survey, live in families where the spouse works full time, most didn't reach that level unless they had some other source of income.

For all American families—from lowest to highest paid—the median family income was $19,684—or some $500 above an autoworker's average wages. Preliminary data for 1980, not yet complete, show that gaps between our wages and both the modest budget and median family income remain.

But economists and executives who want to blame the auto industry's woes on workers are quick to shift the focus from human needs to the industry's "labor costs." They claim that when fringe benefits and other expenses are added to wages, it brings hourly labor costs to $17.68 per worker, making the U.S. auto industry uncompetitive compared to Japan.

However, much of what the U.S. auto industry sees as its labor-cost component results from its own backward policies.

Take the cost of health-insurance premiums, for example. The Big Three could realize substantial savings if high-cost premiums paid to private health-insurance plans were replaced by a national health insurance program. But the auto firms steadfastly have refused to join with the union in pressing for national health care. The annual cost of each worker's premium has continued to climb, and is close to $1,500. That sum could be sharply reduced through a national health insurance program which would control inflationary doctors' and hospital costs.

Labor costs also include worker-compensation insurance premiums. Short-term investments to create safer and healthier work-

places could have resulted in substantial savings.

Even if labor costs were reduced, however, the crisis in auto would remain. Labor costs are, after all, nothing new. As UAW President Douglas A. Fraser pointed out in testimony before a Senate committee last month "the percentage of labor costs to total costs in the auto industry has remained about the same over the last 20 years."

To protect the jobs of the 1.5 million American workers who are employed by the auto industry, its suppliers, and its dealers, requires not more sacrifices in living standards but major investments in restructuring and retooling, coupled with job and income protections during the transition to new technology.

In the meantime, however, workers need temporary relief from the flood of imported autos which are eating into domestic sales and jobs.

Import restraints, UAW President Douglas Fraser told a Senate committee last month, are needed "to provide the American industry with the breathing space it needs in order to retool and recover from the ills that have afflicted it in the last couple of years." Starting from a sales mix with only 37% small cars in 1978, the U.S.-based automakers are working toward a 1983 model run with 70% small cars. Added Fraser, "Continued unbridled expansion of the import share threatens this remarkable five-year transition program."

Fraser also called for cutting interest rates, tax credits on the purchase of fuel-efficient domestic cars, a bounty to scrap old cars, improvements in the trade readjustment allowance system to include parts workers and improve training programs, and tax incentives for investments in fuel-efficient car production.

The American auto indusry finds itself a victim, in part, not of labor's demands but of its own past record of substituting short-term gains for long-term needs.

While Japanese automakers started with a newer industrial base and continued to pour profits into new technology and new factories to meet the changing market, North American firms were passing out high dividends to stockholders and falling behind in research and development.

"Aging plants, reduced research budgets, the energy crisis, and planning mistakes by business and government" are blamed for the crisis by Theodore St. Antoine, University of Michigan law professor and labor expert.

"The great source of Japanese advantage is structural," adds Neil Goldschmidt, outgoing Secretary of Transportation, in a new report on the U.S. auto industry. He cites Japanese "process and product technology which yield major productivity gains . . . We should not point to labor in this country as the sole cause of the problem, nor look to them solely as the solution," he says.

The Big 3 turned a deaf ear to UAW urgings that they compete in the small car segment of the market—investing more resources into retooling for more fuel-efficient vehicles. When the sudden, unexpected shift in the market occurred in the aftermath of the Iranian revolution and the resultant long gas lines, the domestic auto industry was cranking out gas guzzlers and paying high dividends to shareholders instead.

From 1973–79, GM, Ford, and Chrysler paid $12.7 billion in dividends to shareholders. Had only half that money been invested instead, they could have bought 20 complete sets of machine tools to build new engines.

The current crisis is unprecedented and no one argues that the $80 billion-plus it will take to retool could have come from dividends—that's why the UAW argues for a progressive program of capital formation to help accomplish the task. But the industry could have gotten off to a head start by using its available resources over the years on a regular basis to update plants and machinery so the gap would not have been so great when the market suddenly shifted.

To make up for its past failures, the auto industry now must go ahead with a retooling program. And to pay for this, it seeks more worker sacrifices.

To the Dan Rotars and the Armintery Sullivans, it will argue that compensation costs must be brought more in line with other workers here and abroad.

Wage cuts would mean an even sharper drop in purchasing power for Rotar, who recently got an OK for a new car loan but has put off buying one.

On his weekly $285 take-home pay, he must budget nearly $100 a week for food, and $385 for monthly mortgage payments on his modest, three-bedroom home. "I just can't afford $160-a-month payments for a new car," he says.

While it now takes a U.S. worker the equivalent of 700 hours of straight-time pay to buy a Dodge Omni, it takes a Japanese auto worker 1,150 hours of straight-time work to buy a comparably equipped Toyota. Compensation runs about $7 an hour less than here.

Visiting a Ford Fiesta plant in Spain, UAW Vice-President Don Ephlin observed a tiny employee parking lot, and noted that Spanish workers obviously couldn't afford to buy what they build.

Such examples prove that the wage gap between U.S. and foreign auto workers does need to be reduced—but from the other direction: by bringing foreign workers' wages up and improving their working conditions. As things now stand, unbridled multinationals can move plants to Spain or Latin America where wages are low or health-and-safety laws weak.

Playing off worker against worker also can take place at home, when companies seek out low-wage areas for new plants, or use labor-law loopholes to fight unionism. Such practices maintain a wage gap between union and non-union workers and between auto and some other industrial workers (a gap which is less than it was 40 years ago). The way to bridge it is not to lower our wages, but to improve their income.

Because this means redistributing income from the wealthy to workers, multinationals resist it. The UAW, however, is fighting back—by helping foreign unions to organize and bargain higher wages, and by working at home to reform labor laws and organize more workers.

The other half of the current corporate line is that American workers—those in auto and other industries—aren't working hard enough to deserve their high wages.

The "productivity rate" used by economists describes the radio of output of goods and services to the number of hours worked in the private business sector. It can drop for a number of reasons—using workers and tools inefficiently, or using worn-out equipment or old technology. In other words, as economist Robert Zager wrote in the New York Times Sept. 24, 1980, it measures "not how productive workers are, but how productively employers use them."

But even using the imperfect definition of productivity, the U.S. manufacturing industry remains the most productive in the world.

"On a scale of 100, with American productivity at that figure, Western European output is about 90, and Japanese output is about 70," reports the University of Michigan's St. Antoine.

What about auto? Using 1967 as an index of 100, output per hours paid in the American motor vehicle and equipment industry, correcting for quality, rose from 66.9 in 1958 to 138 in 1979, reports the U.S. Dept. of Labor. In the auto industry, productivity has risen at an annual average rate of 3.2 percent over the past decade.

Armintery Sullivan, who sits at home nights cutting out patterns for her family's clothing, wants a healthy industry and adequate wages, so her daughter won't have to drop out of college, and so the family can resume its occasional weekend trips.

And Dan Rotar, who keeps putting off buying a new car, needs a productive industry so that his purchasing power doesn't drop even lower, and so that he can afford to but what he builds.

But they and other workers have already sacrificed, with lower real spendable earnings, higher unemployment, skyrocketing interest payments, and other economic cutbacks to subsidize the errors of their employers.

No matter how hard corporations and their spokesmen in the press use trick mirrors to portray them as overpaid and affluent, they know differently. And their response is getting clearer: "We've done our share. Now you do yours."

ARE WORKERS REALLY OVERPAID?

Q. Everywhere I look someone's saying cut our wages. The other day, for example, Prof. Lester Thurow said it would take a 4 percent pay cut to get the country moving again. Are workers really getting too much money?

A. No. Overall, the purchasing power of American workers is dropping when you compare wage increases to inflation. Prices rose 12.7 percent last year but wages went up only 9 percent. Even over the long haul, workers are getting less in real spendable earnings than in 1967.

Q. But aren't auto workers a special case? They keep saying we're rich, relatively speaking, and can afford to sacrifice the most.

A. The folks who want to cut our pay are using mirrors. They compare our wages only to those paid in the manufacturing sector. But when you compare an auto worker's annual wages to U.S. family income, for the whole range of occupations, we're not getting rich.

Q. How do we compare?

A. If you worked under the UAW pattern at GM or Ford in 1979 for 40 hours a week, you got $19,157 before taxes. The median income of U.S. families, before taxes, was $19,684, or about $500 more. Even the government admits that what we make is not enough to support an urban family of four on a "modest" standard of living, which costs $20,517. Unless you've got additional income coming in from somewhere, you're not doing that well.

Q. Just a minute. What about fringe benefits?

A. That adds some more. But aren't we entitled to vacation time or health insurance just as much as our boss is? If management would listen to us and back a public health-insurance plan like Canada's, that portion

of labor costs to the corporations represented by insurance premiums would plunge, as doctors and hospital costs came under control. GM, Ford, and Chrysler have to pay far less for such benefits for their workers in Canada.

Q. Still, we do make more than many other workers. And some people claim this creates a "two-tiered" society—high-income auto workers and low-income toymakers, for example. Don't things like our COLA create a gap between us and them?

A. The real two-tiered society consists of the wealthy on the top tier and the workers on the bottom. The gap between what a typical General Motors officer or director gets and what we earn is over $165 an hour, while the gap between our wages and manufacturing wages as a whole is just $3 an hour. It's not a question of lowering our wages to those paid other workers—but of finding a way to raise all workers' income to narrow the huge gap between what workers get and bosses get.

Q. How can we start?

A. Eliminate the means by which Big Business maintains low-wage industries and regions. Take "right to work" laws, for example. They keep unions weak, so that in Mississippi, the average pay in 1979 was $10,410. We need labor-law reform, to close the loopholes by which Big Business can stave off unions, like J. P. Stevens did for 17 years. We need to organize workers everywhere. Finally, we need new economic policies for the country, such as a more progressive tax system, to reduce income inequality. Taxes should be paid on earnings from capital the same as earnings from labor.

Q. None of what you say jibes with what I hear on talk shows or read in the papers. They say our wages and benefits are pricing us out of the auto market, and that our productivity is down.

A. They're wrong. The percentage of labor costs to total costs in the U.S. auto industry has stayed about the same over the last 20 years. Even Ford President Phillip Caldwell says the U.S. auto industry is a "low-cost producer" compared to most areas of the world. Last year, new car prices, adjusted for quality improvements, rose 8.6 percent (U.S. News & World Report, Jan. 5, 1981), less than the inflation rate. What really hurt car sales were high interest rates that made it hard to afford new-car loans, and the overall drop in workers' purchasing power. People didn't have money to buy cars, and the government failed to provide incentives to help.

Q. Fine and good. Still, wouldn't sacrificing some of our wages help us compete with the imports?

A. That's the other part of the Big Business mirror trick. They point to lower wages in Japan, and blame labor costs here for their problems, saying we ought to make sacrifices through wage cuts. They should be pointing to their past failure to invest more restructuring the auto industry. They would like to bridge the "labor cost gap" by lowering our wages. Instead, we need to modernize our industry, and help foreign workers raise their wages. Incidentally, hourly labor costs in the U.S. ($17.68) are lower than in auto plants in West Germany ($19.14) and Belgium ($18.42).

Q. But you haven't answered my question about productivity. I hear it's going down.

A. Since the 1950s, productivity in the auto industry has risen an average of 3.2 percent a year—higher than the national average. Output per hour paid in the motor vehicle and equipment industry, correcting for quality, rose, on an index of 100 (1967), from 66.9 in 1958 to 138 in 1979. And remember, productivity doesn't measure how hard an individual worker works: it measures total output per hour worked. When a company pays overhead while the line goes down for a week or two, of if you're using old tools and equipment that breaks down, or if work is inefficiently organized, then productivity will fall. Productivity in the U.S. auto industry is the highest in the world. But other countries are catching up.

Q. Why?

A. Because countries like Japan have invested huge sums in new plants and equipment. While 70 percent of U.S. machine tools are at least 10 years old, the figure is only 41 percent in Japan (American Machinist magazine). And while the percentage of scientists in the labor force engaged in research and development grew by 62 percent in Japan, 1968–78, it fell by 13 percent in the U.S. (National Science Board).

Q. But I though we'd been investing, too.

A. Not enough. U.S. corporations in the 1970s were so concerned with paying off shareholders, that they held back on adequate investment to retool for smaller cars. Between 1973, when the energy crisis began, and 1979 the Big Three auto firms paid off stockholders $12.7 billion in case dividends. (That's an average of $2,241 from each Big Three worker each year!) Had stockholders been happy with just half of that, the Big Three could have bought at least 20 complete sets of machine tools needed to build new kinds of engines. Even in 1979, while manufacturers as a whole were paying a 33 percent dividend rate, the motor vehicle and equipment industry continued to pass out cash dividends at a rate of 54.4 percent of after-tax profits.

Q. What can we do?

A. First, resist those who try to portray us as being better off then we are and seek to cut our wages. Second, demand worker input into decision-making, corporate accountability, and democratic national planning so that rebuilding America's auto industry will benefit us all—not just a few. National planning could also help mitigate the effects of plant closings. Third, we must continue to help unions abroad bring up the wages of auto workers everywhere—so the multinationals can't play off one country's workers against another.

Q. That all sounds terribly idealistic. Can't you offer something more concrete?

A. Admittedly, these are long-range goals. But they're attainable if we keep pressing forward. In the meantime, we need temporary restraints on high-penetration imports to protect jobs while the auto industry continues to retool for smaller cars. We need local-content laws to require foreign carmakers to build here what they sell here. For workers, such programs will mean more jobs; for taxpayers, it'll mean that less of their taxes will go to support unemployment benefits. Finally, we can all become volunteer organizers for the labor movement. By helping nonunion workers organize, all of us will benefit.●

LOSING AIR SERVICE

HON. LES ASPIN

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Monday, March 30, 1981

● Mr. ASPIN. Mr. Speaker, Rock County, in the western end of my congressional district, has been having some curious problems of late.

Rock County finds itself on the verge of losing air transportation it wants and gaining nuclear waste transportation it could do without.

LOSING AIR SERVICE

Rock County Airport is the third busiest airport in Wisconsin. That is right; only Milwaukee and Madison exceed Rock County in the number of flights coming and going each day.

Few people realize how busy the airport is because the majority of flights do not involve commercial airlines. Most are made by aircraft associated with General Motors, Parker Pen, the Beloit Corp., Freeman Shoe Co., and other industries that fly people and products in and out of the airport every day. The airport is a lot bigger and a lot more important than many of us might think.

WILL ROCK COUNTY SURVIVE WITHDRAWAL?

On January 16, Republic Airlines, the airline serving Rock County Airport, wrote the Civil Aeronautics Board that it wanted to stop service here by April 16.

Under the Airline Deregulation Act of 1978, the airport is guaranteed at least two flights a day to and from Chicago. Republic claims that it has been averaging five passengers or fewer on each flight. Even with a subsidy from the Federal Government, Republic claims it is losing money on its Rock County operation.

After learning of Republic's plans, I called a meeting at the airport with representatives of the CAB, the Wisconsin Bureau of Aeronautics and local industries, travel agencies, and Government. As the CAB representative explained, we cannot stop Republic's withdrawal; but Republic can not go until there is a new airline serving Rock County—and we can have a say in the selection of that airline. The CAB has the final authority, under the Air Deregulation Act, to name a replacement airline in a community receiving a Federal subsidy for commercial air service.

In order to supply that local input, I called together a special airport committee made up of 20 people from local industries and Government.

LOCAL ACTION

The committee was briefed by Republic Airlines on why it wants to leave Rock County. We wanted to learn why Republic failed here so we could avoid the same problems with a new airline.

For the second meeting, I invited a gentleman from Jamestown, N. Dak., which earlier lost its major airline, Northwest, to explain how Jamestown made its case to the CAB.

There is one good piece of news about Republic's pullout—its timing. The county is in the midst of updating the airport's master plan to determine

the maintenance needs for the next several years. To do this, the county will soon hire a consultant. Much of the data generated by this consultant will help us in determining what kind of replacement airline would be best for Rock County. County Administrator Charles Hetrick is working closely with the airport committee so that we can kill two birds with this one consultant's report.

THE FUTURE MAY BE BRIGHTER

We may come away from all this with better service at Rock County Airport. Two of the biggest complaints in the past were that Republic did not stop in Janesville often enough, and that the two flights each day were scheduled at poor times for connecting flights in Chicago. We are hoping that the replacement airline will give us more service—additional flights, at better times, to more cities.

Until a new airline is named by the CAB, Republic will have to stop at the Rock County Airport. We hope to have our report submitted to the CAB sometime this summer, and we expect a new airline to be named later this year. If you have any comments or suggestions about the kind of air service we should be aiming for, please let me know and I will share it with the other special airport committee members.

NUCLEAR WASTE

Will highly radioactive, spent nuclear fuel be driven through Rock County in the future? That is a real possibility.

I was first asked about radioactive waste passing through Rock County by Janesville City Manager Phil Deaton in the fall of 1979. He came to me because a number of Janesville residents had asked him and city council members if radioactive waste was being transported through the county; and, if it was, what routes were being used.

The Nuclear Regulatory Commission (NRC) told me there had been eight shipments of spent nuclear fuel—the waste product from nuclear powerplants—from 1977 to 1979 through Rock County. After further questioning, I was able to determine that the spent nuclear fuel had been transported down I-90 from the Genoa nuclear plant near La Crosse to a storage site in Illinois.

I asked the NRC to meet with Janesville officials and me last spring to discuss the safety procedures. We did not like what we were told.

WHAT YOU DON'T KNOW CAN'T HURT YOU!

The NRC officials went to great lengths to convince us that the waste was being transported in safe containers. What bothered us more than anything else was the fact that local officials were never notified in advance of shipments through Rock County. What if there is an accident? The NRC said the State patrol knew about the shipments and that was all that was needed. I could not accept that.

The U.S. Department of Transportation was in the midst of developing new rules for moving hazardous wastes, nuclear and otherwise. I shared a copy of the rules with Janesville officials.

City council member Nancy Stabb recommended changes. I then asked the DOT to: First, permit local units of government to have a say in the selection of routes used for transporting nuclear waste; second, require advance notification of shipments be given local police or emergency services; and, third, provide emergency personnel in those communities with training so they would know what to do in the event of an accident.

LOCAL INPUT DOES MAKE A DIFFERENCE

The final DOT rules were a vast improvement although they did not contain precisely the changes we had asked for.

The DOT rules now require States to hear from local communities before deciding on routes for radioactive wastes. The DOT has also developed a comprehensive training program for local emergency officials. And it looks like the third point—the one considered most important by many local officials—will also soon be taken care of. The NRC is proposing that Governors be told of nuclear waste shipments 4 days in advance. The Governors would have authority to notify local officials, and we will have to make sure that our Governor agrees to do this.

WHERE IS THE NUCLEAR WASTE BEING TAKEN?

As I mentioned earlier, the spent nuclear fuel from Wisconsin used to be transported to a holding site in Illinois. Our neighbor to the south did not like being a depository for nuclear waste from throughout the country, and has now banned the shipment of any spent nuclear fuel from other States to their disposal site at Morris, Ill.

Since there are no other disposal sites available, spent nuclear fuel is not being transported anywhere—except for military purposes—at this time.

This leads us to the next big problem. Where are we going to store all of the spent fuel being produced by our commercial nuclear plants? The U.S. Department of Energy is charged with the duty of finding a suitable disposal site. Wisconsin is being considered—because of our rock formations in the northern part of the State. Many other States are also being looked at. Supposedly, the selection is 3 to 4 years off, but Wisconsin is already gearing up to fight the feds if the finger is pointed our way.

ECONOMIC DEVELOPMENT

As you know, GM is retooling the Janesville plant for the production of front-wheel drive cars. That assures that thousands of jobs will remain in the area. While that is good news, we have to ask—is it good for any community's economy to depend so heavily on any one industry or plant?

WHAT IS ACAP?

Because of the slump in auto sales, and the dramatic effect this slump had on auto-producing communities, President Carter last year organized the auto community assistance program (ACAP). Administered by the U.S. Economic Development Administration (EDA), this program was intended to help auto-producing communities diminish their dependence on the auto industry.

Because Rock County in Wisconsin, and Boone and Winnebago Counties in Illinois are similar in their economic makeup, the three counties joined together in the Rock Valley Economic Development Commission (RVEDC). The three counties are linked to the auto industry not only by the GM plant in Janesville, but also by the Chrysler plant in Belvidere.

So Washington awarded the RVEDC a $100,000 grant to study the three-county economy.

WILL $100,000 IN PLANNING LEAD TO A GOLD MINE?

When President Carter created ACAP, he hoped to follow the planning grants with more than $100 million to carry out some of the plans outlined for these communities. With the new emphasis on belt-tightening in Washington, these funds have been drastically cut. That is not necessarily all bad, however.

It would be nice if Rock County could apply for funds to build a new interchange off I-90 between Beloit and Janesville. And it would be nice if the county could get a grant to make needed repairs to the runways at the Rock County Airport. However, even without the funds for these capital improvements, Rock County will be further ahead than it was before the ACAP study started. Why? Because the ACAP study will tell us what capital improvements are going to give us the most return for our money in terms of jobs. It will also tell us how we can keep industries already in Rock County happy so that when they need to expand, they will expand here. The ACAP study is a massive planning effort that Rock County could not have funded on its own, but from which we will reap benefits for years to come.

IS THERE LIFE AFTER ACAP?

Rock County has been concerned with economic development for years. Your county board was one of the first in the State to form an overall economic development program (OEDP) committee. The work of this committee, now chaired by County Supervisor

Dan Efner of Beloit, should go on long after the ACAP study is completed.

Good economic growth planning has resulted in the strong industrial-agricultural base of Rock County today. If the county continues to look to the future, and uses the information available from such programs as ACAP, this base will grow stronger still.●

PROJECTS FOR LAKE GENEVA, WIS.

HON. LES ASPIN

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Monday, March 30, 1981

● Mr. ASPIN. Mr. Speaker, recently we have had considerable success advancing a number of projects of concern to the residents of Lake Geneva, in the middle of my congressional district. But we have also had considerable difficulty dealing with sewer funds because of the propensity of the State to try to change the rules in the middle of the game.

Lake Geneva has been playing ball with the Wisconsin Department of Natural Resources for years. But now the DNR wants to take its ball and go home—taking millions of dollars in Lake Geneva sewer funds with it. This affects everyone in Lake Geneva.

Back in 1972 Congress passed the Clean Water Act. That legislation required all communities to improve their sewage treatment by 1983. It provided money to help pay for sewer improvements. However, the Federal Government, through the Environmental Protection Agency (EPA), allowed each State to develop its own system for distributing the limited funds available for new sewer plants.

STARTING THE GAME

Under the Wisconsin priority system, a community receives a score based on six factors including the community's population, the threat to health from the current sewage plant, and the treatment level at the current plant.

Lake Geneva received a score from the DNR after its application was received in 1977. Lake Geneva's need for a new plant was quite evident, and the community immediately moved into the top 20 communities waiting for the Federal funds.

Lake Geneva has been stuck at first base ever since then. The game has been delayed primarily because of continuous stalling tactics coming from the DNR. All along the way, as the DNR has imposed new requirements, Lake Geneva has cooperated and played ball.

First, DNR asked Lake Geneva to study pollution problems, not only in the city's boundaries, but in adjoining communities as well. The DNR and EPA thought it would be most efficient if one new sewer plant was built to serve the entire eastern end of Geneva Lake. That was reasonable and Lake Geneva agreed, even thought it postponed Lake Geneva's cleanup hopes.

Next, the DNR and EPA said an environmental impact statement had to be completed before Lake Geneva would be able to move on to step II, or second base. This environmental study was supposed to determine the effects of building one or more sewer plants in the Lake Geneva area, and the effects of extending sewer pipes into areas not already served by the sewer system.

TIME OUT

Like Geneva is still waiting for this study to be completed. But now the DNR has decided to change the ranking system.

The DNR is proposing that one of the six factors originally used to give Lake Geneva its rank order of 15th be changed in such a way that Lake Geneva will drop about 100 positions on the list of 400 communities waiting for construction funds. The DNR estimates that only the top 20 communities have any hope of getting any of the limited Federal funds. Other communities will have to wait for Wisconsin fund money, which pays 60 percent of the costs of building a new sewer plant compared to the 75-percent share paid by Federal funds.

RULES CHANGE

I do not like it when someone changes the rules in the middle of the game. Therefore, I am opposing DNR's proposed change. The DNR proposal has not become final. Public hearings were held in Madison several weeks ago and I gave the Natural Resources Board a list of modifications.

I am suggesting that if rule changes are necessary—which many times they are—because of new information and data, the changes should only apply to communities newly seeking Federal funds. If a community was told it was in line to receive Federal funds and played the game by all of DNR's rules for years, it should remain in position to receive those funds.

If the DNR does not agree to back off, I will ask the Federal Government to step in. We are talking about Federal funds, and I don't think the State DNR should have complete freedom to give and take these funds.

I hope we will have this whole matter resolved by late summer so that Lake Geneva can move to second base and begin the design work on the needed plant. The faster we move on to third base—the construction phase—the lower the construction costs will be for all of us.

RAILROAD ABANDONMENT

Things looked pretty grim for our railroad when the Chicago & Northwestern announced it wanted to stop running trains from Lake Geneva to Ringwood, Ill.

The announcement in December 1979 did not come as a shock to residents who had watched train service deteriorate over the years. However, the move forced the city to face head on, for the first time, the prospect of having no rail service for either business or pleasure. Would the city be able to attract new industry without a railroad? Would energy costs in the future make rail passenger service to Chicago a necessity? These questions flashed through the minds of your local officials and forced all of us to scramble to keep the railroad intact.

The first thing we had to do was buy time. If no one objected to the C. & N.W. announcement, the railroads' wishes would be granted automatically within 90 days by the Interstate Commerce Commission (ICC).

Therefore, a number of parties from both Illinois and Wisconsin filed protests with the ICC. I was among them. From the beginning I had my doubts that we could keep the C. & N.W. service. But I felt it was important to fight to help the service in order to buy time for Lake Geneva to look at alternatives.

The C. & N.W. said it was losing money on the line and that the number of cars carried over the track had been decreasing in recent years. Only 33 carloads were handled in 1977, 30 in 1978, and 24 carloads in 1979.

Users of this line, which included the Burlington Consumer Cooperative in Genoa City, Dunn Lumber Co. in Lake Geneva, and Hal Stone Products of Lake Geneva, countered that the C. & N.W. had often failed to provide rail cars when they were needed and requested, which resulted in a decline in the number of shipments over the line.

The users and the Geneva Lake Area Joint Transit Committee (GLAJTC) also contested the amount of money the C. & N.W. said it lost on the line.

I protested the abandonment for these reasons, and also noted that the rail line is critical to the future economy of the Lake Geneva area. If the line were abandoned, Lake Geneva would not be able to compete for new industry with other communities that could offer rail service. I also pointed out that the city might one day want to resume passenger service to Chicago. If service were ended, the rail corridor could be sold. It would cost a prohibitive amount to buy the corridor back at some future date.

After considering all of the written comments, the ICC handed down a decision last August 29 permitting the C. & N.W. to drop service on the line.

That decision was appealed by the Illinois Commerce Commission and the Illinois Legislative Board of the United Transportation Union, both of

which questioned the railroad's loss claims. The real reason for these appeals was to buy more time.

WHY MORE TIME?

While the ICC was considering all these claims and counter claims, the GLAJTC, headed by Emil Johnejack and with assistance from George Martin and other chamber of commerce members, had been scurrying around looking for funds with which to buy and operate the line locally.

They traveled to Madison several times to discuss a rail purchase with officials of the Wisconsin Department of Transportation (DOT). The DOT people were impressed with the local determination but they needed evidence that a railroad operation in Lake Geneva could survive.

Documents are now being filed with the DOT showing how this rail operation can work under the guidance of the GLAJTC people. If all the paperwork is submitted and accepted by the DOT, that State agency will award GLAJTC a loan to buy the track from the C. & N.W. GLAJTC will have to pay the loan back, but local users and civic leaders are confident that a short-line railroad operation here can be economically successful and the loan can be repaid. Incidentally, we have had a successful shortline railroad run by the town of East Troy for decades.

So, what started out to be a sad story looks like it will end up with a happy ending. The rail line is not locally owned yet, but with all the parties at the local, State, and Federal level working together to make this dream a reality, it seems unlikely the project will fail.

Sometimes we set small goals for ourselves and find that we achieve major accomplishments. That seems to be the case in Lake Geneva.

What started out as an attempt to restore the old Chicago & Northwestern depot has resulted in the formation of a development corporation that could help the community complete many other projects.

THE SMALL BEGINNING

I was contacted by chamber of commerce members and the Geneva Lake Area Joint Transit Commission (GLAJTC) in 1979 and asked to search for funds to fix up the train depot. The most promising funding source appeared to be the U.S. Economic Development Administration (EDA). This agency helps communities fund projects that will create new jobs.

While rehabing the depot would create some short-term jobs, it would not generate enough long-term jobs to make the project attractive to EDA. So, we expanded our plans. With help from some planners at the Southeastern Wisconsin Regional Planning Commission (SEWRPC), the project grew to include plans for the whole shopping area from the depot to the lakefront.

Sally Loveland, a consultant from the National Development Corp., explained that if the community would form a development corporation, shopowners in this part of Lake Geneva could qualify for low interest business loans from the Small Business Administration (SBA). A development corporation could also be an effective agent for attracting new industry to the Lake Geneva area.

MORE THAN A PRETTY FACE

Lake Geneva is already known as a wonderful resort community. I am happy that with the formation of the Geneva Lake Area Development Corp., the city will soon become as well known for its commitment to industry.●

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Tuesday, March 31, 1981, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

APRIL 1

8:00 a.m.

Governmental Affairs

Civil Service, Post Office, and General Services Subcommittee

To hold hearings on S. 677, to provide an alternative to annualizing the cost-of-living adjustments on Federal retirement for civil service annuitants.

3302 Dirksen Building

9:00 a.m.

Agriculture, Nutrition, and Forestry

To resume hearings on proposed reauthorization for food and agriculture programs administered by the Department of Agriculture.

324 Russell Building

Appropriations

Interior and Related Agencies Subcommittee

To hold hearings on proposed budget estimates for fiscal year 1982 for the Bureau of Indian Affairs, Department of the Interior.

S-128, Capitol

Judiciary

Juvenile Justice Subcommittee

To hold hearings to discuss the proposed phaseout of the Office of Juvenile Justice and Delinquency Prevention of the Department of Justice.

2228 Dirksen Building

Labor and Human Resources

To hold hearings on S. 800, authorizing funds for fiscal years 1982, 1983, and 1984 for national centers for health statistics and services, research and health care technology programs, national research service awards, and medical library assistance programs.

4232 Dirksen Building

Select on Intelligence

To hold a closed business meeting.

S-407, Capitol

9:30 a.m.

Appropriations

Agriculture and Related Agencies Subcommittee

To hold hearings on proposed budget estimates for fiscal year 1982 for the Farmers Home Administration, Rural Electrification Administration, and the Farm Credit Administration.

1223 Dirksen Building

Appropriations

HUD-Independent Agencies Subcommittee

To hold hearings on proposed budget estimates for fiscal year 1982 for the Federal Emergency Management Agency and the Selective Service System.

S-126, Capitol

Appropriations

Labor, Health and Human Services, and Education Subcommittee

To hold hearings on proposed budget estimates for fiscal year 1982 for programs of the Department of Health and Human Services.

1114 Dirksen Building

Appropriations

State, Justice, Commerce, and the Judiciary Subcommittee

To hold hearings on proposed budget estimates for fiscal year 1982 for the economic and statistical analysis program, U.S. Census Bureau, National Telecommunications and Information Administration, and the Minority Business Development Agency, Department of Commerce.

S-146, Capitol

Budget

To continue hearings in preparation for reporting the first concurrent resolution on the fiscal year 1982 congressional budget.

6202 Dirksen Building

Energy and Natural Resources

*Energy and Mineral Resources Subcommittee

To hold oversight hearings to review the strategic minerals and materials research policy of the United States.

3110 Dirksen Building

Finance
To continue hearings on the administration's spending reduction proposals for economic recovery.
2221 Dirksen Building

Judiciary
Immigration and Refugee Policy Subcommittee
To hold hearings on the administration's proposed budgetary recommendations for the Immigration and Naturalization Service of the Department of Justice.
412 Russell Building

10:00 a.m.
Commerce, Science, and Transportation
To hold hearings on proposed legislation authorizing funds for fiscal year 1982 for the U.S. Coast Guard, Department of Transportation.
235 Russell Building

Commerce, Science, and Transportation
Consumer Subcommittee
To hold hearings on proposed legislation authorizing funds for fiscal year 1982 for the Consumer Product Safety Commission.
5110 Dirksen Building

Foreign Relations
To resume hearings on proposed authorizations for fiscal year 1982 for economic assistance programs.
4221 Dirksen Building

Rules and Administration
To hold hearings on Senate Resolution 20, providing for television and radio broadcasting of Senate Chamber proceedings.
301 Russell Building

1:30 p.m.
Appropriations
Agriculture, Rural Development and Related Agencies Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1982 for agricultural programs.
1223 Dirksen Building

2:00 p.m.
Appropriations
*Labor, Health and Human Services, and Education Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1982 for programs of the Department of Health and Human Services.
1114 Dirksen Building

Appropriations
*Treasury, Postal Service and General Government Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1982 for the Secretary of the Treasury, Office of the Secretary, and international affairs programs.
1224 Dirksen Building

Budget
To continue hearings in preparation for reporting the first concurrent resolution on the fiscal year 1982 congressional budget.
6202 Dirksen Building

Commerce, Science, and Transportation
To hold hearings on the nomination of Raymond A. Peck, Jr., of the District of Columbia, to be Administrator of the National Highway Traffic Safety Administration.
235 Russell Building

Energy and Natural Resources
Energy Research and Development Subcommittee
To resume hearings on proposed authorizations for fiscal year 1982 for the Department of Energy, focusing on nuclear programs.
3110 Dirksen Building

APRIL 2

8:00 a.m.
Appropriations
Defense Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1982 for the defense establishment, receiving testimony on Army operations and maintenance programs.
1223 Dirksen Building

9:00 a.m.
Agriculture, Nutrition, and Forestry
To continue hearings on proposed reauthorizations of food and agriculture programs administered by the Department of Agriculture.
324 Russell Building

Appropriations
Interior and Related Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1982 for the Office of Surface Mining Reclamation and Enforcement, Department of the Interior, and the Smithsonian Institution.
1114 Dirksen Building

Energy and Natural Resources
Energy Regulation Subcommittee
To hold hearings on proposed authorizations for fiscal year 1982 for the Federal Energy Regulatory Commission, the Office of Conservation and Solar Energy (building energy performance standards and appliance standards programs), and the Economic Regulatory Administration, Department of Energy.
3110 Dirksen Building

Judiciary
Security and Terrorism Subcommittee
To hold hearings on proposed authorizations for fiscal year 1982 for the Drug Enforcement Administration, Department of Justice.
2228 Dirksen Building

9:30 a.m.
Appropriations
*Labor, Health and Human Services, and Education Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1982 for programs of the Department of Education.
S-126, Capitol

Governmental Affairs
Energy, Nuclear Proliferation, and Government Processes Subcommittee
To hold oversight hearings on the activities of the Department of Energy.
357 Russell Building

Labor and Human Resources
To hold hearings on proposed authorizations for fiscal year 1982 for health professions block grants, and preventive health block grants.
4232 Dirksen Building

*Veterans' Affairs
To hold hearings to receive legislative recommendations for fiscal year 1982 from officials of Paralyzed Veterans of America, Blinded Veterans Association, Military Order of the Purple Heart, Veterans of World War I, and Noncommissioned Officers Association.
457 Russell Building

10:00 a.m.
Appropriations
Military Construction Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1982 for U.S. Navy and Marine Corps construction programs, Department of Defense.
1224 Dirksen Building

Appropriations
Treasury, Postal Service and General Government Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1982 for the U.S. Postal Service
S-146, Capitol

Budget
To continue hearings in preparation for reporting the first concurrent resolution on the fiscal year 1982 congressional budget.
6202 Dirksen Building

Commerce, Science, and Transportation
To continue hearings on proposed legislation authorizing funds for the fiscal year 1982 for the U.S. Coast Guard, Department of Transportation.
235 Russell Building

Commerce, Science, and Transportation
Consumer Subcommittee
To continue hearings on proposed legislation authorizing funds for fiscal year 1982 for the Consumer Product Safety Commission.
5110 Dirksen Building

Environment and Public Works
Business meeting, to mark up S. 63, providing environmental compliance date extensions for steelmaking facilities on a case-by-case basis to facilitate modernization, and to consider other pending calendar business.
4200 Dirksen Building

Finance
To continue hearings on the administration's spending reduction proposals for economic recovery.
2221 Dirksen Building

Governmental Affairs
To hold hearings on the nomination of Henry F. Greene, to be an Associate Judge of the Superior Court of the District of Columbia.
3302 Dirksen Building

Select on Intelligence
Closed briefing on intelligence matters.
S-407, Capitol

11:00 a.m.
*Veterans' Affairs
To hold hearings to receive legislative recommendations for fiscal year 1982 from AMVETS
457 Russell Building

1:30 p.m.
Appropriations
Agriculture, Rural Development and Related Agencies Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1982 for agricultural programs.
S-128, Capitol

Appropriations
*Labor, Health and Human Services, and Education Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1982 for programs of the Department of Education.
1224 Dirksen Building

2:00 p.m.
Appropriations
Energy and Water Development Subcommittee
To hold closed hearings on national security defense programs of the Department of Energy.
1223 Dirksen Building

Appropriations
Foreign Operations Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1982 for the Agency for International Development, and certain foreign assistance programs.
S-126, Capitol

Appropriations
Treasury, Postal Service and General Government Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1982 for the U.S. Customs Service, U.S. Secret Service, Federal Law Enforcement Training Center, and the Bureau of Alcohol, Tobacco and Firearms.
S-146, Capitol

Budget
To continue hearings in preparation for reporting the first concurrent resolution on the fiscal year 1982 congressional budget.
6202 Dirksen Building

Select on Ethics
Business meeting, to consider further the proposed revisions to the Senate Code of Official Conduct.
5110 Dirksen Building

APRIL 3

9:30 a.m.
Judiciary
Courts Subcommittee
To hold oversight hearings on the implementation of the Bankruptcy Reform Act.
2228 Dirksen Building

10:00 a.m.
Appropriations
*Transportation and Related Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1982 for the Department of Transportation and related agencies.
1114 Dirksen Building

Budget
To continue hearings in preparation for reporting the first concurrent resolution on the fiscal year 1982 congressional budget.
6202 Dirksen Building

Commerce, Science, and Transportation
To hold hearings on proposed legislation authorizing funds for the Marine Mammal Protection Act.
1202 Dirksen Building

Commerce, Science and Transportation
Consumer Subcommittee
To continue hearings on proposed legislation authorizing funds for fiscal year 1982 for the Consumer Product Safety Commission.
5110 Dirksen Building

Energy and Natural Resources
Energy and Mineral Resources Subcommittee
To resume oversight hearings on the implementation of the strategic petroleum reserve.
3110 Dirksen Building

Finance
International Trade Subcommittee
To hold hearings on proposed authorizations for fiscal year 1982 for the U.S. Customs Service, the International Trade Commission, and the Office of the U.S. Trade Representative.
2221 Dirksen Building

Joint Economic
To hold hearings on the employment/unemployment statistics for the month of March.
2154 Rayburn Building

12:30 p.m.
Finance
Economic Growth, Employment, and Revenue Sharing Subcommittee
To hold hearings on the use of tax incentives to increase employment, focusing on ways to increase the level of employment by reducing the additional labor costs imposed by Federal taxes.
2221 Dirksen Building

2:00 p.m.
Budget
To continue hearings in preparation for reporting the first concurrent resolution on the fiscal year 1982 congressional budget.
6202 Dirksen Building

Energy and Natural Resources
Energy Research and Development Subcommittee
To resume hearings on proposed authorizations for fiscal year 1982 for the Department of Energy, focusing on the U.S. Synthetic Fuels Corporation, and alcohol fuel programs.
3110 Dirksen Building

APRIL 6

8:00 a.m.
Appropriations
Defense Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1982 for the defense establishment, focusing on Navy posture.
1223 Dirksen Building

9:00 a.m.
Commerce, Science, and Transportation
Science, Technology, and Space Subcommittee
To hold hearings on proposed legislation authorizing funds for the national climate program.
1318 Dirksen Building

Energy and Natural Resources
*Energy Conservation and Supply Subcommittee
To hold hearings on proposed authorizations for fiscal year 1982 for certain programs of the Department of Energy which fall within the subcommittee's jurisdiction.
3110 Dirksen Building

Select on Indian Affairs
To hold oversight hearings on the adequacy of Government supervision and monitoring of Indian and Federal oil resources.
6226 Dirksen Building

9:30 a.m.
Judiciary
Courts Subcommittee
To resume oversight hearings on the implementation of the Bankruptcy Reform Act, focusing on the grain elevator bankruptcy provisions.
2228 Dirksen Building

Labor and Human Resources
Alchoholism and Drug Abuse Subcommittee
To hold hearings on proposed legislation authorizing funds for the Alcohol and Drug Abuse Education Act.
4232 Dirksen Building

10:00 a.m.
Appropriations
*Transportation and Related Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1982 for the U.S. Railway Association and Consolidated Rail Corporation (Conrail).
1114 Dirksen Building

Commerce, Science, and Transportation
Communications Subcommittee
To hold hearings on S. 720, authorizing additional funds for the Corporation for Public Broadcasting for fiscal years 1984, 1985, and 1986.
235 Russell Building

1:00 p.m.
Commerce, Science, and Transportation
Science, Technology, and Space Subcommittee
To hold hearings on proposed legislation authorizing funds for programs of the earthquake hazards reduction program.
1318 Dirksen Building

2:30 p.m.
Judiciary
Courts Subcommittee
To continue oversight hearings on the implementation of the Bankruptcy Reform Act, focusing on personal bankruptcy provisions.
4232 Dirksen Building

APRIL 7

9:00 a.m.
Appropriations
Interior and Related Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1982 for the Bureau of Land Management, Department of the Interior.
1114 Dirksen Building

Office of Technology Assessment
The Board, to hold a general business meeting.
EF-100, Capitol

9:30 a.m.
Appropriations
Agriculture and Related Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1982 for the Food and Nutrition Service, and the Food Safety and Quality Service, Department of Agriculture.
1223 Dirksen Building

Appropriations
State, Justice, Commerce, and the Judiciary Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1982 for the Office of the Ambassador to the United Nations, and international organizations.
S-146, Capitol

Commerce, Science, and Transportation
Science, Technology, and Space Subcommittee
To resume hearings on proposed legislation authorizing funds for fiscal year 1982 for the National Aeronautics and Space Administration.
235 Russell Building

Energy and Natural Resources
Energy and Mineral Resources Subcommittee
To resume oversight hearings to review the strategic minerals and materials research policy of the United States.
3110 Dirksen Building

Labor and Human Resources

HOUSE OF REPRESENTATIVES—*Tuesday, March 31, 1981*

The House met at 12 o'clock noon.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

Almighty and everlasting God, comfort of the afflicted and strength of all in need, graciously send Your Spirit upon Your servants who look to You for healing and support. Especially do we commit to Your abiding care the President and those who have served with him who have known the violence of our day. As a nation our hearts reach out in fervent prayer for them and their families, who have experienced distress and sorrow and pain. Keep us all in Your grace and knit us together as a people with the unity that comes from the awareness of Your presence and Your eternal power and love to us. In Your holy name, we pray. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

LICENSING AND REGISTERING OF HANDGUNS URGED

(Mr. PEYSER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PEYSER. Mr. Speaker, on December 9, 1980, the day after the killing of John Lennon, I took this floor and I said to my colleagues here:

Why can't we here in the Congress pass a handgun control bill? We wouldn't expect it to stop all violent crime, but it certainly could save a great number of lives. What are we waiting for?

I said, "The next life we save may be our own."

This bill is a very simple, basic bill, one that would simply require licensing and registering for all handguns. It just seems to me, Mr. Speaker, after what happened yesterday, that we must recognize that John Hinckley, if my legislation had been in force, would not have been able to acquire the .22 caliber pistol that he purchased just a few days after having been picked up for illegally possessing other weapons.

Mr. Speaker, we owe it to the President of the United States and to all those who have been exposed to this kind of tragedy to act on this matter immediately. The world is watching to see if we really care enough to bring about a basic change in our gun laws.

A LEADERSHIP REPORT ON THE AFTERMATH OF YESTERDAY'S ASSASSINATION ATTEMPT

(Mr. WRIGHT asked and was given permission to address the House for 1 minute.)

Mr. WRIGHT. Mr. Speaker, I take this time to advise the Members that the leadership has returned within the hour from a meeting at the White House in which we received factual and reassuring reports from the Vice President's, the President's physician, and members of the President's Cabinet.

It will be reassuring to the membership and to the Nation to know that the President is recovering in a very satisfactory fashion. He signed a bill this morning. His physician reports that he is fully possessed of all his faculties including his splendid spirit and well-known good humor.

The Government has proceeded throughout the events of yesterday without interruption and without a moment of discontinuity. Members of the Secret Service detail functioned in a thoroughly professional and wholly admirable way, Agent Parr getting the President inside the automobile and thence to the hospital with an absolute minimum of delay, and Agent McCarthy who sustained a gunshot wound when he placed himself physically between the President and his armed assailant, now reported in good condition.

The Vice President is visiting personally with the President today at the hospital and is acting at the President's direction to fill several appointments to which the President had been personally committed for the day. The President's progress is good. His recovery seems well assured. The business of Government, in both the executive and legislative branches, continues apace and without interruption. This surely is the way the President desires it. It is the way the Founding Fathers intended, and this unbroken continuity of effort in the face of difficulty is the great strength of our constitutional system.

YESTERDAY'S ASSASSINATION ATTEMPT CRIES OUT FOR HANDGUN CONTROL

(Mr. BINGHAM asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. BINGHAM. Mr. Speaker, we were all shocked by the events of yesterday. We are reassured by the report of the majority leader that the President is recovering well, and we hope the same will be true of his associates.

My hope is that this shattering event will help to bring this country to realize the insanity of our present system—or nonsystem—of allowing people to buy guns, handguns that kill people, as if they were lollipops.

A cabdriver in London yesterday was reported on the radio as saying that he simply could not understand how the United States could go on allowing this kind of thing to happen. Of course, in Britain, private individuals are not allowed to own handguns. The same is true in Japan, and this sort of thing, this tragedy of yesterday, could not occur in those countries.

So, Mr. Speaker, I hope that this event will help to bring some commonsense to our people and, through the people, to these Halls of Congress.

WHEN WILL IT END?

(Mr. DOWNEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DOWNEY. Mr. Speaker, I do not yet know whether the pistol which shot the President of the United States was in the possession of its wielder legally or illegally.

But I do know this: If the would-be assassin purchased his gun in violation of the law, the gun lobby will claim this proves gun laws are unenforceable. If, on the other hand, the gun was legally owned, the gun lobby will claim this as proof that strict gun laws can not distinguish between the responsible and the irresponsible. Either way, the gun lobby wins. Either way, the American people lose.

Yesterday's tragedy was remarkably similar to an attempt on the life of a Pope about a decade ago. But there was one critical difference: This occurred in the Philippines, where gun laws foiled the assailant's attempt to buy a pistol. So he used a knife, and the security forces were able to control him before he could hurt anybody. If he had lived in the United States, he would have had his gun and the Pope could have been killed. The gun lobby notwithstanding, a gun is far more lethal than any other concealable weapon.

Guns do not kill people, and people do not kill people. People with guns

kill people. Since it is not practical to break this equation by eliminating the people, if we value our lives we will do it by eliminating the guns.

A TRIBUTE TO AMERICA IN THE AFTERMATH OF YESTERDAY'S ATTACK ON THE PRESIDENT

(Mr. KAZEN asked and was given permission to address the House for 1 minute.)

Mr. KAZEN. Mr. Speaker, I am sure that I speak for all Americans when I thank God that our President is recovering from the incredible attack on him yesterday. We all pray that he and the others wounded in that incident have a complete recovery.

The shooting of President Reagan was more than an attack on our Nation's leader. It was an assault on our Nation. I say that we can be proud of our governmental system, because there was no panic, no uncertainty about the Nation's ability to function. Courageous law enforcement officers at the scene acted promptly to fulfill their obligations, as did the President's associates in the administration. Our citizens were shocked, but their confidence in our Government was not shaken.

I believe that we in the Congress should and will show the same resolve to move forward, meeting challenges less personal but no less critical that we build greater strength on the strong foundation of our American system. I extend sympathy to the President and his family, the families of the wounded, and ask the Lord's blessing on them.

ANOTHER SAD AND SHAMEFUL DAY OF VIOLENCE

(Mr. PERKINS asked and was given permission to address the House for 1 minute.)

Mr. PERKINS. Mr. Speaker, the country has had to endure yet another sad and shameful day of violence.

President Reagan is our 40th President, and the 9th to be the target of assassins.

The terrible arithmetic of that statement must chill us all. But it places upon us an urgent responsibility to do something about the violence that is so rampant in the country and in our own communities.

Violence in the streets, whether it be directed at a President or at a humble charwoman on her way home from work in the evening, strikes at the vitals of a free society. That is what the phrase "life, liberty, and the pursuit of happiness" is all about.

As far as can be determined thus far, the shooting of President Reagan had no political motive. We can only assume that the motive was violence itself.

All of us fervently hope for his rapid healing, and that his press secretary and the two security officers make a good recovery.

This tragic incident underscores the fearful price we have to pay for living in an open society. Our Presidents move freely among the people in all parts of the country. They cannot be confined behind stone walls or encased in bulletproof glass.

The American people demand high visibility of their Presidents. The link between the Chief Executive and the people must not only be real, it must be in full view.

We provide a security force, of course, and a very good one. But there can never be enough Secret Service agents to detect all of the violence that lurks in dark minds, waiting for a chance to explode.

The pause of a President to smile or wave or shake a hand is all the potential assassin needs.

Somehow, we must find ways to recognize the potentially violent, and to require that they be given effective treatment. Failing that, ways must be found to protect society from them. And we must redouble our efforts to see that crime in the streets is dealt with instantly and decisively, and that the opportunity of repeaters be foreclosed.

I also believe that we must have harsh penalities to deal with those who so violently break our laws and jeopardize the very foundation of a civilized society. And, these penalties must be known to all ahead of time. Harsh and sure penalties will serve as a strong deterrent ahead of time to such senseless conduct.

THE MADNESS, AGAIN

(Mr. SWIFT asked and was given permission to address the House for 1 minute.)

Mr. SWIFT. Mr. Speaker, anger, deep and abiding anger, was what I felt that November day in 1963 when I heard "they" had shot John Kennedy. I remember as clearly as if it were yesterday, the anger that some, one person in our society, for any reason, would dare to undo what our democratic society had collectively determined. One person decided he would take into his own hands who our President would not be.

What arrogance. What ego. What madness.

Well, it was just yesterday that they did it again: They shot my President.

I had not voted for him. Nor would I ever be likely to. But, like John Kennedy before him, he was the people's choice; and our choice should prevail, survive, and no one person put it asunder.

That is what makes this failed attempt on the life of Ronald Reagan more an outrage than the killing of John Lennon or even Martin Luther King. This was an attempt—no doubt isolated and mad—but nevertheless an attempt to change our collective decision. And as such, it was an attack, not just on one man or even this President, but on our very system, on us, on Americans.

I do not know where this madness comes from. I do not believe we are all mad. I do not believe our society has turned cruel and crazy. But there are those among us who are that way. And they seem to tempt and seduce others to follow in their violent steps without regard for the sanctity of life or for the purpose of our system.

President Reagan's daughter said, at a time of understandable stress, that if we all get angry, then we can stop it. I understand the fury of a daughter, because I shared it as a stranger. But that is not the answer; getting angry. We make our greatest mistakes when we are angry.

Rather, this is a time to privately, seriously, individually dedicate ourselves against the madness, to deny the thought that anger solves problems. It is a time to put aside forever the idea that screaming, "I am mad as hell and I will not take it anymore" will ever solve anything.

If we do not put those corrosive thoughts aside, to one degree or another, we join "them" in their madness.

□ 1215

The SPEAKER pro tempore (Mr. PEYSER). The Chair recognizes the gentleman from Kentucky (Mr. HUBBARD).

CONCERN FOR THE RIGHTS OF INNOCENT PEOPLE

(Mr. HUBBARD asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. HUBBARD. Mr. Speaker, I share the shock and sadness of all other Americans today regarding the tragic events of yesterday. Naturally, my prayers and thoughts are with the President, his press secretary, the Secret Service agent, and the Washington, D.C., policeman, all of whom were tragically shot and wounded here in our Capital City of Washington yesterday.

If there are any positive effects from yesterday's tragedy, hopefully it will cause the U.S. Supreme Court, other Federal and State judges, jurors, certain Members of Congress, and certain State legislators who are so concerned about the rights of criminals to become more concerned about violence and the rights of innocent people. The people of America surely are ready for tougher treatment of violent criminals.

While the young man from Colorado who allegedly shot the President probably will be in prison for a long time, one sad fact is that if a John Doe or a Jane Doe were shot yesterday in many areas of America, the assailant would be today already out of jail on bail and back on the streets again.

DEMENTED PEOPLE WITH EASY ACCESS TO FIREARMS

(Mr. BONIOR of Michigan asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BONIOR of Michigan. Mr. Speaker, once again this body gathers itself in the aftermath of a national tragedy that humiliates and angers us all.

Once again we have to question what we are becoming as a nation when our most heavily protected citizen can be cut down by demented people with easy access to firearms.

Once again, we strain our credibility abroad as a peace-loving people when the gun that shot the President was one of 20,000 which roll off a Miami assembly line every month—more than are in private possession in most Western countries.

And once again, I have little doubt that, despite the overwhelming endorsement of Americans for stronger controls on handguns, the questionable freedom of access to handguns professed by a minority will take precedence over the unquestionable right of all Americans to be secure in their persons.

That is the real national tragedy: That our citizens must live in fear, and thousands of them in grief, because this body, which never hesitates to profess its populist orientation, chooses to respond to special interests of the NRA.

The sadness is most heavy today in this Chamber and that is as it should be. If our responsibility was felt to those who elect us, not to those who would defeat us, history might never have had reason to note March 30, 1981.

BALLOTS, NOT BULLETS

(Mrs. SCHROEDER asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. SCHROEDER. Mr. Speaker, I think we all know that ballots and not bullets are the American way. We all know that we are supposed to engage in debate and not violence, that we are to use words and not weapons.

We are the leader of the free world. I think that the incident that we have just seen has saddened all of us. We cannot say enough about the families, the President, his staff, the people around him, and how calm they have been during this very difficult period. They have been brilliant role models, saying to all of us and reassuring all of us that everything would work.

Yes, the Constitution did work; but we cannot accept this violence any more in our society, which is almost becoming routine. None of us want our President and public officials locked up so they never go out on the streets or meet with the public again.

I hope that as this passes that we will all sit down, the President, his staff, the Cabinet and the Congress, and start seeing what we can possibly do to get violence out of the streets of Atlanta, violence out of the streets of the Nation's Capital and begin to act as we should act as leaders of the free world.

MRO RESOLUTION TO END VIOLENCE

(Ms. OAKAR asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. OAKAR. Mr. Speaker, I am deeply saddened, as are all Americans, by the attempted assassination of President Reagan and the other individuals shot and wounded. We pray for their speedy recovery, but violent crime is a serious disease that contaminates every aspect of life in the United States.

Violence itself victimizes every man, woman, and child.

Violence is a national outrage and disgrace.

There are no simple answers. Therefore, I propose that this Congress set up a National Commission on Violence to comprehensively address the issue and offer solutions to deal with the symptoms of this problem. Our national defense must not only relate to other countries, but the defense of our own citizens. Let us have a national commitment to make America the land of the free, not the land of the violent.

A DAY TO REJOICE

(Mr. DYSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DYSON. Mr. Speaker, the shocking and tragic events which surrounded our President and our Nation as a whole yesterday has once again plunged the American people into an introspection of conscience and purpose.

Each of us in this great body of Americans must ask ourselves, how, in a country as great as ours, can there be such violence.

But today is not a day of sorrow, it is rather a day to rejoice. We will because our President has proven that he was born for an hour that has not yet arrived and has made it clear to all that he shall serve his hour—here in this city—here in this Nation and here in this time.

I join with the Members of this House, and the people of Maryland to express our gratitude to God—for the lives of our President and those brave souls who stood by his side.

It is our hope that those few dark hours of Monday, March 30, will be set in bold relief against all the bright days which lay ahead of the President and those who were felled at his side.

Mr. Speaker, the people of Maryland offer our prayers for those people.

PRETRIAL SERVICES AGENCIES

(Mr. HUGHES asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. HUGHES. Mr. Speaker, today and on April 6, the Subcommittee on Crime of the House Judiciary Committee will be holding hearings on the activities of the Pretrial Services Agencies or PSA's. The Pretrial Services Agencies were established by the 1974 Speedy Trial Act in 10 demonstration districts. Their programs provide judicial officers with better information on which to make bail decisions, and as a result, to more effectively prevent bail jumping and pretrial rearrests.

We are all aware that crime rates are rising rapidly. New FBI statistics issued this morning, verify this situation. Especially to prevent tragedies such as that involving our President and three others yesterday, it is essential for this country to find effective mechanisms to deal with crime and to insure that those charged with crimes are treated fairly and justly, but where appropriate, are held to account for their actions. The criminal justice system, like the rest of the Government, is faced with shortages in the necessary resources to combat the crime problem. The Pretrial Services Agency is one part of the system that has proven effective.

It has provided the means to insure the appearance of the defendant at court proceedings and to reduce crime by those out on bail. It has saved the Government money and something you cannot quantify—it has saved human suffering. The 10 demonstration districts have really proven effective in accomplishing all of these goals.

Where the means are found to not only combat crime, we must move quickly to effectuate them. Therefore, I, along with my colleagues, the gentleman from New Jersey, PETER RODINO, chairman of the Judiciary Committee, and the gentleman from California, DON EDWARDS, have introduced H.R. 2841, which authorizes an

expansion of the Pretrial Services Agencies to other judicial districts.

PROTECTION FOR PRESIDENTIAL STAFF

(Mr. PARRIS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PARRIS. Mr. Speaker, Members of this House like Americans everywhere are stunned by yesterday's senseless savagery. These recurring attempts to assassinate the President of the United States are a national nightmare that appears again and again with different faces. We as a people must stop this periodic horror.

After the tragedy in Dallas in 1963, the Congress enacted legislation calling for capital punishment for those who kill a President of the United States and providing a penalty of life imprisonment for attempting to kill the President. The law also provides firm penalities for persons convicted of wounding or killing law enforcement officers assigned to protect the Nation's Chief Executive. Presumably these penalties will be applied to the person convicted of yesterday's outrageous assault which resulted in the wounding of Secret Service Agent Timothy McCarthy and District of Columbia Police Officer Thomas Delahanty.

Unfortunately, Mr. Speaker, the protection of the Presidential Assassination Act does not apply to White House Press Secretary James Brady, who at this moment lies in George Washington Hospital fighting for his life. I believe the White House press secretary, members of the President's immediate staff and members of the Cabinet should be afforded the potential protection of the Presidential assassination statute.

I am today submitting an amendment to section 1751 of title 18 of the United States Code which will extend the legal safeguards which ideally offer the President a measure of protection from would-be assassins to cover members of his immediate White House staff, including the press secretary, and members of the Cabinet. These persons are, unfortunately, in the line of fire frequently as a result of their close proximity to the President and I think they are entitled to the protection of the full legal penalties of the Presidential assassination statute.

I urge my colleagues support of this measure.

TOO LENIENT WITH CRIMINALS

(Mr. ROTH asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ROTH. Mr. Speaker, while we are all grateful that the President will be back in the Oval Office real soon. yesterday's horrifying incident should underscore the admonishments of Chief Justice Burger. Our own Chief Justice has often reiterated that we are too lenient with criminals, all too often they get off with a slap on the wrist. Literally, criminals get away with murder.

FBI statistics today indicate that violent crime is up 10 percent. Can there be any wonder? Our own people get a steady diet of crime on TV and in the movies, and all too often the glorification of crime. Can there be any wonder that events like yesterday do occur?

Freedom of expression is a wonderful blessing, but I feel that freedom of expression also puts a responsibility on those who mold public opinion.

MOVE QUICKLY TO IMPLEMENT PRESIDENT'S PROPOSALS

(Mr. EVANS of Delaware asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. EVANS of Delaware. Thank you, Chaplain Ford, for that most meaningful prayer opening our session here today.

Mr. Speaker, we are all deeply shocked and saddened by yesterday's despicable act of violence, an act that had no purpose nor objective other than evil. My prayers and the prayers of all the citizens of Delaware and America are for our President and his family, as well as the other families stricken in this senseless act.

I believe, Mr. Speaker, that this is the time to show America and the world that the Congress of the United States will not be delayed 1 day in enacting the President's program. We cannot allow President Reagan's proposals to benefit America to be deferred by an act of terrorism. We are delighted, of course, to note the President's successful recovery from surgery last evening, and it is now the responsbility of this body, and of the Senate, to move quickly in acting to implement the proposals of our great President.

PRESIDENT REAGAN'S UNIQUE PERSONAL STRENGTH

(Mr. RUDD asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. RUDD. Mr. Speaker, I join with hundreds of Arizonans who have telephoned and cabled my office with expressions of sympathy and prayerful support for President Reagan, White House Press Secretary Jim Brady, Secret Service Agent Timothy McCarthy, and Police Officer Thomas Delahanty, following yesterday's tragic attempted assassination of the President.

We pray for the full and speedy recovery of them all.

The President's good sense of humor and heartwarming expressions throughout yesterday's ordeal uplifted the Nation at a time of shock and sorrow.

He is blessed with great personal strength that is an inspiration to us all.

President Reagan demonstrated to all Americans yesterday that, though wounded, he has a most unique leadership quality that can carry the Nation to the great heights to which we all aspire.

It is important we press forward in Congress to achieve prompt enactment of the President's program for national economic recovery.

FROM CRIME TO PUNISHMENT

(Mr. CARMAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CARMAN. Mr. Speaker, I agree with Maureen Reagan. It is time for America to get mad. We need courts that work and laws that have teeth. We ought to be mad as hell and we ought not to take it any longer.

It is time for America to counterattack with immediate action—from crime to punishment. Let there be no delay. Let us make the punishment so severe that no one will dare to commit a crime with the use of a gun. Criminals like the man who tried to kill President Reagan, criminals like the man who wounded people close to the President, criminals like the one who recently killed a Maryland policeman the other day are a spreading cancer in this country and the cure is to cut them out of civilized life.

THE PRESIDENT SET A FINE EXAMPLE

(Mr. WALKER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WALKER. Mr. Speaker, we have heard a lot here about political issues, but perhaps today is more a time to be thankful, thankful to God for sparing the life of our President and prayerful that God's mercies will flow to the other wounded and their families, and thankful, Mr. Speaker, for the leadership example shown yesterday in that crisis by the President of the United States.

President Reagan seemed to know instinctively that it was important for him to walk into the hospital as a symbol to the world. He seemed to know instinctively that his flashes of humor at a time of adversity would re-

assure the Nation. As I sat watching yesterday's events unfold, I was reassured by the President's actions and attitude and I am sure much of the Nation was.

At a time of great personal trauma, the President acted like a leader. We should thank him for his remarkable courage and even heroism during a period of national agony.

TERRORISM HITS WASHINGTON

(Mr. McCLORY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. McCLORY. Mr. Speaker, the terrorist assassination attack on President Reagan and the serious wounding of his press secretary, Jim Brady, Secret Service agent, Timothy McCarthy, and police officer, Thomas Delahanty, reflect an outrageous state of violence and lawlessness in our Nation which challenge the very stability of our political and social system.

Mr. Speaker, while deeply saddened by the events of Monday, March 30, we should not resign ourselves to defeat at the hands of criminal elements which are determined to destroy our civilization and return us to the dark ages of tribalism and human destruction.

The multiple murders which have taken place in recent months in Atlanta with the victims being innocent children and the numerous murders taking place here in Washington, D.C., as well as in urban areas throughout our Nation, including my 13th District of Illinois—demand that we treat this ongoing and exacerbating level of violence with determination and effectiveness as we move to eliminate this type of criminality from our social system.

Mr. Speaker, I recall several week ago when a number of my colleagues and I from the House Judiciary Committee attended a meeting in Williamsburg, Va., attended by the Chief Justice of the United States, the Attorney General and the chairmen of both the House and Senate Judiciary Committees. It was entirely understandable that all of these leading figures concerned with our justice system should have emphasized the need for dealing with crime in America as a subject of the highest priority. Indeed, violence, crime, terrorism, vandalism, and related elements of such senseless criminality must be dealt with promptly and effectively.

It is not my intention, Mr. Speaker, to raise here today on the floor of the House the need for Federal legislation to better control the trafficking in handguns. Let me state forthrightly, however, that after extensive studies which took place in 1975 and 1976, I proposed handgun legislation directed not at the hunters or marksmen of our Nation, but at the criminal elements in our society. One of the provisions which was embodied in that legislation was greater control of the business of handgun dealers, including specifically a prohibition against pawnbrokers serving as licensed dealers of handguns. It seems both tragic and ironic that today we are brought face to face with the dilemma of a criminal suspect whose handgun was purchased in a pawnshop in Dallas, Tex.—the very handgun found at the place of the crime and which, when fired, narrowly missed making the President the victim of the would-be assassin's bullet.

Mr. Speaker, for many months I have been endeavoring to secure the cooperation of the FBI and the Department of Justice in behalf of meaningful Federal handgun control legislation for the sole and specific intent of aiding our law enforcement officials in combating crimes of violence. Surely, this is one step which can aid in the fight against violent crime.

The demise of the Law Enforcement Assistance Administration through the denial of funds last year leaves another large gap in the cooperation which should exist between the Federal Government and local and State law enforcement elements as we work together as a nation to combat the pervasive terror of violent crime that stalks our citizens on the streets of our communities.

Mr. Speaker, I hope earnestly that the task force established by the Attorney General, together with those of us on the House and Senate Judiciary Committees, may work actively to restructure an appropriate Federal agency which can provide the guidance, direction, and support which our justice system requires to meet the ever-increasing threat of crime and violence in our Nation tragically dramatized in the attack yesterday on the President.

THE RISING WAVE OF VIOLENT CRIME

(Mr. FISH asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FISH. Mr. Speaker, I join in the expressions of sympathy for the victims and shock at the insanely bloody shooting of our President in Washington yesterday. I join, too, in the prayers for the speedy recovery of our President, for Press Secretary James Brady, for Timothy J. McCarthy of the Secret Service, and for Officer Thomas K. Delahanty of the District of Columbia Police.

My congratulations to the Vice President and the Cabinet for the steady course our Government exhibited.

When I first heard of the brutal attack as I arrived at Washington National Airport midafternoon, my first reaction was one of disbelief and shock. My second and lasting reaction seems to be one of absolute outrage over this wanton madness.

It struck me that here was a clear demonstration that no man or woman is safe in this Nation today. That from the highest to the lowest, no one is safe from the fear of violence—not even the President of this great country.

As a victim of an armed robbery just last week, my outrage at the rising wave of violent crime in our streets may be greater than some. My reaction is that it is high time as a civilized society we get about the task of protecting our citizens from criminal assault.

It is time, I believe, to bring balance to the scales of justice for too long tipped in favor of the criminal. It is time we see that justice is done—that the victim and the health of this society as a civilized community take precedent over the criminal.

It is for this reason that I am promoting a nationwide organization to bring pressure on State and Federal legislators to get tough on crime. It is time we hear from the grassroots. They surely do not accept the status quo.

OURS IS NOT A SICK SOCIETY

(Mr. DAVIS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DAVIS. Mr. Speaker, all of us were outraged by this senseless act of violence yesterday. However, we were all comforted by the news that President Reagan was not seriously injured and that he is recovering remarkably.

We were also comforted to learn that he never lost his sense of humor. His indomitable spirit reassured all of us that America can carry forward with a proper sense of perspective and certainly during these times we all need perspective.

People are crying out already about our sick society. It is important for us to remember that our society is not sick; only a few individuals in our society are.

I think it is important also to comment about those people who will be calling for further handgun control legislation. That, in my opinion, is a complete oversimplification of how to solve the problem of violence in America. We must remember that most of us in America are in a free country filled with compassionate, intelligent, hard-working, patriotic people. Let us not judge our society by the acts of a few sick people.

THE TIDAL WAVE OF VIOLENCE

(Mr. LUNGREN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LUNGREN. Mr. Speaker, yesterday a dreary, rainy Washington day exploded with the sounds of gunfire aimed at the President, and the President and three others lay seriously wounded. Today, however, a new morning dawned with all the brilliance that a spring day in Washington could muster and our President is alive.

The Government has withstood an attack. But having said that, what lessons are to be learned from all this? Let me humbly suggest, Mr. Speaker, that talk about the death penalty, talk about gun control, that is understandable, but I think premature. The horror is too close and the pain is too deep for us to maintain a reasoned judgment today. But the problem does require a full-scale national debate at all levels—local, State, and Federal.

I think we must understand that there is no way we can eradicate all isolated instances of violence in this country. But we must ask ourselves what are we to do about this tidal wave of violence we see sweeping across this country. It seems to me we must ask some serious questions.

Have we raised violence to the level of a national attraction in our country? Do what we see on television and hear on radio encourage young people to be involved in this? Do we think that somehow, with regard to some of those who participate in national sports, professional sports, will their actions and will their advice, and will their comments somehow mislead people to think violence outside the area of sports is acceptable in this country?

It seems to me, Mr. Speaker, we have some important fundamental questions to ask. There is a need to ask, but it ought not to be premature. We in the Congress have the time. We must have the commitment.

Today it seems to me what we should do is give prayers, prayers of thanksgiving that the President is in good condition, that those around him who were wounded are alive, and prayers of petition for their continued good health and for the full recovery of their physical well being.

OUR GOVERNMENT WORKS

(Mr. WORTLEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WORTLEY. Mr. Speaker, Americans around the globe are breathing a sigh of relief today that our President is rapidly recovering from the gunshot wound inflicted by the violent act of terror of a disturbed young man.

It is shocking to think that a single bullet could have undone the ballots of 43 million people who elected Ronald Reagan to lead their country. Ballots and not bullets must continue to govern this Nation—we are not a volatile, unstable country whose Government changes at the point of a gun. Yesterday's actions by the White House demonstrated that our Government works—in crisis the situation was handled calmly and the flow of power and decisionmaking was never in doubt.

The Vice President, the Secretary of State and the rest of the Cabinet and officials conducted themselves with dignity and confidence—it was pure professionalism.

Perhaps the President set the tone best by walking into the hospital even as he was wounded and reassuring those around him by his easy charm and wit.

Mr. Speaker, now more than ever before, our President has shown the world that he has the toughness and the guts to lead our Nation. I salute our Commander in Chief.

To the family of Jim Brady and to the families of the law enforcement officers who were struck down, I share your grief and my prayers are with you.

A DAY OF TWO EMOTIONS

(Mr. COATS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. COATS. Mr. Speaker, all that is good and all that is bad in America happened yesterday. Through the ever present eye of television, we watched the horror of seeing our President shot, along with three others. A nation watched and prayed as events unfolded before our eyes and we again and again witnessed those few seconds of terror and fear.

A few hours later, 10 fine young men representing two respected institutions of learning and athletics participated in our annual consummation of college basketball, the NCAA finals. Again, through the medium of television, we were able to witness the grace, the excitement, the drama, the joy and, yes, the disappointment of basketball at its finest hour.

How does one deal with the two emotions in one day? As a Member of Congress and a graduate of Indiana University, seeing my President shot and my alma mater win the NCAA tournament tears at the very best and the very worst of my emotions. Reflection on this day brings only sorrow. Indiana's victory pales beside the violence of an assassination attempt on our President. The joy of celebrations over victory in sport is robbed by the reality of what happened to our President yesterday.

What could have and what should have been a day of rejoicing for a freshman Congressman from Indiana is destroyed by a senseless act of violence. How many more times must we endure this? How often must we gather before the television to witness firsthand the violence in our society and how long can we endure or tolerate these senseless acts?

I am filled with questions. I have no sure answers.

A SAD ASPECT OF OUR OPEN SOCIETY

(Mr. GILMAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GILMAN. Mr. Speaker, our Nation and the entire world was shocked, saddened, and outraged by the reports of the assassination attempt upon our President yesterday and the wounding of his Press Secretary James Brady, Secret Serviceman McCarthy, and D.C. Police Officer Delahanty.

The Secret Service and the District police force are certainly to be commended for the courageous acts of their officers in providing our Nation's leaders with the proper protection. To the families of those injured yesterday we express our deepest sympathy.

□ 1245

This tragic event is a sad aspect of our open society, that the President of the United States is not safe in his appearances before the public. But, the President must have access to the American people. That is how our Founding Fathers envisioned the role of our Chief Executives. Yet, with the spreading violence and terrorism throughout our modern world, public officials all over this country and in other lands fear for their personal safety.

As we continue to express our faith in our form of open government, and as we offer a prayer of thanks that our Chief Executive will be able to continue to lead our Nation, let us commit ourselves to stamp out terrorism and to fight more effectively the growing incidence of violent crime.

BILL INTRODUCED TO ALTER PRESENT FEDERAL TRUCK EXCISE TAX PROVISIONS

(Mr. PICKLE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PICKLE. Mr. Speaker, I am today introducing a bill which would alter the present Federal truck excise tax provisions by changing the point of collection of the tax from the wholesale sale to the retail sale.

The 10-percent truck excise tax has long been a source of financial concern to the many small business heavy-duty truck dealers of this Nation. Under present law the tax is imposed on the manufacturer at the time that it wholesales the truck to the dealer. The manufacturer then adds the tax to the wholesale price of the truck and passes the cost to the dealer. Therefore, the dealer must finance not only the wholesale price of the vehicle, but he must also finance the very substantial cost of the excise tax. Heavy-duty over-the-road trucks today cost between $50,000 and $75,000. This means that the excise tax imposed on these vehicles runs between $5,000 and $7,500.

Historically, the truck dealer is required to pay between 1 and 2 percent above prime to finance his inventory. In today's money market the financing of these big rigs by the small business dealer is a tremendous burden. The Federal excise tax required to be paid by the dealer dramatically increases this burden. For example, the amount of money that a dealer would have to borrow just to finance the excise tax on 10 trucks is equivalent to the entire wholesale cost of one additional truck. In other words, if the dealer were not required to pay the excise tax at the time that he purchased the vehicles from the manufacturer, he could finance 11 trucks in his inventory for the same amount that he could finance 10 trucks that included the 10-percent excise tax. The interest cost alone to finance the Federal excise tax runs in the tens of millions of dollars nationwide to dealers.

With interest rates at unprecedented levels for such a long period, truck sales are equally, if not more, depressed than automobile sales. Hundreds of dealers are, in effect, hanging on by their fingernails. The bill that I am introducing today is designed to give some much needed relief to these dealers without altering the amount of revenues currently being produced by the tax.

Briefly, this bill would make the following changes in existing law:

First, the point of tax liability and collection would be placed at time of the first retail sale of the truck, trailer, parts, and so forth, instead of the time of the wholesale sale. This would allow the small business dealer to purchase the vehicle from the manufacturer without having to pay the very substantial excise tax at that point.

Second, to avoid increasing the Federal excise tax by taxing a dealer's profit margin, a slight change in the tax computation is also made. Under existing law there is a 10-percent tax on the wholesale price of trucks and trailers and an 8-percent tax on the wholesale price of parts and accessories. Under this proposal the tax would be computed on 90 percent of the actual retail sales price of the vehicle and on 75 percent of the actual retail sales price of parts and accessories. The revenue from the tax under existing law and under this proposal should be substantially the same.

This bill will certainly not solve all of the very serious problems now being experienced by the heavy-duty truck dealers of this Nation. However, it will provide some measure of immediate assistance, and will relieve dealers and suppliers from their present burden of having to finance the tax liability now being imposed on the manufacturers.

I believe that this bill sets forth sound concepts which will assist our Nation's struggling truck dealers without reducing the revenues provided by this tax. I recommend this bill to my colleagues for their consideration.

I trust this deferral will not adversely affect our highway trust fund, and I am asking for further information on this aspect of the bill. The amount of excise taxes will be the same.

ASSASSINATION ATTEMPT GIVES ANTIGUN ENTHUSIASTS WAYS TO ADVANCE THEIR UNPOPULAR CAUSE

(Mr. ASHBROOK asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ASHBROOK. Mr. Speaker, the senseless and demented attempted assassination of President Reagan is properly decried by all decent Americans as well as men of good will throughout the world. Outrage and anger are proper human expressions reserved for incidents such as this. All our best wishes and prayers go out to the President and his family.

My own shock and anger might possibly go deeper than most Americans since I have had a long, 20-year personal association with President Ronald Reagan. I have always been able to count on him as a true friend with whom I have enjoyed working, and who responded on every occasion when I asked him for help, both personal and otherwise.

It is also with a touch of sadness and anger that I must point out the very logical knee-jerk response of many antigun enthusiasts throughout the country who, as in the past, seize on this opportunity in an almost maudlin way to advance their unpopular cause. They seem to have two themes: First, attack the United States as a bad, violent nation and blame it on the law-abiding citizen who constitutionally, peacefully owns and uses a firearm.

I can say categorically that 99 percent of the sportsmen, hunters, conservationists, gun owners and collectors that I know rarely point a finger at their fellow Americans evenly when unfairly attacked, let alone a weapon or threaten them or stand as any link in the chain of crime and violence that grips this country.

We all have grief and anger and fear, those emotions, but we should not use this tragedy to attack these good people.

TRAGIC EVENTS OF MONDAY BRING SAD THOUGHTS

(Mr. FAUNTROY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FAUNTROY. Mr. Speaker, my colleagues, I first want to pause and reflect on the tragic events of Monday in our Nation's Capital. I am sure I speak for all black Americans, so recently shaken by numerous incidents of violence against blacks around the country in saying that we are deeply disturbed by these tragic shootings, and are praying for the complete recovery of the President and all of those wounded yesterday. We are sick of violence and hate in this country.

My personal shock turned to trauma as I painfully remembered the autopsy pictures I had to study as a member of the committee investigating the assassinations of John F. Kennedy and Martin Luther King, Jr. Most people just do not realize the enormous and cruel damage a bullet can do to the human body. "How many deaths will it take till we know that too many people have died?"

I have never been able to understand why people who are willing to register their cars, their dogs, and their bicycles are not willing to support the registration of all handguns in an effort to control access to these death-dealing, concealable weapons. I pray that our Nation may somehow begin to deal seriously with the violence and hate that pervade almost every aspect of American life from our television sets, to our movies, to the streets of our cities.

It was President Franklin D. Roosevelt who spoke at another time, to a troubled, frustrated, and economically depressed America; saying that "the only thing we have to fear is fear itself—mindless, senseless, crippling fear."

Our hearts go out this afternoon to the fearful children and the fearful parents and families of black children in Atlanta, Ga. And, we come at this moment recognizing that it is not only they who fear, but our concern must be for the fear that is beginning to grip, not only black children in Atlanta, but black people all over this Nation; for there are those in this country who as in times past, are attempting to contain the aspirations of black people in a crippling circle of fear—this is nothing new to us.

When the new and freed slaves looked at the horizon of freedom there were those who were determined to contain their aspirations by the use of violence, intimidation, and murder to limit their hopes.

When the newly enfranchised, black voters of the South, in the Reconstruction era, began to lift their aspirations there were those at the close of the Reconstruction era who were determined to encircle their aspirations and contain it in fear; this is nothing new.

And so, as we look at the children—and their parents—in Atlanta who live in fear today, let us look at a black nation for whom some people have decided: "We must encircle them with fear." It is no accident that the Ku Klux Klan is filmed in camps training to kill black people across this Nation; it is no accident that some people have taken upon themselves to kill black men in Buffalo—to cut their hearts out; it is no accident that some black people jogging in Salt Lake City were gunned down; it is no accident, I believe, that the nephew of a member in my church, who made a trip last week to North Carolina, was driven off a road in Virginia and beaten to death by two white men.

The circle of fear is beginning to build, and our prayer and our concern for the children in Atlanta is our prayer and our concern for all those who are being encircled by fear.

Now, history has taught us that the only way to deal with such efforts to encircle us with fear is the action of men and women with conscience and determination. The only response to this kind of effort must be action.

I recall the last time in my experience in this country, when the attempt was made to encircle our aspirations with fear. We had just emerged from Selma, Ala., with a Voting Rights Act signed into law: It was bought with the blood of the Reverend James Reid of the All Souls Unitarian Church, bought with the blood of a white woman, Viola Liuzzo, on Highway 80, between Selma and Montgomery. Once we had seen the bitter past and we began to lift our aspirations and our visions, there were those who took the word out in Mississippi, in Alabama, in Louisiana, in Georgia that: "If you registered and voted we are going to start lynching you the way we did at the beginning of the century."

That message went out and a young man by the name of James Meredith, responded with action. He said: "We have nothing to fear, and to demonstrate that, I will march personally—from Memphis to Jackson, Miss. to tell our people that we have nothing to fear." So James Meredith began his march against fear, and not long after he had crossed the Mississippi State line, he was gunned down on the highway. Some of us recognized then that the only way to deal with fear is action.

You recall that many of us went to Memphis, Tenn., and then to Mississippi to take up Meredith's march against fear. It was my privilege to coordinate that march, and we came from North, South, East, and West; black and white together, to say to those demented minds across the Nation in the words of the 27th Psalm:

The lord is my light and my salvation; whom shall I fear? The lord is the strength of my life; of whom shall I be afraid? When the wicked, even mine enemies and my foes, came upon me to eat up my flesh, they stumbled and fell. Though a host should encamp against me, my heart shall not fear.

The time has come for us to act as we acted then. We marched to Philadelphia, Miss. where they had killed Sucherner, Cheney, and Goodman. We marched to Meridian, Miss.; to Jackson, Miss.—and we said, blacks and whites together, "ain't gonna let nobody turn us around."

Because we responded to the efforts to encircle our vision on voting matters with fear, we were able to register 3 million new black voters across the South—since that time, we have elected a Mayor and the City Council in the District of Columbia—because, we met the efforts to encircle us with fear with courageous Christian action in the social and political marketplace.

And so, I want to thank you for lending your presence to this witness against fear. And as I close, I want to challenge you now to action.

As we pray for the recovery of our President and those wounded with him; as we pray for an end to the tragedy in Atlanta, and prayer is important and without God we will not overcome, let us serve notice on those demented minds who feel that they can contain the aspirations of the scapegoat of these times with murder and intimidation. That we, together, will not be deterred; that we will search them out until justice rolls down like water and those things done in darkness are brought to light.

Let us also begin today to seriously work to eradicate the venomous handgun from our society, let us seriously and earnestly begin to work for handgun control and the ban of the manufacture and sale of this death-dealing agent of violence and mayhem.

It saddens us that our President is hospitalized, the victim of a senseless shooting. But the greater tragedy may be that our brothers and sisters in the world community are not surprised that this has happened and view violent gun-related crimes as a way of life in America.

Let us begin to change that image of shame today.

Then finally, in tribute to those for whom we come together today, let us also determine that we are going to raise this issue above race, above religion, above color, above poverty, and we are going to overcome.

Let it not be said of us as it was said of one in Nazi Germany who was a Christian who said, at the end of World War II that he did not protest when the Nazis began to persecute the Jews because he was not a Jew. Nor did he, a few months later, protest when the Nazis began to persecute the university professors, because he was not a university professor. And even later he failed to protest, he remembered with great misgivings, when his government began to persecute the journalists who disagreed with it. People did not criticize the storm troopers because they were afraid, and they hoped by silence to force the nightmare to disappear. Instead the nightmare fed on their silence and fear. And this same German concluded that when his government began to persecute him and his group, it was too late to protest, for almost all opposition had already been silenced.

They are after the children today. They are after innocent defenseless black men in Buffalo. They tried on Vernon Jordan, but those of us who are in public office must understand that the circle of fear is being drawn, and none of us shall be free until all of us are free.

Now is the time for action in our churches and our streets; in the Nation's Capital and every State across this Union, every city ought to be rising up to say: "We are not going to take this sitting back." And to say that, "We shall overcome"—and I will tell you we shall overcome, just as we did during the Reconstruction period, just as we did in Selma, we shall overcome. If we do not overcome, then truth is a lie; if we do not overcome, then justice is injustice; if we do not overcome, then right is wrong and east is west, and we shall overcome.

We shall overcome, because, truth is truth; we shall overcome because justice is justice; we shall overcome because God is God, and right is right; and right the day must win.

And when we overcome it will not be a victory of children over adults or blacks over whites or poor people over rich people or Protestants over Catholics or Jews over Gentiles or Moslems over Christians. It will be victory when we will all say, blacks and whites together, young and old together, rich and poor together, Protestants, Catholics, Jews, Gentiles, and Moslems together.

We shall overcome if we respond to the effort to intimidate with action, marching, giving, living. These are the high grounds of principle we enunciate, yet so often fail to live.

GENERAL LEAVE

Mr. FOWLER. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks and to include extraneous material on the subject of my special order.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Georgia?

There was no objection.

THE LITTLE CHILDREN OF ATLANTA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Georgia (Mr. FOWLER) is recognized for 60 minutes.

Mr. FOWLER. Mr. Speaker, I requested this special order 2 weeks ago to provide a forum for a discussion of the deaths and disappearances of children in Atlanta. By a terrible turn of fate, we are now convening 1 day after an attempt on the life of the President of the United States. I am sure I speak for all in extending our fervent prayers and best wishes for the President and Mrs. Reagan, and also for Mr. Brady, and the two law-enforcement agents who were shot and their families.

On the face of it these cases have little in common; yet they both reveal the vulnerability of us all to acts of violence—from the most powerful to the powerless. They both represent major assaults on our society: An attack on the highest office in the land in the one instance, an attack on our most precious resource, our children, in the other. In point of fact, however, these are not isolated instances. They are but a part of a grim count of Americans who fall victim to acts of violence every year, and the toll continues to mount.

If it was not clear before, it should be today that we must seriously address this issue as a nation and as individuals. Most fundamentally, we must all come to recognize and to believe that violence is never a solution, no matter what the problem.

I take no pleasure in initiating this special order on the missing and murdered children of my city of Atlanta.

However, given the tremendous outpouring of national concern over this tragedy and the troubling nationwide issues of child safety and welfare it has raised, such a discussion in the Congress of the United States is both appropriate and necessary.

By now, you all know of the calamity that has befallen the murdered children of Atlanta and their families. Certainly, they have suffered the greatest loss but they are not the only victims. The young people of my city who live now in daily fear, closing out the outside world and cutting themselves off from the joys and adventures that should be a part of their childhood, are assuredly victims, as are their families.

So this is a national tragedy, and unfortunately one that could come to any part of our country.

The crimes in Atlanta cannot be seen as an isolated problem. Child safety is an issue that cuts across State boundaries. In 1977, according to the Justice Department, the overall violent crime rate for assault, robbery, rape, theft, and larcency was 33.9 per 1,000 people; for 12- to 15-year-olds the rate was 56.5 per 1,000 and for 16–19-year-olds—67.7 per 1,000. In 1979, almost 10 percent of all homicide victims (1,866) were young people between the ages of 15 and 19. These figures are both horrifying and unacceptable. Clearly we must do a better job of protecting our children's welfare. The Atlanta tragedy is but the latest example of our collective failure in this regard.

Since July of 1979 21 young, black Atlantans have been killed and 2 others have disappeared. In the 19 months since then, despite the efforts of local law enforcement agencies later joined by Federal agents, these cases have defied solution. Atlanta police believe that the deaths are not the work of a single killer and may well involve an original primary killer, a copycat murderer, and several unrelated homicides. There have been no major leads for the detectives working on the cases, no eyewitnesses accounts, no clear telltale clues, no reliable confessions or accusations. In time one or more of these will occur and the killer or killers will be found, but in the meantime we must do everything within our power to protect the physical and mental health of Atlanta's children, and to conduct as thorough an investigation as possible to make sure that all potential leads are checked out.

At the local level all available resources have been focused in a two-pronged effort to investigate the crimes and prevent further victimization of Atlanta children.

The investigation has mushroomed into the most intense crimesolving effort in Atlanta history. The bureau of police services devoted over 6,000 investigative hours to the cases before July 1980 when a special task force was established to spend full time on the investigation of the missing and slain children. Since July 1980 the special task force has been expanded from one sergeant and four investigators to its February 1981 level of 78 personnel. In September 1980, Governor Busbee established a $10,000 reward fund at the request of Mayor Jackson, which has since been increased over tenfold due to the generosity of citizens from all across the State. In addition, the Georgia General Assembly appropriated about $200,000 toward the investigative efforts. Experts have been enlisted from all around the country. In November 1980, the FBI was authorized to enter into the investigation; in addition, five police specialists from around the country were enlisted in the effort. In October 1980 volunteer Atlanta citizens began weekly searches of the areas where missing children were last seen. These are just a part of the all-encompassing effort to solve these tragic crimes.

Atlanta has also united in the effort to prevent future crimes. During the summer of 1980, community forums and personal safety workshops were conducted to keep citizens informed. In September 1980 a metropolitan crime stoppers film was developed that aired on local television stations and public service announcements were also broadcast to instruct citizens about child safety. A wide range of brochures and pamphlets have been distributed to create an informational network to continue community awareness of this problem.

I would like to add a word of appreciation to Mayor Jackson and the city government for laboring under the most trying and difficult of circumstances to conduct the investigation, institute preventative measures, and strive to maintain the mental health of Atlanta children and their families. In addition, I would like to thank Governor Busbee and the State government for its efforts including the appropriation of approximately $200,000 toward the investigation, and for the efforts of the State crime laboratory, the Georgia Bureau of Investigations, and the Georgia Crime Information Center.

At the Federal level, a response to the Atlanta murders was slow in coming, as the full dimensions of the tragedy only gradually became known. In fact it took what turned out to be an unrelated event, the October 13, 1980, explosion of a gasfired boiler at the Bowen Homes day care nursery in Atlanta which killed four children and one adult and injured six others, to focus national attention on the Atlanta killings.

Beginning last October, a variety of Federal agencies moved to provide assistance in restoring the Bowen Homes day care center. Also the Public Health Service Division of Alcohol, Drug Abuse and Mental Health programs started providing technical assistance to the local mental health groups that were responding to the rising community concerns over the missing and murdered children.

In late November, a team of epidemiologists at the Center for Disease Control began a detailed health risk study to determine who of Atlanta's children runs the greatest risk of being a homicide victim. The information from this study will be used to help prevent

future murders by both determining if the victims' lifestyles and movements made them more availale to the killer or killers and identifying potential links that might lead to the capture of the killers.

The FBI is currently providing about 40 full-time field agents to aid the investigation along with the full assistance of its crime lab and identification division. Since February 21, a task force comprised of officials from three Cabinet-level departments—the Departments of Justice, Education, and Health and Human Services—has been working to help local authorities through community assistance, health services, and technical assistance.

On March 5, President Reagan announced $979,000 in Federal funds ($650,000 from the Justice Department and $329,000 from other Federal agencies) for a variety of programs requested by Mayor Maynard Jackson. These funds are to be used to provide afterschool counseling and care for up to 1,000 Atlanta young people in the neighborhoods where most of the killings have taken place, to set up an around-the-clock hotline for Atlanta families who are experiencing emotional and other problems because of the killings, to provide shelter for disadvantaged or homeless teenagers, and to involve Atlanta young people in crime prevention activities.

On March 13, the President made available an additional $1.5 million to the city of Atlanta. This money is to be used for certain extraordinary expenses the city has incurred in the course of the police investigation, including such items as overtime pay for detectives and computer time.

The Federal response under Presidents Carter and Reagan has been appreciated and put to good use. I especially want to extend my thanks to President Reagan and Vice President BUSH for their interest in and attention to the needs of my constituents in Atlanta.

Moreover, the generosity of the American people has been overwhelming. Contributions have swelled to over $400,000. This concerted cooperation is in the best spirit of American generosity and is especially appreciated by my fellow Atlantans.

What more is to be done? First of all, I would hope that the Congress will act swiftly and favorably on Congressman CLAY's bill to provide explicit authorization for Federal financial aid for the full range of investigatory activities concerned with the deaths and disappearances of the Atlanta children. The same logic which extends Federal relief to victims of natural disasters ought certainly to apply to this problem, which has had equal if not greater impact on the surrounding community. Although current funding needs for the ongoing investigation are being satisfied due to national and local contributions, we need some type of legislative authorization in case the tragedy is not soon resolved and it proves necessary to seek further Federal financial assistance.

Second, the prayers and demonstrated concern of all Americans can be a major source of comfort and inspiration in helping the people of Atlanta to get through this crisis and then to recover.

At the same time, I do want to add a cautionary note on this subject. What the children of Atlanta and their families do not need from us is the creation of a climate of fear and hysteria. It is the responsibility of all of us, but especially those in the public eye and members of the media themselves, not to sensationalize this story of human suffering or to try to capitalize on it in any way.

The children of Atlanta and their families, and for that matter the children and families of America, need to know the real dangers facing them, to be neither shielded from the truth nor terrified into fearing every shadow.

Third, we must all pull together. All of us, wherever we live, whatever our station in life, have a stake in seeing the killer or killers apprehended and the murders stopped. We should proceed with calm determination and unity, not discord and dispute.

Fourth, and most importantly we must all commit ourselves to the creation of a society and communities where such tragedies will not occur in the future. In this, I do not mean primarily a governmental response. It is in our individual roles as mothers and fathers, neighbors, and concerned citizens that we can do the most to make sure that the deaths in Atlanta are not forgotten, or repeated.

Finally, we must unite as a country to reevaluate the status of child welfare in the United States. The horrible crimes in Atlanta are shocking; it is likewise shocking that more than 17 million American children live in debilitating poverty according to a 1980 report by the U.S. National Commission on the International Year of the Child. According to the same report, 1 million youth are victims of child abuse and neglect; 10 million children have no regular source of medical care; and 13 percent of all 17-year-olds in school are functionally illiterate.

No nation is secure unless its most vulnerable population, its children are safe and well cared for. As concerned parents and citizens, we must make the welfare of our children our first priority, by providing adequate health and educational systems, juvenile justice, nutrition, and housing. Only in this way can we insure the security of our children and our Nation.

I am including statements from Mayor Jackson, Governor Busbee, and a more detailed chronology of the local investigative effort below. Thank you very much for your attention.

The statements follow:

REMARKS BY GOV. GEORGE BUSBEE

Mr. Speaker, let me begin by thanking Wyche Fowler, Georgia's Representative from the Fifth District, for initiating this public forum.

With all of the national attention and publicity surrounding the cases, it is important to present the facts regarding the investigations. It is with this intention, on behalf of the State, that I submit my comments today.

For the past nineteen months, we have lived with the outrage and grief brought on by the senseless killings of children in Atlanta. Until the person or persons responsible for the tragedies are apprehended, tried and convicted, we in Atlanta and Georgia will need your prayers and assistance.

The expenditures associated with the special investigative task force have been extraordinary. Members of my staff met with the Mayor's staff to determine those costs which could be shared or totally funded by the State. As a result I recommended, and the General Assembly appropriated, approximately $200,000. This grant to the city covers unbudgeted expenditures made over a six-month period. However, this amount does not include reimbursement for overtime because the State does not pay its law enforcement officers for overtime. The State will continue its commitment to the operation of the special task force through the utilization of the State Crime Laboratory, assignment of seven full-time investigators from the Georgia Bureau of Investigations and computer specialists from the Georgia Crime Information Center.

After frequent consultations with the White House for additional funds to cover the unbudgeted overtime, a sum of $1.5 million was made available. This funding, coupled with the assistance granted by the state and almost $1 million in technical assistance previously committed by the federal government, will be helpful in keeping the investigative efforts going full-speed until those responsible for the crimes are brought to justice.

Mr. Speaker, Members of Congress, thank you for your support. I am hopeful that with all of our combined efforts we will quickly apprehend the individual or individuals responsible for terrorizing Atlanta's children and families.

REMARKS BY MAYOR MAYNARD JACKSON

Thank you for this opportunity to address the people of our nation through their elected representatives to the U.S. House of Representatives. As Mayor of the City of Atlanta, I bring you today the appreciation, gratitude and respect of the people of Atlanta for the generous and overwhelming concern, solidarity and support which have come to Atlanta from across America.

In Atlanta, we are undergoing a most severe test of our character as a community. The tragic slayings of poor Black children, whether related to each other or not, whether the work of one or more persons, are a most acute manifestation of a malady affecting American society. Day in and day out, the tragic reports of runaway children, child abuse, child neglect, child prostitution and similarly horrible occurrences pile up on law enforcement and social services agencies across America. Obviously, poor children, kept at the margins of our society by

invisible but cruelly effective fences, make the most vulnerable victims.

It is obvious that Atlanta's current experiences have touched a vast reservoir of concern and sympathy among Americans of every economic group and grace. There seems to be an almost universal sense that these tragedies could happen anywhere and that no city in America is immune to similar misfortunes.

Probably one of the few positive aspects of this very negative episode is that we are finding an increased family and community unity and re-affirming our common humanity in response to these tragedies. This is true in Atlanta, where we are re-discovering our interdependence and re-learning that the prospects for a bright and prosperous future are tied to a caring, sensitive and socially responsible present. Atlanta, historically a city of comparatively superior race relations, is drawing together in unprecedented ways. When the need for support arose, Atlantans said yes. When the need for volunteer week-end searchers became evident, Atlantans said yes. When the need for patience and restraint and understanding is critical, Atlantans are saying yes. Such has been the response across America as well, which is why my words today are very much heartfelt.

The people of Atlanta owe a debt of gratitude to the people of America and to the responsible and sensitive leadership of elected officials everywhere who have responded effectively to our special needs. From the municipal officials in Atlanta through the Governor and the State Legislators in Georgia, members of both Houses of the U.S. Congress, and up to the Vice President and the President of the United States, the response has been compassionate, timely, practical and commensurate with the need.

To the people of America, we say thank you and God bless you and offer a prayer, on behalf of all of us, that the tragedies which have brought us together will end and never again be repeated in our midst. We pray, also, that when our adversity ends, Atlanta's and America's increased unity will not.

CHRONOLOGY OF ACTIVITIES MISSING AND MURDERED CHILDREN

The Department of Public Safety has designated the homicides and disappearances of 21 children which have occurred over the last nineteen months as it number one priority. The Department is deeply committed to solving these crimes and its efforts and resources are being primarily directed toward this essential objective.

A two-pronged approach is being implemented by the Department in addressing these crimes—investigation and prevention. Through the Bureau of Police Services, a full-time Special Task Force has been established to investigate these crimes. With respect to prevention, the Department is spearheading a city-wide involvement of Atlanta citizens, and local groups and organizations in responding to this crisis.

All available human and material resources are being pooled in an intensive effort to identify persons responsible and to prevent the further victimization of Atlanta children. As a matter of background the following chronology of activities is presented.

A. INVESTIGATIVE

1. In March, 1980, records involving the homicides of children over the last five years were analyzed by the Police Bureau in an effort to determine any similarities, patterns or trends related to the cases. No common denominator was determined.

2. The Bureau of Police Services, in March 1980, requested and received the assistance of the FBI's Behaviorial Science Unit in Quantico, Virginia in the analysis of all pertinent data related to the cases.

3. On July 17, 1980, the Bureau of Police Services created a Special Task Force to devote full-time effort to the investigation of the missing and slain children crimes. The one sergeant and four investigators assigned to the Task Force were all experienced in homicide and missing persons investigations. Prior to the creation of the Task Force, the Bureau devoted over 6,000 investigative hours to the cases.

4. On August 4, 1980, a meeting occurred of all the Chiefs of Police in the Atlanta metropolitan area to discuss these crimes. Each representative brought any information concerning the disappearances or the homicides of children in their jurisdictions to the meeting and the chiefs worked jointly in attempting to determine any similarities, patterns or trends.

5. On August 21, 1980, the Special Task Force was expanded to a total of four supervisors and 13 investigators.

6. Also on September 9, 1980, weekly briefings between the Task Force members and personnel in each zone on each shift began. These briefings encourage information sharing as well as updating both officers and Task Force members on needed and developed information and clues.

7. A request to Governor Busbee by Mayor Jackson on September 9, 1980, resulted in the establishment of a $10,000 reward fund for information leading to the arrest and conviction of person(s) responsible for these crimes.

8. The assistance of Dr. Lloyd Baccus, a psychiatrist with Emory University, was received in September 1980, to assist the Department in the development of offender profiles.

9. In September 1980, assistance was also received from Dr. Nicholas Groth of the Connecticut State Prison. Dr. Groth, who has extensive experience in dealing with sex offenders and molesters of young children, assisted in the development of offender profiles.

10. On September 9, 1980, assistance was received from the Colorado Springs (Colorado) Police Department through the Law Enforcement Assistance Administration in the development of a computer format for maintaining and sorting related information and clues.

11. In September 1980, interviews began of all previous runaway children in the same age grouping as those who were missing or slain. These interviews occurred to elicit information about the similarities of activities and/or of events of a suspicious nature.

12. Through Special Agent Roy Hazelwood of the FBI (Washington), assistance was received in the development of offender profiles and the processing of taped and printed evidence at the FBI laboratory in September 1980.

13. The Fulton County District Attorney, Mr. Louis Slaton, provided the Special Task Force with the assistance of two assistant district attorneys to aid in addressing legal aspects of investigative activities in September 1980.

14. Also in September 1980, the FBI assigned two special agents to serve as liaison with the Special Task Force. Through the special agents, direct access to the available assistance of the FBI occurred.

15. In September 1980, technical assistance was received from Dr. Larry Howard, State Crime Commission, in coordinating the laboratory analysis of evidence related to the crimes.

16. In September 1980, Governor Busbee's legal staff provided assistance in preparing information concerning the reward fund.

17. Gene Slade, Metropolitan Atlanta Crime Commission, provided assistance in September 1980, in organizing an effort to collect data from police reports for analysis by the Center For Disease Control and the Fulton County Health Department.

18. Sheriff Jim O'Grady, Cook County, Illinois, provided assistance and advice to Police Bureau officials as related to the investigation of the crimes of concern. Sheriff O'Grady has extensive experience on investigations of this sort. His assistance was received in September 1980.

19. Through information received from other law enforcement agencies, Ms. Dorothy Allison, a psychic, provided assistance with the investigation in September 1980. Ms. Allison is noted for using her special abilities in aiding the investigative efforts of numerous law enforcement agencies.

20. In September 1980, the U.S. Secret Service assisted the Special Task Force in providing confidential records on potential suspects for analysis.

21. The State Pardons and Parole Board provided confidential records on potential suspects for analysis in September, 1980.

22. Surveillances of suspects were initiated on a 24-hour a day basis in September, 1980.

23. Also in September, 1980, interviews of persons arrested for other crimes against children began.

24. In September, 1980, the Bureau of Police Services began printing thousands of fliers about the missing and slain children in order to solicit information and clues. In October, 1980, these fliers were distributed throughout the Atlanta community as well as to law enforcement agencies in neighboring jurisdictions and in other states through out the nation.

25. Assistance was also received from the Georgia Criminal Information Center in developing formats for the collection of baseline data in September, 1980.

26. In September, 1980, investigative assistance was received from Captain Robertson, Commander of the Birmingham, Michigan Task Force. Captain Robertson is an investigative expert and advised the Special Task Force members on innovative investigative techniques.

27. By October, 1980, the Special Task Force had expanded to 25 full-time persons. Fourteen persons were assigned from the Bureau of Police Services, two from the Fulton County Police Department, one from the East Point Police Department, one from the Dekalb Police Department and seven GBI agents. In addition, the two assistant district attorneys and two FBI agents were still serving as liaisons between the Department and their respective agencies.

28. On October 18, 1980, the United Youth Adult Conference organized volunteer Atlanta citizens in weekly searches of the areas in which the missing children were last seen. These searches involved an estimated 3,000 citizens and to date have resulted in locating one body and articles which are being examined to determine their relationship to the crimes of concern. The Bureau of Police Services lends support to these searches by assisting in coordinating the search activities. The Bureau of Civil

Defense provides back-up communication support.

29. Mayor Maynard Jackson's Management Information Systems Office personnel were assigned to coordinate and assist in the development of computer programs on October 27, 1980.

30. In response to a request to Governor Busbee by Mayor Jackson on October 27, 1980, the full-time assistance of four GBI investigators and one secretary plus equipment and other technical assistance was made available to the Special Task Force.

31. On October 27, 1980, Mayor Maynard Jackson coordinated an effort to increase the reward fund. Well over $150,000 was collected for this purpose. Varying amounts were contributed by the city of Atlanta, Fulton County, the State of Georgia, television stations, senior citizens groups, local social clubs, merchants and individuals.

32. In November, 1980, ten additional investigators were assigned to the Task Force, from the Bureau of Police Services.

33. The Metropolitan Atlanta Rapid Transit Authority (MARTA) donated office space to accommodate the expanded Special Task Force. On November 7, 1980, the Special Task Force moved into the new headquarters facility.

34. On November 10, 1980, one investigator from the Fulton County District Attorney's Office and one police lieutenant from the Clayton County Police Department were assigned to the Task Force full-time. As of November 12, 1980, 33 investigators were assigned to the Task Force.

35. On November 10, 1980, the Police Executive Research Forum, at the request of Commissioner Lee Brown, arranged for five specialists to provide direct assistance to the Special Task Force. Each of the specialists was highly experienced in conducting complicated homicide investigations: Pierce Brooks of Los Angeles, California participated on the Onion Field Case. Lieutenant George Mayer of Stanford, Connecticut was noted for his assistance in the Parkway Bra Murders. Lieutenant Gil Hill of Detroit, Michigan participated on the Browning Gang Murders investigation and Sergeant Al Smith of Oakland, California worked on the Symbionese Liberation Army case. Detective Charlie Nanton has been involved in homicide investigations in the lower East Side of New York.

36. At the request of Commissioner Brown, the Police Executive Research Forum arranged for a specialist to train two GBI crime analysts on loan to the Department in the Visual Investigative Aids techniques. On November 10, 1980, the analysts were trained in how to visually display and link case information.

37. On November 12, 1980, at the request of Mayor Maynard Jackson, the U.S. Attorney General authorized the FBI to officially enter into the investigations of the missing and murdered children.

38. Also on November 12, 1980, the Bureau of Police Services use of roadblocks was adapted to include a focus on the children's cases. Periodic roadblocks in target neighborhoods were begun to deter/apprehend any abductions of children.

39. Assistance was provided in November, 1980, from Mr. Terry Lenzer in assessing the Special Task Force's system for handling information and scheduling investigations.

40. Through the efforts of Tom Dillion, Fulton County Juvenile Court Judge, questioning of youth detained at the Juvenile Home was begun on November 20, 1980. The youth were questioned in an effort to elicit any information related to these cases.

41. Through the assistance of Attorney Larry Ruff, the Telephone Broadcasting System in Chicago donated a computer dialing system to the Task Force in December, 1980. Through the system, telephone numbers within a two-mile radius are called and a recording asks for and receives information about the children's cases from each person contacted.

42. Dr. William Elsea and a group of specialists from the Center for Disease Control (CDC) began assisting the Department in December, 1980. The group adapted epidemiological investigative techniques to identify populations at risk, specific risk factors and to make recommendations for control and risk reduction measures.

43. On December 15, 1980, retired police officers from the Bureau of Police Services began interviewing arrested persons to elicit any possible information about these cases.

44. On January 2, 1981, the Special Task Force was composed of 63 personnel—including investigators from the Atlanta Bureau of Police Services and 27 recruits, seven investigators from GBI, one officer each from East Point, DeKalb and Clayton County Police Departments, one investigator from the District Attorney's office, three officers from the Fulton County Police Department and three civilian personnel.

45. In January, 1981, Dr. William Rolls of Duke University began evaluating the more than 1,300 pieces of correspondence received from psychics around the country.

46. On January 29, 1981, Mayor Maynard Jackson announced that the entertainer, Sammy Davis, Jr., would conduct a benefit in Atlanta to raise additional funds to support the continued investigations of these crimes. The benefit will be held in the Civic Center on March 10, 1981.

47. On January 30, 1981, Mayor Maynard Jackson and other city officials met with Charles Renfrew and Ken Starr of the U.S. Department of Justice to brief the federal officials on the magnitude of these crimes, the extent of the investigative efforts and to request assistance in expanding the investigation.

48. On February 2, 1981, Mayor Maynard Jackson, Marvin Arrington, President of the City Council and Commissioner Brown met with Governor George Busbee and others to brief state officials and to request assistance in expanding the investigation.

49. On February 16, 1981, changes were made in the operation of the Special Task Force to obtain maximum utilization of existing resources. The changes included assigning Deputy Chief Morris Redding full-time as head of the Task Force, assigning Major W. J. Taylor as Administrative Coordinator and Inspector J. R. Hamrick as Investigative Coordinator.

50. By the end of February, 1981 the Special Task Force was composed of 78 personnel—including investigators from the Atlanta Bureau of Police Services, 24 recruits, 10 members of the field investigation team, seven investigators from the GBI, 2 officers from the Fulton County Police Department, one officer each from, East Point, De Kalb County, Clayton County Police Departments, one investigator from the Fulton County District Attorney's Office, one Atlanta Bureau of Police Services, Community Service Officer and nine civilian personnel.

B. PREVENTION

1. Between July and August 1980, community forums and personal safety workshops were conducted by the Safer Atlanta For Everyone (SAFE) Program and the Crime Prevention Section of the Bureau of Police Services.

2. In September 1980, information packets were distributed throughout Atlanta containing an update on the Special Task Force's investigative efforts, a special bulletin on the missing children, background information on each case, and a safety tip brochure. These packets served to apprise the community of these crimes, as well as to solicit information.

3. On September 10, 1980, the Metropolitan Crime Stoppers film was developed outlining information about the crimes. The film was aired on all local television stations.

4. In September 1980, taped radio public service announcements were broadcast to instruct the public about crime and child safety.

5. In September 1980, personal safety tip brochures were distributed throughout Atlanta to local churches, groups and organizations for distribution to their memberships.

6. In early September 1980, 80,000 child safety brochures were distributed by the Atlanta Public School System to every school-age child. In addition, teachers used the brochures to develop lesson plans focusing on child safety, and officers from the Crime Prevention Section appeared before class assemblies to discuss the necessity for and types of crime prevention.

7. Distribution of information packages containing child safety and crime prevention case information was expanded in September 1980. Various sources including local merchants contributed to the cost of reproducing the packages.

8. Between September and October 1980, the local media greatly expanded the use of public service announcements and other communication tools to provide the community with child safety tips, information about the investigation, and to appeal to the public for further information.

9. Between September and October 1980, public service announcements to be shown on television were developed by members of the Department of Public Safety and professional athletes.

10. The Southern Christian Leadership Conference initiated the Coalition to Save Our Children and the Interfaith Association of Greater Atlanta (IAGA) on October 5, 1980. The Coalition sponsored a Prayer Pilgrimage. The IAGA, a group of religious leaders, sponsored a "Day of Reconciliation" on November 3, 1980.

11. On October 9, 1980, the Soul Patrol conducted crime prevention workshops in the Thomasville Heights Community.

12. Project 12, a church-affiliated group, functions to strengthen the relationship between the community, the police and those churches within the Southside Minister's Alliance. Under the theme "Take a Minute, Save a Child", the group sponsored a rally and parade on October 11, 1980.

13. On October 21, 1980, the Community Relations Commission initiated a coordinating activity of referring persons requesting information or assistance as related to the missing and slain children to the appropriate office or individual. The agency is also offering free counseling by a certified psychologist to anyone affected by these crimes.

14. On October 21, 1980, the Atlanta Bureau of Police Services and the Atlanta Bureau of Fire Services jointly began a door-to-door canvass of all Atlanta residents to deliver information about the missing

and murdered children, crime prevention information, and to directly solicit information from neighborhood residents about suspicious events which may have a bearing on these crimes.

15. On October 21, 1980, added emphasis was given to organizing and coordinating Block Parent Programs in Atlanta neighborhoods. Through this program, certain homes are identified by placards and window stickers, and serve as safe havens for children needing assistance.

16. On October 23, 1980, the Atlanta City Council enacted a city-wide curfew for youths 15 years and under.

17. Local merchants donated funds to print additional personal safety pamphlets for children in October 1980.

18. Beginning November 2, 1980, personal safety seminars were scheduled with child-centered organizations, such as boys clubs, scout groups, local YMCA and YWCA, etc.

19. On November 6, 1980, the Metropolitan Atlanta Rapid Transit Authority (MARTA) began using their buses with radios to monitor activities and to dispatch information to the Police Bureau about any suspicious events observed on neighborhood routes. If necessary, the drivers are prepared to use their buses as safe havens for children.

20. On November 12, 1980, Mr. Ozell Sutton of the Community Relations Services, U.S. Department of Justice, began conducting meetings among community leaders for the purpose of addressing potential racial tensions which may be developing as related to these cases.

21. On November 12, 1980, the Atlanta Falcons, the Coca Cola Bottling Company, Coca Cola USA, and the Northside Jaycees purchased 250,000 trading cards. One side of the trading card depicted a Falcon team member and the reverse side offered personal safety tips for children. These trading cards are distributed to children by police officers while patrolling the zones. In addition to providing children with necessary safety information, the trading cards offer an opportunity for police officers to solicit direct information from the children about unusual events which may have a bearing on the crimes being investigated.

22. On November 17, 1980, the Retired Senior Volunteer Program (RSVP) initiated a senior citizen escort program. Volunteers accompany elementary school children home from school in the afternoons.

23. In November 1980, the Atlanta Public Schools began distributing "Kids Don't Go With Strangers" materials to school children. The materials include records, coloring books, and bumper stickers to create an awareness of the concept among school children.

24. The MARTA publication "Rider's Digest" focused on the missing and slain children cases throughout November 1980, and included pictures of the victims with an appeal to report any information to the Special Task Force. The December issue included an article on the Special Task Force.

25. School system principals also began making daily telephone calls to parents notifying them of their children's absence from school in November 1980.

26. Beginning December 1, 1980, weekly meetings were begun with Fulton County Mental Health personnel and local psychologists. The meetings are to plan strategies for deterring any adverse effects of these cases on Atlanta citizens, especially children. A brochure is planned for parents which will identify the symptoms of and treatment for mental disorders which may develop in children because of these crimes. A conference for parents and others is also being planned.

27. On February 14, 1981, the Department of Public Safety's Mental Health Task Force conducted a public all-day workshop titled "I Am My Brother's Keeper". The purpose of the workshop was to develop means for providing Atlanta children with emotional as well as physical security.

□ 1300

Mr. Speaker, I see several of my colleagues here who are concerned about this matter, and I am extraordinarily pleased to see them here. So let me continue this special order by yielding to my colleagues.

Mr. FISH. Mr. Speaker, will the gentleman yield?

Mr. FOWLER. I yield to the gentleman from New York.

Mr. FISH. Mr. Speaker, it is with great solemnity and sadness that I rise to participate in this special order dedicated to the citizens of Atlanta and the tragedy that they have suffered during recent months. Certainly, one of our most treasured national resources is our children. This loss and its psychological impact upon other children is heartbreaking beyond belief. I join the gentleman from Georgia and my other colleagues in expressing condolences to the families and friends of the murdered children and in wishing Federal, State, and local law enforcement officials a speedy end to the unhappy task of investigating this matter.

Regrettably, we cannot even take a small amount of comfort in the notion that this might be an isolated situation. Gratuitous violence is epidemic throughout our Nation, as evidenced by the vicious attack upon the President of the United States yesterday. In my own State of New York, for instance, we have seen a resurgence of antireligious activity directed against honored places of worship. Buffalo, like Atlanta, is a city of fear. The brutal and frightening murders which have taken place there have prompted citizens to arm themselves in ever increasing numbers. The potential for accidental death is alarming.

Mr. Speaker, situations like Atlanta and Buffalo raise the question of what role is appropriate for the Federal Government in a traditionally local area. Its role is limited, of course, but certainly must extend, at the very least, to protecting Federal civil rights and helping the States and localities to cope with emergency situations unquestionably beyond their means. This should be particularly true where local budgetary constraints may be to some degree caused by spending demands imposed upon them in other areas by the Federal Government. However, hasty and unthinking intervention by the Federal Government in a matter such as this may serve as a precedent for future intrusion irrespective of the locality's wishes.

I believe that the administration should be commended for its cautious, but conscientious, approach to the situation in Atlanta. After the FBI provided some preliminary investigative assistance, a task force headed by the Vice President of the United States was formed to provide more comprehensive aid. Finally, when it became clear that the city was unable to fully finance the prolonged investigation, the administration announced that $1.5 million would be made available for these purposes.

The approach has been similar in Buffalo. Soon after Inauguration Day, I wrote the Attorney General and the Vice President, requesting a review of the Federal Government's role in solving the Buffalo murders. I was advised that the Civil Rights Division, the FBI, the Community Relations Service, and the U.S. attorney in Buffalo have all been involved, not only in the investigation, but in the efforts to maintain calm in the city. I urge the administration not to relent in its activities until the emergencies in Buffalo and Atlanta are over.

Mr. Speaker, I believe that it is appropriate for us at this time to reflect upon the factors which lead criminals to believe that they can engage in these acts of senseless violence with impunity. The causes are many, and their interrelation complex.

What stands out is the public perception that the criminal justice system is simply not effective. Too often it is neither to be feared by the offender nor relied on by the victim.

Since earliest societies, man has devised values and structures to assure society of one's person and property. Security against violence is clearly the responsibility of government.

It is beyond dispute that a prime deterrent is police presence. Unfortunately, insufficient numbers of law enforcement officers patrolling the streets has been a monumental problem in New York, and figures provided to me by the Congressional Research Service suggest that, among major cities, Atlanta also suffers one of the lower numbers of police officers per capita. Is it any wonder, then, Mr. Speaker, that someone bent upon perpetrating this kind of insanity would likely be successful? Because this situation has reached crisis proportions and the solution is beyond the budgetary capacities of many cities, I believe that we should seriously consider providing some sort of emergency Federal assistance in this area and I intend to introduce legislation authorizing such assistance.

Mr. Speaker, I want to commend the gentleman from Georgia for so graciously inviting my colleagues and myself to join him in this special order

on the Atlanta situation. Our thoughts and prayers are with that community in its time of need, and we commend the law enforcement authorities and the volunteers from across the Nation who are working so hard to close the final curtain on this tragedy. Again, I hope that the administration will continue its earnest efforts and that it will support any legislative initiative aimed at forestalling similar occasions in the future.

Ms. MIKULSKI. Mr. Speaker, will the gentleman yield?

Mr. FOWLER. I yield to the gentlewoman from Maryland.

Ms. MIKULSKI. Mr. Speaker, I am participating in this special order for the Atlanta children with a mixture of sadness, horror, and anger. I am sad for the families of the children. I am horrified that something like this could happen in our society. And I am angry that justice has not yet been achieved.

The events of yesterday make this special order particularly timely. In the rush of news, few people noticed that another body of a black child was found. The murder of the schoolchildren—and the shooting of the President—bring home again the fact that our society is too violent.

We have got to do something to get rid of the epidemic of hatred in this society—the hatred that results from the deep racial, economic, and sexual divisions in this country.

It is no accident that women, children, and the elderly are the first to be beaten at home by someone's misplaced anger and frustration. It is no accident that working people are subject to severe economic violence whenever the economy is in bad shape. And it is no accident that 21 black children have been killed in Atlanta—and hundreds of thousands more now have to live in fear and terror.

We have got to make the elimination of violence one of our top priorities in the Congress. We have got to give Federal assistance to the Atlanta investigation, so they can find the killer and put a stop to this tragedy. We have got to give assistance to victims of other forms of violence—to shelters for battered women, rape crisis centers, and other programs. We have got to stop giving money to a country in Central America that massacres and brutalizes its own citizens. We have got to stop the glorification of violence on TV and in the media. And, we have got to follow economic policies that are equitable, rational, and do not serve to oppress lower and middle income men and women.

I am wearing a green ribbon for the Atlanta children. It is pinned to my jacket by a pin of the Friends of Children in Poland. I do this because children are linked together around the world. They are linked together because of their vulnerability—their vulnerability to political, economic, and social exploitation—and their vulnerability to physical exploitation and violence. And if we do not care about the children of the world, who do we care about?

I pray every day that the violence in Atlanta will come to an end. My heart goes out to all the people of Atlanta and especially to the families of the victims. But even after the terror has ended, we are going to have to deal with the dangerous underlying issue of violence—particularly violence against the powerless.

I hope that our society can come together—and in an atmosphere of respect, trust, and nonviolence, work out the differences that exist between us.

Mr. GILMAN. Mr. Speaker, I am pleased to join the gentlemen from Georgia in this special order concerning the tragic situation in Atlanta and commend him for affording me this opportunity to express my concern about the continuing deaths of young children in Atlanta, and the fear that has seized an entire city since this killer has begun this reign of terror.

Today's society is confronted with a mass of doubts, fears, and violence which makes even the most secure individual wary of his neighbors. To force little children in Atlanta to live under this fear is inhuman—and the basic right that children should have security, happiness, and the freedom to grow is being infringed upon.

I believe that there is a proper role for the Federal Government in helping Atlanta meet the tragic situation. Whenever one child is killed our world is so much poorer.

We must not take comfort in the fact that violence has spread throughout the world. It is not something that children would understand. We simply cannot allow this violent crime to continue to fester and grow—to allow ourselves to be victimized by terrorism, to allow terrorists to walk the streets stalking our children.

The mental and emotional burdens that Atlanta children will be forced to bear will accompany these children for years.

This week's violence in Washington, the murders in Atlanta, in Buffalo, and in many other metropolitan centers throughout most of our Nation are indicative of the critical nature of this tide of violence sweeping across our land and the urgent need for the Federal Government to provide proper and adequate support for our local police agencies in their fight against violent crime.

Mr. FOWLER. Mr. Speaker, I thank the gentleman from New York (Mr. GILMAN) for his concern and for his participation.

Mr. LEVITAS. Mr. Speaker, will the gentleman yield?

Mr. FOWLER. I yield to the gentlemen from Georgia.

Mr. LEVITAS. Mr. Speaker, I thank my colleague for yielding.

Mr. Speaker, I want, first of all, to commend my colleague, the gentleman from Georgia (Mr. FOWLER), for taking this time so that appropriate comments can be made about the tragic situation involving the missing and murdered children which has been going on in the city of Atlanta for a number of months now.

Second, I would like to say that today, following the violent events of yesterday, it is especially appropriate for us to focus on the total problem of violence in our society.

The morning brought with it the good news of the President's recovery, and for that we all have prayerful thanksgivings. He is the President of all Americans, and when a President is struck down by an assassin's bullet, it makes us all realize the vulnerability of everyone in our society, the vulnerability of all of us as potential victims of violence. The attempt on President Reagan's life stunned us all; it makes us stop to think about the causes of violence and violent crime; and its outrage moves us to devote ourselves to seeking answers.

So it is with prayerful thanksgiving that the good news about the President's survival and recovery, and we pray for the recovery of the three others who were shot in that horrible incident. We hope from this that we may learn lessons and become better for it.

Each of us is grieved and concerned and troubled by the events in Atlanta involving the missing and murdered children. Three of the murdered children have been found in my own district, and local police officials there are working around the clock to apprehend the killer or killers. I have participated in the weekend search efforts by thousands of citizens of all races and walks of life. So I have a particular understanding of the problems presented by this case.

But it must be difficult for others, outside the Metropolitan Atlanta area, to appreciate fully the tension and fear that grip the city, and the rumors that can be spread in such an atmosphere. Therefore, I would like to bring to my colleagues' attention an essay from the Atlanta Journal-Constitution by Durwood McAlister, editor of the Atlanta Journal.

Mr. McAlister points to a most damaging effect of this atmosphere of fear—the suspicion in the city's poorer black neighborhoods that "if it ain't the Klan, then it's the cops"; that Atlanta policemen are responsible for the killings. These fears are groundless, but still the rumors persist, undermining the community's confidence in the police.

In this regard the police are doing their job. Others, however, who feed

these rumors by charges intimating various conspiracies to strike at the black community are only being irresponsible. Instead of calming tensions in the city, several leaders' remarks have poisoned the climate of the city even further.

Mr. McAlister concludes by noting that police efforts will succeed only if they have the full backing of the community, and that creating a climate which destroys this confidence only encourages a vigilante mentality and impedes efforts to resolve the killings. This essay presents a balanced appeal for calm and understanding in Atlanta, which I submit for my colleagues' consideration as follows:

[From the Atlanta Journal-Constitution Mar. 15, 1981]

FEEDING A DANGEROUS RUMOR

(By Durwood McAlister)

"Most of the folks in the community believe if it ain't the Klan, then it's the cops."

Those words, spoken by the mother of one of Atlanta's slain children, gave voice to a tragic, irrational fear that has swept through the city's poor southside communities.

There is no logic to it, no reason, no evidence of any kind to give it legitimacy, but it is real.

It is one more bitter fruit of the frustration and anger which grips the city as the child killings go unsolved and the murderer remains free.

Of all the traumatic side effects of the murders—and there are many—this may yet prove to be the most damaging.

In recent years, Atlanta's police, under the leadership of a black police commissioner and a black chief, have built a reservoir of confidence and good will in the poor black communities. That has been a vital, stabilizing force that has helped the city through some difficult times.

Now a groundless suspicion, spawned by fear and fed by reckless rhetoric, threatens that confidence at a time when it is most needed.

It is not "the cops" who are killing the children. Nor is there any evidence to suggest that it is "the Klan" or any other group. It is difficult to accept that so much terror and heartache could be caused by twisted individuals acting alone; but there is every indication that is exactly what is happening.

Still the destructive rumors and damaging suspicions running wild in the black community need little sustenance to keep them alive. And they are getting a great deal.

The police themselves, knowing the danger, have reluctantly fueled those suspicions by announcing that they are investigating their own ranks in the search for the killer.

They have not done so because they truly believe a policeman is committing the crimes but because, in their desperation, they are determined to investigate every possibility, however remote.

The police are acting responsibly. They recognize that an authority figure, in uniform, would have an easier time than most persuading black children to get into a car with a stranger.

What they are doing is necessary. But others who are feeding the rumors with baseless charges that sinister, unnamed conspirators are responsible for the killings are being recklessly irresponsible.

Black leaders who have the trust of the community should be working night and day to calm the fears, to refute damaging rumors and to strengthen the bonds between the community and the police and other institutions devoted to their welfare.

Instead, they are helping to poison the atmosphere.

Even Joseph Lowery, the respected president of the Southern Christian Leadership Conference, has contributed to the paranoia. "They kill our children to destroy us," he said, "and all they did was set in motion a new movement for equity and justice." Ridiculous.

"They" are not killing anybody. We are dealing with a heinous crime and "they"—we—are desperately praying that the crime will be solved and the killer caught before he strikes again.

The only "movement" that can be born of such a tragedy is a determined, concerted effort to make the streets of Atlanta safe for all children. That is the kind of "movement" that can and will be supported by all decent people, whatever their race.

The burden of that effort will fall—as it must—on the police. And they can succeed only if they have the full confidence of the community.

Those who create an atmosphere which allows that confidence to be undermined encourage a vigilante mentality and invite a dangerous contempt for authority.

The police need help, not hindrance. Unfortunately, those who could give the most help are doing the most harm.

Despite the tensions and fears in the city, the tragedy of the missing and murdered children in Atlanta shows how a common problem can unite a community. The suffering and tragedy in Atlanta have made this Nation realize that these killings could happen anywhere in this country. As we consider these murders in Atlanta today, we must keep in mind their potential causes; whether they be the general widespread violence of contemporary society, a lessened concern for individual human life, the hideous acts of a deranged mind, or the problem of poverty. These root causes are not confined to Atlanta, and catching those responsible will not alleviate the possibility of further crime in Atlanta or elsewhere.

No death is more painful than that of a child, and the random brutality of these deaths makes our pain especially sharp. But we in Atlanta do receive some measure of solace from the outpouring of national concern. The rallies, marches, ribbons, and unsolicited contributions to the city from around the country testify to America's concern for our city's children. The actions of the Congress and the President in responding with Federal assistance show that this concern has been understood and acted on. The citizens of Atlanta are grateful for their Nation's compassion, and are hopeful that it will signal a swift end to this tragedy.

Mr. FOWLER. Mr. Speaker, I thank my colleague, the gentleman from Atlanta, Ga., Mr. LEVITAS, not only for his statement but for his support of the investigative efforts in our city and his public participation toward the solution of these tragedies.

Mr. McCLORY. Mr. Speaker, will the gentleman yield?

Mr. FOWLER. I yield to the gentleman from Illinois.

Mr. McCLORY. Mr. Speaker, first of all, I want to express my personal dismay and sorrow at the tragic circumstances of the families and residents of Atlanta who have experienced a series of the most inhumane and baffling crimes in recent times.

In addition to my own personal support of efforts to help resolve and bring to an end this continuing and seemingly endless tragedy, I want also to commend President Reagan and his administration for the efforts which they have undertaken in support of the law enforcement and other investigative agencies of the city of Atlanta. Almost $1 million was allocated from Justice Department funds as a first tangible measure, supplemented later by $1.5 million from other Federal sources to help in the search for the criminal or criminals responsible for perpetrating these heinous crimes.

I could not stand here, however, without criticizing some earlier actions of this body—and recalling other events in recent years which have contributed to making the city of Atlanta and other urban centers of our Nation more vulnerable to crimes of violence than they ought to be.

The problem of violent crime in our Nation, and particularly in our urban centers, is not a new threat to our domestic tranquillity and stable society. Crime in the streets was the principal basis for the enactment of the Omnibus Crime Control and Safe Streets Act of 1968, which established the LEAA and the National Institute of Law Enforcement and Criminal Justice. I had a personal involvement in this endeavor to provide some Federal leadership, support, and direction to local and State law enforcement agencies to help combat the problem of violent crime in America.

The apparent dissatisfaction with LEAA in some States and localities appears to have been the principal basis for the virtual abolition of this agency—the only Federal program directed against violent crime at the local and State levels. It is regrettable that the Carter administration was able to achieve this goal, since the LEAA operated in an effective and worthwhile manner in most jurisdictions. Without this useful Federal agency, our efforts here in the Congress of the United States and at the Federal level are sharply restricted, and we should all recognize that. Indeed, the tragedy of Atlanta may itself serve to impel us to reestablish a Federal agency or mechanism by which Federal resources may be em-

ployed for monitoring, evaluating, and disseminating information and support for useful anticrime projects and measures which may be established throughout the land in those communities where such projects and programs are urgently needed.

Neighborhood anticrime programs, sting operations, victim-witness crime protection, and domestic antiterrorist assistance—all of these and other Federal aids should be made available to the city of Atlanta and other urban areas in our Nation on a continuing basis, if we are to do anything about meeting the ever-mounting problem of violent crime in the streets of our cities.

To renounce any Federal responsibility on a domestic problem as critical as crime in America seems to me to distort the principle of federalism and to risk a demand for measures which would reach far beyond the principles inherent in LEAA—minimizing Federal bureaucratic regulations and control and maximizing local decisionmaking and administration.

Mr. Speaker, without detailing or even revealing elements of a conference held recently in Williamsburg, Va., wherein the Attorney General, the chairmen and ranking minority members of the House and Senate Judiciary Committees, the Chief Justice of the United States, and others concerned with the administration of justice appeared, I can report faithfully that these leaders in our system of justice characterized violent crime as the top-priority subject which requires the most urgent attention by our executive, legislative, and judicial branches.

The tragedy of Atlanta bolsters this view. It is not simply that we have given too much attention, too much relief, and extended too much compassion to the criminal elements of our society. It is rather that we have devoted too little attention, too few resources, and inadequate initiatives to the subject of investigation and prosecution of the criminal elements in our society and the penalties these criminals deserve following their conviction.

Again, let me express my compassion for the families of the victims and for all of the residents of Atlanta. Let me also pledge my support for such appropriate Federal steps as may be taken to bring about the speedy apprehension of the criminal or criminals involved, as well as such other steps that might help avert similar tragedies in Atlanta or elsewhere in our Nation.

Finally, I wish to commend the gentleman from Georgia (Mr. FOWLER) for his sponsorship of this special order so that we in this Chamber might express our concern and our determination to do everything possible to bring to an end the tragedy of Atlanta, to bring relief to the grieving hearts in that city, and to restore strength and confidence to our Nation, which is now threatened more critically by rampant violent crime than ever before in recent history.

Mr. FOWLER. Mr. Speaker, I thank the gentleman from Illinois (Mr. MCCLORY) very much.

Mr. GINGRICH. Mr. Speaker, will the gentleman yield?

Mr. FOWLER. I yield to my other colleague from Atlanta, the distinguished gentleman from Georgia (Mr. GINGRICH).

Mr. GINGRICH. Mr. Speaker, I thank my colleague for yielding.

I want to join in commending the gentleman from Georgia (Mr. FOWLER) for holding this special order, and I also join with him in feeling saddened at the need for this dialog, the problem that we face in America today affects all of us, whether children or the President, whether surrounded by Secret Service agents or walking home alone in the afternoon from school. It goes beyond merely our prayers and our hopes that in Atlanta we can soon find the person or persons who have engaged in one of the most heinous of all acts in society, the killing of children.

We all recognize that beyond Atlanta's need and Atlanta's concern, America in recent years has had an epidemic of irrational violence, an epidemic of crazed people acting out their fantasies and their pain on society at large.

Mr. Speaker, I want to commend my colleague for giving us a chance to talk together today and to begin, particularly on this day after the attempted assassination of the President, to talk among ourselves about the kind of changes and the kind of rethinking that are necessary if we are to knit together again a society healthy enough for all of us to be safe.

Mr. FOWLER. Mr. Speaker, I thank the gentleman from Georgia (Mr. GINGRICH) not only for his statement but also for his cooperation in his public capacity toward finding a solution to these terrible tragedies.

● Mr. BARNARD. Mr. Speaker, since the first black child was reported missing in Atlanta 20 months ago, the eyes of America have become focused on that city. From all across the country we have listened and watched with horror as the number of murdered children has increased from 1 to 21.

We have come together today to express our shared sorrow and frustration over Atlanta's continuing ordeal with the realization that this tragedy touches our entire Nation. We grieve with the parents and people of Atlanta because we understand that what is happening there could as easily have occurred in any one of our cities. Such a crisis, whose psychological impact is being felt in communities across the country, is clearly a matter of national concern.

Recognizing this fact, the administration has been responsive to Atlanta's requests for assistance. Funds totaling nearly $2.5 million have been provided to help the city meet the extraordinary expenses associated with this tragedy, and additional manpower and technical assistance have been provided to support the city's investigative efforts.

Continuing Federal response to the situation is, in my view, both necessary and appropriate. Though all of us pray for a conclusion to this ordeal, it is my hope that, if need be, the Congress would act swiftly to appropriate additional funds to sustain Atlanta's law enforcement efforts.

At the same time, I call upon all Americans to unite with the citizens of Georgia in full support of Atlanta's investigation. As time passes and frustration mounts, it is understandable that the families and friends of the victims should become impatient standing helplessly by while the threat to their community continues. Greater harm and injustice can result, however, when citizens take the law into their own hands.

I therefore urge all Americans, and particularly Georgians, to assist the Atlanta police with their eyes and their ears so that these senseless killings may be brought to a swift but peaceful conclusion. Throughout the country, let this crisis renew a spirit of cooperation between citizens and law enforcement officials, so that now and in the future, the playgrounds and streets of all America's cities will again be safe for our children.●

● Mr. COELHO. Mr. Speaker, as one reads the daily accounts of the tragic murders in Atlanta, one must feel a great deal of admiration for the citizens of that city. Surely this must be one of the most difficult times to which they have been exposed, and their cooperative effort in an attempt to end this nightmare is certainly admirable.

I join with the countless thousands in expressing my sympathy to the families involved; and I pray that we will soon see the end of this matter.●

● Mr. LANTOS. Mr. Speaker, I am both sad and angry that we must join in a special order to address the terrorism which has been perpetrated against families and children in Atlanta. Such a special order should be unnecessary. Such cruel acts should not occur in a civilized nation.

In a society based on equality, human dignity, and individual freedom through social responsibility, our children should grow up strong and nurtured. They should live through childhood protected and safe from abnormal fears.

However, it is necessary to speak today, even though I wish it were otherwise. It is necessary because 20 black

children have been murdered in Atlanta. The continuing unfolding of these events chills the heart of every American. Parents everywhere identify with the grieving families and share in their loss. We are all shaken by uneasiness and uncertainty by the questions as yet unanswered. We are stirred to profound anger, made more intense by our collective and individual helplessness.

The terror that permeates the entire black community of Atlanta is felt across the country. Violence directed against minority groups is violence against the entire Nation. It should be treated as such. These are our children. The children of Atlanta, black or white, are the children of America.

It is not enough that we direct all available resources to solve the crime. We must seek ways to unite communities when tragic and violent events threaten to divide them. We must join as a nation to insure that the fires of racism are not fanned by these incidents.

The President, on behalf of the Nation, has provided some Federal funds to assist in the apprehension of the criminals and the protection of the young. We must search for more effective ways to protect all children from criminal abuse, as well as find ways to heal the psychological scars which these abominable events have produced.●

● Mr. CORRADA. Mr. Speaker, It is with a great sense of sadness and outrage that I join our colleagues today in expressing our sorrow to the families and friends of the children in Atlanta who have fallen victim to a vicious and sick killer.

We pray that the killer will be caught soon before more innocent lives are lost. For the children of Atlanta, paticularly young black boys and their families, the anguish and fear continues, at the expense of their mental and emotional stability. For it is a great tragedy when we, as parents, have to instill fear and mistrust to our children. But this the parents of Atlanta's children must do to insure their safety.

The policy in Atlanta theorize that the killer is a person of authority and one who instills confidence from the children. Otherwise, how can so many children have gone with him without so much as a fight?

And unfortunately, the situation which exists in Atlanta is evidence of a climate of violence that surrounds our society. At an age when children should be allowed to be independent and to learn to deal with society as they become adults, we have to teach them to be extra careful and to mistrust adults for fear of danger to them. We are thus creating insecurities in our children; insecurities which will remain with them for the rest of their lives.

The tragedy in Atlanta is, as a result, not only limited to the families and friends of the children that have died, but makes us all the losers by fomenting fear and mistrust amongst ourselves.

I join with all my colleagues in praying for those who have died and are missing and for the prompt arrest of the killer who has created such havoc in so many lives.●

● Mrs. COLLINS of Illinois. Mr. Speaker, I am humble enough to acknowledge that all I say here today is only the tip of the iceberg in our struggle to solve the problems of our urban communities. The desperate plight of Atlanta is generating shock and signs of distress throughout our land. Could it be that Atlanta's problem has festered—full of the complexities of the urban American crisis?

Atlanta, Ga., in 1981, is the subject of grave national concern. Our black children are disappearing in that southern city. To date, 22 have been found dead and 2 others are classified as missing.

Have the worsening economic conditions and the current contrary attitudes toward societal and governmental programs in behalf of minorities and the underprivileged produced an atmosphere that tolerates these acts of brutality directed against our youth? Events in Atlanta in recent months have heightened these fears in the minds and hearts of many throughout our Nation.

Social scientists, sociologists, and historians suggest that when our country suffers economic chaos and discontent, acts of violence have increased. Many individuals mischannel their anger and look for a scapegoat. When times are hard, insecurities are bred and people have a psychological need to blame someone for their own predicament. In such a climate of hostility, the acts and activities of those striking back at children are looked upon with disdain. It appears that a new negativism is on the rise and it is a frightening, sickening situation.

Someone is ruthlessly killing our young. Their helpless, innocent minds are being led down a path of no return. Everytime I hear or read about another child's death in Atlanta, I die a little inside too. It is obvious that a hand more disastrous than imaginable is stalking Atlanta's streets, unseen and unsuspected, erasing our children from the face of the Earth. These deaths have become the awful reminder of the limitations of our law enforcement in a land that is supposed to protect the rights of all citizens.

Twenty-five FBI agents, scores of county police working night and day on the case, 35 investigators of the Atlanta police and the special task force dispatched by President Ronald Reagan have been unable to solve the mystery.

Atlanta's problem is the entire country's problem. Such an observation is an unfortunate commentary on our society. Regardless of the moral issue involved, we must continue to deal with the question of how to arrest the psychopathic feast of this demon, or demons, within our culture.

On Friday, March 13, while President Reagan was announcing additional funds for Atlanta at the White House, Capitol Hill employees held a special memorial service for the deceased children. One of the most touching moments of the program was the rendering of a letter written and read by 9-year-old Erica Lomax of Keene Elementary School here in Washington, D.C. I would like to share her comments with you now:

Distinguished Guests, Families, and Friends:

I am truly honored that I have been given the opportunity to speak to you today.

I am only sad that we are not here for a joyous occasion, but one that has shocked the nation and filled our hearts with grief.

But in my own way, I feel that I must speak out to say only what is in my heart.

I am a child, special in my own way, as unique as each star that shines in the heavens.

I look forward in my life to growing up. I will someday graduate from school, go to college, have a career, a marriage, and children. A cycle that must go on, for this is the way of the world. But stop for a moment, and think of the children of Atlanta, the harmless children, who have died a cruel death at the hands of some unfeeling monster. That someone who to this very day roams free to kill children, that someone who has made us all afraid. Afraid of the stranger who walks behind us on the way from school, who brings fear when we are alone for a moment away from the protecting eyes of our families.

I think about those children who have died in Atlanta. I know that they will never graduate from school, go to their first dance, to college, have a career, a marriage, or families. I say to myself, dear Lord, who has the right to take away the joys of childhood? And isn't it a shame that this killer haunts us like a shadow in the night? That killer will teach us many things, like how to be afraid, how not to trust, and how to hate, because we don't understand why someone would kill. We are taught that bad people die, does that mean that those little children were bad? I don't think so.

Never forget the children of Atlanta, they were just like me, they were your son's, your daughter's, your brother's, your sister's, the little kid next door, the playmate on a rainy day, someone you could tell your secrets to, or argue with, about any little thing. They were children who could laugh, cry, dance, and above all, love.

Never forget that most of the things that children want from life are the simple things.

We just want to learn, have fun, make friends, and have people love us, and most of all, *we want to grow up!!*

I would like to close by saying this to the children that have died in Atlanta.

We shall not forget you, we shall forever mourn your loss, perhaps you have gone on to a better world, for you are, and forever shall be children of God.

No one will hurt you now, No one will cause you tears, for I know deep in my heart that you rest in the arms of the Lord, and there you will be children again.

Play in the skys of heaven, dance in the clouds and the wind, let the angels be your playmates, and know you are forever loved.

The U.S. Supreme Court has affirmed that the Bill of Rights and the 14th amendment guarantee due process to children; it also declared that an adolescent is entitled to the same procedural safeguards as an adult. However, our children's rights continue to be violated in Atlanta.

These young, helpless black victims have been shot, stabbed, and bludgeoned to death. It is my belief that society has the responsibility to aid those, including our young, whose lives are adversely affected by crime.

The great black poet, Countee Cullen, in observing the plight of his people during the Harlem renaissance, wrote in the final lines of one of his many masterpieces, "Yet Do I Marvel," the irony of his ability to endure the injustices of his native America, and still be able to create. Cullen, an absolute genius wrote:

Yet Do I Marvel at the Curious Thing
To Make a Poet Black * * * And Bid Him Sing.

Yet do I marvel at this curious thing: That is the survival of our black children through these times of pain and suffering—through injustices inflicted on our youth for the past 19 months with no just retribution to date. We need only examine America in 1981 to understand that Cullen's dilemma still lives with us 50 years later.

In a nation that boasts of its democratic processes, we find ourselves relatively powerless. In an age of technological innovation used by police enforcement agencies, the FBI, and a special Presidential task force, we are still unable to provide adequate protection for Atlanta's children, even within the boundaries of their own neighborhoods. Our youth are incapable of challenging the oppressive situation confronting them on a daily basis.

We must insure that our young daughters and sons are protected, and see to it that all of our children have an opportunity to grow up without the fear of being maliciously murdered en route to school, to church, or to the corner store. We must not only insist that our neighborhoods be made safe for our children, our women, our elderly, but we must also insist that our streets be made secure from bloodthirsty headhunters.

However, if all Americans use their collective forces to bring an end to these useless murders, it will achieve a peaceful and expeditious resolution of America's deplorable situation.●

● Mr. AuCOIN. Mr. Speaker. I want to thank my colleague, Mr. FOWLER, for this opportunity to join in an expression of shared grief for the tragic and senseless murder of the innocent children in Atlanta.

Today, we can send the families in Atlanta our deepest sympathies, and our united support for all efforts to bring this horror to an end. We can also let them know that theirs is not a lonely vigil. America shares their suffering, their despair, their rage, their fears, and their frustration.

Last week, the Black Leadership Forum expressed its conviction that these murders were not the result of a racist conspiracy, calling on the American people to respond, not with violence, but with prayer and a renewed determination to wipe out prejudice and insensitivity to the plight of the poor and needy in our society. I am thankful for the forum's leadership, and add my prayers and support.●

● Mr. MITCHELL of Maryland. Mr. Speaker, first of all, I would like to commend Congressman WYCHE FOWLER for providing the time for this much needed discussion of a very critical issue. The slaying of over 20 children in Atlanta, Ga., is clearly indicative of the sickness which is eroding the fibers of our society.

Violence is becoming more and more a way of life throughout our Nation. The Atlanta slayings and related attacks against children are very cogent symbols that we are moving further away from the highest regard for human life.

It frightens me deeply to acknowledge the significant psychological damage which is growing among all children due to the recent incidences. While the victims of these murders have all been black, it is no secret that such acts of violence do not discriminate. The fundamental question we must face now is that any child may be forced to live in fear during every phase of a day's activity. Surely, the increased number of weapon-carrying schoolchildren; momentary periods of panic if a parent is late picking up a schoolchild; and decrease in academic achievement, are not peculiar to the findings of several Atlanta psychiatrists, psychologists, and mental health officials. The feelings of distrust, fear and apprehension will spread among all of our Nation's children as they begin to dread functioning in everyday environments. This is a sad outlook for our future.

Another fundamental question which is magnified in the minds of those who fear for human safety, is the continuing focus away from human needs. We are forced now to question if whether or not the evils of poverty, deprivation, and unemployment may be so deep rooted in our society that respect for human life becomes secondary to mere survival. We are also forced to question the validity of continuous violence as romanticized and glamourized on our television and movie screens.

The situations in Georgia, Florida, Maryland, and throughout most regions in this country leave us frustrated and angry. They leave us to question the basic responsiveness of authorities who must become more adamant in the protection of human lives. However, they must not lead us to take the law into our own hands.

The widespread acts of violence must also remind us that the protection and preservation of human lives are cross-jurisdictional. When as many as 21 lives are lost, it cannot be pegged as a State or local government matter. Both the President and the Congress realized this, and I laud the dispersal of Federal funds to Atlanta, and the efforts to appropriate $1.5 and $1.8 million for use by this city.

We have to examine closely the climate that motivates and encourages psychotic violence. The violence of racism, the aforementioned influence of television and movies, and the violence of war and militarism—all of these inevitably get reflected in individual behavior to a greater or lesser degree. The psychotic killers who murder our children in Atlanta or anywhere else are victims of this climate and have apparently been affected to a greater degree.

We cannot excuse this behavior. However, we can and must deal squarely with the environment which fosters such actions.

Several sociologists tell us that most of the slain Atlanta children come from public housing neighborhoods which are more vulnerable and conducive to human mistreatment, abduction, and even death. Such conditions and incidences are not limited to this region of the country. Right here in Washington, D.C., children from low-income housing projects are becoming more and more susceptible to conditions of drug abuse and molestation. Here, the elimination of unemployment, underemployment, and poverty must precede the eradication of such criminal acts.

It is not easy to warn the blacks of Atlanta to stay away from theories that the acts of violence against 21 black children are conspiratorial in nature or racially motivated. The pattern of systematic murders, rapes, additional overt and covert actions against black citizens in the South and throughout this country is still just too prevalent. However, we must assist in the efforts of Mayor Maynard Jackson, the numerous task forces, and concerned citizens in addressing the problem in a rational way.

Again, until we eliminate the fundamental societal ills, we cannot be shocked at deviant behavioral patterns of violence, irresponsibility, and total disregard for human lives. There is

little help in calling on citizens to care about each other when increasing inequities among neighborhoods, schools, living standards, and opportunities have become a way of life.

Those of us who are in a position to have impact on public policy must stand firm against further inequities and burdens on our children, elderly, and low-income citizens. We must promote the kind of solidarity which has been displayed as citizens across the Nation have rallied behind the victimized Atlanta families. Most importantly, we must not be afraid to oppose and openly attack racism, chronic unemployment, poverty, injustice, and other societal ills which cloud any efforts to provide equal opportunities for each and every citizen.●

● Mr. HANCE. Mr. Speaker, I think it is extremely important for this body to take note today of the terrible tragedies which have occurred in Atlanta involving the killing of America's children. It is our duty to let those persons responsible for these senseless killings know that Congress will not stand idly by ignoring this great travesty of justice.

We must lend our full support behind law enforcement efforts to bring this matter to a swift conclusion. We must let the people of Atlanta know that the Congress, and the people of the Nation, stand behind them during this ordeal. And we must begin today to solve the criminal and social injustices which bring about problems such as this in our great Nation. Thank you.●

● Mr. STOKES. Mr. Speaker, I would like to thank my distinguished colleague, the gentleman from Georgia (Mr. FOWLER) for taking this special order so that we can discuss the tragic and deplorable situation of the 22 missing or killed black children in Atlanta. Speaking on behalf of the citizens of the 21st Congressional District of Ohio, I would like to let Mr. FOWLER, Mayor Jackson, the families of the slain children, and the citizens of Atlanta know that they are not alone in this time of sorrow and that our prayers are with them every waking moment.

Since the first black child disappeared on July 20, 1979, the city and decent human beings throughout this Nation have been in a state of shock and turmoil. Just last evening, Mr. Speaker, in the midst of the tragedy here in Washington regarding the President, I hear on the news that one of the two remaining missing children was found dead, bringing the death toll to 21. Needless to say, my heart was saddened and I realized what a nightmare we are experiencing in this country today.

My first thought at that moment was how can a country like the United States which is considered to be civilized have an atrocity like the killings in Atlanta go on. Mr. Speaker, we have sick individuals in Atlanta inflicting pain and taking the lives of innocent childen. They must be stopped.

The dead children are a loss for both their families and the city of Atlanta. They are also our loss. For, Mr. Speaker, our children are our most vital resource. They are, indeed, our link to a better tomorrow and to future achievements. We will never know what outstanding doctors, lawyers, and human beings those children would have been because their lives were snuffed out in the sunshine of their youth.

With those thoughts in mind, Mr. Speaker, I know that the only way we can bring this nightmare to an end is to work together. I think that Mayor Maynard Jackson and the other city officials have done a yeoman's job in light of their fiscal constraints.

Mr. Speaker, as my colleagues know, there are several bills which have been introduced which appropriate funds for the investigation in Atlanta. I urge my colleagues to act on these bills as soon as possible. We cannot wait another day because in 1 more day, another child may be missing and that means that one more vital link to our future will be taken away.

In closing, I urge my colleagues to work together. This is not a partisan issue but an issue of human life. Therefore, we must work and walk together as brothers and sisters for a brighter tomorrow.●

□ 1315

PRESIDENT REAGAN'S TRAGIC ATTACK BY ASSAILANT IS BEING USED BY ANTIGUN LOBBY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. ASHBROOK) is recognized for 30 minutes.

Mr. ASHBROOK. Mr. Speaker, the senseless and demented attempted assassination of President Reagan and the striking down of three valiant Americans with him is properly decried by all decent Americans as well as men of good will throughout the world. Outrage and anger are proper human expressions reserved for incidents such as this. All of our best wishes and prayers go out to the President and his family. My own shock and anger might possibly go deeper than most Americans because of my long, 20-year personal association with President Ronald Reagan. I have always been able to count on him as a true friend with whom I have enjoyed working and who responded on every occasion when I asked him for help, personal and political. My sympathies and thoughts transcend those which we all normally feel in time of a tragedy.

It is also with a touch of sadness and anger that I observe the very logical knee jerk response of the antigun enthusiasts throughout the country who, as in the past, seize on such an opportunity in an almost maudlin way to advance their unpopular cause. They always seem to have two themes: Attack the United States as a bad, violent nation and then blame our violence on the law-abiding citizen who constitutionally, peacefully owns and uses a firearm.

Last Saturday night, I spoke at the spring banquet of the Deerhunters Association at Shelby, Ohio. A more honorable, pro-American, pro-family group of citizens could hardly be assembled under any banner. My thoughts were continually of them and the thousands of other loyal Americans that I have broken bread with in the past few months. A week ago I attended the Ducks Unlimited Banquet in Sandusky and shortly before that the annual dinner meeting of the Woods and Water Conservation Club in Cleveland. Just before that the Conservation Club in Stark County. The list could go on and on.

As I was flying back this morning, during my hour's respite in the skies, my thoughts went to these fine, wonderful people who would suddenly be the targets of the radical activists who, not content to change society in ways that have contributed to the spate of violence we all deplore, now want to use the assault on President Reagan as a launching platform to further their aims.

I can say categorically that 99 percent of the sportsmen, hunters, conservationists, gunowners, and collectors I know rarely point a finger at their fellow Americans even when unfairly attacked, let alone a firearm, or ever threaten them or stand as any link in the chain of crime and violence that grips this country. Maybe they should point the finger a bit more. Maybe they have been too reticent and too inclined to dutifully play the role of the productive, hard-working, silent majority American who works and produces while many of their fellow Americans scream and attack.

Let us put the climate in our country in its proper perspective. Let me ask a few questions and you answer them in your own minds. Possibly your personal answer to questions such as these will come closer to assessing why there is a tendency toward violence in our society.

Whose philosophy says everything must change? Whose theology suggests that God is dead and individuals are preeminent and should decide for themselves?

Whose philosophy indicates the Constitution is outmoded?

Whose philosophy says you can riot, take to the streets, commandeer uni-

versity buildings with impunity and, what is more, the other side is always wrong because it is the establishment?

Whose philosophy appeals to class, race, and section?

Whose philosophy coddles the Communists, says there is no danger of communism and produces so-called leaders who proudly proclaim that Communists were never any threat to them?

Whose philosophy downgrades the American system, suggests that working is square, profits are evil and a leisurely, parasitic life is to be extolled with sex, drugs, and thrills being the gods?

Whose philosophy produces the young men and the young women who take to the streets where they become enmeshed in drugs and communal life with the all too often result that they rob, steal, kill?

Whose philosophy prevails on the courts to throw out reasonable laws to prosecute and incarcerate the criminal, protecting the public; and to negate laws of society on pornography and smut, thereby helping to further promote an anything goes way of life?

Whose philosophy sees the military, the FBI, and the CIA as well as the police as their enemies while lionizing those who steal Government secrets or endeavor to subvert our country. Remember the campus cry that Ho Chi Minh was their friend?

Whose philosophy has created violence as a tool of protest and radical advocacy whether in the name of civil rights, campus reform, social justice or racial extremism—whether under the banner of the S.L.A, S.D.S., Ku Klux Klan, or the Black Panthers?

Whose philosophy has developed a counterculture in our society which minimizes the value of the family, downgrades work and achievement while demanding that the taxpayers create a welfare state to support them as they aimlessly travel the country adding little to mankind?

Harsh words you say, too strong. Not strong enough, I say. We have allowed these people to change the traditional values in our society with a tolerance and acceptance which borders on sinful. That good people have not stood up to this liberal/leftist social revolution must rank as one the saddest episodes in American history. Only in the past few years has the tide begun to change but the bitter seeds which have been planted have borne their fruit. We see it in the lack of discipline, irresponsibility, and violence among an increasing number of our young people. Why is the greatest concentration of the violent-prone, criminally inclined American in the 18 to 25 age group? Study what they have been led to believe by those who advance the ideologies I have just cited.

These ideologies, I would point out, are not those of the patriotic, conservative, traditional minded American who respects the law and lives by it. You will not find that type of thinking in Sidney among the conservationists or at the Woods and Waters Meeting in Cleveland. It is totally alien to them and their way of life although yesterday's incident, like rampant crime, invades the life and social environment of each one of them.

Having watched the sixties unfold when the radical leftists in our society endeavored with too much success to rewrite America, I have no question in my mind where a great degree of the blame can be placed. Those liberal sophisticates who said "God is dead" and "decide for yourself" contributed. Those who bellowed "attack authority, you can't trust your parents or anyone in government" certainly helped. Those who advocated that if you feel you have a grievance, take to the streets even if it meant rioting and violence, certainly contributed. Those on campus who preached an anti-Americanism and endeavored to tell our young people that our historic successes in building a constitutional republic and a free enterprise system were not virtues but symptoms of greed and guilt, added their measure. Those who polarized minorities, radicalized them and told them that stealing was not really stealing but simply "liberating the peoples' goods" certainly contributed. Those who advocated a change in our criminal justice system to tilt it on the side of the criminal certainly added their 2 cents' worth.

People of that philosophy were centerstage for a decade but we all can share some of the blame. The law-abiding citizen cannot escape his part in the tragedy of the past 20 years which has witnessed the slide of this great country into lawlessness and wanton welfarism. The blame of this particular citizen, however, is one of omission not commission. Every sign points to the good American waking up and saying "I'm not going to take it anymore!" But there is a lot to undo.

Take a couple of examples. All gun owners recognize that we have problems with firearms and firearm misuse in our country and they are willing to do something about it. As you know, I have served on the subcommittee of the Judiciary Committee which has considered a broad spectrum of firearm legislation. Not too long ago we were in one of our major cities and received testimony regarding the problem of illegal firearms in schools. A witness indicated that as many as a thousand illegal handguns were found in lockers during one locker sweep. Fine, you would say. Every gun owner I know would applaud efforts to remove illegal firearms from school lockers and to punish those youth who add to the violence. I am sorry to say it does not work that way. Liberal groups like the American Civil Liberties Union go to court and get some liberal judge to agree that it is a violation of that student's individual rights to have his locker checked. Here is one form of gun control the liberal shuns.

Ponder that a minute.

Is this not a part of the problem in our society? The zealous effort of the liberal to protect the young punk in the school or the criminal who poses a threat to society is only exceeded in stupidity by their blind-sided attack on the law-abiding citizen who poses no threat. The taxpayers own the schools and the lockers are a part of that school. Society should have every legitimate right to inspect those lockers but the same person who says do not go into the student's locker will say, on the other hand, go into the home of a law-abiding citizen and take his firearm away just as if he were a criminal and a perpetrator of violence in our society.

Point two: Drugs are an increasing problem in our society. Is it not strange that the same people who promote permissiveness in drug use overlook the direct relationship between drugs and crime—yes, violent crime. Study the reports of the Los Angeles police which shows the connection between drugs and violent crime. Yet the liberal mindset is to fight to liberalize if not wipe off the books all laws that relate to possession of illegal drugs, while at the same time adding their voice to the gestapo-type mentality which would make an all-powerful Government take away the fundamental constitutional right of the private citizen to peacefully and legally own and use his firearm.

We all understand the scapegoat mentality. I would not even point out these things except for the firsthand knowledge I have based on the history of the past 20 years that the antigun lobby will endeavor to fan the flames of hate against the wrong targets.

Society is not sick. Only a small, pampered, and misguided minority is sick. We must remember that they like scapegoats. We will not let them make good Americans that scapegoat. We need crime control, not a mindless, misdirected gun control that our opponents advocate.

I am not one who likes to say "I told you so" and rarely take occasion to point out that some of us clearly warned you what the consequences of the 1960's and 1970's with their radical revolutions would be. We are reaping the whirlwind. On June 6, 1968, these remarks were made on the floor of the House of Representatives by this Member; 12 years later they are worth repeating. I said:

Quite frankly, we are living in a fool's paradise. For some reason, the average American has been lulled into believing that we can have militant people going throughout the country exhorting to violence, pre-

paring for violence, but yet not have violence; that we can in times of crisis and expediency set aside our constitutional principles but still have our constitutional protections when we need them; that we can follow "no-win" policies against the Communists and somehow come out with a "draw"; that we can go three-fourths of the way to socialism or communism but not get there; and, finally, that we can spend more than we take in, year in and year out, but not have national bankruptcy.

Another interesting footnote. While I was flying back to Washington this morning, pondering on the events of Monday, March 30, 1981, I read the Cleveland Plain Dealer and on the second page saw an article which indicated the same outlook I have cited here. U.S. District Judge Nicholas Walenski has just appointed a Toledo lawyer to be an advocate for patients at Lima State Hospital to insure their constitutional rights. Lima State Hospital, for those of you who do not know, is where we send our criminally insane. We all agree that they have basic constitutional rights but note what James Nathanson said following his appointment:

I first applied for this job back in 1978 and heard nothing further until recently. My interest in this position is a long-standing interest in institutions like this. Why do they have places like this anyway.

While no fair American will prejudge any case, it is as plain as the nose on your face that attorneys will plead insanity for the President's assailant. Whether they do or not remains to be seen. At any rate, let us answer in advance Mr. Nathanson's question: Mr. Nathanson, institutions like this exist because there are people like John W. Hinckley, Jr., in our society.

INTRODUCING THE NATIONAL TOURISM POLICY ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from North Carolina (Mr. BROYHILL) is recognized for 5 minutes.

● Mr. BROYHILL. Mr. Speaker, in view of our strong support for a comprehensive, national tourism policy, Congressman NORMAN LENT and I have joined together today to introduce H.R. 2921, the National Tourism Policy Act. We commend this legislation to the attention of our colleagues and urge its most expeditious consideration.

Aside from the tourism and recreation industries, there are few industries which benefit so many of our citizens, individually or collectively. Recognizing the importance of tourism and travel to the historical and cultural foundations of the Nation, to trade and business development within the States, and to our relations with nations abroad, it makes good sense for us to develop a sound national tourism policy at the Federal level.

H.R. 2921 reflects a deep commitment to a renewed national tourism policy. It is evident from an examination of past tourism policies that there is a sound basis for recommending change in the management of our national tourism policy. Unfortunately, previous tourism authorities have been underutilized, resulting in an ineffective national tourism policy.

In addition, the focus of past efforts to address this problem has been to propose the creation of a new Government entity, thereby establishing yet another layer of Government at additional expense to the taxpayers. This should not be the target of our efforts.

The bill Congressman LENT and I are introducing today seeks to change the status quo as follows:

First, sets forth a comprehensive and detailed national tourism policy, covering both international and domestic tourism.

Second, establishes an Interagency Tourism Policy Council, chaired by the Secretary of Commerce, to assure that Federal decisionmaking takes into account the national interest in tourism.

Third, requires the establishment, by the Secretary of Commerce, of a Tourism Advisory Board consisting of not less than 15 members, representing all segments of the travel and tourism industries. This Board would assure that the views and needs of the tourism industry are taken into account in the implementation of the national tourism policy.

Fourth, amends the International Travel Act to provide for the implementation of the international aspects of the national tourism policy; to require an annual submission to the Congress of a marketing plan to stimulate and encourage travel to the United States; to permit the Secretary to transfer the implementation of the act to the International Trade Administration; and to authorize $8 million for fiscal year 1981 and $6.5 million for fiscal year 1982 to carry out the act. The $6.5 million is in addition to $1.1 million already programed for tourism through the Foreign Commercial Service budget.

Regrettably, earlier in this session, before it had an opportunity to examine present tourism policy in detail, the Senate passed S. 304, a bill which is identical to the tourism bill pocket-vetoed by President Carter last year. S. 304, and the companion House bill—H.R. 1311—would establish a new, independent Federal agency to oversee national tourism policy. In essence, establishment of that agency is the only real difference between the bill we have introduced and the Senate-passed legislation.

As I noted, we believe that it is inappropriate for the Congress to create a new Federal agency at this time. Daily, our constituents request that we seek ways to curb the growth of Government, not expand it.

That is the foundation for H.R. 2921, which establishes a reasonable compromise between S. 304, the Senate-passed bill, and the administration's commitment to a stronger program to encourage tourism. We believe that this is a fair alternative to the measures previously put forth and are hopeful it will receive the attention it merits.●

REAGAN TAX PLAN NEEDED

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Virginia (Mr. PARRIS) is recognized for 5 minutes.

● Mr. PARRIS. Mr. Speaker, the declaration of last week by Chairman ROSTENKOWSKI of the Ways and Means Committee that the committee's Democratic majority does not intend to consider President Reagan's tax cut proposal is unfortunate but predictable.

It is to be expected that a committee which was stacked by the majority leadership to reflect a Democrat to Republican ratio greater than the proportionate breakdown of Democrats to Republicans in the full House of Representatives would, of course, be unable to find the votes necessary to pass the 3-year tax relief program requested by the President.

However, I doubt if there is a Member of this House whose constituents are not now seeking cuts in Federal spending and cuts in Federal taxes. The American people desire and demand that fundamental changes in Government sought in the November mandate be enacted in an expeditious manner because they realize this must be the case if we are going to lift the double-barrel burdens of inflation and taxation from this land.

I believe there is merit in the suggestion that additional tax proposals sought by the Democratic leadership should be considered in a second tax bill but only after the President's tax cut proposal is enacted. In addition to those proposals advocated by the Democratic leadership a second tax package might also consider such things as removal of the marriage penalty and reduction of the present maximum tax on unearned income.

But this House must deal with first things first. And the first business of the Ways and Means Committee is to consider the 10-percent across-the-board tax package strongly advocated by the President and badly needed by the American people.

Should the Democratic leadership of the Ways and Means Committee persist in its petty partisan attempts to hamstring the President's program, as the Chairman of the House Task Force on Economic Policy, I will urge

that the President veto any tax proposal that does not provide for the full 3-year tax reduction which is sought by the administration and coupled with corresponding cuts in Federal spending.

Unfortunately, it may take a Presidential veto to bring home to the Democratic leadership of the House and of the Ways and Means Committee that President Reagan and the public are determined to see the November mandate acted upon and to convince them that the best course for the Congress and the country in the future is to move forward in a spirit of cooperation with the Reagan administration in its efforts to solve this Nation's pressing economic problems.●

YOU TOO CAN HELP KEEP DOWN CREDIT CARD COSTS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. ANNUNZIO) is recognized for 5 minutes.

● Mr. ANNUNZIO. Mr. Speaker, the March 18 edition of the Christian Science Monitor carried an article on credit card schemes which cost the bank card industry alone millions of dollars.

In a time when the use and cost of credit cards are being reexamined all over the United States, it is extremely important that consumers make every effort to help cut down the cases of fraud and abuse whenever possible.

Just because the money does not come directly out of the cardholders pocket is no excuse for negligence. It is in the consumers best interest to act responsibly in protecting and preventing the misuse of credit cards.

I am very concerned about the growing number of cases of fraud and theft relating to credit cards. For this reason I want to share this article with the Members of Congress:

CREDIT CARD SCHEME TRAPS ANOTHER BANK

(By Ron Scherer)

NEW YORK.—A growing credit card scheme has bilked another US bank. This time it was the Security Pacific Bank in California.

The Los Angeles-based bank has lost some $200,000 in a new type of credit card scam that is spreading across the country and involving thousands of unwitting cardholders.

The scheme is relatively simple: A clerk in a store copies names and credit card numbers from legitimate charges. Then someone buys plain plastic and has the names and numbers of those charges embossed on them. As a last part of the plan, the individual forms a phony business and runs the bogus cards through a charge machine, depositing the charges as cash in his company's bank accounts. Finally, the "charge slip" thieves leave town.

In the case of Security Pacific, the fraud involves a fictitious company using the name California Wholesale Jewelers, which is under investigation by the Los Angeles Police Department as well as the Postal Inspection Service.

In Chicago, a grand jury is reportedly close to handing down indictments involving a similar case, and in New York, 18 people are under investigation or indictment for similar types of credit card schemes.

Although there are no statistics indicating the total scope of the fraud, the two major credit card companies, MasterCard and Visa, together handle $54 billion of legitimate charges each year. According to a spokesman for Visa, the total amount of charge-offs related to fraud, counterfeiting, and theft each year comes to about $180 million. MasterCard has about the same charge-off.

While the card companies like to play down the amount of fraud involved with their cards, Sherry Trueax, a consumer protection specialist with the Postal Inspection Service who investigates the frauds, says they are an increasing and continuing problem.

In fact, on Feb. 10, as a result of an investigation by the Postal Inspection Service, a part of the Postal Service, the US Attorney's Office for the Eastern District obtained an indictment against seven individuals for conspiracy to commit bank fraud.

According to R. V. Murry, the postal inspector in charge of the investigation, since 1978 as many as 300 retailers in the New York area have participated in schemes to defraud, using tens of thousands of lost, stolen, or counterfeited cards. As a result, Mr. Murry said, "banks throughout the US and Europe were defrauded in excess of $15 million." As of March 4, the Postal Inspection Service reports that 18 people had been charged with similar federal offenses in the district.

The California Wholesale scam is similar to another credit card scheme that cost Chase Manhattan Bank nearly $300,000 recently. According to an indictment handed down in mid-February, one Gad Rosenshtook, an Israeli citizen, created two phony corporations, Transword Electronics and Venice Fashion Jewelries, which submitted 950 phony sales slips to Chase between August and December of last year. The slips carried real account numbers of Chase customers who had not bought anything from either of the two companies. Neither Mr. Rosenshtook or California Wholesale Jewelers could be reached for comment.

Chase found the transactions and alerted the Manhattan district attorney's office during a normal computer audit of its merchant customers. Mr. Rosenshtook was arrested on Feb. 3 at JFK International Airport.

A spokesman for Chase pointed out that the consumer has no liability whatever in such a case. However, consumers are asked to cut up and return their credit cards and are reissued new cards and new account numbers. And, Ms. Trueax of the Postal Inspection Service says, consumers should hold on to their credit card receipts. "You would be surprised," she says, "at the number of credit card receipts picked up off the ground, giving someone your name and card number."

Although bankers point out that there is no foolproof method to prevent credit card frauds, there are ways to minimize them. Detective Greg Schwein of the Los Angeles Police Department suggests that the banks tighten up credit card rules for their merchant customers.

For example, instead of allowing "cash deposits" of charge slips, the banks could hold off payment until the slips return to the customer's bank. And one head of security for a large New York bank noted that there are computerized screening methods that catch fraudulent charges. "Since New York experiences these schemes before a lot of other areas," he says, "we try to move around the country explaining to other banks what they can do to prevent these things."

Finally, as Marion Bestani, a spokeswoman for Chase Manhattan Bank, comments, "We like to cooperate with the press on these stories so people know you can't get away with these things. You're going to get caught if you try it."●

25TH ANNIVERSARY OF THE SISTER CITIES INTERNATIONAL PROGRAM

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Wisconsin (Mr. ZABLOCKI) is recognized for 5 minutes.

● Mr. ZABLOCKI. Mr. Speaker, I would like to take this opportunity to congratulate the Sister Cities International program as it celebrates its 25th anniversary this year. I have had the pleasure of being associated with this program for many years, and my home city of Milwaukee has enjoyed its affiliations with its sister cities of Haifa, Israel, and Heidelberg, Germany. On March 26, I was pleased to cosponsor a foreign affairs seminar with Sister Cities for the members of its board of directors and State representatives, all volunteers, who are meeting in Washington this week.

This program, which has as its principal goal furthering international understanding, was founded in 1956 by President Dwight D. Eisenhower when he initiated the people-to-people program. From this grew Sister Cities International, which has assisted more than 700 American cities to establish links with over 900 communities in 78 other nations of the world. The combined population of the U.S. cities involved numbers more than 86 million Americans—a tremendous force for peace.

The basic idea of a sister city program is simple. When an American community joins with a community in another country so that each can learn about the other and develop friendly and useful exchanges, the two can enter into a formal sister city affiliation. The ideal affiliation involves a large number of citizens and organizations in both communities engaging in continuing projects of mutual interest. These projects include such cultural activities as:

Adult language classes which include lectures, travelogs, and studies of the history, arts, and literature of the affiliated country;

Exchanging symbols which represent the best of another culture such as the construction of gardens, monuments, and parks, including living symbols, plants, and animals native to the sister area.

Bringing together people who share in the extra dimensions of living with another family in another culture;

Visits by performing groups and sporting events;

Journalist exchanges.

While Sister Cities involves young Americans in actual living and educational experiences abroad, many others are involved at home in educational exchanges through sister school exchanges, language programs, and numerous other projects that have given them exposure to another culture and people on a very direct, immediate basis. For example, one city of approximately 50,000 has been exchanging language teachers with its sister city for more than 15 years. Each year, an English teacher travels to the sister city and a French teacher comes to the U.S. affiliate.

Many sister cities are also discovering the advantages of trade and industrial exchanges. Advances in technology affect the jobs and livelihood of people everywhere and through the process of investigating alternatives, many cities have benefited through business exchanges including trade fairs, economic conferences, tourism development forums, and other significant informational and substantive programs.

In addition, medical and dental teams have participated both in training and learning processes in many developed and developing countries. Engineers have worked on water supply planning, sewage treatment, and on airport construction. Technical advice has been given on construction of clinics, schools, and shipyards. Municipal training programs have been developed to train employees from sister cities. The real advantage has been the two-way give-and-take that is shared by the technical and professional experts in the many and varied fields of endeavor.

The sister city movement is a living, growing evolving activity. New functions in areas of vital concern to cities in this country and abroad continually surface in such areas as the quality of life, citizens' roles in environmental protection, and continuing dialogs between cities as they struggle to cope with their common problems.

I am pleased to salute Sister Cities International on its 25th anniversary and wish the organization continued success in its important role of helping people of many nations recognize their common interests and problems.

GRAIN WAREHOUSE BANKRUPTCY BILL

(Mr. EMERSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. EMERSON. Mr. Speaker, today I am pleased to introduce a bill which provides for certain amendments to the Bankruptcy Reform Act of 1978, as well as amendments to title 7, chapter 10 of the United States Code, which deals with agriculture warehouse and licensing operations. Senators DOLE and DANFORTH are introduing the same bill today in the Senate. A number of my colleagues have expressed interest in cosponsorship.

This bill is designed to address an increasingly serious problem for farmers in grain-producing States: the unexpected insolvency of grain warehouses holding vast quantities of crops belonging to those farmers.

The reasons for which agricultural producers have had trouble regaining possession of their crops in these insolvencies are many and complex. There are problems in establishing ownership interests in the crops, as between storage contract crops, which are owned by the farmers, and sales contract crops owned by the warehouses.

Faced with all the conflicting claims, bankruptcy courts are frequently slow to respond to the needs of the farmers for a swift resolution of these questions.

To address these problems, this bill provides for: First, one uniform, expedited procedure for abandonment of grain assets in a proceeding filed by an insolvent commodity warehouse; second, the granting of a statutory lien to farm producers on crops delivered to a warehouse upon a sales contract for which the producer has not been paid; and the granting of a priority position to farm producers in any distribution of assets to unsecured creditors.

Mr. Speaker, my bill will not solve all problems attendant upon this vexing situation; it will certainly not prevent farmers from suffering occasional losses due to the fraud or mismanagement of a small minority of grain warehouse operators. The bill will, however, prevent any such losses from being compounded by the frustrating inaction of the bankruptcy court, and so I believe it to be an important step in the right direction.

VINSON-TRAMMELL ACT

(Mr. PRICE asked and was given permission to extend his remarks at this point in the RECORD.)

● Mr. PRICE. Mr. Speaker, the Vinson-Trammell Act of 1934 was authorized by Carl Vinson, former chairman of the Committee on Armed Services, and a Member of Congress 50 years when he retired in 1964. This legislation provided a blanket authorization for naval shipbuilding, establishing a fixed, total tonnage figure. The Vinson-Trammell Act significantly affected the development of the two-ocean Navy which contributed so much to our winning World War II.

Among the provisions of the Vinson-Trammell Act was one that limited the profits of private shipbuilders and aircraft manufacturers on naval ship and aircraft construction. These profit limitation provisions have been codified in sections 2372 and 7300 of title 10, United States Code. Section 2372 places fixed profit limits at 12 percent on contracts or subcontracts over $10,000 for the construction of military aircraft and at 10 percent on contracts or subcontracts over $10,000 for the manufacture of naval vessels. These provisions were superseded for many years by the Renegotiation Act of 1951. However, when the Renegotiation Act expired, the profit limitation provisions of the Vinson-Trammell Act again became effective.

In the 96th Congress I introduced H.R. 7247, a bill to waive the applicability of sections 2382 and 7300 of title 10, United States Code, to contracts for the construction or manufacture of naval vessels or military aircraft with respect to which final payment is made before October 1, 1981. A 1-day hearing was held by a subcommittee of the House Armed Services Committee last year and testimony indicated considerable differences of opinion among witnesses.

As a result of that preliminary hearing, language similar to H.R. 7247 was incorporated into the Department of Defense Authorization Act of 1981—Public Law 96-342; 94 Statute 1120, section 1005. That provision exempted contracts and subcontracts for which final payment is made before October 1, 1981, from liability for payment under the Vinson-Trammell Act. That law also prohibited the responsible agencies from prescribing regulations to implement the profit limitation provisions before October 1, 1981.

The statement of managers which accompanied the conference report on the Department of Defense Authorization Act of 1981—No. 96-1222—stated that:

> The conferees agreed that some exemption for current and past contracts was in order, but emphasized their commitment to develop an alternative profit limitation system and to make recommendations to their respective bodies so that legislation can be enacted before October 1, 1981.

In this session, the Armed Services Procurement Subcommittee will consider legislation which addresses profit limitations on defense contracts. The gentleman from New York (Mr. STRATTON), who is chairman of that subcommittee in the 97th Congress, has assured me that it is his intention to conduct an in-depth examination of the subject immediately after completion of committee action on the fiscal year 1982 Department of Defense authorization bill. I expect the committee to report that bill in late April or early May.

It has come to my attention that there exists some confusion concerning my views relative to the Vinson-Trammell profit limitation provisions. I would like to clarify my position.

For almost 50 years this country has seen the need for some profit constraints on defense contracts—through the Vinson-Trammell Act or the Renegotiation Act. While everyone with whom I have spoken agrees that Vinson-Trammell is antiquated, there exists a wide variety of views in Congress, in the executive branch, and in industry concerning what type of legislation, if any, should replace it.

This is a complex and controversial subject and I do not believe a provision to repeal or amend the Vinson-Trammell Act should be a part of the fiscal year 1982 authorization process. I believe that the question of profit limitations on contracts should be given more thorough hearings by the appropriate subcommittee and all interested parties should be given an opportunity to testify. It is an important subject that should be dealt with in its own right in separate legislation.

I am deeply concerned that this subject be thoroughly examined. Further, I do not want the reporting of the authorization bill to be delayed in any way by consideration of extraneous provisions.

Chairman STRATTON has made the commitment that the Procurement Subcommittee will conduct a thorough, objective study of this subject, and I am convinced that such a course of action is necessary to resolve the critical issues involved.

In a time when we face the need to increase defense spending and at the same time are reducing spending on human services programs because of servere budget difficulties, I want to be satisfied, and I want the country to be satisfied, that we are receiving the maximum return in national security for each defense dollar spent. And if we remove all limits on excessive profits for defense industry I want us to do so only after we have thoroughly considered the question and have developed clear, justifiable rationale for our actions.

It may be that we will not require any alternative profit limitation system. For my part I intend to withhold judgment until Mr. STRATTON's subcommittee completes hearings.

I believe there is plenty of time in this session to complete action on any legislation.

However, I do not want the representatives of defense industry to be unnecessarily concerned that the antiquated provisions of Vinson-Trammell will go into effect in October before legislative action is completed. Therefore, in concurrence with Mr. STRATTON, I would support an extension of section 1005 of Public Law 96-342, that is, the exemption from Vinson-Trammell that expires on October 1 will be extended into next year, if necessary, to provide additional time for legislative action.

In summary, I am withholding final judgment until the Procurement Subcommittee holds hearings and makes its report. The matter will be considered this year. We will protect industry from the outdated and burdensome provisions of Vinson-Trammell. But Congress would not be properly carrying out its responsibilities if it merely eliminated all restraints on excess profits without careful consideration of the effect on the taxpayers.●

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. KRAMER) to revise and extend their remarks and include extraneous material:)

Mr. ASHBROOK, for 30 minutes, today.

Mr. CARMAN, for 5 minutes, today.

Mr. KEMP, for 1 hour, April 7, 1981.

Mr. BROYHILL, for 5 minutes, today.

Mr. PARRIS, for 5 minutes, today.

(The following Members (at the request of Mr. FOWLER) to revise and extend their remarks and include extraneous material:)

Mr. BINGHAM, for 5 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. ZABLOCKI, for 5 minutes, today.

Mr. GONZALEZ, for 15 minutes, today.

Mr. BLANCHARD, for 60 minutes, April 7.

Mr. SAVAGE, for 60 minutes, April 9.

Mr. CONYERS, for 60 minutes, April 14.

Mr. BAILEY of Pennsylvania, for 60 minutes, April 16.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. OBEY, and to include extraneous material notwithstanding the fact that it exceeds two pages of the RECORD and is estimated by the Public Printer to cost $1,230.

(The following Members (at the request of Mr. KRAMER) and to include extraneous matter:)

Mr. CARMAN.

Mr. NAPIER.

Mr. LEBOUTILLIER.

Mr. BROYHILL.

Mr. O'BRIEN.

Mr. FINDLEY.

Mr. CONABLE.

Mr. LOTT.

Mr. GREEN.

Mr. THOMAS.

Mr. WOLF.

(The following Members (at the request of Mr. FOWLER) and to include extraneous matter:)

Mr. ROE.

Mr. MATTOX.

Mr. FASCELL in three instances.

Mr. MATSUI.

Mr. HUGHES.

Mr. ROSENTHAL.

Mr. SYNAR.

Mr. DORGAN of North Dakota.

Mr. PEPPER in two instances.

Mr. GARCIA in two instances.

Mr. DOWNEY.

Mr. GEJDENSON.

Mr. AUCOIN.

Mr. SWIFT.

Mr. SOLARZ.

Mr. HAMILTON.

Mr. OBERSTAR in two instances.

Mr. STARK in two instances.

Mr. STUDDS.

Mr. MCDONALD.

Mr. RAHALL.

Mr. BEDELL.

ADJOURNMENT

Mr. FOWLER. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 1 o'clock and 21 minutes p.m.) the House adjourned until tomorrow, Wednesday, April 1, 1981, at 3 p.m.

EXPENDITURE REPORTS CONCERNING OFFICIAL FOREIGN TRAVEL

Reports of various House committees, and miscellaneous reports filed with the Committee on House Administraton, concerning the foreign currencies and U.S. dollars utilized by them during the first, second, third, and fourth quarters of calendar year 1980 and the first quarter of calendar year 1981 in connection with foreign travel pursuant to Public Law 95-384 are as follows:

REPORT OF EXPENDITURES FOR OFFICIAL FOREIGN TRAVEL, COMMITTEE ON THE JUDICIARY, U.S. HOUSE OF REPRESENTATIVES, EXPENDED BETWEEN OCT. 1, AND DEC. 31, 1980

Name of member or employee	Date		Country	Per diem [1]		Transportation		Other purposes		Total	
	Arrival	Departure		Foreign currency	U.S. dollar equivalent or U.S. currency [2]	Foreign currency	U.S. dollar equivalent or U.S. currency [2]	Foreign currency	U.S. dollar equivalent or U.S. currency [2]	Foreign currency	U.S. dollar equivalent or U.S. currency [2]
Tom Railsback	12/9	12/12	France		330						330.00

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

966. A letter from the Principal Deputy Assistant Secretary of Defense (Comptroller), transmitting a list of contract award dates for the period March 15 through June 15, 1981, pursuant to 10 U.S.C. 139(b); to the Committee on Armed Services.

967. A letter from the Chairperson, National Advisory Council on Indian Education, transmitting a special report on an administrative and programmatic study of the Office of Indian Education, U.S. Department of Education, pursuant to section 442 of Public Law 92-318; to the Committee on Education and Labor.

968. A letter from the Secretary of Health and Human Services, transmitting the annual report for fiscal year 1980 on the primary care research and demonstration program, pursuant to section 340(e) of the Public Health Service Act, as amended; to the Committee on Energy and Commerce.

969. A letter from the Secretary of Health and Human Services, transmitting the fourth annual report on the National Health Service Corps scholarship program, pursuant to section 751(i) of the Public Health Service Act, as amended; to the Committee on Energy and Commerce.

970. A letter from the Acting Administrator, Energy Information Administration,

Department of Energy, transmitting a report covering the period October through December 1980, on imports of crude oil, residual fuel oil, refined petroleum products, natural gas, and coal; reserves and production of crude oil, natural gas, and coal; refinery activities; and inventories; together with data on exploratory activity, exports, nuclear energy, and electric power, pursuant to section 11(c)(2) of the Energy Supply and Environmental Coordination Act of 1974; to the Committee on Energy and Commerce.

971. A letter from the Vice President for Government Affairs, National Railroad Passenger Corporation, transmitting the Corporation's legislative recommendations, pursuant to section 308(b) of Public Law 91-518; to the Committee on Energy and Commerce.

972. A letter from the Chairman of the Board and the President and Chief Executive Officer, U.S. Railway Association, transmitting a report on the effect of reduced Federal funding, and of no further Federal funding, on the Consolidated Rail Corporation, pursuant to section 703(b)(1) of Public Law 96-448; to the Committee on Energy and Commerce.

973. A letter from the Assistant Secretary of State for Congressional Relations, transmitting a report on political contributions made by Leonore Annenberg, Chief of Protocol-designate with rank of Ambassador, and by members of her family, pursuant to section 304(b)(2) of Public Law 96-465; to the Committee on Foreign Affairs.

974. A letter from the Assistant Legal Adviser for Treaty Affairs, Department of State; transmitting copies of international agreements, other than treaties, entered into by the United States, pursuant to 1 USC 112b(a); to the Committee on Foreign Affairs.

975. A letter from the Fiscal Assistant Secretary of the Treasury, transmitting a report on the inventory of nonpurchased foreign currencies as of September 30, 1980, pursuant to section 613(c) of the Foreign Assistance Act of 1961, as amended; to the Committee on Foreign Affairs.

976. A letter from the Director, Office of Management and Budget, Executive Office of the President, transmitting a draft of proposed legislation to amend the Federal Grant and Cooperative Agreement Act; to the Committee on Government Operations.

977. A letter from the Comptroller General of the United States, transmitting a report on Federal spending for entitlement and indexed programs (PAD-81-21, Mar. 3, 1981); to the Committee on Government Operations.

978. A letter from the Supervisory Copyright Information Specialist, Copyright Office, Library of Congress, transmitting a report on the Office's activities under the Freedom of Information Act during calendar year 1980, pursuant to 5 U.S.C. 552(d); to the Committee on Government Operations.

979. A letter from the Secretary of the Interior, transmitting the annual report for calendar year 1980 on the innovation grant program of the urban park and recreation recovery program, pursuant to section 1015(b) of Public Law 95-625; to the Committee on Interior and Insular Affairs.

980. A letter from the President and the National Executive Director, Girl Scouts of the United States of America, transmitting the 31st annual report of the organization, covering the fiscal year ended September 30, 1980, pursuant to section 7 of the act of March 16, 1950, as amended, and section 3 of Public Law 88-504 (H. Doc. No. 97-38); to the Committee on the Judiciary and ordered to be printed.

981. A letter from the Acting Chairman, Council on Environmental Quality, Executive Office of the President, transmitting a draft of proposed legislation authorizing appropations for the Council on Environmental Quality for fiscal years ending September 30, 1982, and September 30, 1983; to the Committee on Merchant Marine and Fisheries.

982. A letter from the Acting Assistant Secretary of the Army (Civil Works); transmitting a Corps of Engineers report on Clopton Crossing Lake, Tex., pursuant to section 1(a) of the Water Resources Development Act of 1974; to the Committee on Public Works and Transportation.

983. A letter from the Secretary of Transportation, transmitting a report covering fiscal year 1980 on Urban Mass Transportation Administration obligations by State and recipient, pursuant to section 4(h)(1) of the Urban Mass Transportation Act, as amended; to the Committee on Public Works and Transportation.

984. A letter from the Secretary of Transportation, transmitting a draft of proposed legislation to amend the Hazardous Materials Transportation Act to authorize appropriations for fiscal years 1982 and 1983, and for other purposes; jointly, to the Committees on Energy and Commerce, and Public Works and Transportation.

985. A letter from the Secretary of Transportation, transmitting a draft of proposed legislation to amend the Natural Gas Pipeline Safety Act of 1968, as amended, and the Hazardous Liquid Pipeline Safety Act of 1979 to authorize appropriations for fiscal years 1982 and 1983; jointly, to the Committees on Energy and Commerce, and Public Works and Transportation.

986. A letter from the Chairman, U.S. Nuclear Regulatory Commission, transmitting the Commission's annual report for fiscal year 1980 on contract activity, pursuant to section 11 of Public law 95-601; jointly, to the Committees on Energy and Commerce, and Interior and Insular Affairs.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

H. Con. Res. 2: Mrs. FENWICK.

H. Con. Res. 79: Mr. DUNN and Mr. KRAMER.

SENATE—*Tuesday, March 31, 1981*

(Legislative day of Monday, February 16, 1981)

The Senate met at 9:30 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, LL.D., offered the following prayer:

Gracious Father in heaven, our hearts unite with all people in profound gratitude that the life of the President of the United States was spared. We pray for his rapid and complete recovery. We commend to Thy loving care Mrs. Reagan and the family. May the peace which passes understanding fill their hearts and minds.

We pray for total recovery for Mr. Brady, Mr. McCarthy, and Mr. Delahanty. Grant the healing touch of the great Physician in their lives and the comfort and peace of His presence with their loved ones. We thank Thee for the Secret Service and the police and all who provide security at the risk of their lives.

We pray for the Vice President and all in authority Thy guidance and direction through these crucial hours and for our Nation that we may persevere to Thy glory.

We have been vividly reminded how transitory life is. May we, therefore, conduct ourselves in the wisdom of James, who wrote, "Come now, you who say—

Today or tomorrow we will go into such and such a town and spend a year there and trade and get gain; whereas you do not know about tomorrow. What is your life? For you are a mist that appears for a little time and then vanishes. Instead you ought to say, If the Lord wills, we shall live and we shall do this or that.—James 4: 13–15 (R.S.V.).

Hear our prayer in the name of the Lord Jesus Christ. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The majority leader is now recognized.

Mr. BAKER. I thank the Chair.

THE JOURNAL

Mr. BAKER. Mr. President, I ask unanimous consent that the Journal of the proceedings of the Senate be approved to date.

The PRESIDENT pro tempore. Without objection, it is so ordered.

REPORT ON THE PRESIDENT'S CONDITION

Mr. BAKER. Mr. President, it is my happy privilege to announce this morning that during a conversation with the Vice President of the United States, I was advised that the President is doing very well indeed; that his strength and courage and personality are showing through, even in this moment of physical discomfort. He survived the operation with remarkable ease. The tubes have been removed from his nose and mouth. He is responding readily to conversation and is showing a most remarkable sense of humor.

I also report that this morning the President signed the dairy price support bill, which was passed by Congress in the last few days.

ORDER FOR TIME FOR VOTES TODAY

Mr. BAKER. Mr. President, this morning there will be a meeting of the bipartisan leadership, at the White House, with the Vice President and other officials in the executive department, at 10 o'clock. I have discussed this matter briefly with the minority leader, and I now ask unanimous consent that any votes that are ordered prior to 2 p.m. today not occur until that time and that they be stacked.

The PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER FOR ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, in light of the fact that some Senators may wish to speak on the events of yesterday or other subjects, and because of the necessary absence of the leadership on both sides of the aisle for a time this morning as they attend the bipartisan leadership meeting at the White House, I ask unanimous consent that following the time utilized by the minority leader under the standing order, there be a period for the transaction of routine morning business, not to extend beyond 11 a.m., in which Senators may speak for not more than 10 minutes each.

The PRESIDENT pro tempore. Without objection, it is so ordered.

LEGISLATIVE SCHEDULE

Mr. BAKER. Mr. President, it is the intention of the leadership on this side to proceed diligently with the further consideration of Senate Concurrent Resolution 9 and the amendments thereto. I hope that all Senators will present themselves on the floor and participate in that debate as soon as possible.

As soon as morning business is closed, the Bradley amendment will be the pending amendment, carried over from yesterday. Is that not correct?

The PRESIDENT pro tempore. The Senator is correct.

Mr. BAKER. There are other amendments on both sides of the aisle. I urge Senators to offer those amendments as soon as they can do so, notwithstanding that votes will not occur until 2 p.m. because it is the intention of the leadership on this side to try hard to finish this bill today, if possible, and if not, to finish it at a reasonably early hour on tomorrow.

As I indicated yesterday, Members should be on notice that there is a distinct possibility, even likelihood, that the Senate will be in late tonight, and by "late" I mean perhaps 10 o'clock or later, if it appears that we can finish this bill—in any event, long enough to make sure that it will carry through with the momentum I hope develops with the consideration of amendments during the course of the day.

Mr. President, that concludes the extent of my remarks during the leaders' time this morning, and I am pleased now to yield the floor so that the minority leader may speak, pursuant to the standing order.

RECOGNITION OF THE MINORITY LEADER

The PRESIDING OFFICER (Mr. WALLOP). The minority leader is recognized.

VIOLENCE TOWARD PUBLIC OFFICIALS

Mr. ROBERT C. BYRD. Mr. President, the tragic shooting of President Reagan and three other persons yesterday is deplored by all Americans.

An assault on the President of the United States is perhaps the most serious crime in our society. When such acts of violence occur, all logic is defied. The attack was a senseless act and it was a shameful act.

I find it difficult to accept the inevitability of acts of violence against a President of the United States. But the profession of politics is a dangerous one, and all public officials, especially those who are elected public officials, face this possibility as they must go about in this constitutional Republic to meet and mingle with people in all walks of life.

I find it difficult to accept the often propounded thought that we live today in a sick society. I do not believe that we live today in a sick society. I think there are some sick individuals, but not a sick society.

At a time such as this, one searches for answers. They prove to be elusive.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

This is the ninth attack on a President in the history of our Nation. When Thomas Jefferson came to Washington as our third President, we are told that when someone knocked on the door of the President, he often would answer the knock himself. Only that front door stood between him and the public. There was not even a fence around the President's house. That was in 1801.

Now, 180 years later, it is to President Reagan's credit and it is a tribute to him that he likes to meet the public, that he nearly always stops to answer one more question from the press, and in such instances little stands between him and a potential assassin.

Our hearts go out to the family of the President, and we are cheered that he came through surgery in good condition. We are cheered by the account of the progress of the President that has been given to us by the Senate majority leader. We are cheered to know that the President will soon be back at the helm of Government.

Our hearts go out to the families of Press Secretary Jim Brady, Secret Service officer Timothy J. McCarthy, and police officer Thomas K. Delahanty. Our thoughts are with them, and we wish them a full recovery.

I also wish to compliment the orderliness with which the administration has worked during these frenetic and trying hours.

The President laughed and joked as he was on his way to the operating room on yesterday. He exhibited that cheerfulness that we all have come to associate with him.

I admired the quiet dignity and poise demonstrated by the Vice President when he spoke to the Nation last evening briefly. I thought that his demeanor, bearing, manner, and words were highly becoming of a Vice President and of a leader.

This morning I believe that we should refuse to accept the inevitability of such horrible situations and to renew our quest for those elusive answers as to how and why, and we should persevere in the effort. The moment will pass and with it some of the immediate tensions and passions, but we should not let this deter us in continuing to search for answers, and we must begin with the premise with which I began my remarks. We do not live in a sick society. Our society has some sick individuals and madmen, and it seems that we have not yet found the answer as to how we might deal with such.

Mr. BAKER. Mr. President, will the Senator yield to me?

Mr. ROBERT C. BYRD. I yield the floor.

Mr. BAKER. Mr. President, I wish to take this opportunity to thank the distinguished minority leader.

His remarks on important occasions are always impressive and frequently moving, and I think never more relevant, more moving, and impressive than they have been this morning. I thank him for them.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Now in the period for the transaction of morning business, the Chair recognizes the Senator from Wisconsin.

THE HUMOR AND STRENGTH OF PRESIDENT REAGAN

Mr. PROXMIRE. Mr. President, as one Senator, I wish to congratulate the leadership on their statements this morning with respect to the shooting of President Reagan and three other people. I think that they were statements that should make all Senators proud of this body.

I particularly appreciated the humor and the strength that President Reagan showed under the greatest kind of stress. I understand he walked into the hospital under his own power with a bullet in him, something that very few people would even consider being able to do, and he showed such a marvelous sense of humor when he said on the whole he would rather be in Philadelphia, which showed not only an appreciation of W. C. Fields but also the NCAA basketball championship.

At any rate, I note that the majority leader pointed out that the first official action by the President after he was shot was to sign the dairy bill which meant that our dairy farmers are going to take it on the chin. Well, I deplore the bill itself; but I must say I am glad that the President had the strength to take action, even though it is an action that is going to result in problems for people in our State.

SIMON WIESENTHAL: STALKING THE NAZIS

Mr. PROXMIRE. Mr. President, in Monday's Washington Post, Michael Kernan writes of Simon Wiesenthal's unrelenting search for Nazi war criminals, and his great concern over the growth of neo-Nazi movements in Europe and the United States. In his 36-year search, Wiesenthal has exposed over 1,100 war criminals, including Adolf Eichmann. Yet he believes that 20,000 Nazis escaped Germany in 1945—many of them to America. He admits that his documentation covers only "the tip of the iceberg."

He stalks these murders as a man possessed. Wiesenthal's thirst for justice is at no time more passionate then when his thoughts turn to Jose Mengele, the infamous angel of death. His thoughts are always on Mengele. Wiesenthal follows his every move all the days. Kernan notes that it was Mengele who injected blue dye into children's eyes to aryanize them, who collected twins for unspeakable experiments, who passed judgment on the thousands of Jews marching into the death camp at Birkenau. Wiesenthal is 72, while Mengele is 69. The hunt is certain to end soon.

But for the moment, Wiesenthal's greatest fear is that Nazi nightmare is starting all over again—with its roots here in the United States. The police raided 2,000 houses all over Germany this past winter, states Wiesenthal. They "found stacks of neo-Nazi propaganda," which came from Lincoln, Nebr. The anti-Semitic and fascist material gets distributed in Germany also by way of Reade, W. Va., Mount Vernon, N.Y., and Arlington, Va.

As Wiesenthal points out, this activity devastates U.S. credibility for "it allows the Soviet Union—the big jail of nations—to point to America as the source of this new poison and to set themselves up as the world's protector against Nazism."

Neo-Nazism "is not a powerful movement in America, but for Europe this is a disaster." Bombings and other violence have been traced to fascist elements in Munich, Bologna, and Paris. These groups are "waiting for a crisis, economic or political," warns Wiesenthal. "It is exactly what Hitler did."

Wiesenthal is convinced that the horror could happen all over again. No country is safe—recently a Los Angeles synagogue was painted with swastikas and a mesage in German: "Jews—the SS will come again." It is easy to dismiss these events as the actions of isolated madmen. Yet in that way we blind ourselves to the very real and growing danger of this extremism both at home and abroad. Rather, we must express our outrage, and express it firmly.

The Genocide Convention offers a way. Drawn up in the wake of the Nazi holocaust, the convention outlaws the atrocity of mass murder. Ratifying it would express our revulsion over the potential of fascist groups and serve to allay the fears of those who dread the return of another holocaust.

Wiesenthal notes that:

> Half of the population of the world today was not alive when the Nazi death camps were opened in 1945. A tenth of the rest were children. That means 60 percent of the world's people know nothing at firsthand, nothing.

Simon Wiesenthal will never have the luxury of not knowing, of forgetting the horror. We indulge in it at our own peril. We must ratify the Genocide Convention.

Mr. DANFORTH addressed the Chair.

The PRESIDING OFFICER (Mr. RUDMAN). The Senator from Missouri is recognized.

IMPORTATION OF JAPANESE AUTOMOBILES

Mr. DANFORTH. Mr. President, I thought I would use this opportunity to bring the Senate up to date on the present status of moves to try to curtail the importation of Japanese automobiles, as I understand that status.

Some weeks ago, Senator BENTSEN and I introduced a bill to impose quotas for a 3-year period of time on the importation of Japanese cars. We did so with great reluctance because both of us consider ourselves to be freetraders.

However, the situation in the automo-

bile industry is in an emergency status. That is, the American automobile industry last year lost $4.2 million, some 200,000 autoworkers are now out of work, and approximately three-quarters of a million other individuals are out of work due to the emergency in the automobile industry.

The cause of the automobile problem is at least twofold: First, we have a recession that has been going on in the country, a downturn in the economy, and a reduction in the demand for automobiles of all kinds. But at the same time that the number of cars sold has declined, the number of Japanese cars sold in the United States has more than doubled.

The reason for this was that in a very short period of time, the whole picture with respect to the availability of gasoline and the price of gasoline changed. The OPEC countries tightened their cartel, increased the price of gasoline, and Federal policies with respect to allocation created, especially in early 1979, a line at practically every gasoline station in the United States. Therefore, there was a great, sudden surge of demand for fuel-efficient cars which were produced by the Japanese.

Senator BENTSEN and I reasoned that this is an artificial situation; that it is a short-term situation; and that in large part it was created by governmental policy. Governmental energy policy created a situation in which the American automobile industry felt that it could continue to produce large cars for a long period of time, and the American consumer felt that he could afford to buy a large car.

When we introduced the quota bill, we stated at the time that we would prefer to have the administration negotiate limitations with the Japanese rather than to have Congress impose limitations by legislation. We took that position very openly, and we told the administration that.

That remains our position. We would prefer for the administration to discuss matters with the Japanese. It is my understanding that that process is now going on. The administration has talked to the Japanese. The Foreign Minister of Japan was in this country last week. He discussed the automobile situation with a number of people in the administration, including the President himself.

Hopefully, something can be resolved by the time the Prime Minister comes here in early May.

It is certainly my intention and Senator BENTSEN's intention to give the Prime Minister of Japan the courtesy of having him in the country without having Congress proceed with a quota bill. We would like to see this matter resolved, and we would like it resolved on the most amicable possible terms.

However, it is my intention to write Senator DOLE, the chairman of the Finance Committee, today or perhaps tomorrow and suggest to him that he schedule a markup of the quota bill at some date in the foreseeable future, and then to make sure that we are in the position of proceeding with legislation if it turns out that the legislative route is the only one that is available to us.

Mr. President, as I pointed out earlier, I would rather have this accomplished by negotiation by the executive branch rather than by legislation by the Congress, but the fact of the matter is that whether it is done by negotiation or legislation, it must be done. We cannot continue to have a situation where an industry right at the heart of the American economy continues to get weaker and weaker. We must provide it with breathing room, whether it is done by negotiation or, if need be, by legislation.

Therefore it is my intention to ask the chairman of the Finance Committee, Senator DOLE, if he will schedule a markup in the foreseeable future so that we can proceed in an orderly way on the legislative route in case nothing transpires from the talks that are being held and will be held between the administration and the Japanese.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. RANDOLPH. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

A HISTORY OF ASSASSINATIONS AND ASSASSINATION ATTEMPTS ON PRESIDENTS OF THE UNITED STATES

Mr. RANDOLPH. Mr. President, the Senate of the United States, just before going out of session yesterday evening, listened to one of its Members, Senator DANFORTH of Missouri, in a prayer of petition to our Father for those who had been stricken during the incident of yesterday afternoon. At the request of media in West Virginia and elsewhere, which presumably has come to many Members of the Senate and House of Representatives, I responded with the following, which I wish to have made a part of the RECORD:

The assassination attempt on the life of President Reagan is a tragedy.

Only a few minutes before he was shot it is reported that in an address to the AFL–CIO the President spoke out strongly against the rising tide of crime.

The people of the United States will pray for the well-being of our national leader and for the recovery of the others who were injured in this deplorable incident.

I shall place in the RECORD, the rate of the rise in crime in various categories in this country. They are startling figures. I listened in part this morning as an early morning television program commented on these figures. I ask unanimous consent that those figures be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

UNIFORM CRIME REPORTS FOR THE UNITED STATES

(Printed Annually—1979)

(By William H. Webster)

PRELIMINARY FIGURES

The number of crime index offenses reported to law enforcement agencies throughout the United States during the first 6 months of 1980 increased 10 percent over the same period of 1979. When compared with the same periods of 1979, the crime index increased 9 percent during the first quarter of 1980, and increased 11 percent during the second quarter.

TABLE 2.—INDEX OF CRIME, UNITED STATES, 1970–79

Population [1]	Crime [2] Index total	Modified [3] crime index total	Violent [4] crime	Property [4] crime	Murder and nonnegligent manslaughter	Forcible rape	Robbery	Aggravated assault	Burglary	Larceny-theft	Motor vehicle theft	Arson
Number of offenses:												
1970–203,235,298	8,098,000		738,820	7,359,200	16,000	37,990	349,860	334,970	2,205,000	4,225,800	928,400	
1971–206,212,000	8,588,200		816,500	7,771,700	17,780	42,260	387,700	368,700	2,399,300	4,424,200	948,200	
1972–208,230,000	8,248,800		834,900	7,413,900	18,670	46,850	376,290	393,090	2,375,500	4,151,200	887,200	
1973–209,851,000	8,718,100		875,910	7,842,200	19,640	51,400	384,220	420,650	2,565,500	4,347,900	928,800

1977	5,055.1		466.6	4,588.4	8.8	29.1	187.1	241.5	1,410.9	2,729.9	447.6	
1978	5,109.3		486.9	4,622.4	9.0	30.8	191.3	255.9	1,423.7	2,743.9	454.7	
1979	5,521.5		535.5	4,986.0	9.7	34.5	212.1	279.1	1,499.1	2,988.4	498.5	

[1] Populations are Bureau of Census provisional estimates as of July 1, except Apr. 1, 1970, census.
[2] Due to rounding, the offenses may not add to totals.
[3] The collection of statistics on arson, a newly established index offense, was begun in 1979. However, summary statistics are not yet available for inclusion in this table. The number of arson offenses reported by individual law enforcement agencies is displayed in tables 6 through 9 of this publication.
[4] Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.
[5] Crime rates calculated prior to rounding number of offenses.

An increase of 10 percent occurred in both the violent and property crime categories for January-June 1980. Of the violent crimes, robbery showed the largest increase, 13 percent. Forcible rape rose 12 percent, aggravated assault rose 7 percent, and murder rose 3 percent. Of the property crimes, burglary showed the largest increase, 12 percent, while larceny-theft rose 9 percent and motor vehicle theft rose 4 percent.

The first three tables below show increases for the total crime index offenses in all population groups and all regions of the United States.

TABLE 1.—CRIME INDEX TRENDS

[Percent change January through June, 1980 over 1979, offenses known to the police]

Population group and area	Number of agencies	Population in thousands	Total	Violent	Property	Murder	Forcible rape	Robbery	Aggravated assault	Burglary	Larceny theft	Motor vehicle theft	Arson*
Total	11,735	193,483	+10	+10	+10	+3	+12	+13	+7	+12	+9	+4	
Cities:													
Over 1,000,000	6	17,670	+13	+12	+13	+4	+2	+19	+2	+14	+13	+12	
500,000 to 999,999	19	12,422	+8	+5	+8	−1	+15	+5	+4	+10	+9	0	
250,000 to 499,999	31	10,998	+8	+10	+8	+1	+11	+10	+10	+9	+9	0	
100,000 to 249,999	111	16,130	+10	+11	+10	+4	+18	+11	+10	+14	+9	+3

*Sufficient 1979 data were not available to establish reasonable trends regarding arson, the 8th index offense.
Issued by William H. Webster, Director, Federal Bureau of Investigation, U.S. Department of Justice, Washington, D.C. 20535.
Advisory: Committee on Uniform Crime Records, International Association of Chiefs of Police.

Mr. RANDOLPH. Mr. President, it might be of some interest to tell of attempts on the life of Presidents of the United States. The first attempt at assassination was against Andrew Jackson in 1835. Of course, the last of the Presidents on which the attempt has been made was yesterday, March 30, 1981, when Ronald Reagan was a President marked for assassination. There have been four Presidents killed by assassination: Abraham Lincoln in 1865, James A. Garfield in 1881, William McKinley in 1901, and John F. Kennedy in 1963.

There have been five Presidents who were marked for assassination but who were not struck or survived. There were two attempts on the life of President Gerald Ford, in 1975. There was an attempt on the life of Harry S. Truman in 1950, there was the attempt on President-elect Franklin Roosevelt in 1933. The attempt on the life of President Theodore Roosevelt, who was a candidate for a third term in 1912.

As I earlier indicated, Andrew Jackson was the first President on whose life an assassination attempt was made. That was in 1835.

I add also, Mr. President, that at least

two additional Presidential candidates were marked for assassination: Robert F. Kennedy, shot and killed in 1968. George Wallace, shot in 1972, survived and today is living, paralyzed in his body from the waist down. Our attention to this subject today, in my judgment, is entirely appropriate.

As I said in my statement, President Reagan is our national leader, and we pray for his recovery as we pray for the recovery of those who were injured with him in this deplorable incident.

It is deplorable. I do not know what the answers are in a society where we do not live straitjacketed as, perhaps, citizens do under other ideologies.

But I think that we must, at a time like this, not only remember this particular incident but, insofar as possible, direct our thoughts to the very body politic of the Republic, to the life of the Nation itself and to the American people. We must be conscious that we are a people under God and that we try, increasingly, as best humans can try, to live lives of understanding and peace in a world given to us by the Creator Himself.

AN EXPRESSION OF SORROW AND OUTRAGE

Mr. LEAHY. Mr. President, I shall take just a few minutes, first to applaud the statement by my distinguished colleague from West Virginia (Mr. RANDOLPH) and to concur in them totally.

Mr. President, I also commend to everybody, if they were not here, to read the prayers offered by the distinguished Senator from Missouri (Mr. DANFORTH) late yesterday afternoon.

I believe that the distinguished Senator from Missouri expressed very much the feeling of all of us on both sides of the aisle, of whatever denomination, in praying for the well-being of our President, for those gallant law-enforcement officers wounded in the protection of the President, and for the President's press secretary, Mr. Brady, who remains today still in very critical condition.

Mr. President, last night and again this morning, I talked with a number of people in my State of Vermont—members of my family, friends, advisers, neighbors, people who live near us in our home in Vermont, and so forth. The sense of outrage in the State of Vermont on the part of people I talked with was uniform. It made no difference to what political party they belonged to or even if they ever considered themselves as being a member of any political party. It made no difference among the Vermonters as to whom they voted for in last year's election. It was a uniform sense of outrage.

I believe that all Members of the Senate probably have had the same experience in the past few hours in talking with people from their States.

The President of the United States is the head of state, the head of our Government; he is our leader. In a 4-year period we have one President. Quite frankly, I say to my colleagues that I hope, for the good of our country, that we always have only one President during any 4-year period.

In this country, the oldest existing democracy in the world, we should always bring Presidents to office or have Presidents leave office by ballots, not by bullets.

It is with a deep sense of sorrow and outrage, as an American, as a Vermonter, as a Member of the U.S. Senate, that I see an action by which someone tries to change the course of our democracy, change the way our democracy is established, change the way our President is selected.

Mr. President, if such efforts were successful, if a government could be totally changed overnight or in a matter of moments by such an action, this country would quickly slide from democracy to anarchy. We can thank God, as many of us have, that this did not happen yesterday.

As Senator DANFORTH did yesterday, all of us should pray for the continued well-being of President Reagan. On behalf of myself and my family and the people of my State, we feel very thankful today that he is alive, that he is well and obviously is recovering rapidly.

I also pray that such things will not happen again. At the same time, I fear too much of that tradition is with us.

So, Mr. President, it is good to note that the country continues, our Government continues. It should be an immediate sign not only to people within our borders but also to those without our borders that when something like this happens, our Government coalesces, our people coalesce. We are ultimately not Republicans or Democrats; we are Americans.

Those of us who serve in the Government serve all the people of this country. Anyone who feels that the Government will fall or be irreparably altered by such action should take note of the fact that it is in times of crisis such as these that those of us within the Government show the utmost cohesion and the utmost efforts to maintain stability.

Mr. LEAHY. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. MURKOWSKI). The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DOMENICI. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF BUSINESS

Mr. DOMENICI. Mr. President, parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. DOMENICI. Would it now be in order for us to proceed with the Bradley amendment?

The PRESIDING OFFICER. It would be at the close of morning business.

A DAY TO REMAIN IN OUR MINDS

Mr. QUAYLE. Mr. President, yesterday was indeed a day which will remain in our minds for many years. For me it was a day which began on an even note, went through a deep trough of concern as events of the afternoon unfolded, and then ended on a high note as the medical reports were optimistic for the President's recovery, and the Hoosiers of Indiana won the NCAA tournament.

It is not, it seems to me, improper to talk of a basketball game at this time. For, in life, we learn that the bad is often balanced by the good. And the sour is offset by the sweet.

Indeed, the President's first public message after his successful surgery was: "I'd rather be in Philadelphia."

Coach Bobby Knight and his young team of basketball players brought a championship back home to Indiana last night. As they have throughout the NCAA tournament, they won by over 10 points. But this was not a team which sailed through an undefeated season. It was a team which came into the new year barely over the .500 mark. Despite that, Coach Knight took his team into the tough big ten season and came out as conference champions.

Overcoming adversity is one of the traits we most admire, Mr. President. This team and Bobby Knight has done that. Indiana is proud of him, his players, and our great university.

Now on to the more serious matter of the shooting yesterday afternoon.

Overnight I spent a great deal of time, as I am sure all of my colleagues did, thinking about what happened yesterday and why. It is easy to take this incident and misuse it to foster one particular belief or another. That would be, in my estimation, the very worst outcome.

Listen to the debate in this very Chamber, Mr. President. In using our oratorical skills, we tend to overstate. We tend to use the most dramatic phrases, and paint the most stark word pictures.

We use phrases like "eating out of garbage cans," and "wholesale murder of the unborn."

This is not limited to one side of the aisle or the other, nor is it limited to one particular issue.

Look back at the recent campaigns. We all are guilty of using intemperate language to draw a distinction between the good "us" and the bad "they."

Like lawyers in a courtroom, Mr. President, we use the words and pictures which are most likely to arouse emotions. We have seen, over the past few campaigns, the rise of "negative advertising," designed to tear down our opponent, or our opponents' ideas.

Lawyers, debaters, or—forgive me—actors, understand these "rules." How many times has each of us gone through a hard trial, or a tough negotiation, and adjourned, with our adversary, to the coffeeshop or the golf course.

Unfortunately, the jury, or the public, or, in some cases, the audience, does not understand the difference between "fiery rhetoric" and demogogy.

There are people in the country whose

minds are like Jello, and take on the shape of the mold into which they are put. They believe that we hate each other and take it upon themselves to avenge some imagined wrong.

Let us look to ourselves, Mr. President. Let us take upon ourselves some measure of responsibility for what happened yesterday.

It was not President Reagan, and Jim Brady, and two security persons, it was each of us and our staffs.

On a recent Sunday evening we were reminded of the words of the poet John Donne, when "Sixty Minutes" did a story on Ernest Hemingway.

The famous words by John Donne say:

Any man's death diminishes me, because I am involved in mankind; and therefore never send to know for whom the bell tolls; it tolls for thee.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

BUDGET RESOLUTION OF RECONCILIATION AND INSTRUCTION

The PRESIDING OFFICER. The clerk will report the pending business.

The legislative clerk read as follows:

A concurrent resolution (S. Con. Res. 9) revising the congressional budget for the United States Government for the fiscal years 1981, 1982, and 1983.

The Senate resumed consideration of the concurrent resolution.

Mr. DOMENICI. Mr. President, would the Chair inform the Senator from New Mexico how much time remains on the Bradley amendment and how much time I have in opposition?

The PRESIDING OFFICER. The Senator from New Jersey has 8 minutes; the Senator from New Mexico has 24 minutes.

Mr. DOMENICI. Mr. President, I suggest the absence of a quorum, and ask unanimous consent that the time be charged to the Senator from New Mexico.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. GORTON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GORTON. Mr. President, I yield 5 minutes to the Senator from Idaho.

The PRESIDING OFFICER. The Senator from Idaho.

AMENDMENT NO. 24

Mr. McCLURE. Mr. President, I thank the Senator for yielding.

Mr. President, I rise in opposition to the amendment offered by the Senator from New Jersey, not because I do not share the same objective that he does with respect to getting the oil put into the strategic reserve, but because of the same reasons outlined by the distinguished Senator from New Mexico, the chairman of the Budget Committee. This amendment, which is a $3 billion add on, would push the Senate over the figures set up in the President's budget message and if it passed it would be the first of what might become a string of amendments that would further break the budget, this one being the first to breach the budget targets.

For that reason I must reluctantly oppose it, not because I think it is easy for us to find the means by which we can reduce the expenditures of the Federal Government, but because I realize it is very difficult. It is much easier to add on than it is to balance the budget. It also is much easier to add on than it is to find an offset.

I am, like every other Member of this Senate, going to have to accept some reductions in programs that I have fought in the past years, that I have supported and still support, and that I believe in but I have to subordinate my other concerns now to a primary goal of reducing Federal expenditures.

There are three major crises that face this country today: one is energy; the other is military; and the third is economic. And this touches all three of those areas. It is necessary for us to have a strategic reserve in order to maintain the security of this Nation. It is necessary for us to have a strategic reserve to reduce the future potential economic impact upon this country by recognizing that it increases the economic impact upon the budget and, hence, in the short term, upon the economy.

And, finally, it is absolutely essential as a part of an overall energy strategy of developing our own resources so that we can reduce our dependence upon the imported oil, while at the same time reducing the capacity in the short term for massive dislocations in the economy and massive disruption of domestic and foreign policy because of immediate, very large-scale or total disruptions of oil supplies flowing to this country.

I do not know how we can best balance the conflicts that exist in finding solutions to these crises without recognizing that each exists, without saying in that context that certainly the strategic petroleum reserve is essential to all three. But in order to meet the other goals as well we must also find the budgetary offsets that are necessary to finance the acquisition as well as the construction of strategic reserves. That is where I must come down in the discussion of the amendment of the Senator from New Jersey.

I have pending a substitute which would call for the addition of the $3 billion for the strategic reserve, but it provides also for the offsetting reductions in the other items in the budget, save the military, which is not before us as the Senator from New Jersey pointed out yesterday, so we cannot touch it. It is not physically before us and, therefore, we cannot address it at this time.

Second, the substitute would exempt the national debt and the trust fund operations. Therefore, the impact by reductions would be as outlined in the substitute.

If the amendment of the Senator from New Jersey is adopted, it would be my intention to withdraw my substitute because the issue would have then been settled by the Senate.

In the event the amendment of the Senator from New Jersey is not adopted, it would be my intention to offer a perfecting amendment to the committee amendment which carries the substance of the substitute I have offered so that we could then vote upon that proposition and I would then withdraw the substitute so that we would not complicate the parliamentary situation.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. McCLURE. I thank the Senator for having yielded me time.

The PRESIDING OFFICER. Who yields time?

Mr. GORTON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DOMENICI. Mr. President. I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOMENICI. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator has 4 minutes remaining.

Mr. DOMENICI. Might I inquire of Senator BRADLEY, does he intend to use the remainder of his time?

Mr. BRADLEY. I intend to use some portion of the time remaining. I am prepared to use it at any time it is appropriate. I thought I would give the Senator his chance to make a case and then I would make my case.

Mr. DOMENICI. Mr. President, I yield myself 2 minutes.

I think the arguments on substance have all been made. The Senate should now understand that this is the second SPRO amendment. The one that failed rather heavily yesterday would have added $1.5 billion for SPRO by cutting the amount that the Committee on Energy and Resources would have to save.

This amendment would double that. This merely directs that they would save $3 billion less.

I would say to the Senate aside from the substantive arguments, and I have tried to make them, there are substantial moneys left for 1981 and 1982. In fact, there is enough left to continue the present rate of fuel clear through most of 1982. The Congress, the administration, and others in this country would have an adequate time to find out whether or not we could find a way to finance the reserve without ending up as we will if the Bradley amendment passes, by having put $14 billion into a strategic petroleum reserve and not yet have put real pressure on the private sector and the ingenuity of those who know how to finance it.

Aside from those substantive arguments, this amendment will make us $775 million over the package which the President presented. So while some amendments of a lesser quantity might

not break that package, this one will. This will make us $775 million over the package presented by the President.

I would say to my good friend from New Jersey, that technically, if he wants to take credit for the $500 million that Senator DOLE shifted from 1982 to 1981 in his amendment, then it would only be $275 million. But I choose to be practical in that respect. That is merely shifting and adds $500 million more to 1981, which we will have to do in a continuing resolution. So I think the essence of it is that it is about $775 million that we would now be over the President in terms of recommended savings.

I would hope the Senate considers the seriousness of this and that they do as they did yesterday, that they defeat the Bradley amendment. We should be giving Congress the opportunity to find another way, a better way, so we do not have to put valuable tax dollars into the ground when many people perceive this to be an alternative and we have not considered any other real alternatives.

I reserve the remainder of my time.

The PRESIDING OFFICER (Mr. ANDREWS). Who yields time?

The time in opposition to the amendment has expired. The Senator from New Jersey has 8 minutes remaining.

Mr. BRADLEY. Mr. President, the amendment before the Senate would reinstate $3 billion for the strategic petroleum reserve that the Senate Committee on the Budget removed, bringing the total figure to $3.8 billion,which is the exact total that the Reagan administration proposed for the strategic petroleum reserve. As I have said on the floor several times yesterday, and many times previously, there is no better way to spend an energy dollar than to buy a barrel of oil and put it into a reserve; there is no better way to spend a national security dollar, given our vulnerabilities and our dependence upon insecure sources of foreign oil, than to buy a barrel of oil and put it into the reserve.

Mr. President, the distinguished chairman of the Committee on the Budget has made an argument that I have heard before on this floor. It is an argument that I characterize as the "green-eyeshade approach" to our national security; that we are going to save a few dollars in budgetary terms this year or next, while continuing to expose ourselves to the very real possibility that we shall be totally unprepared to cushion our economy against the devastation that an oil-supply interruption would create.

Mr. President, this is a national security issue. If we had no oil, it would be difficult to mobilize our economy in a military emergency, and we might not be able to provide the military with sufficient oil.

Mr. President, the Budget Committee came in $2.3 billion under President Reagan's budget. The amendment that the Senator from Kansas offered, and that was adopted, as the Senator from New Mexico has pointed out, took us $500 million lower. What that means is that we are talking about going $200 million above the Reagan administration budget. Mr. President, that $200 million is, in some sense, a piddling sum compared to the $185 billion that we are going to spend on national defense this year. The rules regarding the reconciliation bill on the floor does not allow us to adjust the defense numbers. The defense numbers are not before us at this time. Therefore, the Senator from New Jersey is arguing that there is no better way to spend a national defense dollar than to buy oil and put it into a reserve, and he is unable to make that a reality by adjusting the defense numbers because he cannot get to them.

So I say to the Senate that $2.3 billion of this $3 billion would come from the difference between the Budget Committee figure and the Reagan administration figure. An additional $500 million is taken care of by Senator DOLE. The $200 million would come in the first budget resolution out of a defense budget of $185 billion.

Mr. President, if we cannot find $200 million out of a budget of $185 billion to assure full funding of the strategic petroleum reserve, then I raise a serious question as to how serious we consider the threat of an oil supply disruption to be.

Mr. President, we have heard arguments about other mechanisms to fund the strategic petroleum reserve. The fact is that there are none today. By refusing to spend this money to fill the reserve, we are saying, in effect, that we are not prepared and we refuse to take actions to prepare us to cushion our economy against an oil supply disruption.

Mr. President, as I have argued before on this floor and as I argue today, emergency preparedness is the lost child of energy policy; the fundamental component of emergency preparedness is the strategic petroleum reserve. This is our chance to address that component. There is sufficient cushion in the defense budget and in the numbers that were reported by the Budget Committee to allow for this $3 billion addition; the $3 billion is the exact request that was made by the Reagan administration when it sent its budget to Congress this year.

So, Mr. President, I argue that the Senate should adopt this amendment. It is in our national security interest; it is in our economic security interest; and it is time we stopped following the green-eyeshade approach to our national security on an issue that is a fundamental threat today to our continued health as a nation.

I reserve the remainder of my time.

● Mr. EAGLETON. Mr. President, while I have voted and will vote against amendments to restore funding, I agree that a strategic oil reserve is essential to the long-term security of this country. However, I believe the financing of the reserve can and should be managed without burden to the taxpayers. There are some who feel that such private financing is possible, but that it may take too long to negotiate.

I am not entirely unsympathetic to that argument nor to the case that some have made that the existence of an ample reserve could be essential to our military preparedness. While such an amendment may not be in order at this time, I would suggest that we consider the alternative of putting the costs of building the reserve under the Defense function at least until other means of financing it can be found. If national security is the pivotal argument in this matter, then let us deal with it directly by making the oil reserve a national security function.●

Mr. DOMENICI. Mr. President, I wonder now if the Senator from New Jersey would want to yield the remainder of his time so we can proceed with Senator MCCLURE's proposal? I say that if he needs some additional time, between Senator HOLLINGS and me, we shall certainly yield it off the resolution.

Mr. BRADLEY. Mr. President, I am prepared to yield back the remainder of my time if the Senator from New Mexico is also prepared to do that.

Mr. DOMENICI. Mr. President, my time has run out.

I suggest the absence of a quorum with the time being charged equally to both sides.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MCCLURE. Mr. President, I ask that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 30

(Purpose: To restore funding for the strategic petroleum reserve program)

Mr. MCCLURE. Mr. President, I ask unanimous consent that it may be in order for me to offer a perfecting amendment to the committee amendment at this time.

The PRESIDING OFFICER. Without objection, the amendment will be in order.

Mr. MCCLURE. Mr. President, I send the amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Idaho (Mr. MCCLURE) proposes an unprinted amendment numbered 30.

Mr. MCCLURE. Mr. President, I ask unanimous consent that further reading be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Page 6, line 10, strike all after the semicolon through the period on line 14 and insert in lieu thereof the following: "$714,000,000 in budget authority and $434,000,000 in outlays for fiscal year 1982; and $660,000,000 in budget authority and $669,000,000 in outlays for fiscal year 1983.".

Page 15, line 8, strike all after the semicolon through the period on line 11 and insert in lieu thereof the following: "$1,885,000,000 in budget authority and $1,118,000,000 in outlays for fiscal year 1982; and $2,251,000,000 in budget authority and $1,887,000,000 in outlays for fiscal year 1983.".

On page 21, after line 9 insert the following paragraph:

"(30) In addition to the actions required by subsections c(1) through c(29) each Committee of the Senate and House referred to therein shall report changes in laws within their respective jurisdictions sufficient to reduce budget authority by 1.5 percent for fiscal year 1982 and by 1.4 percent for fiscal year 1983; and to reduce outlays by .7 percent for fiscal year 1982 and .6 percent in fiscal year 1983; provided that no such Committee shall reduce budget authority or outlays in function 050; provided, further, that no Committee shall be required to reduce budget authority associated with revenues to trust funds, and, provided, further, that no Committee shall be required to reduce budget authority nor outlays associated with interest on the public debt.".

Mr. McCLURE. Mr. President, this is the amendment which we have had reference over the last 2 or 3 days. It is, in substance, the same as the substitute amendment which I offered and which is also pending at this time. It will be my intention, as I stated earlier——

Mr. DOMENICI. Mr. President, may we have order, please?

The PRESIDING OFFICER. The Senator from New Mexico makes a point. The Senate will be in order.

Mr. McCLURE. I thank the Chair. I thank the Senator from New Mexico.

Mr. President, in the event the Bradley amendment, when voted upon, is adopted, it will be my intention to withdraw both this amendment and the substitute which I offered earlier. In the event the Bradley amendment is not adopted, then it is my understanding, under the unanimous-consent agreement, that the vote on this amendment would follow the vote on the Bradley amendment.

At that time, it will be my intention to withdraw the substitute. This amendment has the same effect upon the budget as the substitute; it carries the same numbers. It is simply a different way of presenting my proposal to the Senate. It would be my intention to offer it in this form instead so as to avoid asking for a vote on the substitute which would complicate the parliamentary situation that would follow in the event that the substitute is adopted.

Mr. President, I think the issues involved in the amendment have been thoroughly discussed. It is simply a matter of adding $3 billion for financing the acquisition of oil for the strategic reserve with offsetting reductions in budget authority of 1.5 percent in 1982, 1.4 percent in 1983, and outlays of seven-tenths of 1 percent in 1982 and six-tenths of 1 percent in 1983 in all other programs save defense, trust fund operations, and national debt. It would not add or subtract from the total for the budget. It would leave it at exactly the same total but would shift funds from other programs into financing of SPRO.

Mr. DOMENICI. Mr. President, will the Senator yield?

Mr. McCLURE. I am happy to yield to the Senator from New Mexico.

Mr. DOMENICI. Mr. President, so that all understand—Senator BRADLEY is on the floor—the Bradley amendment would be voted on at 2 o'clock. That is pursuant to a previous order. In the event the Bradley amendment is adopted, I understand that Senator McCLURE——

Mr. McCLURE. It would be my intention to withdraw both this amendment and the substitute.

Mr. DOMENICI. In the event the Bradley amendment fails, it is my understanding that Senator McCLURE would want to proceed immediately to vote on the perfecting amendment which is presently before the Senate.

Mr McCLURE. The Senator is correct.

Mr. DOMENICI. And Senator McCLURE would withdraw his previous amendment, which was a substitute for the entire committee amendment.

Mr McCLURE. The Senator is correct.

Mr. BRADLEY. Mr. President, will the Senator yield?

Mr. DOMENICI. I yield.

Mr. BRADLEY. The first vote would come on the Bradley amendment, and the second vote, if there were a second vote, would come on the McClure amendment?

Mr. DOMENICI. The Senator is correct.

Mr. BRADLEY. Mr. President, will the Senator yield so that I can ask for the yeas and nays on my amendment?

Mr. DOMENICI. I yield.

The PRESIDING OFFICER. Is there objection to it being in order to request the yeas and nays at this time on the Bradley amendment? The Chair hears none, and it is so ordered.

Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. McCLURE. Mr. President, would it be in order at this time to ask unanimous consent that the ordering of the votes and the procedures that have been outlined with respect to the votes and the withdrawal of the amendment and substitutes be in order at this time?

The PRESIDING OFFICER. Will the Senator from Idaho restate his request?

Mr. McCLURE. Mr. President, I ask unanimous consent that following the disposition of the Bradley amendment, the vote then occur on the McClure amendment, unless the Bradley amendment has been adopted; that it be in order for me at that time to withdraw the McClure amendment if the Bradley amendment has been adopted, and that it be in order, following the disposition of those two amendments, for me to withdraw my substitute at that time.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

The Senator from New Mexico.

Mr. DOMENICI. Mr. President, I understood that the Senator from Alaska wanted to speak with respect to the Bradley amendment and the time expired. Does the Senator wish to speak now with respect to the Bradley amendment?

Mr. MURKOWSKI. Yes.

The PRESIDING OFFICER. Who yields time?

Mr. HOLLINGS. I yield to the Senator.

Mr. MURKOWSKI. I thank the Senator from South Carolina and the Senator from New Mexico.

The PRESIDING OFFICER. The Senator may proceed.

Mr. MURKOWSKI. Mr. President I wish to express my strong support for the amendment offered by the distinguished Senator from New Jersey (Mr. BRADLEY).

Yesterday, I voted for Senator STEVENS' amendment which would have restored $1.5 billion in budget authority for the strategic petroleum reserve. However, prior to that vote I expressed my preference for the full $3.8 billion as recommended by President Reagan for this program, which is so vital to our national security. Senator BRADLEY's amendment, now pending before the Senate, does in fact restore the full level of funding—$3.8 billion—for the strategic petroleum reserve as proposed in the Reagan budget for fiscal year 1982.

This amendment should be adopted because the strategic petroleum reserve is the best near-term, energy security program the Nation has. It is not in our interests to eliminate funding necessary to proceed to fill the reserve before Congress adopts an alternate financing plan to do the job. Despite the fact that Senator WARNER, chairman of the Subcommittee on Energy and Mineral Resources, has already begun hearings on alternative financing programs, it is very doubtful that Congress can develop, adopt, and put into place an alternative financing plan in the next few months.

That is why the Senate Energy Committee, by a vote of 19 to 1, adopted a motion offered by the chairman of the committee, Senator McCLURE, urging that President Reagan's full budget authority recommendation for the reserve be included in the reconciliation resolution. The previous administration received considerable and justified criticism for moving too slowly in filling this reserve. I believe we should support President Reagan's efforts to reverse this policy. Adoption of Senator BRADLEY's amendment will insure that the President's proposal to accelerate the filling of the reserve will go forward. Therefore, I urge the Senate to adopt this amendment.

Mr. DOMENICI. Mr. President, unless other Senators wish to speak in opposition to the McClure amendment, I want the Senate to know that I do not intend to take a great deal of time.

I say to the Senator from South Carolina (Mr. HOLLINGS) that it is my understanding that, pursuant to our agreement, the next amendment will be that of Senator MOYNIHAN.

Mr. HOLLINGS. The Senator from New York is coming to the floor.

Mr. DOMENICI. I hope he will agree to take up his amendment, even though other amendments are pending.

I yield myself 4 minutes.

Mr. President, the arguments have been made. The only difference between the McClure amendment and the Bradley amendment is that both would put back all the money for SPRO—all $3 billion.

Senator McCLURE would go back through the committee instructions and would pick up the $3 billion in additional cuts. There are some technical problems. Some trust funds are not cut because of the accounting.

Basically, if the committees think they have already taken a pretty good dose of

cuts, they should understand that in order to get SPRO under the McClure amendment, they are taking $3 billion more in cuts. Everyone should understand that. That is to be compared with the proposal by Senator BRADLEY, who would say that there should be no additional cuts—just put the $3 billion back.

Senator MCCLURE would do no violence to the present balance in terms of this package. It would remain intact. We still would be substantially under the President's figure. Senator MCCLURE would put full SPRO funding in but cut additional moneys by broadening the instruction to the various committees in a percentage manner by adding to what we already did.

With reference to Senator BRADLEY's proposal, it would just put the entire $3 billion back, without any cuts, which, for the first time, would make this package of reconciliation instruction cuts be less than the President's package by about $775 million.

So I hope that the Senate will defeat both amendments and will go on record instructing the committees of Congress that they should find an option, and find it quickly, to privately finance SPRO, find ways to ask the Finance Committee to have some tax incentives for the financing of SPRO, provide some latitude so that perhaps even the military might consider, in the next few weeks, whether they should bear some of the responsibility.

None of those options is precluded if the Budget Committee's instructions are complied with.

It just means we are really ratcheted down, and as to those who wish to find an option, we put them on strong notice that they better get with it and find a way.

Before I sit down, I wish to commend both Senators who have offered these amendments, because they have worked with us to present them in an orderly manner which every one can understand. They have agreed by unanimous consent to procedures designed to bring us to a vote right after 2 p.m. We will vote and finish the SPRO issue one way or another, and we desire to do this so we can move on to other things. But I do not think we have denied anyone a real opportunity to debate the issue.

Mr. President, I reserve the remainder of my time.

Mr. HOLLINGS. Mr. President, I yield to the Senator from New Jersey time from the resolution.

Mr. BRADLEY. Mr. President, for the benefit of Senators who are listening, I wish to be as clear as I can about the budgetary impact of the Bradley amendment.

I agree with the characterization that was made by the chairman of the Budget Committee about the amendment offered by the Senator from Idaho. The amendment offered by the Senator from New Jersey does not have an offset of $700 million, because the rules governing the reconciliation resolution do not allow us to take $700 million out of the $185 billion that we are spending on defense in 1982 and divert it to the strategic petroleum reserve.

So for those Senators who think that this is a vote to bust the budget, it is a vote to go above the figure only because we cannot get $700 million out of the defense function on this reconciliation resolution.

On the first concurrent budget resolution, we will have the opportunity, and it would be the intention, I think, of many Senators, to take some money from defense and divert it to the strategic petroleum reserve. This is because it is so clearly a national defense item and because the Budget Committee reported the reconciliation resolution $2.3 billion under the administration figure. We would be talking about taking only less than 1 percent, less than 0.5 percent of the defense function and shifting it to what is clearly a national security need, the continued fill of the strategic petroleum reserve.

So I simply wish to clarify for the Senate the reason that this amendment that I offer does not have that very careful balance, that very clear offset. It is because of the parliamentary position we find ourselves in, not because it is the intention of the Senator not to balance it when we move down the road of this legislative process to the first concurrent budget resolution.

Mr. STENNIS. Mr. President, will the Senator yield for one point?

Mr. BRADLEY. I yield.

Mr. STENNIS. Mr. President, as I understood the Senator, he says in future consideration of the budget it will be possible in the interest of this very item to reach over and make an adjustment, that it will be possible to make an adjustment out of the Department of Defense funds as a certainty. Now, the Senator is always careful and he is sound in what he says. He does not have any doubt about it being possible under another parliamentary situation?

Mr. BRADLEY. It is my understanding, I say to the distinguished Senator from Mississippi, that it would be possible because in the first concurrent budget resolution we would have defense authorization which we do not have in this reconciliation resolution.

Mr. STENNIS. I thank the Senator That is a good point.

Mr. McCLURE. Mr. President, I yield myself such time as I may consume.

Mr. President, the Senator from New Jersey said do not worry about cutting now; we will cut later. That is always the seductive notion, and for any other budget add-on the same thing can be argued: Do not worry about how much we add to the budget now. We will cut it later. We will take it out of something else. We will take it out of defense later. We will take it out of entitlements later. We will take it out of something else later.

But the fundamental point I wish to make regarding his statement that it will be less than 1 percent of the defense budget to accommodate this increase. But that is an increase over the President's budget submission of $775 million, not an increase of $3 billion.

My amendment takes out less than 1 percent, in order to balance now, not later. That seems to me to be the essential difference.

Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. BRADLEY. Mr. President, I am prepared to yield back my time.

The PRESIDING OFFICER. Does the Senator from South Carolina yield time?

Mr. HOLLINGS. I yield time.

Mr. BRADLEY. Mr. President, I am prepared to yield the remainder of my time back with one last statement.

The issue is not when to cut the budget. The issue is when we find a way to fill the reserve. The opponents of both the Senator from Idaho and the Senator from New Jersey say do not worry, we will find a way to fill it later. I do not think we can wait to find a mechanism to fill later. We have to fill now, we have to keep the mechanism we have now until another is in place, and we have to begin with this amendment.

Mr. McCLURE. Mr. President, I am prepared to yield back the remainder of my time, and I agree with the Senator from New Jersey. It is not a question fill later. It is a question of fill now.

My amendment would do the same thing, but it would also balance now as well as fill now. Fill now and pay now.

I thank the Senator.

Mr. BRADLEY. Mr. President, I am prepared to yield back my time.

Mr. McCLURE. I am prepared to yield back the remainder of my time on the amendment.

Mr. BRADLEY. Mr. President, I yield back the remainder of my time.

Mr. McCLURE. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. The Senator from New Jersey yields back his time.

All time is yielded back.

The Senator from South Carolina.

Mr. HOLLINGS. Mr. President, the distinguished Senator from New York is next in line with his amendment.

I suggest the absence of a quorum, and ask unanimous consent that the time be taken from both sides.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I ask the distinguished manager of the resolution if he will yield me 3 minutes off the resolution to speak on another subject?

Mr. DOMENICI. Mr. President, I am pleased to yield to the majority leader.

Mr. BAKER. Mr. President, I thank the distinguished manager of the resolution.

REPORT ON THE PRESIDENT'S CONDITION

Mr. BAKER. Mr. President, I take this opportunity to report that this morning

at 10 a.m. I attended a joint leadership meeting at the White House where the Vice President and members of the President's Cabinet gave us a full account of the tragic events of the past 24 hours.

The high point of that report, and certainly the happiest aspect of it, was that the President is well, that he went through surgery without complication, and that he is fully alert and aware today. In my view, President Reagan probably survived that surgery better than many of us in that room could have.

I am pleased to say he is doing well, and I wish to convey that information to my colleagues in the Senate.

Later this morning the Vice President of the United States paid us a visit here, after having first visited with the President at the hospital. The Vice President related to me and authorized me to convey to the Members of the Senate that the President was very alert and very well. The Vice President asked that the Senate and the people of the country be reassured that the President will recover, and that he is fully capable of discharging his duties and responsibilities as President.

The Vice President promised to keep the Senate fully informed of further developments in connection with the President's health.

Mr. President, the report with respect to the health of Jim Brady, the President's Press Secretary, is not as favorable. Mr. Brady is alive. He survived surgery better than many had expected. He appears to be at least semiresponsive to outside stimulus. His doctors put it this way: Jim Brady is better off today than any of us thought he would be last night. I take that to be a distinctly encouraging sign.

Mr. President, also, the Secret Service agent is doing well. His injuries were more severe than those of the President, but he has survived surgery and is well on the road to recovery. If one person is to be singled out as a genuine hero in this unfortunate situation, it may very well be Tim McCarthy, the Secret Service agent who apparently dove directly in front of the gunman to protect the President from another gunshot wound.

The District of Columbia police officer has not undergone surgery or had not a few moments ago. His condition is reported as being stable. The outlook, of course, cannot be fully determined until further tests and possibly surgery are completed.

Mr. President, I will make additional reports as the information becomes available to me.

I thank the Senator for yielding.

ORDER OF BUSINESS

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. DOMENICI. Mr. President, while we are waiting for the distinguished Senator from New York I suggest the absence of a quorum with time to be divided equally.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. MOYNIHAN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MOYNIHAN. Mr. President, before proceeding to the subject at hand, I wonder if I might take just a moment of the Senate's time——

The PRESIDING OFFICER. Who yields time?

Mr. HOLLINGS. I yield time for the Senator's amendment.

The PRESIDING OFFICER. The Senator from South Carolina yields time.

THE PRESIDENT'S CONDITION

Mr. MOYNIHAN. Mr. President, I simply wish to express what I know would be the great relief and pride which we feel in the report of the majority leader that the President of the United States has conducted himself with valor and grace in this moment that, in a way, is surely an example to us all.

Our prayers continue for Mr. Brady and for the two brave men who were also shot on this occasion.

I wish to note, Mr. President, that many persons have commented on how frequently these events take place in the United States, and they do. But it also might be observed that in this most recent espisode, as in the one 18 years ago when President Kennedy was shot, the U.S. Government did not so much as wobble the least bit. The stability of our system is a rock.

This is the oldest constitutional government on Earth. It has its shocks, but it withstands them as no such system ever in history has done.

If you were to make a list of the nations of the world, Mr. President, which both existed in 1914 and have not had their form of government changed by force since, I think you would find the number comes to seven.

Assault can be made upon our leaders, we know, but the stability of our system is incomparable in the world today, and the world should take note of that.

BUDGET RESOLUTION OF RECONCILIATION AND INSTRUCTION

The Senate continued consideration of the concurrent resolution.

Mr. MOYNIHAN. Mr. President, I now send to the desk three amendments for the purpose of adding $735 million for elementary, secondary, and higher education programs under the jurisdiction of the Committee on Labor and Human Resources. I will ask that they be considered in sequence, the first being that of the Pell grants, as we have come to know them, named after our distinguished former chairman; the second, funding of student loans; and, finally, title I of the Elementary and Secondary Education Act of 1965, as amended.

Mr. DOMENICI. Mr. President, reserving the right to object.

The PRESIDING OFFICER. The Senator from New Mexico reserves the right to object.

Mr. DOMENICI. I do not know whether I am going to object or not, but I say to my good friend from New York we have to take a look at these amendments. We have not seen them. Can the Senator permit us to review those? We need some unanimous consents in any event. I do not believe the amendments are in order at this point. I am not disposed to talk about parliamentary matters, but I wonder if the Senator would agree to let us look at these amendments.

The PRESIDING OFFICER. Will the Senator from New York withhold his request while the Senator from New Mexico looks at the amendment?

Mr. MOYNIHAN. The Senator from New York is happy to do so.

Mr. DOMENICI. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. MOYNIHAN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MOYNIHAN. Mr. President, I have at the desk three amendments which I will ask to be considered en bloc, and ask unanimous consent that two of them be voted on in the sequence that has been established to begin at 2 o'clock. If they could be voted on in the sequence now being established, I should consider it a courtesy of the distinguished chairman of the committee.

I might state that after a colloquy with the distinguished senior Senator from Vermont, Senator STAFFORD, I may propose to withdraw the amendment on guaranteed student loans.

The PRESIDING OFFICER (Mr. KASTEN). Is there objection?

Mr. DOMENICI. Reserving the right to object, Mr. President, it is my understanding then that the Senator has sent three amendments to the desk, that he is requesting that it be in order to submit the three, and that we will vote on them in a divided manner, with the Pell grant amendment first, the elementary and secondary amendment following that, and that, after a colloquy, the student loan amendment would be withdrawn.

Mr. MOYNIHAN. That is my expectation, exactly as the chairman stated it.

Mr. DOMENICI. Does the unanimous-consent request include that the two amendments which we are going to now agree will be voted on will be voted on after we have disposed of the pending SPRO amendments which we will start voting on at 2 o'clock?

Mr. MOYNIHAN. That is correct. That would be our wish.

Mr. RANDOLPH addressed the Chair.

Mr. DOMENICI. I will yield in just 1 minute to the distinguished Senator from West Virginia.

Would the Senator be prepared to tell us how long he might want on these amendments? We do start voting at 2

o'clock. I would hope that the Senator could agree that we would be through with debate on these three amendments by 2 o'clock. Technically, you would have an extra half hour, I guess, if you wanted to separate them.

Mr. MOYNIHAN. Most assuredly it is not by expectation that we would require more than an hour on this side.

If I could have an agreement that we would have an hour divided into three segments of 20 minutes, I would think that adequate to our purposes.

Mr. DOMENICI. And an equal amount of time on this side?

Mr. MOYNIHAN. Of course.

Mr. DOMENICI. I would have no objection to include that in the unanimous-consent request.

Mr. MOYNIHAN. Would the Chair so do?

Mr. DOMENICI. The Senator from West Virginia sought recognition.

Mr. CHAFEE. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. CHAFEE. As I understand the procedure here, we are alternating back and forth. If the Senator from New York proceeds with this division, does that mean he has two bites at the apple on his side and then we come back for two here, or how does that work?

The PRESIDING OFFICER. The arrangement at this point is informal. There is no specific recognition back and forth, one way or the other. It is being worked out amendment by amendment. There is no specific order in terms of who gets which bite at which apple at which time.

Mr. DOMENICI. I would say I do not think that is a parliamentary inquiry, but rather one of accommodation.

Mr. CHAFEE. I will address it to the accommodators.

Mr. HOLLINGS. It is an amendment a side. But in this particular instance, the Senator from New York was prepared to present the one amendment and it was easily divisible, so he has now divided it to forgo the parliamentary maneuvering around to divide it. But if the Senator wants to be totally accurate, he could only present one amendment at a time.

Mr. CHAFEE. That is quite all right. Then we will come back on this side.

Mr. HOLLINGS. That is correct.

The PRESIDING OFFICER. Is there objection to the request of the Senator from New York?

Mr. RANDOLPH. Mr. President, reserving the right to object.

The PRESIDING OFFICER. The Senator from West Virginia.

Mr. RANDOLPH. Mr. President, I want to be very certain about that part of the subject matter, which arrangement we had made prior to coming into the Chamber just now, which would relate to the guaranteed student loans. I will have the RECORD show at this point exactly why that is not being considered. I understood, as I listened, that it was to be withdrawn, but I had no information as I came into the Chamber that that was to be done.

Mr. MOYNIHAN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. Does the Senator from South Carolina yield time for that purpose?

Mr. HOLLINGS. Yes.

Mr. DOMENICI. We can divide the time equally.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. MOYNIHAN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MOYNIHAN. Mr. President, I have a unanimous-consent request at the desk. Has it been agreed to?

The PRESIDING OFFICER. The request of the Senator from New York for unanimous consent to grouping three amendments en bloc is still pending.

Is there objection to the unanimous-consent request of the Senator from New York?

Without objection, it is ordered.

Mr. MOYNIHAN. I thank the Chair.

UP AMENDMENTS NOS. 31, 32, AND 33

The PRESIDING OFFICER. The amendments will be stated.

The assistant legislative clerk read as follows:

The Senator from New York (Mr. MOYNIHAN), on behalf of himself and Mr. SARBANES, proposes en bloc unprinted amendments numbered 31, 32, and 33.

The amendments are as follow:

On page 2, beginning with "$14,667,000,000" in line 14, strike out through "$47,694,000,000" in line 20, and insert in lieu thereof the following: "$14,537,000,000, and outlays by $2,340,000,000 in fiscal year 1981; to reduce budget authority by $52,675,000,000, and outlays by $36,845,000,000, in fiscal year 1982; and to reduce budget authority by $59,058,000,000, and outlays by $47,554,000,000".

On page 10, beginning with "$2,388,000,000" in line 5, strike out through "$10,913,000,000" in line 9 and insert in lieu thereof the following: "$2,258,000,000 in budget authority and $401,000,000 in outlays for fiscal year 1981; $10,153,000,000 in budget authority and $7,828,000,000 in outlays for fiscal year 1982; and $12,193,000,000 in budget authority and $10,773,000,000".

On page 2, beginning with "$14,667,000,000" in line 14, strike out through "$47,694,000,000" in line 20, and insert in lieu thereof the following: "$14,667,000,000, and outlays by $2,353,000,000, in fiscal year 1981; to reduce budget authority by $52,555,000,000, and outlays by $36,745,000,000 in fiscal year 1982; and to reduce budget authority by $58,653,000,000, and outlays by $47,194,000,000".

On page 9, beginning with "$658,000,000" in line 20, strike out through "$1,495,000,000" in line 22 and insert in lieu thereof the following:

"$388,000,000 and outlays by $422,000,000 in fiscal year 1982; and to reduce budget authority by $1,026,000,000 and outlays by $995,000,000".

On page 2, beginning with "$14,667,000,000" in line 14, strike out through "$47,694,000,000" in line 20, and insert in lieu thereof the following: "$14,167,000,000, and outlays by $2,303,000,000 in fiscal year 1981; to reduce budget authority by $52,225,000,000, and outlays by $36,510,000,000, in fiscal year 1982; and to reduce budget authority by $58,528,000,000, and outlays by $47,094,000,000".

On page 2, line 24, strike out "$13,300,000,000" through "$1,800,000,000" on line 1 page 3 and insert in lieu thereof the following: "$12,800,000,000 in budget authority and $1,450,000,000 in outlays for fiscal year 1981; by $2,850,000,000 in outlays for fiscal year 1982; and $1,700,000,000".

On page 10, beginning with "$2,388,000,000" in line 5, strike out through "$10,913,000,000" in line 9 and insert in lieu thereof the following: "$1,388,000,000 in budget authority and $364,000,000 in outlays for fiscal year 1981; $9,703,000,000 in budget authority and $7,493,000,000 in outlays for fiscal year 1982; and $11,933,000,000 in budget authority and $10,313,000,000".

The PRESIDING OFFICER (Mr. COHEN). The Senator from New York.

Mr. MOYNIHAN. Mr. President, I will speak briefly at the outset to say that these are three measures of which colleagues will be speaking.

In the order that we will consider them, they are an increase of $100 million in the outlays in fiscal 1982 for the Pell grants, the grants to needy students in higher education, named after the distinguished Senator from Rhode Island who has done much to create this program.

Next, we will discuss the guaranteed student loan program, a proposal adding $200 million in 1982.

Finally, there is a proposal to increase by $435 million the title I programs, as they are known, of the Elementary-Secondary Education Act of 1965.

Mr. President, at this point I will confine my remarks to saying that I have had a personal involvement in each of these programs. In the summer of 1964, I was instrumental in negotiating the agreements that led to the plank in the 1964 Democratic platform on Federal aid to education, which led in the following March to the final, great breakthrough in legislation, the Elementary and Secondary Education Act.

It fell to me to draft the Presidential message which proposed the program we now know as Pell grants, and in this body I have participated in the extension of the loan agreements beginning in the mid-1960's, through the enactment of the Middle Income Student Assistance Act of 1978.

Mr. President, I propose that we first discuss Pell grants and then guaranteed student loans, without animus and with a sense of the somber time in which we raise these matters in Washington.

I simply draw attention to a statement by an administration official who was quoted in the New York Times of February 22 as saying:

We are trying to avoid saying that we are eliminating the Middle-Income Student Assistance Act, but that is what we are doing.

Mr. President, this would be an extraordinary event. There are 2.7 million students receiving Pell grants this year. There are 3.4 million students receiving guaranteed loans.

The Budget Committee actions have cut 600,000 persons from the Pell grants and 1.4 million from the loan program, almost cutting that program in half.

I repeat that the decision this body seems to be making is in conformity with the statement of the administration official who said:

> We are trying to avoid saying that we are eliminating the Middle-Income Student Assistance Act, but that is what we are doing.

Mr. President, it is very much the wish on this side of the aisle that we not do that, and that is why we have submitted these three amendments for the consideration of the Senate.

I see that the distinguished ranking minority member of the committee is in the Chamber. Not since the beginning of the Fulbright grants program has a Member of this body so illumed the world of higher education. In generations hence, I say to the Senator from Rhode Island, his grandchildren will be thanked by the children of persons who got their start in life through a Pell grant.

I wonder whether the Senator from Rhode Island wishes to speak at this time.

Mr. PELL. Mr. President, I thank my friend and colleague from New York for his exceedingly generous remarks, which I appreciate from the bottom of my heart.

Mr. President, I am proud to be a cosponsor of these education amendments. I wish we could offer amendments that would represent smaller cuts in education, for in my opinion investments in education are the soundest investments this Nation can make. However, although I wish we could go further, these amendments are a step in the right direction.

I think we should all consider very seriously what we are doing today. If we accept the recommendations of the Budget Committee, we will be backing away from one of the great traditions of our Nation, the support of education.

We all realize that we are confronted by a crisis. But, never recall before that, in a time of crisis, we have turned our backs on education. Instead, we have embraced education, and encouraged it by our support to help us meet the challenge. The Morrill Land Grant College Act of 1862 was in response to a national need for training in agriculture and the mechanical arts. The National Defense Education Act of 1958 was in response to the space crisis that confronted this Nation.

The Elementary and Secondary Education Act of 1965 was in response to the cries of many of our citizens for adequate educational services. And when it became virtually impossible for many American families to finance a college education for their children, we enacted the Middle-Income Student Assistance Act.

Now, the Budget Committee is asking us to retreat from tradition and establish the dangerous precedent of short changing education. I do not accept that.

Mr. President, these education amendments we are considering are modest amendments. They do not represent program expansion. In fact, they require program cuts. But they are carefully considered cuts, not across-the-board slashes as required by the Budget Committee.

What these amendments would do, if adopted, would be to reduce educational spending in these areas by approximately 12 percent. This is the figure that was recommended to the Budget Committee by the Committee on Labor and Human Resources, the authorizing committee for education programs. That 12 percent cut figure was arrived at unanimously by the Labor and Human Resources Committee, after a careful examination of programs within that committee's jurisdiction. That examination considered what level of cuts in education this Nation could safely endure. And 12 percent was that level.

I should point out to my colleagues that 12 percent was not the Democratic preference. We preferred smaller cuts. But this was the figure that was presented to us by our Education Subcommittee Chairman, Senator STAFFORD, and it was in his opinion the bottom line in cuts that we could accept.

We agreed a little over 2 weeks ago that 12 percent was all the cuts that education could safely accommodate. Nothing has happened in the past 2 weeks to cause me to change my opinion.

No one likes to cut programs, Mr. President, particularly education programs. But our authorizing committee decided that education had to take its fair share of the cuts. But 20 to 25 percent, as proposed by the Budget Committee, is not a fair share. It is a meat-ax approach to budget making, not the fine surgeon's scalpel that these programs so desperately need. Our authorizing committee took that surgeon's approach and recommended education cuts of 12 percent. These education amendments we are about to consider would get us back to that level.

Specifically, these amendments would reduce the cuts recommended by the Budget Committee in title I of the Elementary and Secondary Education Act and in Federal student assistance programs.

Without this amendment on title I, we will be telling 1.3 million children to look elsewhere for remedial educational services. They had to look to the Federal Government in the first place because their needs were being unserved. Now, if the Federal Government is not there, where will these young people turn? Who will provide these 1.3 million young Americans with basic skills instruction? Title I works.

Studies prove that it is one of the most successful Federal education programs. It helps poor youngsters develop the skills that they need to become a part of the educational mainstream. It is the type of program that deserves our support, and the title I amendment will provide that support.

And when we consider the future of this Nation, it lies in an educated and informed citizenry, and who can provide that better than our current and future college students.

Yet, the cuts in student aid programs proposed by the Budget Committee would cause 500,000 to 750,000 young people either to drop out of college or decide not to attend college. Can any nation afford this loss of talent? Can any nation be secure internationally if it loses such a large number of future scholars?

And with these student aid cuts, many colleges will be forced to close their doors, because they will not have the students or the funds to continue. Can we afford to lose even a small number of institutions of higher education, those seats of learning and wisdom that have made this country great?

The student aid amendments that will be offered today will indicate to all that we still care about higher education, and that we are not ready to abandon our leaders of tomorrow.

Mr. President, what we are doing today will affect our Nation's future. If we accept the recommendations of the Budget Committee, we will be condemning a large number of our citizens to a life without learning. In my opinion, this is the worst action that any nation can take.

The amendments before us are reasonable ones. Although they cut programs, they do it with care and selectivity. I would urge my colleagues to adopt them.

With respect to the basic grants, the Pell grants, they presently provide from $200 to $1,750 to college students, based on need. It is a sound investment in the future of our Nation and helps the students to go to the college of their choice.

Until this program was enacted, the aid went to the colleges. Now the aid goes to the student, and he carries it piggyback to the college he wishes to attend. It has become the very foundation of a youngster's means of getting a college education.

Presently, it helps 2.7 million youngsters in this regard, and the cutback proposed by the administration would knock 190,000 private college students out of the program and 410,000 public college students out of the program. A total of 600,000 students would be knocked out of the program.

What we are proposing at this point is an amendment that would restore $100 million. This would mean that instead of 2.1 million people served, 2.7 million people would be served, or 600,000 more people would be served than under the Budget Committee's recommendation. The total expenditure would amount to $2,586,000,000 instead of $2,486,000,000 as proposed by the President and the Budget Committee.

I cannot imagine a better investment in the security and the wealth of our Nation. We talk a great deal about security. What is security? Is it a Maginot line, with a great, steel boundary around ourselves, or is it, rather, a strong, well educated, healthy, vigorous people? I maintain that it is the latter.

The real strength of our Nation is the sum total of the education and the character of our people. We should bear this in mind. This is far more important. Unless we have people who can man the weapons, man the barricades, man the factories, and run our country, we are nowhere near as secure as we should be.

Mr. KENNEDY. Mr. President, will the Senator from New York yield me 3 or 4 minutes?

Mr. MOYNIHAN. I am most happy to yield to the Senator from Massachusetts.

The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. KENNEDY. Mr President, I join the Senator from New York (Mr. MOYNIHAN) as well as the ranking minority member of the Education Committee, the former chairman of the Education Committee, Senator PELL, in urging the Senate to accept these three amendments. At a later time, I know that an additional amendment will be offered affecting vocational education, on which I hope the Senate will respond positively.

One of the matters which is of concern to all of us is the issue of the quality of education in the public school systems of this country.

As a member of the Education Committee and one who has followed all of these programs closely, I think we can say without fear of contradiction that one of the most effective programs in the field of education that we have adopted in equipping the young children of this country with the basic fundamentals of education, in reading and writing and basic skills, has been the title I education program.

It has made a significant difference in equipping young, needy, disadvantaged children in fundamental and basic skills.

Mr. President, I am pleased to support my distinguished colleague from the State of New York, Mr. MOYNIHAN, in this amendment. We are proposing to restore $435 million for title I compensatory education.

Let me hasten to state, that this is not a partisan Democratic effort dealing with partisan programs. The title I compensatory education program, which would receive the bulk of additional funding, has had the bipartisan support of the Congress for a decade or more.

Its benefits to children are clear and its support from every sector of the education community complete. It is endorsed by parents, by classroom teachers, and by school principals and superintendents.

This Federal education program brings extra help in the teaching of basic skills to those children with the greatest need, children from the most disadvantaged economic backgrounds.

I ask my colleagues to ask themselves whether it makes economic sense to force 1.8 million children from this program. Denying the teachers and aides needed to offer special reading and math services means that we will be increasing the likelihood that these children will fail in school. They will drop further behind in reading and math each year and finally they will increase the numbers of those who drop out of school entirely.

The costs to our society should not be ignored. We will have lost vital human resources that no society and no economy can afford. We will be adding to the percentage of illiteracy, the numbers of young men and women without basic skills to compete for jobs and ultimately to the numbers of those dependent on welfare.

If the mail of my colleagues matches my own, it includes testimony from parents and teachers of the success of these programs. These are parents talking about their children who are reading at close to their grade level after receiving these special kinds of aid and assistance.

Mrs. Raymond Bednarz from Wilbraham, Mass., wrote to me, saying—

> As a parent of a child, who has greatly benefited from this project, I just felt I must write and ask you to please do everything in your power to see that title I funds are continued in our state. Our grant is not a large one, but so much is done with so little for so many children.

Her 11-year-old daughter was found in the second grade to have a reading problem. With the help provided by title I through special teachers she overcame that problem and is now reading at her appropriate sixth-grade level.

Mr. and Mrs. Robert Rushford wrote to me from Millers Fall, Mass.:

> My daughter, Krista, attended title I classes for 2 years and . . . has grown out of the program and up to the level with her class. That couldn't have been accomplished without title I.

I also think it is worth noting that while our concern is for the students and children, these reductions will force some 64,000 teachers onto the jobless polls. Among them will be those with the special reading and math teaching skills that are vital to reach children with particular needs.

It may be worth recalling that the initial purpose of title I when enacted was "in recognition of the special education needs of children of low-income families and the impact that concentrations of low-income families have on the ability of local educational agencies to support adequate education programs."

The special education needs of these children continue to exist. The concentrations of low-income families continue to exist. And local educational agencies still need the added Federal assistance to permit these services to be offered.

I would hope that my colleagues would recognize that the proposed level of funding for title I after this amendment is adopted still will not restore funding to the full fiscal year 1981 level. Because of the impact of inflation some children still will be forced to forego the needed services. But 1.3 million more children would be served than under the budget committee.

The devastating reduction accepted in the Budget Committee resolution does not reveal the individual tragedies of children left behind and they surely do not take into account the future economic loss when these children fail to obtain the skills needed to become productive members of this society.

I strongly urge that this amendment be adopted.

Second, I associate myself with the statements and the comments that have been made by the Senator from New York and the Senator from Rhode Island with regard to the Pell grants. They are targeted into the neediest young people in our society who have skills and talents, who meet the educational standards of our great universities, and are only lacking in the financial ability to go to the schools and colleges in this Nation.

Mr. President, this amendment by the distinguished Senator from New York would restore approximately $100 million to the basic educational opportunity grant program the Pell grants named for the distinguished Senator from Rhode Island.

Under the amendment, the level of funding for this program will still be below the $2.7 billion level in fiscal year 1981. Its impact however, would be to enable some 400,000 students to retain their opportunity for a college education.

The Budget Committee recommendation would mean that an estimated 600,000 fewer students than a year ago would be eligible to receive these grants.

The proposed level of funding would permit 400,000 of those students to continue in school. It would also mean that the average grant would be slightly higher than under the Budget Committee level.

We are discussing the fundamental student aid program to prevent inadequate income from barring youngsters from entering college. Every study has shown that the BEOG program has broken down past barriers to college education for low and working class youngsters.

It makes absolutely no sense to turn away from the continuing need for student assistance at a time when educational costs are skyrocketing.

If we do not adopt this amendment, then we are willing to see 400,000 youngsters unable to attend higher education. These are the youngsters with the least ability to obtain a student loan or other financial help. And they are the ones attending the lowest cost institutions.

Even with this amendment, students will be receiving lower average grants than a year ago.

For the Nation's economy, it means accepting that several hundred thousand young people will be unable to acquire the college training they need to compete more effectively and to contribute more productively to our economy throughout their lives.

There will be a significant reduction unless this amendment is accepted of the number of young, talented individuals in our society, young men and women who met all of these standards and who have the capability of attending universities but will be denied the opportunity to do so.

The Pell grants are targeted into the neediest children, the sons and daughters of individuals in our society who lack financial support to send their children on to the schools and colleges.

Then the third amendment is the guaranteed student loan program which I think all of us understand has been so immensely successful in providing needed financial resources to young people from

working class backgrounds. These funds are paid back as these young people take their place in our economy.

Mr. President, the third amendment introduced by my distinguished colleague, the Senator from New York, would restore $200 million to the guaranteed student loan program.

Even with this amendment we will be spending $200 million less under the recommendations of the Senate Labor and Human Resources Committee than was spent in fiscal year 1981.

The present amendment would have the effect of permitting the Government to continue the in-school interest subsidy for GSL recipients and thereby avoid losing an estimated 500,000 students from this program.

The chairman of the board of the American Council on Education testified that the reductions in the guaranteed student loans recommended by the administration would be "devastating."

Dr. E. K. Fretwell, who also is chancellor of the University of North Carolina, told us that the GSL restrictions would force hundreds of thousands of young people to drop out of school.

In my own State of Massachusetts, these changes are estimated to force 20,000 students to halt their education.

At the very least, I would hope that this amendment to restore only $200 million by retaining the in-school interest subsidy would be adopted. It is one of the critical factors, not only in permitting hard-pressed students to attend college, but lenders to participate in the GSL program at all. I understand that we may receive a commitment that the in-school subsidy will be retained and I am pleased that is the case.

So I am very hopeful that these three amendments will be accepted by the Senate. Unless adopted, it will mean that many young people will fail in school and many others would lose their chance to go on to college.

I join in urging my colleagues to accept all three of these amendments.

Mr. MOYNIHAN. Mr. President, I thank the distinguished Senator from Massachusetts who has unfailingly in his career in this body supported these programs. We are talking about one of the great achievements of American Government in this last generation. After two generations of debate, finally, in 1965, the Federal Government undertook to provide aid to public education at the elementary and secondary levels.

Suddenly that principle is under assault. This is not massive aid. It comes to only 9 percent of the total education costs of the Nation.

We went on in the same decade to state our real commitment to enable every person in the country who wishes to go to college to do so. These programs culminated in the Middle Income Student Assistance Act, and yet only last month on February 22 an official of the administration told the New York Times:

> We are trying to avoid saying that we are eliminating the Middle Income Student Assistance Act, but that is what we are doing.

I do not think that is what this Chamber wants done.

Mr. KENNEDY. Mr. President, will the Senator yield for a question?

Mr. MOYNIHAN. I am happy to yield.

Mr. KENNEDY. I am sure the Senator from New York understands that a number of recommendations will be made by the administration to reindustrialize America, to modernize America, and to put America back to work.

Would the Senator from New York agree with me that certainly one of the best investments that we could possibly make is to train the young minds of this country. If we really fail to meet that responsibility to assure that these young people are going to acquire modern skills then we are really failing in a basic aspect of the reindustrialization, and modernization of America and in putting America back to work?

Mr. MOYNIHAN. It would be self-evident. We are not going to put people back to work hoeing potatoes or milking cows with their own hands or making bricks and baking them in the sun in the manner of the preindustrial economy. We have to have a postindustrial economy and that will not be done by taking the most sensitive area of education, which is our poor students. It is an ironclad law until these things came we could predict the education achievement of any child just by knowing the occupation of his parents. Title I broke that lockstep. This present budget proposal cuts the number of children in title I almost in half, the most vulnerable students in our school system, the ones we made a solemn commitment to 15 years ago, a commitment it is suggested we should now back away from. I cannot conceive we want to do this.

Mr. KENNEDY. I thank the Senator.

Mr. MOYNIHAN. To the Senator from Maryland I am happy to yield such time as he may wish.

Mr. SARBANES. I thank the Senator from New York for yielding.

I am pleased to join with him in cosponsoring this amendment to restore funds to some of the education programs that the administration has recommended cutting. I commend him on presenting it to the Senate.

Mr. President, what is at issue here is whether the Nation is going to realize the enormous potential that exists in this country for the development of our human resources.

The three programs to which the Senator's amendments are directed, title I of the Elementary and Secondary Education Act, the Pell grant, the guaranteed student loan program, go right to the heart of the question of whether our young people are going to have the opportunity for their talents to be fully developed.

Title I, which was a landmark program, has produced enormously successful results, which have not been questioned by anyone. Studies have documented that title I has produced very impressive benefits, and that it gives an opportunity to our very young people in elementary and secondary education to have a chance for true education. Where are they going to be in this increasingly complex and technical world if we do not give them this opportunity?

The other two parts of the amendments have delivered on the promise that any young person ought to be able to obtain the college education to which their talents entitle them regardless of the financial status of their family. We have put together now an aid package in higher education of grants, the Pell grants, of loans, and of jobs. On the basis of that package, which has been very carefully developed, the institutions of higher education across the country have been able to respond to the financial needs of their students in such a manner that we can truly assert that young people with the ability to go to college will be able to obtain that opportunity even if their families do not have the economic means.

This is an enormously important principle. It is a fulfillment of the entire concept of opportunity in this society. As the Senator from New York just pointed out, until we began to develop these programs, both in title I and with respect to higher education, you could predict that people would be locked into career patterns which depended in large part on the economic and career patterns of their families.

These programs have enabled us to establish ladders of opportunity so that young boys and girls of talent and merit can move up and aspire to a career pattern entirely different from that which has heretofore marked their families.

These programs have worked well. The institutions of higher education across the country have repeatedly expressed their very deep concern as to what would happen and, particularly, this concern, that if this package of alternative forms of aid that has been carefully assembled and makes it possible for them to respond to the financial needs of their students, is dismantled, cut back, limited, and restricted. With each of those limitations, with each of those restrictions, goes yet another opportunity to obtain the education that is essential to the individual if he or she is to function in our modern society. More importantly, these opportunities are essential to the society itself if it is going to fully develop its strength.

The objective of improving our economic ability is in part tied to improving our human resources, increasing the skills and the training and the education of our people.

I say it is the wrong direction in which to move to limit, curtail, and even deny these educational opportunities which are so important in building the strength of our country, and in offering to our young people the challenge to make of themselves the very best that they can.

So, Mr. President, I hope the Senate will support the amendments offered by the Senator from New York. It is at the heart of what this country is about. Indeed, it is at the heart of what any country is about. Virtually every country puts forward as one of its main objectives the education of its people. Anywhere in the world they put that forward as a prime objective of the society, the education of their young people. Instead of seeking to realize fully this prime objective, we are

moving in a direction to deny educational opportunity.

I very much hope the Senate will support the amendment of the distinguished Senator from New York.

I thank the Senator for yielding me time.

Mr. RIEGLE. Mr. President, will the Senator yield?

Mr. MOYNIHAN. I am happy to yield.

Mr. RIEGLE. I thank the Senator for yielding. I congratulate him on his leadership of this vitally important education amendment. Mr. President, I ask unanimous consent that I be listed as a cosponsor of the amendment.

The PRESIDING OFFICER (Mr. HAYAKAWA). Without objection, it is so ordered.

Mr. RIEGLE. I also ask unanimous consent to have printed at the end of my statement some background material which relates to the impact of the administration's budget cuts with respect to education in the State of Michigan. Included in this material is a letter from Wayne State University which is only one example of the effect of the proposed cuts on institutes of higher education.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. RIEGLE. Mr. President, it is obvious that it is essential for us to fight to make these restorations and to reduce these severe cuts in education programs that have been proposed by the administration. It is important to all areas of the country. There may be no State to which it is more important at this time than my own State of Michigan because in view of the other financial problems we are facing.

This is an essential question of national spending priorities and, as others here have just said, the money we spend on education is an investment in the future. If we want to have a future, and we want it to be a bright one, then we have got to be willing to see to it that needed educational activities are available. To deny educational benefits to millions and millions of people across the country of various ages, and to restrict opportunities only to those who are well to do and who have the money to afford educational opportunities, would be wrong.

This is an essential difference. I think, between the two parties and this difference has been etched out over the last several days here on issue after issue. This party, the Democratic Party, is determined to see that educational opportunities are available to all the people of the country. That they have the benefit of loans, which are repaid with interest, and other forms of assistance to make sure that people have the chance to develop and to come forward and to live meaningful and productive lives.

I thank the Senator.

EXHIBIT 1

EDUCATION IMPACT ON MICHIGAN

Following are estimated reductions that would occur in major federal education programs in Michigan:

SCHOOL LUNCH

The $26.6 million reduction in school lunch funds for Michigan would increase the cost of a hot lunch by an estimated 30 cents. Average hot lunch costs in high schools range from 65 cents to 95 cents per lunch and from 40 cents to 55 cents in elementary schools. "The proposed budget cuts could force some Michigan school districts to drop their hot lunch programs because a state law requiring districts to serve hot lunches allows them to discontinue the program if federal funding drops below a certain level," Runkel said.

SPECIAL EDUCATION

Michigan receives $35 million in federal funds for the education of handicapped children. This program, which helps local school districts provide education services for 160,000 handicapped children throughout Michigan, would be reduced by $7 million under the Reagan program.

COMPENSATORY EDUCATION

Upwards of $25 million would be cut from the $127 million Michigan receives for programs aimed at helping children who are having problems with math and reading. About 12 percent of all children in Michigan's public schools—about 232,000 pupils—receive remedial help under this program known as Title I of the Elementary and Secondary Education Act.

STUDENT FINANCIAL AID

The proposed budget cuts would reduce by 45,000 the number of guaranteed student loans totaling an estimated $90 million that would be made to Michigan college students. Reductions in Social Security education benefits for 18 to 22 years old would affect 7,500 Michigan students who now receive $25 million in benefits annually. A $5 million reduction in the Basic Educational Opportunity Grants (BEOG) program would affect 8,000 Michigan students.

ADULT EDUCATION

Nearly 41,000 persons are enrolled in adult basic education (ABE) programs in 123 Michigan school districts. The Reagan plan calls for more than $600,000 to be cut from the $3.2 million Michigan receives under this program.

VOCATIONAL EDUCATION

An estimated $6 million would be cut from Michigan's current $29.6 million federal allocation for vocational education programs that enroll an estimated 300,000 students. The reduction would have an impact on vocational education programs for handicapped and disadvantaged persons who take vocational education courses in high schools, career education centers and community colleges; on the purchase of new equipment for these programs and on construction of new facilities.

VOCATIONAL REHABILITATION

A $7 million reduction in federal funds for vocational rehabilitation programs for handicapped adults would result in 8,400 fewer clients being served and 1,300 fewer handicapped persons being placed in employment.

BILINGUAL AND MIGRANT EDUCATION

An estimated $1.2 million would be cut from federally-funded migrant education programs that serve 16,000 children in Michigan at an annual cost of $6 million and approximately $600,000 would be reduced from the $3 million Michigan receives for bilingual education programs for 13,000 students.

LIBRARIES

An estimated $2 million would be cut from the $10.3 million in federal funds that public libraries and school libraries in Michigan receive annually.

IMPACT AID

The Reagan plan calls for a 64 percent reduction in federal aid for school districts that have high concentrations of military personnel and federal employees. An estimated $1.5 million would be cut from the present $2.2 million in federal impact aid funds received by 53 Michigan school districts.

Phil Runkel, Superintendent of Public Instruction of Michigan Department of Education testified before the Elementary and Secondary Subcommittee of the House Education and Labor Committee on March 13, 1981 at a field hearing in Ashland, Kentucky. His analysis indicates that adoption of the Administration's budget proposals for education would have the following impact on Michigan

Federally funded elementary and secondary programs in Michigan school districts stand to lose $85,983,000.

As many as 2,700 positions would be lost in the public schools in a state which already has the highest unemployment rate in the nation.

The Michigan State Department of Education would stand to lose over 40 staff positions in the elementary and secondary areas (this agency has already eliminated 150 positions because of reductions in state funds).

Almost 250,000 elementary and secondary students would be denied services or would receive reduced services under the Administration's proposals.

There would be a reduction of almost 80,000 student borrowers under the guaranteed student loan program and a $166 million value of loans lost to Michigan students. We estimate that over half of these students might not be able to continue their education as a result.

In vocational rehabilitation, 15,000 disabled clients would be denied services and would in all probability be unable to find work or comparable services.

SUMMARY OF REDUCTIONS IN DETROIT PUBLIC SCHOOLS PROGRAMS THAT WOULD RESULT IF PROPOSED CUTBACKS IN FEDERAL FUNDING OF EDUCATIONAL PROGRAMS ARE CARRIED OUT

Reduction in funding from $70,000,000 in 1980–81 to $44,000,000.

I Staff Reductions: 245 Teachers/Counselors/Education Technicians; 739 School Service Assistants; 101 Social/Health Workers; 39 Administrators; 228 Clerical Staff.

II Services, Activities, Opportunities, etc. that will be Eliminated:

Title I services for more than 10,000 eligible students.

Vocational Education Special Needs programs for more than 3,600 eligible students.

Health screening, immunization referral, and follow-up services for more than 122,000 students.

Basic education programs for more than 1,000 adults Work/study opportunities for 3,100 middle school students.

Part-time jobs during summer and the regular school year for 3,450 high school youths.

Alternative education programs for 600 high dropout potential youths.

In-service training for more than 5,000 teachers and other staff members.

Summer camping program for 800 students.

Job placement services for 8,000 students.

Basic reading instructional services for 40,000 students in the ESEA program.

Special counseling services for 7,000 students in the ESAA program.

Security staff persons in 77 schools housing more than 96,000 students.

III Services, Activities, Opportunities that will be Substantially Reduced:

Special classes, small group and individual

instruction for more than 2,000 bilingual students.

Special classes, field trips, cultural supplies and support services for 700 Native American Students.

The number of summer school remedial and enrichment classes will be reduced by 60 percent.

Special classes, small group and individual instruction in remedial reading and mathematics for Title I eligible students.

Curriculum and career guidance materials; use of resource centers; and programmed instructional facilities and materials.

Bus tickets for needy students.

Professional contracted services; special instructional materials, equipment and supplies; transportation; and other special services for more than 18,000 handicapped students.

Career exploration; basic skills training; job development and placement services; follow-up services for more than 10,000 high school students.

TABLE SHOWS POTENTIAL LOSS TO MICHIGAN'S LARGEST SCHOOL DISTRICTS

[The following table shows the amount of Federal funds received by Michigan's largest urban school districts during the 1979–80 school year and the estimated loss of Federal funds if the Reagan plan to reduce Federal spending is approved by Congress.]

School district	Federal funds received in 1979–80	Potential reduction at recommended 20 percent level
Detroit	$63.8 million	$12.8 million.
Grand Rapids	$8.9 million	$1.8 million.
Flint	$7.7 million	$1.5 million.
Lansing	$6.3 million	$1.3 million.
Pontiac	$6.1 million	$1.2 million.
Saginaw	$4.3 million	$860,000.
Kalamazoo	$2.2 million	$440,000.
Muskegon	$2.1 million	$420,000.
Benton Harbor	$2 million	$400,000.
Bay City	$1.8 million	$360,000.
Battle Creek	$1.8 million	$360,000.
Jackson	$1.6 million	$320,000.
Ann Arbor	$1.3 million	$260,000.

ESTIMATED IMPACT OF PROPOSED REAGAN BUDGET REDUCTIONS—STUDENT FINANCIAL AID

IMPACT OF PROPOSED FEDERAL BUDGET REDUCTIONS

[Fiscal years]

	1981 (base)	1982 reductions	1982 balance
Pell (basic) grants:			
A. Number of grant recipients	73,253	6,926	66,327
B. Value of grants (millions)	$66.95	$4.5	$62.45
National direct student loans:			
A. Federal matching funds (millions)	$9.82	$2.45	$7.37
B. Number of student borrowers	10,911	2,722	8,189
Social security educational benefits:			
A. Number of beneficiaries	34,459	8,615	25,844
B. Value of benefits (millions)	$98.7	$24.68	$74.02
Guaranteed student loans:			
A. Number of borrowers	113,500	79,450	34,050
B. Value of loans (millions)	$227.68	$166.59	$61.09
C. Federal administrative cost reimbursement to Michigan (millions)	$1.1	$0.79	$0.31
D. FTE covered by Federal reimbursement	40.0	31.0	9.0

To: Eugene Paslov.

From: Ronald J. Jursa.

Subject: President Reagan's Proposed Education Reductions.

As you requested, we have reviewed the material relative to proposed reductions in federal education programs. I have the following observations relative to the impact of these proposed reductions on Michigan schools and students:

TYPE OF REDUCTIONS

In postsecondary education, the major part of proposed reductions are in the area of student financial assistance since this is the area that comprises the bulk of federal expenditures for postsecondary education. Four programs are targeted for reduction or elimination. These include the Pell Grants (previously known as Basic Grants), National Direct Student Loans, Guaranteed Student Loans (including the new Parent Loan Program), and Social Security educational benefits. An analysis of each of these program areas follows:

LIMITATION ON PELL (BASIC) GRANTS

It is proposed that Pell Grants be limited to individuals from families with an annual income of less than $25,000. This represents a complete change from the Middle Income Student Assistance Act of 1978, which specifically broadened eligibility to include some grant aid for families in the $25,000–$30,000 income range. Based upon less than complete data available to us, we estimate that here in Michigan the proposed limitation would eliminate approximately 6,900 current grant recipients, with a total dollar loss of $4.5 million.

PHASE-OUT OF NATIONAL DIRECT STUDENT LOAN (NDSL) PROGRAM

Since 1958, the federal government has provided individual colleges and universities funds to be used for long-term, low interest student loans. Nine dollars of federal money are provided for one dollar of institutional match. During the current school year, Michigan colleges and universities received nearly $10 million in federal funds for this program.

The proposal suggests eliminating 25% of the federal funding each year for the next four years. This would represent a loss to Michigan schools of about $2.5 million next year, and after four years the full $10 million would be lost. Assuming the average student loan is about $1,000 per year, this would eliminate aid to about 10,000 students over the next four years.

The National Direct Student Loan Program would not be totally eliminated since colleges will be able to re-cycle any NDSL repayments which they receive from loans made to students during the past 20 years. The fact remains, however, that there will be considerably reduced lending under the National Direct Student Loan Program, with about 2,500 otherwise eligible students being denied loan funds next year and an additional 2,500 students each year for the next four years.

REDUCTIONS IN GUARANTEED STUDENT LOANS

The largest single program of student financial assistance in the country is the Guaranteed Student Loan Program, whereby students borrow from private lending agencies (or a state agency such as the Michigan Higher Education Student Loan Authority), with the federal government subsidizing these loans and eventually guaranteeing their repayment. The program is costly to the federal government and the costs have increased dramatically during the past several years due to the elimination of all income ceilings through passage of the Middle Income Student Assistance Act in 1978.

The proposal is to reduce federal costs by:

A. Eliminating the federal payment of interest on behalf of the student borrower while the student is in school.

B. Limiting the amount of money a student can borrow to the difference between school costs and the resources available to the student, based upon an individual financial evaluation.

C. For parent loans, removing the federal subsidy so that parents will have to pay the full interest at current market rates.

The impact of the above proposed reductions would be as follows:

A. Removing federal interest payments while the student is in school will discourage a significant number of private lenders from making student loans. Banks and other lenders cannot afford to loan large sums of money with interest payments being delayed for a period of four years or more. Further, state direct lenders (such as the Student Loan Authority here in Michigan) would probably go out of business since it would be virtually impossible to sell revenue bonds without assurance of immediate interest payments on the student loans being offered.

B. The imposition of a "needs test" to determine how much a student could borrow will create a vastly expanded paperwork burden for colleges and individual private lenders. Many colleges will be ill-equipped to handle this additional paper burden and many private lenders will simply refuse to participate. (We went through exactly the same experience in 1972 and here in Michigan it resulted in a 34-percent decrease in student loans in one year.)

C. Without a federal subsidy for parent loans, this new program will never get off the ground. At the present time, it would mean parents would have to pay in the neighborhood of 17 percent to 18 percent on these loans and regardless of the interest rate many private lenders would prefer to simply make their own loans rather than subject themselves to the red tape and paperwork associated with a government program.

D. By the close of the current fiscal year, we estimate that approximately 113,000 students will have obtained guaranteed loans here in Michigan, with a total dollar volume of approximately $225 million. If the administration's proposals identified above are implemented, we estimate that guaranteed loan volume in Michigan for 1981–82 will decrease by close to 70 percent. This will mean a reduction in guaranteed loans in the amount of approximately $160 million and a reduction of approximately 65,000 student borrowers. It should be noted that not only will this be a tremendous loss to individual students and families, but will also have enormous consequences in reduced enrollments and revenues for Michigan colleges and universities.

PHASE-OUT OF SOCIAL SECURITY EDUCATIONAL BENEFITS

At the present time, Social Security provides educational benefits to eligible students aged 18 to 21 who are enrolled in postsecondary programs of study. The proposal is to phase-out these benefits over a four year period by adding no new students and reducing expenditures by about 25% each year as succeeding classes of students terminate their college studies. We estimate that approximately 34,000 Michigan students currently receive, Social Security educational benefits totaling about $98 million. If the proposed reductions are implemented, about 8,500 fewer students will receive benefits each year over the next four years, with an annual loss of assistance of about $24.5 million.

IMPACT ON MICHIGAN DEPARTMENT OF EDUCATION

Not specifically identified in any of the printed materials from Washington is the very real possibility that the federal government will discontinue its current practice of reimbursing state guarantee agencies for their administrative expenses in operating the Guaranteed Loan Program. Here in Michigan, for the current fiscal year, our administrative expenses for the Guaranteed Loan Program amount to $1.1 million, all of which is covered by federal reimbursement. If that reimbursement is eliminated, we would need to immediately increase the insurance fee (currently one-half of one percent) which we charge each student bor-

rower and we would also have to seek some operating funds from the Michigan legislature as we previously did prior to 1976.

There is also a real threat to continued operation of our State Direct Student Loan Program since this program probably could not sell revenue bonds if the federal government eliminated its current subsidy of loan interest while the student borrowed is in school.

CONCLUSION

The budget papers prepared by the Reagan administration clearly forecast that there will be considerable negative reaction to these proposals from many parents and students as well as from colleges and universities throughout the country. There is no question that the higher education community will sustain serious damage if all of the proposed reductions are implemented. The crucial public policy question is whether these losses are worth absorbing in order to effectuate the proposed savings in federal expenditures. This is a question which the American people and the Congress will have to decide.

If we were asked to prioritize reductions, it would be my judgment that the least damaging action would be the imposition of a $25,000 income ceiling for the Pell (Basic) Grant Program. While some students would lose their grant aid, these would involve upper-middle income families who probably could resort to other resources.

Next in priority would be the phase-out of Social Security educational benefits. The current benefits are not truly "needed" by many students, and, given the current precarious condition of the Social Security system, there is little justification to provide benefits to college students that are not available to other persons 18 to 21 years of age who do not attend college.

Phase out of the National Direct Student Loan Program would have much broader impact on large numbers of students and would greatly reduce the amount of financial aid which could be provided by individual colleges and universities.

Far and away, the most damaging proposal is the one to restrict and reduce the availability of guaranteed student loans. While some cost savings clearly can be made in this program (and probably should), it could be done far more easily and with far less damage by means other than those proposed by the Reagan administration (for example, a simple income limitation for purposes of interest subsidies could be imposed, as was the case prior to 1978.) The National Council of Higher Education Loan Programs is currently drafting a series of counter-proposals which will be shared with the administration and the Congress. At such time as those proposals are officially presented, I would urge that the Department strongly endorse them.

WAYNE STATE UNIVERSITY,
Detroit, Mich., March 26, 1981.

Hon. DONALD W. RIEGLE, Jr.,
Dirksen Senate Office Building,
Washington, D.C.

DEAR SENATOR RIEGLE: I am writing to provide you and the members of the Michigan delegation with some indication of the impact federal cutbacks will have on Wayne State University if the Reagan administration's proposals are adopted by the Congress. We understand and agree with President Reagan's and the Congress' desire to bring the pattern of spiraling inflation under control and to find ways of stimulating the nation's economy once again. At the same time, we feel it is our obligation to point out some possible outcomes if modifications are not made to the proposed cutbacks.

Unfortunately, Wayne State is having to evaluate the impact of federal budget reductions in the face of declining state support because of the severe economic crisis experienced by the State of Michigan. Michigan's colleges and universities received the least percentage increase from state appropriations of all the states in the nation during the past two year period. Furthermore, tuition rates at the University of Michigan, Wayne State, and Michigan State are presently among the highest in the nation. These conditions, and others, have caused Wayne to thoroughly review its programs and financial commitments for the future. In fact, we have been forced to reduce our spending by over eight million dollars in the current budget year and face a $10–$15 million problem next year. Obviously, this means fewer programs, fewer jobs, layoffs, and less money available to assist students attend Wayne. I have enclosed a statement we prepared for our state legislators earlier this month describing the impact of Michigan's economy on Wayne.

I am also enclosing a summary of the various programs which are slated for reductions in higher education, and the potential impact on Wayne. I realize it is not possible, nor would it be helpful if we were to suggest that all proposed cuts be fully restored by the Congress. I do, however, strongly encourage your support for the amendments intended to partially restore the basic student aid grant and loan programs and some of the basic research and development programs.

The most critical needs, from Wayne's perspective, are the following, in order of priority:

1. Student Aid: Over 3,000 Wayne students would no longer be eligible for financial assistance under the Pell Grant and Guaranteed Student Loan programs if the Administration proposals are adopted.

Moreover, discontinuance of the special allowance paid to banks for making parental loans would result in fewer high risk borrowers being granted loans. Wayne serves more of these families than any other institution in Michigan.

The Michigan Department of Education has estimated that approximately 8,500 fewer students will receive Social Security education benefits in the first year of a four-year phase out plan. Well over 1,000 of these students attend Wayne.

We also strongly urge that the U.S. Department of Education resume processing the Pell Grants for the 1981–82 academic year, otherwise the number of students who cannot afford to attend college without some assistance will be greatly compounded by this inaction. This issue is critical, and requires the immediate attention of the Congress.

2. Research and Development: Reductions in research and development will severely damage the research capacity of the nation's leading universities—an irreplaceable national resource. The states will not be able to sustain the level of research required to meet modern and future needs. That is especially true for Michigan where more research is desperately needed, at a time the state can least afford it, to turn around its heavy dependence on the auto industry.

Wayne's ability to continue its successful research efforts, particularly in the health professions areas, i.e., cancer, lung, blood, arthritis, and bio-medical research, are in jeopardy.

3. Health Professions Programs and Graduate Traineeships: Also in jeopardy are funds for the support of clinical and graduate traineeships if the National Institute of Health programs are cut as severely as proposed. We currently have over 400 graduate students who depend upon these funds to support their education.

The loss of capitation grants and financial aid for medicine and nursing programs and students under the Health Manpower programs will result in real hardships and a diminution of programs and services.

4. Urban Grant Program: One of the few new and exciting programs authorized in the Higher Education Act of 1980 was Title XI, the Urban Grant Universities Program. Only $1.5 million was authorized for the first year of the program in 1982. Wayne was referenced as the model university for this program as the legislation was debated by the Congress.

No funds in 1982 will further delay development of Wayne's proven capabilities in assisting Detroit, and other major metropolitan areas with their problems. This legislation is patterned after the very successful Land Grant legislation which provided the wherewithal for our major universities to assist the nation's agricultural industry during the mid-1880's. That same assistance is needed for today's urban problems.

Your understanding and assistance with our needs will be greatly appreciated as the Congress weighs the alternatives to the Administration's budget reduction proposals. You have a very difficult, and often thankless task. Those of us who are having to make similar decisions on a smaller scale, but equally important as it affects the lives of others, do appreciate the hard decisions you are being asked to make. If we can be of any assistance in helping you to better understand our concerns as you arrive at your decisions, please let me know.

Sincerely,

THOMAS N. BONNER,
President.

IMPACT OF MICHIGAN'S ECONOMIC CRISIS ON WAYNE STATE UNIVERSITY

Although accounts of the financial woes of some state universities receive more headline news than others—most notably MSU in the Lansing newspaper read by many legislators—all higher education institutions are suffering immensely under the current state budgetary constraints.

It is important that Lansing does not get the impression that Wayne State is somehow suffering less than others. Lack of state funds during the past year, as well as the dim prospects for substantial economic recovery in the near future, have caused the following conditions at Wayne State:

1. A hiring freeze has been in effect since May of 1980, which by October 1 will translate into a reduction of 250 FTE employees since 1978–79.

2. Because the current year appropriation is $3.1 million below the previous year's allocation, spending reductions of $8.1 million must be achieved to balance the University's 1980–81 budget. A $10–15 million problem looms for 1981–82.

3. Non-renewal notices for 160 faculty already have been issued for 1981–82. Further painful layoffs for the summer term are expected to be announced in mid-April, the magnitude depending on the progress of negotiations with represented employee groups.

4. A 10 percent staged reduction in the size of faculty and staff will be necessitated over the next 18 months.

5. Even if a 10–12 percent appropriations increase for 1981–82 is enacted, the institution will still lag about 15 percent behind inflation over the 3-year period.

6. Because of the deferred maintenance necessitated from lack of funds, chillers and mechanical systems in numerous facilities have reached crisis proportions.

7. The President's Priorities Advisory Committee is reviewing all university programs, academic and nonacademic, with a responsibility to recommend major expenditure reductions.

BUDGET CUTS RECOMMENDED BY REAGAN ADMINISTRATION IMPACT ON WAYNE STATE UNIVERSITY

[The chart below lists the proposals by the Reagan Administration to cut the budget for fiscal years 1981 and 1982 that have significance for Wayne State University—our students, faculty, and administration]

Program or agency	Reagan administration recommendations	Anticipated impact on Wayne State
1. STUDENT AID		
A. Pell grant	Keep the maximum grant at $1,750—fiscal year 1981.	Pell grants were originally intended to meet half of the average college cost. $1,750 will meet approximately 36 percent of average college costs.
	Rescind the previous approved inflation adjustment in the family living allowance.	Absence of inflation factor hurts low-income families.
	Require a $750 self-help contribution from every student.	Lower middle-income families will lose Pell grants.
	Rescind the liberalized cost-of-education definition included in the higher education amendments of 1980.	Could lead to return to $1,100 figure for total costs of off-campus room and board, and cut grants to students in high-cost urban areas.
	Families contribution raised from 14 to 20 percent of net discretionary income in fiscal year 1982.	Discretionary "income tax" cuts MISSA from approximately $25,000 income level to $19,000. Loss in fiscal year 1982—$1.8 million in benefits affecting 1,117 students. Possible funding delay would cause a critical shortage of student assistance funds this spring, when students make their plans for the 1981-82 college year.
	Elimination of recently mandated administrative allowance.	Loss in fiscal year 1981—$56,000. Loss in fiscal year 1982—$70,000. Current funds are being used as they were intended and they are not available to return.
(Changes proposed to become effective July 1, 1981)		
B. Guaranteed student loan (GSL).	Loans to be restricted to no more than cost of education, minus parental contributions and other student aid.	In effect repeals the Middle Income Student Assistance Act (MISAA). Imposition of a "needs test" will create vastly expanded paperwork burden for college individual private lenders. Reagan administration estimates ⅓ of anticipated students lose eligibility. Loss to WSU in fiscal year 1982—$3.8 million in benefits affecting 1,900 students.
	Eliminate Federal Government in-school interest subsidy.	Drastic impact upon the access of minority low-income students. Will discourage schools and lenders from participating in the program, and as a result, new students who are generally less preferred as borrowers will suffer greatly.
	Interest on new parent loan would go from 9 percent to market rates, currently in the neighborhood of 17 percent.	Many small private lenders would prefer to find their own loans rather than subject themselves to redtape and paperwork associated with the government loans. Students can no longer borrow parental contributions. Parents may be unable or unwilling to use the program because of their other credit obligations and the higher interest rates.
	Elimination of recently mandated administrative allowance.	Loss: Fiscal year 1981—$61,360, fiscal year 1982—$61,360.
C. Student Social Security benefits.	Program is phased out over 4 years. No new recipients allowed, current students lose 25 percent per year.	Approximately 34,000 Michigan students currently receive benefits totaling about $98 million. If proposed reductions are implemented, almost 8,500 fewer students will receive benefits over the next 4 years, with an annual loss assistance of about $24.5 million. Many of current recipients will lean on NDSL and GSL at a time when those programs are proposed for cutbacks too.
II. RESEARCH AND DEVELOPMENT		
A. Alcohol, Drug Abuse and Mental Health Administration.	Rescinds $29 million in mental health research and training. Rescinds $1 million in both drug abuse research and training and alcoholism research and training. $203 million budget in fiscal year 1982. Spending for clinical training will be phased out in fiscal year 1982.	Potential loss of $50,000 in psychology grants.
B. Health Resource Administration.	Rescinds a total of $212 million of an estimated $480 million in health professions education in the current year. Rescinds $63 million on nursing programs. Recommends just $120 million for health professions in fiscal 1982.	Over 50 percent of nursing students rely on some form of financial aid. Capitations zeroed in 1981—along with most health manpower programs, including student aid and categorical activities. Loss of $648,328 in capitation grants for medicine and a loss of $62,184 in capitation grants for nursing programs.
C. Health Services Administration.	Rescinds $16 million in National Health Service Corps scholarships and $6 million for maternal, child health research and training. Fiscal year 1982—$42 million less than fiscal year 1981 level.	The administration's proposed budget proposal would grant no new National Health Service Corps scholarships beginning in 1981. Currently WSU is receiving $80,000 for medical and pharmacy support. Provides greater access for more affluent families at expense of indigent students.
D. National Institutes of Health.	Rescinds $126 million of the $3.6 billion slated for NIH this year under a continuing resolution. About $50 million of the reduction would be made by the various institutes in training grants and payments to institutions whose students receive such grants. Another $21 million would be cut from biomedical research grants. The rest would come from small cutbacks throughout the agency.	WSU currently receives approximately $4.7 million in NIE training support, affecting 400 graduate students. Anticipate severe loss in nursing, psychology and social work training grants. Estimated loss of $100,000 in biomedical research support. Eliminates at least 50 percent in the first year, or $2.35 million loss for both student and faculty NIE training support.
OTHER UNIVERSITY PROGRAMS		
A. Corporation for public Broadcasting.	Reduction of $33 million from 1981 levels.	WDET support will be reduced by a minimum of 25 percent. Current fiscal year 1981 funding is $111,561.
B. Veterans' cost of instruction.	President would rescind the entire budget for veterans cost of instruction.	Estimated loss of $70,000.
C. Urban grant program, title XI of higher education, 1980.	No support is recommended for fiscal 1982.	$1.5 million was authorized. Wayne State was considered a leading contender for initial support under this new program.

Prepared by the Office of State and Congressional Relations (7-2241).

Mr. MOYNIHAN. I thank the distinguished Senator from Michigan who spoke so eloquently to the point at hand.

I see our revered former chairman of the Committee on Environment and Public Works, a man who has devoted his life to education in his own home State and in the Nation, has risen; the incomparable senior Senator from West Virginia (Mr. RANDOLPH).

Mr. RANDOLPH. Mr. President, I wish, with the indulgence of my colleagues, especially the able Senator from New York, to address the Senate.

Mr. MOYNIHAN. How much time does the Senator desire?

Mr. RANDOLPH. Perhaps 10 minutes, if that is within the format.

Mr. MOYNIHAN. I yield whatever time the Senator may desire.

The PRESIDING OFFICER. The Senator from West Virginia.

Mr. RANDOLPH. When a Senator makes a statement that he would speak briefly few people will believe it. How much time remains, Mr. President?

The PRESIDING OFFICER. Thirty-two minutes remain to the Senator from New York.

Mr. RANDOLPH. May I have such time as I may desire?

Mr. MOYNIHAN. I originally proposed that.

Mr. RANDOLPH. I thank the Senator very much.

Mr. President, there are many of us within this body who are equally interested in the three matters that have been under discussion. There are Members of this body who, by their very service in the Senate, have attached their concerns in committees and subcommittees to the problems that may affect them not only in their own States or in the body politic as a whole, but because they have a deep-seated feeling about the strength of the educational system of America and the need to not only continue it but to improve it, and the improvements, of course, are needed across

a broad scale. I will not address myself to all three matters to be discussed.

I have been a member of the Education Subcommittee in the Senate of the Labor and Human Resources Committee for approximately 23 years. Prior to that time I was also in the House of Representatives a member of the committee which attempted to cope with not only the problems of labor but of health and safety for workers, and yet remembering also the programs of education.

So during this period of time, now some 37 years, I come today just as enthusiastic now as when I entered the House of Representatives in March of 1933, hoping always, however, that I can be well-reasoned and can be understanding of those situations which affect America and the citizens generally of our country.

I would like to talk today about the mistakes we make in funneling billions and billions of dollars, Senator HATCH, oversees every year from the Congress of the United States. Not that I am less than cooperative; I am most cooperative in connection with those joint programs in which America, with other nations and peoples, would try to improve the quality of living and the hopes for lessening, very frankly, was and recurring war in this shrinking world in which we live.

But that is not for me to discuss now.

I want to say to you that there are more than half the Members of this body who were graduated from the smaller private, independent, church-related colleges of this country.

Mr. President, I ask unanimous consent to have printed in the RECORD a list of the names of schools attended by Senators.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

PRIVATE COLLEGES AND NUMBER OF SENATORS ATTENDING*

Birmingham Southern College, 1.
Pomona College, 1.
Yale University, 9.
Providence College, 1.
Harvard University, 12.
Syracuse University, 3.
Emory, 1.
George Washington University, 2.
Denison University, 1.
DePauw University, 1.
Washington & Lee University, 2.
Bowdoin College, 2.
Boston University, 1.
Georgetown University, 1.
Haverford College, 1.
Princeton University, 4.
Dartmouth University, 2.
Swarthmore College, 1.
Johns Hopkins University, 1.
Saint Johns University, 1.
Amherst, 1.
Stanford University, 3.
Oberlin College, 1.
Columbia University, 2.
Tufts University, 1.
Wingate College, 1.
Wake Forest, 1.
Earlham College, 1.
Muskingum College, 1.
Willamette University, 2.
Tulane University, 1.
Vanderbilt University 1.
Southwestern University, 1.
Brigham Young University, 1.
Middlebury College, 1.
St. Michael's College, 1.
Salem College, 1.
American University, 1.

*A number of Senators attended one or more private colleges/universities.

Mr. RANDOLPH. I am not against the institutions in your States or in my State that are publicly supported. No, I am paying taxes toward that program in the State of West Virginia where I pay taxes, just as you are paying taxes in your respective States in reference to those public institutions of higher learning.

Mr. President, I ask unanimous consent to have printed in the RECORD a list of both private and public colleges and universities in West Virginia.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

PRIVATE, INDEPENDENT COLLEGES/UNIVERSITIES IN WEST VIRGINIA

Alderson-Broaddus College, Philippi, W. Va.
Appalachian Bible College, Bradley, W. Va.
Beckley College, Beckley, W. Va.
Bethany College, Bethany, W. Va.
Ohio Valley College, Parkersburg, W. Va.
West Virginia Wesleyan College, Buckhannon, W. Va.
Salem College, Salem, W. Va.
University of Charleston, Charleston, W. Va.
Davis & Elkins College, Elkins, W. Va.
Wheeling College, Wheeling, W. Va.

STATE-SUPPORTED PUBLIC COLLEGES/UNIVERSITIES IN WEST VIRGINIA

Bluefield State College, Bluefield, W. Va.
Concord College, Athens, W. Va.
Fairmont State College, Fairmont, W. Va.
Glenville State College, Glenville, W. Va.
Marshall University, Huntington, W. Va.
Parkersburg Community College, Parkersburg, W. Va.
Potomac State College, Keyser, W. Va.
Shepherd College, Shepherdstown, W. Va.
Southern West Virginia Community College, Williamson, W. Va.
West Liberty State College, West Liberty, W. Va.
West Virginia College of Graduate Studies, Institute, W. Va.
West Virginia Institute of Technology, Montgomery, W. Va.
West Virginia Northern Community College, Wheeling, W. Va.
West Virginia School of Osteopathic Medicine, Lewisburg, W. Va.
West Virginia State College, Institute, W. Va.
West Virginia University, Morgantown, W. Va.

Mr. RANDOLPH. Mr. President, so I am conscious of my desire not to separate my concern for both public and private education, except I must say to you that when we talk in terms of the loans made to those college students or university students, that we are not talking about Federal funds. These are not Federal funds that are loaned to the students throughout the United States of America, irrespective of where these students are enrolled.

These funds come from the private sector. I repeat, from the private sector.

These loans, of course, have an in-school interest rate of 9 percent paid from Federal funds.

But private lending institutions make these loans to our college and university students throughout the country.

I will perhaps place in the RECORD the picture as it affects the West Virginia institutions of higher education. I can tell you that in the institution from which I was graduated, Salem College in the hills of West Virginia, that our students need those loans. These students have gone there because it was their choice to go to a private, independent college in the State of West Virginia.

Are we to deny that choice to those students?

You say, "No, the choice will remain."

But I can say to you that those students do not have the money to pay the tuition fees which must be assessed by independent and private institutions of learning at a higher rate than the publicly-supported colleges and universities of our country. So the costs are more. But they choose private schools because, in many instances, they want the personal rapport and contact with the professors, leading to more individual instruction.

A few months ago, in a university in America, which I shall not mention because I do not want any inference to be drawn, I sat in a classroom and there were some 240 students in the one class. I tried to see if my eyes—and they are fairly good—could discern where the professor was. Actually, if you were sitting somewhere in the rear of the class you would have difficulty in finding him down or out there.

I believe in the smaller classes. I believe that in the study that is advanced for a master's degree, the students are better able to concentrate, on the subject matter such as law or medicine. But in the 4-year college of arts and sciences, there the students come and they need something besides the close attention to the classics; they need to understand the living associations that take place upon a college campus. They need, perhaps, what young John Hinckley needed yesterday—before he made a terrible decision. Who knows, had he been in the atmosphere of a small college, where traditional, Christian values are taught, he might have come to realize the qualities, the obligations, that may have kept him from doing what he did.

In America there is no reason to say: "You cannot do what you are now doing. You cannot have this choice because the door will be closed."

I do not want to speak for a special interest group. That is not my intention. Because higher education in this country must not be considered as just another special interest group. Higher education is a $50 billion a year enterprise.

Higher education contributes to the economic well-being of our country. In that connection it is important that we think in terms of the young people not only today on college campuses, but the tomorrows of these young people throughout trade, business, commerce, the professions, and community leadership all over America.

It is difficult for me to understand, and I speak not against any specific individual—I do not want to say what a person can or cannot do. But it is difficult for me to understand people opposed to the guaranteed student loan program, who might be very much interested in the continued subsidies for the raising of tobacco. I do not give you this as an "against" argument, but only to say that the priorities with me, now and in the future, will be to work for the programs of education to continue an opportunity for these young people to be in college, the college of their choice, the private college, that, of necessity, has to charge

a higher tuition fee than the State publicly supported institutions.

Is this just an expenditure of money? No. This is an investment of funds, funds loaned from private lenders with the interest paid by the Federal Government.

If there is a drastic reduction in the guaranteed loan program, where will it impact? Well, it impacts, of course, on all types of families, but I speak now of the middle-income families and their children of college age.

The hardest blow delivered will be against students who are attending the smaller, private, independent colleges in our country where I again say for the third or fourth time, of necessity, there is no public support, no State support. The tuitions are higher, $2,000, $3,000, and $4,000 higher in many cases.

Hundreds of thousands of students, if we stop the "GSL" program, will have to rethink their plans for continuing in college in September of this year when colleges formally open again. The decision may be to say, in a sense, "Goodbye to this college that I want to call my alma mater. At the end of 2 years on this campus I will have to go elsewhere."

This is a decision the Senate must understand.

A reduction in the GSL program, I repeat, so severe as to turn away students from the private, independent colleges of America, including West Virginia and every other State represented by the membership, could affect not only the students—and listen now to what I say—but it will affect possibly, the colleges themselves.

Colleges throughout this country in the category of which I speak, dependent upon charitable donations, some of them without large church constituencies, I say to the Senators who are on the floor—and I wish that every seat was filled—those colleges, in many instances, I say to the able Presiding Officer, will close their doors. That is actually the threat that is raised over this Senate and over the House of Representatives as we consider this subject.

Without a clear and an immediate signal from the Members of this Congress that we will not only not abandon the students but we will not abandon these colleges for whom I speak today throughout America—the students, yes, the institutions, too—then private education will go down the drain. Freedom of choice, which is very precious to me, very precious, I believe, to every Member of this body, will actually be dead.

Mr. President, these are the pressures: Pressures on the families with reduced discretionary incomes. How much do they have left over? The problems of summer employment, and I tell you, it is difficult today—it was not in my time. I could really go out in the summertime and find a job. But I know that now, the situation is different. In fact, if my colleagues will forgive me for saying it, I held two jobs at the same time: One in a men's furnishings store and one in a grocery store. I was glad for the opportunity to work, as I hope college students are glad for the opportunity to work now. But there are few jobs available for college age youth today.

A recent study by the Department of Labor provides an in-depth profile of the teenage worker. The jobless rate among teenagers has gone from a low of 7.6 percent in 1953 to 16 percent in 1979—and I believe it is even higher now.

The Labor Department's study also shows that the amount of formal schooling is substantially related to the prospects of being employed.

Those youths who have dropped out of high school have a jobless rate of 20.6 percent. Of those completing high school, but have not gone to college, the rate of unemployment is 9.4 percent. But for those who have had 1 to 3 years of college, the rate is 7.2 percent, and those with 4 or more years of college have only a 4-percent unemployment rate.

These unemployment statistics clearly support the continuing role of the Federal Government in providing funds for tuition assistance for college age youths between the ages of 18 and 24.

If these students are thrown out of college for lack of Federal tuition assistance, they may have to resort to welfare. Let us ask ourselves how much more it will cost us in tax dollars; I say to the knowledgeable Senator from Rhode Island (Mr. PELL), to provide welfare payments for these youths, compared with the really modest cost of helping keep these young men and women of America in the colleges and universities of their own choice by permitting them access to guaranteed student loans.

Commercial lenders, private lenders—that is where the money comes from for these students as we know. So it is essential, and I capitalize every letter of the word, essential, to this private educational group for whom I speak, not in any personal or provincial way; I only say that it is a highly important part of the diversity of educational opportunity in America. Today, if we were to vote on this subject, there are 54 Members of this body who have attended private, independent colleges rather than publicly supported State institutions.

I go back to that little college, Salem. In Salem, we have 481 students. Probably 232 of those students would be lost through transfers to low-cost schools. If that happens, I can say that the doors of the institution will be, not slowly closed over a period of 2 or 3 years, but may be closed abruptly—when one-third of the enrollment of our institution is lost. Out of a total of 8,452 students that are enrolled in private institutions in the State of West Virginia, I say to the Senator from Rhode Island, there is a potential loss of 1,800 students in the coming student year, a total loss of 21.3 percent statewide.

So, Mr. President, I ask my colleagues to be thinking of these colleges—Dennison University in Ohio, DePauw University in Indiana, Bowdoin College, Haverford College, Dartmouth, Swarthmore, Saint John's University, Syracuse, Wingate, Wake Forest, Earlham, Willamette, Stanford, Tulane, Southwestern, Middlebury, Washington and Lee—all over this country, these are the institutions, to name only a few, which will be affected—and these are some of the private, independent colleges attended by 54 percent of my colleagues here today from both parties.

President Reagan stated in his February 5, 1981, message to the annual meeting of the National Association of Independent Colleges and Universities:

(Private institutions) . . . are vital to the diversity that makes higher education in the United States a model for excellence for countries throughout the world. I believe this diversity must endure. We must continue to provide our people with the freedom of educational choice, a freedom unknown to people in many parts of the globe:

Mr. President, I am grateful for the time that has been given to me to speak, in a sense, not just factually and earnestly, but even a little emotionally, because I know this segment of American higher education. I have taught in a small college. I have served as a member of the board of trustees of two small colleges. I know the need, the fiber of the Republic which is at stake in connection with the educational programs of this country if, ill advisedly, we stop a program of this kind which affects not only students from institutions of higher learning, but the very fabric of American society in the years ahead.

(Mr. WEICKER assumed the chair.)

Mr. PELL. Mr. President, I thank and congratulate my friend and colleague from West Virginia (Mr. RANDOLPH) on his singularly eloquent, moving speech, one that I hope will have its message spread far and wide. Just as he remarked on the effect of the guaranteed student loan program in West Virginia, I cannot resist pointing out what the impact of these proposals would be in my own State of Rhode Island and Providence Plantations.

In this regard, the present loan program in Rhode Island provides about $40 million a year in guaranteed student loans. If the President's cuts are agreed to, it would mean that, of the 20,000 students getting loans, one-half would be either ineligible for loans or would get smaller loans.

The Middle Income Student Assistance Act would also be eliminated, doing incalculable harm to our students and youngsters.

Mr. President, I have already touched the basic Pell grants. I would now like to touch, for a moment, on the guaranteed student loan program, which is an excellent amendment, one that I hope will prevail. As the Senator from West Virginia pointed out, this is an excellent use of private money. It is not public money, it is private money. It is a guarantee of private loans. It provides parents with the money needed to finance their children's education.

The beauty of it in the past has been that everyone is eligible, because we find that when we start making income limitations, the paperwork becomes such that we do not save as much as we would hope.

The program, as we know, is presently 9 percent interest loans up to $2,500, with the Federal Government paying the in-school interest. The amendment that we are offering would simply say that the Federal Government would continue to pay that in-school interest, because how can a youngster borrow the money to go to college and then be expected to pay the interest back while he is still in college? That would seem to me a little bit

unreasonable and would result, as we all know, in fewer youngsters going to college.

I also want to touch on the title I program, which has been of inestimable benefit to some of our young people, providing them with the basics, reading, writing, and arithmetic.

It has given these basic skills to children from underprivileged, poor homes and put them into the mainstream of education. There scarcely has been a study of an education program that shows one that has produced as much good, as much benefit, as title I.

Now, when we talk about cutting these programs, I think we really are hurting our Nation and hurting ourselves. I think I have long felt that the real strength of a nation is the sum total of the education and the character of our people. If she has that, she will be an undigestible morsel if people attempt to take her over; she will be strong in projecting her image abroad. But if she does not have strong, educated people of good character, it does not matter how many battleships, aircraft carriers, and nuclear weapons she may have, the country will still be weak and unprotected. It is as if we have come to depend on a Maginot Line of military hardware to protect the softness that could develop within us.

Mr. President, I think we have an obligation on the Federal level, because it involves our Nation as a whole, to push ahead in education, continuing what we have done in the past and expanding upon it.

Mr. President, I speak as one who has been chairman of that subcommittee for 12 years, and have done all that I can to develop these programs. I believe that the Nation is the better for this development. For all these reasons, Mr. President, I hope that these amendments will prevail. I hope a miracle will happen and they will pass.

Let me add here that there is another amendment to come later during the consideration of this resolution on vocational education. That amendment is equally important, and it will be presented at a later time by another Senator.

Mr. President, seeing the Senator from Utah reminds me how extremely courteous and fair he has been as chairman of the full committee. I am delighted to be serving under him.

I also point out that these amendments that we are offering are actually less in dollars than the amount we approved in the full Committee on Labor and Human Resources. This is a point, I think, that many of our colleagues are not aware of, that the Budget Committee cut way back from the authorizing committee. At this time I want to thank my colleagues on the full committee for supporting the levels that they did this year, and I hope we can adopt these amendments and move back toward those levels.

Mr. HATCH. I thank my friend from Rhode Island.

I take it that the distinguished Senator from New York would care to speak at this time.

Mr. MOYNIHAN. That is very generous of the chairman.

The Senator from Vermont is here, and I should like to address a question to him, as would some other colleagues.

The PRESIDING OFFICER (Mr. MATHIAS). The Senator from New York is recognized.

Mr. MOYNIHAN. As the Senator from Vermont knows, he is the distinguished chairman of the subcommittee that handles this legislation, we now have an entitlement program which the administration proposes to turn into a categorical aid program by specifying certain new conditions to be met.

One of the concerns that most deeply affect educators, student loan officers, and college administrators I have talked with, and one concern they and I find most oppressive, is the idea that students in college will be required to pay interest on their loans while in college. It is because of my fear that this could occur that I offer this amendment. This program was enacted when our side of the aisle was in the majority, and now we would like to hear the views of the Senator from Vermont on this matter, because we understand that this can be avoided.

I believe the Senator from West Virginia would like to hear this, as would the Senator from Rhode Island.

Mr. STAFFORD. Mr. President, will the Senator yield?

Mr. MOYNIHAN. I yield.

Mr. STAFFORD. I will be glad to offer my observations on this matter.

It is the judgment of the Senator from Vermont that an amendment of the guaranteed student loan program at this time would not be necessary in order to continue the interest subsidy for in-school students.

I respectfully point out to my colleagues that in this particular program, existing law could provide for up to $3.4 billion, but the administration proposed that this particular program be reduced to $1.7 billion, according to my understanding.

The Subcommittee on Education and then the full Committee on Labor and Human Resources ask here for $2.924 billion for this program. The Budget Committee provided $2.873 billion, which is approximately $1.173 billion more than the administration had proposed, according to the figures I have.

On that basis, I believe—in fact, I feel as certain as one can—that with certain modifications in the program, probably relating to an income cap or ceiling, the in-school interest rate subsidy for students in school can be continued with the figures we have.

Mr. MOYNIHAN. Mr. President, it is exceptionally reassuring to note that the Senator from Vermont is of this view. Perhaps my colleagues might wish to make some comment on this point.

Mr. PELL. Mr. President, I join the Senator from New York in welcoming that assurance. I realize that it is the best understanding of it, and I am very glad to hear the words of the Senator from Vermont.

Mr. STAFFORD. I say to my distinguished partner in the Education Subcommittee, Senator PELL, that we share a community of interest here, as I do with my distinguished friend from West Virginia, Senator RANDOLPH, because we all have the interests of small private schools very much at heart. There are a number of such schools in Vermont which are vitally interested in this particular program, as there are in West Virginia and Rhode Island.

Mr. MOYNIHAN. Mr. President, I am happy to yield such time as the Senator from West Virginia may require.

Mr. RANDOLPH. Mr. President, I appreciate very much being given the opportunity to join in this discussion, because I believe that the record made here will be helpful to us in future days and weeks on Capitol Hill.

I want the record to show that the Senator from Vermont not only is the chairman of the Subcommittee on Education of the Committee on Labor and Human Resources but also is the chairman of the Committee on Environment and Public Works. As Senator MOYNIHAN expresses it, the Senator from Vermont is expansive. We know that when his decision is made, it is made upon a very careful evaluation of the subject matter. I am assured by what he says.

I ask if he might state it in another way. It is his intention to see that the in-school interest subsidy in the guaranteed loan program is retained. Is that correct?

Mr. STAFFORD. If the distinguished Senator will yield, I reply to him that that is exactly the intention of the Senator from Vermont.

Mr. RANDOLPH. I am very appreciative.

Can the Senator say to us that he feels strongly that we need to have the retention of the in-school interest subsidy? That is, a subsidy of 9 percent, with a total outlay of only $2.8 billion in the guaranteed loan program, in fiscal year 1982.

With funding at $2.8 billion, will there be every opportunity for the students of the so-called private institution of learning, where the tuitions are higher, to be served by the program.

Mr. STAFFORD. I believe the private institutions and their students would have an adequate opportunity to participate in the program, under the figures we have available.

Mr. RANDOLPH. I appreciate that further assurance.

I ask the Senator to address this question——

The PRESIDING OFFICER (Mr. RUDMAN). The Chair advises that all time of the Senator from New York has expired.

The Senator from Utah has 1 hour.

Mr. MOYNIHAN. Mr. President, will the Senator be kind enough to yield a few moments?

Mr. HATCH. I yield.

Mr. RANDOLPH. I am grateful to the Senator from Utah and the Senator from New York.

Will any of the reforms proposed to change the eligibility under the guaranteed program be imposed as of July 1 of this year?

Mr. STAFFORD. Will the distinguished Senator repeat that?

Mr. RANDOLPH. Will any of the reforms that have been proposed to change eligibility under the guaranteed loan program be imposed as of July 1 of this year?

Mr. STAFFORD. I say to the distinguished Senator that this is a question which will have to be decided first in the Education Subcommittee, on which we serve, and then in the full committee, on which all of us on the floor also serve.

Mr. RANDOLPH. That certainly is understood, because we will work together. Is that the fact?

Mr. STAFFORD. That is so.

Mr. RANDOLPH. In this guaranteed loan program, under the current services, there would be a cost of $3.4 billion, and as I understand it, the reconciliation agreement would permit $2.8 billion. I think that is correct.

I now ask this question: Can we achieve these savings without denying access to these needy students who seek the opportunity to attend both private and public colleges?

Mr. STAFFORD. It is the opinion of the Senator from Vermont that they would not be denied an opportunity to attend private schools.

Mr. RANDOLPH. I thank the Senator from Vermont very much. I am very appreciative of what he is saying.

I hope this will not be misunderstood. I believe that Senator STAFFORD and I agree on many, many subjects. However, I look back for just a moment and recall that in 1924, Calvin Coolidge, of Vermont, was the Republican candidate for President. He became President, and had he defeated someone else, perhaps I would not say this.

Calvin Coolidge defeated a very wonderful West Virginian by the name of John W. Davis. I am not holding that against the Senator from Vermont or against Calvin Coolidge or anyone else. I am just saying that John W. Davis would have made a truly great President of the United States. His campaign slogan was timely then and would be timely now—it was:

> It is the supreme need of the hour to bring back to the people confidence in their government.—John W. Davis, Presidential Candidate—against Calvin Coolidge—1924.

Mr. STAFFORD. I say to my distinguished friend that Calvin Coolidge, it is true, was born in Vermont and spent his early years there. The characteristics that allowed him later to defeat the Presidential candidate from West Virginia, however, were developed in Massachusetts.

[Laughter.]

Mr. MOYNIHAN. Mr. President, as a member of the Budget Committee, am I correct in thinking that I can yield myself some of the time remaining on the bill?

The PRESIDING OFFICER. On behalf of the Senator from South Carolina.

Mr. MOYNIHAN. On behalf of the Senator from South Carolina, I yield myself 10 minutes at this point.

Mr. President, I should like to conclude these remarks by saying to the Senator from Vermont that in light of the Senator's agreement—as best he can undertake to make an agreement on behalf of the committee—that the committee will not pursue the administration proposal to impose interest on student loans while the students are in college, I will withdraw the guaranteed student loan amendment.

Will the Chair remind me what number that amendment is so I can put it formally?

The PRESIDING OFFICER. It is unprinted amendment No. 32, and the Senator from New York does have that right.

The amendment is withdrawn.

Mr. MOYNIHAN. I thank the Chair.

So, Mr. President, there remain only the two amendments. The case on their behalf has been made, but let me briefly restate it. This is not the time to begin dismantling one of the great achievements of American Government in the 1960's and the 1970's.

First, in 1965, we made a commitment to the poor children of this Nation in the title I of the Elementary and Secondary Education Act—a general commitment to the support of elementary and secondary schools. This has not been a great, huge program albeit it has been a remarkably successful one. Be it also remembered the United States now provides a much lower percentage aid to education than does any industrial democracy I know of.

Let there be no mistake our intent, we made a policy decision in 1965. The declaration said:

> In recognition of the special educational needs of children of low-income families and the impact that concentrations of low-income families have on the ability of local education agencies to support adequate educational programs, the Congress hereby declares it to be the policy of the United States to provide financial assistance [as set forth in this title] to local educational agencies serving areas with concentrations of children from low-income families to expand and improve their educational programs by various means, [including pre-school programs] which contribute particularly to meeting the special educational needs of educationally deprived children.

This is a commitment we made in 1965, and I would be loath to see us begin to withdraw from it by accepting the actions taken at the behest of the administration and the Budget Committee.

Our commitment should remain intact. After all, the education of 2 million poor persons is at stake here; 2 million poor children.

In the mid-1970's, we made an historic commitment that everyone in this Nation able and interested in pursuing a higher education could do so when we instituted the Pell grant program. The Federal Government would see that this be done, and I note especially that the Senator from Rhode Island has been indefatigable, fearless, and extraordinarily successful in bringing such a regime into place.

The Pell grant system is one of the true achievements of the 1970's. That man is on this floor today. Generations of Americans will have their start up the ladder because of that man. We ask not for a full restoration of every single penny, not for a huge increase, we ask only that 600,000 students who would not receive Pell grants next year, if the present budget goes forward, not be denied this most basic opportunity. It is not much to ask.

We sincerely hope that the Senate will agree.

The three amendments I am offering would restore approximately $735 million of the cuts that the Budget Committee has recommended in Federal education assistance programs in fiscal 1982—with corresponding restorations in fiscal year 1981 and fiscal year 1982.

Although the Committee on Labor and Human Resources would be permitted to use these resources as it sees fit in complying with the "reconciliation" instruction, my hope and my intention is to permit the following:

To fund title I of the Elementary and Secondary Education Act, our principal program of Federal help with the education of disadvantaged children, at $3.4 billion in 1982, and to avoid rescinding funds already appropriated for fiscal 1981. The program is currently funded at a level of $3.5 billion, and serves 6 million boys and girls. The Budget Committee has recommended a drastic slash to $2.9 billion, enough to serve only 4.2 million children, and an extremely disruptive rescission of funds already committed for the school year that begins in September. My amendment would still result in savings of $100 million, but would permit 5.5 million children to receive these urgently needed educational services.

To fund the Pell grant program at $2.6 billion in fiscal year 1982. This program, formerly known as basic educational opportunity grants, is the cornerstone of our national policy of making a college education financially accessible to every person with the ability and the inclination to obtain one. It aids needy students and none others, with individual grants that now average $1,100. At the present time 2.7 million college students, approximately one out of every four, are paying for their educations with assistance from this program. The Budget Committee has recommended just $2.5 billion to pay for it. My amendment would add $100 million, permitting 2.5 million students to be assisted with average grants of $1,034.

To fund the guaranteed student loan program at $3.5 billion, rather than the $3.3 billion recommended by the Budget Committee. This is still a substantial savings, as the program this year is estimated to cost $3.7 billion—and a sizable supplemental appropriation may be required. But it would permit the Government to continue to spare needy student borrowers from having to pay interest on their loans while they are in school.

Now let us consider the policy context. The administration's recommendations, ratified by the Budget Committee, are equivalent to:

Wrecking havoc with the budget and the plans of thousands of colleges and school districts, and millions of students, for the year that begins in September.

Turning our back on the educational needs of the poor, the needy and the disadvantaged, at the elementary, secondary, and postsecondary levels.

Repealing the Middle Income Student Assistance Act that was signed into law just 28 months ago, and abjuring Federal responsibility for assisting millions of middle-income families with the costs of college education.

Turning a blind eye to the fate of hundreds of private colleges and universities whose tuition levels are so high as to require substantial loan and grant aid for their students if they are to survive as anything but educational enclaves for the well-to-do.

Let me be clear that the numbers we are proposing will result in sizable cuts below current spending levels, and will require major changes in the structure of these programs, particularly the guaranteed student loan program. I for one would agree that some limits must be placed on the explosive growth of that program, which is the one real "entitlement" program run by the Education Department. I know no one who does not concur with that view. But to require needy college students, who are already expected to work for part of their tuition, to pay interest while they are in school on the money they have borrowed to pay the balance of their tuition seems to me unreasonable, unrealistic, and unjust.

Whether to change the fundamental nature of the Elementary and Secondary Education Act is a more difficult issue. The President has proposed converting its various titles, and dozens of other programs, into "block grants" beginning in fiscal 1982.

I have myself proposed a new program of general assistance to public schools, with the Federal funds used to "match" State and local resources.

I would hope and expect that the authorizing committees of the Congress will pay the closest attention to these and other proposals. But it is wrong to take away the resources needed even to maintain existing services, must less to improve the means by which they are provided. The enormous cut in title I that has been proposed will virtually foreordain stalemate, mistrust, and acrimony at such time as program and policy changes are considered. And in the short run will deny important educational services to millions of low income schoolchildren.

This society's commitment to education is too strong to allow us willingly to jeopardize the quality and quantity of our educational offerings in the name of saving money. The education provided by our schools and colleges is the most important investment we make in the future of this society. We dare not sacrifice it on the altar of parsimony.

Mr. President, I wish to add as cosponsors to the two measures that will now be voted on, Mr. PELL, Mr. KENNEDY, Mr. RIEGLE, and Mr. SARBANES.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MOYNIHAN. In concluding, Mr. President, may I point out that Mr. CHILES will later offer an amendment to add $100 million to vocational education so that the anticipated 3 million drop in students to be covered by that program is somewhat moderated.

Finally, may I call attention for the record to a concern of Senator FORD of Kentucky who has learned that a number of banks that make student loans have been in the practice of paying out only a portion of the loan in the autumn, retaining the remainder until January or midwinter, and thereby having the advantage of the interest from that loan, the benefit of which should properly accrue to the student on whose behalf and for whose benefit it was made.

I hope the committee, in its review of these programs this year, will include this among its concerns. This seems to me reasonable and appropriate.

With that, Mr. President, and with the hope that Members on the other side of the aisle share our view in this matter, at least sufficiently to add these sums, not overwhelming, but overwhelming in importance. I thank the Chair for his courtesy and, of course, particularly thank the chairman of the committee, who has been forbearing in thoughtfulness in allowing us to speak on his time when necessary and who has listened with great attention throughout the debate.

I thank the Chair.

Mr. HATCH. I thank my distinguished colleague.

The PRESIDING OFFICER. The Senator from Utah.

Mr. HATCH. I thank the Chair.

Mr. President, I have enjoyed the arguments that have been made on these three amendments, one of which is now withdrawn. So I will not comment on the guaranteed student loan program except to say that I agree that we can survive under the present budget figures on the guaranteed student loan program and I think do quite well.

I also call attention to the Senate that during the budget markup by the Budget Committee as chairman of the Labor and Human Resources Committee I made the argument to increase the budget regarding the programs for our committee by $998 million, $2 million less than $1 billion, above the Reagan figures, in three categories:

One was $353 million added back into the handicapped program. I personally feel that the handicapped in this country need the help of the Federal Government and we would have been very ill-advised to have cut back on that particular program.

I also recommended that we increase moneys for block grant purposes with regard to the Federal educational programs by $345 million, because it is our contention that the block grants would not be implemented in time to prevent taking away funds from the programs of State and local governments.

We feel we are right on that, even though that has caused some discontent among some of our friends in the White House.

I might also add that we added another $300 mililon back in for youth employment mainly to keep the youth employment program alive and we intend to reauthorize that program and then do a very good job of oversight and review of the CETA program during this next year or two to determine just how far we should go in the various CETA proposals that are before our committee.

I believe adding a billion dollars above what President Reagan has requested was more than a reasonable step to try and do what is right with regard to these programs.

I might add it was not easy for me to make those arguments in front of the Budget Committee. It was very difficult for me because I am a strong supporter of President Reagan and his programs. But I determined to do that and have felt good about doing it even though there has been, as I said, some irritation as a result of adding those particular funds in and I might add some severe criticisms, too.

To add any more pursuant to these proposals by my illustrious colleague from New York and others I think would be unjustified under the circumstances.

Let me start with the Pell grant program, the Pell grant or the basic educational opportunity grant program, which has been renamed Pell in honor of our distinguished Senator from Rhode Island, has grown substantially.

Federal costs have increased by 95 percent from fiscal year 1977 to fiscal year 1981. That is in estimated dollar levels, from $1.9 billion to $3.7 billion in these 4 years.

Much of the growth in the Pell grant program results from liberalization of eligibility requirements that have extended benefits to middle-income families.

Nearly 10 percent of the grant money goes to families with incomes over $25,000.

The number of qualified applicants with adjusted family incomes of $20,000 or more grew from 33,000 in 1978–79 to 431,000 in 1979–80.

The President's proposal redirects the program to the most financially needy students and reaffirms the primary responsibility of the family and the student in paying for postsecondary education.

The President's policy does not "gut" the program. Under his plan 2.3 million students will receive grants averaging $1,000, in fiscal year 1982.

Students who are not receiving grants and are financially needy will be able to participate in five other Federal student financial assistance programs.

The President's proposal: Adjusts the award formula to reduce program costs; eliminates liberalized cost of education definitions; increases family contribution; requires students to provide $750 in self-help; limits the size of maximum grant.

I do not think those are unreasonable requests.

How can we justify holding to a $1,750–1,800 maximum Pell grant policy now for several years in light of the inflation in college costs? There are inflation adjustments for many other education programs, why not for Pell grants?

I hardly need to reiterate that this budget was developed under severe resource constraints and hard choices had to be made. The choice to limit Pell grants was made in the full knowledge

that rising education costs are ever more burdensome for students and their families. In spite of this, the picture is not entirely bleak and several mitigating factors helped shape the decision of the Reagan administration.

At the same time college costs are rising so are the earnings capacities of students. We estimate that by academic year 1982–83 a student working 15 hours per week at the minimum wage and saving $800 from summer earnings would have about $2,600 per year to help defray college costs. This is substantially in excess of what we estimate the average student financial burden will be at typical 4-year public institutions. The student financial burden—cost minus the sum of grant aid and expected family contribution—will be for most students at such schools less than $2,000. In other words, most students will be able to attend these institutions without borrowing at all if they so choose. Student financial burdens at higher cost institutions will typically exceed their earnings capacities, but in most cases would require only modest amounts of borrowing.

In analyses of family resources, we often forget the annual cost of maintaining a youngster in his/her late teens at home. June 1980 Department of Agriculture estimates of maintaining a 17-year-old at home under "economy," "low," and "moderate" budget assumptions are respectively $2,411, $3,347, and $4,691. These estimates suggest that fairly substantial resources might be made available to finance college when a youngster leaves home.

The Department's budget recognizes that average student financial burdens mask a great deal of variation among students and that many students will face financial sacrifices well in excess of the average. Because of this, the budget includes an additional $30 million in the supplemental opportunity grant program in 1982. These additional funds will be especially helpful in aiding those students with unusually high financial burdens, particularly those attending high cost institutions.

I think it is important to point out that in the last several years these programs, the Pell grant programs, formerly called BEOG, have been continually liberalized; Federal benefits have become excessive. Although the Pell grant program, the successor to the basic educational opportunity grant (BEOG) program, is designed primarily to assist low-income students, grants are on occassion provided to students from families with income in excess of $30,000 per year. The GSL program now provides loans of up to $2,500 annually for students and up to $3,000 annually to their parents regardless of income. Substantial Federal benefits are being paid out to those who do not need them to meet educational expenses.

Frankly, I think it is time we recognize we are a trillion dollars in debt. The interest alone on that debt is estimated to be about $90 billion in the next fiscal year, and that is more than the total Federal budget was only 22 years ago.

The Reagan administration is not cutting essential services; they are cutting the increases in the budget that are running out of control, my colleagues, although well intentioned and, I think, sincere and dedicated to their amendment, are wrong, and I believe we have to draw the line on some of these loans, and we have to draw the line on some of these programs. I think it is important to do it at this time, and I think it is very important that we do it in this particular case because I believe we are, frankly, providing enough benefits for students to be able to take care of their needs, certainly, if they are willing to work. Almost all of us had to do when we went to college and paid our own ways and, I might add, I began at 65 cents an hour as a janitor at Brigham Young University in order to pay my way through school, and I worked every holiday and summer and every second I had to be able to make it through college.

Finally, with regard to the second aspect of the distinguished Senator from New York's amendment, with regard to the elementary and secondary education add-backs, this reduces the cut in the fiscal year 1982 budget, as I understand it, to 12.5 percent from current level. But 12.5 percent is merely what President Reagan expected to achieve in administrative savings alone.

Therefore, this amendment would do nothing to control the increase in growth of the 45 programs themselves which are to be consolidated into a block grant. This amendment would do nothing to help control the inflationary impact of present Government spending levels.

The present categorical structure wastes resources through onerous Federal requirements.

The current programs have 108 pages of regulations and require over 137,000 work hours each year at the State and local level simply to produce required reports.

The administration estimates that administrative requirements consume as much as 13 percent of current Federal dollars awarded to States and localities.

The proposed grant consolidation will eliminate these categorical requirements and waste. Consequently, the elementary and secondary education programs can sustain a larger budget reduction than that proposed by the distinguished Senator in this amendment.

The Senate Budget Committee has already restored funds as I have explained, to elementary and secondary education above the President's mark. I was the person who made that motion, who moved that particular amendment.

I think rejection by the Senate of the 25-percent cut recommended by the administration in these programs will mean that they may be targeted next year for even deeper cuts. Every additional dollar spent this year will necessitate additional deficit spending by the Government.

A cut of only 12½ percent is to force the Government to spend the money that it really, frankly, does not have.

I might add, other programs serving even needier populations have borne cuts, and education is going to have to bear its fair share.

I sympathize with my distinguished colleague from New York because I am concerned about the education program in this country as well. But the final responsibility for education does rest with the States, and the Federal Government cannot be the only source of new revenue for this area.

Under the Moynihan/Pell amendment elementary and secondary education programs will not sustain their fair share of budgetary reductions.

The Moynihan/Pell proposal would reduce funds for elementary and secondary education by only 8 percent in fiscal year 1981, and 3 percent in fiscal year 1982 from funding levels provided under the fiscal year 1981 continuing resolution.

The Moynihan/Pell amendment would actually increase funds by 2 percent in 1983 over the current 1981 funding levels. So, again, the argument that we are not drastically cutting back, we are just cutting the increases in the budget or at least mainly the increases in the budget is correct.

Mr. MOYNIHAN. Mr. President, I send a technical correction to the desk regarding line 18 of UP amendment No. 3.

The PRESIDING OFFICER (Mr. LUGAR). Without objection, the amendment is so modified.

The amendment, as modified, follows:

On page 2, beginning with "$14,667,000,000" in line 14, strike out through "$47,694,000,000" in line 20, and insert in lieu thereof the following, "$14,167,000,000, and outlays by $2,303,000,000, in fiscal year 1981; to reduce budget authority by $52,225,000,000 and outlays by $36,510,000,000, in fiscal year 1982; and to reduce budget authority by $58,528,000,000, and outlays by $47,094,000,000".

On page 2, line 24, strike out "$13,300,000,000" through "$1,800,000,000" on line 1 page 3 and insert in lieu thereof the following, "$12,800,000 in budget authority and $1,450,000,000 in outlays for fiscal year 1981; by $2,850,000,000 in outlays for fiscal year 1982; and $1,700,000,000".

On page 10, beginning with "$2,388,000,000" in line 5, strike out through "$10,913,000,000" in line 9 and insert in lieu thereof the following, $1,888,000,000 in budget authority and $364,000,000 in outlays for fiscal year 1981; $9,703,000,000 in budget authority and $7,493,000,000 in outlays for fiscal year 1982; and $11,663,000,000 in budget authority and $10,313,000,000".

Mr. MOYNIHAN. Mr. President, I ask unanimous consent that it be in order with one show of hand to request the yeas and nays on the two amendments.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MOYNIHAN. Mr. President, I do request the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. BRADLEY. Mr. President, I ask unanimous consent that I be made a cosponsor of the Senator's amendments.

The PRESIDING OFFICER. Without objection, it is so ordered.

FUNDING FOR PELL GRANTS

Mr. BRADLEY. Mr. President, the administration's recommendations to tighten eligibility under the Pell grant program would increase the financial burden of needy families by increasing

the family contribution at all income levels.

Requiring a $750 self-help student contribution "except where extreme financial need is demonstrated" would add additional burden to poorer families who usually use their student's contribution for the family contribution level.

Development of human potential through Federal investment in higher education is in the national interest of a nation trying to achieve greatness. The Federal Government should carry some of the load for educating future generations as a public good.

The administration's program would place a hardship on thousands of families. Higher education costs, including tuition, books, room, board, transportation, and living expenses average $3,500 per academic year at public universities and $7,500 at private universities.

Reasonable controls on student financial assistance are necessary. However, the balance must be struck between insuring development of human resources and progressing rapidly toward economic recovery. The urgent responsibility which we face of improving the quality of life by gaining control over our economy must not cause us to overlook equally important responsibilities—especially the preparation of youth for the highest productive citizenship.

For these compelling reasons, Mr. President, I strongly support this amendment to restore funding for the Pell grants program.

GUARANTEED STUDENT LOANS

Mr. President. I am pleased to join my colleague, Senator MOYNIHAN, in this amendment to restore funding for the guaranteed student loan program.

The guaranteed student loan program makes the difference for many students today in whether and where they can pursue their education. Currently, the GSL program provides guarantees for loans of up to $2,500 annually for students; up to $5,000 annually for graduate students; and up to $3,000 annually for parents. The student loans are interest free while the student is in school and begin accumulating interest of only 9 percent once the student finishes school. The parents are charged 9 percent interest from the start. Neither the parent or student loan program is income tested.

The Reagan administration has proposed the following changes, which were also included in the January budget:

Limit the loan amount to "remaining need."

Impose the 9-percent interest rate for the student loans during the years the student is in school.

Impose a market level interest rate for the parent loans.

While tightening in the GSL program is appropriate, I believe that the administration has been overzealous, with some harmful effects.

By limiting the GSL loan amount to remaining need, as determined in a national needs analysis formula, and by increasing interest paid on parent loans to market rates, the administration has effectively targeted the GSL program on the "truly needy." President Carter proposed the same changes and I support them as well.

But the imposition of the 9-percent rate while these truly needy students are in school, while they have little possibility of earnings to offset the accumulating interest, is an unwise policy. The effect of eliminating the in-school interest subsidy will be to increase by approximately one-third the cost on an undergraduate education as measured by student indebtedness.

For those students attending high-cost institutions, which means most nonpublic colleges and universities, the resulting debt from both capital and accumulated interest may prove to be too great, leading to withdrawal from the private institution in favor of the much less expensive public alternative. Fine educations can be had in the public sector as well, but the overall effect on our system of higher education would, in my opinion, be unhealthy: the segregation of the wealthy students, who can pay their own way, and the very low income students, who can draw on grants and scholarships for 100-percent financing, into private institutions, while the middle-class student dominates public institutions.

The loss of the in-school interest subsidy would have particularly serious consequences for graduate students. First, the loss of the subsidy would increase the indebtedness of graduate students a similar 30 percent or more. Many of these students already carry large loans from their undergraduate years and family support is not as readily available for graduate education.

Some graduates of law, medical, and business schools may have high-income expectations, and would not be as reluctant to increase their indebtedness for purposes of completing their professional training. Other graduates of those schools and most liberal arts and sciences Ph. D.'s who seek teaching or research careers will be driven out of school or away from teaching and public service careers. The country is already experiencing a serious shortage of engineering and science faculty. If there are reductions in NSF fellowships and project support, as proposed by the administration, many of our most talented graduate students could be lost—a loss which would have long-term consequences to the Nation's research base.

Mr. FORD. Mr. President, I am greatly concerned about the administration's proposals to reduce this Nation's commitment to education. These budget reductions will have an adverse impact on students, parents, and institutions of higher learning. I am referring to the proposed changes in the Pell grant program, the guaranteed student loan program, and the student benefits under the Social Security Act.

I would like to relate an incident which illustrates my concerns. Nothing is more important than personal experience. While at home in Owensboro several weekends ago, I went to the grocery store to make a quick shopping run. As I went through the checkout line, a young man there offered to carry my groceries to the car for me.

I thanked him, but said I thought I could handle it on my own. He took the bag anyway and said there was something on his mind he needed to talk to me about.

As we walked, he explained he was a college student, that he was working at the store to help pay his way through school, and that if the Government took away financial aid he was receiving in the form of a student loan, there was no way he—or his family—could afford to meet tuition costs.

He was as sincere as he could be and I know that he is far from the only one in that dilemma. There are thousands of others whose ability to start or stay in college is threatened by rising costs and shrinking means of financial assistance.

The point that the young man made touched home with me and illustrates one of the reasons why I have mixed emotions about the major budget cuts and shifts in Federal spending which are now making their way through Congress.

After all, no one can argue with the overall objectives of these cuts. Everybody wants to see Federal spending reduced and the budget balanced. Likewise, no one can argue that there is not room for considerable belt tightening all the way around the Federal budget.

At the same time, however, I have the feeling we could be on the verge of making some serious mistakes that will have a dramatic and lasting impact on the future of the country.

I am not just referring to the massive cuts in social programs that will reduce Government's ability to help the sick, the poor, and the other needy individuals who are helped by Government assistance programs.

I am thinking about the restrictions we might be imposing, through aid to higher education costs, that will shortchange this country's ability to help our young people—and thus our future to the fullest.

We have been told that the reductions would cause a significant rise in the cost of education to students as financially strapped institutions raise tuition costs and bring on a substantial cutback in research programs at major universities. The institutions of Kentucky have already been hit with budget cuts necessitated by fiscal restraint at the State level.

These warnings are alarming and cause for concern.

This country's greatest resource is and always has been the inespacable fact that the country's future is in the hands of its young people.

The ingenuity and determination of people has put this country where it is today—the leader in technological and scientific advances. In no small measure, that has happened because Government encouraged people to realize their greatest potential and provided opportunities for higher education and training to those who, for various reasons, financial and otherwise, might never have been given the chance.

Of immediate concern is the traumatic impact these cuts will have in the next school year. Financial aid officers should be making decisions now about the upcoming fall semester. They cannot be-

cause they have no idea of the constraints under which they will be working this fall. In fact, the Department of Education has issued a moratorium on the processing of all guaranteed student loans. Inflation has greatly compounded the problems of parents trying to save enough for their children's education, and now the Federal Government has further complicated the situation by proposing significant changes in the eligibility requirements of the student assistance programs without providing adequate lead time.

Besides the reductions proposed in the Department of Education programs, the administration also has proposed the elimination student benefits under the Social Security Act. Administration officials contend that these benefits are now duplicative with the advent of the Federal aid programs within the Department of Education. I do not believe this assertion.

Let us examine the impact of this proposal which the administration has presented as a phase-out. Under the Reagan administration plan, no new students will be covered under the program after August of this year. This means that some students who are already seniors in high school will be denied benefits which, until recently, they thought would be forthcoming. They and their parents have been counting on this program and the rug will be pulled out from under them.

Mr. President, I understand the need for fiscal restraint, but we should not proceed without adequate knowledge of the implications of our actions. Congress should be presented with well reasoned alternatives to the President's proposals. Why not maintain current benefits for those presently in school? Why not make the budget cuts for student benefits prospective, applicable only to recipients of future beneficiaries of social security? This would allow the parents and students the chance to plan for their future in a responsible manner. If the benefits must be reduced so quickly, why not give former beneficiaries a higher priority for guaranteed student loans? I raise these questions because many Americans are looking for answers. For the sake of equity, Congress should provide them answers.

Somehow during the debate over the budget cuts, we must pause and reflect on that.

Somewhere we must ask what price will be extracted from society as a sacrifice for reduced Government spending in stimulating education, training, research, and development.

Who are we helping with these cuts? Who are we hurting? Can this country maintain its posture at the forefront of the research and development arena without a strong commitment to providing and maintaining higher education opportunities for all—not just those who can afford it?

These are essential and relevant questions that must not be set aside in the rush to reduce Federal spending. The consequences—both current and long range—of each and every proposed action must be carefully weighed.

I can say for a fact that there is a tremendous groundswell of support from people everywhere for Congress to move quickly and rubberstamp its approval to the total spending cut package the administration has proposed. People are frustrated with inflation. They want something done and they want it done now.

I want something done, too, but somehow, though, one thought continues to linger in my mind and I cannot grasp the answer. If we act too quickly, if we act without sufficient thought and justification, will we make mistakes that will haunt this country long after we are finished?

GUARANTEED STUDENT LOANS

Mr. ROBERT C. BYRD. Mr. President, the administration has proposed many budget cuts in student aid programs for higher education including reducing Pell grants, guaranteed student loans, and varied health manpower training programs.

A college education means opportunity. Just as we invest in our industry and factories, we must invest in our young people for a better future. More than three times as many young Americans are enrolled in colleges and universities today than 20 years ago. This is tremendous progress. I fear the administration's recommendations on student assistance could reverse this trend.

Limiting the availability of loan money could have a tremendous impact on private colleges and universities, which depend upon tuition payments to a much greater degree than do public institutions for postsecondary schooling. In my own State of West Virginia, the survival of nine private independent colleges, and one university is endangered by the proposed changes.

The administration has proposed to limit the guaranteed student loan program by restricting the loans to students who demonstrate financial need after that need has been determined through a tight income formula. It would also eliminate the in-school interest subsidy, and the special allowance that lenders receive for making loans to parents of students.

The administration's plan has caused some confusion and uncertainty. Preliminary reports, particularly from small banks, indicate that participation in the student loan program may no longer be feasible because of the increased cost of needs analysis, the removal of the in-school subsidy, and the reduction of loans to small amounts that banks are unwilling to handle.

It is my hope that there will be a detailed study of the administration's proposals in the very near future. Under the proposed guaranteed loan plan, students could suffer a significant increase in the cost of their loans. College and university tuitions are rising rapidly—by some estimates from 14 to 18 percent annually in private and 9 percent in public institutions.

Adequate financing is a prerequisite for quality education. The Higher Education Act of 1965 has been amended a number of times since its enactment, and each time the Congress has sought to make the legislation more responsive to the changing needs of aid recipients and more reflective of the changes in our education system.

Revisions in the guaranteed student loan program have demonstrated Congress continued concern with inflation and the rising cost of education and their impact on lower- and middle-income families. The need for Federal assistance to young people from these families is easily understood. Without aid, many young people would be denied the prospect of pursuing studies that would benefit them—allow them to make a greater contribution to society.

I am strongly committed to the goal of advancing equal opportunity in education through Federal financial assistance. At the same time, student aid programs must not be viewed as free reservoirs of money; fraud must be cut in these as well as in other Government programs. When a student accepts a loan, that student also accepts the responsibility to repay it under the agreed upon terms.

Unfortunately, many of our student loan programs have been troubled by high default rates. Under pressure from the Congress, the Office of Student Financial Assistance was established 4 years ago to improve collection efforts. At the time that the office was created, there were some 300,000 guaranteed student loan accounts on record, of which only 24,000 were being paid on a regular basis. Just 2 years later, 106,000 accounts were being paid on a regular basis, and more than 51,000 had been paid in full.

Last year, additional measures were taken to curb loan defaults. A new system was established for the Federal Government to share information on defaulted loans with credit bureaus. The Department of Justice has also followed the Congress lead, and last February it began a broad new crackdown on student loan defaults with the filing on some 500 lawsuits.

The guaranteed student loan program is the major vehicle through which middle-income families find the financial resources necessary to send their children to school. The program means that a student may elect to assume independent responsibility for his or her college expenses.

The administration's guaranteed student loan plan deeply concerns me. Funds for the loans are currently supplied by thousands of private lenders. The idea that banks and other lending institutions may drop out of the program because of the increased paperwork troubles me—particularly because there are such smaller banks in rural areas, and these banks are the ones which can least afford the increased cost of paperwork.

Other aspects of the plan trouble me as well. If students pay interest on guaranteed loans while in school, will they not have to borrow more to pay for the interest? While a student may be able to manage higher borrowings the first year, after the second or third, many would be borrowing heavily to finance the next year's interest payment.

Last year, we raised interest rates for the guaranteed student loans and made

other program modifications. We took a great deal of time examining and revising the program. Let us again look carefully before we take other steps; we want to be marching forward, not backward.

Mr. LEAHY. Mr. President, I rise in support of the amendments offered by Senators MOYNIHAN and PELL to the budget resolution, particularly those amendments on the guaranteed student loan and Pell grant programs.

I believe that many changes can and should be made to further tighten eligibility for these and other student assistance programs, and I will lend my support to those efforts. However, I cannot support all the massive reductions in student financial assistance called for by the administration. The elimination of the in-school interest subsidy in the guaranteed student loan program would sharply reduce the number of private lenders participating in the program and the number of students who receive these loans.

Some 3.4 million students now receive guaranteed student loans. Under President Reagan's proposal, some 2 million students would be served at a cost to the Federal Government of $3.3 billion. This would mean the elimination of loans to 1.4 million students now receiving them, and an additional 600,000 students would have to change to lower cost schools.

Under the Moynihan-Pell amendment, there would still be a substantial reduction in funds for the guaranteed student loan program, but 2.5 million students could continue to receive the loans at a cost of $3.5 million. Estimates of the Congressional Budget Office on the guaranteed student loan program were not fully considered by the Senate Committee on Labor and Human Resources and the Senate Budget Committee. There is some question as to whether these committees will have the budgetary flexibility necessary to retain the in-school interest subsidy for the guaranteed student loan program.

Any major reduction in the availability of funds for student assistance under this loan program and the Pell grant program would have a disproportionate and debilitating effect on the Vermont economy. Higher education is one of Vermont's largest industries. Guaranteed student loans account for 32.3 percent of total tuition revenues for Vermont colleges and universities.

The future of many Vermonters—their academic growth and employment opportunities—depends on a sound guaranteed student loan program and Pell grant program. Fully 49 percent of Vermont students receive aid under the guaranteed student loan program, and 25.5 percent receive Pell grants.

Dr. Janet Gorman Murphy, president of Lyndon State College in Vermont, testified before a Congressional Committee on the effects of these proposals on small colleges. According to Dr. Murphy:

> The aspiration rate for higher education in Vermont is lower than any other State in the country. The Vermont per capita income is $7,400. In the counties surrounding Lyndon State College, the average income is $5,700. A decrease in Federal financial aid would further decrease this aspiration, making higher education even less accessible to Vermonters.

I urge my colleagues to support the amendments offered by Senators MOYNIHAN and PELL. The cost of education may well be high. But the cost of ignorance is far greater.

VOTE ON AMENDMENT NO. 24

The PRESIDING OFFICER. The hour of 2 o'clock having arrived, the question is on agreeing to the amendment of the Senator from New Jersey, amendment No. 24. The yeas and nays have been ordered, and the clerk will call the roll.

Mr. CRANSTON. I announce that the Senator from Massachusetts (Mr. TSONGAS), and the Senator from New Jersey (Mr. WILLIAMS) are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who wish to vote?

The result was announced—yeas 17, nays 81, as follows:

[Rollcall Vote No. 52 Leg.]

YEAS—17

Bradley	Ford	Matsunaga
Bumpers	Glenn	Metzenbaum
Byrd, Robert C.	Inouye	Moynihan
Cranston	Jackson	Murkowski
Dodd	Kennedy	Weicker
Durenberger	Levin	

NAYS—81

Abdnor	Goldwater	Nunn
Andrews	Gorton	Packwood
Armstrong	Grassley	Pell
Baker	Hart	Percy
Baucus	Hatch	Pressler
Bentsen	Hatfield	Proxmire
Biden	Hawkins	Pryor
Boren	Hayakawa	Quayle
Boschwitz	Heflin	Randolph
Burdick	Heinz	Riegle
Byrd, Harry F., Jr.	Helms	Roth
	Hollings	Rudman
Cannon	Huddleston	Sarbanes
Chafee	Humphrey	Sasser
Chiles	Jepsen	Schmitt
Cochran	Johnston	Simpson
Cohen	Kassebaum	Specter
D'Amato	Kasten	Stafford
Danforth	Laxalt	Stennis
DeConcini	Leahy	Stevens
Denton	Long	Symms
Dixon	Lugar	Thurmond
Dole	Mathias	Tower
Domenici	Mattingly	Wallop
Eagleton	McClure	Warner
East	Melcher	Zorinsky
Exon	Mitchell	
Garn	Nickles	

NOT VOTING—2

Tsongas	Williams

So Mr. BRADLEY's amendment (No. 24) was rejected.

Mr. McCLURE. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. DOMENICI. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, are there other votes stacked to be disposed of back to back?

The PRESIDING OFFICER. There are.

Mr. BAKER. How many, Mr. President?

The PRESIDING OFFICER. The Senate will be in order.

If the Senator from Idaho obtains the yeas and nays on either of his two amendments, there will be three.

Mr. BAKER. Mr. President, I yield to the Senator from Idaho for that purpose.

Mr. McCLURE. Mr. President, I ask for the yeas and nays on my amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. McCLURE. Mr. President, is the perfecting amendment to a committee amendment?

The PRESIDING OFFICER. The Senator is correct.

Mr. BAKER. Mr. President, I ask unanimous consent that the remaining votes, the three votes which will now occur back to back, each be 10-minute rollcall votes, with the buzzer to sound as usually prescribed.

The PRESIDING OFFICER. Is there objection?

Mr. McCLURE. Mr. President, I withdraw my substitute amendment.

The amendment (No. 23) was withdrawn.

The PRESIDING OFFICER. Without objection, the votes will be 10-minute votes.

Mr. FORD. Mr. President, a point of information.

The PRESIDING OFFICER. The Senator from Kentucky.

Mr. FORD. Will the Chair state which amendments the Senate will now be required to vote upon?

The PRESIDING OFFICER. The amendment is the unprinted amendment No. 30, offered by the Senator from Idaho (Mr. McCLURE).

Mr. FORD. And its contents, Mr. President?

The PRESIDING OFFICER. The purpose is to restore funding for the strategic petroleum reserve.

Mr. FORD. Is this the one that takes off 6 percent?

Mr. McCLURE. Six-tenths of 1 percent.

Mr. FORD. That is in the out years, I just want to be sure.

I thank the Chair.

VOTE ON UP AMENDMENT NO. 30

The PRESIDING OFFICER. The question is on agreeing to the amendment. The yeas and nays have been ordered. The clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Massachusetts (Mr. TSONGAS), and the Senator from New Jersey (Mr. WILLIAMS) are necessarily absent.

The PRESIDING OFFICER (Mr. SIMPSON). Are there any other Senators in the Chamber who wish to vote?

The result was announced—yeas 22, nays 76, as follows:

[Rollcall Vote No. 53 Leg.]

YEAS—22

Bentsen	Heflin	Melcher
Bradley	Helms	Murkowski
Byrd, Harry F., Jr.	Huddleston	Nickles
	Humphrey	Symms
Byrd, Robert C.	Inouye	Wallop
Dodd	Jackson	Warner
East	Matsunaga	Zorinsky
Exon	McClure	

NAYS—76

Abdnor	Garn	Moynihan
Andrews	Glenn	Nunn
Armstrong	Goldwater	Packwood
Baker	Gorton	Pell
Baucus	Grassley	Percy
Biden	Hart	Pressler
Boren	Hatch	Proxmire
Boschwitz	Hatfield	Pryor
Bumpers	Hawkins	Quayle
Burdick	Hayakawa	Randolph
Cannon	Heinz	Riegle
Chafee	Hollings	Roth
Chiles	Jepsen	Rudman
Cochran	Johnston	Sarbanes
Cohen	Kassebaum	Sasser
Cranston	Kasten	Schmitt
D'Amato	Kennedy	Simpson
Danforth	Laxalt	Specter
DeConcini	Leahy	Stafford
Denton	Levin	Stennis
Dixon	Long	Stevens
Dole	Lugar	Thurmond
Domenici	Mathias	Tower
Durenbergers	Mattingly	Weicker
Eagleton	Metzenbaum	
Ford	Mitchell	

NOT VOTING—2

Tsongas	Williams

So Mr. MCCLURE's amendment (UP No. 30) was rejected.

Mr. HATFIELD. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. DOMENICI. Mr. President, I move to lay on motion on the table.

The motion to lay on the table was agreed to.

VOTE ON UP AMENDMENT NO. 31

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from New York concerning the so-called Pell grants.

On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Connecticut (Mr. DODD), the Senator from Massachusetts (Mr. TSONGAS), and the Senator from New Jersey) Mr. WILLIAMS, are necessarily absent.

I further announce that, if present and voting, the Senator from Connecticut (Mr. DODD), would vote "yea."

Mr. GOLDWATER. Mr. President, regular order.

The PRESIDING OFFICER. Are there any Senators who have not yet voted?

The result was announced—yeas 30, nays 67, as follows:

[Rollcall Vote No. 54 Leg.]

YEAS—30

Baucus	Eagleton	Matsunaga
Biden	Ford	Metzenbaum
Bradley	Glenn	Moynihan
Bumpers	Hart	Pell
Burdick	Huddleston	Randolph
Byrd, Robert C.	Inouye	Riegle
Cannon	Jackson	Sarbanes
Cranston	Kennedy	Sasser
DeConcini	Leahy	Stennis
Dixon	Levin	Zorinsky

NAYS—67

Abdnor	Cohen	Grassley
Andrews	D'Amato	Hatch
Armstrong	Danforth	Hatfield
Baker	Denton	Hawkins
Bentsen	Dole	Hayakawa
Boren	Domenici	Heflin
Boschwitz	Durenberger	Heinz
Byrd, Harry F., Jr.	East	Helms
	Exon	Hollings
Chafee	Garn	Humphrey
Chiles	Goldwater	Jepsen
Cochran	Gorton	Johnston
Kassebaum	Nickles	Simpson
Kasten	Nunn	Specter
Laxalt	Packwood	Stafford
Long	Percy	Stevens
Lugar	Pressler	Symms
Mathias	Proxmire	Thurmond
Mattingly	Pryor	Tower
McClure	Quayle	Wallop
Melcher	Roth	Warner
Mitchell	Rudman	Weicker
Murkowski	Schmitt	

NOT VOTING—3

Dodd	Tsongas	Williams

So Mr. MOYNIHAN's amendment (UP No. 31) was rejected.

Mr. WARNER. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. DOMENICI. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

VOTE ON UP AMENDMENT NO. 33, AS MODIFIED

The PRESIDING OFFICER. The question is on agreeing to UP amendment No. 33, as modified, of the Senator from New York.

On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Massachusetts (Mr. TSONGAS) and the Senator from New Jersey (Mr. WILLIAMS) are necessarily absent.

The result was announced—yeas 33, nays 65, as follows:

[Rollcall Vote No. 55 Leg.]

YEAS—33

Baucus	Eagleton	Melcher
Biden	Ford	Metzenbaum
Bradley	Glenn	Moynihan
Bumpers	Hart	Pell
Burdick	Hollings	Pryor
Byrd, Robert C.	Inouye	Randolph
Chiles	Jackson	Riegle
Cranston	Kennedy	Sarbanes
DeConcini	Leahy	Sasser
Dixon	Levin	Stennis
Dodd	Matsunaga	Weicker

NAYS—65

Abdnor	Goldwater	Mitchell
Andrews	Gorton	Murkowski
Armstrong	Grassley	Nickles
Baker	Hatch	Nunn
Bentsen	Hatfield	Packwood
Boren	Hawkins	Percy
Boschwitz	Hayakawa	Pressler
Byrd, Harry F., Jr.	Heflin	Proxmire
	Heinz	Quayle
Cannon	Helms	Roth
Chafee	Huddleston	Rudman
Cochran	Humphrey	Schmitt
Cohen	Jepsen	Simpson
D'Amato	Johnston	Specter
Danforth	Kassebaum	Stafford
Denton	Kasten	Stevens
Dole	Laxalt	Symms
Domenici	Long	Thurmond
Durenberger	Lugar	Tower
East	Mathias	Wallop
Exon	Mattingly	Warner
Garn	McClure	Zorinsky

NOT VOTING—2

Tsongas	Williams

So Mr. MOYNIHAN's amendment (UP No. 33), as modified, was rejected.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. DOMENICI. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Several Senators addressed the Chair.

APPOINTMENTS BY THE VICE PRESIDENT

The PRESIDING OFFICER (Mr. SIMPSON). The Chair, on behalf of the Vice President, pursuant to 10 U.S.C. 4355(a), appoints the following Senators to the Board of Visitors to the U.S. Military Academy: the Senator from Connecticut (Mr. WEICKER), Appropriations; the Senator from New York (Mr. D'AMATO), At-Large; the Senator from Hawaii (Mr. INOUYE), Appropriations; and the Senator from Georgia (Mr. NUNN), Armed Services.

The Chair, on behalf of the Vice President, pursuant to 10 U.S.C. 6968(a), appoints the following Senators to the Board of Visitors to the U.S. Naval Academy: the Senator from Idaho (Mr. MCCLURE), Appropriations; the Senator from Iowa (Mr. JEPSEN), Armed Services; the Senator from South Carolina (Mr. HOLLINGS), Appropriations; and the Senator from Maryland (Mr. SARBANES), At-Large.

The Chair, on behalf of the Vice President, pursuant to 10 U.S.C. 9355(a), appoints the following Senators to the Board of Visitors to the U.S. Air Force Academy: the Senator from Alaska (Mr. STEVENS), Appropriations; the Senator from Arizona (Mr. GOLDWATER), Armed Services; the Senator from Louisiana (Mr. JOHNSTON), Appropriations; and the Senator from Colorado (Mr. HART), At-Large.

BUDGET RESOLUTION OF RECONCILIATION AND INSTRUCTION

The Senate continued with the consideration of the concurrent resolution.

The PRESIDING OFFICER. The Senator from New York.

Mr. MOYNIHAN. Mr. President, in the event that an oversight omitted the senior Senator from West Virginia (Mr. RANDOLPH) as a cosponsor of the two previous amendments just voted upon, I ask unanimous consent that he be listed as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MOYNIHAN. I thank the Chair.

Mr. President, may I make the same request for the junior Senator from West Virginia, the minority leader, Mr. ROBERT C. BYRD?

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 34

(Purpose: To restore funds for certain programs)

Mr. CHAFEE. Mr. President, I send an unprinted amendment to the desk and ask for its immediate consideration. This amendment is offered on behalf of myself, Mr. HEINZ, Mr. STAFFORD, Mr. PERCY, Mr. COHEN, Mr. SPECTER, Mr. DANFORTH, Mr. DURENBERGER, Mr. WEICKER, Mr. MATHIAS, Mr. SARBANES, Mr. MITCHELL, Mr. METZENBAUM, Mr. BRADLEY, Mr. BURDICK, Mr. HART, Mr. EAGLETON, Mr. MOYNIHAN, Mr. BIDEN, Mr. LEVIN, and Mr. DODD.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Rhode Island (Mr. CHAFEE), for himself and other Senators, proposes an unprinted amendment numbered 34.

Mr. CHAFEE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 2, beginning with line 12, strike out through line 10 on page 10 and insert the following:

SEC. 9. (a) Congress hereby determines and declares that it is necessary to make changes in enacted laws in order to reduce budget authority by $14,667,000,000, and outlays by $2,353,000,000 in fiscal year 1981; to reduce budget authority by $51,625,000,000, and outlays by $36,475,000,000 in fiscal year 1982; and to reduce budget authority by $57,678,000,000, and outlays by $46,404,000,000 in fiscal year 1983.

(b) The Committees on Appropriations of the House and Senate shall report not later than June 5, 1981, legislation to reduce previously enacted appropriations by $13,300,000,000 in budget authority and $1,500,000,000 in outlays for fiscal year 1981; by $3,200,000,000 in outlays for fiscal year 1982; and $1,800,000,000 in outlays for fiscal year 1983.

(c) Not later than May 31, 1981, the committees named in subsections (c)(1) through (c)(30) of this section shall submit their recommendations to the Committees on the Budget of their respective Houses. Those recommendations shall be sufficient to accomplish the reductions required by subsections (c)(1) through (c)(30) of this section. After receiving those recommendations, the Committees on the Budget shall report to the House and Senate a reconciliation bill or resolution or both carrying out all such recommendations without any substantive revision.

SENATE COMMITTEES

(1)(A) The Senate Committee on Agriculture, Nutrition, and Forestry shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce outlays by $163,000,000 in fiscal year 1981; to reduce budget authority by $474,000,000 and outlays by $928,000,000 in fiscal year 1982; and to reduce budget authority by $659,000,000 and outlays by $618,000,000 in fiscal year 1983; and

(B) The Senate Committee on Agriculture, Nutrition, and Forestry shall also report changes in laws within the jurisdiction of that committee sufficient to require reductions in appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $654,000,000 in budget authority and $3,000,000 in outlays for fiscal year 1981; $3,243,000,000 in budget authority and $3,200,000,000 in outlays for fiscal year 1982; and $4,011,000,000 in budget authority and $3,961,000,000 in outlays for fiscal year 1983.

(2) The Senate Committee on Armed Services shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce budget authority by $233,000,000 and outlays by $233,000,000 in fiscal year 1981; to reduce budget authority by $966,000,000 and outlays by $966,000,000 in fiscal year 1982; and to reduce budget authority by $899,000,000 and outlays by $899,000,000 in fiscal year 1983.

(3) The Senate Committee on Banking, Housing, and Urban Affairs shall report changes in laws within the jurisdiction of that committee sufficient to require reductions in appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $5,846,000,000 in budget authority and $133,000,000 in outlays for fiscal year 1981; $15,210,000,000 in budget authority and $785,000,000 in outlays for fiscal year 1982; and $18,062,000,000 in budget authority and $1,796,000,000 in outlays for fiscal year 1983.

(4)(A) The Senate Committee on Commerce, Science, and Transportation shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce budget authority by $150,000,000 and outlays by $150,000,000 in fiscal year 1982 and to reduce budget authority by $300,000,000 and outlays by $300,000,000 in fiscal year 1983; and

(B) The Senate Committee on Commerce, Science, and Transportation shall also report changes in laws within the jurisdiction of that committee sufficient to require reductions in appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $1,193,000,000 in budget authority and $584,000,000 in outlays for fiscal year 1982 and $1,298,000,000 in budget authority and $1,028,000,000 in outlays for fiscal year 1983.

(5) The Senate Committee on Energy and Natural Resources shall report changes in laws to modify programs within the jurisdiction of that committee sufficient to require reductions in appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $2,071,000,000 in budget authority and $106,000,000 in outlays for fiscal year 1981, $3,714,000,000 minus $50,000,000 in budget authority and $3,404,000,000 minus $50,000,000 in outlays for fiscal year 1982; and $3,660,000,000 minus $150,000,000 in budget authority and $3,628,000,000 minus $150,000,000 in outlays for fiscal year 1983.

(6)(A) The Senate Committee on Environment and Public Works shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce outlays by $185,000,000 in fiscal year 1982 and to reduce outlays by $900,000,000 in fiscal year 1983; and

(B) The Senate Committee on Environment and Public Works shall also report changes in laws within the jurisdiction of that committee sufficient to require reductions in appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $2,350,000,000 in budget authority and $68,000,000 in outlays for fiscal year 1981; $4,935,000,000 in budget authority and $793,000,000 in outlays for fiscal year 1982; and $3,035,000,000 in budget authority and $1,872,000,000 in outlays for fiscal year 1983.

(7)(A) The Senate Committee on Finance shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public law 93-344, sufficient to reduce budget authority by $212,000,000 and outlays by $295,000,000 in fiscal year 1981; to reduce budget authority by $4,354,000,000 and outlays by $9,354,000,000 in fiscal year 1982; and to reduce budget authority by $4,494,000,000 and outlays by $10,870,000,000 in fiscal year 1983; and

(B) The Senate Committee on Finance shall also report changes in laws within the jurisdiction of that committee sufficient to require reductions in appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $96,000,000 in budget authority and $112,000,000 in outlays for fiscal year 1982 and $114,000,000 in budget authority and $132,000,000 in outlays for fiscal year 1983.

(8) The Senate Committee on Foreign Relations shall report changes in laws to modify programs within the jurisdiction of that committee sufficient to require reductions in appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $1,050,000,000 in budget authority and $301,000,000 in outlays for fiscal year 1982 and $600,000,000, in budget authority and $367,000,000 in outlays for fiscal year 1983.

(9)(A) The Senate Committee on Governmental Affairs shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce outlays by $513,000,000 in fiscal year 1982 and to reduce outlays by $414,000,000 in fiscal year 1983; and

(B) The Senate Committee on Governmental Affairs shall also report changes in laws within the jurisdiction of that committee sufficient to require reductions in appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $4,776,000,000 in budget authority and $4,690,000,000 in outlays for fiscal year 1982 and $6,360,000,000 in budget authority and $6,388,000,000 in outlays for fiscal year 1983.

(10) The Senate Committee on the Judiciary shall report changes in laws to modify programs within the jurisdiction of that committee sufficient to require reductions in appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $116,000,000 in budget authority and $13,000,000 in outlays for fiscal year 1982 and $133,000,000 in budget authority and $81,000,000 in outlays for fiscal year 1983.

(11)(A) The Senate Committee on Labor and Human Resources shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce budget authority by $39,000,000 and outlays by $49,000,000 in fiscal year 1981; to reduce budget authority by $658,000,000 and outlays by $622,000,000 in fiscal year 1982; and to reduce budget authority by $1,601,000,000 and outlays by $1,495,000,000 in fiscal year 1983; and

(B) The Senate Committee on Labor and Human Resources shall also report changes in laws within the jurisdiction of that committee sufficient to require reductions in appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $1,813,000,000 in budget authority and $354,000,000 in outlays for fiscal year 1981; $9,353,000,000 in budget authority and $7,128,000,000 in outlays for fiscal year 1982; and $11,163,000,000 in budget authority and $9,863,000,000 in outlays for fiscal year 1983.

Mr. DOMENICI. Mr. President, the distinguished Senator from Rhode Island, under the amount of time allowed for amendments, would be allowed a half hour and I would have a half hour in opposition. Might I ask, Does the Senator intend to ask for additional time or will a half hour on each side be sufficient?

Mr. CHAFEE. I would think a half hour would be sufficient, but by saying that I am being bound?

Mr. DOMENICI. Not at all. I would be pleased to yield the Senator some time on the concurrent resolution. I would just like to know more or less that we are in that ball park, that we are not talking about 2 hours.

Mr. CHAFEE. We have several who wish to be heard on our side. I do not know whether the Senator from New Mexico has other speakers or not. The

Senator from New Mexico can probably carry the ball in about 10 minutes.

Mr. DOMENICI. I appreciate the Senator's comments.

Mr. CHAFEE. We have a heavy row to hoe. Why do we not just say three-quarters, one-quarter?

Mr. DOMENICI. Let us just proceed. It will not take a lot of time, I understand.

Mr. CHAFEE. Mr. President, I yield to my distinguished colleague from Rhode Island who has an appointment. I yield 2 minutes.

Mr. PELL. Mr. President, I rise in strong support of the amendment of the Senator from Rhode Island, my colleague and friend (Mr. CHAFEE). This amendment, while it does not contain all that I would like to see, contains many strong elements, and to my mind is a minimum of what this Congress should do and what the Senate should do on the message sent to it from downtown.

In the different items, he includes low-income energy assistance. No part of the Nation needs this more than the Northeast. However, even in the Sunbelt there is need for air-conditioning at certain times. In the UDAG program, we will know what is needed there. In the area of rehabilitation, I was disappointed to see our amendment go down in defeat, but I hope this matter will fare better when proposed by the Republican side.

We know the impact that the cutbacks will have in health services, housing, weatherization, community development, and mass transit. All of these are vital and essential programs.

In the area of energy, annual increases in the cost of home heating have reached levels that the average American can no longer bear. This year $1.85 billion was appropriated and 50 million people have been served. Next year even more families will need protection in order to brace themselves against the economic effect of oil decontrol and the possible deregulation of natural gas. My staff has projected that it would take approximately $2.3 billion to maintain the current levels of assistance, in real terms.

I am sad to say that the administration has only proposed $1.35 billion for this program, a full 25 percent less than last year. This means that next year while the price of home energy will be more than 25 percent higher, the elderly, the poor, and moderate-income workers will have their purchasing power under this program eroded by more than 50 percent as a result of the administration's cut combined with inflation and the rising cost of heating oil.

And if the Budget Committee's reconciliation resolution is approved by the Senate, the news could be even worse for beneficiaries under this program.

I have evaluated the President's proposals with an open mind. I support the objective of reducing Federal spending but believe the national interest will not be served if those who are most in need bear the brunt of the proposed spending cuts.

The State of Rhode Island is at the very end of the energy supply pipeline. It is 84 percent dependent upon foreign oil and 70 percent of all Rhode Island homes are heated with this most expensive and uncertain energy source.

This year my State received $12 million for heating aid. To maintain the same purchasing power next year, we would need almost $16 million. However, if the proposed reductions for this program are agreed to by the Senate we would receive less than $10 million.

I share these shocking statistics with my colleagues, because someone will have to make a choice between low-income families and elderly citizens who are in need to determine those who are most in need. In my view, this is a cruel and heartless choice that should never have to be made.

The individuals who are the unlucky victims of this process are the same people that will also be losing food stamps, health care services, and Federal assistance to meet the high cost of education. I wonder, Mr. President, how much can these individuals take and what should they reasonably be expected to take?

In my 20 years in the Senate I have been proud to be a member of the Labor and Human Resources Committee, because it has authored programs that have reduced human suffering and given the poor economic security.

I hope that my colleagues of this committee and other Senators will have the courage to stand up and oppose the recommended reduction in the low-income energy assistance program so that none of our citizens will have to suffer the personal degradation and pain of choosing between heating and eating next winter.

On the issue of preventive health care services and funding for community health centers, numerous studies have reviewed the efficiency, cost effectiveness and quality of care rendered by neighborhood medical centers. Virtually all reports have praised these institutions for the high quality of services that they provide to medically underserved individuals.

There are 22 million people in our country without any health insurance protection. More than one-half of the community health center patients come from this group. The only alternative for these individuals without health insurance protection is to seek treatment in hospital emergency rooms, where a single visit can cost $50—about $40 more than an average visit to a community health center.

In addition to being cost-effective alternatives, community health centers have improved the access to health care services for the disadvantaged. Their presence has reduced hospital admissions and has improved the overall health of participants by reducing infant mortality and containing communicative diseases such as measles and rubella.

There are 14 community health centers in our State of Rhode Island that provide basic services at 24 sites to 40,000 citizens. The majority of recipients are poor, near poor and non-English speaking (including 2,500 Indo-Chinese refugees) who face economic and social barriers in obtaining conventional medical care.

Mr. President, if we do not fund community health centers adequately, I do not know how these people will get treatment. I do know, however, they cannot afford the kinds of preventive services that community health centers provide and they will be forced to forgo periodic checkups and treatment of minor conditions which will cost the Government more in the long run.

I hope that this amendment will be accepted by the Senate so that none of our citizens will be denied essential social services.

In my view, the reconciliation resolution that is before us contains proposed reductions that are pennywise and pound foolish. If these reductions are approved, the poor in our country will become poorer and those families who are struggling to get by will be unable to adequately heat their homes, buy groceries for their families or afford basic health care services. I congratulate my colleague on this amendment and look forward to supporting it.

Mr. CHAFEE. Mr. President, I wonder if we might have order in the Senate.

The PRESIDING OFFICER (Mr. NICKLES). The Senate will be in order.

Mr. CHAFEE. Mr. President, the amendment I offer today restores modest amounts of money to programs which directly effect the lives of many Americans. While the amendment selectively restores funding for certain programs, it does not "bust the budget": In fact, if my amendment is adopted, the budget will still reduce fiscal year 1982 spending by $1.4 billion more than President Reagan recommended.

Let me summarize the amendment:

First, the elementary and secondary education program is increased by $60 million in 1981 outlays, $450 million in 1982 outlays, and $575 million in 1983 outlays. The result of these additions is to reduce the cut in this program, compared to expenditure levels in current law, from 18 percent each year (as proposed by the Budget Committee), to 8 percent in 1981, 13 percent in 1982, and 14½ percent in 1984. Budget authority for this program is increased by $575 million in 1981, $500 million in 1982, and $700 million in 1983.

As you can see, Mr. President, there are going to be cuts in all these education programs. Let us deal particularly with outlays for 1982.

The outlays in 1982 will be down by 13 percent from expenditures as in current law.

Second, the low income energy assistance program is increased by $300 million in 1982 and by the same amount in 1983 in outlays.

Mr. President, the energy assistance program is extremely important to those who are hard hit by the deregulation of oil, and deregulations I think was correct, but unquestionably it has had a devastating and extremely severe effect on those in the lower incomes who are heating their homes by fuel oil.

Outlays for the weatherization program which, after all, is an investment for the future, helps low-income people conserve energy in the future. That pro-

gram is boosted by $50 million in 1982 and $50 million in 1983.

Third, funds for the urban development action program, the so-called UDAG program, which has been universally acclaimed, are restored to the level recommended by the President, by the very sum that President Reagan himself recommended in the budget that he submitted. Those funds were taken out in the Budget Committee and this amendment restores them, $300 million.

Next, the preventive and community health program outlays are increased by $50 million in 1982 and $175 million in 1983.

What better investment can be made than in the preventive health programs and the community health programs that serve in the rural areas? They serve or assist in rural and urban programs. They cut right across the board in assisting a whole host of those who are unable to get the services from a major hospital and can use these community health centers for preventive medicine, how to stay well.

Last but not least, Mr. President, is the urban mass transit program, which, as you know, was cut very severely in the outyears, 1983 and somewhat in 1982. This restores $25 million in 1982 and $300 million in 1983.

That restoration in 1983 does not come up to 50 percent of the cut. The cut was very severe and this boosts it up toward a 50-percent cut.

All told, Mr. President, my amendment adds $60 million in 1981 outlays, $973 million in 1982 outlays, and $1.523 billion in 1983 outlays.

Mr. ROBERT C. BYRD. Will the Senator yield?

Mr. CHAFEE. Yes, I am glad to yield.

Mr. ROBERT C. BYRD. Mr. President, I compliment the distinguished Senator on his amendment. I think it seeks to restore some equity to some of these programs. I should like to be added as a cosponsor if the Senator has no objection.

Mr. CHAFEE. That would certainly be acceptable to me.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that my name be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CHAFEE. Mr. President, all Senators in this Chamber are united in our effort to control inflation. One important way to help curb inflation is to reduce Government spending.

On February 18, 1981, the President correctly and squarely set out for us the status of our economy. He later recommended a thorough list of budget reductions, most of which are incorporated into the resolution before us today. Speaking for myself, I fully support the President's effort and his overall targets for reducing the budget. There really is no choice but to make the difficult decisions necessary to reduce Government spending.

Indeed, if this amendment passes, the recommendations that the President made to the budget will be more than reduced by the sum that he presented for his budget. In other words, this is not a budget-busting item. As I mentioned before, the budget will still be over $1 billion below what the President recommended.

I think, Mr. President, as we proceed, we bear a heavy obligation to weigh the consequences of the decisions we will make. History will record whether the actions we are about to take were tempered with compassion and foresight, or whether they were made in indiscriminate haste.

The amendment my colleagues and I propose seeks a proper balance. It would assure Government outlays remain below the level recommended by the President, yet it recognizes that there are several programs—those making a special contribution to the health, well-being, and future of our people—which deserve a second hearing before we act.

Education, the largest amount here, is of prime importance in this regard. As President Kennedy once remarked, "A child miseducated is a child lost." If we cut too deeply in elementary and secondary education programs—and mind you, Mr. President, when we are through this in 1982, we will have cut by nearly 12 percent and in 1983, we will have cut by 18 percent if this amendment is enacted—we risk administrative chaos in our schools and a dramatic decline in the ability of local school systems to provide the quality of education which we must maintain if our children are to be adequately equipped to deal with the growing complexities of our world. Thus, this amendment assigns a prime emphasis to restoration of funds for elementary and secondary education.

What we are dealing with is not solely title I, which was the previous amendment. This is the elementary and secondary education category, which deals in part with title I. It deals with the education of the handicapped, education of the gifted, and a host of other programs in the Elementary and Secondary Education Act.

Let us touch on the next largest item, which is energy assistance payments and the weatherization program. Compassion and the realities of rising fuel costs dictate that we proceed with caution when the very lives of many lower income Americans are at stake. We must not reach a point where budget cuts force some of our fellow citizens—particularly those in the northern part of the Nation, and this stretches from Seattle to Boston—have to choose between heat for their homes and food for their tables. So, the amendment I am offering takes cognizance of our obligation to mitigate the adverse consequences of constantly rising fuel costs, which have been exacerbated by the recent decontrol of petroleum prices.

In the case of the urban development action program, my amendment simply seeks to restore this program to the same level as that proposed by the President. This program has been responsible for channeling new private investment into areas of high levels of poverty and unemployment, creating new jobs and generating new taxes. The UDAG program has been widely praised for its flexibility and responsiveness. Budget cuts beyond those proposed by the President would be devastating.

As for that section of my amendment relating to mass transit, the primary purpose here is to give our States and cities time to adjust to the reality of lower Federal subsidies in the future. It will take time for States and local governments to find the means to make up the loss which will come with lower Federal spending for mass transit. My amendment is a prudent and orderly proposal to deal with a pressing problem.

Finally, my amendment deals with programs of preventive and community health programs. This is clearly a case where we will surely pay more in the future for cuts made today. Preventive health programs are an investment in the future well-being of our citizens. Take them away, or sharply reduce them, and we shall face a larger bill for later health care. Similarly, community health centers provide outpatient services at modest cost, reducing institutionalization at much higher cost resulting from delayed medical attention.

Mr. President, the amendment I am offering today is a modest and prudent attempt to stay below the President's budget while relieving the burden on some of our citizens more severely affected. We have a responsibility not only to enact major spending reductions—which we have done—but to be compassionate as well.

Mr. President, I urge the adoption of my amendment, and I ask unanimous consent that a fuller explanation of each of the proposals entailed in the amendment be printed at this point in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

EDUCATION

Our education system is central to the Nation's economic progress and security. As we design our national policies toward economic recovery, we must recognize that our investment in human capital is just as important and essential as our investment in industrial capital. An educated populous is a national asset which is essential to economic revitalization, and improved productivity.

The cuts in elementary and secondary education programs contained in the bill before us, would be devastating to our Nation's public education system—at a time when it is already hard pressed to maintain its commitment to quality education for all children. The Federal programs provide the extra assistance to our local schools to improve the basic skills of disadvantaged children. We are not talking about frills or luxuries—we are talking about teaching children to read, write, and reckon.

The Title I program, for instance, has a proven record of success. The cuts which are recommended in this resolution would result in the elimination of over a million children from this program this year, and many more in 1982, and is sure to lead to many more dropouts and chronic unemployment.

Cuts in handicapped and other special education services will mean schools simply cannot keep their commitment to educating our handicapped and disabled children—about 12% of the students in this country. The foreclosure of an adequate education for these children means that a significant number of our youths will not be able to achieve their potential as productive and independent members of our society, but instead face the prospects of lifelong dependency.

The cutbacks in elementary and secondary education in 1981 are especially onerous because they place our local school districts in an untenable position. The loss of Federal monies will require the elimination of services to millions of children, and the layoff of significant numbers of teachers for the school year beginning this fall. In many States, school districts will be forced to dishonor contractual agreements which place them in conflict with State laws. For instance, in Rhode Island, notice of layoffs to teachers must be given by March 1, preceding the school year. Most States simply do not have the financial cushion to make up the difference, even if they could move that fast.

In addition, the savings which might be achieved through consolidation of elementary and secondary programs, which I support, could not be realized before Fiscal Year 1983—it would take at least that long to put this consolidation into place.

Even if the regulatory burdens and strings imposed by the Federal Government were relaxed many States have followed the leadership of the Federal Government and enacted State laws modeled on Federal laws. Rhode Island's State handicapped laws are modeled after the Federal law, and the State has committed vast resources of its own to education of the handicapped. But the withdrawal of Federal funds, especially for the next school year, is a terrible blow. Schools will have the same legal obligation—which simply cannot be met with existing funds.

Mr. President, these cuts in elementary and secondary education will cause major disruptions for our local school systems beginning this fall. They simply cannot adjust to such a loss for this coming school year, and in fact, most of their budgets have been set and commitments made. My amendment does not restore all the money to these programs, but will at least make these reductions bearable for our nation's school system so that they can maintain basic services without major disruptions.

LOW INCOME ENERGY ASSISTANCE AND WEATHERIZATION

As my colleagues know, President Reagan has proposed to establish a block grant containing low income energy assistance moneys along with several other related programs. The total amount for this block grant would be reduced by 25 percent.

My reasons for restoring this cut is clear. Energy prices have soared over the past few years, and especially this year due to immediate decontrol of oil prices. Low income families are struggling to make ends meet and be able to keep warm in the winter. The two programs designed to help them upgrade their homes and meet high energy costs are slated to be reduced by a quarter. But compassion clearly demands caution. The livelihood—indeed, the lives—of too many people are at stake to permit indiscriminate reductions.

When this body passed the windfall profits tax in 1980, we directed 25 percent of the proceeds of the tax to be used for low income energy assistance payments. We agreed that a portion of the revenues from decontrol of oil would be returned to those who were unable to adjust readily to rising fuel prices. By restoring a portion of the money slated to be cut from these energy programs, I believe we are making good on our commitment to help lower income people meet rising energy costs. In fact, the most efficient use of Federal monies would be to expand the weatherization program, thereby insulating more houses, reducing energy consumption, and lowering household energy bills.

URBAN DEVELOPMENT ACTION GRANTS

This amendment simply puts the status of Urban Development Action Grants, in 1981, back at the level originally proposed by President Reagan. In the absence of restoration of these funds, the program would effectively be shut down for the remainder of this year.

This program is highly cost-effective. Grants made under UDAG channel private investment into areas where they are most needed—areas of extreme poverty and unemployment where few other resources are available to turn around the depressing cycle of decay and blight. This program is supported by private industry and by cities, and has repeatedly been praised for being expeditious, flexible, responsive and free of red tape. The program encourages private business to revitalize distressed areas with minimum government investment by "leveraging" private investment. Firms participating in the program are required to declare in writing that but for the Action Grant, the firm could not and would not make the investment desired.

This program, it should be noted, does not require an excessive amount of federal intervention. City government and private industry jointly decide the type of project, its size, site, developer, design and financial structure. Local officials have made clear they have more influence and control over UDAG projects than any other federally-assisted projects in their communities.

Furthermore, the results stemming from this program testify to its success:

Each UDAG dollar generates $6.08 of private investment.

Permanent jobs are created at a one time cost of $6,662 each.

Cities realize $.17 in annual tax revenue for each UDAG dollar.

The figures cited above are based on contractual obligations by private business. They do not include "spin off" and indirect investment that often follows revitalization projects funded by this program.

Preserving this program at the level sought by President Reagan in his original proposal makes good economic sense, particularly in view of overall community and economic development cuts imposed upon our cities.

URBAN MASS TRANSIT

When the federal mass transit program was started, states and localities were told they were going to have a 20 year commitment. Now, we are cutting that commitment short. It is important that we give the states as much assistance as possible in coming to grips with their new responsibilities for mass transit.

For example, in my state of Rhode Island, we now receive approximately $6 million in operating subsidies from the federal government. The state contributes another $6 million towards the cost of running the transit system, with the remainder of the costs coming from the fare box. Without substantial increases in fares, or a cut back of the system, state transportation officials project that the state share of the transit costs will rise to $25 million by 1985. And, we are a small, compact state!

Any proposals by states and localities to meet these extra costs incurred by the loss of federal operating subsidies will take time to enact. Bond issues don't get prepared and approved overnight. Enabling legislation for tax increases will not be approved by state legislatures without close and careful scrutiny.

The modest restoration of urban mass transit funds proposed in my amendment will give our states and localities more time to adjust to the reality of lower federal subsidies.

PREVENTIVE AND COMMUNITY HEALTH

The Federal government alone spends almost $50 billion on health, the bulk of which goes to expensive treatment of illness and inpatient care. The preventive health and basic health services programs, which are cut in this bill, represent only $2 billion out of this total, but they represent the scandalously small commitment the Federal government has made to preventing disease and illness. To cut these programs would eliminate programs and services which will save money, not only in the future, but in this year and next.

For instance, community health centers provide outpatient primary services to low-income individuals at very modest costs—the kind of services which reduce institutionalization. The elimination of these services would simply mean that Medicare and Medicaid will have to pay for expensive hospitalization and other medical services which result from delayed medical attention.

In addition, many States, such as my own, are building their capability and commitment to health education and promotion activities, with excellent results. To cut the Federal support for these activities by one-fourth at this time would severely hamper these activities, and will cost the Federal government, State and local governments, business and private citizens untold millions in health care costs in the future.

Mr. CHAFEE. Mr. President, I yield 2 minutes to Senator STAFFORD.

Mr. STAFFORD. Mr. President, as the chairman of the Subcommittee on Education, Arts and Humanities, I am pleased to lend my wholehearted support to this amendment, which would allow for additional funds for critically needed education programs. The additions to these programs made by the pending amendment are consistent with the recommendations made by the Labor and Human Resources Committee to the Budget Committee for education programs. In its March 15 report to the Budget Committee, our committee provided for prudent reductions in funding for education, without abandoning the principal Federal purpose in education—the maintenance and extension of equality of opportunity and access to education.

Accordingly, although the committee acknowledged the President's intent to place our resources where they can do the most good, and keeping in mind that all types of Federal programs must in these difficult times face budgetary restraint, we did not follow the administration policy of across-the-board funding cuts. Such a policy would disproportionately affect those for whom Federal programs in education were designed—the disadvantaged and the disabled—those on whom we believe the Federal Government must continue to place a high priority.

As one who has been quite active as an advocate for funding increases for education, the process of reducing funding has been very difficult. The money we spend at the Federal level to educate our young people is an essential investment in our future. Other Federal programs may be suspended or reduced and perhaps be continued or augmented at a later date if need be.

This is not true for education programs—the problems of our poor and disabled children of today cannot be put off until tomorrow, nor can we expect, as a Nation, to muster 10, 20, 30 years from now great collective wisdom from children who could not participate in education programs which are truncated

today. True, our educational system has come under severe attack, and public confidence in American education appears to be eroded. Yet to reduce the emphasis we place on education is not the answer. Rather, in our budget recommendations, we have tried to identify programs which have proved the most beneficial in promoting access and equity, and reduce spending for those that are less highly targeted to this purpose.

This amendment represents a 12-percent reduction in spending for elementary and secondary education programs from the Budget Committee's baseline for fiscal years 1981, 1982, and 1983, relative to the approximately 20 percent reduction reported by the Budget Committee for these programs. The justification offered by the Budget Committee and by the administration for this level of reduction is that consolidation of these programs will achieve substantial administrative savings at the State and local level, by removing many of the costly requirements of Federal mandates.

Certainly, substantial savings may be gained through the most efficient operation of Federal education programs at the State and local level. However, the plan proposed by the administration to consolidate numerous categorical education assistance programs into two forms of block grants requires substantive changes in education law under the jurisdiction of the Education Subcommittee. This plan has not yet been finalized by the Department of Education, and it is highly problematic whether such a proposal may be enacted in order to achieve the envisioned administrative savings in the current fiscal year.

Thus, any reductions in spending in fiscal year 1981, such as those proposed in the administration's rescissions for fiscal year 1981, will come not from administrative overhead, but at the expense of real services to children, principally the educationally and economically disadvantaged children served by the compensatory education program—title I—of the Elementary and Secondary Education Act, and disabled children served by the Education for All Handicapped Children Act. Under these reductions, approximately 1.1 million disadvantaged children would be dropped from title I in the current fiscal year, and 1.3 million in fiscal year 1982. Similarly, some 750,000 handicapped children would be dropped from programs under the Education for All Handicapped Children Act, precluding disabled children from receiving the services to which they are entitled under that statute.

Mr. President, with respect to the Budget Committee's savings recommendations for student aid programs, I believe that, while there may be some differences between the Budget Committee's assumptions and policy recommendations and those of the Committee on Labor and Human Resources, we can approximate the levels of savings recommended by providing for better targeting for guaranteed student loans and Pell grants. Our committee intends to achieve these savings through legislative modifications in the needs analysis system for Pell grants and campus-based student aid, which would reduce eligibility for nonneedy students. Regarding the guaranteed student loan program, the committee intends to achieve savings in this program through the elimination of convenience borrowing and through the retargeting of GSL's to financial need, while retaining the critically important payment of interest for students while in school, which enables students to make prudent college choices without additional and unreasonable financial burdens.

Mr. President, the second item in the amendment which I would like to express my strong support for is the added funding for the low income energy assistance program. As all of us well know, poor people in this country, and particularly the elderly, have been very hard hit by dramatically increasing fuel prices. Heating is not a luxury in Vermont, it is a lifesaving necessity. The low-income energy assistance program has given much needed assistance to our poorest citizens so they can continue to heat their homes in winter. Last year, when the Congress created an expanded low income energy assistance program, we took great care in constructing a program which gave the States great administrative flexibility, particularly to meet the needs of people who have never participated in Federal or State welfare programs.

A good number of these people are elderly who are struggling to exist on a limited income and are now paying up to half of that income simply for fuel. Without some assistance from the Government these individuals might not survive through the winter. I oppose efforts to cut this program when fuel prices are skyrocketing out of sight.

Mr. President, as I mentioned earlier, I would prefer not having to make any reductions in education program funding, and I would certainly prefer to have this amendment include amounts over and above the additions made, for both elementary and secondary and higher education. I believe that this amendment will be a first step in the Senate's recognition that we must provide for appropriate investments in education to support our national future, and I urge its adoption.

Mr. CHAFEE. Mr. President, I ask unanimous consent that Senator RANDOLPH be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. RANDOLPH. Will my colleague yield?

Mr. CHAFEE. I am delighted to yield 1 minute to the distinguished senior Senator from West Virginia (Mr. RANDOLPH).

Mr. RANDOLPH. Mr. President, I have come over close to the Senator not just because I am privileged, because of his cooperation, to be a cosponsor, but because I think that the presentation of his argument is well reasoned. I believe that there are times in this body when, if we cannot secure, let us say, on one side of the aisle or the other what we desire, when there is an opportunity to strike a balance, in effect, we ought to join very actively and earnestly in that effort; not that I shall be able to help with other Members, but I shall talk with other Members in the hope that this amendment can be adopted.

Mr. CHAFEE. Mr. President, I am certainly very grateful to the distinguished senior member of the committee on which I have served with such pleasure for so many years.

Mr. President, one final comment if I might. This amendment is no Christmas tree. There is a host of popular programs which were rejected by those of us who considered this amendment. Each of us could have added scores of other programs, but we resisted that because we wanted an amendment that stuck to the basic essentials: Education, heat, and energy conservation, health, mass transit, and jobs, and the President's recommended levels for budget cuts. These, we believe, are worth a second hearing.

Second, some have suggested that this is a regional package, a so-called northeastern amendment. That just is not so, Mr. President. Since when is education regional? Since when is rural health regional, or mass transit, which is going to assist Birmingham as well as Pittsburgh, Boston, Spokane, Cleveland, and Seattle? What about weatherization? Perhaps that can be accused of being something for the North. The North stretches a long way. It goes from one coast to the other and down to the Sun Belt. These are the areas that have been hit by the deregulation of oil. These add-ons, Mr. President, go nowhere near restoring the total amount of the cuts that were made.

Mr. President, I am delighted to yield to my distinguished chief cosponsor in this amendment, the senior Senator from Pennsylvania (Mr. HEINZ), who has worked so hard on this amendment.

STATEMENT CONCERNING UP AMENDMENTS NO. 34—TO RESTORE FUNDS FOR CERTAIN PROGRAMS

Mr. HEINZ. Mr. President, I recomend my distinguished colleague from Rhode Island (Mr. CHAFEE) for all the work he has put into perfecting this amendment. I am pleased to join him as the prime cosponsor of this important effort.

Before addressing the merits of specific provisions contained in the Chafee amendment, I would like to put it in perspective. First of all, this is not an amendment that would drive spending in fiscal year 1982 or 1983 above the level recommended by the administration. For example, the Budget Committee brought to the Senate floor a reconciliation resolution whose provisions for fiscal year 1982 ask the Senate to cut spending under extraordinary budgetary procedures by an amount $2.3 billion greater than the President requested. What the Chafee amendment seeks to accomplish is to add back just under $1 billion. If it passes, the Senate will still, under this resolution, be cutting the budget by $1.3 billion more than the White House has requested of the Congress.

Progress on spending restraint is essential if the Federal deficit is to fall and sufficient room in the budget can become available to permit substantial tax reduction. Therefore, I concur with the need to make substantial reductions in the rate of growth of the budget and by the order of magnitude suggested by the President.

Nevertheless, I urge the adoption of the Chafee amendment. I do so because it contains restorations in funding for five programs vital to people, including citizens in my State, and because I believe the spending cuts as recommended call for unequal sacrifice on behalf of the Northeast-Midwest regions of the country. Let me take up now the question of regional fairness.

In late February, I sent OMB Director David Stockman a letter requesting that his staff provide me with an analysis on the per capita distribution of proposed budget cuts by region, along urban and rural lines, and on a large State-by-State basis. I ask unanimous consent at this point to insert this letter in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

COMMITTEE ON FINANCE,
Washington, D.C., February 23, 1981.

Hon. DAVID STOCKMAN,
Director, Office of Management and Budget, Old Executive Office Building, Washington, D.C.

DEAR DAVE: This is to confirm in writing the verbal request I made of you at lunch a few days ago for a regional analysis of the President's proposed spending reductions.

Specifically, I would appreciate an OMB analysis of the combined package of all proposed spending cuts and increased user fees, by region, for urban areas, and for Pennsylvania. I would also suggest that the analysis be stated on a per capita basis as follows:

1. Regions: Comparison by Federal Regions.

2. Urban Areas: Top 25 SMSA's combined vs. Rest of USA.

3. Pennsylvania: Pennsylvania compared individually to five other large states—New York, Illinois, California, Michigan, Texas.

I believe this analysis is central to the legislative prospects of the Administration's spending and tax reduction package. While many current questions relate to its impact on families with different incomes, equitable questions concerning the impact of the entire package to particular regions, urban areas, and states should not go unanswered.

Sincerely,

JOHN HEINZ,
U.S. Senate.

Mr. HEINZ. It is now more than a month later since that letter was sent, and I am still waiting for the information required to determine the fundamental fairness of the spending cuts proposed by OMB. I have since learned that other Members of the House and Senate from the Northeast-Midwest region have made similar requests. I am unaware of any replies from OMB on this subject.

Therefore, I think it is reasonable to assume that the educated judgment of several budgetary analysts that the spending reduction package does indeed call for unusual sacrifice from portions of the country is correct. Since the Budget Committee, in its report on the reconciliation resolution, has made it clear that they have made comparatively minor changes in the OMB proposals, the presumption of regional unfairness must carry over to the document they have submitted for Senate consideration.

It should be remembered that recent Federal actions have also tended to assist other areas of the country to the detriment of the Northeast and the Midwest. The only area of the budget slated for an increase is defense. I concur with the need to do more here.

After years of retrenchment, it is only prudent to shore up our defenses during these dangerous times.

However, the additional dollars will flow in an uneven fashion toward the Sunbelt if past practices are repeated. I know of no reason to expect that they will not.

There is also the question of oil decontrol, an issue I will return to later in a different context. The decision to permit crude oil decontrol to continue as planned will provide a boon to oil rich States. In fact in one State, Alaska, the effect has been so large that the State government has decided to provide rebates to State taxpayers. Unlike taxpayers in the Northeast who must carry a difficult State and local tax burden, that State can afford to abolish its State income tax. The effect on my taxpayers, however, will be to require them to pay higher utility bills in their capacity as consumers.

What the Chafee amendment does is to restore funds in a way that should reduce this new bias against my region of the country contained in the resolution now before the Senate. It does so by restoring funds to five programs vital to the Northeast and Midwest. I now take these up in turn.

First, the Chafee amendment restores $60 million in fiscal 1981, $450 million in fiscal 1982, and $575 million in fiscal year 1983 for primary and secondary education. The effect of these restorations is to limit the cut in these areas to 4 percent in fiscal 1982, instead of the recommended 12 percent, and to cut by 11 percent in fiscal year 1983, instead of the recommended 20 percent for that year as well.

These additional funds are solely needed for two reasons. First, Federal funding for education remains the most important investment the Government can make in the young people of this country. I do not believe the level of our investment should be allowed to fall sharply at a time when the educational system is not operating as well as we wish it would.

Additionally, lowering the level of Federal support for primary and secondary education means that local governments will have to make up the difference. For property owners, that means higher taxes since that is the way local governments raise a significant portion of their funds. Homeowners on fixed incomes or who are unemployed will be faced with a new burden they did not anticipate and cannot afford to shoulder. This means the cuts are unfair not only to children, but to the elderly and the economically vulnerable as well. This should not be allowed to happen.

Second, this amendment restores funding for low-income energy assistance and for the weatherization program. The Budget Committee recommends cuts that will equal over 50 percent in fiscal 1983. The amendment restores $350 million to these programs, an amount equal to 25 percent more than called for under the resolution. I only wish it would be possible to add more back in this badly needed program. It is the only right thing to do.

When the proper level of funding for low-income energy assistance and weatherization programs is considered, it raises questions of equity and survival. During debate 2 years ago on crude oil decontrol, the Congress agreed to permit phased decontrol of crude oil prices to move forward as previously authorized by law provided a windfall profit tax was put into place as well. The Congress agreed at that time to earmark a portion of the revenue raised by the new tax specifically for assisting the poor and the elderly who would face difficulty in paying their energy bills due to decontrol.

For the Congress it was a question of equity but for many recipients it remains a question of survival. Next winter, they will face the choice between heating and eating. I believe we have a responsibility to honor the commitment we entered into previously.

Retaining funds for the weatherization program is especially important. By insulating the homes of recipients of energy assistance funds, the Government will save money. In the long run, it is a bargain.

Third, this amendment proposes to restore $98 million in fiscal 1982 and $128 million in fiscal year 1983 for the successful urban development action grant program. Under this program, eligible municipalities acquire funds that can be used to secure private sector money of a magnitude many times higher than the Federal grants for development purposes. Given the need to attract population back into the cities and to strengthen our urban tax base, it is ill advised to act on this program for urban renewal below what the President has recommended. We seek, under this proposal, to do no more than to restore the level of funding sought by the Reagan administration, and not a penny more.

Fourth, the amendment restores $50 million and $175 million for fiscal 1982 and 1983, respectively for preventative health services. Of all the approaches available to slow the runaway cost increases in health care, both to the Federal Government and to the Nation as a whole, none offer more promise than preventative health care. An ounce of

prevention is truly worth a pound of cure.

Under the committee proposal, numerous preventative health programs now run at the Federal level would be combined into a single block grant and sent to the States at a funding level 25 percent below the amount that would otherwise be provided under current law. Even if there are significant administrative savings by cutting out administrative redtape, it will be difficult indeed to maintain current services, and this is very serious. Funds now go toward rat control, child immunization, for the prevention of lead poisoning, and for other similar purposes.

Finally, the amendment calls for $25 million and $300 million in additional spending for mass transit in fiscal year 1982 and 1983. If these funds are restored, Federal support for mass transit will stablize at $3.9 billion in each of the fiscal years affected by the reconciliation resolution, fiscal years 1981, 1982, and 1983, although it will still be well below the levels proposed by the Carter administration. Under the committee proposal, Federal funding in fiscal 1983 for mass transit would drop off substantially.

Mass transit should be viewed as an important way not only to achieve pollution control, but as an investment in energy efficiency. We will need many such investments if we are to free ourselves from the dependency forced on us by the OPEC cartel. In relation to current services, even after $300 million is added back into the fiscal year 1983 budget as we propose, mass transit will still take the equivalent of a cut of 10 percent.

No one can argue that mass transit would be spared by passing this amendment. Local operating authorities will still feel the pinch, and their customers will still have to pay higher fares. But at least to a certain degree, the increases will be muted enough to insure significant ridership of major mass transit systems in the country. Without this amendment, the same cannot be said.

To conclude, Mr. President, this amendment deserves the wholeheated support of all Senators. It restores regional equity. It permits the Senate to stay within the budget sought by the President of the United States. And finally, it permits certain programs whose value is readily established to retain their integrity. For all these reasons, I urge my colleagues to support it.

I thank the Senator from Rhode Island for yielding.

Mr. CHAFEE. I thank the Senator.

Mr. President, I ask unanimous consent that the names of Senator RIEGLE, Senator LEAHY, Senator DIXON, and Senator WILLIAMS be added as cosponsors of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KENNEDY. Mr. President, will the Senator yield?

Mr. CHAFEE. I yield.

Mr. KENNEDY. Mr. President, I ask unanimous consent that my name be added as a cosponsor of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KENNEDY. Mr. President, will the Senator yield me 4 or 5 minutes?

Mr. CHAFEE. Mr. President, how much time do we have?

The PRESIDING OFFICER. The Senator has 9 minutes remaining.

Mr. CHAFEE. We can get some on the resolution, can we not?

Mr. DOMENICI. Yes.

Mr. CHAFEE. Can the Senator wait?

Mr. KENNEDY. That is fine.

Mr. CHAFEE. Mr. President, I yield 4 minutes to the Senator from Maine.

Mr. COHEN. Mr. President, I am pleased to lend my support to the amendment offered by the distinguished Senator from Rhode Island (Mr. CHAFEE.)

The Chafee amendment would restore slightly less than $1 billion in the areas of education, energy assistance, health services, mass transit, and community development grants. Should the amendment be adopted, the spending reductions proposed by the Budget Committee will still exceed those recommended by President Reagan.

I should like to comment briefly on some of the budget modifications incorporated in the Chafee amendment.

In Maine, there are currently over 33,000 children being served by ESEA title I programs. These programs provide funds for children in low-income areas, children in institutions for the handicapped, and neglected and delinquent students. Without adequate assistance from the Federal Government, Maine, along with many other States, will simply be unable to meet the needs of these special students.

Administrators, teachers, and parents alike have repeatedly told me that these special education programs are producing significant results, and that the withdrawal of Federal assistance can only jeopardize the success of these special programs. It would be unfortunate and shortsighted for us to permit this to occur.

Mr. President, I have been encouraged by education representatives from Maine who have told me that they are willing to bear a fair share of the budget cutting burden in order to hold down inflation and eventually bring the Federal budget into balance. The modest budget restoration for ESEA programs embodied in the Chafee amendment recognizes the need for fiscal restraint, but it also acknowledges the crucial role that special education programs play in preparing our children for adulthood.

As a Senator from a cold weather, oil-dependent State, I am particularly sensitive to the hardship that has resulted from the unrelenting increases in energy costs. In just the past 3 months, the price of heating oil has risen from $1 a gallon to nearly $1.40. This has created a crisis of unprecedented dimensions in Maine, a State with a high concentration of elderly and low-income individuals.

Many low-income households now spend nearly 40 percent of their disposable income on energy. Study after study has shown that low-income individuals have reduced their energy consumption more than any other group within our society—often at great risk to their health. Yet a growing number of Maine citizens, despite heroic efforts to save energy, are finding it impossible to meet their basic heating expenses. Many are being forced to choose between heating their homes or feeding themselves and their families.

In recognition of the desperate plight of many elderly and low-income Americans, the Congress last year appropriated $1.85 billion to help these individuals meet their energy needs. It has been helpful, but it has not been enough.

The administration has recommended a 25-percent reduction in fuel assistance for fiscal year 1982. Even if the price of energy remains constant over the next year—an unlikely possibility—a 25-percent reduction in fuel assistance will expose millions of low-income Americans to great risk. Clearly, we cannot permit this to happen.

Of particular concern to me is the President's proposal to terminate the Department of Energy's low-income weatherization assistance program. The President has proposed no future funding for this valuable program and has requested a rescission of $6.9 million for this fiscal year. These recommendations have been accepted by the Senate Budget Committee and are included in the budget resolution we are considering here today.

Termination of the DOE weatherization assistance program will effectively end all efforts of the Federal Government to help low-income individuals reduce their consumption of energy. It is true that communities which receive HUD community development block grant (CDBG) funding may request funding for weatherization activities. However, it is equally true that very few communities include weatherization activities in their community development projects because other activities are considered to be of a higher priority. Since the administration is not proposing any additional budgetary authority for the HUD CDBG to reflect inclusion of weatherization activities, it is doubtful that many communities will receive this type of assistance.

Of greater significance is the fact that 80 percent of CDBG funds went to metropolitan areas and urban counties in fiscal year 1980. The remaining funds went to rural areas. But, of the 139 million people living in rural areas, only 32 percent lived in communities receiving CDBG in 1980. Thus, if the administration relies on the HUD CDBG program for weatherization activities, the vast majority of low-income Americans living in rural areas will never receive Federal weatherization assistance. Since ap-

proximately 42 percent of all low-income households live in rural areas or small towns, this affects a disproportionately large number of people.

It is disappointing that in the face of rising energy prices and overdependence on foreign oil we would terminate a proven, effective method of reducing oil consumption. Although the DOE weatherization assistance program was initially plagued with many problems, it has become a very effective and valuable program.

A recent study compiled by Urban Systems Research and Engineering in Cambridge, Mass., has confirmed that actual energy savings of 16–35 percent have resulted from the weatherization assistance program. In terms of energy saved, the 1 million homes weatherized to date represent a savings of about 2.5 million—5 million barrels of oil equivalent per year. At $36 a barrel, this represents a savings of $90 million to $185 million.

In view of the impressive energy savings resulting from this program, DOE's progress in reducing the number of homes in need of weatherization must not be halted. If this rescission request is accepted, more than half of the States will be forced to terminate their weatherization activities well in advance of the end of the fiscal year.

Maine, which has been operating an ambitious weatherization program since 1973, will run out of funds in June. To penalize the States that have developed the most effective weatherization programs by rescinding these funds, is shortsighted and contrary to our efforts to cut back on energy consumption.

The Senate Special Committee on Aging, of which I am a member will be holding a hearing on "Energy and the Aged: An Evaluation of Alternative Assistance Strategies" on April 9. The administration's proposal to terminate the DOE weatherization assistance program and alternatives will be discussed at the hearing. The future of the weatherization assistance program can be discussed at a later date, but we must decide today whether to terminate weatherization activities prematurely in many States.

There is also a clear need to adequately fund preventive health programs and rural health care activities. Medical services in this country tend to be concentrated in urban America, where there exists the institutional and societal concentration of support for comprehensive care. Urban America has the means to better support fair and adequate delivery of health care, in part because the market demand is present in metropolitan centers. Rural America lacks the necessary concentration and centralization of social structures to support comprehensive health care.

Medically underserved areas are synonymous with rural areas. Rural America has 58 percent fewer doctors, 38 percent fewer dentists, and 29 percent fewer nurses on a per capita basis than urban and suburban America. The only solution for rural residents is to travel long distances, at personal expense, or to do without necessary medical care. The ultimate cost is high in either case.

If our market system of allocating the delivery of health care services does not satisfy the greater needs of rural residents, then the Government has the responsibility to support efforts by States and local governments to reach out.

Recently, in Maine, a Statewide network of 38 rural health centers has developed into a full service delivery system, with a special mission to farm families and their children, and to the rural elderly who are often isolated from their communities. These centers are within reach of one-quarter of the State's population and currently serve more than 100,000 residents annually.

I would emphasize that more than half of the centers were built and funded by local residents who responded to the need for accessible health care in rural Maine.

The continuation of 22 of Maine's rural health centers are in jeopardy if Congress accepts the reduction of the budget in health areas as recommended by the President. Congress must take into account the differences between urban and rural America and respond appropriately. We cannot treat alike regions of the Nation that are inherently different—such action is as unjust as treating differently members of the population who are equal.

If any of my colleagues doubt that the differences between urban and rural America are not painfully felt every day, especially by the rural elderly, I would ask them to consider one graphic statistic: The rural elderly although they pay for their full share of medicare coverage, receive 40 percent fewer benefits than their city counterparts, simply because those benefits are either not available, or are not accessible.

Maine's rural health network has begun to make those benefits both available and accessible for the first time. We cannot speak of comprehensive health care in America until we narrow the gap between medical services in rural America and urban America.

Mr. President, there is no question that the Nation's economy is in crisis. The damage that inflation inflicts is evident in every direction that we look. It is undermining our Nation's economic, moral, and political strength, and destroying the hopes and aspirations of millions of Americans.

The dramatic change in Federal spending patterns embodied in this reconciliation resolution will not, by itself, restore health and vitality to our economy. Inflation will not suddenly disappear overnight when the Federal budget is balanced, as it must be.

But restraining the rate of growth in Federal spending is a critical element in any economic recovery program. It is an imperative that we cannot deny any longer, however painful the consequences may be.

About a year and a half ago, my friend and former colleague from Maine, Senator Muskie, was in the position that the Senator from New Mexico finds himself in today.

Like today, the Senate had under consideration a budget reconciliation bill. Let me quote briefly from Senator Muskie's statement, for his comments are as relevant today as they were 18 months ago:

> I cannot think of a constituency impacted by the reconciliation instructions who have come to any Senator and urged that the Senator support the cuts. But does that mean, Mr. President, that we have to wait in this body and in the Congress until the impacted constituencies ask for their own programs to be cut? Mr. President, how long do you think it would take to get a balanced budget if we were to wait until the cuts met that test?
>
> Mr. President, we are never going to have budgetary discipline, we are never going to get the budget balanced, we are never going to get rid of inflation until the majority is willing to say there comes a time when restraint has to be the measure of public policy. Inflation is robbing veterans, inflation is robbing school children, inflation is robbing senior citizens, inflation is robbing farmers, inflation is robbing the defense, inflation is robbing the housewife, inflation is robbing everybody. And whenever a group with political clout seeks to insulate itself from inflation at the cost of others without as much clout, all that happens is that inflation of rising expectations begins to overwhelm all of us.

Mr. President, the Chafee amendment recognizes the need to reduce the level of Federal spending while responding, in a very modest fashion, to the real and legitimate needs of our most rural and disadvantaged regions of the country.

Mr. President, I should like to address one of the central issues to this debate, and that is the issue of regionalism.

Perhaps the most frequent charge made against this amendment is that it is regional in scope and purpose. I do not believe that is so, because we have urban development action grants and mass transit, and those are not regional so far as Maine is concerned. We have elementary and secondary education, and that is not regional.

Perhaps it is regional when we talk about energy assistance and weatherization, and I make no apologies for being regional in my concern in that respect.

I was trying to think of some parallel or parable I might cite to sum up what I think is taking place so far as the whole notion of equity in this country is concerned.

I think of a situation in which a ruler went to a village and said to the villagers: "You have been wasteful and inefficient. You have spent beyond your means. You have stolen from future generations. You have robbed from your children and your grandchildren so that you might satisfy your own needs, and you have sought personal gratification at the expense of security and stability of future generations. Now you have to pay a penalty. Now you have to endure pain and suffering and make sacrifices.

"So, by virtue of a royal decree, I am

ordering that each of you sacrifice your right hand. No one will be spared. Everyone will be treated equally."

As reasonable men and women, would we conclude that equity had been done? Would we not, first, have to ask whether or not everybody in the village had been wasteful and inefficient? Would we not have to ask whether these programs have worked well in some areas, whether they have benefited the children and the rural poor in some areas better than in other parts of the country?

Second, we would want to know whether each person had two hands. If you take one hand from a person who has two, that is one thing. If a person has only one hand to begin with and you lop it off, you have an entirely different situation.

I submit that that is exactly the situation we face in some regions of our country. On the one hand, we are asked to support oil decontrol, so the price goes from $1 to $1.40 a gallon, and we supported that. Even though we live in one of the most low-income parts of the country, we supported that.

Second, we say that we will have to cut out the home weatherization program. We will have to reduce the fuel subsidy by 25 percent and tell the people to endure. That simply is not equity. It is not equity to say to the people who live in the cold regions of this country, who live in the most low-income areas of the country, "Your fuel prices are going to go up dramatically; and, correspondingly, we are reducing the fuel assistance program and the home weatherization."

As to home weatherization, a recent study compiled by the Urban Systems Research and Engineering, in Cambridge, has confirmed that actual energy saving from the weatherization program, which has affected some 1 million homes, is roughly an equivalent saving of 2.5 million barrels of oil a year.

I should like to call the attention of my colleagues to a favorite subject of mine—Dickey-Lincoln. The Senate has gone on record, year after year, as being in favor of a $1 billion boondoggle or dam construction program to produce roughly 2.5 million barrels of oil a year equivalent.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. CHAFEE. I yield the Senator 1 additional minute.

Mr. COHEN. We were prepared to spend $1.5 billion to produce a dam to save roughly 2.5 million barrels of oil annually. Here we have a system by which we can conserve it with a much lower investment, with a much more rational plan than trying to produce energy at an extraordinary cost, and we have failed. We are saying that we are not even going to spend a modest amount of money on a conservation program which benefits a much larger number of people.

Mr. President, I support the Chafee amendment. I believe that he has tried to achieve the Reagan administration goal of reducing the expenditure levels of this country and at the same time reach a level of equity which recognizes the needs and differences in the regions of our country.

Mr. CHAFEE. I thank the Senator from Maine very much for his fine remarks.

Does the Senator from Massachusetts wish 4 minutes?

Mr. KENNEDY. That will be fine.

The PRESIDING OFFICER. The Chair advises the Senator that he has less than 4 minutes remaining.

Mr. KENNEDY. I yield myself 5 minutes on the resolution.

The PRESIDING OFFICER. Without objection, the Senator is recognized for 5 minutes on the resolution.

Mr. KENNEDY. Mr. President, I commend my colleague and friend from Rhode Island for the submission of this amendment and for the presentation that he and his cosponsors have made, urging the Senate to accept this proposal.

I will not spend time making a presentation to the Senate in urging the acceptance of the education proposal. Since we have discussed and debated that item, I will just say a brief word about low-income fuel assistance.

I believe it is important to note as has been pointed out, that this kind of fuel assistance applies not only to the colder climates but also to the warmer climates. It affects not only people who suffer from hyperthermia but also those who suffer from hypothermia. It is important to understand that it is basically a national program.

I remind the Senate that when we accepted the windfall profit tax, it was understood generally in the Senate that we would earmark at least one-quarter of the windfall profit tax to be used as fuel assistance for needy people in our country.

The Treasury will recover approximately $20 billion this year from the windfall profit tax, which would make that commitment about $5 billion. The amount that was recommended by the Carter administration in the budget was $1.85 billion. That has been reduced substantially by the Budget Committee; and even with the Chafee amendment, we will not even get near that figure.

So this is a bare-bones program for low-income fuel assistance; and I believe that the needs of our senior citizens in particular and other needy people demand that we accept this lower, but important, figure that is included in the Chafee amendment.

Mr. President, in the area of weatherization, I believe that we have found over the course of hearings is that, the neediest people, the elderly people, people in rural America as well as the inner cities, actually conserve more than the general population. The figures on that indicate that it is about a 25-percent reduction, in spite of the fact that they do not have insulation.

Weatherization is a very modest program to help what is a national objective of conservation of energy and reducing heating costs.

When we look at our neighbor to the north, Canada, we see the very vigorous program they have embarked on in terms of weatherization as a matter of national policy, and we can understand the importance of that program.

The UDAG program is an enormously imaginative program of both public and private efforts to use limited Federal resources to leverage the private sector. There are many communities in my State of Massachusetts that can testify to the enormous success of this program. The amendment represents a modest effort to preserve this vital program.

The case for supporting mass transit has been made and made eloquently today, and I will not repeat it here today. Mass transit is a key component of energy conservation and an essential element of our transportation system. This amendment is necessary to keep the commitment to mass transit alive.

Mr. President, I want to stress the importance of the health prevention and health services component of the Chafee amendment. It was my intention to offer a health prevention and a community health services amendment that was just about identical to that portion of the Chafee amendment.

Because adequate funding of health programs is compelling I shall take just a moment of the Senate's time to stress the importance of programs aimed at disease prevention, health promotion, and primary care. For every health dollar that we spend in the United States only 2 cents is actually spent in the area of prevention, an extremely modest amount. But the return on that dollar in later health costs saved, and suffering avoided, is many times greater.

If we look at the number of children who would have been afflicted by polio and those children who today are safe because of the Salk or Sabin vaccines, the amounts of money that would have been spent on iron lungs. I think the importance of a strong immunization program is readily apparent. A similar argument can be made for a strong program in the areas of hypertension, in rat control and lead paint poison prevention, and many of the other prevention activities that are included in the disease prevention portion of the Chafee amendment.

The President's overall budget request which was followed by the Budget Committee would have reduced the prevention program by some 25 percent from 1981 or 32 percent below current services, and even with this amendment, we are still going to see a significant reduction in funds for preventing diseases. But prevention dollars are probably the wisest money that can be spent for health, and I commend the Senator for

including additional funds for prevention in his amendment.

The Chafee amendment also provides additional funds for community and neighborhood health centers, the migrant health centers, and the black lung clinic. These programs keep people out of high-cost facilities either in urban areas or in rural communities, and provide vital comprehensive primary care.

That is wise expenditure of funds. It actually saves money, whether it is Federal money or private money. It also treats individuals early in the course of their illness and sickness and, therefore, helps avoid more serious complications of disease and also lowers the cost of effective treatment.

I urge my colleagues to support this amendment. Included in it are programs which are absolutely essential, and I think it is important to understand that even with these additional funds we are still going to be well below the amounts that were provided in these areas a year ago.

It seems to me that these different programs highlight the areas of human need that exist in all different parts of our country.

I commend the Senator from Rhode Island for offering this amendment and for his colleagues in being willing to cosponsor it. I thank him for yielding the time.

Mr. CHAFEE. I thank the distinguished senior Senator from Massachusetts.

I ask unanimous consent that Mr. TSONGAS, Mr. PELL, and Mr. CRANSTON be added as cosponsors.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PERCY. Mr. President, will the Senator yield?

Mr. CHAFEE. I yield to the Senator from Illinois.

Mr. PERCY. Mr. President, I rise today in support of the amendment offered by my good friends, the Senator from Rhode Island (Mr. CHAFEE), the Senator from Pennsylvania (Mr. HEINZ), that I cosponsored. I have been working with them on this amendment, and I urge my colleagues to vote for it.

At the outset, let me state that I strongly support the President's program. I am a cosponsor of both the original reconciliation bill introduced earlier this year and of the President's tax cut.
